Chapter 351: Bold Ideas

When Xu Han learned of the current situation, he was instantly delighted.

“This is beneficial for us. Let’s recuperate and develop properly. After they’re done fighting, we’ll clean up the mess. It’ll be easy.” Xu Han could not help but feel a little happy.

Alan Smith also nodded. He looked at Liu Yan with gratitude and said, “Up until now, we never had fought a big battle, but we can have such a good development. Liu Yan, your strategy is indeed good.”

When the other people heard this, they all felt the same way.

When they first started, the Land of Origin team’s situation could be said to be the worst.

The other four teams formed two alliances. The Land of Origin team was not only the weakest but also needed to face the joint attacks of the four teams from the two alliances. They also had to face the risk of being the first to be eliminated.

However, Liu Yan did not retreat in that critical situation. Instead, he chose to take the initiative to attack. That night, he led the sharp knife team to launch an attack on the Pan-ocean Community team in the wood attribute territory.

Their ambush was successful. The Land of Origin team had also successfully obtained their place on the fifth level of the Tower. They had escaped the danger and formed a situation of three forces restraining each other.

Now, after using this series of tactics, Alliance Number 1 and the Red Star Empire team had started to fight. Both sides were in an intense battle.

No matter what the outcome of this battle was, it was undoubtedly beneficial to the Land of Origin team.

Currently, the Land of Origin team basically advanced steadily. They even had a good chance to obtain rewards and advance.

Moreover, the Land of Origin team had not even really fought before they could advance steadily.

At this moment, Murong Xue felt a little regretful and said, “What a pity. I have not fought an intense battle yet. The training on the fifth level of the Tower is basically about to end.”

The others laughed when they heard this. After thinking about it carefully, they realized it was really the case.

However, Liu Yan did not look very relaxed. The reason was simple. Including the two Lord’s token fragments he had obtained today, the total Lord’s token fragments that he had here were only a few hundred.

There was still a long way to go before he could collect ten thousand Lord’s token fragments.

The rules of the fifth level of the Tower were not only to fight with the opponents but also to obtain ten thousand Lord's token fragments.

He Yang could not help but laugh at this time. "Not to mention your team members, even many members of our Pan-ocean Community team have great respect for you, Captain Liu Yan. I've heard countless praises from our team members for you."

When the surrounding people heard this, they all laughed.

Members of the Pan-ocean Community team had just been eliminated by the sharp knife squad led by Liu Yan. They had even become prisoners of war.

However, these team members began to admire and praise Liu Yan. Liu Yan's strategy was ingenious, and his personality was strong.

He Yang seemed to have seen through Liu Yan's thoughts at this time. He could not help but ask, "Captain Liu Yan, may I know what your next plan is? You've gathered all of us here today. It should be something important, right?"

When the others heard this, they could not help but look at Liu Yan.

Liu Yan had gathered them together today. He just had something important to say.

It should not be discussing the situation in the team.

The few of them could not help but feel a little puzzled. Their team was doing really well now.

The two major factions were fighting each other. Shouldn't they try to keep a low profile and not make a sound? They could develop in peace and wait to clean up the mess.

Zheng Tainan could not help but ask, "Captain, don't tell me you have some ideas?"

Liu Qing also said worriedly, "We should keep a low profile, right?"

"Yeah, things are going smoothly for us now." Liu Ning also looked at Liu Yan worriedly.

In the past two days, the three of them had made a lot of profits.

With the gains from the wood attribute territory, the overall gains were much better.

These gains were not worth the attention of top-tier geniuses like Liu Yan, so they had gained a lot.

Although they had to hand over their low-level equipment to exchange for high-level equipment, they also benefited a lot. They had upgraded their equipment, and their strength had increased.

In addition, in terms of cultivating medicinal ingredients and consumable items, they were stronger than ordinary members, so they naturally received more.

During these two days, they gained a lot. At the same time, they were grateful to Liu Yan. After all, it was all because of Liu Yan that they could have such a good haul.

Correspondingly, they also hoped that they could maintain the current situation. This way, their strength could increase rapidly. It was a good thing, so they naturally did not wish for Liu Yan to take any other methods.

The current situation was so good, so there was no need to take any risks.

When the others heard this, they also felt that it made some sense. They could not help but look at Liu Yan, curious about Liu Yan's current thoughts.

Liu Yan faced everyone's gazes and nodded slightly. "That's right. I already have a plan for the next step. We will engage in a surprise attack with the New Continent team of Alliance Number 1!"

As soon as Liu Yan finished speaking, the surroundings instantly fell silent. Immediately after, there was an uproar, and everyone was filled with doubts.

The current situation was great, and they did not need to do anything to enjoy the fruits of their labor. Why did they take the initiative to launch an attack and take the risk?

Xu Han was stunned for a moment and could not help but ask in puzzlement, "Captain, why?"

Although He Yang had already guessed Liu Yan had a plan, he did not expect Liu Yan would be so bold as to launch an attack at this time.

"According to the information I have received, although Alliance Number

1 is fighting with the representative team of the Red Star Empire, they did not go all out. They left the two guardian beasts in their respective territories. In addition, they only sent elites to their respective territories. Many members left in their respective territories to strengthen their defense. They are preventing us from launching an attack at this time." He Yang could not help but remind her.

"That's right." Luo Qingcheng nodded and said, "In addition, the leader of the New Continent team, Jin Cheng, has also stayed in the territory. They have their guard up. If we launch an attack at this time, their members from the other territory will rush over to support us."

Chu Long thought for a while and said, "Yes, their elites are fighting the Red Star Empire team. But it's an alliance formed by two teams. The overall strength of the remaining members is not weak. If we launch an attack and they come to support us, it might be extremely disadvantageous for us."

They analyzed the current situation. They thought it was not a good time to ambush the opponents.

Their opponents were obviously on guard. Launching an attack would undoubtedly be a trap. Not only would they be at disadvantage, but they would give up their team development. It was not a wise choice.

Chapter 352: It Was Not a Risk

For a moment, the few people present did not understand Liu Yan's decision.

On the other hand, Murong Xue felt it was safer to keep a low profile and not stir up trouble.

However, Murong Xue really liked battles.

When Murong Xue heard Liu Yan's suggestion to launch an attack, she was tempted and said excitedly, "Ambush them makes things more interesting even though it's not safe."

The rest of them also looked at Liu Yan with puzzlement. They did not understand Liu Yan's intention.

However, Liu Yan's previous decision was ingenious.

Although they did not understand Liu Yan's intention, they did not oppose him at the first moment. Instead, they were more curious about the reason why Liu Yan made such a choice.

Even Luo Qingcheng was also a little puzzled at this moment. She asked, "Liu Yan, can you tell us why?"

Even though she was a genius student of the Command School of Lighthouse Academy, Luo Qingcheng could not think of the reason Liu Yan made such a choice let alone the others.

Liu Yan faced the puzzled few people and smiled. He explained, "The current situation seems to be beneficial to us. We don't have to do anything. We can just sit back and reap the benefits. It is just a superficial phenomenon."

When they heard this, they were even more puzzled.

Liu Yan continued, "You've also found out that the two representative teams of Alliance Number 1 left many ordinary members in their territories. Jin Cheng, the captain of the New Continent team, is currently defending their territories. There were also two guardian beasts. It seems like it would be more difficult for us to attack. If we fail, the opponent's reinforcements will attack us. It would be extremely disadvantageous to us. However, it's not the case. We have to use this opportunity to launch an attack."

Hearing this, the few of them looked at each other. They did not understand Liu Yan's logic.

Their opponent was on guard against them, so why did they have to launch an attack?

Liu Yan could see the confusion on their faces, but he was not surprised.

In the beginning, Liu Yan had similar thoughts as theirs.

However, based on the information he had received, Liu Yan felt he could not just sit and wait.

