

Top talent 401

Section 401

The power of these divine weapons transformed from the Heavenly Tribulation is probably equivalent to that of top-grade immortal weapons.

Under normal circumstances, he really wouldn't be able to withstand a few waves.

After all, the best immortal weapon is exclusive to Daluo Immortal King.

A Taiyi Immortal like him who has just broken through.

If you can block a blow from Daluo Immortal King, you can boast for a lifetime.

It is indeed a bit difficult to hold on continuously.

But things are different now.

Now he is going through a tribulation.

The Renshui Thunder Absorbing Formation is a defensive formation designed specifically to deal with the Heavenly Tribulation.

It turns out.

The power of this formation is truly extraordinary.

That terrifying sky-holding ax shadow just now.

After being weakened by the Renshui Thunder Absorbing Formation, its power was only one-tenth or two-tenths.

Probably not much different from the power of the top Taiyi Immortal Lord in a full blow.

This little power is nothing to worry about for Zhang Yuhe.

Even before breaking through, he could easily block it with the help of his sword formation.

not to mention.

He has now broken through to the Taiyi realm, and his strength has undergone earth-shaking changes.

With his current strength.

There is no pressure at all to deal with the weakened calamity.

The only thing we need to worry about is that we don't know how long this disaster will last.

According to classic records.

A normal Golden Immortal Heavenly Tribulation will last for a total of 108 rounds.

The Taiyi Heavenly Tribulation will last for 1086 rounds.

The reason why it is said that the Taiyi Heavenly Tribulation is extremely difficult to survive.

In addition to the power of the heavenly tribulation, it will be particularly powerful.

The number of rounds of calamity that lasts is the most troublesome thing.

1086 consecutive rounds of heavenly calamity are enough to make countless Golden Immortal monks feel desperate.

No matter how well-prepared the Golden Immortal monk is.

No matter how many defensive measures are prepared, it will still be difficult to deal with it.

Because the long catastrophe will drag down most people.

Drag it to the last moment.

The fairy spirit energy in the dantian has long been exhausted.

There is no fairy spirit drive.

No matter how powerful the defensive weapon is, no matter how many defensive methods are used, it is all in vain.

Generally speaking.

Zhang Yuhe is not afraid and will fight a war of attrition with Tianjie.

Because his Dantian has long been as wide as the sea.

Unless it is to activate some special magical powers.

Otherwise.

If he continued doing it for half a year, he didn't have to worry about draining the fairy energy from his dantian.

"I hope the duration of the catastrophe will be normal."

Zhang Yuhe looked up at the sky and murmured to himself.

Although 1086 rounds of heavenly tribulation are indeed a bit much.

Moreover, as the calamity progresses to the back, its power will definitely become more fierce.

But Zhang Yuhe was not worried.

Things within his cognition are easy for him to handle.

I'm just afraid of other accidents.

If something unexpected happens during the duration of the catastrophe, it will be a bit difficult.

If the calamity bombards tens of thousands of rounds in a row.

Wouldn't that drive people crazy?

"I hope nothing happens again."

Just when Zhang Yuhe was still struggling.

A dazzling sword light split the dark clouds in the sky.

The sword light swept across the sky and the earth, hitting Galaxy Island directly.

However, with the help of the Renshui Thunder Absorbing Formation.

The seemingly powerful sword light did not bring any trouble to Zhang Yuhe.

He even put away the sword array around him.

He punched several times in succession, directly smashing the sword light into pieces.

After enduring several rounds of natural disasters in a row.

Zhang Yuhe's hanging mood finally relaxed.

Although the Heavenly Tribulation Divine Weapon is indeed a bit exaggerated.

But he was well prepared.

Zhang Yuhe thought.

It should not be too difficult to survive the Second Taiyi Heavenly Tribulation.

take it easy.

Zhang Yuhe has even begun to think about what to do after he successfully overcomes the tribulation?

For example.

How about holding a grand celebration of the Immortal Lord?

"Forget it, let's wait until we get through the catastrophe."

Zhang Yuhe gathered his mood and looked up at the sky.

Prepare for the next round of disaster.

...

Chapter 326 The natural disaster is over

Zhang Yuhe stood on the Taiyi Immortal Platform, and waves of catastrophes struck him continuously.

The Heavenly Tribulation transformed into various forms of divine weapons.

Swords, spears, swords and halberds, axes, hooks and forks.

Various forms of magical weapons continued to split the dark clouds in the sky and attack Galaxy Island.

However, under the influence of Renshui's thunder-absorbing array.

These are the magical weapons transformed from heavenly calamities.

It didn't put any pressure on Zhang Yuhe.

He even put away the Nine Heavens Hunyuan Sword Formation and only relied on the Galaxy Zhoutian Fist.

Just crush these Heavenly Tribulation Divine Weapons.

The whole process seems very easy.

It doesn't look like you are going through a tribulation at all, just like you are having fun.

Easy, simple and enjoyable.

In a place hundreds of millions of miles away from Galaxy Island.

Lian Zhengyu and others looked at the various magic weapons above Galaxy Island in the distance, with terrifying pressure, constantly falling towards the island.

Everyone couldn't help but look at each other.

They have really never seen such a formation.

And don't say you've seen it.

They haven't even heard of it.

Isn't it just to survive a catastrophe?

Where do so many strange magic weapons come from?

Moreover, the power of these magical weapons is very extraordinary at first glance.

Even if they are hundreds of millions of miles apart.

You can still feel the terrifying coercion exuded by those divine weapons.

They couldn't imagine it.

How much pressure is Zhang Yuhe facing at the center of the Milky Way Island?

Section 402

Everyone stared at the scene.

But because the distance was too far, they couldn't see the specific situation on Galaxy Island.

I don't know how Zhang Yuhe is doing now?

But the catastrophe is still going on.

This indicates that.

At least for the time being, Zhang Yuhe is still alive.

If Zhang Yuhe was hacked to death.

Then the dark clouds in the sky will naturally dissipate.

Everyone's hearts were high, and they looked anxiously towards the Milky Way Island in the distance.

At this time, Lian Zhengyu asked Yu Liwei next to him.

"Master Yu, do you know where those magic weapons come from?"

"have no idea."

Yu Li shook her head slightly.

Although she has been preparing to break through Taiyi Immortal Lord for these years.

I have indeed read a lot of various classics.

But she had never heard of these magical weapons transformed from the Heavenly Tribulation.

Lian Zhengyu finally asked her about her knowledge blind spots.

Look at everyone's worried look.

Yu Li said with a slight smile.

"You don't have to worry."

"Although these divine weapons transformed from the Heavenly Tribulation do seem to be powerful."

"But the sect master has been prepared for it. With this great tribulation formation, there will definitely be no problem."

Long Xingxiu, who was next to him, also consoled himself.

