Section 70

Zhang Yuhe felt that if he did not make preparations in advance, he would wait until the next time he breaks through the Fusion Realm.

He may not be able to withstand the catastrophe, and it is very likely that he will overturn.

There are many ways for monks to improve the success rate of overcoming tribulation.

Some people strengthen their defense capabilities by cultivating physical magical powers.

Some people prepare defensive magical treasures, while others prepare recovery elixirs.

For normal monks, as long as all preparations are done.

Then their chances of surviving the catastrophe will be very high.

But that's only for ordinary monks.

For Zhang Yuhe, just making these preparations is not enough.

He was well prepared before.

More than twenty pieces of defensive magical treasures have been prepared, as well as various elixirs.

Except for not cultivating physical magical powers, he had already done all the preparations he needed to do.

However, it still almost overturned.

Mainly because the disaster he caused was too outrageous.

This was only his first catastrophe. It was hard to imagine how powerful future tribulations would be.

If he wanted to survive the catastrophe in the future, he would have to think of other ways.

There is no need to consider physical magical powers for the time being.

Because Dao Sheng Sect does not have suitable physical magical powers.

The best one only has an earth-level middle-grade one, not even a heaven-level physical magical power.

In other words, the entire Yu Fantian does not have heaven-level physical powers.

After all, for monks, the physical body is not the main direction of cultivation.

What monks cultivate is mana and soul.

Except for the demons, the physical bodies of monks are generally not very strong.

In order to cope with the next catastrophe, Zhang Yuhe has already seriously considered it.

The best way out is to work hard on the formation.

The Renshui Thunder Absorbing Formation is indeed a very good formation.

By absorbing the traction, the power of the Heavenly Tribulation can be weakened a lot.

But Zhang Yuhe felt that the Renshui Thunder Absorbing Formation was not enough.

The last nine-color divine thunder penetrated the Renshui thunder-absorbing formation directly.

Even the lightning-absorbing pillars deployed in the formation were completely beaten to ashes.

"It would be great if we could improve the Renshui Thunder Absorbing Array."

Zhang Yuhe secretly made up his mind.

At least the Renshui Thunder Absorbing Formation must be deduced to the point where it can completely block the nine-color divine thunder.

...

Chapter 69 Level 2 Renshui Thunder Absorbing Formation

Galaxy Peak, weapon refining room.

Zhang Yuhe suddenly opened his eyes.

With a wave of his right hand, the cauldron lid flew up, and nine flying swords with powerful aura slowly appeared.

He reached out and took out one of the golden flying swords, holding it in his hand and observing it carefully.

The surface of the flying sword was crystal clear, exuding astonishing pressure.

On the hilt of the sword, there are also several small words engraved with Galaxy.Gold.

"Phew, it's finally done."

All nine natal magic weapons have been promoted to middle-grade heaven-reaching spiritual treasures.

The mid-grade Heavenly Spiritual Treasure-level natal magic weapon is not comparable to the lower-grade ones.

If you encounter the horned demon clan from Jingkong City again, you will probably be able to chop it into pieces without a few swords.

Instead of relying solely on massive amounts of sword energy to scrape the horned demon to death like before.

After collecting the flying sword into his dantian for nourishment, Zhang Yuhe breathed a sigh of relief.

In these days, he has not only refined the second-level Five Elements Spirit Gathering Formation, but also the required formation plates and formation flags.

Moreover, the natal magic weapon has now been promoted to the middle-grade Tongtian Lingbao.

The most important thing is that he has already come up with an idea for improving the Renshui Thunder Absorption Array.

To sum it up, bigger, more, stronger.

Zhang Yuhe plans to improve the level of thunder-absorbing pillars and refine them into mid-grade Tongtian Lingbao-level thunder-absorbing pillars to use in setting up the Renshui thunder-absorbing array.

The Daosheng Sect's original Renshui thunder-absorbing array was arranged with low-grade Tongtian Lingbao level thunder-absorbing pillars.

At the same time, the number of mine-absorbing pillars is increased.

The original Renshui thunder-absorbing array required twenty-eight thunder-absorbing pillars.

He plans to prepare 108 lightning-absorbing pillars to deploy an enhanced version of the Renshui thunder-absorbing array.

Of course.

Things will definitely not be so simple and crude.

If the Renshui Thunder Absorbing Formation was so easy to improve, others would have done it long ago, and there was no need to wait for him to do it.

His most important improvement was to redesign the formation pattern of the connecting thunder-absorbing formation.

Through redesign, one hundred and eight middle-grade Tongtian Lingbao-level thunder-absorbing pillars can be perfectly connected together.

Forming a huge thunder-absorbing array.

Zhang Yuhe calculated.

Take the last disaster he caused as an example, the improved version of the Renshui Thunder Absorbing Formation.

It can probably weaken half of the power of the Heavenly Tribulation.

This effect can be said to be like cowhide.

After the Heavenly Tribulation was weakened by half, it would not pose any pressure to him at all.

You don't even need the Nine Heavens Hunyuan Sword Formation, you only need one or two defensive Tongtian Spiritual Treasures.

It can block the natural disaster that has been weakened by more than half.

"Well, after the formation has been improved, does it need to be renamed?"

This is the first time he has improved the formation.

Although he has a strong understanding, Zhang Yuhe is not a person who likes to study.

He had never thought of improving it before, whether it was skills, magical powers, or pill recipes and weapon refining blueprints.

Because it's not necessary.

In his opinion, as long as something is enough, it will be enough.

No need to bother to improve it.

This time I was backed into a corner.

If you don't put any more thought into improving the Renshui Thunder Absorbing Formation.

Then he might be killed by the next heavenly tribulation.

In order to survive the tribulation more safely in the future, he would work hard to study the improvement of the lightning absorption array.

Since the lightning absorption array has been improved by him, should this new version of the lightning absorption array be given a new name?

"Forget it, let's call it the second-level Renshui lightning absorption array."

Zhang Yuhe has difficulty naming.

He thought for a long time, but couldn't think of a more appropriate name.

It's better to keep it simple and call the improved array the second-level Renshui lightning absorption array.

Maybe it will need to be improved in the future, and then it will be the third and fourth-level Renshui lightning absorption array.

After packing up his things, Zhang Yuhe walked out of the cave.

He took out a jade talisman and stretched out his hand.

Soon, Wang Guofeng flew up from the foot of the mountain.

"Senior, do you have any instructions?"

He remembered that Zhang Yuhe had said before that there would be something for him to do in a few days.

Therefore, even with the infant transformation pill in hand, Wang Guofeng did not retreat to break through.

How could he dare to cultivate at ease without doing Zhang Yuhe's work well?

He was a follower, and everything had to be done with Zhang Yuhe's work first, and his own cultivation could be put aside for the time being.

And as long as things were done well, there was no need to rush to cultivate.

Zhang Yuhe's fingers leaked something, which was more real than the effect of his hard work.

He understood the reason very well.

Looking at Wang Guofeng, Zhang Yuhe nodded with satisfaction.

As the president of the Blue Star Immortal Cultivation Alliance, Wang Guofeng was a big shot.