Liu Yan continued to explain, "Alliance Number 1 has mobilized the powerhouses from their respective teams to form an elite team. The elite team is attacking the Red Star Empire team, and they are strong. It is only a matter of time before they finish the Red Star Empire team. On the contrary, there isn't much strength left in their territories. Hence, they aren't too anxious when attacking the Red Star Empire team. Instead, they are holding back when launching their attack. In this way, even if Alliance Number 1 spent a lot of time eliminating the Red Star Empire team, they didn't lose much strength. When we engaged in battle with them, we won't be much stronger than them. We won't be able to take them down. When the time comes, we will be in trouble fighting them."

When the others heard Liu Yan's explanation, they thought about it carefully. It seemed that this was indeed the case.

According to the information they had received, the battle on the Red Star Empire's territory was intense. Alliance Number One's elite team had been suppressing the Red Star Empire. In addition, they had absolute strength to crush the Red Star Empire. Hence, they did not lose much combat strength.

If this continued, when Alliance Number One successfully took down the Red Star Empire team, they would at most lose some of their stamina. They would not lose much combat strength.

Even if their overall combat strength were not as good as the Land of Origin team, it would only be slightly weaker. Their defense would not be a problem.

On the contrary, after Alliance Number 1 defeated the Red Star Empire team, they would be able to obtain an additional piece of territory and many loots. After they rested for a while to strengthen their defense, their strength would surpass the strength of the Red Star Empire team.

At that time, the Land of Origin team would still be able to advance. However, it was unlikely that they could obtain the top two rewards.

Luo Qingcheng and the others were all genius students from their academies. They were even geniuses amongst geniuses. All of them were proud and arrogant. Naturally, they were unwilling to advance and not be able to obtain the rewards.

After all, those rewards were helpful to their future strength in the sixth level of the Tower, or even higher.

Everyone's goal was not as simple as passing through the fifth level of the Tower to reach the sixth level. Instead, they wanted to head to a higher place or even to the tenth level of the Tower!

"This is the logic behind it. However, they did indeed leave behind some defensive strength. It will be risky if we launch the attack. Once their reinforcements arrive, we will be in serious trouble." Chu Long could not help but be a little worried as she said.

"That's right." Zheng Tainan added, "If we launch an attack, their elite team might make peace with the Red Star Empire team and turn around to get rid of us. At that time, we won't even be able to advance."

Liu Qing nodded and said, "That's right. Right now, the Red Star Empire team is on the brink of being eliminated. If we make peace. They'll definitely be willing to work together with Alliance Number 1 to fight us. Then, their Red Star Empire team will be able to advance."

Liu Ning also analyzed, "We have the option to advance steadily but cannot win the first two places and receive rewards. Another option is we defeat the opponents and win. But if we fail, we will be eliminated. Isn't that a little risky?"

Xu Han did not seem to mind and said, "I think we can follow Captain Liu's idea and take a risk. If we can only advance without any reward, that would be too pathetic."

"Why are we scared of them? If I were you, I would fight!" Murong Xue also agreed.

The few of them looked at each other and hesitated for a moment.

Some of them were more in favor of trying this method. Although it was risky, it was worth the risk.

But the others were worried something worse might happen and hoped to be safe.

At this time, Luo Qingcheng's eyes lit up. She glanced at Liu Yan with a strange look. She said, "Liu Yan, you think this operation is not very risky? There should be a greater chance of success, right? Otherwise, you would not have announced this operation directly."

When the surrounding people heard this, they could not help but look at Liu Yan.

Did they have a chance to ambush the opponent successfully?

After all, the opponent was the remaining two teams, and their strength was not weak. It was not so easy to attack quickly.

And once the attack was relatively slow, the other party's support would arrive, and it would be even more impossible to attack.

When the other party's elite team in the earth attribute territory arrived to support them, they would be finished.

Facing the curious faces of the crowd, Liu Yan smiled faintly and said, "I suggested this operation, so I naturally have some confidence. It's not 100%, but at least 80%."

When they heard this, their eyes immediately lit up.

"Quick, tell us your plan." Xu Han immediately asked with a face full of interest.

The rest of them were also extremely curious.

Chapter 353: Determination to Declare War

Fire attribute territory, Land of Origin team's temporary camp.

Facing the doubtful crowd, Liu Yan also directly explained, "Alliance Number 1's two teams each left behind a guardian beast and a certain number of members. Their overall strength isn't weak. We think that if we attack one of the teams, the remaining members from the other team will immediately come over to support them. If their elite teams from the frontlines at the Red Star Empire team's territory will rush back to support them. When that time comes, we will be in a crisis. However, it might not be the case."

Hearing this, they looked at each other, still not quite understanding what Liu Yan meant.

At this time, Luo Qingcheng seemed to have thought of something. She looked at Liu Yan with some surprise but did not say anything.

Liu Yan continued to explain, "In fact, the strength of remaining members Alliance Number 1 and the two guardian beasts are not bad. If we attack one team, the other team and guardian beast will need a certain amount of time to come to support them. As long as we can launch a swift attack and finish it before their support arrives, we can win this battle. No matter how many reinforcements they send, it would be useless. Moreover, their guardian beasts are staying in their territories to increase their

defensive strength. At the same time, it also gives us an opportunity. We can win this battle if we can defeat their guardian beasts. We don't even need to fight against their team members!"

When everyone heard the explanation, they immediately understood Liu Yan's meaning.

Thinking about it carefully, it was indeed so.

If one team could get rid of the guardian beasts of the opposing team, they would be able to win this battle. The losing team would be eliminated once their guardian beast was defeated.

Like the Pan-ocean Community team. Only less than half of their members were defeated. However, after Liu Yan defeated their guardian beast, they lost and were eliminated.

It was the same this time. If Liu Yan's team declared war on one of the teams of Alliance Number 1, as long as they could finish off the guardian beast in time, they would be able to win the battle.

They did not need to worry about the reinforcements of the opposing team.

As such, the crux of this plan was to finish off the opponent's guardian beast quickly.

The guardian beast was not weak. Although Liu Yan had single-handedly taken care of the guardian beast of earth attribute territory, Sturdy Back Ape, it still took Liu Yan some time to finish it off.

Previously, it was a gambling duel. Since the guardian beast was fighting on the stage, it could not leave.

However, if it fought in the free space, once the other party sensed Liu Yan's intentions, they would let the guardian beast escape. They would not let the guardian beast stay on the spot to fight with Liu Yan.

If they could not finish the battle in a short time, the members of the opposing team would rush over to support their allies.

At that time, Liu Yan's team would be in an awkward situation. They would miss out on the great opportunity to advance steadily.

Xu Han could not help but smile helplessly. "This is a good plan, but there is a certain risk. We must quickly defeat their guardian beast in a swift attack, or we will be doomed. Liu Yan, you should carefully consider it. If there is a greater chance of success, we will cooperate with you."

Xu Han's opinion was neutral. Although he felt it was risky, he was still willing to cooperate out of trust in Liu Yan.

Zheng Tainan could not help but be a little worried at this moment. "Isn't it too risky? We are doing pretty well now. Even if there are no rewards, we can at least steadily advance. How good would that be?"

He Yang also reminded, "Oh right, Liu Yan, according to the rules. We can only bring our guardian beast out of our territory to battle. Although Sturdy Back Ape listens to you now, we cannot bring it to the battle. It can only be used for defense."

Liu Yan was naturally clear about this rule. The subdued guardian beast could only be used for defense, not offense.

Therefore, Liu Yan could only bring the Undying Fire Phoenix to battle. He could not take Sturdy Back Ape with him.

If he could bring two guardian beasts with him, this battle would undoubtedly be much simpler.

Guardian beasts were still powerful, and the power of two guardian beasts was even more unimaginable.

"I know this rule." Liu Yan nodded calmly.

He Yang was a little surprised when he saw this. Liu Yan was confident that he could bring a guardian beast with him. How terrifying must his strength be?

He Yang could not help but be a little suspicious. Did Liu Yan have not used his full strength in the previous battle with Sturdy Back Ape?