"Yes, the sect master has invincible magical powers."

"When there is no breakthrough, even the sect leader can kill the seven-star chaos beast in reverse."

"Now with the breakthrough in cultivation and the assistance of formations, we will definitely be able to withstand the bombardment of the catastrophe."

After hearing Long Xingxiu's words, everyone nodded silently.

I don't know if I agree with his point of view or if I am just comforting myself.

In fact, everyone understands.

Monks can only rely on themselves to survive the calamity.

It's useless for them to worry about it.

Everyone looked at the catastrophe in the distance, feeling speechless in their hearts.

In the past, they had only seen the power of Taiyi Heavenly Tribulation in ancient books.

There is no intuitive feeling.

Now I see Zhang Yuhe and receive the calamity that is coming.

Everyone couldn't help but feel a little triggered.

Can they really withstand such a violent catastrophe?

No wonder there are so many Golden Immortal monks in the South China Sea Immortal Domain.

But there are so few Immortal Lord Taiyi.

Just such a catastrophe would completely make everyone despair.

With the perfect foundation of ordinary golden immortals.

It is simply impossible to withstand such a fierce catastrophe.

Yu Liwei stood quietly in the air with a silent expression.

Relative to other people.

At this time, she was actually feeling more nervous.

Because in the near future, she will also need to try to break through Taiyi Immortal Lord.

She has practiced Taoism for more than nine million years.

If we don't break through, we will not be far away from running out of life.

Once upon a time she still had some expectations.

I hope I can successfully break through Taiyi Immortal Lord and survive the catastrophe.

Now I see this situation.

Yu Liwei was almost desperate.

It was impossible for her to withstand even one wave of such a terrifying catastrophe.

not to mention.

The Taiyi Heavenly Tribulation lasted for 1086 rounds.

How could she withstand it?

“I don’t know how much the Tribulation Formation on Galaxy Island can weaken the power of the Heavenly Tribulation?”

Yu Liwei muttered silently to herself.

She is self-aware.

The power of heavenly tribulation varies from person to person.

Zhang Yuhe is extremely talented, coupled with his understanding of the Supreme Law.

That's why the power of the Heavenly Tribulation is extraordinarily powerful.

It even attracted this kind of heavenly tribulation weapon that they had never seen before.

But Yu Liwei also understood.

Even if it was a normal Taiyi Heavenly Tribulation, she didn't have much chance of being able to survive it.

Because the duration of the catastrophe is really too long.

The calamity continues, as if there is no end.

With her own strength, it was almost impossible to withstand it.

She wants to successfully break through and become Taiyi Immortal Lord, and successfully survive the catastrophe.

The only hope is the tribulation formation on Galaxy Island.

If you don't use the tribulation formation.

For her, choosing to break through rashly is no different from seeking death.

Just because the distance is too far.

She stood here and could not see the specific situation on Galaxy Island.

I don't know how effective the Renshui thunder-absorbing array on Galaxy Island is at this time.

...

Zhang Yuhe stood on Taiyi Immortal Platform.

Watching the Heavenly Tribulation transform into various magical weapons, they kept slashing down.

After the Renshui Thunder Absorbing Formation was weakened, the power of the Heavenly Tribulation was only reduced to one-tenth or two-tenths.

despite this.

over time.

The power of the divine weapons transformed from the Heavenly Tribulation has become more and more powerful.

And the numbers are starting to increase.

At the very beginning.

Only one magical weapon will appear at a time, a divine weapon transformed from a catastrophe.

Slowly, more and more magical weapons were transformed from the calamity.

From two divine weapons, it became three, four, and five.

The power of these magical weapons is gradually increasing compared to the beginning.

Zhang Yuhe slowly activated the Nine Heavens Hunyuan Sword Formation.

The sword array surrounds the whole body, forming layers of sword energy light curtains.

On these sword energy light screens.

It also shines with various runes.

Among them, the yin and yang runes are the most conspicuous.

As the understanding of the law deepens.

Zhang Yuhe integrated the power of the Supreme Law into the sword formation.

The current Nine Heavens Hunyuan Sword Formation is far more powerful than before.

Not only is the attacking power strong.

In terms of defense, it has been greatly strengthened.

Even the power of the divine weapons transformed by the heavenly tribulation is gradually increasing, and the number of divine weapons is also increasing.

However, after Zhang Yuhe unfolded the sword formation.

Section 403

These divine weapons transformed from the Heavenly Tribulation were completely unable to break through the sword formation's defense line.

Even the outermost sword energy light curtain is still as stable as a mountain.

To know.

After the Nine Heavens Hunyuan Sword Formation was fully deployed.

There are countless layers of sword energy light curtains.

Now facing such a powerful disaster.

But even one of the sword energy light curtains couldn't break through.

It can be seen from this.

The current Nine Heavens Hunyuan Sword Formation is so powerful in terms of defense.

Zhang Yuhe activated the sword formation to welcome the coming waves of catastrophes.

He was not panicked or impatient in the slightest.

It's still very early.

The normal Taiyi Heavenly Tribulation has 1086 rounds.

We have just passed more than 500 rounds now, only half of it has passed.

He didn't know if there would be any changes in the future.

But it doesn't matter.

He had already made the preparations that needed to be made.

Just take one step now and take one step at a time.

Zhang Yuhe is full of confidence in himself and the Renshui Thunder Absorbing Formation.

Really driving him to the edge.

Directly activate the magical power of Hunyuan Guiyi.

No matter how powerful the catastrophe is, it will face this magical power.

They are also all floating clouds.

That being the case.

Does he still need to worry?

He Yuhe just felt that these catastrophes came too slowly.

At this speed, it would probably take two or three days to finish all the 1,086 rounds of heavenly tribulation.

It's so slow.

boring.

...

Chapter 327 This calamity is beyond the scope again

As time passes slowly.

The power of the heavenly tribulation has become more and more powerful.

The divine weapons transformed from the Heavenly Tribulation have become more and more powerful, and more and more of them appear at the same time.

There are also more and more.

the most important is.

The shapes of these magical weapons are becoming more and more strange.

From the initial swords, guns, swords and halberds, it has become a tripod, tower, ring and whip.

Don't know why.

These strange magic weapons seem to have very unusual origins.

All very fierce.

Fortunately, the improved Renshui mine-absorbing array is indeed very powerful.

No matter what tricks the calamity turns out to be.

This tribulation formation can perfectly weaken a large part of the power of the tribulation.

When these divine weapons transformed from the heavenly calamity passed through the blue light curtain.

They will all be weakened by the light curtain and pulled towards the sea outside Galaxy Island.

The power of the catastrophe set off boundless huge waves on the sea.

Huge waves swept across the sky and the earth.

Except for this small area of Tianjie Peak.

Almost the entire Galaxy Island was submerged.

