Section 200

When he was in the Ouyang family, he collected a large number of magical jade slips.

And the one in his hand is one of them.

Zhang Yuhe had already planned to deduce an escape method suitable for him.

After understanding the laws of space, he looked down upon ordinary immortal escape techniques.

He plans to create a more powerful supernatural power based on the laws of space that can match the power of the laws.

...

Time passes slowly.

The lightning-absorbing pillars of low-grade immortal weapons were quickly refined by him.

More than a hundred pots and cauldrons were started at the same time.

It takes almost half a year to complete a round of refining without ever failing.

It's all done right the first time, and not a single bit of material is wasted.

Zhang Yuhe made a rough estimate.

As long as the materials are supplied in time.

It only takes about five hundred years for him to refine all 10,081 immortal thunder-absorbing pillars.

After the original discussion ended.

The Golden Immortal monks from the three major forces dispatched collectively, bringing with them a large amount of Immortal Spirit Stones and various rare resources.

They went to cities in various sea areas one after another.

They either use fairy stones to buy it, or use other resources to exchange for it.

Slowly, Zhang Yuhe collected and refined the materials for the lightning absorbing pillar.

Suddenly, in the entire Ji'an sea area, only the Golden Immortal monks were left among the casual cultivators.

Among the three major forces, not even one of the Golden Immortal cultivators remained.

Whether it's Lian Zhengyu, Yu Liwei, Long Xingxiu and others.

None of them stayed, but took the Fairy Spirit Stone to various sea areas.

However, everyone is not worried about the safety of their respective forces.

Because Zhang Yuhe is still in Daosheng Sect.

As long as Zhang Yuhe is here, there is no fear of others making trouble.

As early as ten thousand years ago, Zhang Yuhe could kill Ouyang Tianwu, a veteran golden immortal monk, with one stick.

Now he has reached the level of True Immortal Dzogchen, although he has not yet taken action.

But everyone knows it.

Ordinary Golden Immortal monks don't want to dance around in front of this supreme genius.

Therefore, even the three major forces did not leave any Golden Immortal monks to take charge.

The entire Ji'an sea area is still calm as usual.

No one dares to jump out and cause trouble.

All the Golden Immortal Ancestors will continuously send the collected materials to Dao Sheng Sect.

However, the speed at which they collected materials could not keep up with Zhang Yuhe's speed at refining weapons.

Three hundred years later.

Zhang Yuhe walked out of the weapon refining hall.

During these three hundred years, he refined a total of more than 6,000 thunder-absorbing pillars.

It's not that he doesn't want to continue, it's just that he has no more materials.

The original inventory of more than 4,000 materials, plus the materials sent later, have all been consumed by him.

There are less than 4,000 lightning-absorbing pillars left.

Zhang Yuhe was not in a hurry.

Maybe some Golden Immortal Ancestors may have collected a large amount of materials.

Just haven't returned yet.

The South China Sea Immortal Territory is extremely vast, with hundreds of sea areas distributed below.

Even the ancestor of Jinxian can fly by himself.

It also takes a lot of time to travel back and forth from other sea areas.

If you run to a place far away from Ji'an sea area, it will take a long time.

Just more.

Zhang Yuhe came outside the main hall.

He quickly flew out of the mountain gate, and his body was like a bolt of lightning, moving back and forth across the sea.

Suddenly Zhang Yuhe stepped on his left foot, and ripples appeared in the void.

In an instant he appeared hundreds of miles away.

"Haha, I've finally been able to demonstrate this magical power of the Milky Way Dragon Body."

Seeing the effects of the magical power, Zhang Yuhe was very satisfied.

During these three hundred years, he did nothing but refine thunder-absorbing pillars.

He has been deducing the magical power of escape.

It was not until recently that the deduction of this magical power was roughly completed.

Zhang Yuhe named this new magical power the Galaxy Wandering Dragon Body Technique.

After being integrated into the laws of space, this movement technique can completely achieve the effect of teleportation.

Of course, adding the power of law requires consuming a lot of immortal energy.

Even though his Dantian was as big as the sea, he still couldn't support himself in using this magical power for a long time.

In order to solve this problem, he split this magical power into two modes.

In the case of normal mode.

It does not need to be accompanied by the power of space laws, and it can still fly at extremely high speeds.

Moreover, the flying speed is more than three to five times faster than the ordinary immortal escape technique.

Once the power of space law is attached.

Using the Galaxy Wandering Dragon Body Technique with all your strength, he can appear hundreds of miles away in an instant.

The perfect thing is the teleportation effect.

With this magical power.

Zhang Yuhe felt that he was already invincible under Taiyi Immortal.

No matter how awesome the genius is, as long as he has not broken through to Taiyi Immortal.

It would be impossible to catch up with him.

Who can catch up with someone who can teleport?

Even if it requires a great Luoxian, right?

After testing his magical power, Zhang Yuhe felt extremely satisfied.

He quickly returned to the Weapon Refining Hall and waited quietly for the Golden Immortal Ancestors to send back the materials.

Another two hundred years passed.

The ancestors of Jinxian who went to various sea areas returned one after another.

They brought back a lot of material.

Zhang Yuhe took a general look and found that there were more than 6,000 pieces of materials in total.

There were more than two thousand copies more than he needed.

There's nothing we can do about it.

These golden immortal ancestors traveled to various places.

Some people were too far away to use the Immortal Mirror to contact.

When they saw the right materials, they bought them directly.

Now there is still some surplus.

However, in this way, the foundation of the entire Ji'an Sea has been basically emptied.

In order to help him buy materials, the three major forces took out a large amount of immortal stones and various resources.

But only he can build the Tribulation Platform.

Then all this is worth it.

If the immortal stones are gone, they can be earned again.

If there are no resources, they can be collected later.

But for every additional Golden Immortal, the major forces will have more confidence.

No matter where the Golden Immortal cultivators are, they can be regarded as a figure.

This is even more true in their Ji'an Sea.

Therefore, in order to help Zhang Yuhe build the Tribulation Platform, the three forces have completely invested a lot.

Of course.

This also includes their optimism about Zhang Yuhe.

After all, no one dares to look down on a supreme genius.