Murong Xue did not care too much. When she heard that she could fight, she became excited.

"It's boring to stay in the territory. I say we'll go and fight!" Murong Xue said expectantly.

Chu Long was a little worried, but when she saw how confident Liu Yan was, she agreed, "Since our captain is so confident, we will cooperate."

At this time, Luo Qingcheng, who had been silent all this time, could not help but say, "Liu Yan, you should have a more thoughtful plan, right? Otherwise, why would you suggest attacking the New Continent team? You have an idea, right?"

Hearing Luo Qingcheng's question, the others immediately looked at Liu Yan.

They realized Liu Yan had stated that he wanted to attack the New Continent team of Alliance Number 1, not the European Federation team. Liu Yan must have thought it thoroughly before choosing the New Continent team.

The few of them were a little curious. Why did Liu Yan choose the New Continent team? He seemed so confident.

Facing the curious crowd, Liu Yan nodded and admitted, "That's right. The reason I choose to attack the New Continent team is simple. The New Continent team is slightly weaker than the European Federation team. We have more confidence in fighting them. Moreover, the territory of the European Federation team is a water attribute territory. This is the most crucial point. It means their guardian beast is also of the water attribute. Its attack will be more effective against our fire attribute guardian beast, Undying Fire Phoenix. As for the New Continent team, they are of the metal attribute. The metal attribute guardian beast is not countered by the fire attribute Undying Fire Phoenix. But according to the investigation, their metal attribute guardian beast is a land creature. It is countered by Undying Fire Phoenix. Undying Fire Phoenix will burn it down from the sky!"

When the others heard Liu Yan, they suddenly understood. No wonder Liu Yan would choose the New Continent team that had metal attribute territory.

In that case, this operation indeed had a great chance of success.

Alan Smith, who had been silent all this while, suddenly said, "Then let's declare war!"

Hearing this, they looked at each other and no longer hesitated.

Although there was a certain amount of risk, it was a great opportunity.

Following that, they agreed to this operation. They followed Liu Yan's instructions and prepared to attack the New Continent team of the metal attribute territory the next morning.

Chapter 354: Start the Swift Attack

The next morning.

At the exit of the fire attribute territory.

Liu Yan led his elite team and the Undying Fire Phoenix and set off.

This operation was different from the previous surprise attack on the wood attribute territory. It was a sharp knife squad formed by Liu Yan and the other four.

Although Liu Yan was also leading an elite team this time, he had brought more people.

The elites of the Land of Origin team and the Pan-ocean Community team had 70 to 80 people. Their strength was above average.

Last time, it was a surprise attack. A team of five top-notch combat strength consisting of a sharp knife squad was enough.

This time, it was a swift attack. They were trying their best to finish off the guardian beast of the metal attribute territory quickly. This way, they could win this battle and avoid the opponent's reinforcement which would put them in danger.

Naturally, Liu Yan wanted to suppress the opponent with his team members as soon as possible.

They had to suppress the New Continent team for a while if they could not defeat them. This way, Liu Yan could finish off their guardian beast and win this battle.

After leaving the fire attribute territory, Liu Yan and the others quickly headed in the direction of the metal attribute territory.

Speed was crucial in this operation. They had to win quickly without any delay.

As they moved forward, Liu Yan also released Purple Wind Falcon, soaring through the air above the fifth level of the Tower to investigate the situation.

Although Purple Wind Falcon could not enter other attribute territories, it could still investigate the situation while soaring through the air. Especially the movements of the members of Alliance Number 1.

At the same time, the earth attribute territory on the other side.

After a break, the elite team of Alliance Number 1 continued to attack the Red Star Empire team.

Under the command of Hans Wilson, their offense pursued forward steadily. They did not push forward aggressively, but they did it steadily.

Although their charging speed was not as fast as the full-force offense, it would not hurt the strength of the members too much. There would not be too much damage. It was safer, and it could prevent unexpected accidents.

Hans Wilson also looked at the public channel chat interface from time to time. He could not communicate freely on the fifth level of the Tower. So, he could only use the public channel chat interface to learn about the situation on the other side.

Hans Wilson had already discussed with the members of the water attribute territory and the captain of the metal attribute territory, Jin Cheng. They sent out their elite force to attack the Red Star Empire team even if they sacrificed a certain amount of development and collected fewer treasure chests. Still, they had to pay attention to defense.

Once they encountered an attack, they would immediately spread the news on the public channel chat interface. Other directions would naturally send reinforcements.

Hans Wilson glanced at the public channel chat interface. It was calm, just like before. There were only some small chats, and nothing much happened.

However, Hans Wilson also noticed that there seemed to be only a small number of players from the two teams of Alliance Number 1 chatting.

The Red Star Empire team did not say a word. They had been trying their best to defend, so they naturally had no time to chat.

As for the Land of Origin team, not many of them used the chat since the public channel chat interface was available.

Not to mention the captain, even the ordinary members did not chat.

Hans Wilson was used to this.

As for the Pan-ocean Community team, they had already been eliminated. So, they did not have the right to chat anymore.

At this moment, the public channel chat interface was a little bleak.

Hans Wilson shook his head and did not overthink it. He continued to organize the attack.

...

At the entrance of the metal attribute territory, Liu Yan and his elite team rushed over and took a short break.

Everyone understood that the Will of Tower would announce they entered the metal attribute territory. It would also mean the start of the declaration of war and the start of the attack.

At that time, it also meant that the other party would know the intentions of the Land of Origin team. They would immediately send their reinforcement to fight the Land of Origin team.

Liu Yan and the others needed to finish off the opponent's guardian beast as soon as possible before their reinforcement arrived and end this battle.

Liu Yan glanced at the few people behind him. Murong Xue, Xu Han, and the others all nodded slightly, indicating they were ready.

Liu Yan had already made the detailed arrangements for this battle in advance.

The metal attribute territory and water attribute territory were not far away, so it was unrealistic to finish the battle before the water attribute territory's support arrived.

Fortunately, the strength of the remaining members of the New Continent team was relatively limited.

Therefore, Liu Yan had reserved some members blocking the water attribute territory's support members. They did not need to defeat the opponents. They just needed to block and delay them.

This time, Murong Xue and Allen Smith were also leading the team.

Murong Xue was good at defense and could play a role in the blocking battle. She could delay the opponent for a certain amount of time.

As for Allen Smith, he was powerful and fast. He was undoubtedly the most suitable person to split up the enemy's reinforcement team members to delay them.

Liu Yan and Xu Han were in charge of leading the rest of the team members and the Undying Fire Phoenix. They needed to defeat the metal attribute territory's members and guardian beasts as soon as possible.

Among them, Xu Han led the team members to suppress the remaining members of the metal attribute territory. Liu Yan led the Undying Fire Phoenix to deal with the guardian beast of the metal attribute territory.

Seeing that everyone was ready, Liu Yan did not waste any more time. With a wave of his hand, he began the operation.

Then, the Will of Tower announced Liu Yan's team was invading the metal attribute territory.

[A total of 78 members and a guardian beast have been detected entering the metal attribute territory to declare war!]

[The Land of Origin team has declared war on the New Continent team. The battle has begun. The starting battle method is free!]

[The European Federation team is an ally of the New Continent team. They can participate in support battles!]

As the announcement sounded, it immediately attracted the attention of all parties.

In the fire attribute territory, the remaining members were extremely surprised.

They kept this operation a secret, so the other members had not been notified beforehand. Therefore, the remaining members were completely unaware of it. They only knew Liu Yan had a special operation.

He had transferred a batch of members away. However, they did not know where they were going or what kind of operation they were going to carry out.

At this moment, with the sound of the notification, these team members finally knew who the team members were. They were going to the metal attribute territory to fight.

“I was wondering why so many people were transferred to this operation. Turns out they were going to pick up a fight!”

“I thought they were going to the wood attribute territory to collect treasure chests. They were going to the metal attribute territory to fight.”

