Section 23

"Yes, I have been practicing in the sect for many years, but I have not learned any magical powers. It will be my turn to take up my post soon, and I need to learn some magical powers to accompany me."

Hearing this, Cheng Xujing was a little speechless.

Damn, you can't cram at the last minute like this. You just want to use it, and you remember to learn magical powers. What have you been doing before?

How can it be too late to learn now? It takes several years to comprehend any ordinary magical power.

As for those high-level magical powers, the time required to fully comprehend them is even more exaggerated.

Don't even think about it for a hundred or eighty years.

However, in Cheng Xujing's opinion, Zhang Yuhe's current cultivation level is at most the Golden Core Realm, and the greater possibility is only the Foundation Establishment Realm.

With such a cultivation level, the guarding position assigned to him by the elders must be a peaceful place.

Simply put, as an inner disciple of the Daosheng Sect, he goes out to show his face, and does not expect him to really guard a place.

It doesn't matter whether he has powerful magical powers to accompany him.

Of course, thinking so, Cheng Xujing said modestly.

"Then you should choose carefully, merit is hard to come by, and you need to be cautious when spending every bit of merit."

Zhang Yuhe nodded in agreement.

The main reason is that there are too few ways to obtain merit, and there is no way to earn more merit.

Spend a little, and you will have less.

If you choose the wrong magical power, it will take many years to exchange it next time.

Thinking of this, Zhang Yuhe asked Cheng Xujing.

"Junior Brother Cheng, I want to learn some magical powers to accompany me. I wonder if you have any suggestions."

He felt that Cheng Xujing was very enthusiastic and might be able to give him some ideas.

Cheng Xujing thought for a while and said.

"The stronger the magical power, the better. It mainly depends on the needs and the characteristics of one's own practice. The magical power that conforms to the characteristics of the practice is not only easier to comprehend, but also the actual effect is often stronger."

"Of course, it also depends on how much merit you plan to spend."

After hearing Cheng Xujing's words, Zhang Yuhe thought quietly.

There is no need to consider the characteristics of the skills. The eight systems of Hunyuan Tianjing are practiced together, and they are inclusive.

As for easier to comprehend?

Don't worry about it at all.

Zhang Yuhe felt that he was a nobody in terms of comprehension.

Any new knowledge, he really knows it at a glance.

What really needs to be considered is the demand issue, to see what kind of magical power he needs.

Zhang Yuhe looked at himself.

As a late-stage cultivator of the God of Transformation, he currently only has one magical power, which is the Hunyuan Sword Formation that comes with the Hunyuan Sutra, which needs to be used in conjunction with his own magic weapon.

In addition, he only knows some basic spells.

It has to be said that it is very inconsistent with his identity.

Zhang Yuhe thought about it carefully. First of all, he needs a magical power of escape, after all, running fast is the hard truth.

Although his current speed is not bad, it is relative to people who are weaker than him.

Compared with people of the same realm, in terms of speed, he is obviously beaten.

In his mind, if he can beat him, he must be able to catch up, and if he can't beat him, he must run fast.

Therefore, the magical power of speed is a must.

Hmm, I don't know what 100 merits mean, so I'll ask first.

"Junior Brother Cheng, I have 100 merits now, and I want to exchange them for a stronger speed ability. If there are any left, I'll consider other things."

"100 merits can be exchanged for two earth-level supernatural powers, and five earth-level mid-grade can be exchanged. Don't consider the lower grade."

"Also, what do you think about speed? If you want to be flexible, I suggest you exchange it for the earth-level supernatural power Dragon Step."

Flexibility? Zhang Yuhe didn't consider it.

He thought that fighting had to be tough, and if you couldn't win, you had to run away. What's the use of being flexible?

If you really meet an opponent you can't beat, no matter how flexible you are, it's useless. At most, it can only delay time and die slower.

"What about the pure speed-related magical power? Junior Brother, do you have any suggestions?"

"The top-level pure speed-related magical power in the sect is the Tianhuang Feixian Technique in the Sutra Building, a low-grade heavenly-level escape technique. Once this magical power is used, it is as graceful as a flying fairy, and the speed is extremely fast. However, it requires 100 merits to exchange for the Tianhuang Feixian Technique. If you choose to exchange for this magical power, you will not be able to exchange for other magical powers. Moreover, as a heavenly-level magical power, the Tianhuang Feixian Technique is extremely difficult to comprehend, so you need to choose carefully."

