

## Top talent 381

### Section 381

And these lightning-absorbing pillars must reach the level of middle-grade immortal tools.

This will be a super-large project.

But Zhang Yuhe is not worried about it.

It is just a middle-grade immortal tool.

It should not be difficult to refine.

Even if a large number is required, it does not matter much.

It just takes a little more time.

Although the materials needed to refine the lightning-absorbing pillars may be exaggerated.

But Zhang Yuhe is not worried.

The Daosheng Sect today is not comparable to the past.

Under the leadership of Long Xingxiu.

The Daosheng Sect's Economic and Trade Hall has opened branches in half of the South China Sea Immortal Realm.

And the Daosheng Sect is not short of money.

Zhang Yuhe has harvested a large number of various treasures in the Taixu Secret Realm.

Any one taken out for auction may be enough for the materials of the lightning-absorbing pillars.

For him.

The biggest problem now is to deduce the improved version of the Renshui lightning-absorbing array as soon as possible.

Then it is to mobilize the power of the entire sect to collect materials in the South China Sea Immortal Realm and the Chaos Continent.

As for the work of refining the lightning-absorbing pillars, Zhang Yuhe will naturally do it himself.

Not only will he never fail in refining immortal tools by himself, but he will also never fail.

The key is the speed.

At that time, hundreds of refining furnaces will start working at the same time.

The lightning-absorbing pillars of the middle-grade immortal tool level can also be mass-produced.

Zhang Yuhe sat cross-legged on the practice platform, silently deducing and perfecting the Renshui lightning-absorbing array.

Because the number of lightning-absorbing pillars will be large.

So he has to try his best to deduce the method of using the most common materials in the immortal world to refine lightning-absorbing pillars.

And these lightning-absorbing pillars must be able to reach the level of middle-grade immortal tools.

Not only that.

The weakening effect of these lightning-absorbing pillars on the heavenly tribulation cannot be reduced.

In short, this is a balancing process.

He has to seek an optimal solution in this balance.

Finally, he has to deduce a corresponding array pattern.

This array pattern must be able to perfectly integrate the improved lightning-absorbing pillars.

And form a perfect array that can resist the heavenly tribulation.

This thing doesn't seem to be too difficult.

It's just two or three steps in total.

However.

It will take some effort to solve these two or three steps perfectly.

Zhang Yuhe closed his eyes slightly.

Countless ideas kept flashing in his mind.

His explosive comprehension showed great power at this time.

At this time, his brain was like a supercomputer, running fast.

Various ideas were quickly integrated and deduced in his mind.

...

Chapter 312 Li Qingyang ascended

Time passed slowly.

Three thousand years later.

After a period of precipitation.

Li Qingyang decided not to wait any longer.

He handed over the position of the sect master to Wang Luoming.

Then he was ready to lead the great heavenly tribulation and ascend to the fairyland.

Normally, relying on his current strength.

It was obviously not enough to withstand the bombardment of the great heavenly tribulation of ascension.

Before Zhang Yuhe, Yu Fantian and other Mahayana ancestors.

Even if they raised their cultivation to the state of perfection, they would not be in a hurry to leave.

Because the power of the great heavenly tribulation of ascension is really fierce and a bit scary.

Leading the Great Heavenly Tribulation to come.

It can be said that it is a life-and-death attack.

In the previous million years, there were at least more than ten Mahayana ancestors in the Daosheng Sect.

In the end, they all fell under the Ascension Great Heavenly Tribulation.

Only Xie Mingyuan and three others have truly successfully survived the Great Heavenly Tribulation and ascended to the Immortal Realm.

So when the cultivation level breaks through to the Mahayana perfection.

Everyone will try their best to polish their own magic power and consolidate their own foundation.

Until there is no more progress or the life span is not much.

They will take the risk to try to lead the Ascension Great Heavenly Tribulation to come.

But Li Qingyang felt that he didn't need to wait that long.

There is the Renshui Thunder Absorption Array left by Zhang Yuhe.

The difficulty of his tribulation is much smaller than that of his predecessors.

What's more.

During the last public sermon.

Zhang Yuhe made large-scale improvements to the Renshui Thunder Absorption Array in the Galaxy Holy Land.

At that time, so many cultivators were going through the tribulation at the same time.

The Renshui Thunder Absorption Array can easily dissolve and weaken the heavenly tribulation.

In the end, all the cultivators on the scene were safe and sound.

Even the most ordinary Qi-refining cultivators were not harmed by the heavenly tribulation.

This shows.

After Zhang Yuhe, the Renshui Thunder Absorption Array was improved again.

How strong is the weakening effect on the heavenly tribulation.

With the assistance of such a powerful formation.

Li Qingyang is confident that he can survive the great heavenly tribulation of ascension.

Even if he has not reached the peak state now.

That is not a big problem.

Originally, he did not need to be so anxious.

Anyway, he has only been practicing Taoism for more than 50,000 years.

There is no worry about his lifespan.

Even if it takes another 30,000 or 40,000 years, there will be no problem.

But thinking of the two jade boxes that Zhang Yuhe gave him at the beginning.

Li Qingyang did not dare to neglect it at all.

Although he still does not know what is in these two jade boxes.

He also does not know whether these two jade boxes are very important to Zhang Laozu?

Does Patriarch Zhang need the things in these two jade boxes urgently?

He didn't know.

But Li Qingyang was thinking.

Being able to send things to the fairyland earlier will definitely only bring benefits, not disadvantages.

Besides.

Since he is sure to survive the great heavenly tribulation with the help of the Renshui Thunder Absorption Array.

Then why should he continue to stay in Yufantian.

There is no point in being the king in the lower world.

For every cultivator in the lower world.

Section 382

Ascension to the fairyland is everyone's ultimate dream.

Since he could realize his dream earlier, he naturally didn't want to wait any longer.

Li Qingyang also wanted to see what was so magical about the laws and Taoism of the immortal world.

Look at the difference between the peerless talent in the immortal world and Yu Fantian.

He still wanted to see it.

Will a talent like his own stand out among everyone after arriving in the fairy world?

Before preparing to lead the great catastrophe, Li Qingyang passed through the cross-border communication array.

Reported to the Immortal Realm Sect in advance.

And he also made a special statement.

This time I ascended, carrying what Old Ancestor Zhang needed.

After receiving the summons.

The Taoist Sect of Immortal Realm attaches great importance to it.

Wang Guofeng personally came to the ascension platform to take charge.

Although, under normal circumstances.

The ascension platform is definitely safe.

Because here, it is not too far from the mountain gate of Daosheng Sect.

No Xiao Xiao dared to come to the ascension platform to cause trouble.

But don't be afraid of ten thousand, just be afraid of the unexpected.

Since Li Qingyang helped Zhang Yuhe carry the items when he ascended.

