

## Towers 361

### Chapter 361: Ice and Fire Attacks

Liu Yan's terrifying arrow shot out and hit Golden Tiger.

Golden Tiger's body had already been heated up by Undying Fire Phoenix's powerful fire attribute attack. On the contrary, Liu Yan was full of frost elements.

Ice and fire intersected and instantly produced an even more terrifying power. Golden Tiger's injuries worsened quite a bit.

Golden Tiger was not afraid of high temperatures, nor was it afraid of low temperatures. Its body's defense was sturdy as a diamond.

However, it had to experience two extreme temperatures. Under the two layers of ice and fire, it could not take it anymore.

Golden Tiger glared at Liu Yan and roared, but it could not do anything to Liu Yan.

Golden Tiger was the king of the ground. However, it had no chance when facing the attack of Undying Fire Phoenix and Liu Yan in the sky.

Liu Yan saw that this arrow was useful and immediately confirmed his guess.

It seemed that the combination of ice and fire could cause greater damage.

Immediately, Liu Yan shot arrow after arrow filled with frost element, causing Golden Tiger to continuously Dodge.

Seeing that Golden Tiger dodged his attack, Liu Yan immediately activated his A-grade Track. It made Golden Tiger impossible to dodge.

From time to time, Liu Yan would also activate his A-grade skill, Electrification. He used electric attribute arrows to cause even greater damage.

After this battle, Liu Yan also discovered that the various attributes were intermingled with attacks. They produced astonishing chemical reactions, erupting with even more terrifying might.

Especially when dealing with a fierce beast like Golden Tiger, which had a strong defense, the effects were even more unimaginable.

Under the powerful attacks of Liu Yan and Undying Fire Phoenix's fire attribute, frost attribute, and electric attribute, the injuries on Golden Tiger's body were getting worse. The effects of the attacks were significant. It seemed Golden Tiger would not be able to hold on for long.

At this moment, in the temporary camp of the New Continent team, Jin Cheng had just heard the reports of a few of his subordinates who had returned.

After learning of the situation, Jin Cheng did not blame them.

With Liu Yan's powerful long-range attacks in the air, these few New Continent team members could not help Golden Tiger. They would die if they tried to help Golden Tiger.

Jin Cheng did not know Liu Yan, nor had he come into contact with Liu Yan. He did not understand Liu Yan's strengths.

However, he had heard rumors about Liu Yan in the past few days.

Liu Yan's long-range attacks were powerful. He was the number one genius of this batch of students in the Land of Origin. His combat strength was terrifying.

It was hard to confirm the authenticity of these rumors. However, the Will of Tower announced Liu Yan had single-handedly participated in a duel and defeated the guardian beast of the wood attribute territory, Sturdy Back Ape. It had confirmed the rumors.

Liu Yan could defeat the guardian beast single-handedly. Even Jin Cheng could not understand just how strong Liu Yan was.

Jin Cheng was undoubtedly a genius among geniuses as the captain of the New Continent team.

However, even if Jin Cheng were to face the guardian beast single-handedly, Jin Cheng felt that he had no chance of winning.

Jin Cheng looked at his subordinates helplessly. He said, "Forget it, it's not your fault. You guys can stay here and continue to defend. Let Golden Tiger defend itself first. Anyway, the remaining members of the water attribute team led by Derek Dole have just arrived at the entrance of the metal attribute territory. It won't be long before reinforcements arrive. It shouldn't be a big problem for Golden Tiger to hold on until then."

However, a team member hurriedly reported, "Not good, captain. Just now, in the public channel chat interface, Derek Dole said that they encountered hindrance and harassment from the Land of Origin team. They might not make it in time!"

This team member had just listened to Jin Cheng's orders and paid attention to the public channel chat interface. He wanted to obtain information on Hans Wilson and Derek Dole's situation as soon as possible. When he received the latest news, he immediately reported it.

When Jin Cheng heard this, his expression changed.

"What?"

Jin Cheng hurriedly took a look at himself and suddenly felt a headache.

According to Derek Dole, they had encountered harassment and obstruction from members of the Land of Origin team.

Although the opponent did not seem to have many people, they were powerful and injured several of their team members as soon as they made a move.

If Derek Dole did not care and continued to move forward, there was a high possibility of heavy casualties. At that time, even if reinforcements arrived immediately, the remaining members would not be able to surround the elite team of the Land of Origin team. Their strength was not enough.

Now, Derek Dole could only lock down the formation and continue to move forward while dealing with obstructions and harassment. This way, they could reduce the casualties while waiting for the reinforcement.

However, he believed that he would need more time.

Jin Cheng felt helpless.

If they were in an empty terrain, Derek Dole's team would not need to fear the attacks and harassment of the small squad of the Land of Origin team. However, this metal attribute terrain was too complicated to move around. They could only spend more time reaching their destination.

Jin Cheng could not help but look at Golden Tiger on the other side. He could only hope Golden Tiger's defense was strong enough to hold on for a little longer until Derek Dole's reinforcements arrived.

However, it would be fine if he did not look at it. When he saw Jin Cheng, he was immediately shocked.

Golden Tiger, which could still hold on for a long time after facing the powerful attack of Undying Fire Phoenix, was now covered in wounds.

Golden Tiger could no longer withstand the attacks of Undying Fire Phoenix head-on. At this moment, it was continuously dodging.

Unfortunately, the attack range of Undying Fire Phoenix was wide. The Golden Tiger was only in a small area, so it was difficult to dodge.

At this moment, a frost arrow was shot out. The arrow feather in the air slightly adjusted its angle. It finally hit the Golden Tiger accurately.

Just as this arrow hit the target, another terrifying electric attribute energy was shot out toward Golden Tiger.

Seeing this scene, Jin Cheng immediately understood what happened. His face turned pale.

"If it was just Undying Fire Phoenix's attack, Golden Tiger could still hold on for a while with its powerful attack. Now, Liu Yan has joined in the battle. He used ice attribute and electric attribute attacks. There are many kinds of elements mixed with the attack. Golden Tiger can't hold on any longer. If the attack does not stop, Golden Tiger won't be able to hold on until the reinforcements arrive!" Jin Cheng said with an angry face.

"What should we do? The reinforcements won't arrive for a while. We can't do anything to Undying Fire Phoenix and Liu Yan either."

"Yeah, we're already tired of dealing with the attacks of the other members of the Land of Origin team. How can we have the energy to help Golden Tiger deal with Undying Fire Phoenix and Liu Yan?"

"This Liu Yan's long-range attack ability is too terrifying. Even Golden Tiger can't block it."

“Although Liu Yan’s attack is strong, it should not be able to injure Golden Tiger normally. It’s his multiple attribute attacks that injure Golden Tiger.”

“Are we going to be eliminated just like this?”

...

The few members beside him immediately had despair on their faces. Even though they were the cream of the crop among the New Continent team’s current batch of students, they were helpless in this hopeless situation. The difference in strength between the two sides was too big. The strength of the team members and of the guardian beast was weaker, so they had no room to retaliate.

### **Chapter 362: Prison of Giant Trees**

Jin Cheng looked at the current predicament with a helpless expression.

As a genius among geniuses, Jin Cheng was talented and hard-working. He did not have many obstacles when growing up.

Since entering the world of Tower, Jin Cheng had never encountered such a desperate situation.

His team members were no match for the opponent even though they had terrain advantages. They could only passively defend.

1

Their guardian was also no match for the opponent.

Initially, Golden Tiger could still hold on for a while. However, it could not hold on for too long against the powerful and terrifying Liu Yan.

Moreover, their reinforcement was also blocked by the opponent. Their reinforcement could not help them in time.

Jin Cheng looked at Golden Tiger and could only helplessly order. “Golden Tiger, you don’t have to care about us anymore. Run and hide in the metal attribute territory until the main force arrives. Protect yourself first!”

It was Jin Cheng’s last resort. If Golden Tiger continued to stay here, it would only be defeated, and their entire New Continent team would be eliminated.

