Section 371

Can get personal praise from Patriarch Zhang.

Wang Luoming was more excited than if he had broken through a small realm.

Zhang Yuhe didn't ask any more questions, but said with a smile.

"You come with me."

After saying this, he quickly rose into the air and soared into the sky.

Wang Luoming immediately followed from behind.

Zhang Yuhe stood above Kunlun City, overlooking the entire fairy city.

He did not ask Wang Luoming any questions about Blue Star.

Because there is absolutely no need to ask.

Several days have passed since he returned to Blue Star.

During this time, he has been traveling around Blue Star.

Regarding the current situation of Blue Star.

Zhang Yuhe looked clearly into his eyes.

It can be said that the current Blue Star is a paradise on earth.

So there is no need for him to give any advice or ask anything.

Because even if it were him, he wouldn't be able to do better.

What he can do now is to leave a legacy for Blue Star that can last indefinitely.

Fortunately, we were already prepared.

Think of this.

Zhang Yuhe turned his right hand.

A nine-story high platform quietly appeared in his hand.

This is a special space artifact.

When I was in the fairy world.

He carried out large-scale modifications to this immortal weapon.

Make it a special inheritance and experience space.

Looking at the nine-story high platform in Zhang Yuhe's hand, Wang Luoming next to him was extremely excited.

Judging from the aura of this high platform, it is obviously beyond the level of Tongtian Lingbao.

It must be an immortal weapon.

Thinking of the item that Patriarch Zhang left behind in the Dao Sheng Sect, the Picture of the Roaring Tiger on the Mountain.

Wang Luoming guessed silently.

"Is this also a space fairy weapon?"

However, Zhang Yuhe did not directly hand over the nine-story high platform to Wang Luoming.

I saw him gently throwing the nine-story high platform into the sky.

The nine-story high platform instantly swelled, emitting a dazzling light in the dark night.

Wang Luoming looked up.

I saw an aqua blue plaque hanging in the middle of the high platform.

On the plaque, four mysterious characters are engraved.

【Galaxy Secret Realm】

Looking at the high platform in front of him, Wang Luoming murmured to himself.

"Galaxy Secret Realm? Is this nine-story high platform a secret training realm specially built by Patriarch Zhang for Blue Star?"

Zhang Yuhe did not explain aloud, but quickly stretched out his hand to draw.

Rune patterns slowly appeared.

Rune patterns flashed in the air, and then quickly integrated into the nine-story high platform.

After a while.

The light emitted by the nine-story high platform began to slowly converge.

It turned into a faint halo.

The halo enveloped the entire Kunlun Fairy City, like soft moonlight shining on the earth.

Looking at the nine-story high platform suspended in mid-air, Zhang Yuhe was thoughtful.

I just feel like there's something missing?

After a while.

I saw him flip his right hand.

A fairy sword suddenly appeared in his hand.

I saw him stretch out his hand and flick it.

The fairy sword turned into a stream of light and flew straight to the nine-story high platform in mid-air.

The fairy sword is close to the plaque in the middle of the high platform, slowly hanging between the two characters [Galaxy].

...

Chapter 305 The Immortal Sword of the World

After setting everything up.

Zhang Yuhe stood in mid-air with his hands behind his back.

Looking at the nine-story high platform in the distance, he nodded with satisfaction.

Oh, no.

This should be called the Galaxy Secret Realm.

He even hung up the plaque a long time ago. Can this be false?

A large number of monks in the city flew into the air.

When the light flashed just now.

Everyone thought that something unexpected happened in Kunlun Fairy City.

However, when everyone flew into the air, they saw Wang Luoming and Zhang Yuhe in the distance.

He immediately stopped and did not get closer.

Everyone was in small groups, discussing in low voices.

"Brother Dao, is that the leader of the alliance?"

"Yes, you don't even know the leader of the alliance, right?"

"Of course I know the leader, but who is that person next to the leader?"

"Why does it look familiar?"

"Brother, take out your pig brain and wash it, and then think about it carefully."

"Don't you even recognize Patriarch Zhang's immortal appearance?"

"Holding the grass, it really looks exactly like the sculpture on the Galaxy Square."

"Do you still need to look at your appearance?"

"Old Ancestor Zhang's immortal appearance can be seen at a glance. He is not a mortal."

"What is that nine-story high platform over there?"

"have no idea."

"But looking at the writing on it, it seems like it's called the Galaxy Secret Realm?"

"It should be the secret realm created by Patriarch Zhang specifically for Blue Star, right?"

"Is there anything good in the secret realm? Can we go in?"

"Who knows, let's wait."

Wang Luoming looked at the secret realm of the Milky Way in the distance, and asked Zhang Yuhe curiously.

"Ancestor, what is this?"

Zhang Yuhe said with a smile.

"Did you see the words on the plaque? Put your mind into the word "Galaxy" and you can get the hint."

"Then I'll try it first."

Wang Luoming responded urgently.

Then he separated a ray of his mind and slowly integrated into the word "Galaxy" in the middle of the secret realm.

Soon Wang Luoming's figure disappeared out of thin air in front of everyone.

At this time, Wang Luohe was in a strange closed space.

He looked around everything.

However, except for a bronze gate, he did not find anything.

At this time.

An ethereal voice came into his ears.

"Blue Star Monk, welcome to the Galaxy Secret Realm."

"This secret realm gives each monk a score panel."

Section 372

"By challenging the secret realm, you can get corresponding points."

"Points can be exchanged for the treasures you need in the secret realm."

"The secret realm has all kinds of treasures, whether it is skills and magical powers, magic weapons and spiritual treasures, or various auxiliary elixirs."

"There is nothing that the secret realm cannot do except what you can't think of."

"Blue Star monk, do you want to challenge now?"

"According to your cultivation level, you can only challenge the ninth level of the secret realm."

"Warm reminder, each monk can only challenge each level three times. After dying in the secret realm, you can be resurrected outside the secret realm."

Wang Luoming stood there blankly, thinking in his heart.

Is this secret realm really created by Zhang Laozu?

What kind of heaven-defying means are needed to create such a heaven-defying secret realm.

If the description just now is correct.

Then this Milky Way Secret Realm is almost equivalent to a simplified version of the "Yufantian" game.

Wang Luoming stood there, and he did not choose to challenge the secret realm.

This matter is not urgent.

Who knows how long it takes to challenge the secret realm?

Zhang Laozu is still waiting outside.

"Let's see what can be exchanged first?"

Wang Luoming's mind moved, and a screen similar to the game panel appeared in front of him.

Name: Wang Luoming

Cultivation: Middle Mahayana.

Points: 0

In the upper right corner of the points panel, there is also a redemption option.

Wang Luoming clicked lightly.

A large number of redemption items appeared in his field of vision.