Then they naturally have to pay attention to it.

Otherwise.

In case someone daring enough appears.

It would be a big joke to take away the items that Old Ancestor Zhang needs.

Let Wang Guofeng come over to prevent accidents from happening.

Although Wang Guofeng's cultivation level is not particularly outstanding in the current Dao Sheng Sect.

But he is also a Golden Immortal monk after all.

In this Ji'an sea area.

Except for Dao Sheng Sect.

Any Golden Immortal monk can walk sideways.

There is Wang Guofeng sitting at the ascension platform.

Nature is infallible.

...

Galaxy Holy Land.

Li Qingyang stood on the platform in the center of the Holy Island.

Thunder filled the sky with a terrifying aura and fell crazily.

However, these thunders were transformed by the heavenly tribulation.

After passing through a layer of light blue light curtain, the power was gone.

Li Qingyang held out a golden shield.

Blocked the remaining thunder easily.

After Zhang Yuhe, it was improved again.

The Renshui Thunder Absorbing Formation in the Galaxy Holy Land shows extraordinary ability to weaken the heavenly tribulation.

Even the great catastrophe of the Mahayana monk's ascension.

After being weakened by the formation, only some tiny lightnings remained.

This kind of power is for any Mahayana perfection monk.

Neither poses a threat.

Li Qingyang looked up at the dark clouds in the sky.

He muttered to himself.

"If I had known this was the case, I should have directly transcended the tribulation and ascended."

He didn't expect it at all.

At this time, the Renshui Thunder Absorbing Formation was actually so powerful.

Where the hell is this going through a tribulation?

It's just like children playing house.

It felt like he didn't need any treasures even with the Renshui Thunder Absorbing Formation.

Even with bare hands, one can withstand such a great catastrophe of ascension.

As the last thunder fell.

A colorful staircase stretched across the sky and slowly appeared in front of him.

Li Qingyang looked back around, feeling excited in his heart.

After practicing Taoism for more than 50,000 years, I have finally achieved enlightenment.

Chengxian asked, this is the pursuit of every monk.

Although after arriving in the fairy world.

He still has a long way to go.

But now, at least he has taken the first step.

Li Qingyang looked around.

He saw countless figures waving to him in the distance.

for everyone present.

Another ascended monk was born, which was the pride of the entire Yu Fantian.

Li Qingyang took out a jade slip and recorded his experience in overcoming the disaster.

Then gently place it under your feet.

Immediately afterwards.

His mind moved again, and two exquisite jade boxes quietly appeared in his hands.

Make sure you have the jade box with you.

Li Qingyang breathed a sigh of relief.

In fact, he had confirmed it many times before crossing the tribulation.

I was afraid that I would miss the jade box.

This sounds like a joke.

How could a Mahayana monk who was about to ascend to heaven be forgetful?

However, in Li Qingyang's heart, this was indeed the case.

I was afraid that I would forget the jade box.

If he ascended to the immortal world, he would not have the jade box with him.

That's really a big deal.

Everything that Patriarch Zhang told me can be forgotten.

If that's the case.

Then how will he hang out in the fairy world in the future?

So it was up to him to confirm it again and again.

Li Qingyang carefully put away the jade box.

He turned to look back at the crowd.

Then step up the fairy ladder.

As the stairs slowly rise.

Li Qingyang's entire figure slowly disappeared in front of everyone.

...

Chapter 313 The Current Situation of the Taoist Sect in the Immortal Realm

Immortal world ascension platform.

Wang Guofeng stood quietly not far away.

After receiving the summons from Yu Fantian, he came here immediately.

Although he didn't know exactly when Li Qingyang would be able to survive the catastrophe and ascend to the immortal world.

But he still waited here early.

More than ten days passed.

There was still no movement on the ascension platform.

But Wang Guofeng was not in a hurry.

Section 383

Since it was Yu Fantian who sent the message, it must be correct.

Just wait slowly.

As long as you don't delay, it's all right for Zhang Laozu.

Anyway, he doesn't need these few days.

And Wang Guofeng also knows.

It's not easy to overcome the tribulation and ascend to heaven.

According to the records left over the years.

Some Mahayana cultivators can successfully receive the coming of the heavenly tribulation in three or five days.

Some people may need longer.

Some people even waited for half a year before the great heavenly tribulation finally fell.

Therefore, it is uncertain when Li Qingyang can come up.

But Wang Guofeng believes.

Li Qingyang will definitely be able to successfully overcome the heavenly tribulation and ascend to the fairyland.

He himself has experienced the Renshui Thunder Absorption Array of the Galaxy Holy Land many times.

In Wang Guofeng's view.

This formation is simply against the sky.

No matter how powerful the heavenly tribulation is.

The Renshui Thunder Absorption Array can always weaken the power of the heavenly tribulation.

There is such a formation to help.

Li Qingyang survived the heavenly tribulation without any problems.

Wang Guofeng stood with his hands behind his back, waiting quietly.

Suddenly, a dazzling light flashed from the ascension platform.

After a while.

A figure suddenly appeared.

Wang Guofeng flashed and flew over.

Because of the problem of time and space conversion.

At this time, Li Qingyang was still a little confused.

When he saw Wang Guofeng appear, he reacted.

Li Qingyang immediately shouted respectfully.

"Disciple Li Qingyang, meet the old ancestor Wang."

He naturally recognized Wang Guofeng.

After all, Wang Guofeng was also a senior ancestor who ascended from Yufantian.

And the time when Wang Guofeng ascended was not too long ago.

Only tens of thousands of years.

There is also a statue of Wang Guofeng in the ancestral hall of Daosheng Sect.

Regarding the senior ancestors who ascended from the past.

Li Qingyang naturally recognized them all.

Wang Guofeng smiled and stretched out his hand to signal, and then he asked solemnly.

"Have you brought up everything that Zhang Laozu wants?"

"I have brought it up."

Li Qingyang waved his right hand.

Two exquisite jade boxes slowly appeared in front of the two.

Wang Guofeng took a look and did not reach out to take it.

He said with a smile.

"It's good that you brought it up."

"Come with me, I'll take you to see the sect master."

"Sect master?"

Hearing this, Li Qing was a little surprised.

He didn't know that Zhang Yuhe was the sect master of the Taoist Saint Sect in the Immortal Realm.

After all, it has only been 200,000 years since Zhang Yuhe ascended to the Immortal Realm.

And it is unknown how long the Taoist Saint Sect in the Immortal Realm has existed.

Wang Guofeng glanced at him, then explained with a smile.

"It's Zhang Yuhe, the old ancestor."

"Now he is the sect master of our Taoist Saint Sect."

Hearing this.

Li Qingyang was completely shocked.

It has only been 200,000 years since Zhang Yuhe ascended to the Immortal Realm.

Has he become the sect master of the Taoist Saint Sect?