At least Golden Tiger could save itself if it ran away.

However, Liu Yan and Undying Fire Phoenix might follow Golden Tiger and attack it.

Jin Cheng and the other team members were already reluctant to face the attacks of Xu Han and the others.

If Liu Yan and Undying Fire Phoenix joined in, Jin Cheng and the others would not be able to hold on. They would be eliminated very quickly. However, it was better than the elimination of the entire team.

If only Jin Cheng and the others were eliminated, the other members of the New Continent team in the earth attribute territory could still fight.

When the members of Jin Cheng's team heard this, they all felt hopeless. They were frustrated, but they knew this was their only choice. They could only sacrifice themselves to protect Golden Tiger and the other members of the New Continent team. This way, their team could continue the competition and represent the New Continent at the higher levels of the Tower.

Golden Tiger was constantly dodging the attacks of Liu Yan and the Undying Fire Phoenix. When it heard Jin Cheng's order, it turned around and headed in another direction. It was going to leave the temporary camp of the New Continent team and hide in the metal attribute territory.

However, Liu Yan would not let the Golden Tiger escape.

Liu Yan could see that Golden Tiger's speed was fast. It was just that it had never left the temporary camp of the New Continent team.

Golden Tiger entered the metal attribute territory with its terrifying speed. The complex terrain of the metal attribute territory could cover its track. Hence, it would be harder to catch Golden Tiger.

Liu Yan hurriedly activated the A-grade skill he had just obtained, the Prison of Giant Woods.

The power of the wood attribute surged forth, immediately enveloping Golden Tiger.

The wood attribute condensed, and a big cage appeared. It trapped Golden Tiger.

Seeing this, Golden Tiger immediately charged forward.

Under immense power, the Prison of Giant Trees trembled. However, Golden Tiger was bounced back to its original position.

Liu Yan's eyes instantly lit up when seeing this scene. This Prison of Giant Trees was indeed useful. Liu Yan continued to gather the surrounding wood attribute power, strengthening the Prison of Giant Trees.

Golden Tiger continued to collide, but the terrifying power seemed to have hit cotton.

No matter how powerful the power was, it was useless. It was dispersed by the huge wooden prison and bounced back.

Liu Yan immediately understood the wood attribute was gentle and not as fierce as the fire attribute and metal attribute. Still, it could overcome fierce attacks with softness.

The A-grade Prison of Giant Woods could easily restrain the powerful Golden Tiger.

Although the Prison of Giant Wood was only an A-grade skill, it was a skill that Liu Yan had awakened from wood attribute secret art. It had a great boost to its power, so it was far stronger than ordinary A-grade skill.

Prison of Giant Woods had restrained Golden Tiger. Golden Tiger had nowhere to run.

Liu Yan and Undying Fire Phoenix continued to attack Golden Tiger.

During the attack, Liu Yan realized that the Prison of Giant Trees was only useful to Golden Tiger.

The attacks of Liu Yan and Undying Fire Phoenix were not affected by the Prison of Giant Trees at all. He could hit Golden Tiger from the outside. There was no conflict between Liu Yan and the Undying Fire Phoenix's attack and Prison of Giant Trees.

Liu Yan immediately felt relieved. This time, he could finally deal with Golden Tiger steadily. At the same time, this operation finally succeeded.

On the ground, when Xu Han and the other team members saw the situation, they were instantly excited.

"Well done, lock it up and fight it. Hahaha!"

"This golden tiger is too unlucky. It could only keep getting attacked by Undying Fire Phoenix in the air. Now, it can't even run away."

"I didn't expect Captain Liu Yan to have such a powerful restriction skill. I feel like he knows all kinds of powerful skills."

"Yeah, our captain is comprehensive. He's powerful in all aspects!"

...

Xu Han heard the discussion of the team members below and felt the same way.

Xu Han only knew Liu Yan for a few days.

However, after interacting with Liu Yan for the past few days, Xu Han felt that Liu Yan was indeed strong. He was ridiculously powerful and had no upper limit. He was capable in all aspects and did not have the slightest weakness.

Xu Han shook his head slightly. Luckily, Liu Yan was on his side. It would give him a headache if Liu Yan were his opponent.

When He Yang saw this scene, he could not help but sigh. "Now, it seems that our Pan-ocean Community team lost to you guys. We can only blame ourselves for losing to Liu Yan."

At this moment, He Yang was somewhat relieved.

Compared to the cheers and laughter of members of the Land of Origin team, the members of the New Continent team were filled with despair when they saw this scene.

They had been passively defending against the suppression of the Land of Origin team and were aggrieved. They had let their guardian beast, Golden Tiger, escape. But in the end, Liu Yan captured it.

When Jin Cheng saw this scene, he sighed helplessly.

At this point, Jin Cheng had completely lost hope. He could not see any hope and could not think of any way to break out of this situation.

Jin Cheng still had some doubts. Even if those reinforcements could arrive, would they be able to solve the current situation?

The team led by Xu Han was powerful. They could suppress the New Continent team without using their full strength.

Even if those reinforcements arrived, they might still face the risk of being eliminated.

At this moment, Jin Cheng regretted attacking the Red Star Empire team. They should have kept their main force in their territory. This way, they could have fought against Liu Yan's Land of Origin team. In addition, with the powerful ally of the European Federation team, they had a great chance of advancing.

However, it was too late to say anything at this moment. Golden Tiger was restricted by the Prison of Giant Trees. It could not break free and escape. There were wounds all over its body, and it seemed it would not be able to hold on any longer.

### **Chapter 363: Victory Once Again**

Metal attribute territory.

In the sky above the New Continent team's temporary camp, Liu Yan and Undying Fire Phoenix were attacking Golden Tiger in the Prison of Giant Woods.

Fire attribute, frost attribute, and electric attribute attacks continuously surged toward Golden Tiger.

Although gold was not afraid of fire, Golden Tiger was still a living creature. Moreover, it needed to withstand the intense attacks of three attributes, but it could not hold on.

On the other side, the members of the New Continent team were also powerless to resist. They could barely defend themselves against the attacks of Xu Han and the other team members, so they had no strength to help Golden Tiger.

Golden Tiger was already severely injured. It was already a little difficult to fight.

If they continued to attack, Golden Tiger would be beaten to death.

On the other side, Jin Cheng saw this scene and could not stand it anymore. Golden Tiger had fought for them for a while.

At this time, defeat was unavoidable. Jin Cheng knew that the New World team could not escape the fate of being eliminated.

Even if the reinforcements led by Derek Dole arrived, it was useless.

If they did not want to be eliminated, only the Alliance Number 1's elite team led by Hans Wilson could save them.

However, there was no fire close to the water. Alliance Number 1's elite team would not be able to arrive in time.

Since they were going to be defeated, Jin Cheng did not want to see meaningless casualties. Golden Tiger had already sacrificed enough for them. They would not stand by to watch Golden Tiger die for them.

Thinking of this, Jin Cheng hurriedly shouted, “Golden Tiger, there’s no need to resist. You’ve already sacrificed enough for us. Surrender!”

When the Golden Tiger heard Jin Cheng’s words, it still roared unwillingly as if it did not want to surrender.

When Jin Cheng saw this, he said firmly, “Golden Tiger, as the leader of the metal attribute territory, I order you to surrender immediately. You cannot disobey my orders!”

Golden Tiger wanted to die rather than surrender. However, it did not dare to disobey Jin Cheng’s order. It could only obey. It lowered its stubborn head towards Liu Yan in the sky, indicating that it was surrendering.

Liu Yan stopped and had the Undying Fire Phoenix stop attacking.

Then, Liu Yan looked at Jin Cheng and shouted, “Captain Jin, does your team want to continue fighting with us, or do you want to surrender? Although we are from different teams, different camps, and different continents, we are all humans of the Blue Planet. I hope you can surrender!”