It's really a bit scary.

Zhang Yuhe activated the Nine Heavens Hunyuan Sword Formation and silently looked at the sky.

The dark sky was split open by various magical weapons from time to time, and then returned to normal.

I don't know how much time has passed.

When the catastrophe progresses, it's the 1086th round.

I saw a strange six-legged square tripod flashing quickly in the sky.

The six-legged square tripod carries the pressure of the sky, covering a radius of hundreds of millions of miles.

The time and space around Galaxy Island seemed to freeze for an instant.

See this situation.

Zhang Yuhe took a deep breath.

He said silently to himself.

"This should be the last catastrophe, right?"

Until now.

The calamity didn't put much pressure on him.

Rely on the powerful defensive capabilities of the Nine Heavens Hunyuan Sword Formation.

These weakened Heavenly Tribulation Divine Weapons.

It had almost no effect on him.

Zhang Yuhe only needs to use a little strength to easily resolve these catastrophes.

Seeing that 1086 rounds of heavenly tribulation are about to fall.

Zhang Yuhe couldn't help but let out a sigh of relief.

Although this six-legged square tripod does seem to have extraordinary power.

But Zhang Yuhe was not worried at all.

This is nothing.

If the Heavenly Tribulation only has so much power.

He can handle it without even using the Renshui Thunder Absorbing Formation.

Zhang Yuhe was a little skeptical.

Is he too strong?

So much so that he couldn't feel the pressure brought by the natural disaster on him.

It shouldn't be like this, right?

Doesn't the Heavenly Tribulation gradually increase with the strength of the monks?

Could it be that this catastrophe is not just 1086 rounds.

After surviving this wave of catastrophe.

There won't be any more, right?

Just when Zhang Yuhe was still thinking wildly.

The six-legged square tripod quickly pressed towards Galaxy Island with its world-shaking pressure.

Before Fang Ding arrived, a large area of the peaks around Tianjie Peak was crushed.

Zhang Yuhe calmed down.

He mobilized the Nine Heavens Mixed Sword Formation with all his strength.

Regardless of whether this wave of catastrophe is the last round or not.

But this power cannot be underestimated.

He had to deal with it seriously.

The six-legged square tripod passed through the blue light curtain, and most of its power was instantly drawn by the formation.

Slide quickly to the surrounding sea.

There was a huge, shocking wave on the sea surface.

Huge waves swept across the world, and even almost landed on the Heavenly Tribulation Peak.

To know.

Tianjie Peak is the highest peak on the entire Galaxy Island, reaching a height of ten thousand feet.

It can be seen from this.

The power of the Heavenly Tribulation being pulled towards the sea must be so great.

Section 404

Zhang Yuhe concentrated his mind and went all out.

When the six-legged square tripod passed through the blue light curtain.

The remaining power is still considerable.

Continue to rush towards Taiyi Sendai.

Under Zhang Yuhe's full urging.

The Nine Heavens Hunyuan Sword Formation emits layers of sword curtains.

Around Taiyi Immortal Platform, wide intercepting fronts were formed.

Boom...

With a loud bang.

The six-legged square tripod easily crushed the layers of sword curtains and headed straight for Zhang Yuhe.

Zhang Yuhe buried his head in activating the sword array, and the fairy energy in his dantian was like a tide.

Quickly rush into the sword formation.

Whenever the sword energy light curtain is crushed, a new light curtain will be formed.

The sword energy is endless.

The six-legged square tripod was firmly blocked from the outside.

After a while.

Under the interception of the sword energy light curtain.

The six-legged square tripod turned into little bits of light and slowly dissipated between the sky and the earth.

Zhang Yuhe raised his head and looked into the sky.

I saw that the sky at this time was still covered with dark clouds, and there was no intention of ending.

Seeing this situation, Zhang Yuhe felt a chill in his heart.

"Fuck, I knew this catastrophe wouldn't be that simple."

After 1086 consecutive rounds of heavenly tribulation.

The dark clouds in the sky have not dispersed yet.

Zhang Yuhe knew it.

His catastrophe this time was beyond the limit again.

Other people's Taiyi Heavenly Tribulation is 1086 rounds.

He doesn't know how many rounds of heavenly tribulations he will have next.

Think about this.

Zhang Yuhe was very speechless.

It's very annoying when things happen that are out of your control.

Zhang Yuhe cheered up and looked at the sky silently.

That's when.

There was a loud noise in the sky.

As a dazzling light flashed.

The dark clouds in the sky were suddenly split.

A rusty giant ax suddenly appeared.

The giant ax streaked across the sky.

It was as if the entire void was about to be split in half.

In fact.

As the giant ax passed by.

The surrounding void is indeed full of cracks.

The stable void in the fairy world was actually shattered by the giant ax transformed from this heavenly calamity.

Seeing such a situation, Zhang Yuhe couldn't help but be shocked.

To know.

The void in the fairy world is extremely stable.

Even if he strikes with all his strength, he can't move even half an inch.

Even after activating the magical power of Hunyuan Guiyi, it still doesn't work.

However, the giant ax transformed from this calamity can split the void.

It can be seen from this.

The power of this round of heavenly tribulation has surpassed his strongest state.

See this situation.

Zhang Yuhe doesn't care about anything.

He just focused on activating the Nine Heavens Hunyuan Sword Formation.

The sword energy light curtain quickly extended outwards.

He didn't know how many rounds were left in this Taiyi Heavenly Tribulation.

But Zhang Yuhe understood.

If he doesn't get over the current hurdle, the subsequent catastrophes will have nothing to do with him.

Zhang Yuhe mobilized the sword formation with all his strength.

The rusty giant ax quickly streaked across the sky.

Soon it arrived over Galaxy Island.

When passing through the blue light curtain.

Most of the power of the Heavenly Tribulation was dragged to the sea outside Galaxy Island by the Renshui Thunder Absorbing Formation.

A shocking tsunami instantly set off on the boundless sea.

The tsunami swept across the entire Ji'an sea area instantly.

Countless desert islands were immediately submerged by this shocking tsunami.

Those islands that are slightly larger are inhabited.

The monks on the island activated a defensive formation and barely blocked the tsunami.

Zhang Yuhe didn't know.

Because he survived the disaster, he actually caused a huge tsunami in the entire Ji'an sea area.

But at this time, he could no longer care about so much.

Zhang Yuhe mobilized the sword formation with all his strength.

A large amount of fairy energy poured into the sword array crazily, as if it was free of money.

The defensive range of the Nine Heavens Hunyuan Sword Formation began to rapidly extend to the periphery.

The giant ax passed through the blue light curtain, and its momentum didn't seem to lose half a point.

The huge ax shadow instantly struck the surrounding sword energy light screen.

The runes on the sword energy light screen exploded instantly.

I want to stop Ax Shadow.

However.