Looking at the redemption list in front of him.

He was completely stunned.

At the top of the list, all kinds of immortal skills and magical powers.

Then there are various auxiliary pills and array plates to assist in cultivation.

Even the Sky-breaking Pill that can assist the combined cultivators to break through to the Mahayana realm.

The list can also be exchanged infinitely.

As for the top-grade Tongtian Lingbao, you need to flip through several pages in a row to see it.

Obviously.

In the eyes of Zhang Laozu.

These top-grade Tongtian Lingbao are probably no different from cabbages.

Looking at the redemption list in front of him.

Wang Luohe couldn't help but be eager to try.

Because he saw a pill that can speed up the cultivation of Mahayana cultivators.

Tenglong Pill.

He had never heard of this kind of pill before.

Yu Fantian definitely didn't have it.

According to the description of the exchange list.

Tenglong Pill can double the cultivation speed of Mahayana cultivators.

Wang Luoming thought.

These Tenglong Pills should be unique to the fairy world.

"Do you want to challenge first?"

"Forget it, let's come next time?"

Wang Luoming hesitated for a long time before giving up the idea of challenging immediately.

Zhang Laozu is still waiting outside.

Besides.

Now he doesn't know how difficult the challenge of the Galaxy Secret Realm is.

According to the secret realm rules mentioned by the voice just now.

Everyone can only challenge three times in each level of the secret realm according to their different cultivation levels.

He is now in the middle stage of Mahayana.

He can only challenge the ninth level of the secret realm.

In other words.

He only has three challenge opportunities left in total.

Opportunities are precious and cannot be wasted.

It's better to wait for others to explore the way ahead first.

Wang Luoming exited the secret realm.

He quickly walked to Zhang Yuhe and asked excitedly.

"Ancestor, are the things on the exchange list in the secret realm real?"

Zhang Yuhe said with a smile.

"Of course they are real."

Wang Luoming continued to ask

"Ancestor, if all the items on the list have been exchanged, what should we do in the future?"

Zhang Yuhe replied indifferently.

"Don't worry, they will never be exchanged."

Hearing Zhang Yuhe's answer, Wang Luoming felt a little incredible.

Things are limited, how could they not be exchanged.

There are so many cultivators on Blue Star.

Even if the challenge of the secret realm is very difficult, and the difficulty of obtaining points is high.

But as time goes by.

Those things on the list will be exchanged sooner or later, right?

What Wang Luoming didn't know was.

When Zhang Yuhe created this secret realm, he really spent a lot of thought.

He arranged various skill puppets in the secret realm.

There are alchemy puppets, weapon-making puppets, and talisman-making puppets...

When a certain item on the list is exchanged for a large number of people.

These skill puppets will soon replenish the items.

He moved various common mines into the secret space.

And also established a medicine garden.

Under the operation of various puppets, various items can be kept in a steady supply.

Without these two brushes, he would not dare to call this place a heritage secret realm.

Zhang Yuhe did not explain in detail.

No matter how much he said about things that were too high in level, Wang Luoming could not understand.

It was equivalent to a game program, which he developed.

Blue Star monks just need to play, and don't worry about bugs.

As for the process of developing the game, there is no need to explain it in detail.

Because even if he said it, no one would understand it.

Zhang Yuhe stretched out his hand, pointed to the plaque on the Galaxy Secret Realm, and asked Wang Luoming.

"Do you see the fairy sword on it?"

"I see it."

Wang Luoming nodded.

When Zhang Yuhe hung up the magic sword, he paid special attention to it.

Because the aura of this immortal sword is so strong that it is a bit scary.

It is even stronger than the aura of the Galaxy Secret Realm itself.

On the handle of the immortal sword, there are two small words [Human World] engraved.

He doesn't even know what level of immortal weapon this is.

It must be very strong.

It's just the name of this immortal sword.

Section 373

It sounds a little weird.

A fairy sword in the world?

...

Chapter 306 Leaving Blue Star

Wang Luoming looked at the fairy sword hanging on the plaque of the Galaxy Secret Realm in the distance, full of curiosity.

Why is such a powerful fairy sword hanging in a secret realm?

A bit too wasteful, right?

Shouldn't such a powerful fairy sword be used to cut people?

What's the use of hanging that?

Could it be that they were placed there to suppress evil spirits?

He really didn't understand. What did Old Ancestor Zhang think?

And seeing the small characters engraved on the fairy sword, Wang Luoming was also very speechless.

Just looking at this fairy sword from a distance, you can tell that it is extraordinary.

Even when no one is controlling it.

The coercion emanating from the fairy sword is still terrifying.

People with poor cultivation.

I'm afraid that I might not even be able to get close to the 10,000-meter range of the Immortal Sword.

What is the name of such a powerful fairy sword [Human World]?

Aren't you allowed to call it something fancy, like Zhantian or Zhenmo?

What Wang Luoduo didn't know was.

This fairy sword is indeed extraordinary.

Because this is a top-grade fairy sword that Zhang Yuhe brought out from the Taixu Secret Realm.

Even in the fairy world.

High-grade immortal weapons are also very precious existences.

It can almost be said that it is exclusive to Taiyi Immortal Lord.

To know.

Before him, there was not even a single high-grade immortal weapon in the entire Ji'an sea area.

Immortal Lord Taiyi has never appeared in the Ji'an sea area.

Naturally, there will be no high-grade immortal weapons.

Where can ordinary golden immortal monks get high-grade immortal weapons?

Moreover.

Even if they get high-grade immortal weapons, they won't be able to use them.

This shows how precious this fairy sword is.

Normally.

In the elementary world of immortal cultivation like Blue Star, let alone a high-grade immortal weapon.

Even if you place a low-grade fairy weapon casually, it will definitely be a heaven-defying existence.

There is absolutely no need for Zhang Yuhe to put a high-grade fairy sword here.

A bit of a waste.

However, Zhang Yuhe didn't think so.

Anyway, he obtained many high-grade immortal weapons in the Taixu Secret Realm.

He even got two of the best immortal weapons.

He took out a high-grade fairy weapon and placed it on Blue Star as a suppressive object.

That's okay too.

He has a lot of this stuff.

No shortage.

Just very willful.

The only thing he needs to consider is how to make this fairy sword work in Blue Star.

High-grade immortal weapons are exclusive to Taiyi Immortal Lord.

Don't say that he is just an incarnation now.

Even if the true body comes, it cannot fully activate a high-grade immortal weapon.

To solve this problem, he specially designed a set of runes.

With the power of the blue star's heaven and earth as the source of power.

Through a long period of time, energy is accumulated to achieve the purpose of activating the fairy sword.

As for the name of the fairy sword, he chose it casually.

The power of the above-grade immortal sword can suppress all injustices in the world.

