Section 78

The center of the spiritual energy frenzy, on the small island in the center of the thunder.

Zhang Yuhe suddenly opened his eyes.

At this time, the aura on his body was rising rapidly.

After a while, the terrifying aura rushed out from his body, and the aura rushed straight to the sky.

In an instant, the entire Yunmang Mountain Range changed color.

The sky was full of dark clouds and quickly covered the entire sky.

The sky and the earth became dark.

A huge vortex slowly formed in the dark clouds.

In the vortex, bursts of lightning and thunder were heard from time to time.

The dazzling lightning cut through the dark sky.

Standing in the distance, Li Tian frowned when he saw this situation.

He muttered to himself.

"The heavenly tribulation has not yet begun, how can there be such a big momentum."

He had seen the heavenly tribulation caused by the breakthrough to the fusion before.

When he was still in the transformation of the spirit realm, there happened to be a refining elder in the sect who broke through the fusion.

In order to feel the power of the heavenly tribulation in advance, he deliberately followed to watch the elder's tribulation.

But the momentum at that time was not so exaggerated.

Li Tian looked up at the sky, and then glanced at Zhang Yuhe in the distance.

"I'd better run farther."

Thinking of this, Li Tian quickly flew back.

He didn't stop until he was more than 300,000 miles away from Thunder Lake.

Zhang Yuhe stood on the half-mountain in the center of Thunder Lake.

He looked up at the sky, facing the mighty and slowly forming heavenly tribulation.

Zhang Yuhe looked calm and not panicked at all.

With the experience of the last tribulation, he already had a bottom line on the power of the heavenly tribulation.

Although the momentum of this heavenly tribulation was much stronger than when he broke through the refining void a hundred years ago.

But he was still calm.

Because he was more prepared this time.

This time he not only prepared, but also prepared a number of defensive mid-grade Tongtian Lingbao.

He also prepared a lot of various recovery and healing pills.

The most important thing is that Zhang Yuhe has confidence in his improved Renshui Thunder Absorption Array.

He believes.

The improved second-level Renshui Thunder Absorption Array will definitely have a strong effect on weakening the power of the heavenly tribulation.

Through the weakening of the second-level Renshui Thunder Absorption Array, he will definitely be able to survive this heavenly tribulation.

Boom...

Suddenly, a loud noise came from the vortex.

A thunderbolt more than ten meters thick quickly formed.

The thunderbolt flashed with dazzling light, illuminating the entire night sky with a bright white.

Almost in an instant, the thick thunderbolt quickly struck the center of the lake.

A light blue light curtain slowly rose above the lake.

When the thunderbolt passed through the light curtain, it was like passing through a huge sieve.

The thick thunderbolt was quickly sifted and divided into small lightning bolts.

These small lightning bolts slid down the blue light curtain to the lake surface and around the lake.

In an instant, the whole lake seemed to boil, stirring up countless huge water columns.

Even the peaks on the edge of the lake were shattered by the lightning that slid along the light curtain, raising billowing smoke and dust.

The thunder that was originally more than ten meters thick was only three or five meters in size after passing through the blue light curtain.

It was still rushing towards Zhang Yuhe.

Zhang Yuhe shouted.

"Galaxy Zhoutian Gong."

Starlight instantly lit up from his body.

Under the cover of starlight, the whole person seemed a little sacred and solemn.

Zhang Yuhe raised his right hand and punched the rushing thunder.

Boom...

The starlight wrapped the fist shadow and collided with the thunder, making a deafening roar.

The starlight fist shadow instantly dispersed the thunder, forming a dazzling white light around.

Galaxy Zhoutian Gong, this is his own physical magical power.

At present, he has been deduced to the upper level of the earth rank.

It's not that he doesn't want to continue to deduce this magical power.

It's really because there is no suitable reference.

Dao Sheng Zong only has one earth-level upper-grade flesh-body magical power for him to refer to.

It takes a lot of time to deduce magical power out of thin air.

Zhang Yuhe didn't want to waste too much time, so after deducing this magical power to the earth-level upper-grade, he stopped temporarily.

Despite this, this magical power deduced by himself still showed great power.

Without the help of spiritual treasures, he survived the first heavenly tribulation with his flesh alone.

Of course.

This is mainly due to the second-level Renshui Thunder Absorption Array.

After his improvement, the second-level Renshui Thunder Absorption Array showed an extraordinary effect of weakening the heavenly tribulation.

It directly weakened the power of the heavenly tribulation by more than half.

Otherwise, he would not dare to use his flesh to withstand the heavenly tribulation directly.

Thunder kept falling, but he smashed them all with his punches.

When the second round of heavenly tribulation came.

Zhang Yuhe took out a shield and threw it out.

With the injection of mana, the shield swelled against the wind and instantly turned into a purple light curtain above his head.

A defensive mid-grade Tongtian Lingbao, Amethyst Shield.

The physical body withstood the heavenly tribulation just to test the magic power he created to see what the specific effect was.

He was not so arrogant that he could withstand this terrifying heavenly tribulation with just the physical body magic power.

Even if the heavenly tribulation was weakened by the formation, it would not work.

Time passed slowly, and thunder fell one after another.

After withstanding the 70th thunder, the yellow light curtain above his head finally broke.

Zhang Yuhe waved his robe sleeves, and nine flying swords flew up instantly.

As the spell was pinched, the flying sword formed a series of tight sword energy barriers around him.

There are a total of 72 thunder attacks in the combined heavenly tribulation, also known as the eight-nine heavenly tribulation.

Now he has survived 70 thunders, and he only needs to survive two more thunders.

This heavenly tribulation is considered to have been survived.

But he knew that things would not be that simple.

According to the experience of the last tribulation, the last thunder would probably be ridiculously strong.

Therefore, Zhang Yuhe did not continue to use the Tongtian Lingbao to resist the attack of the heavenly tribulation.

Instead, he deployed the Hunyuan Nine Heavens Sword Formation in advance.

Only the Hunyuan Nine Heavens Sword Formation can withstand the last abnormal heavenly tribulation attack.

The 71st thunder fell, and after being weakened by the Renshui Absorbing Thunder Formation.

The thunder hit the sword energy light curtain, only causing a slight ripple.

Faced with this situation, Zhang Yuhe was not careless at all.

This was all expected.

The key is the last thunder, I don't know what kind of abnormal method it will be.

"I hope it won't be a great calamity comparable to the ascension of a cultivator, right?"

Zhang Yuhe looked up at the sky, silently waiting for the last calamity to fall.

Chapter 77 Uncle Zhang

Boom...

Zhang Yuhe looked up at the sky.
