

## Top talent 30

### Section 30

"Thank you, Lord Guardian."

The flying swords Zhang Yuhe gave were not rubbish.

These flying swords were made by him casually, and they were all mid-grade magic weapons.

With his current level of refining, it was easy to refine some mid-grade magic weapons.

But for the children of the Qian and Sun families, mid-grade magic weapons were already the best magic weapons.

Even in their own families, mid-grade magic weapons were very precious, and they might even be used as family magic weapons and would not be used easily.

Above magic weapons are magic weapons, and cultivators below the foundation building stage generally use magic weapons.

Only cultivators above the Jindan stage can use magic weapons.

However, magic weapons are precious, not only are they extremely difficult to refine, but the materials are also difficult to find.

For ordinary Jindan cultivators, it is already very good to have a low-grade magic weapon.

Only the children of the top forces can have mid-grade magic weapons when they are in the Jindan stage.

As for the top-grade magic weapons, they are exclusive to Yuanying cultivators. Even if they are given to Jindan cultivators, they cannot activate them.

It is not that Zhang Yuhe looks down on them. It is estimated that the entire Yunzhong Mansion cannot produce a few top-grade magic weapons.

"Okay, the ten of you will be divided into two teams. One team will be stationed in the mansion to practice, and the other team will patrol the city. The two teams will take turns to exchange. As for how to arrange it, you can decide it yourself. Disperse."

After Zhang Yuhe finished speaking, he waved his hand to let everyone disperse.

He asked people to come, not to let these people help him charge into battle.

There is no need at all.

Fighting, you can do it yourself.

With his current strength, what can Jindan cultivators do to help him?

He can easily destroy a large number of Jindan cultivators like this with just one move.

His purpose of asking for people from all parties is, on the one hand, to test the attitudes of all parties, and on the other hand, to find some people to help him run errands.

In order to avoid not being able to find a messenger, it really damages his reputation as a garrison commander.

After everyone left, Zhang Yuhe waved to Qian Lingling behind him.

"Help me find some people to walk around the city and ask for information, no matter what gossip or gossip, and then classify it into a book."

After that, Zhang Yuhe took out a jade bottle and threw it over.

"Practice hard, your cultivation is still too low, and you can't do anything."

Qian Lingling took the jade bottle with a red face and said.

"Thank you, sir."

After everyone left, Zhang Yuhe sat quietly in the hall and fell into deep thought.

Asking Qian Lingling to find someone to ask for information is naturally not a real idea.

It's just to let others see that he is not idle, but doing things.

It also makes those who have bad intentions restrain their actions and don't make trouble.

"The problem must be solved as soon as possible to see what Fengxin Tower and the He and Li families are doing."

He was a little annoyed. He couldn't practice with peace of mind because of the things hanging in his mind.

Zhang Yuhe summoned the game system and opened the chat channel.

Compared to the lively screen at the beginning, the chat channel now seems a bit quiet, and only occasionally there will be players communicating on it.

This is because the number of players in Yufantian has dropped too much.

Compared with the nearly 10 million people at the beginning, the number of players still active in Yufantian will not exceed 500,000.

It's not that they don't want to cultivate immortality, but the speed of time in Yufantian is very different from that in Blue Star.

One day in Blue Star is one hundred days in Yufantian.

If you are active in Yufantian for a long time, wouldn't you be old and dead?

Those players who have already built their foundation are fine. After building their foundation, their lifespan will be greatly improved, and there is no worry about their lifespan for the time being.

However, most players only have low-grade spiritual roots. Unless there is a great adventure, there is almost no chance to build a foundation.

Therefore, most players rarely enter Yufantian again after the initial enthusiasm.

Anyway, they can also practice in Blue Star.

Although the spiritual energy of Blue Star is not as rich as that of Yufantian, it is still strong enough for Qi-refining cultivators.

Most of the players currently active in Yuhuatian have already established their foundation. Players in the Qi Refining stage only come in occasionally and will soon log off and leave.

Seeing that the chat channel was silent, Zhang Yuhe put down his raised finger.

"Forget it, let's go to Skynet to send a message. Anyway, it's almost time to log off."

Originally, he had planned to post a message on the chat channel and offer a reward for collecting intelligence on Yunzhong Mansion.

Now he thinks it's better to forget it. Most of the players who are staying in Yufantian are very busy.

