Chapter 54 Five Elements Gathering Spirits

The shocking news spread quickly, and the chat channel was almost as lively as when Yu Fantian was first opened.

Countless players were spamming the chat channel.

However, compared to the natives of Yu Fantian, the players were more concerned about when Wang Guofeng suddenly joined the Yunzhong Garrison?

And now he has been appointed as the Inspector of Yunzhong Garrison.

This is the first time that a player has held a position in Yu Fantian's powerful organization.

Even though Wang Guofeng's position as the Inspector is only a temporary position.

But this also makes the players excited enough.

Many people who are close to Wang Guofeng are contacting him to ask him for news.

To see if there are any strategies, but Wang Guofeng just casually dealt with it.

He did not tell the truth.

There are even some players who directly asked Wang Guofeng if they can also join the Yunzhong Garrison.

But they were all rejected by Wang Guofeng one by one.

Wang Guofeng knew that Zhang Yuhe did not like to be disturbed. If he got the players into the Garrison.

If he angered Zhang Yuhe, it would be bad.

As for Zhang Yuhe's identity as a player, Wang Guofeng did not tell anyone about it.

Although Zhang Yuhe did not specifically tell him to keep it secret.

But Wang Guofeng knew it very well in his heart and never told other players about it.

Even if everyone is a player from Blue Star, since they have embarked on the path of cultivating immortals.

They must abide by the rules of the cultivation world and not ask about the affairs of their predecessors.

In Wang Guofeng's heart, Zhang Yuhe is the predecessor of all Blue Star players.

...

Zhang Yuhe did not pay attention to the disturbances in the outside world.

Anyway, the Demon God Cult forces in Yunzhong Mansion have been cleared by him for the time being.

Even if there are still a few remnants, they will not be able to become a climate, and he does not need to worry about them at all.

He believes that Wang Guofeng will be able to handle it with the cultivators of the Qian and Sun families.

"Killing people and setting fires and getting a golden belt, the ancients did not deceive me."

After counting all the harvests, Zhang Yuhe could not help but be happy.

The He and Li families are indeed big families that have been operating for tens of thousands of years.

After Zhang Yuhe counted them, he found that there were as many as 800 million spiritual stones alone.

Most of these spiritual stones came from the reserves of the He and Li families.

As for other items, they were even more numerous.

Zhang Yuhe counted hundreds of such skills and magical powers.

Of course, he didn't care about either the skills or the magical powers.

Among the more than 100 skills and magical powers, the highest grade was only the upper grade of the Xuan level.

This grade of skills, in the Daosheng Sect, is completely common stuff.

Not to mention him, an inner disciple, even the outer disciples of the Daosheng Sect probably wouldn't care about it.

Despite this, Zhang Yuhe didn't despise it.

He planned to build a library in Blue Star in the future, and then these skills and magical powers would come in handy.

With the recovery of spiritual energy, Blue Star has slowly approached the immortal civilization.

Perhaps in a few years, Blue Star will also grow into an immortal world.

Zhang Yuhe thought, what can he do for this?

For example, provide some skills, magical powers, magic weapons and instruments.

Putting away the items on the ground, Zhang Yuhe picked up a jade slip and looked at it slowly.

In his opinion, the biggest gain this time was this jade slip.

The jade slip came from Mingyue Fei's storage ring, which recorded a special formation.

Five Elements Gathering Spirit Formation.

This formation has no other use. The only use is to convert spirit stones into spiritual energy and gather the surrounding spiritual energy to speed up the practice.

It sounds a bit useless.

After all, even if the formation is not used, cultivators can directly use spirit stones to assist in practice.

It's just that spirit stones will contain some impurities. When using spirit stones for practice, you need to discard the impurities first.

This is a bit troublesome.

But using the gathering spirit formation, there is no such trouble at all.

Once the formation is turned on, you only need to place the spirit stones in the formation.

The five-shaped gathering spirit formation will automatically remove impurities, leaving only pure spiritual energy.

In this way, cultivators can absorb it with confidence and speed up their practice.

Zhang Yuhe silently checked the contents of the jade slip.

The five elements spirit gathering array recorded in the jade slip is divided into three levels.

The first level of the five elements gathering array requires a sixth-level array master to set it up.

The second level requires a seventh-level array master, and the third level requires an eighth-level array master to set it up.

According to the description on the jade slip, as long as there are enough spirit stones, the first level of the five elements spirit gathering array can double the speed of cultivation.

As for the third level spirit gathering array, it can even speed up the speed of cultivation five times.

"Good stuff."

Looking at the contents of the jade slip, Zhang Yuhe couldn't help but be happy.

This is what he really needs.

He doesn't need ordinary magic weapons and supernatural powers at all.

He can refine magic weapons himself, and the Taoist sect has better supernatural powers.

Only in terms of improving the speed of cultivation, the Taoist sect can hardly provide him with more help.

Even though the spiritual energy in the sect is very rich, Zhang Yuhe is still a little dissatisfied.

Not to mention, he is not in the sect yet, and the concentration of spiritual energy in the garrison is much lower than that in the sect.

"Try it first."

Zhang Yuhe closed his eyes and silently recalled the contents of the jade slip.

After a while, he completely understood the contents of the jade slip.

A first-level spirit gathering array requires a sixth-level array master to set up, and he happened to be a sixth-level array master.

"Try it first."

Zhang Yuhe took out a huge four-legged tripod, then took out various materials from the ring and threw them into the big tripod.

As the spell was pinched, a scorching flame ignited under the four-legged tripod.

Time passed slowly.

Zhang Yuhe waved his right hand, the lid of the tripod flew up, and a formation plate appeared inside the tripod.

Take out the formation plate.

He pinched the spell again and slowly carved runes on the formation plate.

"Done, now refine the formation flag."

The Five Elements Spirit Gathering Array is a complex formation that requires a formation plate and five formation flags to set up.

After a while, the five formation flags were refined one by one.

Zhang Yuhe placed the formation plate on the training platform, and the five formation plates were arranged around the training platform.

"It should be okay, try it."

Zhang Yuhe placed a large number of spirit stones around the formation plate and the formation flag, and then pinched the spell.

"Start the formation."

As the spell was pinched, the spiritual energy slowly rose from the pile of spiritual stones and then gathered on the training platform.

After a while, the entire training platform became a sea of spiritual energy.

"It feels great."

Feeling the rich spiritual energy around him, Zhang Yuhe couldn't help but groan.

The gathering spirit formation can not only directly transform the spiritual stones into pure spiritual energy.

But it can also gather the surrounding spiritual energy and confine it all to a small area.

Zhang Yuhe tried to operate the Hunyuan Heavenly Scripture, and the surrounding spiritual energy rushed to him instantly.

"At least twice as fast as before."

After a little trial, he confirmed that the effect of the five-element gathering spirit formation was indeed as described in the jade slip.

With the five-element gathering spirit formation.

Zhang Yuhe felt that it would take at most ten years for him to break through to the refining realm.

He was not like other players who would encounter bottlenecks every time they broke through the realm.
