Section 31

Zhang Yuhe stretched out his right hand, and a crystal clear bead flew out of the sea monster.

"It turned out to be a spirit bead. No wonder this sea monster evolves so fast."

The spirit bead is also called the spirit bead. It is formed by the spirit veins and is an extremely rare cultivation treasure.

If you wear the spirit bead with you, it will be like the spirit is infused into your body, and the cultivation speed will be extremely fast.

Of course, the spirit bead is only effective for low-level cultivators, such as Zhang Yuhe, a spiritual cultivator.

The spirit bead is a chicken rib to him, dispensable.

However, this octopus monster is also lucky, just like the protagonist in the book.

The spirit revived and got a treasure, and then practiced quickly all the way, walking in the forefront of the world.

However, there is always a mountain, and there is a person like Zhang Yuhe who defies the heavens on Blue Star.

Otherwise, perhaps Blue Star will set off a wave of monster chaos.

...

After putting away the spirit bead, Zhang Yuhe quickly returned home.

In the meeting room of the headquarters of the Wangjing Xiuxian Alliance, the atmosphere was solemn.

In front of a huge map of the Blue Star, everyone was discussing something in a low voice.

Suddenly, a middle-aged man with a determined look walked in. He took a look at the map and said to everyone.

"Has the base confirmed whether they have locked the target?"

A young man in a neat uniform quickly stood up and answered.

"President, the base has just replied that they have locked the target. They are just waiting for the order to launch a missile at the sea monster."

The middle-aged man nodded after hearing this, and then said loudly to everyone.

"Let's go. The monster is extremely sensitive to danger. The possibility of a direct hit with a missile is very small. It is estimated that the sea monster can only be injured at most. In the end, we may have to take action."

After the middle-aged man finished speaking, he was about to leave the meeting room with everyone.

At this time, a technician in white suddenly shouted loudly.

"Wait, what do you see?"

The technician in white quickly switched the screen, and the map of the Blue Star on the screen quickly turned into a satellite photo.

Everyone looked at the satellite photo and looked at each other.

The satellite photo clearly showed that a huge octopus sea monster was split into two and was lying quietly on the sea.

"What happened? The sea monster is dead?"

"Who killed it?"

Everyone was in disbelief.

The middle-aged man looked at the satellite photo carefully, and after a while he turned to the technician in white and asked.

"Are there other satellite photos?"

"Yes, in order to track the sea monster, we mobilized a large number of satellites, and the whole process was completely photographed."

After the technician finished speaking, he quickly tapped the keyboard, and a large number of satellite photos were quickly spliced together to restore the whole process.

Everyone was completely stunned when they saw the restored picture through satellite photos.

I saw a sword coming from the east, and it instantly chopped on the sea surface, splitting the sea monster in half.

After a while, a figure appeared on the sea surface again. The man stayed on the sea surface for only a short while, as if he took something from the sea monster, and then flashed away.

But the figure looked very blurry, no matter how many times the technician enlarged the satellite photo, he could not see the specific appearance of the figure.

"What is this person's cultivation level?"

"I don't know..."

"I have seen a Nascent Soul cultivator take action in Yufantian, but his momentum was far inferior to this person."

"Could it be a Divine Transformation cultivator?"

"That's impossible. Yufantian has only been open for a year. How could someone cultivate to the Divine Transformation realm?"

"Then what do you think is going on? Could it be that there are really ancient immortals on Blue Star?"

"Nonsense. Since the revival of spiritual energy, everyone has already searched Blue Star thoroughly, and there is no trace of any immortals or gods."

The middle-aged man listened to everyone's discussion and stared blankly at the satellite photos in front of him. After a while, he slowly said.

"Divine Transformation cultivators are not that strong. I have seen Divine Transformation cultivators take action."

"Could it be above Divine Transformation? That's impossible."

Everyone talked a lot, but couldn't say why.

Although everyone has been in Yufantian for hundreds of years, they have never seen such a scene.

