

## Top talent 48

### Section 48

"Hmph."

The Horned Demon urged the magic energy to form layers of defense shields, and then continued to focus on the array in his hand.

It was just a simple magic shield, and it didn't have much defensive effect.

Or, it was because the two arrays controlled by Zhang Yuhe had too strong attack power and too fast attack frequency.

The defense shield that had just been formed was instantly dissipated everywhere.

The Horned Demon lay flat.

Facing the attacks of the two people, regardless of anything, the bloodstains on his body became more and more, and they became deeper and deeper.

However, these injuries were not fatal for the time being.

"Big Brother, do you have any big killer moves?"

Zhang Yuhe turned around and asked Li Tian beside him.

The two of them couldn't do it like this, if they couldn't seriously injure the Horned Demon.

When the Horned Demon freed his hands, wouldn't he have to hammer them on the ground?

Li Tian shook his head and said.

"Of course I have a killer move, but this Horned Demon is too strong. He is not an ordinary Refining Void Realm, at least in the middle stage of Refining Void Realm. I guess I can't do anything to him."

"Why bother so much? If you have a killer move, use it first."

Zhang Yuhe was a little speechless. Why was he still hiding it at this time?

No matter whether he can kill the Horned Demon or not, he should use all the killer moves he can use.

Is he saving it for the New Year?

"Okay."

Li Tian didn't waste any words. He took out a piece of talisman paper with a small knife shining on it.

This is a seventh-level talisman paper.

Li Tian waved the talisman paper in his hand, and the talisman paper turned into a huge long knife shadow, which flashed with dazzling light.

The long knife shadow crossed the sky, as if it was going to split the sky in half.

The knife light instantly appeared on the altar.

The Horned Demon saw the knife light coming, and he didn't dare to be careless at all.

He waved his fist and punched the long knife shadow.

Boom...

The fist shadow and the knife light collided, bursting out a dazzling light.

When the light dispersed, the right arm of the horned demon disappeared.

"Haha, he was finally seriously injured."

Seeing that the horned demon had lost his right arm, Zhang Yuhe couldn't help but be overjoyed.

Li Tian was still powerful, and he actually carried a seventh-level talisman paper with him.

This thing is extremely precious.

As far as he knows, there are only a few talisman makers above the seventh level in the entire Daosheng Sect.

Due to the limitation of cultivation, he can't draw the seventh-level talisman paper.

Zhang Yuhe's various skills are currently at the sixth level.

It is necessary to wait until the cultivation level breaks through before the skills can be improved accordingly.

The talisman paper that Li Tian took out is very unusual, not an ordinary seventh-level attack talisman paper.

The knife light transformed by the talisman paper seriously injured the powerful horned demon with one blow.

Seeing that the horned demon was seriously injured, Zhang Yuhe controlled the sword energy and lightning and stepped up his attack on the horned demon.

Not only that, he also slowly narrowed the range of the Nine Heavens Chaos Sword Formation.

Previously, the sword formation was arranged around the city in order to break the defensive formation of Jingkong City.

Now the defensive formation of the city is gone.

Not only that, the cultivators of the He and Li families in the city have long been killed.

Even the buildings in the city, except for the altar in the center of the city, were razed to the ground by the aftermath of the battle between the two sides.

In the entire Jingkong City, except for the two of them, there was only one living creature left, the Horned Demon.

He naturally had to compress the sword formation.

The smaller the range of the Nine Heavens Hunyuan Sword Formation, the denser the invisible sword energy that can be stimulated.

And the greater the power.

"Ahhh..."

The dense invisible sword energy swept madly on the Horned Demon, and the effect of the strong scraping was significantly improved.

The Horned Demon, who lost his right arm, let out a wild roar, and his body was covered with a large number of deep wounds that could be seen to the bone.

Zhang Yuhe believed that if this dead target still did not move, he could kill it immediately.

Suddenly, there were bursts of roars in the sky, and teams of demons emerged from the vortex.

Seeing this, Zhang Yuhe was shocked.

"Finally here."

But what he was worried about was not these newly appeared demons.

He glanced at these demons and found that most of them were only at the foundation building stage. There were not many demons in the Jindan stage, and there were a few demons in the Yuanying stage.

As for the demons above the Yuanying stage, there was none.

Li Tian's information was very accurate.

The passage opened by the Tiangang Breaking Realm Array could only allow demons below the Yuanying stage to pass through.

Facing these demons, he didn't even need to attack them deliberately. With the residual power of the formation, he could sweep down a large area.

To be honest, these demons were purely here to give themselves up.

I don't know why the demons like it so much and rush to Yufantian.

Isn't it better to stay in the demon world honestly?

The newly appeared demons are not scary.

But as the passage was completely stable, the horned demon on the altar finally freed up his hands.

His cold eyes swept over the two people, and then he pounced directly, shouting loudly at the same time.

"Bug, go to hell."

...

## Chapter 49 Demon Destroyer

Seeing the Horned Demon rushing over.

Li Tian and Zhang Yuhe both knew that it was the most critical moment.

But neither of them had the idea of retreating.

Zhang Yuhe continued to draw the thunder and lightning to attack.

At the same time, he controlled the Nine Heavens Hunyuan Sword Formation to narrow the range, so that the invisible sword energy would be denser and more lethal.

The Horned Demon rushed forward quickly, and the dense invisible sword energy kept cutting his body.

But he still didn't care, as if he would not stop until he killed Zhang Yuhe and the other two.

Suddenly, Li Tian stood up and swung his fist at the charging Horned Demon.

Facing the Horned Demon in the Refining Void Realm, even though he was seriously injured, Li Tian showed no fear.

Because he knew that the Horned Demon looked ferocious, but in fact it was already at the end of its strength.

The Horned Demon not only lost one right arm, but also had countless blood marks cut by the invisible sword energy.

Some of these blood marks were deep enough to see the bones.

Thunder and lightning struck the Horned Demon, and there were even bursts of meat fragrance wafting out.

Even if the Horned Demon's body was strong, it would definitely not last long in the face of such a serious injury.

As long as he could hold the Horned Demon back for even a little longer.

Then the two formations controlled by Zhang Yuhe would have a chance to beat the Horned Demon into ashes.

Boom...

The two huge fist shadows collided quickly, and instantly emitted a scorching light.

The aftermath of the collision between the two even spread outside Jingkong City.

The demons who had just come from the passage near the altar were instantly crushed into ashes by the aftermath.

Li Tian vomited blood again and flew backwards, while the Horned Demon stood still.

In the fierce collision just now, it was obvious that the Horned Demon had the upper hand.

Even if he was seriously injured, he was in the Void Refining Realm after all, and Li Tian could not take any advantage in his hands.

However, Li Tian's attack was still very effective.

Because the Horned Demon's momentum had been interrupted by him.

Zhang Yuhe took the opportunity to take out a talisman paper, pinched the talisman paper with two fingers and waved it at the Horned Demon.

"Go."

The talisman paper instantly burned and disappeared.