Jin Cheng’s face was filled with unwillingness. He did not expect to miss out on such a great opportunity. Initially, they had a high chance of becoming the top two teams and advancing with rewards. However, they were about to be eliminated.

However, Jin Cheng also understood that if they continued to persevere, there would only be more meaningless casualties.

At this moment, they were already having a hard time resisting the attacks of Xu Han and the others.

Moreover, it was obvious that Xun Han and the others had not used their full strength. They did not use all their firepower to launch their most fierce attacks.

Once they used all their firepower, they probably would not be able to hold on for long. The powerful Undying Fire Phoenix and Liu Yan were eyeing them in the sky. They had not started to attack them yet.

Jin Cheng could only say, “The New Continent team is willing to surrender!”

When the members of the New Continent team heard this, they were downhearted. However, they also heaved a sigh of relief. Finally, they no longer needed to continue this battle, which was filled with despair and had no room for resistance.

On the other side, when Xu Han heard Jin Cheng, he immediately ordered to stop the attacks. Meanwhile, members of the Land of Origin team were all incomparably excited. They had won this battle. They did it in a short period.

At the same time, the voice of the Will of Tower sounded again.

[ The New Continent team has surrendered to the Land of Origin team. ]

[ The guardian beast of the metal attribute territory, Golden Tiger, and all the loots from the metal attribute territory belong to the Land of Origin team! ]

As the voice of Will of Tower sounded, Liu Yan immediately gained control of the temporary camp of the New Continent team.

Soon, Jin Cheng and the others gave up resisting and let Xu Han and the others enter the temporary camp.

Liu Yan also let the Undying Fire Phoenix land and walked down from it.

The members of the New Continent team looked up at Liu Yan, who walked down from the tall Undying Fire Phoenix.

They had left the strongest impression on everyone in the battle. Liu Yan's powerful strength refreshed the understanding of members of the New Continent team. It was the first time they had seen an awakened one with such powerful individual abilities.

When members of the Land of Origin team saw Liu Yan walk down from Undying Fire Phoenix, they were filled with admiration.

The team members were full of respect for Liu Yan.

However, they did not expect that Liu Yan could once again surpass their understanding.

Liu Yan's powerful individual abilities and Undying Fire Phoenix's attack had crushed Golden Tiger. He defeated Golden Tiger in such a short period which led to their victory.

"Captain is mighty!"

"Captain is mighty!!"

...

The elite team of the Land of Origin team cheered for Liu Yan.

Among them, there were members of the Land of Origin team, and there were also members of the Pan-ocean Community team.

Although they were prisoners of war and not members of the Land of Origin team, they had personally experienced this battle and witnessed the strength of Liu Yan. They had experienced the passion and joy of the battle.

Xu Han came in front of Liu Yan and praised him, "It seems that letting you be the team captain is the most suitable choice. You have led us to victory. Hahaha!"

When Liu Yan heard this, he smiled and said, "You are too polite. Your command and team coordination skills are also very good."

Liu Yan knew Xu Han had played a crucial role in this battle, especially with his exquisite command. It allowed the Land of Origin team to win this battle without casualties.

At this moment, Jin Cheng also walked over to Liu Yan. He handed over the metal attribute gem and said, "It's yours. I admit defeat wholeheartedly."

At this moment, Jin Cheng finally understood why He Yang and the others had lost to Liu Yan. It was not because He Yang and the others were not strong, but because Liu Yan was ridiculously strong.

Hearing this, Liu Yan said humbly, "You're too polite, Captain Jin. We only took the opportunity to launch a sneak attack. If your main force were here, we might not be your match."

Hearing this, Jin Cheng felt a little helpless. He knew Liu Yan was being polite and gave him a face.

Jin Cheng knew that even if the main force was here, they could at most defend themselves against Liu Yan and the Land of Origin team. If they wanted to face them head-on, there was still a big gap between the New Continent team and the Land of Origin team where Liu Yan was.

"You're too polite, Captain Liu. Let's not talk about it anymore. You guys should take the loots now." Jin Cheng said lightly.

### **Chapter 364: Everyone Was Shocked**

Metal attribute territory.

The remaining Red Star Empire team members led by Derek Dole were advancing.

They faced constant harassment from Murong Xue, Allen Smith, and others. Their speed had slowed down quite a bit.

Derek Dole was also feeling somewhat helpless at this moment. Their opponent did not have many people, so they were not their match in a head-on battle.

However, the opponents were all elites. They always escaped after harassing their team. Derek Dole and the other team members were completely helpless. They had no way to use their strength.

Unfortunately, the New Continent team needed emergency support at this time, so it was not good for Derek Dole's team to stay here for too long. They could only endure the harassment and obstruction and continue to advance.

Since entering the metal attribute territory, Derek Dole's team members had already suffered more injuries under the harassment from Allen Smith's team. Their losses were not small.

Derek Dole looked at the map. They were finally halfway through the journey. There was still some time before they could successfully reach the temporary camp of the New Continent team and rush to support them.

However, at this moment, the voice of the Will of the Tower announcing the surrender of the New Continent team rang out. Derek Dole and the rest of the team members stopped in surprise.

"What? How did it end so quickly?"

"What happened to Captain Jin Cheng and the others? How did they get eliminated so quickly?"

"They had good terrain to defend themselves. Why can't they defend for a little longer?"

"This is bad. Doesn't that mean that we lost our ally?"

“How did it end so quickly? How come Captain Jin Cheng and the others can’t defend for a little longer?”

...

The team members were all shocked. They had never expected the battle to end so quickly. They rushed over to support the New Continent team as soon as possible. Before they arrived, the New Continent team had already been eliminated.

This news was undoubtedly bad news for the Red Star Empire team.

Previously, Alliance Number 1 had relied on their two strong representative teams to attack the Red Star Empire team. They wanted to finish off the Red Star Empire team. Then, they could recuperate and recover their strength. Then, they turned to dealing with the Land of Origin team.

However, the situation changed after the New Continent had lost.

Although Alliance Number 1’s elite team could successfully eliminate the Red Star Empire team, they would not be able to fight against the Land of Origin team.

After all, the Land of Origin team had subdued the Pan-ocean Community team. They had many prisoners of war, and their strength was close to two representative teams. They were strong, so Alliance Number 1 was naturally no match for them.

Derek Dole had a strange look on his face at this moment. When he thought of Jin Cheng’s words in the public channel chat interface, he immediately understood that Jin Cheng was telling the truth at that time. The situation was dire. No wonder they needed support so urgently.

If Derek Dole had known earlier, Derek Dole would have ignored the casualties and would have preferred to suffer more losses. Regardless of the harassment and obstruction, he would have rushed over to support them and save the New Continent team as an ally.

However, it was too late to say anything now.

Derek Dole did not want to accept such an outcome, but he had no choice but to accept it.

Their ally had already been eliminated. There was no point in supporting them anymore. If they continued to stay in the metal attribute territory, it was very likely that the Will of Tower would declare they would challenge the Land of Origin team.

After all, after the New Continent team was eliminated, this metal attribute territory belonged to the Land of Origin team.

Alliance Number 1 did not dare to provoke the Land of Origin team.

The team members followed Derek Dole and changed directions, preparing for the metal attribute territory.

Murong Xue, Allen Smith, and the other team members also heard the announcement.

“It ended so quickly. We haven’t had a good fight yet!” Murong Xue said somewhat unhappily.

The team members below were all thrilled.

“I didn’t expect the battle to end so quickly.”

“Captain and the others are just too fierce.”

“Yeah, I thought it would be good enough to end the battle today. I didn’t expect it to end in half a day.”

“That’s great. After taking care of the New Continent team, wouldn’t we be the strongest force on the fifth level of the Tower?”

“That seems to be the case. However, the European Federation team and Red Star Empire team aren’t weak either. We can’t underestimate them.”

...

The order that Allen Smith received from Liu Yan back then was only to stop and delay the battle. After the battle ended, they could stop the operation. He brought his team members and rushed towards the New Continent team’s temporary camp.