“What is Captain Liu thinking? We’re in such a good development right now. We can do nothing and just develop our strength. Why are we taking the initiative to fight?”

“Now that the main force of Alliance Number 1 isn’t here, perhaps this is an opportunity.”

“Yeah, Captain Liu must have his ideas. Trust him.”

“If we win this battle, won’t we be able to advance and even receive rewards?”

...

The members Land of Origin team were all extremely surprised.

Although many people were somewhat worried about this operation, with their previous deeds, everyone had already placed their utmost trust in Liu Yan. They were all filled with anticipation for this operation. They were looking forward to the triumphant return of Liu Yan and the others.

Chapter 355: Intense Battle

In the wood attribute territory.

The remaining members of the Pan-ocean Community team were in charge of guarding and searching for treasure chests.

After hearing the Will of Tower’s announcement, they were also surprised.

“I didn’t expect those elites would go to the metal attribute territory to battle.”

“They sure are bold. They actually dared to make a move against Alliance Number One.”

“It’s indeed an opportunity, right? After all, the main force of Alliance Number 1 is all in the earth attribute territory.”

“Let’s see if the New Continent team can hold on and wait for reinforcements.”

“If the Land of Origin team can succeed in this attack, the profits will be huge. However, if they fail, all their previous efforts will be for naught.”

“What a high-risk bet. Why do I feel it would be better for them to develop quietly and advance steadily?”

...

The members of the Pan-ocean Community team were all extremely shocked. They did not expect Liu Yan to be so bold.

Of the three factions, Alliance Number 1 was the strongest. Liu Yan actually dared to lead his team to take the initiative to declare war on the number one alliance.

Although Alliance Number 1's main force was fighting the Red Star Empire team, they had two representative teams. The remaining members in the territories were not weak either. Moreover, the elites on the battlefield might even be able to rush back to support.

At the same time, Alliance Number 1's elites, who were currently fighting in the earth attribute territory, were surprised when they heard this report.

"The people from the Land of Origin team are too evil. When we weren't fighting, they didn't dare to provoke us. Now, they only know how to ambush us."

"Our main force is here. I don't know if our rear can withstand the attacks of the Land of Origin team."

"From the report, there are only 78 members. The Land of Origin team didn't bring all of their members."

"Fortunately, we took precautions in advance. There are more than 78 members left in the water attribute territory of the metal attribute territory."

"Even if they can't beat them, their defense shouldn't be a problem."

"When we finish the battle here, we'll go back and take care of the Land of Origin team!"

...

All the members were furious, and they were full of hostility toward the Land of Origin team.

When Hans Wilson heard the announcement, he quickly opened the public channel chat interface through his smart wristband to understand the situation.

Hans Wilson typed. "Jin Cheng, what did you guys say?"

"I've already arranged for all team members to retreat to the temporary camp and defend on the favorable terrain. I'll delay and wait for your reinforcements to arrive!" Jin Cheng replied

Derek Dole replied, "I have gathered the troop. The reinforcements will set off now!"

...

Hans Wilson had a rough understanding of the situation. Fortunately, they were all on guard in advance. Therefore, when Jin Cheng of the metal attribute territory heard the Will of Tower's announcement, he stopped all the remaining members and the guardian beast. They retreated to the temporary camp and used the terrain to defend.

The vice-captain of the water attribute territory, Derek Dole, also gathered his team members and prepared to set off to provide support as soon as possible.

At first, Hans Wilson was worried about what would happen next. He wanted to pause the fight with the earth attribute territory. He felt they could not fight two forces at the same time.

But after communicating with them, they felt that the situation was not too critical.

After all, according to the Will of Tower's announcement, there were only 78 people from the Land of Origin team.

And the two representative teams of Alliance Number 1 had more members than the Land of Origin team.

The Land of Origin team sent out an elite team. On the contrary, Alliance Number 1 only had ordinary team members to defend the territory. Their strength should not be as good as the Land of Origin team.

However, they had an advantage in the number of people. They were also defending their territory, so there should not be much of a problem.

Meanwhile, the battle of Alliance Number 1's elite team in the earth attribute territory was going smoothly. They were halfway through.

If they could continue fighting for another two days, they believed they would be able to deal with the Red Star Empire team successfully. Moreover, they would not lose much of their strength and could go all out against the Land of Origin team.

It would be ideal if Alliance Number 1's elite team went back to defend their territory now. They could defend their territory.

But correspondingly, the Red Star Empire team might also join forces with The Land of Origin team.

Under such circumstances, Alliance Number 1 only could defend itself. Later, they would lose their dominance in this competition and take the initiative to attack.

After all, if the Land of Origin team and the Red Star Empire team joined forces, they would have the strength of three representative teams.

After considering it all, Hans Wilson and the others decided to take the risk and fight on both sides.

The members at the metal attribute territory would defend with all their might. On the other hand, their elite team would take down the earth attribute territory as soon as possible. After that, they would return to defend.

Although there was a certain amount of risk, the benefits were huge.

If they succeeded, they would eliminate the Red Star Empire team and suppress the Land of Origin team. They would also be able to advance to second place smoothly and receive generous rewards.

After making up his mind, Hans Wilson gave the order to continue attacking and end the battle here as soon as possible.

On the other side, in the temporary camp of the Red Star Empire team.

When members of the Red Star Empire team heard the announcement, they were all extremely excited.

Although they relied on the complicated terrain within the earth attribute territory to defend, they were facing an elite team formed by two teams from Alliance Number 1. Their strength was weaker than Alliance Number 1.

Losing the defense was only a matter of time.

After defending for more than a day, members of the Red Star Empire team were already in a miserable state.

When they learned that the Land of Origin team had launched an attack on the New Continent team, everyone was extremely excited.

“That’s great. They’re still attacking us. Now that the rear is on fire, let’s see what they can do!”

“The Land of Origin team have subdued the Pan-ocean Community team. They’re not weak either.”

“I didn’t expect the Land of Origin team to recover from the last battle so quickly. They’ve started this battle so quickly.”

“I don’t understand their motive. They’re growing steadily, so why did they take the initiative to attack Alliance Number One?”

“Who cares about them? It’s a good thing for us anyway!”

“Brothers, hold on. They’ll retreat sooner or later. Hahaha!”

...

The Red Star Empire team seemed to have seen the hope of holding on.

However, they soon discovered that the elite team of the Alliance Number 1 did not retreat. Instead, they continued to attack even more fiercely.

For a time, everyone could not understand what was going on. Alliance Number 1’s territory was under attack, but the elite team on the battlefield did not retreat. They attacked the Red Star Empire team even more ferociously.

Under this fierce attack, members of the Red Star Empire team could only defend desperately.

Fortunately, members of the Red Star Empire team saw the hope to persevere, and they started to defend even more vigorously.

The battle in the earth attribute territory became even more intense.

Chapter 356: Complex Metal Attribute Terrain

Metal attribute territory.

After Liu Yan and the others invaded, they did not encounter any resistance from the New Continent team.

According to the public chat interface, Liu Yan and the others also learned about the plans of the No. 1 Alliance. They obviously wanted the New World team to retreat to the temporary camp and gather their strength to resist Liu Yan and the others.

The remaining members of the European Federation team from the water attribute territory rushed over to support them.

The elite team from Alliance Number 1 was fighting in the earth attribute territory. It was the main force of the two representative teams. However, they did not plan to return. Instead, they continued to attack the Red Star Empire team.

After learning about this situation, Liu Yan and the rest felt much more relaxed.

“If their main force does not return, we will have lesser pressure. All we need to do is to block the water attribute territory’s reinforcements and then deal with the metal attribute New Continent team.” Chu Long could not help but sigh in relief.

Xu Han nodded and said, “Indeed, the pressure is much lesser. We are the elites of two teams. Although we have a disadvantage in numbers, our strength is stronger than those of the remaining ordinary members of their two teams.”

However, Liu Yan did not let down his guard.

In terms of strength, his side had a huge lead.