Is it possible that Daosheng Sect is just a weak small sect in the fairy world?

Otherwise.

How could it be the turn of Zhang Laozu, who had just ascended to heaven, to be the sect master?

Wang Guofeng obviously saw Li Qingyang's thoughts.

He explained with a smile.

"Don't look at Zhang Laozu with the eyes of ordinary people."

"Even if you look at the entire South China Sea fairyland, Zhang Laozu is also a top-level powerful person."

"Come with me to see the sect master first?"

After saying this.

Wang Guofeng released a flying boat.

After the two stepped on the flying boat, they turned into a stream of light and flew quickly towards the gate of Daosheng Sect.

On the way.

Through Wang Guofeng's narration, Li Qingyang finally had a general understanding of Daosheng Sect in the fairy world.

According to Wang Guofeng.

Now Daosheng Sect in the fairy world is in its heyday.

There are millions of disciples in the sect.

Among them, there are nearly 100,000 true immortal disciples.

There are more than 500 golden immortal elders.

The only pity is that.

At present, the Daosheng Sect has not yet produced a Taiyi Immortal Lord.

But it will be soon.

According to Wang Guofeng.

Now, Patriarch Zhang is preparing for a breakthrough.

Once Patriarch Zhang breaks through to become a Taiyi Immortal Lord.

Then their Daosheng Sect will be a major force in the South China Sea Immortal Domain.

The flying boat quickly passed over the sea.

From time to time, some figures with a strong aura were seen on the road.

These people were dressed in blue robes, with nine golden immortal swords embroidered on their backs.

The immortal swords were neatly arranged, like a fierce formation.

According to Wang Guofeng.

These are all disciples of the Daosheng Sect.

Now the entire Ji'an Sea Area is the territory of the Daosheng Sect.

Disciples are distributed everywhere.

It can be said that they can be seen everywhere.

After a while.

The flying boat passed a towering mountain gate.

On the left side of the mountain gate stood a tall stone tablet.

It was inscribed with three vigorous and powerful characters [Daosheng Sect].

The flying boat quickly flew through the mountain gate.

Soon, it landed outside a palace.

Wang Guofeng took out the Immortal Mirror.

After casting a spell.

Section 384

A soft voice came from the hall.

"Come in, everyone."

Li Qingyang followed Wang Guofeng into the main hall.

He looked up and ahead.

I saw Old Ancestor Zhang holding a teacup in his hand and drinking tea quietly.

Wang Guofeng immediately stepped forward and shouted respectfully.

"I've met the sect master."

Li Qingyang was stunned.

He really didn't know what he should call Zhang Yuhe.

Call me Sect Master, it seems a bit inappropriate.

He is from the lower world.

In this sect in the Immortal Realm, there is no name for him yet.

It shouldn't be considered a disciple of the Taoist Saint Sect in the Immortal Realm, right?

Before he could come to his senses.

Zhang Yuhe said with a smile.

"Everyone, sit down and drink tea."

I saw him waving his right hand, and two teacups slowly floated in front of the two of them.

Wait until the two of them sit down.

Zhang Yuhe said to Li Qingyang with a smile.

"I didn't expect you to fly up so quickly. It was faster than I expected."

Li Qingyang stood up immediately and responded respectfully.

"It's all thanks to our ancestors."

"When the ancestor preached in the Holy Land of Galaxy, the disciples were lucky enough to have some understanding, and then they broke through to the state of Mahayana perfection."

After saying this.

Li Qingyang took out two jade boxes and handed them over respectfully.

"Sect Master, this is what you left behind. The disciple has brought it here."

Zhang Yuhe reached out and took the jade box.

He waved his right hand and the jade box slowly opened.

A strong fluctuation of time and space quickly spread in the hall.

The Sky Shattering Immortal Crystal and the Time Immortal Crystal are not ordinary immortal materials.

Even after being collected, it still has the ability to disturb time and space.

Facing such special immortal materials.

Ordinary monks will be affected even if they get closer.

Zhang Yuhe stretched out his hand and pressed it.

The vast power of law quickly suppressed the breath of the fairy crystal.

He closed the jade box gently, then said to Li Qingyang with a smile.

"You are very good."

"From now on in the sect, you can follow Wang Guofeng and work in the Economic and Trade Hall."

"yes."

With the development of the sect.

Zhang Yuhe made some adjustments to the affairs within the sect.

He promoted Wang Guofeng to be the deputy head of the Economic and Trade Hall, assisting Long Xingxiu in handling affairs in various places.

Xie Mingyuan was promoted to deputy master of the Taoist Hall, assisting Lian Zhengyu in handling affairs within the sect.

Li Tian and Feng Xiaotian were promoted to deputy temple masters to assist Yu Liwei in handling temple affairs.

...

#### Chapter 314 Discussions in the Galaxy Hall

Thanks to Zhang Yuhe, he obtained the resources from the Taixu Secret Realm.

Daosheng Sect has entered a period of rapid development.

A large number of True Immortal disciples have broken through to the Golden Immortal Realm.

Even someone like Wang Guofeng, who has just ascended to the immortal world, has only passed a hundred thousand years.

They can all break through to the golden fairyland.

have to say.

The resources provided by Zhang Yuhe are indeed powerful enough.

With the massive resources obtained from the Taixu Secret Realm.

He almost forcibly fed the True Immortal disciples in the sect to the Golden Immortal Realm.

But that's it for now.

Because the speed of cultivation after Jinxian is much slower.

Even Zhang Yuhe continued to provide them with various elixirs that accelerated their cultivation in the Golden Immortal Realm.

The cultivation progress of the Golden Immortal elders in the sect is still extremely slow.

There are more than 500 Golden Immortal elders in Daosheng Sect, almost all of them are in the early stage of Golden Immortal.

Except for those few old Jinxian elders.

The others are basically just rookie Golden Immortals and do not have much fighting power.

At most, they can only bully those monks under the Golden Immortal.

If they want to fight with the golden immortal monks of the same level, they can only rely on the immortal weapons in their hands.

Fortunately, Zhang Yuhe not only allowed them to control the elixirs, but also the immortal weapons.

As long as you can activate it, you don't have to worry about running out of magical weapons.

Zhang Yuhe filled a large number of middle-grade immortal weapons into the Tao Sheng Sect's treasury.

The monks in the sect only need to break through to the Golden Immortal Realm.

Everyone can receive five middle-grade immortal weapons.

This treatment is much more generous than the three super powers in the South China Sea Immortal Territory.

Zhang Yuhe spent a lot of money on cultivating sect disciples.

After all, he was almost breaking through to Taiyi Immortal.

We can't wait until he becomes a Taiyi Immortal Lord.

As for the sect's Golden Immortal monks, there are only three or two big and small cats.

That would be too low a price.