This rusty ax shadow is really too fierce.

Even if he integrates the Supreme Law into the Nine Heavens Hunyuan Sword Formation.

Still unable to stop the forward momentum of the giant ax.

Breaking through the layers of sword energy light curtains.

The rusty ax silhouette quickly struck towards Zhang Yuhe.

...

Chapter 328 Heaven and earth return to clarity

The rusty giant ax carries powerful pressure across hundreds of millions of miles.

Lian Zhengyu and others stood in the distance.

When the huge ax shadow came, they couldn't help but be shocked.

He quickly took out the Immortal Mirror.

After casting a spell, he shouted loudly.

"Everyone stay away from Galaxy Island and retreat another 80 million miles."

After saying this.

Lian Zhengyu led everyone and quickly evacuated to a distance.

Although they are already very far away from Galaxy Island.

However, the coercion exuded by the giant ax is still terrifying.

The scope of the aftermath of the catastrophe has become wider and wider.

They stay so far away.

Still somewhat unsafe.

Section 405

It is possible to be involved in the catastrophe at any time.

Just to be on the safe side.

Prevent other people from being involved in the disaster.

He immediately ordered the disciples on guard to continue to retreat further away.

Although he didn't know what the situation was like on Zhang Yuhe's side.

But he understands.

We must not let other people be involved in the disaster.

Such a violent disaster.

Once other people are involved, they will basically die.

And when the monks are going through the tribulation.

Once outsiders are involved, the power of the natural disaster will continue to increase.

Lian Zhengyu thought.

They couldn't help Zhang Yuhe to overcome the tribulation.

But at least don't do any damage, right?

It's better to retreat further.

This is good for everyone.

After retreating continuously for 80 million miles.

Lian Zhengyu and others stopped.

They stood in mid-air, staring at the Milky Way Island in the distance.

Feel the terrifying aura emanating from the giant ax that the Heavenly Tribulation transformed into.

Everyone was silent.

The power of the catastrophe was far beyond their imagination.

Everyone really can't understand.

Why did the catastrophe caused by Zhang Yuhe have such terrifying power?

The terrifying ax shadow in the distance was no less powerful than the top-notch Great Luo Immortal King.

Zhang Yuhe just broke through Taiyi Immortal Lord, how could he cause such a terrible disaster.

This is completely illogical.

Zhang Yuhe had just broken through to Immortal Lord Taiyi, how could he possibly be able to withstand such a terrifying catastrophe.

Everyone looked at Galaxy Island in the distance with heavy hearts.

Even before that.

Everyone is full of confidence in Zhang Yuhe.

Everyone thinks so.

With Zhang Yuhe's tyrannical strength.

There will definitely be no problem in surviving the Taiyi Heavenly Tribulation.

However, now everyone has no idea at all.

The power of the Heavenly Tribulation is really a bit ridiculously strong.

Long Xingxiu looked into the distance and murmured to himself.

"If I remember correctly, this should be the 1087th round of heavenly tribulation, right?"

"According to the records in the classics, isn't the Taiyi Heavenly Tribulation all 1086 rounds?"

Faced with Long Xingxiu's question, everyone looked silent.

No one answered.

Because they had discovered this anomaly long ago.

In fact.

This time, Zhang Yuhe suffered a natural disaster.

There have been too many situations beyond their awareness.

The Heavenly Tribulation turns into a divine weapon, and the number of Heavenly Tribulation rounds exceeds the standard.

This kind of out-of-the-box question.

Everyone has never heard of it before.

Now they can do nothing but wait quietly.

...

Zhang Yuhe stood on Taiyi Immortal Platform.

He mobilized the Nine Heavens Hunyuan Sword Formation with all his strength.

A large amount of immortal energy quickly poured into the sword formation as if it was free of charge.

The sword formation surrounded his body, forming a dense defensive network.

However, the ax shadow transformed by this disaster is obviously not comparable to the previous ones.

The huge ax shadow continuously penetrated the layers of sword energy light curtains.

Even Zhang Yuhe used all his strength to activate the sword formation.

Still unable to stop the momentum of the giant axe.

The layers of sword energy light curtains were quickly broken into pieces by the giant axe, and then returned to their original state.

The giant ax shone with cold light and struck straight at Zhang Yuhe.

I don't know how long has passed.

When the giant ax approached, it was within a thousand miles of Zhang Yuhe.

Finally, it turned into a little bit of light and slowly dissipated in the heaven and earth.

As the shadow of the ax dissipated.

The dark clouds in the sky receded instantly, and the sky finally became clear again.

See their situation.

Zhang Yuhe breathed a sigh of relief.

He muttered to himself.

"It's finally over."

The formation just now really shocked him.

The number of Heavenly Tribulation rounds exceeds the limit, and such outrageous things can happen to him.

Fortunately, there was just one more round of catastrophe.

Like the rusty ax shadow just now.

If there were another hundred and eighty rounds, he might not be able to stop it.

But it's okay now.

It's finally over.

See the catastrophe receding.

Zhang Yuhe finally breathed a sigh of relief.

Although the process of overcoming the tribulation this time was a little tortuous.

But the results are good.

Zhang Yuhe stood on the Taiyi Immortal Platform, his tyrannical aura spreading across billions of miles.

He had just broken through at this time.

He is not very familiar with controlling his own power.

He took a deep breath.

Slowly control the breath around your body.

...

Lian Zhengyu and others stood in the distance.

See the sky clear again.

Everyone couldn't help but be overjoyed.

Lian Zhengyu shouted loudly.

"The sect master has passed through the catastrophe."

"Let's go over and take a look."

"I don't know what the sect master's condition is now, whether he is injured or not."

"It should be fine, let's go take a look first."

Everyone turned into streams of light and quickly flew towards Galaxy Island.

They don't know what Zhang Yuhe's situation is now.

Have you been seriously injured by the calamity?

Do you need rescue?

In fact.

Most monks will be injured more or less when going through tribulation.

Section 406

Some serious people.

Even after surviving the catastrophe by luck, there was only one breath left.

Even if he rests for millions of years, he may not be able to recover.

The damage caused by the heavenly tribulation is generally called the damage of the great road.

This injury is extremely difficult to recover from.

In the entire fairy world, there are almost no reliable healing medicines that can treat such injuries.

The monks can only rely on themselves to slowly recuperate and recover.

Everyone is worried that Zhang Yuhe was seriously injured and may be in urgent need of rescue.

After all, the catastrophe just now was a bit too scary.

They even had some doubts.

Wasn't the power of the last heavenly tribulation just now beyond the reach of Daluo Immortal King?

It's just that none of them have ever seen Dao Ancestor take action.

Everyone didn't understand what the power of Daozu's action was.

One can only imagine it.

The power of the last heavenly tribulation just now exceeded their knowledge.

to be honest.