Heaven and earth.

Transform the world into heaven.

Just when Wang Luoming was still thinking about various things.

Zhang Yuhe took out a jade slip and handed it over, and then said calmly.

"This jade slip records the method of activating the fairy sword."

"In case of a crisis that cannot be dealt with, you can activate this fairy sword to destroy the enemy."

"This fairy sword is so powerful that it can easily kill even a true fairy in the fairy world."

"But not yet."

"The Immortal Sword uses the power of Blue Star's heaven and earth as its source to draw power, and it still needs to accumulate energy for the time being."

"According to my estimation, the fairy sword can only be activated once every ten thousand years."

"You must pass this jade slip down properly."

"I believe that as long as this fairy sword exists, it will be enough to deal with all crises on Blue Star."

"Thank you, ancestor."

Wang Luoming reached out to take the jade slip and bowed respectfully to Zhang Yuhe.

With the Milky Way Secret Realm and the fairy sword hanging on the plaque.

As long as the Blue Star monk doesn't commit suicide.

We will definitely be able to develop steadily in the future and there will be no other worries.

Zhang Yuhe looked up at the sky, and then took another look at the Kunlun Fairy City below.

I felt a little reluctant to give up.

He muttered to himself.

"After leaving this time, I'm afraid it will be a little difficult to come back in the future."

His current Golden Immortal Dzogchen.

The real body is in the fairy world, trying to continue to deduce the Renshui Thunder Absorbing Formation.

As long as this formation is improved again.

He is about to break through the Taiyi realm.

Once Zhang Yuhe breaks through again.

Then the incarnation's strength will reach the true fairyland.

In this case.

He had no choice but to return to Blue Star.

At least with his current knowledge, there is no way.

Maybe those Tao Ancestor emperors can rely on their own great power.

Let's forcefully open the passage between the immortal and mortal worlds.

It's just that the Dao Ancestor Realm is still too far away for Zhang Yuhe now.

Even though his qualifications are incredible, and he also accidentally obtained the original thing.

It's a smooth road ahead.

But it won't be that easy to break through to the realm of Dao Ancestor.

It takes a long time to slowly polish it.

Even if everything goes smoothly, I'm afraid we still need to calculate time in units of hundreds of millions of years.

In short, after leaving this time.

In the foreseeable future, he will not be able to return to Blue Star.

This is the world where he was born and raised.

I don't know if we will have the chance to meet again in the future.

Zhang Yuhe stood in the air, his thoughts flying far away.

Wang Luoming followed him quietly with the jade slip in his hand, without making a sound to disturb him.

Section 374

A large number of Blue Star monks also gathered quietly outside.

They looked at the secret realm of the Milky Way in front of them, as if tens of millions of ants were grabbing at it in their hearts.

It itches so much.

Everyone wants to know what the specific functions of this secret galaxy are.

How can I get in?

Although everyone is very anxious in their hearts.

But no one asked.

No one tried to test it.

Ancestor Zhang is still here.

We can't let Patriarch Zhang explain to everyone the functions and uses of the Galaxy Secret Realm.

This is a bit too much.

When the immortal Zhang Laozu came to this world, everyone was extremely respectful and did not dare to look directly at him.

Not to mention asking.

They could only wait quietly.

Everyone understands.

Since Old Ancestor Zhang has created this secret realm.

Naturally something will be explained.

Didn't you see the leader of the alliance following Patriarch Zhang?

obviously.

Ancestor Zhang has already handed over everything to the leader of the alliance.

Now everyone just needs to wait quietly.

Wait until Old Ancestor Zhang leaves.

The leader of the alliance will naturally publish the corresponding announcement on Skynet.

Explain the function and use of Galaxy Secret Realm.

After a long time.

Zhang Yuhe seemed to have just come back to his senses.

He looked at the sky and said to Wang Luoming calmly.

"I'm leaving. I hope you can keep Blue Star in its current state of development."

"Don't forget your original intention of cultivating Taoism and build Blue Star into a paradise on earth."

After saying this.

Zhang Yuhe quickly jumped into the air.

I saw him punch out casually.

The peaceful void was instantly blasted out by him into a huge black hole.

Zhang Yuhe's figure flashed and disappeared into the black hole in an instant.

Seeing the situation in front of them, the Blue Star monks at the scene were all shocked.

"Hold the grass and break the void with one punch. Isn't this too awesome?"

"Is this an immortal? So terrifying."

"With such great power, where in heaven and on earth can it not go?"

"I must practice hard, and when one day I ascend to the immortal world, I will be like Patriarch Zhang, who can dominate the world and be unstoppable."

"Brother, wake up. As for your rubbish third-grade spiritual root, if you can successfully build it in this life, it will be considered as smoke rising from the ancestral grave."

"Hmph, what do you know?, I have no control over my fate."

"Mortals can also cultivate immortality, not to mention that I have third-grade spiritual roots."

"Just wait. When your grave is bulldozed, you may be able to see me transcend the tribulation and ascend."

...

Chapter 307 Immortals gather at the Galaxy Holy Land

Ordinary monks can only watch the excitement.

When everyone saw Zhang Yuhe, he punched out a space passage.

All they can say is, awesome.

They don't quite understand what kind of awesome method it is.

But only knowledgeable people like Wang Luoming will understand.

How difficult would it be to open a space channel that connects the two worlds?

How much effort did the demons from the Cangyun Realm put in to invade Yu Fantian?

If it weren't for Wang Mingyue of the Demon God Sect, and the remaining demon clan.

Yu Fantian unexpectedly found a place with weak space.

Just barely open a passage.

The demons in Cangyun Realm should never think about invading Yu Fantian.

Even the Demon God Palace in Cangyun Realm has twelve Mahayana monks.

They spent nearly a hundred thousand years, but still failed to open a passage.

This shows how difficult it is.

However.

Old Ancestor Zhang just punched casually.

A temporary channel was opened.

What kind of power is needed to achieve this.

To know.

Ancestor Zhang just transformed into the lower realm.

The strength of the incarnation is nothing more than the Mahayana realm.

However.

It is also the realm of Mahayana.

Compared with himself, Old Ancestor Zhang's incarnation was far ahead of him.

Totally incommensurable.

Looking at the black hole in front of me, it is slowly healing.

Wang Luoming muttered to himself.

"Is this the power of immortals?"

"No, an ordinary immortal would definitely not be able to do this."

Wang Luoming always remembered when his ancestor was summoning them.

He reminded them specifically.

Ancestor Zhang is also a top power in the immortal world, so they must receive him well.

Don't be lazy.

Although my ancestor did not go into too much detail.

But the awe in the words made them feel even though they were separated by a distant communication array.

You can still feel it.

Wang Luoming stood there blankly.