Under the vigorous training of Zhang Yuhe.

A large number of golden immortal elders emerged from Dao Sheng Sect.

It's just that these golden immortal elders are all parallel imports that have been ripened by the elixir.

The real strength is completely worth mentioning.

There is nothing we can do about this.

After all, these Golden Immortal Ancestors have basically just broken through.

They still need to understand the rules and slowly polish their immortal power to adapt to their current cultivation level.

But anyway.

The Daosheng Sect now has more than 500 Golden Immortal elders, and they have the aura of a powerful force.

Except that there is no Taiyi Immortal Lord in charge.

Basically, they are not too far apart from other major forces in the South China Sea Immortal Domain.

Now everyone in the Daosheng Sect has turned their attention to Zhang Yuhe.

Everyone is looking forward to it.

When will my sect leader be able to break through and become Taiyi Immortal Lord?

Although Zhang Yuhe's current strength is not inferior to Taiyi Immortal Lord at all.

Even not inferior to those top-level Taiyi Immortal Lords.

But if the cultivation level is not up to par, then it is a little bit lacking.

I don't have the confidence to say it out loud.

As for whether their own sect master can successfully break through to become Taiyi Immortal Lord.

In this regard, no one in the Daosheng Sect doubts.

What a joke.

With Zhang Yuhe's extraordinary talent.

If he can't successfully break through.

Then the entire fairy world should not have Taiyi Immortal Lord.

Section 385

Don't say that the people of Daosheng Sect think so.

Even the other people in Nanhai Fairyland.

They all think that Zhang Yuhe can definitely break through to Taiyi Immortal Lord.

It's just a matter of time.

...

After sending Wang Guofeng and Li Qingyang away, Zhang Yuhe returned to the practice platform and continued to deduce the Renshui Thunder Absorption Array.

He already had a clear idea, and now he just needed to improve it slowly.

Maybe he only needed to improve this array again.

Time passed slowly.

Five hundred years later.

Zhang Yuhe pushed open the door of the cave and walked out slowly.

At this time, his face was full of smiles.

The Galaxy Hall is located on the top of Daosheng Peak.

Zhang Yuhe walked out of the cave hall and stood on the top of the mountain overlooking the entire sect.

He muttered to himself.

"Finally, the Renshui Thunder Absorption Array has been deduced to the level of a second-level immortal array."

"Now it depends on the strength of the sect. How long it will take to collect all the materials."

After further deduction and improvement.

The current Renshui Thunder Absorption Array requires 100,081 lightning absorption pillars.

And the level of these lightning absorption pillars must all reach the level of middle-grade immortal artifacts.

That's a full 100,000 middle-grade immortal artifacts.

This is a very scary number.

Zhang Yuhe even has some doubts.

Even if he searches the entire South China Sea Immortal Realm, can he gather so many middle-grade immortal artifacts.

This is a problem.

To set up a second-level immortal array, you need to use so many middle-grade immortal artifacts.

It's really a bit exaggerated.

However, there is no way.

If you want the Renshui Thunder Absorption Array to play its due effect, you must invest heavily.

Otherwise.

What if when he passes the tribulation.

The Renshui Thunder Absorption Array does not perform well, that would be nonsense.

In order to ensure that there is no mistake when he breaks through the tribulation.

Zhang Yuhe made a lot of allowance when he deduced the formation.

He would rather put in more hard work when preparing.

He didn't want to be in disgrace when he finally passed the tribulation.

What if he was accidentally killed by the heavenly tribulation.

That would be a big joke.

However, it is really not easy to gather the materials of 100,000 middle-grade immortal artifacts.

Even the most common second-grade immortal materials cannot be produced in the entire South China Sea Immortal Realm.

This is not a question of whether Zhang Yuhe can afford it.

But all the savings of all forces in the entire South China Sea Immortal Realm cannot meet his needs.

The quantity is too much and cannot be supplied at all.

In order to deduce the refining method of the improved version of the lightning absorption column, Zhang Yuhe really spent a lot of effort.

It can even be said that.

It is not too difficult to improve the Renshui lightning absorption formation.

At least for him, it is so.

The difficulty lies in how to put the improved formation into reality.

If he can't get enough materials to refine a suitable lightning-absorbing column.

Then his deduced and improved array, no matter how exquisite it is, it will be useless.

No matter how perfect the theory is, it is completely useless if it cannot be implemented.

This is actually a question of, since, and, and more.

Not only must there be enough and suitable lightning-absorbing columns, but also the materials for refining must be simplified as much as possible, and the array must achieve the ideal effect.

This is a question of how to balance the three needs.

In order to solve this problem.

Zhang Yuhe found another way.

He deduced a refining method that uses the bones of chaos beasts as the core material.

To refine lightning-absorbing columns.

If you want to say which material source is the most in the fairy world?

That is undoubtedly the chaos beast.

On the Chaos Continent, the number of chaos beasts is as numerous as cattle hairs, and it is completely impossible to kill them all.

Every year, the number of chaos beasts killed by cultivators can be said to be countless.

The corpse bones of chaos beasts are indeed precious, but the advantage is the large quantity.

There is enough supply.

As long as you have enough fairy stones, you can basically buy it.

Zhang Yuhe has no shortage of fairy stones.

Even if he has fewer fairy stones, he can exchange them for other treasures.

He got so many treasures in the Taixu Secret Realm.

Like those fairy pills that can accelerate cultivation and help break through bottlenecks.

Just take out a little and auction it, and you can get a lot of fairy stones.

These fairy pills are indeed very precious to others.

But for Zhang Yuhe, it's just like that.

Because he can refine it himself.

Mastering a top-grade pill formula is equivalent to mastering a cash cow.

He got many precious pill formulas in the Taixu Secret Realm.

And the corresponding spiritual herbs and fruits are also planted in the secret realm.

There is basically no shortage for the time being.

"Now it depends on the strength of the sect. I hope to collect all the materials as soon as possible."

Zhang Yuhe muttered to himself silently.

He took out the Immortal Mirror.

After casting a spell, he spoke lightly.

"Inform everyone to come to the Galaxy Hall for a meeting."

...

Chapter 315 Just thinking about it makes me excited

Lian Zhengyu sat cross-legged on the practice platform with his eyes slightly closed.

Thanks to the various resources provided by Zhang Yuhe.

His current cultivation has already broken through to the late stage of the Golden Immortal.

You know.

It is very difficult to break through a small realm in the Golden Immortal Realm.

Before this.

Lian Zhengyu practiced for millions of years, but he was only in the middle stage of the Golden Immortal Realm.

Even the small realm of the middle stage of the Golden Immortal has trapped him for millions of years.

There is no way.

The Ji'an Sea is located in a remote area.

They can't get any immortal pills that can accelerate cultivation.

It is even more impossible to get spiritual objects that can help break through the bottleneck.