Meanwhile, in the earth attribute territory. The battle was still going on intensely in the Red Star Empire team’s camp.

The Will of Tower’s voice suddenly rang out, announcing that the New Continent team had surrendered and been eliminated. At the same time, it also notified all the New Continent team members that they were not allowed to continue fighting. Next, they had to listen to the Land of Origin team’s orders.

The members of the New Continent team, who were originally part of the elite team of Alliance Number 1, were all shocked when they heard this.

They were still fighting here, but their territory was taken down by the enemy. They were even eliminated and even became prisoners of war!

“D\*mn!! How did we suddenly get eliminated?”

“What’s wrong with Captain Jin Cheng? How did he lose in just half a day?”

“The Land of Origin team is so strong?”

“Yeah, Captain Jin Cheng planned the place of defense. It should be easy to defend. It seems that the Land of Origin team is too strong and ridiculous.”

“Sigh, we can’t continue to fight. Or we will be killed by the Will of Tower.”

“Sigh, let’s stop.”

...

The New Continent team members sighed one after another, but they could only helplessly accept this result. They could not continue to fight, so they could only go back and report to Liu Yan.

Without the members of the New Continent team, the remaining members of the European Federation team would naturally be unable to continue attacking.

It was obvious that their team alone was not enough to attack the Red Star Empire team's temporary camp.

At this moment, Hans Wilson was frustrated.

Previously, when he saw in the public channel chat interface that Jin Cheng said they could not hold on, Hans Wilson had a bad feeling. He did not expect it to be verified, and so quickly. In just half a day, Jin Cheng and the others had already lost the battle.

Hans Wilson sighed and suddenly regretted not carrying out the attack this time.

He had thought that the Land of Origin team might have made preparation to attack his team. However, he did not expect the Land of Origin to be so strong, especially their captain, Liu Yan.

Although the situation was terrible, Hans Wilson did not panic. He quickly ordered his team members to clean up the battlefield. Then, they left the earth-attribute territory orderly and returned to their water-attribute territory.

Hans Wilson knew that his team members were not all here. They had also lost the support of the New Continent team. Hence, they became weaker than the Red Star Empire team.

They were the ones attacking the Red Star Empire team. So, Hans Wilson's team members were even more exhausted.

Although they had just received the bad news, it was still better for them to quickly protect their members and return to the water attribute territory. Then, they could make plans later.

### **Chapter 365: The Resolute Golden Tiger**

Earth attribute territory.

In the temporary camp of the Red Star Empire team.

Captain Ye Yifan and the other team members had heard the Will of Tower's announcement. They learned that the New Continent team had been defeated and eliminated.

When the team members heard this, they were surprised. But at the same time, they were happy.

After all, the New Continent team had been eliminated. It meant that the members of the New Continent team before them could not continue attacking them.

As such, the Red Star Empire team had avoided being eliminated. They were able to survive.

"That's great. The New Continent team has been eliminated. We don't have to be eliminated anymore. Hahaha!"

"I thought our training on the fifth level of the Tower had ended. I didn't expect our luck to turn around."

"That's what you get for ambushing us!!"

“Well done, Land of Origin team! Hahaha!”

“Quick, look! The members of the European Federation team are also retreating. Look at their dejected expressions.”

“Let’s take this opportunity to attack them. We’ll take care of some of the members of the European Federation team and weaken their strengths. What do you think?”

“I think we can do it. They have been suppressing us for the past two days, and I have had enough of it!”

...

Members of the Red Star Empire team were discussing excitedly when they saw the European Federation team retreating. It was obvious that they had given up on this attack. The Red Star Empire members were thrilled. They wanted to chase the European Federation team and take revenge for the past two days.

Immediately, many team members looked toward their captain, Ye Yifan, and waited for his orders.

“Captain, how is it? If we chase after them now, we will be able to injure the European Federation team!”

“The European Federation team has been suppressing us for the past two days, and we have been suffocating. We must take revenge.”

“Captain, will you allow us to go up and fight?”

“Yes. We’ve been defending for the past two days. It’s really frustrating.”

...

Many team members begged Captain Ye Yifan. They hoped they could take advantage of the situation and continue to attack.

At this moment, Ye Yifan seemed to be thinking about something. When he heard the requests of his team members, he shook his head without hesitation. He said, “No. The New Continent team has been eliminated. Among the three forces on the fifth level of the Tower, the Land of Origin is the strongest. If we continue to fight with the European Federation team at this time, we will bring trouble to ourselves. Look at the European Federation team’s retreat formation. They are organized. If we rush forward, they can immediately counterattack!”

Ye Yifan had just been thinking about the current situation on the fifth level of the Tower. At the same time, he was also thinking about his side’s next plan.

Although he had not thought about the specifics, fighting with the European Federation team was not a wise choice.

Even though they were on the defensive side for the past two days, the European Federation team was on the offensive side.

In reality, European Federation did not have many casualties. They had the overwhelming strength of Alliance Number 1’s elite team and Hans Wilson’s steady attack tactic.

In addition, the opponent's retreat was orderly. If they rushed forward now, they would be counterattacked. Both sides would suffer heavy casualties.

When the team members heard this, they finally reacted to the situation. Under the current situation, it was not wise to make a move. They should put down their hatred.

At the same time, many team members also noticed that although the European Federation team retreated quickly, they were not in a sorry state. On the contrary, they retreated in an orderly manner.

Instantly, the team members admired Hans Wilson. He was indeed talented. He could make such a wise and calm decision in a sudden situation.

At this time, in the temporary camp of the New Continent team in the metal attribute territory, Liu Yan and the others were counting all sorts of gains.

The first was the guardian beast of the metal attribute territory, Golden Tiger.

After the battle, Golden Tiger had already been covered in wounds. It was injured severely by the fierce attacks of Undying Phoenix and Liu Yan. It was already difficult for it to stand up.

Although the battle this time was one-sided, Liu Yan knew that it was because of the restraint and Liu Yan's participation in the battle.

Golden Tiger's combat strength was not weak, especially its strong will, which surprised Liu Yan.

Liu Yan came in front of the Golden Tiger and observed it.

Golden Tiger's body was covered in wounds. Blood kept flowing from its wounds, but its eyes were still firm.

According to the rules set by the Will of Tower, it now belonged to Liu Yan. It had to listen to all of Liu Yan's orders. However, the eyes of the Golden Tiger were still incomparably arrogant. It seemed to be somewhat unconvinced of Liu Yan.

Liu Yan ignored Golden Tiger's attitude. He said indifferently, "Golden Tiger, although you lost and are still in a sorry state, I have seen your strength. You are indeed very strong. At the same time, your willpower has also made me look at you in a new light. I hope that we can get along well in the future."

Liu Yan's words undoubtedly affirmed Golden Tiger.

After Golden Tiger heard Liu Yan's words, the way he looked at Liu Yan immediately changed.

Jin Cheng and the rest of the team members also heaved a sigh of relief when they heard Liu Yan's words.

During this period, they had already developed some feelings for Golden Tiger. After hearing Liu Yan's words, they undoubtedly confirmed that Liu Yan would treat Golden Tiger well. It also made them feel much more at ease.

Liu Yan immediately looked at Chu Long behind him.

Although he did not say much and only gave her a look, the meaning was already self-evident.

Seeing this, Chu Long nodded slightly and walked forward.

After a series of complicated incantations, more than ten milky-white rays appeared in the sky and immediately enveloped Golden Tiger.

The wounds on Golden Tiger's body stopped bleeding and were recovering rapidly.

The spell lasted for a few minutes.

The milky white light gradually disappeared. The wounds on its body had almost recovered. There were still some burn and frostbite marks, but they seemed to be only minor injuries.

In just a few minutes, Golden Tiger recovered from a severe injury to a minor injury. Chu Long's healing ability was exaggerated!

At this moment, Chu Long also staggered and almost fell.

Seeing this, Liu Yan hurriedly went forward to support Chu Long and asked worriedly, "How is it?"

