### Section 22

"Not bad."

Looking at the flying sword in his hand, Zhang Yuhe nodded with satisfaction.

After leaving a mark on the flying sword, Zhang Yuhe put it into his dantian one by one.

By looking into his dantian, he saw nine flying swords slowly rotating around the golden round bead above the sea of spiritual energy.

The life magic weapon needs to be nurtured in the dantian of the cultivator before it can slowly show its power.

"Done."

Zhang Yuhe walked out of the refining room and sat cross-legged on the practice platform.

"Continue practicing."

Refining the life magic weapon is just a small episode, and practicing is the norm.

If you don't practice at ordinary times, when will you ascend to heaven?

Chapter 21 The Blue Star Immortal Cultivation Alliance is established

As time goes by, the situation on Blue Star becomes more and more serious.

Beast attacks appear in the news from time to time, especially in remote villages near the mountains, where beasts go down the mountain to destroy crops and attack villagers.

In response, the federal government responded quickly, relocated the villagers near the mountains and forests, and implemented the relocation of villages and towns.

At the same time, patrols were strengthened. Once a ferocious beast was found coming down the mountain, forces were immediately organized to destroy it.

Compared with the evolution of ferocious beasts, more chaos actually came from the players who practiced immortality.

As the saying goes, if you have a sharp weapon, you will naturally want to kill.

In particular, some blue star people who were originally unsuccessful soon lost themselves after obtaining the qualification to enter Yufantian to practice immortality.

They relied on their strong strength to hurt people at every turn.

For this situation, the federal government was also ruthless and suppressed it as soon as it was found.

To be honest, the players who practiced immortality looked high and mighty, but most of them were just in the early stage of Qi Refining.

When facing the orderly federal force, they were completely not enough.

Zhang Yuhe never felt sympathy for such people who were courting death, and they deserved to be suppressed.

However, in his opinion, relying solely on suppression was obviously not a long-term solution.

Once the strength of the players of immortality grew to a certain extent, the pressure on the federal government would become greater and greater, and then it would be unable to clean up the situation.

Facing the new situation, the correct way out was to establish a new order.

Sure enough, one month after Yufantian opened, the Xiuxian Alliance was established under the leadership of the Second Federal Security Bureau.

Xiuxian Alliance issued a notice.

All players who enter Yufantian should register their information at the Xiuxian Alliance.

As long as they register their information, they can receive a subsidy of 10,000 blue coins every month without doing anything.

If you are willing to join the Xiuxian Alliance and obey the dispatch, you can receive a subsidy of 50,000 per month, and housing will be arranged.

In addition, the Xiuxian Alliance will provide some other conveniences.

At the same time, the Xiuxian Alliance also promulgated a covenant and called on all players to abide by it.

The general content of the covenant is.

First, personal grievances between players should be resolved in Yufantian, and conflicts should not be caused in densely populated areas of Blue Star.

Second, players should not take action against ordinary people. If there is a dispute between players and ordinary people, they can report it to the Xiuxian Alliance, and the Alliance will give priority to helping solve the problem.

Third, as the threat of beast evolution intensifies, the Xiuxian Alliance calls on everyone to voluntarily help in case of crisis. Players will receive generous rewards every time they take action.

Fourth, players should unite, help each other and make progress together in Yufantian.

In addition to issuing the convention, the Xiuxian Alliance also established the Skynet, where all registered players can exchange information.

With the establishment of the Xiuxian Alliance, a large number of players joined the alliance, the illegal behavior of a few players was controlled to a certain extent, and the order of Blue Star gradually returned to normal.

Zhang Yuhe also took the time to register his information at the Youjiang City branch of the Xiuxian Alliance.

As a good citizen of Blue Star, consciously obeying management is a basic quality.

Moreover, after registration, there is a monthly subsidy of 10,000 yuan, which is a waste if you don't take it.

Although he is not short of money, why not take it for free.

Of course, as for obeying to join the alliance and obey the dispatch, he has no interest at all.

If nothing big happens, don't affect his cultivation.

If there is a situation that others can't deal with, he will naturally take action.