Every step forward requires a long period of cultivation and accumulation.

Even a little bit of luck is needed.

Otherwise.

Section 386

Maybe they will be stuck in the same place for their whole life.

Their cultivation will not improve at all.

However, since Zhang Yuhe returned from Taixu Secret Realm.

Their predicament has been completely relieved.

Zhang Yuhe not only took out a large number of resources suitable for True Immortal disciples.

He also took out immortal pills and spiritual objects suitable for use in the Golden Immortal Realm.

Among them is the immortal pill that helps the middle-stage Golden Immortal break through the bottleneck.

It is thanks to this immortal pill.

Lian Zhengyu broke through the bottleneck in one fell swoop and raised his cultivation to the late Golden Immortal.

In fact, it is not just him.

When the three major forces merged, those old-fashioned Golden Immortal cultivators.

Basically, they all made breakthroughs.

It has only been a hundred thousand years.

If it was in the past.

Even if it had been a million years.

They would rarely make a breakthrough once.

Enjoy the benefits brought by Zhang Yuhe.

Everyone has long forgotten their original sect.

They only have Daosheng Sect in their hearts.

Not the original Daosheng Sect.

It is the Daosheng Sect under the leadership of Zhang Yuhe.

This is also the first sign of the merger of the three major forces.

If Zhang Yuhe is not here.

Who can bring all of them together?

They admire Zhang Yuhe from the bottom of their hearts.

Because everyone knows very well that this is a super thick leg.

As long as they hold it tightly, they may have a chance to take off together.

Just when Lian Zhengyu was still practicing.

Suddenly his expression moved.

A fairy mirror appeared in his hand.

After casting a spell.

He immediately stood up and muttered to himself.

"The sect master summoned everyone to the Galaxy Hall for a meeting. This is a rare thing."

"Is the sect master ready to break through the Taiyi Immortal?"

In normal times.

Zhang Yuhe almost never goes out of seclusion and basically does not pay attention to the affairs of the sect.

He will not summon everyone to discuss matters.

The last time Zhang Yuhe summoned everyone to discuss matters was before going to the Taixu Secret Realm.

Lian Zhengyu couldn't guess Zhang Yuhe's intention.

Because the entire South Sea Fairyland has been very peaceful recently.

Nothing major has happened.

Except for Zhang Yuhe's possible breakthrough.

Lian Zhengyu really couldn't think of any other possibilities.

"We have to notify others immediately. The Sect Master's business can't be delayed."

Lian Zhengyu cast several spells towards the Immortal Mirror.

After notifying the chief and deputy chiefs of each hall.

He flew past the cave gate and quickly flew towards the Galaxy Hall.

Zhang Yuhe sat quietly at the top of the hall.

After a while.

The chiefs of each hall arrived at the Galaxy Hall one after another.

Including Li Tian and Wang Guofeng, the newly promoted deputy chiefs.

After seeing everyone all present.

Zhang Yuhe swept his eyes over everyone, and then said slowly.

"This time, I called everyone here because there are some things that I want you to handle."

"Sect Master, please give us your orders, and we will do our best."

Everyone responded in unison.

Seeing everyone's enthusiasm, Zhang Yuhe took out a jade slip and said with a smile.

"It's not a big deal. Here is a list of materials."

"You arrange for the elders and disciples of each hall to go to the South Sea Fairyland and various places in the Chaos Continent to purchase all the things listed above."

"Since the quantity required is large, you may need to spend more time."

After saying this, Zhang Yuhe flicked his finger, and the jade slip slowly flew in front of Lian Zhengyu.

Lian Zhengyu picked up the jade slip, looked at it carefully for a while, and then passed it to Yu Liwei next to him.

After everyone checked the contents of the jade slip one by one, they couldn't help but show puzzled expressions on their faces.

Because there was nothing special recorded on the jade slip given by Zhang Yuhe.

It only recorded some common second-level fairy materials.

The most precious material among them was only the bones of Chaos Beasts with four to six stars.

These materials were not very precious, nor were they difficult to find.

They didn't understand.

If it was just to collect these materials on the jade slip.

Why did Zhang Yuhe take it so seriously?

Still calling everyone together to discuss matters?

It's totally unnecessary, right?

Just when everyone was very puzzled about this.

Lian Zhengyu bowed to Zhang Yuhe and asked.

"Master, you just said that a lot of materials on the jade slip are needed."

"I wonder how many exactly are needed?"

Zhang Yuhe stretched out a finger and said slowly.

"I need 100,000 copies of each material recorded on it?"

"How many?"

Hearing Zhang Yuhe's words, everyone was completely stunned.

They didn't dare to believe their ears at all.

Lian Zhengyu couldn't help but confirm again.

100,000 copies, that's too exaggerated.

Although the materials recorded on it are relatively common things.

But no matter how common they are, they are also second-level immortal materials, not cabbages on the ground.

If you only need to find 1,800 copies, it really doesn't take too much effort.

The sect's treasure house can take them out.

But 100,000 copies of second-level immortal materials are really too exaggerated.

So many second-level immortal materials, where can I find them?

Zhang Yuhe nodded gently, and then said helplessly.

"You heard it right, one hundred thousand copies are indeed needed."

Everyone was in an uproar when they heard Zhang Yuhe confirm again.

Although the Dao Sheng Sect can be considered rich now, they still want the materials on the jade slips.

One hundred thousand copies were collected.

It is indeed not easy.

It's not that they can't afford it.

But there is no place to buy it.

With so much material, I am afraid that the entire South China Sea Immortal Territory will be searched.

In a short period of time, it may not be fully supplied.

At this time, Wang Guofeng, who was sitting below, tentatively asked Zhang Yuhe.

Section 387

"Sect Master, are you asking everyone to collect these materials to prepare for the tribulation?"

"good."

Zhang Yuhe nodded slightly, and then continued to speak.

"Now that I have reached the Golden Immortal Consummation, the next step is to break through to the Taiyi Realm."

"But everyone knows that it is not that simple to break through to Taiyi Immortal."

"Otherwise, the number of Taiyi Immortal Lords in the South China Sea Immortal Territory would not be so small."

"Just to break through Taiyi Immortal, the calamity that needs to be faced can stop countless people."

"I asked you to collect these materials to prepare a formation to help you survive the Taiyi Heavenly Tribulation."

"If this formation can be successfully built successfully, it will be much easier for everyone to break through and overcome tribulations in the future."

Speaking of this, Zhang Yuhe glanced at Yu Li slightly.

Then he continued to speak.

"It has been some time since Palace Master Yu has reached the Golden Immortal level. The sect has the Nine Apertures Linglong Pill to help break through the Taiyi realm."

"If this formation is successfully built, then I believe that Palace Master Yu will have a great chance of breaking through to Taiyi Realm."