Chu Long shook her head slightly and said, "It's fine. I'm a little tired after using it for too long, so I need a rest. Golden Tiger will be fine from now on. I'll spend another two days to treat it to full health."

When the team members behind Chu Long heard Chu Long's words, they were all extremely shocked.

The SS-grade guardian beast, Golden Tiger was injured severely that it could not stand. Yet, Chu Long only used a few minutes to heal Golden Tiger. Moreover, she only needed two days to heal it to full health.

Such healing abilities were magnificent!

Members of the Land of Origin team and the Pan-ocean Community team were shocked. They had already seen Chu Long's healing abilities before. Hence, their expressions were still quite normal.

It was the first time the members of the New Continent team had seen Chu Long's healing ability. Their jaws almost dropped onto the ground.

### **Chapter 366: Gold Talent**

"The healing ability can be so exaggerated? It's hard to imagine."

"Yeah. If I didn't see it with my own eyes, I wouldn't have believed it."

"He can be cured so quickly. Isn't that amazing?"

"I've heard people say that a top-tier priest can heal a seriously injured person. They can even save someone from death. I didn't believe it, but I believe it today."

"Even a priest can be so top-notch and so powerful. The Land of Origin team is full of crouching tigers and hidden dragons."

"The top students of the Land of Origin team this year are indeed ridiculously strong!"

“It seems the Land of Origin team will rise this year.”

“This is a good thing. If that girl can heal Golden Tiger, it won’t have to suffer anymore!”

...

The members of the New Continent team were shocked and discussed animatedly.

Jin Cheng also looked at Chu Long and Liu Yan gratefully. At the same time, he was also a little surprised. The Land of Origin team had always kept a low profile. They did not show off their abilities back then, but they impressed everyone on the fifth level of the Tower.

The Land of Origin team had many capable people.

At this moment, Jin Cheng finally realized they had underestimated the Land of Origin team, which led to their defeat.

At this time, Liu Yan continued to count his harvest.

The guardian beast, Golden Tiger, was left to guard the metal attribute territory until it was needed.

Other than the guardian beast, the rest of the loot was the New Continent team’s harvest on the fifth level of the Tower and the members of the New Continent team.

As for the metal attribute territory’s New Continent team, Liu Yan was prepared to adopt the same plan as the Pan-ocean Community team.

The original team captain, Jin Cheng, would manage the members of the New Continent team in the metal attribute territory.

Of course, Liu Yan had to leave his people in charge. At the same time, he would bring the treasure chests back to the temporary camp of the fire attribute territory of his team.

After Liu Yan told Jin Cheng the plan, Jin Cheng was a little surprised. He did not expect Liu Yan to trust him so much.

After hesitating for a while, Jin Cheng nodded and said, “Thank you for your trust. Don’t worry. I will carry out your orders.”

Liu Yan nodded slightly. He did not mean to trust Jin Cheng too much by adopting this plan. Jin Cheng was bound by the Will of the Tower. Hence, Liu Yan did not have to worry too much about Jin Cheng disobeying his orders.

On the contrary, it would be more troublesome if he used the members of the New Continent team to guard against others. He would need to spend a lot of energy. Liu Yan would need to mobilize a lot of management personnel. He did not want to spend too much energy on this aspect and transfer too many people away.

Immediately, Liu Yan looked at Xu Han and said, “Luo Qingcheng is in charge of the wood attribute territory. I will leave this metal attribute territory to you. If you find it troublesome to distribute the equipment, you can bring it to our temporary camp and leave it to Luo Qingcheng to take charge.”

Xu Han was a little surprised when he heard this. He could not help but tease, "You trust me so much? I have never led a team before. Don't blame me if I mess up."

Liu Yan smiled when he heard this, "It's okay. I'll treat it as a practice for you."

In fact, Xu Han's command ability was not bad in this battle. He had obtained Liu Yan's recognition.

During this period, Liu Yan gradually discovered the scarcity of command-type talents.

It would be better to have more command-type talent like Luo Qingcheng.

Murong Xue and Allen Smith's combat strength was not bad, but their command-type talent was not too good.

This time, Liu Yan put Xu Han in charge because he intended to nurture Xu Han.

From the battle this time, it seemed that Xu Han had a certain degree of command talent.

During this period, Liu Yan also had some understanding of Xu Han.

Firstly, Xu Han was strong and was a genius amongst geniuses. Otherwise, he would not be on par with Allen Smith and was known as one of the two top geniuses of Gifted Academy.

Secondly, Xu Han was frivolous and joked around all day. He seemed a little unreliable. But in reality, Xu Han was always stern in serious matters. He was a trustworthy teammate.

Following that, Xu Han officially took over the various matters of the metal attribute territory. He took stock of the overall strength of the New Continent team members. Xu Han also recorded the losses and also all the loot. He also arranged for personnel to bring all the gains of the metal attribute territory back to the fire attribute territory.

Xu Han started to get busy with various matters.

On the other hand, it was Liu Yan became the boss and relaxed.

The New Continent team had surrendered themselves. It was different from the Pan-ocean Community team's elimination. This time, Liu Yan moved into the New Continent team's temporary camp, and he had even obtained the metal attribute gemstone.

After obtaining the metal attribute gemstone, Liu Yan used his A-grade skill, Treasure Hunting. He sensed a core of the metal attribute territory in the center of the camp.

The core of the metal attribute territory was a treasure. Liu Yan had some free time, so he quickly went over while everyone was busy outside.

Not long after, Liu Yan found the metal attribute core in the center of the metal attribute camp.

It looked like a gemstone made of special material. It was emitting golden light, but it was far from being as simple as gold.

It was only the size of a fist, but Liu Yan could feel a terrifying power from it.

Liu Yan also checked the information of the metal attribute core through the smart wristband.

[ Metal attribute core ]

Grade: SS

Description...

Liu Yan still could not see anything, but he could see that it was an SS-grade treasure.

The metal attribute core belonged to the metal attribute camp, which belonged to the fifth level of the Tower. It did not belong to anyone, so Liu Yan could not take it with him.

However, Liu Yan had Divine Extraction. If he did not take it away or destroy the treasure, he could still obtain the benefits.

It was also the reason why Liu Yan had rushed over.

Coincidentally, there was no one else around. Liu Yan directly used his SSS-grade talent skill, Divine Extraction, on the metal attribute core.

A white light landed in front of the metal attribute core, and a notification immediately appeared in front of Liu Yan.

[ Divine Extraction of metal attribute core (SS-grade) initial success (too high level). Obtained: Gold Talent (S-grade)! ]

Seeing the notification, Liu Yan was excited. He did not expect to obtain Gold Talent. It was a huge reward.

However, Liu Yan also felt a little regretful. The current Divine Extraction level was tier 3, and this metal attribute core was of a high level. The Divine Extraction level was not enough for the initial intelligence extraction, so he could only obtain Gold Talent.

If the level of Divine Extraction was high enough, he could extract metal attribute core successfully. He would be able to obtain the Gold Secret Art. He might even be able to get the Law of Gold directly, and that would be a huge harvest!

Liu Yan had to think of a way to upgrade Divine Extraction. The current tier 3 Divine Extraction could bring him great help and upgrade. Liu Yan believed the Divine Extraction would be even more heaven-defying after the upgrade. It would bring him an even more exaggerated upgrade.

It was just that the first two upgrades to his talent, Divine Extraction, could be considered a coincidence. Liu Yan did not know the specific method, so he could only look for an opportunity later to investigate and inquire about it.

However, Liu Yan was also satisfied to get Gold Talent. He hurriedly carefully sensed the changes in his body and experienced the effects of Gold Talent.

### **Chapter 367: Open the Entire Map?**

In the middle of the temporary metal attribute camp.

Liu Yan was feeling the changes brought by his S-grade Gold Talent.

Firstly, Liu Yan could feel many metal attribute elements in the metal attribute territory.

Especially in those huge ores, there was a rich amount of metal attribute elements.

