Section 36

"Hmm?"

When there was still a thousand miles away from Jingkong City, Zhang Yuhe suddenly stopped.

"Why is there a warning formation here?"

Zhang Yuhe's consciousness explored forward, and a faint light curtain appeared in front of him.

He found that this was a warning formation.

As long as he continued to move forward, the formation alarm would be triggered, so that the person who set up the formation would know that someone was coming.

Fortunately, in addition to his cultivation, he also studied the hundred arts of cultivating immortals. With his explosive understanding, he achieved very good results.

Now Zhang Yuhe has comprehended the alchemy and talisman formation to the sixth level. As long as his cultivation improves, the hundred arts will also improve.

It's like a cheat, so strong that it doesn't make sense.

With the identity of a sixth-level formation master, he can naturally see these simple scene formations at a glance.

But Zhang Yuhe was a little strange. How could someone set up a warning formation in such a desolate place?

"Go to other places to have a look."

Zhang Yuhe did not rush over rashly. No matter who set up the formation, it was obviously for a purpose.

He came to investigate the situation of Jingkong City and did not want to be discovered.

Thinking of this, Zhang Yuhe quickly restrained his breath and quietly went around.

However, a quarter of an hour later, Zhang Yuhe returned to the original place.

"There are so many warning formations set up. What does Jingkong City want to do?"

Zhang Yuhe originally planned to bypass these warning formations and quietly touch Jingkong City.

But he went around a long circle and ended up back to the starting point.

Because Zhang Yuhe found that with Jingkong City as the center point, warning formations were set up everywhere within a thousand miles.

He couldn't get around at all.

If you want to go to Jingkong City, you must pass through these warning formations.

Zhang Yuhe hid aside and fell into deep thought.

There is something wrong with Jingkong City, and now it can be concluded.

If Jingkong City is not doing something shameful, there is no need to set up so many warning arrays thousands of miles away from the city.

Although the warning array is not of high level, the number of spiritual stones consumed by so many arrays running at the same time is not small.

A normal three-star force cannot afford such consumption.

There must be something wrong with the He family, and it is definitely not just the He family. They alone cannot make such a scene.

"I must find a way to go over and take a look."

Zhang Yuhe thought to himself.

But now the distance is too far, and there is an array, so he can't use his full power to activate his spiritual sense to explore the situation over there in Jingkong City.

If he wants to know the situation over there, he must sneak over there.

But with the warning array, he can't get through.

"What should I do now?"

This made Zhang Yuhe a little entangled.

The level of the warning array is not high. If he wants to dismantle it, he can break it all in an instant.

But in this way, the person who set up the array has achieved the purpose of warning.

Whether he rushed over directly or dismantled the formation before going over, the other party would know.

The existence of the warning formation was originally intended to play such a role.

"It's a bit difficult. How can I sneak into Jingkong City without being discovered?"

"Hey, someone is coming."

Just as Zhang Yuhe was struggling, he suddenly found a team of blue-clothed monks in the distance, flying towards him from the direction of Jingkong City.

Zhang Yuhe quickly restrained his breath and hid his figure.

He quietly looked at the blue-clothed monks in the distance, only to see a golden python embroidered on the cuffs of this team.

Zhang Yuhe was shocked.

"It's the monks of the He family."

The family emblem of the He family is a golden python.

Zhang Yuhe quietly observed this team of blue-clothed monks, and when these people flew not far from him, they suddenly stopped.

One of them took out a formation plate and looked around, and then said something to the people around him.

Zhang Yuhe listened attentively.

"There's no problem here, the warning formation has not been triggered."

"Third brother, you have to watch carefully, don't let anyone sneak into Jingkong City."

"Don't worry, there are warning formations everywhere around Jingkong City, even a fly can't fly in."

"That's right, after nearly a hundred years of cleaning up by the family, there are almost no cultivators within a radius of thousands of miles."

"Cultivators definitely can't come to Jingkong City, but the monsters in the Great Python Mountain are not necessarily, hehe."

"The last time the formation was triggered, it scared everyone, but it turned out to be just an iron-backed pig, haha."

"It's better for everyone to be careful, if we anger the demon god, we will suffer."

When talking about the demon god, everyone couldn't help but show respect on their faces.

"Third brother, do you think the devil can really make us immortal?"

"Of course, the ancestor was about to die, but after receiving the devil's energy, not only did his cultivation break through to the stage of transformation, but his life span also doubled."

When the green-clothed monk named Third Brother talked about the situation of the He family's ancestor, his expression revealed infinite enthusiasm.

"Third brother is right, the path of the devil is the real way to immortality. As long as we guide the devil to come, we all have the opportunity to gain immortality."

While discussing in a low voice, the green-clothed monk quickly flew to the next warning formation.

At this time, Zhang Yuhe looked solemn. He quickly hid his body and quietly followed the green-clothed monk.

The words of these blue-clothed monks have revealed a lot of things.

Demonic energy filling the body?

The road to the demon god?

Leading the demon god to descend?

The He family of Jingkong City, or the Demon God Cult, seems to be planning to open a passage here to lead the demons to descend on Yufantian.

It seems that Jingkong City is indeed problematic.

I just don't know what the specific situation is.

"Let's see first."

These blue-clothed monks have too low cultivation, they have too little experience, and what they say may not be true.

Zhang Yuhe plans to investigate first, and then send a message to the sect.

He took out a talisman paper and waved it gently. The talisman paper instantly turned into a faint shadow and quietly appeared in the shadow of a blue-clothed monk.

The talisman soldier follows like a shadow.

This is the talisman paper that Zhang Yuhe usually draws, which can be transformed into a talisman soldier.

The strength of the talisman soldier is not high, and it is almost useless when fighting.

However, this kind of talisman soldier is quite effective in tracking people.

The talisman soldiers hide in the shadows of others, and unless they use some special magical powers, they will hardly be discovered.

Zhang Yuhe thought, since it is not easy for him to break into the warning formation directly, let the talisman soldiers explore the way first.

This team of blue-clothed monks will always return to Jingkong City after checking all the warning formations.

As long as these people return to Jingcheng, he can observe the situation in Jingkong City through the talisman soldiers.

This will neither alarm the Demon God Cult in the city, nor do he need to take risks.

Who knows what the situation is in Jingkong City now?

What if there is a large group of high-level demons in it, if he breaks in directly, wouldn't it be a death sentence?

Although players can be resurrected after death, he still doesn't want to die.

He doesn't want to be like his friend Wang Guofeng, who was guarded and killed for a hundred years.

The way of cultivation is to be stable.

This is Zhang Yuhe's creed for longevity.

Chapter 37 Communication Sect

Cloud City, a secret place in Fengxin Tower.

Mingyue Concubine was sitting cross-legged practicing, and suddenly her expression changed, and a palm-sized mirror appeared in her hand.

She pinched the magic formula and pointed at the mirror, and an excited voice came from the mirror.

"Reporting to the owner, Lord Heijiao has located the exact location of the demon world and is ready to start the Tiangang Breaking Realm Array immediately, opening the channel to welcome the demon god to come."

Hearing the voice from the mirror, Mingyue Concubine's face showed a beautiful smile.

She murmured to herself.

"After more than a hundred years of preparation, the channel can finally be opened. I hope there will be no more accidents this time. As long as the demon army arrives, it will definitely cause unrest in Yufantian, which is enough to keep Daosheng Sect busy for a while."

Mingyue Concubine pointed her finger and then sent a message through the mirror.