As soon as Zhang Yuhe finished speaking, everyone's faces immediately showed excitement.

Everyone remembers it clearly.

They also helped Zhang Yuhe collect materials last time, and then there was an extra tribulation platform on Galaxy Island.

With this tribulation platform.

A large number of true immortal disciples took the opportunity to break through to the Golden Immortal Realm.

Everyone was thinking.

If Zhang Yuhe creates a more powerful tribulation formation.

That's not what it means.

Will they also have a chance to successfully break through and become Taiyi Immortal Lord in the future?

Just thinking about it makes me excited.

...

Chapter 316 Everyone is mobilized

Although most of them are still very far away from Taiyi Realm.

Even Lian Zhengyu has only just reached the late Golden Immortal stage.

There is no need to talk about anything until the Golden Immortal is perfected, and the breakthrough becomes Taiyi Immortal Lord.

But it's at least a hope.

Moreover, Dao Sheng Sect is now in a stage of rapid development.

There is no shortage of various resources within the sect.

Everyone believes it.

If everything goes well.

They all have confidence that they can cultivate to the Golden Immortal Dzogchen.

for them.

In the future, he will break through and become Taiyi Immortal Lord.

The biggest difficulty is how to survive the catastrophe.

Other problems can be solved with resources and time.

Only natural disasters need to be endured.

The Taiyi Heavenly Tribulation is extremely terrifying.

It is the biggest obstacle for the Golden Immortal monks to break through to the Taiyi realm.

If Zhang Yuhe can solve this problem.

For these people.

Breaking through and becoming Taiyi Immortal Lord is no longer an extravagant hope, but a future that can truly be expected.

Think of this.

Everyone was extremely excited.

If there is such a day, they can break through and become Taiyi Immortal Lord.

That is true longevity and freedom.

Taiyi Immortal Lord has unlimited longevity.

If there is no disaster or disaster, it can be said that it is immortal.

For most monks.

Immortality is their biggest dream.

It is the ultimate goal of their cultivation.

Zhang Yuhe wanted to build one that could assist the Golden Immortal monks in breaking through to Taiyi Immortal's tribulation formation.

Naturally, everyone is very supportive and looking forward to this move.

The only thing that worries them is.

Can this great tribulation formation be built successfully?

Can it finally have the effect of fighting against the Taiyi Heavenly Tribulation?

Although Zhang Yuhe once had the experience of building a tribulation platform.

But everyone still has no idea.

The Tribulation Platform on Galaxy Island can only be used to assist True Immortal disciples when they break through to the Golden Immortal Realm.

Almost every major force in the South China Sea Immortal Territory has a similar tribulation platform.

But it can assist the Golden Immortal monks to break through to the tribulation platform of Taiyi Immortal.

There is none in the entire South China Sea Immortal Domain.

Even the three superpowers do not have similar tribulation platforms.

In rumors.

Only those holy places where Tao Ancestors are seated have similar tribulation platforms.

It can be seen from this.

How difficult would it be to build such a tribulation platform?

Even the super powerful forces with the Great Luo Immortal in charge can't do it.

Everyone is a little worried that Zhang Yuhe's operation to build the tribulation formation may fail.

Even though I think so.

But no one brought it up at the scene.

Because in everyone's eyes.

Even if it does fail, it doesn't matter.

It's just a waste of time collecting materials.

As for other investments, they are not worth mentioning at all.

Dao Sheng Sect is not short of money now.

more importantly.

If Zhang Yuhe really succeeded in building this kind of tribulation formation.

That will surely lay a foundation for the Tao Sheng Sect that will last for eternity.

Not only these people have the opportunity to break through and become Taiyi Immortal Lord.

Even in the future of Dao Sheng Sect, Immortal Lord Taiyi will continue to be born.

For such an eternal foundation, they just run errands and go out to buy materials.

Just doing such a small thing, what does it mean?

Zhang Yuhe glanced at everyone, and then continued to speak.

"In addition to collecting materials, there are several things that need to happen simultaneously."

"The first thing is to expand the Weapon Refining Hall to ensure that it can accommodate a thousand equipment cauldrons, and start refining the equipment at the same time."

"The second thing is to expand the Galaxy Island on a large scale, at least to expand the area of the Galaxy Island to a million miles."

"The third thing is to relocate all residents within a radius of hundreds of millions of miles with the Galaxy Island as the center."

The first point is easy to understand.

It is a super large project to refine 100,000 pieces of medium-grade immortal weapon-level lightning absorption pillars.

Dao Sheng Zong does not have so many second-level immortal weapon masters.

And the success rate of other immortal weapon masters in refining medium-grade immortal weapons is not guaranteed at all.

So he can only rely on himself.

But refining a medium-grade immortal weapon is also very time-consuming.

Zhang Yuhe roughly estimated.

At his current refining speed.

It takes about a year to refine a medium-grade immortal weapon-level lightning absorption pillar.

Section 388

If he refines it one by one.

It would take a hundred thousand years to complete the entire refining work.

He doesn't have the patience to wait for a hundred thousand years.

Therefore, we can only expand the Weapon Refining Hall.

Wait until the materials are collected.

He started work on a thousand refining cauldrons at the same time.

That way, it can greatly improve the efficiency of weapon refining.

If there are enough materials.

It only takes about a hundred years.

He can complete the work of refining the thunder absorbing pillar.

As for why Galaxy Island needs to be expanded, this is actually easy to understand.

Because the improved Renshui mine-absorbing array is extremely large in scale.

The current area of Galaxy Island is not enough to support such a huge formation.

So expansion is needed.

Regarding the third thing, Zhang Yuhe considered the terrifying power of Taiyi Heavenly Tribulation.

Far from being comparable to an ordinary catastrophe.

The Taiyi Heavenly Tribulation covers a huge area.

In order to prevent unrelated people from being involved in the disaster.

They can only move the nearby residents away in advance.

But this matter is not difficult to deal with.

Anyway, there are many desert islands in the Ji'an waters, which are enough to accommodate these migrating residents.

Moreover.

Even if there is not enough space.

They can also reclaim the sea and build islands.

With the current strength of Dao Sheng Sect.

Not to mention building some small islands.

Even if it is to create a continent with a radius of tens of millions of miles in the Ji'an sea area.

That was all a small incident.

There are so many elders and disciples of Daosheng Sect.

It only takes a matter of minutes for everyone to move mountains and reclaim seas together.

The reason why the Renshui mine-absorbing array was built was on Galaxy Island.

It's because it's just the right place.

There are no important industries or bases around, and the population density is not high.

As for the original tribulation platform on the island, Zhang Yuhe plans to move it to another place.

When the True Immortal disciples broke through to the Golden Immortal, the power of the Heavenly Tribulation was relatively weak.

Find a random place, somewhere relatively remote.

