Section 64

Little did he know that these pills were not used at all.

The Hunyuan Scripture gave him a Dantian as big as the ocean, which could continuously provide abundant mana.

No need to take drugs at all.

I really don't know where the ancestor of the immortal world obtained the Hunyuan Heavenly Scripture, such a heaven-defying technique.

Zhang Yuhe felt that even in the immortal world, the Hunyuan Heavenly Scripture was definitely not an ordinary skill.

It would be strange if all the techniques in the immortal world were so heaven-defying.

"I really want to ascend as soon as possible and see the beauty of the fairy world."

Thinking of these, he was full of infinite yearning for the fairy world.

Chapter 63 If I don't accept it, how dare they accept it?

Zhang Yuhe used all his strength to activate the Tianhuang Flying Immortal Technique and quickly flew out of the Yunmang Mountains.

Along the way, I saw countless monsters running wildly outside the mountain.

However, he didn't pay too much attention and did not take action to clean up the monsters.

The level of these monsters is not too high.

There are mostly first-order monsters, with some third-order monsters occasionally mixed in.

Facing such a weak monster, Zhang Yuhe had no desire to take action.

"Huh."

When he passed over a certain city, he suddenly found countless monsters attacking the city.

This surprised him greatly.

"Could it be that a tide of beasts broke out? How could there be monsters attacking the city?"

Zhang Yuhe was very puzzled when he saw monsters attacking the city.

Although the monsters in the Yunlang Mountains do occasionally rush out of the mountains, erupting in a tide of beasts, attacking nearby human cities.

But before every beast tide breaks out, there will be corresponding signs.

As the guardian envoy of Yunzhong Mansion, Zhang Yuhe did not receive any news in this regard.

"Is it because of the catastrophe I caused before? The monsters were afraid of the catastrophe, so they rushed out of the mountain collectively, and this caused the beast wave to break out?"

He quickly thought of the crux of the problem.

I saw countless monsters along the way just now, running wildly out of the mountain.

Now that I think about it, these monsters should have been frightened by the tribulation.

"Sin, sin."

Thinking of the outbreak of the beast tide due to his actions in overcoming the tribulation.

Zhang Yuhe felt a little guilty for letting the surrounding cities be attacked by monsters.

"Hey, since I caused the beast wave, let me solve it."

Zhang Yuhe waved his right hand, and countless sword lights emerged, sweeping towards the monsters attacking the city.

The sword light was like cutting wheat, quickly cutting through the tide of beasts outside the city.

Countless monsters fell to the ground instantly, leaving corpses of monsters on the ground, as well as various treasure boxes.

Zhang Yuhe waved his hand, put away the items in the treasure box, and then turned into a stream of light and flew into the distance.

The monks who were struggling to resist the monster attack were completely stunned.

They saw countless sword lights flashing by, and countless monsters turned into corpses in an instant.

The monks in the city didn't react at all. They didn't know what happened just now.

"Did any senior pass by just now?"

"I don't know. I didn't see anyone. I just saw the light of the sword passing by. All the monsters outside the city were dead."

"What kind of cultivation does this senior have? Even a third-level monster can't stop senior's casual sword light."

"Perhaps it's an elder from the Dao Sheng Sect who happened to be passing by?"

"Thank you, senior, for taking the initiative."

Countless monks in the city bowed their hands to the deserted sky.

...

After dealing with the beast tide outside the city, Zhang Yuhe took out a jade talisman and pointed at it.

Soon, Wang Guofeng's excited voice came from the jade talisman.

"Senior Zhang."

"I just passed by a city near the Yunlang Mountains and found that there was a monster attacking the city. Is there a tide of monsters? Do you know which other cities have been attacked by monsters?"

There are many cities outside Yunmang Mountain, and Zhang Yuhe doesn't know which cities were attacked by the beast tide.

If he wants to deal with the beast tide, he must have a goal.

As the inspector of Yunzhong Mansion, Wang Guofeng presumably knew the situation on all sides.

That's why Zhang Yuhe asked Wang Guofeng.

"Reporting to senior, I have received notification from below that the twelve cities under the jurisdiction of Yunzhong Mansion, including Xiangshan and Feiyun, have been attacked by beast tides."

"knew."

Zhang Yuhe put away the jade talisman and quickly flew towards Xiangshan City.

Sure enough, when he arrived at Xiangshan City, he saw densely packed monster beasts outside the city.

With a wave of his right hand, countless sword lights flashed, and the monsters outside the city instantly turned into corpses.

Zhang Yuhe put away the items in the treasure box and rushed to the next city.

In this way, he used all his strength to activate the Heavenly Flying Immortal Technique and ran through twelve cities in a row.

The beast wave caused by his tribulation was finally resolved.

Zhang Yuhe ignored the corpses of monsters left at the scene and regarded them as compensation for the local city.

However, he did not let go of the treasure chests exploded by killing the monsters.

Due to game mechanics issues.

Only the player can see the treasure chests exploded by killing monsters.

If he doesn't pick it up, it's really a waste.

Continuously wiped out large areas of beasts, and picked up an unknown amount of various garbage items.

There are some decent materials and spiritual herbs among them.

These things are definitely a big gain for ordinary players.

But for Zhang Yuhe, it can only be regarded as a mosquito leg.

It's a bit meaty, that's all.

"Let's go back."

A huge beast wave quickly disappeared because of Zhang Yuhe's action.

In Yunzhong City, a stream of light passed over the city and fell in the garrison.

Seeing Zhang Yuhe coming back, Wang Guofeng and others immediately stepped forward.

Feeling Zhang Yuhe's aura that was as deep as the sea, the three of them shouted respectfully.

"I've seen the guardian envoy."

Zhang Yuhe waved his hand, glanced at the three of them, and then asked Wang Guofeng.

"How is the matter between the He and Li families handled?"

After wiping out the He and Li clans, he no longer took care of them.

All subsequent matters will be handled by Wang Guofeng.

After so many years, I think everything should have been solved, right?

Now that he has been promoted to the Void Refining Realm, he no longer needs to stay in Yunzhong Mansion as a guardian.

But before leaving, he didn't want to leave his tail untied.

Wang Guofeng echoed.

"Reporting to your lord, my subordinates, Qian and Sun, the two family heads, according to the genealogy of He and Li, according to the map, all the registered members of the two families have been wiped out. This is the material collected from the two families, please check it."

After finishing speaking, Wang Guofeng took out a storage ring and handed it over respectfully.

Zhang Yuhe took the storage ring and glanced at it with his consciousness, his expression slightly surprised.

I saw that there were as many as one billion spiritual stones in the storage ring alone.

In addition, there are a large number of various materials and spiritual herbs and elixirs.

It has to be said that Wang Guofeng's ability to collect is really good.

The He and Li families have been in business for tens of thousands of years, but in the end they all made wedding clothes for others.

Make yourself easier.

Zhang Yuhe put away the ring and nodded with satisfaction.

Since it was handed over by Wang Guofeng, he naturally wanted to keep it.

If he didn't accept it, Wang Guofeng and others might not be able to sleep.

Didn't do anything myself.

An inspector was appointed ten years ago, and a large amount of materials were harvested ten years later.

I have to say that strength, identity and status are really important in the world of immortality.