## Chapter 22 Xiuxian Hundred Years

Daosheng Sect, Yinhe Peak.

Zhang Yuhe woke up from cultivation.

"Alas, the speed of cultivation after the transformation of the spirit is really getting slower and slower."

At this time, a whole year has passed since the opening of Yufantian.

Zhang Yuhe has also cultivated for hundreds of years in Daosheng Sect.

Two years for Jindan, ten years for Yuanying, and fifty years for breaking through to the realm of transformation of the spirit.

Zhang Yuhe broke through quickly all the way, as if he was riding a rocket.

However, after entering the transformation of the spirit, the speed of cultivation began to slow down.

It took him a full fifty years to cultivate to the late stage of the transformation of the spirit, and he was still a little short of perfection.

The transformation of the spirit is an important stage in the transformation of cultivators, and it is also an extremely difficult level.

Even in Daosheng Sect, there are only more than a hundred disciples of the transformation of the spirit among the three thousand inner sect disciples, and the rest are in the Yuanying stage.

Once the inner sect disciples break through the transformation of the spirit and enter the realm of refining the void, they will automatically leave their disciple status and become elders of the sect.

In these hundred years, Zhang Yuhe has never walked out of Yinhe Peak, but has been practicing in the pavilion.

The original attention of other disciples to him has long disappeared.

How could anyone pay attention to a person who has not appeared for hundreds of years?

If his name had not been seen in the registration information of the inner disciples of Dao Sheng, other disciples might have thought that he was gone.

After all, when Zhang Yuhe first entered the sect, he only had the Qi Refining level.

If there is no breakthrough, a hundred years will pass and death of old age is possible.

"It's time to go out for a walk."

Zhang Yuhe stood up and said something.

"I don't know what kind of magical powers I can exchange for my current merit points?"

He took out the identity jade tag and checked it. The meritorious service was worth 100.

The merit points of inner disciples are a bit special because they don't have to complete tasks.

The source of merit for most inner disciples is only merit over years.

When you are out guarding, you will get two points of merit every year. When you are not on guard duty, you will only get one point of merit every year.

If inner disciples want to obtain more meritorious deeds, they must look at opportunities.

For example, suppress unrest, eliminate demons, or other tasks assigned by the elders.

It's just that Yu Fantian has been in peace for a long time, and there are not many such opportunities. Everyone is rushing to do it. If you don't have some strength, you won't get a turn.

Zhang Yuhe has stayed in Daosheng Sect for hundreds of years and has done nothing except practicing, so he only has 100 meritorious deeds.

I just don't know what kind of magical powers these 100 meritorious deeds can be exchanged for.

"Go to the library and have a look,"

Zhang Yuhe walked out of the pavilion, turned into a stream of light and flew away from Galaxy Peak, and appeared in front of the library door after a while.

The speed of the cultivator is no joke.

In other words, Yu Fantian has a vast range, if it is on Blue Star.

At his current speed, he can appear anywhere in a matter of minutes.

"Senior Brother Zhang."

Well, Zhang Yuhe quickly turned around when he heard someone calling him.

"Junior Brother Cheng, have you entered the inner gate too?"

The person who came was none other than Cheng Xujing, the deacon disciple who had gone through the entry formalities for him.

Seeing that he was dressed in purple and exuding the aura of the Nascent Soul Realm, Zhang Yuhe asked with some uncertainty.

"Yes."

At this time, Cheng Xujing could not hide his shocked expression.

When Zhang Yuhe entered the inner gate of Daosheng Sect with the help of his token, it was only the Qi refining period.

However, now he can no longer see through Zhang Yuhe's cultivation.

"Is his current cultivation level higher than mine?"

"impossible."

"It's completely impossible to go from refining Qi to surpassing Yuanying in a hundred years. Maybe it's to learn some magical power that hides cultivation."

Cheng Xujing silently guessed that it was obviously not easy to inquire about this kind of thing directly, so he did not ask.

"Senior Brother Zhang, are you here to redeem your skills and magical powers?"

Zhang Yuhe nodded and replied.