However, the opponent was on the defensive side, so they naturally had the initiative. The attacking side had to be stronger to take down the defending side.

Other than that, the offense of the earth attribute territory’s Alliance Number 1 seemed to be going relatively smoothly. From their chat, they could finish the battle in two days at most, or even in one day.

Therefore, Liu Yan could not delay for too long. He had to take down the metal attribute territory before the earth attribute territory’s battle ended.

Once Alliance Number 1’s reinforcements came, Liu Yan and the others might face the difficult situation of being sandwiched between two sides.

In the public chat interface just now, although they did not see the captains of Alliance Number 1 talking about this, it was clear they had this intention. They did not say it out loud to let Liu Yan and the others lower their guard.

Then, Liu Yan told them about this idea.

The few relaxed people just now were surprised when they heard this. They did not expect Hans Wilson to have such an intention.

“I almost forgot about this. If we are set up, we will be finished.” Xu Han said with some lingering fear.

Murong Xue was not worried. She said calmly, “That will only take one or two days. As long as we finish the metal attribute territory within this period, it will be no problem.”

“These guys are really bad. They intentionally talked about their operation on the public channel chat interface. Yet they did not talk about the whole operation. They are really insidious.” Chu Long gritted her teeth and spoke.

Liu Yan nodded slightly and said, “They have known each other before. With their tacit understanding, they do not have to say the words to let themselves understand each other. It doesn’t matter. Let’s continue to move. Get ready for your positions. Let’s end this battle as soon as possible!”

Following that, Liu Yan and the others followed their previous plan and began to split up.

Liu Yan and Xu Han led more than half of their team members and the guardian beast of the fire attribute territory, the Undying Fire Phoenix. They headed to the temporary camp of the New Continent team to gather their forces and destroy the other party as soon as possible.

As for Murong Xue and Allen Smith, they led the remaining team members and used some of them to intercept and block the reinforcements from the water attribute territory.

Although Murong Xue’s side had a small number of members, they were all elites. Their mission was only to block and delay the other party. They only needed to stall for a certain amount of time, and they did not need to defeat the other party. They only needed to use a small portion of their members to stall the opponent’s members. It would allow Liu Yan to gather their superior forces to launch a fierce attack and quickly finish off the New Continent team.

The metal attribute territory was filled with all kinds of gigantic ores. These ores contained all kinds of metals.

Many of the ores were huge like small mountains. They looked very strange.

The entire metal attribute territory was like a maze made of stone forest.

If a normal team entered this area, it would probably take a lot of time and effort to find the New Continent team.

It was especially so since these ores contained various minerals that could affect the accuracy of detection skills.

At this moment, Liu Yan tried to activate his A-grade perception skill, Omniscient Perception and discovered that it was also affected.

Usually, Omniscient Perception could sense everything within a hundred-meter radius and percept everything clearly.

Previously, during the trial on the fourth level of the Tower, even in the huge swamp of the altar of fragrance, Liu Yan could sense the tiny creatures in the mud.

However, at this moment, in this metal attribute territory, he was greatly affected.

Not only was his perception range reduced to about 80 meters, but his perception was also not very clear. The further he went, the blurrier it became.

However, this metal attribute territory was incomparably huge. Such a small perception range was of little help to Liu Yan.

At this moment, when Liu Yan was feeling troubled, Xu Han seemed to be even more troubled. After using his perception skill to sense for a while, he was still unable to find anything. Immediately, he looked at Liu Yan with a troubled expression.

“It should be a special metal in these huge ores that can affect our perception skill.” Liu Yan analyzed.

“It should be.” Xu Han nodded slightly. “This is good news for Allen Smith and Murong Xue. The terrain is complex, so it’s easy to stop them. However, it’s not good for us, so it’s even more difficult to attack. It will be more troublesome for us to find our target.”

At this moment, Xu Han was undoubtedly a little troubled.

Liu Yan’s team was racing against time, and time was of the essence. They had to end this battle as soon as possible.

However, it just so happened that they encountered this complex metal attribute terrain.

The New Continent team could defend themselves in this complex terrain. The most annoying thing was that they could not find the New Continent team even if they wanted to. It would take some time to find them.

“Liu Yan, is your perception skill not working as well? I remember that your perception skill is stronger than mine.” Xu Han still asked unwillingly.

Liu Yan nodded slightly. “I can still use it, but it has also been affected to a certain extent. This metal attribute territory is so... this little perception distance is not enough.”

“Then what should we do?” Xu Han scratched his head and said with some distress.

Liu Yan saw Xu Han’s funny expression. He could not help but laugh. “What are you worried about? I have the wind chasing Purple Falcon to scout the situation in the air. If it doesn’t work, I have Undying Fire Phoenix to scout the situation together. It can fly in the air but is not affected by the metal attribute terrain.”

When Xu Han heard this, he came to a realization. He had forgotten about this matter.

The complex metal attribute terrain also affected the perception skill. However, this was only for the ground. Undying Fire Phoenix and Purple Wind Falcon in the air were not affected.

As Liu Yan spoke, he directly released Purple Feather Falcon and Undying Fire Phoenix to scout the situation. They scouted two directions as fast as possible so they could find the location of the New Continent team.

Not long after, the corner of Liu Yan’s mouth twitched. He smiled and said, “Purple Feather Falcon found them. Follow me.”

Chapter 357: First Time Flying

When Xu Han, who was waiting, heard this, he immediately beamed with joy.

“So fast!” Xu Han said in surprise.

Then, Liu Yan and Xu Han quickly led their team members to the temporary camp of the New Continent team.

Purple Wing Falcon led the way for Liu Yan and the others in the sky.

Even if they had to travel through the maze formed by all kinds of ores in this complex metal attribute terrain, they still had a clear direction and were not lost.

Xu Han saw Purple Wind Falcon leading the way. He could not help but praise, “Not to mention, Liu Yan, your pet doesn’t have much combat strength, but it is helpful. Without it, we would be in trouble. Other people subdue fierce beasts to fight for them, but you subdue fierce beasts to send messages. You’re quite talented.”

Liu Yan laughed when he heard that. Xu Han did not know that he also had another fierce beast, Shadow Wolf, whose potential had reached SS-grade. Its combat strength was also incomparably strong.

However, Liu Yan always treated Shadow Wolf as his trump card, so he did not use it easily.

Shadow Wolf’s level was slightly lower now. It could not keep up with Liu Yan’s strength. Still, it had the potential of SS-grade, so its combat strength was unquestionable.

Later, there was an opportunity to help the Shadow Wolf raise its experience level. When its SS-grade potential was truly unleashed, it would have even more terrifying combat strength.

Under the guidance of Purple Wind Falcon, Liu Yan and the others arrived not far from the temporary camp of the New World team.

The temporary camp of the New Continent team was built in a group of ore mazes.

Moreover, it was an even more complex ore maze, and the terrain was even more complicated than before.

The New Continent team had built the temporary camp here to facilitate defense.

Even if the other teams found this place, it would still take some effort to find the location of their temporary camp.

However, Liu Yan had Purple Wind Falcon. It could see the complicated terrain clearly.

Liu Yan and Purple Wind Falcon had the same thought, so they could clearly understand the surrounding terrain.

At this moment, Liu Yan learned through Purple Wind Falcon that the New Continent team was built in the middle of these huge ore mazes for defense. It was like an impregnable small city.

“How is it? Do you know the exact location?” Xu Han could not help but ask.

Liu Yan glanced at the team members behind him. He knew the exact location, but it was not so easy to lead them there.

After thinking about it briefly, Liu Yan had an idea.

“I’ll mount Undying Fire Phoenix and lead you there. When the time comes, I’ll cooperate with Undying Fire Phoenix to fight together and get rid of the opponent’s guardian beast as soon as possible. You guys will be responsible for suppressing the members of the New Continent team.” Liu Yan instructed.

“Okay!” Xu Han replied.

Then, Liu Yan let Undying Fire Phoenix land.