However, compared to Wood Secret Art, being able to sense the wood attribute was different.

Gold Talent was a talent. It was not comparable to secret art. Still, it could only slightly control the metal attribute.

Moreover, Liu Yan felt that his sensitivity toward metals had increased tremendously. Liu Yan could sense all the metals in a large area. The range of his perception had even exceeded the range of his A-grade perception skill, Omniscient Insight.

Although Liu Yan could only mobilize the metal attribute elements in a small area, he was surprised to find that he could control the metals.

Liu Yan guessed that the metal attribute elements contained in the metals were relatively pure, so he could directly control them.

Liu Yan tried it out. He could move some metal pieces on the ground.

After realizing this, Liu Yan was a little surprised.

With this ability, he could use the metal to attack his opponent in a battle in the future.

In other aspects, it might also have great use.

Although the Gold Talent was not as great as Wood Secret Art, it was still pretty good. It had brought Liu Yan a lot of enhancements, especially some special abilities that might have great use.

Liu Yan was about to leave when his face changed. His face was full of surprise.

Liu Yan now had Gold Talent and the SS-grade skill, Extraordinary Five Senses. Liu Yan was surprised to find that the range of his perception toward metal had suddenly increased significantly.

Previously, just relying on Gold Talent alone, the range was already not small, covering a radius of several hundred meters.

But now, with the support of his SS-grade skill, Extraordinary Five Senses, the range had suddenly expanded dozens of times.

What surprised Liu Yan the most was that he could sense the existence of the treasure chests.

These treasure chests were all made of special metals.

Therefore, with his Extraordinary Five Senses and Gold Talent, Liu Yan's perception of these treasure chests was even clearer and stronger.

Liu Yan carefully sensed for a while and was immediately surprised to find that he could detect all the treasure chests on the entire map.

This way, it was a little exaggerated.

The fifth level of the Tower was incomparably huge. The representative teams had not even explored their territories, not to mention the five pieces of territory. Moreover, some neutral areas were on the fifth floor of the Tower.

Low-grade treasure chests might not be able to be perceived clearly from a great distance.

However, Liu Yan could sense those high-grade treasure chests very clearly. Even if they were far away, Liu Yan could still sense them.

In this way, it was equivalent to Liu Yan opening up the entire map and knowing the specific locations of almost all the treasure chests on the fifth level of the Tower!

Liu Yan was thrilled. With such an exaggerated ability, wouldn't it be easy for him to collect 10,000 Lord's token fragments?

Thinking of this, Liu Yan immediately decided to find the map and mark the location of the treasure chests. Then, he would send people to collect them, especially those high-grade treasure chests. He had to keep them in his bag!

Liu Yan came to the metal attribute camp and found Jin Cheng. He asked for the map of the metal attribute territory.

Jin Cheng naturally did as Liu Yan told him to.

Xu Han was almost done with his work. He came over and reported.

"It's similar to me. Let me tell you, I'm working so hard. You have to give me more food in the future!" Xu Han shouted from afar.

Liu Yan was very serious. He did not have time to joke with Xu Han. He carefully marked the metal attribute territory map.

Liu Yan could clearly distinguish the different grades of treasure chests.

According to the preciousness of the metal, Liu Yan could easily distinguish the grade of these treasure chests.

After using his perception, Liu Yan found out there were 132 bronze treasure chests, 21 silver treasure chests, and even two golden treasure chests in the metal attribute territory. It could be said to be a pile of treasures.

There were too many black iron treasure chests. In addition, their grade was a little low. Liu Yan could not sense black iron treasure chests from a distance, so he did not mark them.

Liu Yan marked all the high-grade treasure chests that he could sense. Not only did he mark the location, but also the altitude. It would be easy for the gathering personnel to find the chests more quicker.

Seeing Liu Yan's serious face, Xu Han immediately understood what was important. At the same time, he was also a little puzzled. Previously, no matter how urgent the situation was, Liu Yan had never been so stern. Why was he working so hard right now?

"Is there some bad news? Why is he so serious?" Xu Han came over and asked in confusion.

Jin Cheng, who was standing at the side, was also a little confused when he saw this.

It was a good situation for Liu Yan. Among the three forces, Liu Yan's team was the strongest. What else could make Liu Yan so nervous?

However, Liu Yan directly handed over the marked metal attribute map and said, "You two take a look."

Jin Cheng took the map and saw that Liu Yan had made many marks on it.

"This is?" Jin Cheng was a little puzzled.

It was the first time Liu Yan had come to this metal attribute territory. Why did he seem to understand it so well and put so many marks on it?

Seeing this, Xu Han also had a puzzled look on his face. "Liu Yan, what is this? Why can't I understand it?"

Liu Yan rubbed his head. After using Gold Talent and his extraordinary five senses for a long time, Liu Yan's mind was a little tired, but it was still okay.

He then explained indifferently, "This is the specific location of the bronze treasure chest, silver treasure chest, and golden treasure chest in the metal attribute territory. Jin Cheng, you bring some people to collect all these treasure chests. Xu Han will also work together to collect all of them as soon as possible. Then, bring them to our camp. Remember, don't tell anyone about this. Don't let the other two forces know about this!"

Liu Yan knew that if the news that he could collect treasure chests and Lord's token fragments spread out, it would definitely cause a huge uproar. It was very likely that the other two forces would join forces to target him.

The Land of Origin team had three attribute territories and three guardian beasts. They had also taken in the prisoners of war of the Pan-ocean Community and the New Continent team. They were immensely powerful.

However, the Red Star Empire team and European Federation team had deep foundations. No one knew if they had any powerful trump cards that they had not used. It was best to play it safe. Even if they had a huge advantage, they still had to act cautiously.

It would not be too late to wait until they collected all the high-grade treasure chests in the three territories before attacking the other two factions.

### **Chapter 368: Many Treasure Chests**

When Xu Han and Jin Cheng heard Liu Yan's words, they were both stunned.

"These are all the locations of the treasure chests? That's so many!" Jin Cheng exclaimed.

Beside him, Xu Han also looked at Liu Yan in surprise.

During this period, other than battle preparation, the other teams also spent a lot of time and energy searching for the treasure chests.

After all, as long as they collected 10,000 Lord's token fragments, they could meet the trial conditions of the fifth level of the Tower and successfully advance to the sixth level of the Tower.

They could only find the Lord's token fragment in these treasure chests.

Unfortunately, these treasure chests spawned randomly. Compared to the vast fifth level of the Tower, the number of the chest was small.

Usually, a team member would only be able to find treasure chests after searching for a day. They would not find anything if they were unlucky.

Each of the attribute territories was too big. The number of treasure chests within them was not that many.

If Liu Yan did mark the specific locations of the treasure chests, then searching treasure chests and Lord's token fragments would be much easier. The efficiency would increase by more than ten times.

"How did you do that? How can you still sense it in such a big place?" Xu Han asked doubtfully.

If it were someone else, Xu Han would not believe it.

But this person was Liu Yan. Xu Han could not help but believe it.

Jin Cheng also looked at Liu Yan in disbelief. He was curious if this was true.

Liu Yan was too lazy to explain too much. He could not tell them about his Extraordinary Five Senses and Gold Talent.

"Go to the location marked on the map to find them, especially the two golden treasure chests. You must collect them today and send them to the fire attribute territory." Liu Yan said directly.

Jin Cheng was skeptical but quickly agreed to Liu Yan's order.

Then, Liu Yan asked Xu Han to leave a few people who were used to working for him. The rest of the members of the Land of Origin team and the Pan-ocean Community team were brought back by Liu Yan.

First, Liu Yan asked Murong Xue and Allen Smith to bring members of the Land of Origin team back to the fire attribute territory. Then, Liu Yan followed He Yang and the other members of the Pan-ocean Community team to the wood attribute territory.

Liu Yan now had Extraordinary Five Senses and Gold Talent. It was equivalent to opening the entire map. He could sense the specific locations of almost all the treasure chests on the fifth level of the Tower.