Even veteran Golden Immortal monks like Zhengyu are not without knowledge.

Especially Yu Liwei.

She used to follow Lu Yunfei and wandered around the Chaos Continent for a long time.

I have seen many big shots take action.

Not to mention the Daluo Immortal King of the South China Sea Immortal Domain.

She has even seen a lot of fairy kings from other fairy realms.

But she had never seen it.

The power of anyone's action can be compared to the catastrophe just now.

The rusty ax shadow just now definitely surpassed the ordinary Daluo Immortal King Fanchou.

She was very curious now.

How did Zhang Yuhe survive the final wave of catastrophe?

"It should be the great tribulation formation, which has a very good effect in weakening the tribulation."

Yu Liwei was thinking silently in her heart as she quickly flew across the sky.

At this time, she was eager to go and have a look at Galaxy Island.

Look at Zhang Yuhe's current situation.

Let's see if the great tribulation formation on Galaxy Island has really produced the desired effect.

If this great tribulation formation is really like what Zhang Yuhe said before, it is so magical.

Then she also has confidence.

You can use this great tribulation formation to try to break through the realm of Taiyi.

...

Chapter 329 Imagine the future

Zhang Yuhe stood on the Taiyi Immortal Platform, silently comprehending the changes brought about by the new realm.

As for injuries?

Of course there is no such thing.

The Taiyi Heavenly Tribulation just now was indeed extremely powerful.

But I wanted to hurt him.

That's not even close.

Not only did the catastrophe not hurt him even a hair.

Even at the end.

The divine weapons transformed from the Heavenly Tribulation are still thousands of miles away from him.

As for the previous 1086 rounds of heavenly tribulation, they are not worth mentioning.

Zhang Yuhe basically, when Tianjie just passed through the defense of Renshui thunder formation.

Just use the sword formation to stop the Heavenly Tribulation.

The whole process of overcoming the tribulation.

To outsiders, it may seem extremely dangerous.

However, in Zhang Yuhe's eyes.

Such a catastrophe is still a little bit less interesting.

At the very end.

He thought that there would be another hundred and eighty rounds of heavenly tribulation.

In the end, it only took one more round to chop, and the disaster was over.

It made him worry in vain.

If there is a catastrophe later, there will be hundreds more rounds.

That would indeed pose a considerable threat to him.

It may even be necessary to activate the Hunyuan Guiyi magical power in order to be able to block it.

The final result was that he obviously thought too much.

Although this catastrophe is indeed a bit over the top.

Not only did the Heavenly Tribulation Transformation Divine Weapon appear, it even split one more round than the normal Taiyi Heavenly Tribulation.

despite this.

After being weakened by the Renshui Thunder Absorbing Array.

The remaining power of the Heavenly Tribulation was completely unable to penetrate the defense of the Nine Heavens Hunyuan Sword Formation.

The powerful Taiyi Heavenly Tribulation did not bring much trouble to Zhang Yuhe.

It actually gave him a lot of insights.

Just when Zhang Yuhe was still silently comprehending.

Several streams of light quickly passed by from a distance.

Lian Zhengyu and others flew down on Taiyi Immortal Platform.

Everyone shouted respectfully in unison.

"Congratulations to the sect master for being promoted to Taiyi Immortal Lord."

"Is the lord okay?"

"It's okay. What can happen to me? It's just a matter of time."

Zhang Yuhe responded with a smile.

Everyone looked at Zhang Yuhe carefully for a while, and they all couldn't help but be stunned.

Originally they thought.

The catastrophe just now was so fierce.

Even if Zhang Yuhe successfully survives the catastrophe, he will inevitably be injured.

Everyone was even a little worried, fearing that Zhang Yuhe's injury would be too serious.

It takes a long time to rest and recover.

If there are any injuries that are difficult to recover from, it will be a big trouble.

But now it seems.

Zhang Yuhe's whole person's breath was as deep as the abyss.

His white robe was spotless.

It doesn't look like he was injured at all.

This surprised everyone.

They even had some doubts as to whether they had just seen it wrong.

Maybe the catastrophe just now was not as severe as imagined.

Otherwise.

How could Zhang Yuhe, nothing happened?

Of course.

Everyone knows that it was not an illusion just now.

There are so many of them, it's impossible for them all to get it wrong.

Although they were far away just now.

But one can also clearly feel the terrifying pressure of the Heavenly Tribulation just now.

Especially the last wave of catastrophe, that rusty giant axe.

It simply exceeded the limit of the Great Luo Immortal King.

Section 407

But everyone was very puzzled.

Zhang Yuhe had just broken through to Taiyi Immortal Lord, how could he withstand such a fierce heavenly tribulation.

This is unscientific.

Even if Zhang Yuhe's magical powers were against the sky and he could challenge across levels.

He couldn't withstand such a fierce attack, right?

Yu Liwei looked around and looked up at the light blue light curtain above the Milky Way Island.

Although the heavenly tribulation had ended.

But this Renshui Thunder Absorption Array was not closed.

Anyway, this array was driven by the water source power in the sea.

It did not need to consume other energy and materials.

So Zhang Yuhe was not in a hurry to close this tribulation array.

Yu Liwei looked at the array in front of her, thinking in her heart.

She knew.

Zhang Yuhe was able to survive the heavenly tribulation, and this array must have played a key role.

Otherwise.

Facing such a fierce heavenly tribulation just now.

Even if Zhang Yuhe's strength was against the sky, he could not withstand it.

That was an attack close to that of the Taoist ancestor.

With the state of Zhang Yuhe's breakthrough just now, it is impossible to withstand it.

No matter how strong Zhang Yuhe is.

It is impossible to sweep the Daluo Immortal King.

This is completely impossible.

Looking at the light blue light curtain in the sky.

Yu Liwei was extremely excited.

The power of this great tribulation formation may be as Zhang Yuhe said before.

It can weaken the power of Taiyi Heavenly Tribulation very well.

If this is true.

Then she doesn't have to worry about the tribulation anymore.

As long as she finds a way to break through the bottleneck of Taiyi Immortal, she can break through smoothly.

Yu Liwei took a deep breath and slowly calmed down her excitement.

Then she asked Zhang Yuhe respectfully.

"Master, what is the actual effect of this great tribulation formation? How much power can it weaken the Taiyi Heavenly Tribulation?"

Hearing Yu Liwei ask this.

Everyone listened attentively.

They are also very concerned about the actual effect of the Renshui Thunder Absorption Array.

After all, this is related to whether they can successfully break through to Taiyi Immortal Lord in the future.

Zhang Yuhe pinched the magic formula.

The blue light curtain covering the sky above the Milky Way Island began to slowly converge.

After a while.

He smiled and said.

"According to my experience of the tribulation, the Renshui Thunder Absorption Array can at least weaken the power of the heavenly tribulation by more than 60%."