When the huge Undying Fire Phoenix landed, its height reached four to five meters. Its wingspan was estimated to be over ten meters. It was incomparably huge.

At this moment, everyone realized that Undying Fire Phoenix how big when it was on the land. It looked like regular size when it was flying in the sky.

The terrifying fire attribute energy on its body attracted everyone’s attention.

As Undying Fire Phoenix landed on the ground, the surrounding temperature increased significantly. One could feel their skin burning.

Undying Fire Phoenix looked down on everyone with an arrogant expression. The arrogance in its eyes could not be hidden. When it looked at Liu Yan, its gaze was more normal as if it regarded Liu Yan as an existence of the same level.

Liu Yan did not care too much and directly walked toward the Undying Fire Phoenix.

Others were afraid of the Undying Fire Phoenix, but Liu Yan was no longer the first time he came into contact with a fierce beast with SS-grade potential. In fact, Liu Yan had a fierce beast with SS-grade potential, so he naturally had nothing to fear.

As he got closer to the Undying Fire Phoenix, Liu Yan could feel the violent fire attribute energy.

Only Liu Yan himself had an A-grade skill, Flame Control, so his resistance to the fire attribute attack had increased quite a bit.

The awakened would have been injured if they had gotten close to Undying Fire Phoenix.

The Undying Fire Phoenix did not need to do anything. It did not need to attack at all. The terrifying fire attribute energy around its body could cause a high amount of damage.

Liu Yan stood on the Undying Fire Phoenix’s back and glanced at Xu Han and the others. He shouted, “Start moving. You guys follow Undying Fire Phoenix and move forward. You will naturally find the temporary camp of the New Continent team. Everything will proceed according to plan!”

“Yes!” The team members replied one after another.

Following that, Undying Fire Phoenix cried, and the Undying Fire Phoenix directly brought Liu Yan High into the sky.

Liu Yan, who had experienced flying for the first time, immediately felt it was extremely novel.

Liu Yan had the S-class skill Sonic Speed, so his speed was fast. But this was the first time he experienced flying in the sky.

Liu Yan still could not fly on his own.

Liu Yan remembered what Principal Zhong Yuntian had mentioned to him. Only a top expert, who had reached a certain level of strength, could fly.

Of course, some special skills allowed the users to fly.

For example, one could fly freely by using the law of wind attribute.

Liu Yan still had a long way to go. He was only on the fifth level of the Tower, which was far away from the tenth level.

On the contrary, he was relatively close to the wind attribute.

Liu Yan had grasped the wood attribute secret art. If he had the chance in the future, he could use the Divine Extraction to master the wind attribute law.

With Divine Extraction, Liu Yan could grasp secret arts and laws easily. He did not need a lot of time to cultivate and comprehend. He just needed a better luck.

Soon, Liu Yan retracted his thoughts. He did not think about what to do next and just acted immediately.

Undying Fire Phoenix took Liu Yan and flew to the sky above the temporary camp of the New Continent team.

Xu Han and the others immediately knew where they were heading. They hurried to fly in this direction.

At this moment, in the temporary camp of the New Continent team. The members of the New Continent team were preparing to defend. They also noticed the scene in the sky.

“Look! There’s a fire phoenix. It’s so powerful!”

“What fierce beast is that? It looks so mighty!”

“It’s the Undying Fire Phoenix, The guardian beast of the fire attribute territory. The Land of Origin team is here!”

“How did they find us so quickly? This is bad.”

“I thought they would only find us at noon or even at night. I did not expect them to find us so quickly.”

“Their guardian beast is a flying-type guardian beast. It can find us directly. Scouting in our metal-attribute territory is not a big deal to them.”

...

For a moment, the members of the New Continent team were a little flustered. The terrain in their metal attribute territory was like a maze-like mining array. It could stall their enemies for a period. However, it was useless at this moment.

Hence, their plan to delay their enemies was undoubtedly much more difficult.

Chapter 358: Turning the Tide

Metal attribute territory.

Xu Han led a group of team members. They followed the guidance of Liu Yan and the Undying Phoenix to bypass many huge ore hills. After passing through the complicated ore maze, they arrived in front of the temporary camp of the New Continent team.

The temporary camp of the New Continent team was built with a few huge ores nearby. After making up for the small distance between the ores, the temporary camp and the few huge ores formed a small city.

The city was not too big. It should not be much of a hindrance to the awakened ones.

However, all the remaining members of the New Continent team were gathered here.

Their firepower became denser with their strength gathered in a smaller defensive area.

If Xu Han and the others wanted to attack the small city, they would be affected by the huge ores. The path would be narrower, and there would be fewer awakened ones who could charge forward at the same time.

On the contrary, the New Continent team could use their skill to attack Xu Han's team. Charging forward came with deadly risk. Naturally, it was disadvantageous for Xu Han and the others.

"What do you say? Should we charge directly?" Zheng Tainan asked with a slight frown.

In such a terrain, charging was disadvantageous for them.

However, time was of the essence. Their mission was to quickly suppress the New Continent team and coordinate with Liu Yan and the Undying Fire Phoenix in the sky. They could not waste any time.

Liu Qing also said with some difficulty, "Our overall combat strength is stronger than theirs, but we can't use it at all. It's not an ideal situation for us to attack."

"Why don't we think of another way? But we can't delay it." Liu Ning said helplessly.

Xu Han frowned slightly. After thinking for a while, she had an idea.

"Our mission is to suppress them, not to attack." Xu Han looked around and said, "Those with long-range skills climb the nearby ores. Those without long-range skills climb the huge ores in front of us. We don't need to charge. We'll use long-range attacks to suppress them on the ores and force them to stay in the small city. That's enough to suppress them. We can support and coordinate with Liu Yan and the Undying Fire Phoenix in the sky!"

When everyone heard Xu Han's words, their eyes lit up. This way, the pressure on them would be much less.

They only needed to climb the ore to attack from a distance. Xu Han's team did not need to charge forward and risk their lives.

The strength of Xu Han's team members was not bad. However, if they charged forward, they would undoubtedly face the intense attacks of many members of the New Continent team. It was not a wise tactic.

Very quickly, all of the team members climbed the nearby huge ore.

Those with long-range attack skills were on the ore further away.

Those without long-range skills or strong attack skills went to the nearby giant ore to attack and defend. They cooperated with the long-ranged attack team members behind to suppress it.

Not long after, all the team members were on the ore. The overall formation formed an arc and surrounded the temporary camp of the New Continent team.

At the same time, in the temporary camp of the New Continent team, when the team members saw the movement of the Land of Origin team, they were a little puzzled.

"If they don't attack, what do they want to do by climbing the ore around them?"

"All of them were on the ore. I don't understand them."

"Didn't they want to seize the time to attack us?"

"That's right. If they don't fight for a while, our support will arrive. Then, we will be able to surround them."

"Are they afraid of casualties and not charging? Hahaha!"

"So many people don't dare to charge. What a joke."

...

The members of the New Continent team made all sorts of guesses and teased the Land of Origin team.

The current situation was disadvantageous to the New Continent team. The team members also understood they were small in number and weak in strength. However, they had the perfect terrain to defend. All they needed to do was to delay and wait for reinforcements.

Once the reinforcements arrived, they would be much more relaxed and could even counterattack.

Moreover, the Land of Origin team did not forcefully attack, which made them much more relaxed.

Jin Cheng looked around at this time. Soon, he found that the Land of Origin team formed an arc and surrounded them.

Although the distance was not too close, it was not too far either. It was precisely the range that a normal long-range attack could cover.

Jin Cheng looked at the Undying Fire Phoenix and Liu Yan in the sky and immediately realized something was wrong.

Usually, the large army on the ground would attack directly, and the Undying Fire Phoenix in the sky would provide support.

However, there was still Liu Yan on the Undying Fire Phoenix. The combination of the Undying Fire Phoenix and Liu Yan's attack was powerful.