They are either busy practicing or fighting monsters outside to make money. Even if he sends a message, it is estimated that not many people will respond.

As night falls, an offline reminder appears in his mind.

"Log off."

Standing on the balcony, breathing the familiar breath of Blue Star, Zhang Yuhe looked at the sky outside, and occasionally there was a stream of light passing by.

It has been more than a year since Yuhuatian was opened, and the strength of the players has greatly improved.

Everyone is no longer surprised by flying with a sword.

Lying on the bench, Zhang Yuhe took out his mobile phone and logged into Skynet.

After the establishment of the Blue Star Immortal Cultivation Alliance, the Skynet was opened at the same time. All immortal cultivation players can exchange information on the Skynet.

Compared with the quiet game chat channel, the Skynet is very lively.

After all, Blue Star is where everyone lives, and Yufantian is more of a place to fight monsters and train.

Zhang Yuhe quickly edited a post on the Skynet.

[Help, high reward for information from all parties in Yunzhong Mansion, especially news about the Demon God Cult. ]

He also edited some content below the post.

[I am fortunate to join the Yunzhong Garrison and am now collecting all kinds of intelligence in the mansion. If there is any news about the Demon God Cult, the price is negotiable and I will not let you down. ]

After the post was sent, Zhang Yuhe lay quietly on the bench with his eyes closed.

...

Chapter 31 Killing the Sea Monster with One Sword

When he woke up, it was already afternoon.

“I slept so well.”

Zhang Yuhe stood up from the bench and stretched.

“See if anyone has replied.”

Logged into Skynet.

“Uh, what happened?”

Just after logging into the Skynet interface, Zhang Yuhe had no time to check the post he had sent, and saw a large red title announcement, which was placed at the top of Skynet.

[Sea Ban Announcement. ]

Zhang Yuhe clicked on the announcement to check.

[Recently, a huge eight-clawed sea monster appeared in the East China Sea. The monster frequently attacked passing people and ships. The alliance organized hunting operations many times, but none of them succeeded. In order to completely eliminate this sea monster and maintain the peaceful life of Blue Star, it is decided to use the attack of the He-Bomb. Before the operation is over, please do not go to the relevant sea areas. ]

Behind the announcement, there is also a sea map with detailed markings of the forbidden sea area.

After reading the content of the announcement, Zhang Yuhe subconsciously touched his chin.

"The Blue Star Xiuxian Alliance is too weak. It can't even deal with a small sea monster. It actually has to use the He-Bomb. It's a bit exaggerated."

According to his understanding, the fastest progressing Xiuxian player should have reached the Golden Core Realm.

And the monsters that appear on Blue Star are basically first-level monsters.

After Zhang Yuhe goes offline, he occasionally patrols the main mountains of Blue Star, and has not found any particularly powerful monsters.

Logically speaking, with the strength of the Xiuxian Alliance, there should be no problem in dealing with the monsters on Blue Star.

Why do they have monsters that they can't deal with?

They actually have to use the He-Bomb?

The power of the He-Bomb is indeed enough, unless you encounter a fourth-level monster equivalent to a Yuanying cultivator.

Once a monster below the fourth level is hit head-on by the bullet, it will surely die.

"Let me do it. I hope the distance is not too far."

Zhang Yuhe closed his eyes and used all his strength to urge his consciousness to sweep across the sea.

"Here, it turns out to be a third-level peak sea monster. No wonder these people can't handle it."

The third-level peak monster is equivalent to the great perfection of the golden elixir, and it is in the sea. It is indeed a bit difficult to handle it with the strength of the Xiuxian Alliance.

Zhang Yuhe slowly stretched out a finger, and a sword light cut through the sky and instantly appeared on the sea thousands of miles away.

The sword light chopped down quickly, splitting the sea surface in two like thunder, and the fierce sword light even drew a deep trench on the seabed.

After a long time, the sea surface slowly returned to calm, and a huge eight-clawed sea monster, the body cut in half, slowly floated on the sea surface.

"Let's go and see this sea monster. Why is it evolving so fast? It's only been a year, and it's almost evolved to the fourth level."

Zhang Yuhe stood up, his figure graceful as a fairy, and flew quickly towards the sea.

After a while, he saw the huge sea monster corpse, which was more than ten miles long.