"Of course, because the power of the heavenly tribulation received by each person may be somewhat different, the weakening ratio of the formation to the heavenly tribulation will also be different."

"But according to my estimation, this Renshui Thunder Absorption Array can at least weaken the power of the Taiyi Heavenly Tribulation by half."

Hearing Zhang Yuhe's words, everyone was completely stunned.

Zhang Yuhe can weaken the power of the heavenly tribulation by more than 60% with just one formation.

No wonder the heavenly tribulation was so fierce just now, but Zhang Yuhe was not hurt at all.

The power of the heavenly tribulation has been weakened by more than half.

With Zhang Yuhe's strength.

The remaining heavenly tribulation is indeed difficult to hurt him.

Thinking of this, everyone was extremely excited.

If this is true.

Then they will never have to worry about the tribulation in the future?

After the heavenly tribulation was weakened by half.

They only needed to make some more preparations, and they would definitely be able to survive.

After all, they were just normal Golden Immortal cultivators, not as powerful as Zhang Yuhe.

The power of the heavenly tribulation would basically be in a normal state.

And everyone believed that what Zhang Yuhe said was true.

After all, the heavenly tribulation just now was so fierce.

If there was no Renshui Thunder Absorption Array.

It was hard for them to imagine how Zhang Yuhe would survive.

Looking at the great tribulation array in front of them,

and then feeling the deep and deep breath emanating from Zhang Yuhe.

Everyone was extremely excited.

Zhang Yuhe successfully broke through to Taiyi Immortal Lord and created a record in the Ji'an Sea.

From then on.

Daosheng Sect was also a major force with Taiyi Immortal Lord in charge.

And with this Renshui Thunder Absorption Array.

I believe that in the near future.

Daosheng Sect will definitely have more Taiyi Immortal Lords.

They have hope themselves.

Especially Yu Liwei.

She has already reached the perfection of Golden Immortal.

As long as it settles down for a while, and then with the help of some spiritual objects and immortal pills that can assist in breakthrough.

There should be a great chance to break through to Taiyi Immortal Lord.

Once there are several Taiyi Immortal Lords in charge.

Then their Daosheng Sect, wouldn't it be one of the top forces in the South China Sea Immortal Domain?

In addition to the three super powers.

There is no need to look at anyone's face.

Thinking of this.

Everyone seemed to see the future.

Saw the day when Daosheng Sect was at its peak.

...

Chapter 330 Opening the furnace to refine immortal pills

After the catastrophe, the vicinity of Galaxy Island returned to peace.

Daosheng Sect removed the surrounding blockade.

The disciples who were originally responsible for vigilance on the periphery also returned to the sect one by one.

Of course.

Although most of the disciples responsible for vigilance withdrew to the sect.

But as the important place of Daosheng Sect, Galaxy Island is naturally guarded by someone.

Before leaving.

Zhang Yuhe arranged two Golden Immortal elders, each with a team of True Immortal disciples.

Stay on Yinhe Island and take charge of guarding the island's great formation for crossing the calamity and the Taiyi Immortal Platform.

As for the other personnel, they will return to their respective sects.

...

Daosheng Peak, Yinhe Hall.

Zhang Yuhe sat at the top.

The chief and deputy chiefs of each hall sat on both sides of the lower hall.

At this time, everyone's faces were filled with excited smiles.

Although two or three days had passed since Zhang Yuhe survived the heavenly tribulation.

Section 408

But everyone still couldn't hide their excitement.

After a while.

Lian Zhengyu asked Zhang Yuhe respectfully.

"Sect Master, I don't know when you plan to set the Immortal Lord Ceremony on a specific day. We can also arrange for disciples to distribute invitations to other forces."

It is definitely a big event for the monk to successfully break through to Taiyi Immortal Lord.

In the South China Sea Immortal Domain, even the three superpowers.

It is not that easy to give birth to a Taiyi Immortal Lord.

As for other forces, it is even more difficult.

Regardless of the Nangong Immortal Clan, they have been established for hundreds of millions of years.

Their entire immortal clan is just three Taiyi Immortal Lords.

It can be seen from this.

How difficult is it for a monk to be promoted to Taiyi Immortal Lord?

At least that's the case in the South China Sea Fairyland.

We lack spiritual elixirs to assist in breakthroughs, and no means to assist in overcoming tribulations.

You can say that.

Every Taiyi Immortal Lord relies on his own profound accumulation.

With a little bit of luck, you can achieve a successful breakthrough.

Lian Zhengyu thought.

Now Zhang Yuhe has successfully broken through and become Taiyi Immortal Lord.

Why don't you celebrate it too much?

At the same time, it was also a call to the world, announcing the strong rise of Dao Sheng Sect.

Faced with Lian Zhengyu's suggestion, Zhang Yuhe responded with a smile.

"We can skip the celebration and just inform the Nangong Immortal Clan and Wanxian Sect."

"We develop in a low-key manner and don't need to deliberately publicize it."

"Sect Master, why?"

Everyone was very puzzled when they heard Zhang Yuhe's words.

Now that they are powerful, shouldn't this be shown?

Otherwise, others would still be the Holy Sect and they would be a small force in the past.

Isn't this not good?

Everyone is very puzzled. Why does Zhang Yuhe keep such a low profile?

It's totally unnecessary.

With Zhang Yuhe's current strength.

In this fairyland of the South China Sea, is there anything else to worry about?

In addition to the three superpowers.

No one can overpower the Holy Sect.

In fact, Zhang Yuhe was helpless.

He wanted to take the opportunity to make the Dao Sheng Sect famous and occupy a place in the South China Sea Immortal Domain.

It's just that Long Aotian of the Divine Beast Sect is still suppressed by him in the Taixu Secret Realm.

Although he did it very cleanly, the Divine Beast Sect has not yet suspected him.

It is precisely because of this.

He just needs to be more low-key.

Don't be too conspicuous.

Otherwise.

In case the Divine Beast Sect focuses on him, they suspect that he killed Long Aotian.

Wouldn't that be a big problem?

Although with his current strength, ordinary Da Luo Immortal King really does not need to be afraid.

Even if you can't beat him, you can definitely run away.

But the Divine Beast Sect does not only have one Great Luo Immortal King.

As far as he knows.

There are five Da Luo Immortal Kings in the Divine Beast Sect, plus one Da Luo Realm Protector Divine Beast.

Among them, Long Yuanguang, the leader of the Divine Beast Sect, is also the top Daluo Immortal King.

Zhang Yuhe was not sure that he could escape from Long Yuanguang's hands.

So Zhang Yuhe thinks.

It would be better for him to keep a low profile.

Don't be too showy.

It's best to let others ignore his existence.

As for whether to take advantage of the opportunity to make the Dao Sheng Sect famous.