If he were closer, he would undoubtedly be able to sense them.

Especially those bronze treasure chests. It was easier to sense them when they were closer. Although Liu Yan could detect them when they were far away, it would be a little unclear. It would make him even more tired.

So, Liu Yan directly came to the wood attribute territory to sense and mark the location.

At this moment, Luo Qingcheng was in charge of various matters in the camp of the wood attribute territory. The collection of treasure chests and vigilance work were carried out in an orderly manner.

Seeing Liu Yan's arrival, Luo Qingcheng was a little surprised.

"You're back. What's the matter?" Luo Qingcheng came to Liu Yan and asked.

Luo Qingcheng knew that Liu Yan would not come to the wood attribute territory unless there were something special.

After all, Liu Yan had Purple Wind Falcon. If he wanted to send a message or something, he could directly pass it through Purple Wind Falcon. There was no need for him to come personally.

Liu Yan nodded slightly and said, "Bring me the map of the wood attribute territory. Oh, right. He Yang, come here. We need to discuss some things."

Luo Qingcheng was confused, but she still followed Liu Yan's instructions.

Soon, Luo Qingcheng and He Yang came to Liu Yan and brought the map of the wood attribute territory.

After taking the map, Liu Yan used his Extraordinary Five Senses and Gold Talent to sense carefully. After sensing the locations of the treasure chests, he marked the specific locations on the map.

Luo Qingcheng and He Yang looked at each other. They did not understand what Liu Yan was trying to do, so they could only wait patiently at the side.

After a while, Liu Yan finally ended the marking. He finally marked all the bronze treasure chests, silver treasure chests, and golden treasure chests in the wood attribute territory.

Liu Yan took a look. The wood attribute territory currently had 152 bronze treasure chests, 32 silver treasure chests, and one golden treasure chest.

The bronze treasure chest and silver treasure chest in here were more than the metal attribute territory. However, there was only one golden treasure chest.

After marking it, Liu Yan handed the map to Luo Qingcheng and He Yang.

"You two take a look." Liu Yan said lightly.

Luo Qingcheng and He Yang took it and looked at it. However, they did not understand what Liu Yan marked on the wood attribute map.

"Captain Liu, what are these marks?" He Yang could not help but ask.

Luo Qingcheng also felt a little puzzled. She seemed to have thought of something but did not dare to believe it. She could only look at Liu Yan with puzzlement.

Facing the two puzzled people, Liu Yan explained, "These marks are the locations of all the treasure chests in the wood attribute territory. There are too many black iron treasure chests, so I didn't mark them. I marked the bronze treasure chest, silver treasure chest, and golden treasure chest."

"These are all the locations of the treasure chests?" He Yang suddenly looked surprised when he heard that and carefully looked at the map.

At this time, He Yang also realized Liu Yan marked the locations with three kinds of marks. It seemed that the most abundant was the bronze treasure chest, followed by the silver treasure chest, and the only marked one should be the golden treasure chest.

Luo Qingcheng also looked surprised. Just now, she felt these marked locations seemed to be the locations of the treasure chests, but she doubted it. She did not expect that it was the location of all the treasure chests in the wood attribute territory.

Liu Yan nodded slightly and said, "That's right, they are all the locations of the treasure chests. You guys bring people to collect all of them as soon as possible, especially the golden treasure chest. You must collect them before tonight and send them to the fire attribute territory. In addition, you must also pay attention to the confidentiality of this operation. Don't let any news leak out. For the time being, you must not let the other two forces know about it. Is that clear?"

He Yang was shocked. He could not imagine how Liu Yan had done it. However, when he heard Liu Yan's orders, he immediately agreed.

Liu Yan rushed back to the fire attribute territory and marked the location of the treasure chest there. He did not stay any longer and directly bid farewell and left.

He Yang looked at Liu Yan's back as he left. At this moment, he still found it hard to imagine.

"Tell me, how did Captain Liu Yan do it? It was difficult for many of our team members to collect the treasure chests. It was like finding a needle in a haystack. Yet, he could mark the location of the treasure chests. The wood attribute territory is so big, and the terrain is complicated. Yet, Liu Yan could mark the location of all the treasure chests. This is too ridiculous." He Yang muttered.

Luo Qingcheng was somewhat used to it. She had already seen too many surprises from Liu Yan and saw too many impossibilities.

Liu Yan always impressed her by doing impossible things.

"I don't understand him either. It's better to follow his orders and start collecting the treasure chests." Luo Qingcheng said helplessly.

### **Chapter 369: Rapid Development**

Fire attribute territory, the Land of Origin team temporary camp.

After Liu Yan returned, he also found the map of the fire attribute territory.

Then, with his Extraordinary Five Senses and Gold Talent, he sensed the location of all the treasure chests in the fire attribute territory and marked them.

After sensing for a while, Liu Yan was surprised to find that the fire attribute territory had many treasure chests, even more than the wood attribute territory.

Previously, Liu Yan had been wondering why the fire attribute territory's gains were far less than the wood attribute territory. He thought his team was unlucky.

But now, Liu Yan could sense the location of the treasure chests. He understood that it was not that the fire attribute territory had fewer treasure chests. The fire attribute territory's treasure chests were a little hard to find.

The terrain of the wood attribute territory was complicated, and there were all kinds of flowers and trees. But the treasure chests were all located on the ground. If one searched carefully, one would still be able to find them.

As for the fire attribute territory, the terrain was relatively simple. It was just a few deserts.

But in reality, most of the treasure chests were buried underground, so it was naturally difficult to find them.

The team members in charge of searching for treasure chests could not dig through every place to search for the treasure chests.

Based on his perception, Liu Yan was surprised to find some of the treasure chests were nearly ten meters under the ground in the fire attribute territory.

Without knowing the exact location, the team members really could not find them.

In reality, the fire attribute territory had quite many treasure chests, even more than the metal attribute territory and wood attribute territory.

Fortunately, Liu Yan could now sense them all. Hence, it was not difficult for the team members to find the treasure chests in the fire attribute territory.

Liu Yan marked the specific locations and depths of each treasure chest.

After a while, Liu Yan finished marking them all.

He only marked the bronze treasure chest, silver treasure chest, and golden treasure chest. There was no need to mark the black iron treasure chest.

There was only one Lord's token fragment in a black iron treasure chest, and the rest was almost nothing. The harvest was too small.

After marking everything, Liu Yan roughly took a look. There were 182 bronze treasure chests, 43 silver treasure chests, and two golden treasure chests in the fire attribute territory. There were a lot of treasure chests.

If he could collect all of these treasure chests, it would be a huge harvest.

Following that, Liu Yan called Murong Xue over.

After Murong Xue arrived, she said somewhat irritably, "What's the matter? I was bringing people to collect treasure chests. It's too hard to find. Why are there so few treasure chests in our fire attribute territory?"

Liu Yan was already used to this.

The fire attribute territory was vast. Adding on the fact that there were very few treasure chests on the ground, it was even harder to find.

Most of the time, a dozen members would scatter and collect for a day. They might only be able to find one or two treasure chests, and their grade was generally not high.

Compared to the daily harvest from the wood attribute territory, the fire attribute territory performed much poorer. The collection speed of the Lord's token fragments was also slow.

Liu Yan only had a few hundred Lord's token fragments, not even exceeding 500. He was extremely far away from the goal of collecting 10,000 Lord's token fragments.

It was all the gains from owning two territories. If it was only the fire attribute territory, Liu Yan doubted whether he could have more than 100 Lord's token fragments. If he continued to collect Lord's token fragments at this speed, it was hard to say how long it would take to gather ten thousand of them.

Liu Yan looked at Murong Xue and could not help but smile. "I know you're in a difficult situation. I'm not here to help you. Take a look."

As Liu Yan spoke, he handed the fire attribute territory map that marked the location of the treasure chest to Murong Xue.

Murong Xue took it and looked at it, but her face was filled with confusion.

