Section 60

At this time, the Red Moon Python became even more crazy. Its huge body kept slapping at the surrounding sword formations.

"Huh, it's just a dying struggle."

Zhang Yuhe quickly activated the magic formula, and a massive amount of invisible sword energy was generated in the sword formation, and then swept towards the Red Moon Python.

Ding ding ding...

The invisible sword energy cut into the huge body of the Red Moon Python, making bursts of jingling sounds.

As a seventh-level monster, the Red Moon Python is extremely powerful physically, and ordinary attacks cannot break through its defense.

However, due to the previous blow from the Great Desolate Prisoner's Finger, the scales on the Red Moon Python seemed to be somewhat weathered.

As the invisible sword energy cut rapidly, a large number of scales began to break and scatter.

The sword energy shattered the weathered scales and cut directly into the flesh of the Red Moon Python.

hiss.....

The Red Moon Python struggled violently in pain, its huge body trying to break through the sword array and escape.

"If you want to escape now, don't you think it's too late?"

Zhang Yuhe didn't want to continue to be entangled, he had to quickly get rid of the Red Moon Python, and then prepare to face the catastrophe and break through the realm of refining the void.

He quickly pressed the magic formula, and more and more invisible sword energy was cut into the Red Moon Python's body intensively.

The red moon python's blood spilled into the sky.

A large amount of blood quickly fell on the lake like a downpour.

The entire lake was dyed red.

Hiss...

As the invisible sword energy cuts rapidly, the neighing sound of the Red Moon Python becomes weaker and weaker.

Suddenly, a sharp invisible sword energy sliced through the Scarlet Moon Python's seven inches.

Cut off its huge head entirely.

With a wave of Zhang Yuhe's right hand, he withdrew the sword formation, and the nine flying swords quickly returned to him.

boom.....

As the sword formation withdrew, the red moon python's huge body crashed onto the lake, causing a huge wave.

After a while, the lake slowly returned to calm.

Two blue treasure chests float quietly on the lake.

Zhang Yuhe waved his hand and grabbed the items in the treasure box.

"good."

A spirit stone, plus a seventh-level spirit-accumulating grass.

The seventh-level spirit-containing grass is extremely precious and is the main medicine for refining the Void Pill.

Normally, if a monk wants to break through a major realm, he needs corresponding elixir assistance.

Of course, Zhang Yuhe himself is an exception.

So far, he's never sensed a bottleneck.

He progressed bravely and diligently all the way, and he did not need the help of elixirs to break through the realm.

But he doesn't need it, other monks do.

Any elixir that can assist in breaking through the realm is of immeasurable value.

The Void Transformation Pill is an indispensable auxiliary pill for the God Transformation monks to break through the Void Refining Realm.

Many monks who have been trapped in the Great Perfection of Divine Transformation for countless years have been unable to obtain a Void Transformation Pill in order to obtain it.

Once such an elixir is released, it will definitely cause quite a stir in Yu Fantian.

"I didn't expect there was an unexpected harvest. Just keep it for now and wait until you can refine the elixir and deal with it later."

Zhang Yuhe put away the Yunling Grass.

This red moon python is quite powerful, it actually produced such a rare elixir.

"I also know if it's because of my luck attribute blessing."

The seventh-level spirit-accumulating grass is very precious, and after it is refined into the Void Transformation Pill, it becomes even more precious.

Although he can't use it himself, he can sell it to others.

Putting away the Spirit-accumulating Grass, Zhang Yuhe swung his right hand and took out a huge bead from the body of the Red Moon Python.

Seventh level demon elixir.

This is also a good thing, so put it away first.

After finishing everything, Zhang Yuhe looked towards the lake with some suspicion.

"There won't be any monsters here, right?"

"Let's try a trick to scare the snake away."

boom.....

Zhang Yuhe faced the lake and punched out one after another. The huge shadow of the fist quickly fell on the lake, causing water pillars to reach the sky.

After a long time, the lake surface returned to calm, and no new monsters came out.

"It should be gone."

After some testing, Zhang Yuhe finally felt relieved.

If there are still monsters in the lake, he should have come out anyway after making such a big noise just now.

Since I haven't seen it yet, it's probably gone.

Zhang Yuhe took a look at the surrounding environment, and then quickly flew to a small island in the center of the lake.

"Let's survive the tribulation here."

...

Chapter 60 Refining the Void

Zhang Yuhe quickly glanced at the small island in the center of the lake and nodded with satisfaction.

"That's it."

He waved his right hand, and the sword energy quickly passed over the island, clearing away the trees and weeds.

Soon, Zhang Yuhe cleared a large open space in the center of the island.

In the middle of the open space, there is a raised platform cut by sword energy.

Zhang Yuhe flew down on the platform, then waved his right hand, and tall pillars flew quickly around the island.

Renshui thunder absorbing array.

This is a formation he found in the library.

This formation has no other use. It can only weaken the power of the heavenly tribulation to a certain extent when the monks are overcoming the tribulation.

Its principle is somewhat similar to Blue Star's lightning rod.

Of course, the actual operating rules of the formation are definitely different from those of the lightning rod.

These pillars are called thunder-absorbing pillars, and there are twenty-eight lightning-absorbing pillars in total, standing in constellation positions on the periphery of the island.

The thunder-absorbing pillar is also a special kind of spiritual treasure that reaches the sky, if it is taken out and used alone.

It is not much less powerful than the normal Tongtian Lingbao.

This is Zhang Yuhe, who has a superb level of weapon refining, and after wiping out the He and Li families.

A large amount of materials have been collected, otherwise, it would be really difficult to gather the materials for these pillars.

For ordinary spiritual cultivators, just these twenty-eight pillars.

They probably can't get it done even if they work hard for a lifetime.

Cultivating immortals requires not only talent, but also mastering a good craft is very important.

Of course, if you can master a few more crafts, it will definitely be better.

Just like Zhang Yuhe, whether it is refining pills and refining tools, or drawing talismans and carving arrays, you can do it yourself.

No need to ask for help for everything.

After the twenty-eight lightning-absorbing pillars were arranged in place, Zhang Yuhe quickly carved the array pattern around the island.

After a while, these lightning-absorbing pillars were connected by the array pattern.

Zhang Yuhe pinched the magic formula.

"Start the array."

A light blue light rose from the lightning-absorbing pillars and swept towards the lake in the distance.

The entire lake was soon covered by a light blue light.

"Done."

Seeing that the lightning-absorbing array was successfully arranged, Zhang Yuhe breathed a sigh of relief.

Compared to the ordinary sixth-level formation, the lightning absorption formation is indeed a bit complicated.

Whether it is the twenty-eight lightning absorption pillars or the array patterns carved on the spot.

It is not something that ordinary gods can handle.

The lightning absorption formation has been activated.

Zhang Yuhe came to the platform in the middle of the island and slowly sat cross-legged.

He waved his right hand, and five formation flags fell around the platform.

Then he took out a black formation plate and placed it not far in front of him.