Zhang Yuhe thinks.

There's no need to worry about this at all.

Where have we just arrived?

Wait for a while before talking.

When the strength is strong enough, the so-called fame will naturally come.

Of course.

It is still necessary to inform the Ten Thousand Immortals Sect and the Nangong Immortal Clan.

The Dao Sheng Sect was originally a subordinate force of the Nangong Immortal Clan.

If something happens, you have to obey the call of the Nangong Immortal Clan.

Now that he has broken through and become Taiyi Immortal Lord, he can naturally be on an equal footing with the Nangong Immortal Clan.

The purpose of informing the Nangong Immortal Clan is to tell them.

We all have an equal relationship now, so don't issue recruitment orders to the Ji'an sea area anymore.

Let us know in advance to avoid embarrassment for everyone.

for such results.

Zhang Yuhe believes that the Nangong Immortal Clan will also happily accept it.

In fact.

The Nangong Immortal Clan has always been pretty good to its subordinate forces.

There was no suppression.

When Lu Yunfei was here before.

The Nangong Immortal Clan has a lot of support for Dao Sheng Sect.

The Dao Sheng Sect is no longer a subordinate force of the Nangong Immortal Clan, but the friendship between the two parties can still continue.

As for reporting to Wanxian Sect, that is even more necessary.

Of the three superpowers in the Nangong Immortal Domain, Dao Sheng Sect must rely on one of them.

There is no need to count on the Divine Beast Sect.

The Divine Beast Sect and them will always be enemies and cannot be friends.

As for Chaotian Palace, Zhang Yuhe has no friendship with them.

the most important is.

Ji'an sea area was originally the sphere of influence of Wanxian Sect.

It makes no sense for them to abandon the Ten Thousand Immortals Sect and switch to another force.

After relying on the Ten Thousand Immortals Sect.

From now on, the Dao Sheng Sect wants to develop in the Chaos Continent.

There is also a strong backing.

With the current strength of the Dao Sheng Sect, it is indeed time to start building a fairy city in the Chaos Continent.

Let's wait for now.

Let's wait until the next beast wave breaks out.

Zhang Yuhe thought silently in his heart.

Anyway, it shouldn't be long before the next beast wave breaks out.

Then take advantage of the end of the beast tide to launch a counterattack.

Then choose a suitable place to build a fairy city belonging to the Daosheng Sect.

Although everyone wanted to take advantage of Zhang Yuhe's breakthrough to hold a grand celebration.

To show the strength of Daosheng Sect.

But Zhang Yuhe didn't have this idea, so they didn't insist.

Everyone continued to chat for a while and then left the Galaxy Exhibition.

Section 409

Zhang Yuhe stood up and came to the alchemy room next to the main hall.

Now that he has broken through to Taiyi Immortal Lord, he has automatically become a third-level immortal alchemist.

Can refine third-grade elixir.

When I was in Taixu Secret Realm.

Zhang Yuhe obtained a variety of precious elixirs.

Among them, the Nine Apertures Linglong Pill and the Tianyuan Holy Spirit Pill are the most precious.

Jiuqiao Linglong Pill can assist the Golden Immortal monks to break through to Taiyi Immortal Lord.

Tianyuan Holy Spirit Pill can assist monks in cultivating the immortal body to the state of great success.

Both of these elixirs are extremely precious and cannot be bought.

Not only are these two elixirs extremely difficult to refine, but also the elixir recipes are difficult to find.

Except for those super powers, other powers rarely have similar prescriptions.

the most important is.

The materials for refining these elixirs are also extremely precious.

The core material for refining the Nine Apertures Exquisite Elixir is the Nine Apertures Exquisite Grass.

The core material for refining Tianyuan Holy Spirit Elixir is Tianyuan Holy Spirit Immortal Grass.

These two kinds of grass jelly not only have extremely harsh growing conditions, but may also require extremely long growth years.

It takes hundreds of millions of years for the medicine to be used as medicine to make elixirs.

This kind of thing is almost nowhere to be found in the outside world.

Only those big forces will have artificial cultivation.

But you can imagine how precious the fairy grass that has been cultivated for hundreds of millions of years is.

Fortunately, Zhang Yuhe was in the Taixu secret realm.

Not only did they find the elixir recipe, but they also found the core materials for refining these two elixirs.

There are two or three furnaces each of Jiuqiao Linglong Immortal Grass and Tianyuan Holy Spirit Grass.

It's just that he couldn't refine it before due to insufficient cultivation.

No problem now.

You can open the furnace to refine these two precious elixirs.

...

Chapter 331 Refining the Sky Palm Bottle

Zhang Yuhe came to the alchemy room.

He waved his right hand, and a three-legged alchemy cauldron slowly emerged.

He took out the materials for refining the Nine Apertures Exquisite elixir from the storage bracelet and placed them one by one in front of him.

To refine the Nine Orifices Exquisite Immortal Pill, in addition to the core Nine Exquisite Immortal Grass.

A large amount of auxiliary materials are also required.

However, these auxiliary materials are relatively easy to find.

He has already collected them neatly.

After confirming that the materials are correct.

Zhang Yuhe pinched the magic formula.

A scorching flame ignited beneath the alchemy cauldron.

Zhang Yuhe rolled up his sleeves and robe, and the lid of the cauldron slowly flew up.

...

A few days later.

Zhang Yuhe walked out of the alchemy room with a smile on his face.

The alchemy process was successful.

Three furnaces of Nine Apertures Exquisite Elixir and two furnaces of Tianyuan Holy Spirit Pill were successfully refined.

Thanks to his incredible understanding in various immortal cultivation techniques.

He never failed.

Whether it's elixir refining or weapon refining, you can succeed in one go.

Even though this was his first time refining a third-grade elixir, he still succeeded in refining them all.

If other people knew about such a heaven-defying achievement.

Your jaw will definitely drop.

But for Zhang Yuhe, this is just a routine operation.

The only pity is that the elixir formation rate is too low.

Only one elixir can be produced in each furnace.

There is nothing we can do about this.

This is how refining the elixir works.

Whether it is a simple first-grade elixir or a difficult-to-refining third-grade elixir.

Every time you refine it, you can only make one elixir in the end.

This seems to be bound by some supreme rule.

No matter how superb Zhang Yuhe's skills are, he cannot break this iron law.

Return to the Galaxy Hall.

Zhang Yuhe took out the Immortal Mirror.

Then play a magic formula.

After a while.

Yu Liwei walked into the hall and shouted respectfully.

"metropolitan."

Zhang Yuhe didn't talk nonsense either.

He took out an exquisite jade bottle and handed it over.

Then he spoke.

"Here is a nine-aperture exquisite elixir that can assist the Golden Immortal monks in breaking through the Taiyi Immortal bottleneck. I hope it will be helpful to you."

