Section 63

There are still five catastrophes left, as long as they can withstand five more waves of thunder attacks.

Only then can he survive the heavenly tribulation, and then he can be regarded as a true void-refining monk.

However, Zhang Yuhe had a hunch that the five thunderbolts behind him might not be able to withstand the low-grade Tongtian Lingbao alone.

"Now let's see how strong the Nine Heavens Hunyuan Sword Formation's defense is, and whether it can block the remaining five heavenly tribulations."

Zhang Yuhe quickly used the magic formula.

The nine flying swords rotated rapidly, and soon formed tight sword energy light curtains around him.

boom.....

The fifty-eighth catastrophe fell.

The thick thunder quickly passed through the dark sky and crashed down towards the center of the island.

The thunder passed through a layer of light blue light curtain, and then struck hard on the sword formation.

The Nine Heavens Hunyuan Sword Formation lit up with a burst of dazzling light, and the light curtain moved slightly, then quickly returned to its original state.

Seeing this situation, Zhang Yuhe couldn't help but feel happy.

"very good."

Although the sword array faced the attack of the calamity, it was a little difficult.

But it can still be held firmly.

Immediately afterwards, another thunder struck down...

There were four thunderbolts in a row, one as tight as the other, and each one more powerful than the last.

However, the Nine Heavens Hunyuan Sword Formation is indeed a magical power that comes with the Immortal Grade Technique.

The defensive capabilities are indeed extremely powerful.

After steadily withstanding four thunder attacks, the sword array was still intact.

"There is only one last catastrophe left."

Zhang Yuhe looked up at the sky, muttering to himself, waiting for the final disaster to come.

The Thunder were in a row before.

However, this last catastrophe did not fall for a long time.

Zhang Yuhe looked at the huge vortex in the sky and couldn't help but feel scared.

Damn it, are you planning some big move?

Suddenly, there was a loud noise, and the sky turned into a dazzling white.

"Hold the grass..."

Seeing such a situation, Zhang Yuhe was completely shocked.

I saw the dark clouds receding in the sky and the vortex disappearing.

It was replaced by endless thunder.

Thunder filled the entire sky, shining with nine colors of light.

"Nima, is this the nine-color divine thunder?"

Seeing the thunder shining with nine colors of light, Zhang Yuhe was completely panicked.

Only when the combined monk is promoted to Mahayana, the nine-color divine thunder will appear in the catastrophe caused.

He had just been promoted to the Void Refining Realm, so how could the Nine Color Divine Thunder appear?

Zhang Yuhe couldn't understand it very much.

No matter how talented he is, he shouldn't have such outrageous things happen, right?

However, the disaster didn't give him much time to think.

The thunder in the sky quickly gathered, forming a super-large nine-color divine thunder.

The divine thunder passed by, and the void seemed to be torn apart, with terrifying black gaps appearing.

"Whether you live or die, it all depends on this wave."

Zhang Yuhe quickly ran the Hunyuan Scripture, and the mana was poured into the nine flying swords like it was free of charge.

The invisible sword energy aroused by the sword formation rotated rapidly, forming dazzling light curtains.

There were layers of light curtains, tightly wrapping him in them.

boom.....

The nine-color divine thunder tore through the void, bringing with it an endless aura of destruction.

Passing through the Renshui Thunder Absorbing Formation, it instantly struck the light curtain of the Sword Formation.

Click...

The light curtain of the sword array shook violently, and layers of invisible sword energy were split open and melted by the thunder.

Zhang Yuhe didn't dare to look up and observe at all.

He was just running his skills crazily, injecting the magic power in his Dantian into Feijian like crazy.

The light curtain composed of invisible sword energy was constantly being split and dissolved by the nine-color divine thunder, but then quickly recovered.

After a long time, the disaster finally dissipated and the sky returned to clarity.

"It's so scary."

Looking at the clear sky outside, Zhang Yuhe breathed a long sigh of relief.

He stretched out his hand and grabbed a flying sword in his hand to examine.

I saw that the surface of the flying sword was already covered with fine cracks.

"Fortunately, I almost lost my magic weapon."

Although the flying sword is full of cracks, the natal magic weapon only needs to be cultivated in the Dantian, and it will slowly recover.

As long as it's not chopped up and scrapped on the spot, that's fine.

The nine-color divine thunder at the end was really scary.

It's hard to imagine that he just broke through the void refining process. How could such a powerful catastrophe occur in this environment?

This is absolutely no way for people to survive.

Fortunately, the Nine Heavens Hunyuan Sword Formation is powerful.

Without this sword formation, no matter how many low-grade spiritual treasures he prepares.

It is also impossible to block the bombardment of the nine-color divine thunder.

Zhang Yuhe was suspended in mid-air and looked around.

The small island he had previously stood on had been struck by the Nine-Color Divine Thunder and disappeared.

Not only that.

Even the lake beneath him expanded two or three times in size due to the bombardment of the nine-color divine thunder.

Countless tall peaks in the distance have long been razed to the ground by the catastrophe.

Looking at the scene around him, Zhang Yuhe couldn't help but feel a little scared.

Even though he tried his best to prepare, he never thought that he would encounter such a powerful disaster.

Carefully recall the previous experiences of overcoming tribulations.

Zhang Yuhe felt that apart from the Nine Heavens Hunyuan Sword Formation, the one that played the greatest role was the Menren Water Thunder Absorbing Formation.

If it weren't for the Renshui Thunder Absorbing Formation, the power of the Nine Color Divine Thunder would have been weakened.

It is very likely that he will not be able to withstand the bombardment of the nine-color divine thunder.

It's a pity that the twenty-eight lightning-absorbing pillars have long since disappeared without a trace after being bombarded by the nine-color divine thunder.

"It seems that the next time we go through the tribulation, we must be more prepared."

Zhang Yuhe was silently alert.

This time he was lucky, the Nine Heavens Hunyuan Sword Formation was powerful enough.

Otherwise, I'm afraid it would have been chopped into ashes by the catastrophe.

"Go back first."

Although there were some twists and turns in the process, he finally successfully broke through to the Void Refining Realm.

Zhang Yuhe used the Tianhuang Flying Immortal Technique with all his strength and quickly flew towards Yunzhong Mansion.

Although the process of overcoming the tribulation before was dangerous.

But he was not injured at all, and his dantian was still full of mana.

So there is no need to adjust your breath and rest.

The power of the Hunyuan Scripture was most vividly demonstrated during this tribulation process.

Even if he kept activating the Tongtian Lingbao, Zhang Yuhe never felt like his mana was exhausted.

Even after overcoming the tribulation, there is still plenty of mana in the Dantian.

You know, the reason why many monks failed to overcome the tribulation.

It's not because they didn't prepare enough defense methods.

But because the mana is exhausted.

No matter how many defensive measures are prepared.

If there is not enough mana to stimulate it, it will be in vain.

Relying on temporary drug use to replenish mana cannot replenish much.

In fact, in order to prevent the situation of insufficient mana.

Zhang Yuhe also specially prepared some pills to supplement his magic power.