At this time, Lu Hao walked up and asked him in a low voice.

"Leader, what are the specific functions of this secret realm left by Patriarch Zhang?"

"How can we enter this secret realm of the Milky Way?"

Looking at this new secret realm, everyone has already felt itchy.

It's just that Patriarch Zhang was still here just now, so no one dared to speak.

Now Old Ancestor Zhang is leaving.

Everyone no longer has too much restraint.

They all want to know, what are the rules of this secret realm of the Milky Way?

It's like facing a new toy.

If I don't get started and play a few games, I'm afraid I'll just fall asleep.

Wang Luoming turned around and said loudly to everyone.

"Ancestor Zhang left behind endless treasures in the secret realm."

"As long as you get enough points in the secret realm, you can redeem them for the treasures you need."

"As for the method of entering the secret realm, it is also very simple."

"Just sink your mind into the word Galaxy on the plaque."

Wang Luoming just finished speaking.

The scene instantly became excited.

Section 375

"Haha, I'm going to go in and try now. I hope I can get a magic weapon that I can use."

"I wonder if there is a foundation-building pill in the secret realm."

"I have been practicing Taoism for decades. As long as I get a foundation-building pill, I will definitely be able to borrow another two hundred years from heaven."

"Don't say anything, I'll go in and take a look first."

A large number of monks disappeared from the scene instantly.

The Milky Way Secret Realm is vast and boundless, enough to withstand a large number of monks entering the challenge at the same time.

...

The three-year period is approaching.

Galaxy Holy Land.

Countless monks have gathered in the sky above the endless sea.

The entire Yu Fantian, almost most of the monks, came here.

three years ago.

News came from Dao Sheng Sect.

Ancestor Zhang, who once ascended to the immortal world, has descended into Yu Fantian.

and will preach publicly at the Galactic Holy Land.

After the news spread.

A large number of monks began to gather in the Galaxy Holy Land from all directions.

There are even many monks in the Qi Refining realm who grit their teeth and spend spirit stones.

By converting multiple teleportation arrays, he traveled hundreds of millions of miles to reach the Holy Land of the Galaxy.

The sage preached.

Who is willing to let go of such a heaven-defying opportunity?

No matter how important things are at hand, they have to put them aside first.

At this time, the sky above the Galaxy Holy Land was densely packed with people.

From the lowest level Qi refining monk to the Mahayana ancestor of Tao Sheng Sect.

Almost all come together here.

Especially those players from Blue Star.

They have recently experienced the magic of the Milky Way Secret Realm.

I am even more impressed by Patriarch Zhang's power to an unparalleled degree.

There are indeed all kinds of treasures on the redemption list of the Galaxy Secret Realm.

And there are also a small number of monks who have gained a small amount of points by challenging the secret realm.

Then redeem some treasures.

However, most monks gained nothing after entering the secret realm.

Because their points are still zero.

The challenge in the secret realm is very difficult.

Each level of the secret realm has ninety-nine levels.

In the first level of the secret realm, you need to defeat an illusion whose cultivation level is comparable to your own.

You need to win two in the second level, and four in the third level.

It's hard for everyone to imagine what kind of strength it takes to be able to beat the ninety-nine levels.

Even ordinary Tongzhu Invincible probably won't work, right?

According to the news on Skynet.

The person with the best challenge results so far is a Golden Elixir monk who has reached the fifth level of the third level.

That is to say.

This golden elixir cultivator defeated sixteen illusions at the same time that were comparable to his own.

It's already quite outrageous.

The Galaxy Secret Realm is divided into nine levels.

Depending on the level of cultivation, you can challenge different levels.

Qi-refining monks challenge the first floor, and foundation-building monks challenge the second floor.

If there is a breakthrough in cultivation, the number of challenge levels will also increase accordingly.

For example, a Qi Refining monk, after breaking through to the foundation building stage.

He can no longer enter the first level, even if his three challenge opportunities have not been used up.

You can't go in again.

You can only enter the second level of the secret realm, which also provides three challenge opportunities.

After experiencing the Milky Way Secret Realm, everyone responded to Patriarch Zhang's public sermon.

Obviously more expectations.

Everyone is thinking.

Patriarch Zhang is so powerful.

If they can listen to the sermon, even if they only gain a little bit.

That must be of endless benefit.

Today is the day for Patriarch Zhang to preach publicly.

Almost all Blue Star players have come online to the Galaxy Holy Land.

There are even many old monks who have not entered Yu Fantian for many years.

At this time, he also went online and came to the Galaxy Holy Land.

Although these people have almost no hope of breakthrough in this life.

I can only wait quietly for Sihua to leave.

But when faced with Patriarch Zhang's sermon, their original passion was extinguished.

It burned again.

Everyone was thinking.

Maybe we can get some inspiration from Patriarch Zhang's mantra.

If you take the opportunity to break through the realm, your life span will be doubled.

Isn't it like living another life?

How could they let go of such an opportunity?

Even some people don't have spiritual stones to sit in the teleportation array.

Even if you borrow spiritual stones from others, you should also come here to receive this wave of opportunities.

Countless monks gathered in the Galaxy Holy Land.

The entire Milky Way sea area, tens of millions of miles in radius, was densely packed with people.

This may be the largest gathering of monks in the history of Yu Fantian.

Even when the demons invaded, they could not gather so many monks in the same place.

In order to get a good position, many monks even squatted in the Milky Way Holy Land to wait three years ago.

In order to maintain order on site.

All members of the Daosheng Sect were mobilized.

From the Mahayana patriarch to the ordinary outer disciples.

They are scattered in various locations in the Galaxy Sea to prevent anyone from taking the opportunity to cause trouble.

However, Dao Shengzong's actions seemed to be a little overly worrying.

Even without their guidance, the scene was still orderly.

Even the most unruly person at ordinary times was as well-behaved as a sheep at this time.

There was no trouble.

joke.

Who dares to be presumptuous at this time?

There were so many people at the scene that one spittle would drown him.

...

Chapter 308 Creation of the Void

In the center of the Milky Way Sea, there is a large island.

This is the place where Zhang Yuhe made a breakthrough in Yufantian.

After he ascended to heaven.

Feng Xiaotian expanded the island on a large scale.

It became the current Galaxy Holy Land.

The Galaxy Holy Land is open to all cultivators.

Normally, there are always people coming here to pay homage to the relics left by Zhang Laozu.

Everyone may want to find a trace of the Taoism left by Zhang Laozu here.

Section 376

Or pray sincerely, hoping to get the blessing of Patriarch Zhang.

They want it this way just like ordinary mortals.

Come for spiritual comfort.

The tribulation formation on the island will also be activated from time to time.

When the monk wanted to borrow this great tribulation formation.

They only need to apply to Dao Sheng Sect.