Just re-establish the Tribulation Platform.

...

Following Zhang Yuhe's order, almost all members of the Dao Sheng Sect were mobilized.

There are more than five hundred golden immortal elders, each leading a team of true immortal disciples.

Go to various sea areas and various fairy cities in Chaos Continent respectively.

Everyone prepared for a big purchase according to the list on the jade slip.

Originally, this kind of purchase only needed to be handled by the Economic and Trade Hall.

It's just that the amount needed this time was too large.

If you don't spread the stall.

I want to buy 100,000 lightning-absorbing materials.

I don't know yet that I have to wait until the Horse Moon in the Year of the River.

In order to speed up the progress of collecting materials.

Zhang Yuhe sent almost all the strength of the sect out.

Everyone carries a large amount of fairy stones and various precious resources.

They rushed to various places in the South China Sea Fairyland to contact local forces and chambers of commerce.

As long as there are materials on the jade slips, buy them all.

As for the price issue.

Zhang Yuhe gave them a lot of autonomy.

As long as others are not deliberately trying to extort money, it doesn't matter if it's more expensive than usual.

Buy it.

Not short of money anyway.

A few days later.

More than 500 purchasing teams set off one after another.

The entire Dao Sheng Sect was completely empty in an instant.

Except for Lian Zhengyu, who is still sitting in the sect.

None of the other Golden Immortal elders were left behind.

Even those true immortal disciples basically set off with the team.

Daosheng Sect at this time.

Only Zhang Yuhe and Lian Zhengyu, two golden immortals, were left, plus a large number of disciples below true immortals.

despite this.

These people are not idle either.

Under the arrangement of Lian Zhengyu.

These disciples under the True Immortal were expanding Galaxy Island and relocating nearby residents at the same time.

At the same time, the sect's weapon refining hall must be expanded.

...

Chapter 317 Thousands of cauldrons are opened together to refine the lightning absorbing pillar

Thanks to the teleportation array in Ji'anfang City.

Nowadays, if everyone wants to, it is much more convenient to travel to other sea areas.

You only need to transfer through Tiangong Sea Area, and then you can reach the surrounding sea areas.

Of course.

Not all sea areas are connected by teleportation arrays.

The entire South China Sea Immortal Territory is roughly divided into more than a hundred square sea areas.

Except for those sea areas where Taiyi Immortal Lord is stationed, or where Taiyi Immortal Lord has been out.

The remaining sea areas are the same as the previous Ji'an sea areas.

There is no teleportation array.

for these places.

Dao Sheng Sect did not let it go and still sent out a purchasing team.

They need to teleport to the nearby adjacent sea area first, and then fly over in a flying boat.

Dao Sheng Sect went out in large numbers and quickly attracted everyone's attention.

They thought that Dao Sheng Sect wanted to cause trouble.

Although in some people's eyes.

The strength of the Dao Sheng Sect is not worth mentioning at all.

After all, Dao Sheng Sect does not have Taiyi Immortal Lord in charge.

Let's not talk about the strength.

Without Immortal Taiyi, the continuity of the inheritance cannot be guaranteed.

Maybe one day, the entire sect will be gone.

There are countless forces like this in the entire South China Sea Immortal Territory.

Almost every once in a while, new sects rise and old sects fall.

In the eyes of many people.

The Dao Sheng Sect is just an upstart with better luck.

Through a large amount of resources, a group of golden immortal monks were born.

Not worth mentioning at all.

But in the eyes of some insiders.

Chapter 389

For example, Nangong Immortal Clan and Wanxian Sect.

They have seen Zhang Yuhe's strength.

Know how powerful Zhang Yuhe is.

In their view.

As long as Zhang Yuhe is here.

The strength of Dao Sheng Sect is no worse than any major force.

A peerless genius who can beat even the top Taiyi Immortal Lord to death.

Can he be treated like an ordinary Golden Immortal monk?

Obviously it can't be done.

I saw the Dao Sheng Sect going out in large numbers.

The Nangong Immortal Clan thought that the Dao Sheng Sect planned to gather forces to build an immortal city in the Chaos Continent.

After all, with the current strength of Dao Sheng Sect.

Even if you build a monarch-level fairy city, it won't take much effort.

However, after some investigation.

They were shocked to find out.

The Dao Sheng Sect went to war just to purchase materials.

And that's just purchasing some common fairy materials.

This made them feel very puzzled.

Do we need to send so many people to purchase these ordinary second-level immortal materials?

The Nangong Immortal Clan was very curious about this.

They contacted Dao Shengzong's purchasing personnel and made insinuations.

I would like to inquire about the purpose of Dao Sheng Sect purchasing these materials.

However, in the end, they asked nothing.

the reason is simple.

Except for those who participated in the discussion and the heads of various halls, no one else knew.

They just buy.

I don't know what I'm going to use these materials for.

Due to the Dao Sheng Sect's aggressive sweeps of goods.

The prices of second-level immortal materials in the entire South China Sea Immortal Territory have increased slightly.

despite this.

Dao Shengzong didn't hesitate.

It doesn't matter if the price goes up.

As long as you have the goods, I will buy them.

It's exactly the image of a super nouveau riche.

The wealth of the Daosheng Sect was now fully revealed to the world.

See this situation.

Some people with evil intentions even set their sights on the Dao Sheng Sect.

they thought.

Dao Sheng Sect is so rich, but there is no Taiyi Immortal Lord in charge.

Strength is not worthy of one's own wealth.

Isn't this a proper fat sheep?

over the next few decades.

There were three consecutive waves of unknown people who quietly came to the gate of Dao Sheng Sect.

There was a group of people among them, even led by Taiyi Immortal Lord.

But Zhang Yuhe is here.

Of course, these people all disappeared silently.

How dare you bring your idea to the Dao Sheng Sect?

Is this seeking death?

He doesn't have the strength of Daluo Immortal King.

No matter how much you come, you will die.

Even if it is encountered in the wild.

Zhang Yuhe can also defeat the top level Immortal Taiyi to death.

With his current strength.

Just activate the magical power of Hunyuan Guiyi.

No Taiyi Immortal Lord can even think of taking advantage of him.

not to mention.

Zhang Yuhe is now in charge of the sect.

There is a mountain gate formation to help.

Under Immortal King Tailuo, no matter how many people come, they will die.

As word spreads.

Only then did everyone find out.

How can the Dao Sheng Sect be a fat sheep?

It is simply an abyss that eats people without spitting out their bones.

Even Taiyi Immortal Lord has gone and never returned.

Everyone has to make a new assessment of the strength of Dao Sheng Sect.

After careful investigation.

Zhang Yuhe's past achievements are slowly spreading in the South China Sea Immortal Domain.

Until this time.

Everyone was shocked to find out.

Zhang Yuhe is not an ordinary Golden Immortal monk at all.