Hearing Zhang Yuhe's words, Yu Liwei was extremely excited.

She had heard of the Nine Orifices Exquisite Elixir.

This is one of the best elixirs to assist Golden Immortal monks and break through the bottleneck of Taiyi Immortal.

In the fairy world.

There are indeed many spiritual objects and elixirs that can assist Golden Immortal monks and break through the bottleneck of Taiyi Immortal.

But each one is extremely precious.

To encounter one requires extreme luck.

As for buying it, it's almost impossible.

There is no place to buy this kind of thing.

At least in the South China Sea Fairyland.

There are no records of public transactions for such items.

She has been collecting for so long and has never found even one.

Yu Liwei didn't expect it at all.

Zhang Yuhe actually has such a thing in his hand.

And it was so easy to leave it to her.

Yu Li took a deep breath.

She reached out and took the jade bottle, then shouted respectfully.

"Thank you, Master, for cultivating me."

"Master Yu, there's no need to be polite."

Zhang Yuhe waved and responded lightly.

Things like the Nine Orifices Exquisite Elixir were originally prepared for Dao Sheng Sect and other monks.

He himself has no use for it.

Don't say that he has already broken through to Taiyi Immortal Lord now.

There is absolutely no need for such a thing.

Even when he didn't break through.

These elixirs that help break through bottlenecks are of no use to him.

Anyway, he has never felt the existence of a bottleneck in his practice so far.

Zhang Yuhe also hopes that Daosheng Sect can have a few more Taiyi Immortal Lords.

This way, he can relax a little.

For now.

Section 410

Only Yu Liwei in Daosheng Sect is qualified to attack Taiyi Immortal Lord.

As for the others, they have not even reached the Golden Immortal Consummation.

Even if he takes out the Nine Apertures Exquisite Pill, it will be in vain.

This thing is just right for Yu Liwei.

I hope she can take the opportunity to break through and succeed,

Zhang Yuhe took out a jade slip and flicked it with his fingers.

The jade slip slowly flew towards Yu Liwei.

"This is my cultivation experience of breaking through Taiyi Immortal. I hope it will be helpful to you."

Yu Liwei took the jade slip and said respectfully.

"Thank you, Master."

"Okay, you go back first."

"When you realize the opportunity for a breakthrough, remember to say it in advance."

"When the time comes, I will go over and protect you."

"Yes, Sect Master."

Yu Li bowed slightly and saluted, then slowly walked out of the Galaxy Hall.

Standing outside the main hall.

She held the jade bottle tightly in her palms and murmured to herself.

"I hope I can successfully break through to the Taiyi realm, and I will not let the sect master down."

Yu Liwei cheered herself up silently, then turned into a stream of light and left.

After Yu Liwei left.

Zhang Yuhe got up and went to the weapon refining hall next to him.

After breaking through to Taiyi Immortal Lord, he was not in a hurry to practice.

He planned to refine the Heaven Palm Bottle first and then talk about it.

When I was in Taixu Secret Realm.

In the cave of Taixu Immortal King, he found the refining blueprints for the Earth-level Immortal Ship and the Palm Heaven Bottle.

Refining the earth-level fairy ship is a bit troublesome.

Such things as fairy ships, in a strict sense.

It is not a simple fairy weapon.

Rather, it is a combination of various immortal weapons.

Zhang Yuhe looked at the drawings carefully.

I want to completely assemble the earth-level fairy ship.

Thousands of components need to be refined first.

And these components vary.

He can't be like he was when he was refining the thunder-absorbing pillar.

Turn on thousands of cauldrons and refine them at the same time.

Can only come one piece at a time.

This is a bit time consuming.

Zhang Yuhe planned to put aside the Earth-level Immortal Ship for the time being.

Let's refine the Palm Heaven Bottle first.

The Heaven Palm Vase serves as a time artifact.

It can condense Nine Heavens Immortal Dew.

This kind of fairy dew will be of great help in growing fairy grass and fairy fruits.

Naturally, he had to come up with something like this that had incredible effects.

Zhang Yuhe came to the weapon refining hall.

I saw a four-legged square tripod floating quietly on the high platform in the center of the hall.

This is a refining cauldron at the level of a middle-grade immortal weapon.

However, it should be enough for refining the Palm Heaven Bottle.

Zhang Yuhe took out each jade box and gently placed it in front of him.

There are a total of thousands of materials needed to refine the Heaven Palm Bottle.

In addition to the core materials, other materials are also extremely precious.

However, these materials are basically available and can be purchased at shops everywhere.

Before that.

Zhang Yuhe asked the Economic and Trade Hall to collect the materials in advance.

Finally he took out an exquisite jade box.

As the jade box opens.

The surrounding time and space seemed to be frozen for an instant.

What is contained in the jade box is the Immortal Crystal of Time that Li Qingyang brought with him when he ascended.

This special immortal material, when it is not sealed.

It will naturally disturb the surrounding space and time.

Really overbearing.

This is just a piece of material.

hard to imagine.

If this material is refined into an immortal weapon.

What kind of power would it have.

It's no wonder that the Heaven Palm Vase can have such a magical effect.

It's just the core material for refining the Heaven Palm Bottle, so overbearing.

Will the Sky Palm Vase refined from the Immortal Crystal of Time still be bad?

Zhang Yuhe pinched the magic formula in his hand.

The scorching flames ignited rapidly beneath the cauldron.

He waved his right hand and the cauldron lid flew up.

Put the materials in front of you into the cauldron one by one.

Zhang Yuhe closed the lid of the tripod.

Then he slowly sat down cross-legged.

The Palm Sky Vase is a top-grade immortal artifact.

It is not easy to refine a high-grade immortal weapon.

Not only is the refining process extremely complicated, but mistakes can occur if you're not careful.

Moreover, it will take a long time to refine high-grade immortal weapons.

At Zhang Yuhe's refining speed.

It only takes about a year to refine a middle-grade immortal weapon.

But I want to refine a high-grade immortal weapon.

I'm afraid it will take more than ten years.

This is because he has a unique advantage in skills.

If it were another monk.

It may take hundreds of years. It may not be possible to complete the entire refining process.

As for whether the refining can be successful, it depends on the individual's skill level and luck.

Zhang Yuhe is not worried about the failure of the weapon refining.

He just felt it.

Refining high-grade immortal weapons is really time-consuming.

take it easy.

Anyway, he has now broken through to Taiyi Immortal Lord.

Has unlimited lifespan.

Time for him.

It seems to be the least valuable thing.

...

Chapter 332 Li Tian visits the Nangong Immortal Clan

Zhang Yuhe sat cross-legged in the weapon refining hall, silently observing the changes in the cauldron.

When he was refining immortal weapons in the past, he was always relaxed and freehand.

Never worry about failure.

But this time it's different.