There won't be many restrictions.

The Dao Sheng Sect arranged for elders from the Fusion Realm to sit in the Galaxy Holy Land all year round.

To maintain the order of the Galaxy Holy Land.

...

It was now approaching noon.

Li Qingyang, Wang Luoming and other Mahayana ancestors were standing quietly above the Galaxy Holy Land.

Looking at the dense crowd of people around.

It extends from near the island of the Holy Land to the outskirts of the Milky Way Sea.

See this situation.

Li Qingyang couldn't help but frown slightly.

There were really too many people at the scene.

to be honest.

Even though he is the leader of Dao Sheng Sect, he has practiced Taoism for tens of thousands of years.

But he has never seen so many monks.

The number of people present was really so large that it was a bit exaggerated.

at the very beginning.

Li Qingyang also asked the disciples of the sect to count the number of monks who came to listen to the sermon.

To facilitate the maintenance of order.

But as the time approached, he quickly gave up the idea.

It's totally impossible to do it.

The entire galactic sea area, tens of millions of miles in radius, is full of people.

How to count this?

Too many to count.

Li Qingyang didn't expect it at all.

It has been nearly 200,000 years since Patriarch Zhang ascended and left.

But he still has such great influence in Yu Fantian.

It's like a god.

Everyone respects Patriarch Zhang as if he were a god.

Now Patriarch Zhang will preach publicly in the Galaxy Holy Land.

This made Yu Fantian's monks completely unable to hold back.

Regardless of their level of cultivation, most of the monks in Yufantian.

Almost all came here.

Even though the Milky Way Sea is vast and boundless, it is still a bit hard to stand.

As time passed, Zhang Yuhe still didn't show up.

This made Li Qingyang feel anxious.

He muttered to himself.

"Old Ancestor Zhang won't be delayed by anything, right?"

"If we miss the time, the Dao Sheng Sect will be in big trouble."

Countless monks gathered here, and everyone was waiting for Patriarch Zhang to come and preach.

What if Ancestor Zhang breaks the promise?

Li Qingyang simply couldn't imagine what would happen next.

There are so many monks present, if there is any trouble.

With just such a small number of people from Dao Sheng Sect, it is impossible to control the scene at all.

despite this.

Li Qingyang could only worry.

He doesn't know where Old Ancestor Zhang is now?

He has not seen Patriarch Zhang again since they parted ways in the Patriarch Hall three years ago.

He doesn't even know.

In the end, Old Ancestor Zhang is still with Yu Fantian.

What if Ancestor Zhang had already left Yu Fantian? Wouldn't that be a big deal?

The news came from Daosheng Sect.

If Patriarch Zhang never came.

Then everyone will spread all their grievances on Dao Shengzong.

Just when Li Qingyang was anxious.

A figure suddenly appeared over the island.

The figure looks like a fairy, but there is no breath coming out of his body.

It is completely a picture of an immortal descending into the mortal world.

Saw Zhang Yuhe suddenly appeared.

Li Qingyang and everyone present shouted respectfully in unison.

"Meet Patriarch Zhang."

Countless monks shouted in unison.

The sound shook the heaven and earth, from near to far, and quickly spread towards the distance.

When everyone saw Zhang Yuhe appearing, they all shouted excitedly.

The scene was filled with excitement and could not stop for a long time.

Zhang Yuhe stretched out his hand to signal and pressed down slightly with both hands.

An invisible wave rippled rapidly into the distance.

Invisible fluctuations gently passed over everyone.

Only then did everyone's excitement slowly calm down.

Zhang Yuhe said with a smile.

"I'm very sorry that I came a little late and kept everyone waiting."

"Next, I will talk about some of my knowledge and understanding of immortality."

"I hope it will be helpful to everyone's future cultivation."

After saying this.

Zhang Yuhe waved his right hand, and a large amount of sword light flashed around him.

The sword light cuts vertically and horizontally in the void quickly.

After a while.

A surprising scene appeared.

In the invisible void, Patriarch Zhang actually cut out a high platform that was visible to the naked eye.

The high platform seems to be in the distant sky, but it seems to be right in front of everyone's eyes, clearly visible.

Seeing this situation, everyone's faces showed incredible expressions.

"What kind of magical power is this?"

"Isn't the void invisible? Why can Patriarch Zhang cut out a high platform?"

"Also, why does this high platform seem so close yet so far away?"

"Is this the method of immortals?"

"Old Ancestor Zhang's supernatural powers are indeed beyond the comprehension of mere mortals like us."

...

In fact, don't talk about those ordinary monks.

Even Li Qingyang and other Mahayana ancestors couldn't understand it at all at this time.

The way of space is extremely mysterious.

They can use the Way of Space to build a teleportation array.

They can also learn speed-related magical powers that contain the Way of Space.

But everything in front of them.

It has nothing to do with the Way of Space that they know.

The invisible space can actually be cut out to form a high platform that can be seen with the naked eye.

Section 377

What is the principle?

I don't understand it at all.

As for the platform, it looks almost the same from far and near.

This is easy to understand.

There are many magical powers that can achieve such an effect.

For example, mirror and mapping magical powers.

It can project distant objects to the front.

But they really can't understand how to cut and create things in the invisible void.

"Maybe this is the method of the immortals?"

Li Qingyang thought silently in his heart.

This method, which is extremely magical in the eyes of others.

In Zhang Yuhe's view, it is nothing at all.

He has already comprehended the law of space to the realm of minor success.

And the tightness of Yu Fantian's space is completely incomparable to the fairy world.

In his eyes.

Yu Fantian's void is like dough, there is no difference.

He can knead it at will.

It is not a problem to knead it into any shape.

In the void, cutting out a platform for preaching is a piece of cake.

Of course.

This is also because in Yu Fantian.

If he were in the fairyland, he couldn't do this.

The space in the fairyland is extremely solid.

Even if he hit it with all his strength, he couldn't shake it a bit.

Not to mention cutting creatures in the void.

Only in the lower realm of Yu Fantian can he use the power of the law to show his holiness in front of people.

Public preaching.

How can people be convinced without showing any tricks?

Looking at the shocked expressions of the people around him.

Zhang Yuhe nodded with satisfaction in his heart.

The effect is good, hehe

...

Chapter 309 Why do we need to practice?

Looking at the high platform in the void, Zhang Yuhe nodded with satisfaction.

He swept his eyes over the crowd, then quickly soared into the air and slowly landed on the high platform.

He saw his right hand waved.

An incense burner landed steadily on the high platform.

Zhang Yuhe took out three dark red long incense sticks and walked to the side of the incense burner.

He flicked his fingers, lit the three long incense sticks, and then slowly inserted them into the incense burner.

A faint fragrance slowly spread around.

Smelling the fragrance, everyone seemed to have a sudden enlightenment.