And a ruthless person who killed Taiyi Immortal Lord was like Cao Jie.

There is such a ruthless person sitting in charge.

There are actually people who dare to take ideas from the Holy Sect.

It's as if I didn't look at the almanac when I went out.

From now on.

Dao Sheng Sect's procurement work went extremely smoothly.

No one wants to offend Dao Sheng Sect.

Moreover, everyone trades fairly, and if you don't make money, you would be a fool.

Everyone knows it.

With Zhang Yuhe's incredible talent, he will definitely be able to break through and become Taiyi Immortal Lord in the future.

By that time, he might be a giant in the South China Sea Immortal Domain.

The first person under the Daluo Immortal King.

For such people.

Who would want to offend?

Even in some sea areas.

Local forces took the initiative to approach the Dao Sheng Sect's purchasing team.

Sell the materials to Dao Sheng Sect at low prices.

In order to have a good relationship.

...

Time passed slowly.

Two hundred years later.

Zhang Yuhe stood outside the weapon refining hall.

Through the concerted efforts of everyone.

Over the years, they have collected nearly 80,000 pieces of mine-absorbing pillar materials.

There are still 20,000 materials left and need to be collected slowly.

However, the further you get to the back, the more difficult it becomes to collect materials.

Because they have basically bought up all the materials that can be found on the market.

The rest are either in some remote areas and they can't get there for the time being.

Either it is within the sphere of influence of the Divine Beast Sect.

The Divine Beast Sect and the Ten Thousand Immortals Sect cannot deal with each other.

Section 390

Daosheng Sect is considered a subordinate force of Wanxian Sect.

Naturally, they would not go to the territory of the Divine Beast Sect to purchase materials.

At most, other chambers of commerce, such as Qixinglou, a large chamber of commerce across the Immortal Realm, would be entrusted to purchase it on their behalf.

Now, 80,000 materials for lightning-absorbing pillars have been collected.

Zhang Yuhe plans to start refining the thunder absorbing pillar first.

While refining, wait for the subsequent materials.

After all, refining the thunder-absorbing pillar also takes a lot of time.

Zhang Yuhe walked into the weapon refining hall.

At this time, the weapon refining hall had already been emptied.

After the expansion, the Weapon Refining Hall temporarily became his exclusive use.

Zhang Yuhe found a place at random and sat down cross-legged.

All one thousand refining rooms in the main hall have been opened.

I saw him wave his right hand.

Various materials kept flying out of the sleeves and falling into the four-legged cauldron.

Most of these refining cauldrons are low-grade or mid-grade immortal weapons.

There is no problem at all in refining a lightning-absorbing pillar at the level of a middle-grade immortal weapon.

With input of materials.

Zhang Yuhe quickly used the magic formula.

The scorching flames ignited from the bottom of these four-legged tripods.

While he used his consciousness, he observed the conditions inside all the cauldrons.

While silently comprehending the power of the law.

Although he has already understood all the six supreme laws to the level of small success.

But there is still a long way to go before reaching Xiaocheng's peak.

take it easy.

While refining the weapon, he also understood the rules.

Both are correct.

Just perfect.

...

Chapter 318 Call it a day, refining completed

Zhang Yuhe was sitting cross-legged in the weapon refining hall, and a thousand four-legged cauldrons were started at the same time.

for him.

Refining the thunder-absorbing pillar is just more time-consuming and does not require too much effort.

He only needs to separate part of his spiritual consciousness and pay attention to the situation inside the cauldron at any time.

In fact.

The biggest difficulty in refining an immortal weapon is not the smelting materials in the early stage, nor the shaping of the artifact.

But in the follow-up, when carving the runes.

But for Zhang Yuhe, this is not a problem.

A middle-grade immortal weapon-level lightning-absorbing pillar with the required runes on it.

He can complete the painting in minutes.

Different from others.

Others are refining immortal weapons or elixirs.

All require full commitment.

I am afraid that something will go wrong.

causing the final refining to fail.

But Zhang Yuhe has no consciousness of failure at all.

Because for him.

Whether it is refining weapons or elixirs, it has never failed.

For a person who has never failed, he will naturally not operate with caution.

Just be casual.

Therefore, although a thousand refining furnaces are started at the same time.

Zhang Yuhe can still separate most of his mind and sink into the understanding of the law.

As for the thousand four-legged cauldrons in front of him, he only needed to pay a little attention.

It won't delay things.

Wait until the lightning absorbing column is formed.

He then started to carve the runes, and the entire refining process was completed.

As time passes slowly.

Zhang Yuhe was refining the thunder-absorbing pillar while comprehending the rules.

Batch after batch of lightning absorbing pillars were refined by him.

Fifty years later.

After continuous refining.

Zhang Yuhe's storage bracelet is already full of more than 50,000 lightning-absorbing pillars.

The grades of these thunder-absorbing pillars are all middle-grade immortal weapons.

In the past fifty years, Zhang Yuhe has refined more than 50,000 lightning-absorbing pillars that are at the level of middle-grade immortal weapons.

Throughout the entire refining process, he never failed.

All a success.

No material was wasted and no time was wasted.

This kind of weapon refining efficiency is a bit scary to say the least.

In terms of craftsmanship.

His ability alone can match that of a super powerful force.

Even stronger.

As time passes slowly.

The Dao Sheng Sect's teams that went out to collect materials began to return one after another.

The collection of 100,000 lightning pillar materials has almost been completed.

Zhang Yuhe continued to work hard on refining the thunder-absorbing pillar.

Another fifty years passed.

Zhang Yuhe walked out of the weapon refining hall.

Lian Zhengyu and the heads of various palaces waited quietly outside.

In fact.

After completing the material collection task.

They did not go back to practice, but all stayed outside the weapon refining hall.

Since the main hall was closed, they could not see what was going on inside.

Everyone just knows.

Zhang Yuhe was alone inside, refining the thunder-absorbing pillar.

As for the refining progress and refining success, they have no way of knowing.

despite this.

Everyone was still waiting silently outside the weapon refining hall.

The matter of cultivation is not urgent at this moment.

Because everyone understands.

Once Zhang Yuhe completed the work of refining the thunder absorbing pillar.

It is estimated that they will start setting up the corresponding tribulation formation soon.

Maybe soon, prepare to try to break through the Taiyi realm and usher in the disaster.

Faced with such an opportunity, no one will miss it.

to be honest.

No monk in the entire Ji'an sea area has ever seen anyone else break through to the Taiyi realm.

And no one has ever seen the power of Taiyi Heavenly Tribulation.

Because in the history of Ji'an sea area, Immortal Lord Taiyi has never been born.

Taking advantage of Zhang Yuhe's breakthrough.

Everyone wants to see it.

So that when you make a breakthrough in the future, you can have a reference goal.