Liu Yan and Undying Fire Phoenix would directly provide support on the ground to suppress them. At the same time, they could carry out the main attack.

These people climbed the ore. Although they did not launch a forceful attack, they immediately gave them more pressure.

Jin Cheng immediately realized the seriousness of the situation.

"Quick, everyone attacks from afar. Don't let the opponents gain a foothold on the ore!" Jin Cheng hurriedly ordered.

When members of the New Continent team heard this, they were a little confused. They were small in number and weak. They just needed to defend themselves properly.

In such a situation, shouldn't they conserve their strength and try to stall for time? Why were they taking the initiative to attack now?

However, when they heard their captain Jin Cheng's urgent order, the members did not dare to disobey. They quickly began to attack.

The archer immediately took out his bow and arrow and began to attack.

The rest of the team members also began to cast spells to carry out long-range attacks.

However, it was already too late.

The members of the Land of Origin team were already prepared.

Seeing this, Xu Han directly gave the order to attack.

The warriors and tanks at the front were defending.

The members at the back were launching long-range attacks.

The Land of Origin and team the New Continent team immediately crossed fire.

Although the New Continent team had a small city, they could only provide some cover. It was not of much use.

On the other side, the Land of Origin team had warriors defending the attacks. They were not at a disadvantage.

However, whether it was the number of people or individual strength, there was a big gap between the two sides.

The situation quickly became one-sided. The New Continent team was suppressed to the point they had no time to rest. They could only rely on the city to continue their defense.

Although the Land of Origin team could not push further, they had successfully suppressed their opponent under the city, making it difficult for them to show themselves.

The goal of suppressing the New Continent team was achieved.

In the sky, Liu Yan was sitting on the Undying Fire Phoenix. He witnessed this scene with his own eyes.

Although Liu Yan was in the sky, he had the SS-grade skill, Extraordinary Five Senses, which had already greatly enhanced his vision. Even from such a distance, he could still see everything.

Liu Yan was satisfied seeing his team had suppressed the New Continent team. The New Continent had no choice but to use defensive skills to defend their small city. They were already trapped in the small city.

Especially when he saw the suppressive battle plan of Xu Han and the others, Liu Yan secretly praised them in his heart.

Chapter 359: The Powerful of Undying Fire Phoenix

Liu Yan was high in the air. He had already observed the situation on the ground.

Although the New Continent team was only a few remaining members, their strength was no match for the Land of Origin team.

However, their strength was not weak either. Moreover, the New Continent team was in a small city, so they undoubtedly had an advantage in defense.

Xu Han and the others were much stronger. However, they would suffer serious losses even if they managed to take down the city. It was not worth it.

However, Xu Han changed his method. He climbed onto the huge ore in the surroundings and surrounded the small city in an arc. Instead of attacking forcefully, he used long-range attacks to suppress the New Continent team.

As a result, Xu Han's team the dominance in the battle from the passive position.

The New Continent team wanted to fight with Xu Han and the others from a distance. It was obviously unrealistic.

Xu Han and the others had completed their mission. Now, it was Liu Yan's turn.

Liu Yan had already found the figure of the metal attribute territory guardian. From its appearance, it was a tiger-shaped creature. However, its body was much larger, and its entire body was glowing with a golden light.

Liu Yan hurriedly checked its information through his smart wristband.

[Golden Tiger]

Potential: SS

Level: 60

...

Its grade was too high, so he could only see the general information. This situation had happened before.

However, Liu Yan also understood that its strength and grade were about the same as the other guardian beasts. It was just a metal attribute creature.

Liu Yan had little contact with metal attribute creatures, so he did not have much combat experience with one.

However, Golden Tiger was a ground creature. From its appearance, it was more of a close-combat creature and did not have much long-range attack power.

Meanwhile, the Immortal Fire Phoenix was soaring high in the sky. It had long-range attack power and was undoubtedly a great counter to Golden Tiger.

Liu Yan then looked at Xu Han and the other team members. They were still attacking the New Continent team smoothly. They had successfully suppressed the members of the New Continent team. The New Continent team was forced to rely on temporary camps and various defensive skills to defend themselves. They were in a passive position.

At this moment, it was time for Liu Yan and the Undying Fire Phoenix to take the stage.

Liu Yan immediately had the Undying Fire Phoenix launch an attack, using its full strength to attack the opponent's guardian beast, Golden Tiger. As for the rest, he would leave it to Liu Yan to deal with.

Hearing Liu Yan's order, the Undying Fire Phoenix swooped down and arrived above Golden Tiger. It immediately spat out a mouthful of flames.

Even Liu Yan, who possessed grade-A skill Flame Control, could feel pressure from the flames.

After all, it was an SS-grade fire attribute fierce beast, and its attacks were incomparably powerful.

Under the enormous flames, Golden Tiger had no time to dodge and was directly hit.

As the flames subsided, Golden Tiger did not receive too many injuries but had some light injuries.

Seeing this, Liu Yan was also a little surprised. Under such a terrifying attack, Golden Tiger only received some light injuries. Its defense was almost impeccable.

However, Liu Yan was not worried. No matter how strong Golden Tiger's defense was, it could not completely block off Undying Fire Phoenix's attack. It would still be injured. If Golden Tiger kept getting attacked by Undying Fire Phoenix, it would be a matter of time before it collapsed.

"Continue to attack until Golden Tiger surrenders!" Liu Yan ordered the Undying Fire Phoenix to continue to attack.

Then, Undying Fire Phoenix continued to attack fiercely.

Golden Tiger on the ground bared its teeth and continuously roared. Its roar spread throughout the world, shocking everyone. It caused the members of both sides a lot of pressure.

However, the only thing Golden Tiger could do was to be angry and use its defensive skill to try to block Undying Phoenix's attack. There was no room for a counterattack, and it could only take a beating.

If this continued, Golden Tiger would not hold on eventually.

When Xu Han and the others saw this, they were excited. Their battle had undoubtedly been a success.

They had successfully suppressed the New Continent Team. However, they could not interfere or help in the battle between Golden Tiger and the Undying Fire Phoenix.

Although Golden Tiger was powerful, it was restrained by Undying Fire Phoenix and could not fight back.

If this continued, it would not be long before they could finish Golden Tiger. They would naturally be able to obtain victory.

"That's great. Captain's attack went very smoothly."

"Golden Tiger is powerful. Even under the attacks of Undying Fire Phoenix, it can still withstand it."

"No matter how powerful it is, it will still be countered by Undying Fire Phoenix. It won't take long before it collapses."

"Haha! Victory is within our grasp!"

"I didn't expect the battle to go so smoothly. We didn't even do anything yet, and we are winning."

...

When Xu Han saw this, he shouted happily, "Jin Cheng, aren't you going to lead your team members to surrender? If you don't surrender, we'll burn you to death after we finish Golden Tiger. If you surrender earlier, we'll treat you well. Otherwise, don't blame us for being merciless!"

Hearing this, Jin Cheng was so angry that he gritted his teeth, but there was nothing he could do.

Jin Cheng did not expect the situation to be so bad.

Initially, Jin Cheng thought that although the opponent was strong, they could use the complex terrain of the metal attribute territory to defend and delay for a while.

As long as they delayed until the support team from the water attribute territory arrived, their pressure would become lesser and have a chance to counter the encirclement.

It was indeed the case. Although Xu Han's team was strong and could suppress the New Continent team, it would be difficult for them to break into the New Continent team's temporary camp. They could not do so in a short period.

The New Continent team could drag the battle until the water attribute territory's support arrived. They could even delay until Alliance Number 1's elite team returned to support them after the battle with the Red Star Empire team.

However, Jin Cheng did not expect that his opponent's guardian beast, the Undying Fire Phoenix, was a flying creature. It completely countered their guardian beast, Golden Tiger.

Golden Tiger was a fierce beast with a strong metal attribute. Its close combat ability was terrifying, and its defense was also strong. However, it could not fly. It was a ground creature, and it did not have long-range attacks. Hence, it was countered by Undying Fire Phoenix completely.