The key points that were previously unclear were now understood clearly.

It was as if the whole person's understanding suddenly improved countless times.

Some low-level cultivators who were just at a certain level even broke through on the spot.

These three long incense sticks are not ordinary items.

They are the incense of enlightenment from the fairy world.

This kind of incense can assist cultivators in understanding the laws and practicing magical skills.

Even in the fairy world.

This kind of thing that can assist in understanding the laws is also extremely precious.

Zhang Yuhe also got a few of these in the Taixu Secret Realm.

Before this.

Let alone seeing it, he had never even heard of it.

This shows how precious this kind of incense of enlightenment is.

In order to achieve the ideal effect of this public preaching.

Zhang Yuhe also tried his best.

Only then did he take out this treasure at the bottom of the box.

Anyway, he has a very high level of understanding, and he can comprehend the supreme law by relying on his own understanding.

There is no need to use the Enlightenment Incense.

It is just right to use it here.

Otherwise, he would give this precious long incense to other cultivators in the sect.

The fragrance of the Enlightenment Incense wafts around.

This top-level enlightenment treasure is used in places like the lower world.

It is like a super killer.

Everyone at the scene is intoxicated by it.

The entire Milky Way Sea instantly became silent.

Zhang Yuhe came to the center of the high platform and slowly sat cross-legged.

He slowly spoke.

"Why do we need to practice, and what is the purpose of practice?"

Zhang Yuhe's voice seemed to contain some kind of magic.

Even if everyone at the scene fell into a state of enlightenment because of the Enlightenment Incense.

However, Zhang Yuhe's voice can still be clearly heard by everyone.

The sound is like a morning bell and a curtain drum, which makes everyone resonate and think deeply.

Zhang Yuhe's voice continuously struck everyone's heart.

"Some people say that cultivation is to strengthen oneself."

"Some people say that the purpose of cultivation is to pursue longevity and freedom."

"In fact, these statements are not wrong."

"But in my opinion."

"Whether it is the pursuit of powerful strength or longevity and freedom."

"This is not the ultimate goal of cultivation."

"Maybe in Yufantian, longevity and freedom make people extremely eager."

"But in the fairy world, there are already many predecessors who have long achieved endless lifespans."

"But they are still working hard to cultivate."

"Why do they still want to cultivate?"

"Obviously, longevity and freedom are just one of the goals on the road of cultivation."

"After achieving this goal, everyone will continue to move forward."

"Some people say that if this is the case, then pursue the invincible power of heaven and earth?"

"However, is the purpose of cultivation really just a simple pursuit of power?"

"In my opinion, it is not entirely true."

"Let's not talk about whether there are really people who can achieve absolute invincibility."

"Even if one day you really reach the point of being invincible, will you stop practicing?"

"Is there an end to practice?"

"I'm not sure about this question."

"Maybe the road to immortality will indeed have an end."

"But above the immortality, are there no new roads to take?"

"That's not necessarily true?"

"Since someone can create the immortality road, why is there no road to take above the immortality road?"

"Even if there is really no road, we can still make a way."

"So, in my opinion."

"The purpose of practice is not just to pursue power and immortality."

Section 378

"Because these things are just part of your cultivation process."

"The purpose of cultivation should be to keep working hard on the road to pursue the great road."

"The avenue is endless and never ends."

"Even if the heaven and earth reopen and all things return to emptiness, it is just a manifestation of the great road."

"Then the question is? What is the avenue?"

"When we talk about the Tao with others, we often talk about the Tao."

"But do you really understand what the avenue is?"

"Actually, I don't quite understand this issue."

"The great avenue of heaven and earth is ethereal and misty, and may be understood in countless ways."

"Everyone should have a different understanding of the avenue."

"Let me talk about my simple understanding of the avenue."

"In my opinion, the exercises that everyone usually practices and the magical powers that they use."

"Actually, it's just a simple manifestation of a certain avenue."

"It's a fragment of a certain avenue that has been intercepted and turned into something that everyone can understand."

"This is how you get your skills and magical powers."

"Let's take the fire attribute magical power as an example."

"Whether it's an ordinary fireball technique, or a heaven-level magical power that burns the sky with flames."

"Actually, they are all manifestations of the Avenue of Fire."

"Then the question is, why is the power of the fireball technique so mediocre, but the magical power of burning the sky and burning the sky can achieve the effect of burning mountains and boiling seas."

"In my opinion, this is because these two magical powers have different uses of the Avenue of Fire, and the effects they produce will naturally be very different."

"The fireball technique makes less use of the Avenue of Fire, so its power is very small."

"As for the Flame Burning Heaven Magical Power, it makes more use of the Avenue of Fire, so it is much more powerful."

"Some people may wonder, if this is the case, is there any shortcut to directly mastering the Avenue of Fire?"

"In that case, if you master the complete Dao, wouldn't you be able to reach heaven and earth?"

"The path to spirituality is, of course, no shortcut."

"Perhaps in myths and legends, there were people who achieved enlightenment in one day."

"But that is just a legend after all, and it has long been impossible to verify."

"For monks like us, the road to monasticism can only be done step by step and slowly moving forward."

"In my opinion, the pursuit of the great road should be divided into at least three steps."

"The first step is to deeply understand the skills and magical powers you practice."

"The second step is to understand the laws of the Great Dao by clearly understanding the skills and magical powers you have learned."

"The power of law is also a manifestation of the great road, but it is compared to magical powers and techniques."

"The law's use of the avenue must be more obvious and more numerous."

"True immortals in the immortal world need to master the power of laws if they want to go further."

"Beyond the law should be Taoism."

"In my understanding, Taoism should be the direct manifestation of the Great Dao."

"When a monk masters a Taoist technique, it should be considered as one foot stepping onto the threshold of the great avenue."

"Of course, these are still too far away from everyone."

"Even I am still slowly exploring the power of law."

"For you, understanding and understanding the skills and magical powers you have learned is the first step in cultivation."

"As long as you fully understand the skills and magical powers you have learned, there will be no obstacles to your cultivation."

"There is no need to be hasty or slack in the path of spiritual cultivation."

"As long as we understand ourselves clearly at all times, maybe the road to greatness is right in front of us."

"Keep your feet on the ground and move forward, and one day you will get a result that satisfies you."

"The road is ruthless, and not everyone can make it to the end."

"But it doesn't matter, as long as we have worked hard and made progress."

"Believe me, one day in the future, you will definitely feel happy for your efforts."

"The road is boundless, and I will continue to explore it."

"I hope all fellow Taoists can encourage me together."

"Let's walk on the avenue together and enjoy the endless scenery of the avenue."

...

Chapter 310 Leave quietly without taking any clouds with you

Zhang Yuhe sat cross-legged in the center of the high platform.