"There are also two second-level escape techniques in the book building, one is the Sky Breaking Flash, and the other is the Cloud Escape Technique. These two are both high-grade earth-level magical powers, requiring 50 merits. There are also many earth-level middle-grade escape techniques in the book building."

"Okay, I understand. Thank you for your advice, Junior Brother. I will seriously consider it."

Seeing Zhang Yuhe standing there thinking, Cheng Xujing bowed and left.

Chapter 23: Escape Technique, Tianhuang Feixian Technique

After Cheng Xujing left, Zhang Yuhe still stood there thinking.

Without considering whether he could learn it or not, the stronger the magical power, the better.

Especially the magical power of speed, which was more important to him.

Originally, Zhang Yuhe thought that since he didn't have many merits, he could just find two magical powers in the book building to learn, and use them as he could. After accumulating enough merits in the future, he would consider changing to other magical powers.

But Cheng Xujing told him that there was a powerful escape magic power in the Sutra Building, and it just needed 100 merits.

This made him very entangled.

If he changed to Tianhuang Feixian Technique, he would not have time to change to other magical powers.

In this way, he would only know one sword formation and one magical power of running away. Wouldn't it be a little insufficient?

"Forget it, just choose Tianhuang Feixian Technique."

After careful consideration, Zhang Yuhe finally made up his mind, mainly because he felt that speed was too important.

As for attack and defense, the Nine Heavens Hunyuan Sword Formation integrates offense and defense, which should be enough for the time being.

And doesn't he also have many skills? He can refine more magic weapons, draw more talisman papers, and make some formation disks for self-defense.

After making up his mind, Zhang Yuhe quickly came to Jinglou.

At this time, the person guarding outside the Sutra Tower was still the old man with a long beard.

But this time, the long-bearded old man was not writing. Instead, he closed his eyes and sat quietly on the bench.

Zhang Yuhe quickly stepped forward and shouted softly.

"Senior, I would like to exchange for a magical power."

The old man opened his cloudy eyes impatiently, until he saw clearly that it was Zhang Yuhe, and he suddenly shouted.

"It's you again, kid."

A hundred years later, he still remembered Zhang Yuhe. He was this upright boy back then, but he actually refused to praise his handwriting.

And he still chose the Hunyuan Scripture. Can people learn this thing?

Suddenly, the old man sensed that Zhang Yuhe was exuding the aura of the late stage of divine transformation, and he was simply stunned.

How long has it been?

a hundred years?

It takes a hundred years to go from the Qi refining stage to the late stage of divine transformation. What the hell is this?

"It's not like I saw it wrong."

The old man instantly stood up from the bench and looked at Zhang Yuhe carefully, making Zhang Yuhe feel a little hairy.

After confirming that he had read correctly, the old man took a long breath and then asked calmly.

"Choose which magical power you want to change to."

After saying that, he threw out a booklet. Compared with the booklet where he chose the exercises last time, this one was thicker.

Zhang Yuhe quickly picked up the book and looked at it. It recorded the introduction of various magical powers. Without exception, they were all heaven-level magical powers.

There are attack and defensive magical powers of various attributes, and there are even many heaven-level high-grade magical powers. Judging from the descriptions, these magical powers are extremely powerful, making him jealous.

It's a pity that the merits are not enough. A high-grade heaven-level magical power requires five hundred merits, and a mid-level heaven-level magic requires two hundred merits. However, he only has one hundred merits, which is just enough to exchange for a low-grade heavenly power.

When Zhang Yuhe turned to the end, he found that he only had one magical power in terms of escape, which was the Heavenly Flying Immortal Technique. The others were basically offensive magical powers, and there were some defensive ones, but not many.

There is nothing to say, you can only choose it.

Zhang Yuhe handed the book back and said respectfully.

"Senior, I want to redeem this Heavenly Flying Immortal Technique."

After hearing Zhang Yuhe's choice, the old man stretched out his hand and saw a stream of light flying out from the sutra tower, and then the old man's hand

It is a golden jade slip.

The old man handed over the jade slip, and then said calmly.

"Just watch it here, and then leave after you finish it. Get the jade badge for your identity."

Zhang Yuhe took the jade slip and immediately handed over the identity jade tag.

His spiritual consciousness penetrated the jade slip, and a picture of an immortal about to take flight came into his eyes.

The immortal in the picture seems to be stationary, but if you look closely, you will find that the position of the immortal is constantly changing.

Is this an escape technique?

This is really teleportation.

Zhang Yuhe was a little shocked when he saw the image of the immortal in the jade slip.

The picture flashed by, followed by the method of practicing the Heavenly Flying Immortal Technique.