If they were to cooperate in a regular battle, they could still help Golden Tiger. Their team members could use long-range attacks to help Golden Tiger attack Undying Fire Phoenix.

However, at this moment, they were suppressed by the opponent's team members and were forced to defend passively. They could not get up and leave, let alone help Golden Tiger.

Jin Cheng understood that if the battle dragged on, no matter how strong Golden Tiger's defense was, it would eventually be unable to hold on.

Once Golden Tiger was defeated, their team would also face the risk of being eliminated. All their previous efforts would be in vain.

Jin Cheng finally understood why Liu Yan and the others dared to launch such a direct attack. It turned out that they had the support of the Undying Fire Phoenix. They did not need to take down their temporary camp at all. They only needed to take care of their guardian beast.

Jin Cheng understood the urgency of the situation and could not hold on any longer. Jin Cheng hurriedly gave the order to mobilize a few members who were good at long-range attacks to help Golden Tiger despite the powerful attacks of Xu Han and the others. At the same time, Jin Cheng also hurriedly contacted his allies through the public channel to see when the reinforcements would arrive.

Chapter 360: Double Offense

Public channel chat interface.

Jin Cheng urgently contacted the captain and vice-captain of the European Federation team, requesting support.

Jincheng: Where is the support? We can't hold on much longer. The opponent's guardian beast is a flying guardian beast, completely suppressing our guardian beast, Golden Tiger.

Hans Wilson: You guys were able to delay time by relying on the terrain defense. Why are you guys losing now?

Jin Cheng: I really can't do anything about it. The other team members are suppressing us. Undying Fire Phoenix is attacking Golden Tiger. There's nothing I can do.

Derek Dole: I've already reached the metal attribute territory. Support will arrive soon. Hold on a little longer!

Hans Wilson: That shouldn't be a problem. Think of a way to hold on a little longer!

...

When Jin Cheng learned that the remaining members of Derek Dole from the water attribute territory had already arrived at the metal attribute territory. Their allies would be able to provide support very soon. Jin Cheng was instantly relieved.

The New Continent team had no way to deal with the current situation. They were suppressed by the Land of Origin team in the battle. Golden Tiger also had no way to use its strength. It could only passively take a beating from Undying Fire Phoenix in the sky.

Fortunately, Golden Tiger was a fierce beast with a strong metal attribute. Its defense was strong. Even if it resisted Undying Fire Phoenix head-on, it could still hold on for a while.

As for the reinforcements, they would arrive very soon.

As long as the reinforcements arrived, all the problems would be solved. Not only could they get out of the predicament, but they would also have a chance to turn the situation around.

Jin Cheng immediately calmed his subordinates and told them to endure for a while. If they could hold on for longer, the reinforcements would arrive.

At the same time, a few members from Jin Cheng had already arrived beside Golden Tiger and were attacking Undying Fire Phoenix.

These few members were the ones who were good at long-range attacks among the remaining members. They were already the most manpower that Jin Cheng could spare.

If Jin Cheng transferred more team members, the rest would not even be able to defend themselves against Xu Han and the others.

The difference in strength between the two sides was too great. The New Continent team had a lot of pressure.

Luckily, they had the complex terrain of the metal attribute territory and the sturdy small city formed by the temporary camp. Otherwise, they would have been flattened long ago.

Liu Yan was sitting on Undying Fire Phoenix. He used his SS-grade skill, Extraordinary Five Senses, to see the situation on the ground.

When he saw the few subordinates that Jin Cheng had dispatched moving in this direction, Liu Yan had already guessed their purpose and had made preparations.

Liu Yan took out Flying Cloud Mystic Bow and reminded Undying Fire Phoenix to focus on attacking Golden Tiger. He did not need to care about anything else. Liu Yan would help it settle everything.

Before the few members of the New Continent team got close, Liu Yan had already picked up Flying Cloud Mystic Bow and nocked an arrow. His B-grade skill, Ultimate Aim, and his C-grade skill, Wind Control, were activated. Wind elements surged and condensed into a few arrows.

Continuous Arrows!

Liu Yan instantly shot out a few arrows consecutively, speeding toward the members of the New Continent team.

Even though the arrows were very far away, they still hit the targets accurately under the effect of the Ultimate Aim. They accurately hit the front of the members of the team. The wind elements immediately erupted, blasting a few small holes in the thick metal attribute ground.

The members of the New Continent team were instantly panicking. They hid behind the huge ore beside them and looked at Liu Yan, who was on the Undying Fire Phoenix in the sky, with fear on their faces.

If they had been one or two steps faster, those arrows would have accurately hit them.

The arrows could create small holes in the ground. If those arrows had hit them, they would have died or been seriously injured.

The speed, accuracy, and power of these arrows had directly shocked these team members.

“Who is this person? Why is he so fierce?”

“It should be the captain of the Land of Origin team, Liu Yan. Previously, I saw someone chatting on the public channel. Liu Yan’s archery skills are good.”

“D*mn. It’s Liu Yan. Is he the one who single-handedly defeated the guardian beast of the wood attribute territory?”

“What should we do? Not only is Undying Fire Phoenix’s long-range attack ability strong, but Liu Yan’s long-range attack ability is also so strong.”

“We can’t help Golden Tiger even if we charged forward. We will die here.”

“Yeah. We almost die here.”

...

A few of the team members looked panicked. After hesitating, they felt they could not handle it. Hence, they went back to Jin Cheng to explain the situation.

At the same time, Liu Yan was on the back of the Undying Fire Phoenix. He saw that these team members were retreating, so he put down Flying Cloud Mystic Bow.

Liu Yan intentionally missed those arrows just now.

If Liu Yan wanted to, he could completely activate his A-grade skill, Track. Even with such a long-distance skill, he could still accurately hit the target. Liu Yan did not need to condense wind elemental arrows at all. He could condense fire or ice arrows, which had even more terrifying. One arrow could directly take the lives of these team members.

1

However, Liu Yan knew he did not have to do this far. Although this was a battle, they were all members of the New Continent team. They were all humans from the Blue Planet. They only represented the interests of different parties.

Liu Yan would not take their lives if it were not necessary.

In any case, after Undying Fire Phoenix dealt with Golden Tiger, team members of the New Continent team would all be eliminated. After that, they would not affect Liu Yan's interests.

Without the interference of these members, Undying Fire Phoenix could continue to attack Golden Tiger without worry.

All kinds of flames kept falling on Golden Tiger.

No matter how strong Golden Tiger's defense was, it would not last long.

Liu Yan observed the situation on the ground. Xu Han and the others were still completely suppressing Jin Cheng and the others. It was relatively smooth, and they did not need his help.

Liu Yan did not have anything else to do at the moment. So, he joined in and attacked Golden Tiger with Undying Fire Phoenix.

Liu Yan observed for a while. The fire attribute attack of Undying Fire Phoenix was indeed more powerful than his. If he continued to use the fire arrow attack, the effect would probably not be ideal.

After all, the powerful fire attribute attack of Undying Fire Phoenix landed on Golden Tiger, and the effect was relatively average.

Although they could defeat Golden Tiger, it would probably take quite some time.

As he was thinking, Liu Yan's eyes suddenly lit up. He had the A-grade skill, Frost Control. An ice attribute attack and a fire attribute attack were two opposite attributes. Frost was not incompatible with fire and water.

However, if he combined fire and water, it might have an unexpected effect.

An attack that combined fire and ice might be able to defeat Golden Tiger even faster.

Thinking up to this point, Liu Yan once again raised his S-grade weapon, Flying Cloud Mystic Bow. He activated his A-grade skill, Frost Control, and the frost element condensed into several arrow feathers.

Activating his S-class skill, Power of the Earth, Liu Yan's strength instantly received a significant increase. Liu Yan pulled Flying Cloud Mystic Bow to the shape of a full moon, and its power doubled.

Immediately after, an arrow was shot out!