His words were filled with the power of the Supreme Law, gently rippling around.

Countless monks stand above the Milky Way Sea.

Zhang Yuhe's voice sounded to them.

It's like the sound of the great road, tapping directly into the depths of the soul.

A powerful aura rose from the crowd from time to time.

This is exactly the vision of the monk's breakthrough.

Many monks rely on the incense of enlightenment and the sound of the great road by Zhang Yuhe.

It directly breaks through the current realm.

Even when they broke through, they were still in ignorance.

He had no idea that his cultivation level had quietly broken through.

Because the number of monks who came today is really too large.

In the entire Galaxy Sea area, the number of monks currently listening to the sermon exceeds hundreds of millions.

There are simply too many to count.

So many people, gathered together.

Even if Zhang Yuhe didn't preach, someone might make an unexpected breakthrough.

Now with the help of Zhang Yuhe's Daoyin and Wu Daoming Shenxiang.

There are people one after another who break through the realm on the spot.

Various visions come and go.

Of course.

Most of the monks who have made breakthroughs so far are not very advanced.

Basically, they are all below the Nascent Soul stage.

As for those high-level cultivators, they are still accumulating strength.

There is no movement for the time being.

A large number of cultivators broke through at the same time, causing a series of strange phenomena.

It's a pity.

Such an exaggerated grand occasion was only seen by Zhang Yuhe alone.

Because the other cultivators at the scene were still immersed in the rhyme of Taoism.

None of them woke up.

At this time.

The wind and clouds suddenly changed in the distance.

The dark clouds in the sky quickly gathered towards the Milky Way.

Zhang Yuhe stood up slowly.

Looking at the changes in the sky in the distance, he muttered to himself.

"It seems that the effect of this preaching is really good."

The sudden change in the sky in the distance is naturally not going to rain.

So many cultivators gathered together at the scene, and the strong aura rushed straight into the sky.

In such an environment, how could cumulonimbus clouds form?

The reason for the change in the sky.

That's because there are cultivators who are breaking through to the Refining Void Realm.

Whenever a cultivator above the Spiritualization Realm breaks through a major realm, a heavenly tribulation will descend.

The changing celestial phenomena in the distance are the signs of the coming of a heavenly tribulation.

Almost at the same time.

In another direction of the Milky Way Sea, another strong aura rose into the sky.

Immediately afterwards, the auras of several cultivators surged.

The dark clouds in the sky became denser and denser.

Several Spiritualization Realm cultivators broke through to the Void Refining Realm at the same time.

Section 379

This kind of grand occasion is really rare.

But these monks who are making breakthroughs don't know it themselves.

That is to say.

When the calamity strikes, they will have no power to resist.

According to normal circumstances.

Although they achieved the breakthrough they had dreamed of while listening to the sermon.

But it was also them who finally blossomed in their pursuit of truth.

Because at this time, they were still intoxicated by the charm of Zhang Yuhe's sermons.

They haven't woken up yet.

When the disaster strikes.

They could only stand upright and be struck by lightning.

Who can withstand this?

Even if there is a Renshui Thunder Absorbing Formation in the Galaxy Holy Land, it can weaken part of the power of the Heavenly Tribulation.

But many people on the scene broke through.

This great tribulation formation cannot protect them all.

If no one intervenes, they are almost certain to die.

"Fortunately, I was prepared."

Seeing that there were many monks at the scene, when they broke through, they caused a vision of heavenly tribulation.

A faint smile couldn't help but appear on Zhang Yuhe's face.

He had long expected that such a situation might occur.

Naturally, I thought of a way to deal with it.

Zhang Yuhe waved his right hand.

Thunder-absorbing pillars flew out from his sleeves and quickly fell towards the edge of the Milky Way Sea.

Originally, the Renshui Thunder Absorbing Array here only had 1024 high-grade Tongtian Lingbao level lightning absorbing pillars.

The coverage range of the formation is only around the location of the Milky Way Holy Land Island.

As for the sea areas beyond the islands, they definitely cannot be taken into account.

In order to cope with the current situation, Zhang Yuhe came to preach long before.

The Renshui Thunder Absorbing Formation has been fine-tuned to a certain extent.

In simple terms.

It is to expand the coverage area of the formation, and at the same time enhance the ability of the formation to weaken the catastrophe.

Want to achieve this effect.

The original 1,024 lightning-absorbing pillars were naturally not enough.

To this end, Zhang Yuhe re-refined 10,081 thunder-absorbing pillars.

These lightning-absorbing pillars are also of the top-grade Heavenly Spiritual Treasure level.

With his current weapon refining methods.

Things like Tongtian Lingbao can be mass-produced.

Moreover, the requirements for materials can also be greatly reduced.

without any exaggeration.

Even if it is an ordinary stone, Zhang Yuhe can refine it into a heaven-reaching spiritual treasure.

Therefore, refining 10,081 thunder-absorbing pillars is not a problem for him at all.

It's nothing more than spending more time.

This is also the reason why he was late just now.

I was busy refining the lightning absorbing pillar just now.

So it was a little delayed.

10081 lightning-absorbing pillars quickly fell on the edge of the Milky Way Sea.

Zhang Yuhe rose into the sky and stretched out his hand to carve in the void.

Rune patterns formed quickly.

Rune patterns perfectly connect these lightning-absorbing pillars.

Following Zhang Yuhe, he moved the magic formula.

A light blue light curtain slowly rose over the Milky Way Sea.

The light curtain is like an oversized giant bowl, completely covering the entire sea area.

At this time, the dark clouds formed by the catastrophe have become increasingly dense.

Because the number of monks who broke through on the spot was much greater than he imagined.

There were even some monks who had perfected the Void Refining, and broke through to the Fusion Realm on the spot.

So many monks broke through in one place at the same time.

The catastrophes they caused have begun to come together.

At this time, the power of the heavenly tribulation has far exceeded the ability of ordinary monks to withstand it.

Don't say they haven't woken up yet.

Even if these people are in their strongest state, they can face the catastrophe.

It is estimated that it will be difficult to handle it.

However, Zhang Yuhe's face did not show any worried expression.

He was full of confidence in the Renshui Formation he had arranged.

A formation composed of 10081 high-grade Tongtian spirit treasures.

Even if it is for ordinary true immortals to deal with the catastrophe of breaking through the golden immortal, it is almost enough.

Using such a powerful formation, let these Void Refining Fusion monks use it to break through the tribulation.

Naturally, it is more than enough to blanch.

Even though there are slightly more monks who are making breakthroughs.

That doesn't have much impact.

Even if a few more people break through, it doesn't matter.

There are even people now who have directly broken through to the Mahayana realm, and this formation can still withstand it.

After a while.

Intensive catastrophes struck quickly and continuously.

