Section 93

Such a cultivation environment was something he had never dreamed of before.

Seeing Wang Guofeng coming, Zhang Yuhe nodded and then spoke.

"Have you heard about the demon invasion?"

"I heard that the chat channel has exploded for a long time. Many players near Tianxing Sea have been killed by the demons and offline."

The speed of information exchange between players is far from comparable to that of Yu Fantian's natives.

One chat channel can defeat all communication methods of Dao Sheng Sect.

Because he was busy overcoming the tribulation before, after returning to the sect, he could not even sit firmly on his butt.

Then Feng Xiaotian called him to Feixian Palace to discuss matters.

Therefore, Zhang Yuhe did not pay attention to the player's chat channel.

But Wang Guofeng is different.

As the president of the Blue Star Immortal Cultivation Alliance, as long as something happens.

Even if he doesn't pay attention, someone will remind him.

Zhang Yuhe nodded, and then said solemnly.

"Now there is something that I have to leave to you. As long as this thing is done well, I will mention it to the sect master and let you officially join Dao Sheng Sect and become an inner disciple."

"Senior, please tell me if you have something to do. I will do my best."

Wang Guofeng said excitedly when he heard that he could officially join the Daosheng Sect.

As Zhang Yuhe's follower, there is no need to worry about various cultivation resources.

But in terms of skills and magical powers, they are not comparable to the disciples of Dao Sheng Sect.

Only disciples of the Dao Sheng Sect can study the classics in the library and scripture building.

They, the followers of the elders, can only find ways to obtain skills and magical powers from outside.

The technique that Wang Guofeng is currently practicing is an earth-level low-grade technique that he spent a lot of money to buy from outside.

Compared to the inner disciples of Daosheng Sect, this is far behind.

Of course.

Even if he could become an inner disciple of Dao Sheng Sect.

Wang Guofeng also had no intention of leaving Zhang Yuhe and establishing himself in the Daosheng Sect.

He just wants to have the status of a disciple of Daosheng Sect, so that it will be more convenient for him to act within the sect in the future.

Compared to Dao Shengzong, he was more willing to hug the super thick leg in front of him.

Zhang Yuhe continued.

"You immediately mobilize the players to collect all information about the demon army."

"Including their number, speed of advancement, and their route of action."

"In addition, there are thirteen demons above. Please pay special attention to the players. Once you find any trace of these people, report to me immediately."

After Zhang Yuhe finished speaking, he handed over a jade slip.

On it are recorded the portraits of the demons, Mahayana.

Although Wu Yuemin has died.

But before he died, he still sent out a lot of key information.

The portraits of these demons, as well as information about their magical powers and the magic weapons they use, etc.

Wu Yuemin finally sent out the message in time.

This information is very important.

With this information, if he encounters the demon Mahayana, he will not be caught off guard.

"Yes, I'll make arrangements right away."

Wang Guofeng took the jade slip and immediately returned to the cave at the foot of the mountain.

He brought up the chat channel and sent a message in the friends list.

...

The headquarters of the Immortal Cultivation Alliance in Blue Star Wangjing City.

Although it was already late at night, the Cultivation Alliance was still brightly lit.

Just now, the president sent someone offline to send a message that he needed to collect information on the actions of the demons in Yu Fantian.

Although no one knew why Wang Guofeng suddenly became concerned about the situation of the demons.

For Blue Star players, neither Dao Sheng Sect nor Demon Clan Ruler Yu Fantian has much impact.

For players, Yu Fantian is just a place to practice and upgrade, fight monsters and collect resources.

Anyway, they go back and forth freely.

If it doesn't work, just go offline to avoid it.

Although Blue Star's spiritual energy is less dense, it is not impossible to practice.

Everyone hopes that the more intense the fight between the Dao Sheng Sect and the demons will be, the better.

The more intense the fight in Yu Fantian is, the more opportunities they will have to obtain more resources for cultivating immortals.

But now that Wang Guofeng had confessed, they naturally had to take it seriously.

Wang Guofeng's status now is not comparable to that of before.

As a god-transforming monk, Wang Guofeng's cultivation speed is unparalleled, leaving others far behind.

In the hearts of Blue Star players, Wang Guofeng is not only the president of the Immortal Cultivation Alliance.

He is also the number one person in the Blue Star Immortal Way.

More importantly, Wang Guofeng is not only leading in cultivation, but he is also fair and takes great care of the players in the alliance.

He often sells some precious immortal cultivation resources to players at very cheap prices.

Of course, these so-called precious resources are actually some garbage that Zhang Yuhe asked Wang Guofeng to deal with.

Zhang Yuhe doesn't like these junk items.

But for players, it's like a treasure.

Therefore, everyone is very convinced of Wang Guofeng.

As long as Wang Guofeng explains something, everyone will go all out and actively handle it.

After receiving the message from Wang Guofeng, the headquarters of the Immortal Cultivation Alliance took quick action.

They first posted a reward announcement on the Skynet to collect information about the demons that players encountered in Yu Fantian.

Then start the supercomputer to quickly filter and combine various information.

Although it has been more than ten years since the spiritual energy was revived, Blue Star has entered the true era of immortal cultivation.

But technological means have not been abandoned.

Not only that, after adding the element of cultivating immortals, Blue Star's technology has made rapid progress.

Just like the current supercomputers.

Because the materials brought out by players from Yufantian, after being engraved with the array patterns.

The computing speed is countless times faster than ten years ago.

It is even much faster than the computing speed of the consciousness of high-level cultivators.

If it weren't for the different rules, the technological means on Blue Star would be ineffective in Yufantian.

Relying on various powerful technological means, players in Yufantian will definitely be able to make a better living.

At the headquarters of the Xiuxian Alliance, everyone quickly got busy.

Soon, a rough distribution of the demon army and the route of advance were clearly marked on the map.

"Quick, arrange someone to go online and send the information to the president."

"Yes."

A staff member quickly walked out of the meeting room and prepared to arrange for players to go online to pass on the message.

Because of the difference in the speed of time flow, many players usually do not log in to Yufantian.

In order to avoid consuming their lifespan too quickly.

Therefore, it is not too easy to find a player who has not logged in to Yufantian that day.

They can find a lot of them at the headquarters of the alliance.

After passing on the first-hand intelligence, others continued to collect information.

Wang Guofeng had just explained that collecting information about the demons would be a long-term task for the Xiuxian Alliance in the future.

As long as the demons are still in Yufantian, this work cannot be stopped.

...

Chapter 90 Inner Disciple Wang Guofeng

After Zhang Yuhe told Wang Guofeng to contact the players, he turned and walked into the cave.

In order to deal with the upcoming war, he still needs to make some preparations.

For example, refining various array plates, drawing various talismans, etc.

These things often have miraculous effects when used.

In addition, he also needs to carefully recall and organize the magical powers he had just seen in the Sutra Tower.

Although these magical powers have been learned after seeing them.

But they are only learned and can be used.