Especially such a scene, it actually appeared on the sea of Blue Star, it feels very unreal.

"Who could this person be? Since there are no ancient immortals, could it be a player?"

"Absolutely impossible, the speed of a player's cultivation cannot be so fast."

Suddenly someone whispered.

"Do you think this person is a powerful native from Yufantian?"

When this was said, everyone was shocked.

Chapter 32 President Wang Guofeng

After returning home, Zhang Yuhe logged into Skynet again. He didn't even have time to take a look at his post just now.

He also wanted to see if he could get some useful information from the players.

He couldn't just waste time with the He and Li families and Fengxin Tower. He had to find a breakthrough as soon as possible.

Zhang Yuhe had a vague intuition that there must be something wrong with these three forces.

As for what kind of problem it is, it is not clear for the time being, but if he doesn't find out, he will definitely not be able to practice with peace of mind.

He found the post he sent out, and saw that the replies below had already exceeded 99+.

"Fuck, boss is awesome, is the garrison still hiring?"

"Boss is awesome, take me with you."

"The Liu family of Qingshui City is arrogant and domineering, and it's obvious that they are not good people. Is this information useful?"

...

Zhang Yuhe took a quick look and found that most of the replies were meaningless.

Either they wanted to curry favor with someone, or they complained about the arrogance of the local indigenous forces. There was no reference value at all.

Isn't it normal for the indigenous forces to be a little arrogant?

Not to mention that strength is respected in the world of immortal cultivation, even in the old Blue Star, the younger brothers were the same.

For example, what about my father Zhang Erhe, my father is Li Gang and so on.

There are such people everywhere, but in Yufantian, these are not illegal.

Even if they are illegal, it is not his turn to manage.

As the garrison commander of a prefecture, he has no time to care about these trivial matters.

As long as it does not violate the taboos of the Daosheng Sect, it is a trivial matter.

What Zhang Yuhe wanted was substantive news, but unfortunately he looked through all the replies and did not see a single useful message.

"Hey, it seems there is another private message."

Although Zhang Yuhe often logs on to Skynet, he has never shown his head before, and no one has ever sent him a private message.

"This private message should be sent along with the post. I hope there is something in it."

Zhang Yuhe clicked on the private message to check.

[I know there is a place in Yunzhongfu that may be the secret base of the Demon God Cult. Can we talk in person?]

He glanced at the name of the sender, Wang Guofeng.

Zhang Yuhe fell into deep thought when he saw this private message.

He knew Wang Guofeng. He was the president of the Blue Star Immortal Cultivation Alliance.

It is rumored that Wang Guofeng was born in a military family. After Yu Fantian was opened, he activated the ninth-grade spiritual root.

Later, under the leadership of the Federal Security Bureau II, he came forward to establish the Blue Star Immortal Cultivation Alliance and served as the president.

Zhang Yuhe didn't care much about Wang Guofeng's special identity. He just thought about the content of the private message. Is it true?

There is a secret base of the Demon God Cult in Yunzhongfu? This news is really scary.

If the news is true, it will definitely shake the entire Yu Fantian.

"Whether it is true or not, let's meet first."

Zhang Yuhe thought for a while and then replied on the private message.

[At noon on the first day of entering Yufantian, we will meet in Room 101 of Feixian Teahouse in Yunzhong City.]

It is better to meet in Yufantian. As for whether Wang Guofeng is in Yunzhong City or how to go to Yunzhong City, he has no control over it.

After replying to the private message, Zhang Yuhe continued to lie on the bench, quietly closing his eyes to rest.

...

In the headquarters of the Wangjing Xiuxian Alliance, there was silence in the conference room.

Everyone knows what it means if the natives of Yufantian appear on Blue Star?

Compared with Yufantian, Blue Star is as fragile as a piece of thin paper.

If the real great man of Yufantian appears, it is not a problem to blow up Blue Star with one punch.