However, after the Renshui thunder-absorbing array was weakened.

The power of the Heavenly Tribulation is already less than one in ten.

It had almost no significant impact on the monks present.

The power of the heavenly tribulation did not even wake these people up from their enlightenment.

Zhang Yuhe stood on the high platform and looked at everything in front of him quietly.

After making sure there is no problem.

He muttered to himself.

"After the things are done, it's time for me to go back."

After saying this.

Zhang Yuhe's figure suddenly turned into little rays of light and quietly dissipated between heaven and earth.

This is just an incarnation of him.

The incarnation is formed by the condensed immortal energy.

After completing the task, it can disintegrate on its own.

Disappearing with the incarnation was the high platform cut out of the void.

Zhang Yuhe disappeared quietly without taking any clouds with him.

All that was left at the scene was thunder in the sky.

It was as if he had never come back to Yu Fantian.

...

Chapter 311 Memory fusion, deduction of formations

After Zhang Yuhe disappeared, the thunder at the scene was still pounding down intensively.

With the breakthrough of the monks, the number is increasing.

The power of the thunder at the scene also became stronger and stronger.

However, everyone was completely unaware of it.

They didn't know that they were currently in a thundering ocean.

I don't know how much time has passed.

Li Qingyang was the first to wake up.

At this time, the aura on his body had clearly reached Mahayana perfection.

Section 380

That is to say.

Just when Zhang Yuhe was preaching,

he broke through a small realm.

More importantly,

he didn't know how he broke through.

Li Qingyang stood there, muttering to himself.

"Is this the avenue that Zhang Laozu pursued? Unfettered and fearless."

"Hey, where is Zhang Laozu?"

At this time, Li Qingyang suddenly woke up.

He found that not only Zhang Yuhe was gone, but even the high platform for preaching.

It disappeared without a trace.

What's more terrifying is that.

He found himself in a sea of thunder at this time.

"No, it's a heavenly tribulation."

It was not until then that Li Qingyang came back to his senses.

Seeing the thunder all around, he was simply stunned.

How many people are breaking through a big realm at the same time?

And these people are also shrouded in the range of the heavenly tribulation.

You know.

Generally, when cultivators are going through the tribulation, they will clear a field in advance.

In order to avoid being disturbed by others when the heavenly tribulation comes, or to avoid dragging others into the heavenly tribulation.

Because that will increase the power of the heavenly tribulation.

It will be more difficult to survive the heavenly tribulation.

However, what is the current situation?

Most of the cultivators in Yufantian are all shrouded in the heavenly tribulation.

At this time, the power of the heavenly tribulation is even stronger than the general heavenly tribulation of ascension.

Li Qingyang quickly restrained his breath and stood there without daring to move.

He was afraid that the heavenly tribulation would hit his head.

Once the heavenly tribulation hits his head, it may lead to the heavenly tribulation of ascension.

Although his cultivation has now broken through to the state of Mahayana perfection.

He does have the initial qualifications to receive the great heavenly tribulation and ascend.

But Li Qingyang knows himself.

It is too early to ascend now.

He still needs to settle down for a period of time, polish his own magic power, and enhance his own foundation.

Otherwise.

He may not be able to survive the great heavenly tribulation of ascension.

Even with the help of Renshui Absorbing Thunder, he was not very sure.

Just when Li Qingyang was still nervous.

He suddenly discovered.

In addition to the thunder in the sky, the sky above the entire Milky Way Sea was also covered by a layer of light blue light curtain.

He could see it at a glance.

This was the effect of the Renshui Absorbing Thunder Array when it was activated.

But when did the coverage of the Renshui Absorbing Thunder Array become so large?

"Could this be the handiwork of Zhang Laozu again?"

Li Qingyang understood.

Except for Zhang Yuhe, no one in the entire Yufantian could do this.

Li Qingyang looked around.

I saw that the cultivators at the scene were still immersed in the law and Tao rhyme left by Zhang Yuhe.

No one had woken up yet.

Even those cultivators who were undergoing the tribulation were still in a daze at this time.

"Such a grand scene, I am afraid it will be rare to see it again in the future."

Looking at the dense thunder tribulation around and the cultivators who were undergoing the tribulation.

Li Qingyang said to himself silently.

So many cultivators broke through the tribulation at the same time.

Such a situation is almost impossible to replicate.

And almost all the cultivators in Yufantian were dragged into the tribulation.

However, everyone was safe and sound, which was simply a miracle.

No, this is not a miracle at all.

This is a miracle.

"I wonder when I can also have the magical power of Zhang Laozu, which is so great and powerful?"

Li Qingyang stayed in place quietly, his thoughts gradually flying away.

...

Immortal Realm, Daosheng Sect.

Galaxy Hall.

Zhang Yuhe sat cross-legged on the training platform, and he suddenly opened his eyes.

After the incarnation disappeared in Yufantian.

Various memories instantly flooded into his mind.

After a while.

A faint smile appeared on Zhang Yuhe's face.

When the memories merged.

He was like returning to the lower world in person.

Through the memory of the incarnation.

He clearly understood the current situation of Yufantian and Blue Star.

Especially the development of Blue Star is much better than he imagined.

As for the main purpose of this trip to the lower world.

Go to the Boundless Sea and the Broken Moon Void to find the Broken Sky Immortal Crystal and the Time Immortal Crystal.

This purpose has been achieved.

These two precious materials have been found by the incarnation.

As long as Li Qingyang ascends.

You can bring these two materials to the fairyland.

Anyway, he is not in a hurry.

He is still in the Golden Immortal Realm.

Whether it is to refine the Earth-level Immortal Ship or the Palm of Heaven Bottle, you need to reach the Taiyi Immortal level.

Although Zhang Yuhe can break through at any time now.

He did not feel the bottleneck.

As long as he wants, he can break through to the Taiyi Immortal.

But he will not take risks easily without solving the problem of crossing the tribulation.

The Taiyi Heavenly Tribulation is not comparable to ordinary Heavenly Tribulation.

And with his extraordinary talent, plus he has also comprehended the six supreme laws.

It is hard to imagine.

When he breaks through, how terrifying the Heavenly Tribulation that comes down will be.

Therefore, he would not choose to break through without further deducing and improving the Renshui Thunder Absorbing Formation.

However, he already had some clues about the deduction of the Renshui Thunder Absorbing Formation.

As long as he made some more improvements, he could start preparing.

Thinking of this.

Zhang Yuhe slowly closed his eyes and continued to deduce the Renshui Thunder Absorption Formation.

He wanted to deduce this formation to the level of a second-level immortal formation.

And it was not just an ordinary second-level immortal formation.

According to his thinking.

The improved Renshui Thunder Absorption Formation required more thunder absorption columns.