"What are these marks? It's so densely packed that my eyes hurt." Murong Xue grumbled.

"It's a map of the treasure chest. The location and depth are marked. They are the bronze treasure chest, silver treasure chest, and golden treasure chest." Liu Yan explained calmly.

Murong Xue was stunned when she heard that. She looked at it again carefully and realized that these marks were clear. Not only were there specific locations but also depths. This way, it was easier to search for treasure chests.

"Liu Yan, how did you do it? You know the specific locations of all the treasure chests. I was wondering why the treasure chests in our fire attribute territory were so hard to find. So they were all underground!" Murong Xue looked at Liu Yan in surprise.

Liu Yan nodded slightly. "It's the location of the treasure chests. You don't have to know how I get it. For the next period, you will be responsible for gathering all the treasure chests with your people. The process must be kept confidential and not be revealed to the other two forces. It's already late today. I reckon you won't have enough time to gather many treasure chests. You will first gather those two golden treasure chests. As for the rest, it's up to fate."

"Alright. Liu Yan, you've been too helpful. This time, it will be much easier for me." Murong Xue hugged Liu Yan, then took the map and left.

Liu Yan touched his chest, his expression a little strange. This girl had a nice figure. Why did it feel like she had grown even bigger? Could it be that she hit puberty again?

Shaking his head, Liu Yan could not think about it now.

Then, Liu Yan rested in the camp.

Sensing all the treasure chests in the three territories was a heavy burden on Liu Yan. He was exhausted, much more tired than in a big battle.

Liu Yan knew that this should be mental exhaustion.

But all of this was worth it.

The three territories were all under the leadership of their respective team members, carrying out the collection of treasure chests.

Liu Yan believed that the number of his Lord's token fragments would increase exponentially.

Especially tonight. If nothing unexpected happened, five golden treasure chests from the three territories would be collected and sent here.

Liu Yan could not help but feel a little excited.

Previously, they found A-grade equipment appearing in the silver treasure chest, which was really good.

Now that the golden treasure chest was higher grade, there would definitely be better items.

It was unknown what kind of rich harvest these five golden treasure chests would bring to Liu Yan and the others.

Currently, the Land of Origin team just finished off two representative teams and had three territories.

In the upcoming days, Liu Yan also planned to let his team members rest and adjust.

If they continued to fight, it would undoubtedly be a little tiring for the team members.

Coincidentally, Liu Yan obtained Gold Talent. With his Extraordinary Five Senses, he could instantly open the map and sense the locations of all the treasure chests on the fifth level of the Tower.

Taking this opportunity, he let the team members collect the treasure chests and develop them properly.

The large number of treasure chests in the three territories would be a huge harvest.

They could obtain tons of Lord's token fragments. Moreover, they could also get a lot of high-grade equipment and rare cultivation medicinal ingredients. It could help the team members develop and increase their strength.

### **Chapter 370: Shiny Golden Armor**

Fire attribute territory, the temporary camp of the Land of Origin team.

Night gradually covered the area, and the day had come to an end.

For the day, Liu Yan and the others led the Land of Origin team to ambush the New Continent team in the metal attribute territory. They defeated the New Continent team.

Later on, the team members searched for the treasure chests at the locations given by Liu Yan.

At this time, with the efforts of the team members, they had already collected a lot of treasure chests.

Although they had not finished collecting all of them, the harvest was still huge. Especially the two golden treasure chests. They had already collected all of them.

Xu Han and Luo Qingcheng also brought a few members back from the metal attribute territory and fire attribute territory. They also brought many treasure chests that they found in the two territories.

At this moment, the treasure chests they found in the three territories piled in the open space of the campsite.

There were too many treasure chests. They piled up into a small hill.

Among these treasure chests, the lowest grade was the bronze treasure chest. There were some silver treasure chests.

At the front, five golden treasure chests were emitting dazzling golden light.

At this moment, the team members looked at the treasure chests. They were all thrilled. They did not expect they have a great harvest in a short time.

“There are so many treasure chests. We are rich right now.”

“Our gains in this half a day are many times more than we have obtained previously.”

“I wondered why there were so few treasure chests in our fire attribute territory. So, it turns out that they are all underground.”

“I feel that our fire attribute territory has more treasure chests, but it’s more difficult to collect them. After all, they are all underground with different depths. It’s difficult to search for them.”

“Why did we suddenly obtain so many treasure chests, and they’re of such a high grade? We can’t even see a single black iron treasure chest yesterday.”

“Yeah, we found many black iron treasure chests before. But this time, they’re all high-grade treasure chests.”

“There seems to be a map with the locations of all the treasure chests marked on it. I wonder where they came from.”

...

The team members were puzzled and discussed animatedly. They were all curious about the scene before them.

Many of them had participated in the collection of the treasure chests and knew some of the reasons. They used the map, which marked the location of many high-grade treasure chests.

In the past, when they collected the treasure chests, they would move separately. Each team member would choose a different direction and be in charge of different areas to collect the treasure chests.

Naturally, it was not easy to collect the treasure chests like this. Not only would they need to spend a lot of time and effort, but the harvest would also be relatively small.

After all, the entire territory was too big. Even if all the members participated in searching treasure chests, it would be impossible to collect the entire territory in a day.

Not to mention that the fire attribute territory's situation was quite special. Many of the treasure chests were underground, making it even harder to collect them. It was like looking for a needle in a haystack.

However, with that mysterious map, everything became much easier. Every member had the location for the treasure chests, so it was much easier for them to collect the corresponding treasure chests.

The harvest was even more enormous.

Although everyone was curious, they could only discuss it here. After all, the higher-ups had told them not to leak these things. So, they could not let the other two forces know about it.

Many members did not know where this mysterious map came from. But looking at the three territories that seemed to have corresponding maps, many members guessed that this should be related to their captain, Liu Yan.

At this time, Luo Qingcheng, Xu Han, and Murong Xue also reported to Liu Yan about their harvest today.

After all, there was limited time today. It was already afternoon when the team members began to collect, so they did not get all of them. They only got more than half of the treasure chests marked on the map.

But even so, the harvest was still enormous. They obtained five golden treasure chests, 42 silver treasure chests, and more than 200 bronze treasure chests from the three territories.

The harvest in this half-day was several times more than the total harvest in the past few days.

"With so many treasure chests, there must be a lot of Lord's token fragments, right?" Murong Xue could not help but say with some joy.

Xu Han also said happily, "Yes, in this way, it won't take us too long to collect 10,000 Lord's token fragments."

Luo Qingcheng nodded and said, "Especially these are high-grade treasure chests. In addition to the Lord's token fragments, many other treasures can improve the strength of our team members!"

Liu Yan was too lazy to say more and said, "Let's open five golden treasure chests first."

Liu Yan walked forward and came to the front of the golden treasure chests. He wanted to open these five golden treasure chests personally.

Murong Xue and the others all looked over.

Before this, the highest-grade treasure chest that they opened before was only a silver treasure chest. It was the first time they opened a golden treasure chest. Naturally, they were curious about what kind of treasure they could get from this precious golden treasure chest.

At this moment, the surrounding team members quieted down and stopped their discussions. They all looked at Liu Yan and waited curiously for the existence of this golden treasure chest.

Liu Yan was straightforward. He went to the first golden treasure chest and opened it.

Resplendent and dazzling golden light scattered in all directions.

After a blinding moment, Liu Yan also clearly saw what was inside the golden treasure chest.

It was a golden armor, incomparably thick and heavy. From the looks of it, its quality was pretty good.

Other than that, there were some cultivation medicinal ingredients and many Lord's token fragments in the chest.

The most precious item was undoubtedly this battle armor.

Liu Yan picked it up and used his bracelet to check its attribute.

[ Shiny Golden Armor ]

Grade: S

Effect: Defense + 5000! Increases overall defense by 20%!

Description: A mysterious armor made of gold. It has a terrifying defense. It has an exceptional defense against both physical and attribute attacks. However, it is also heavy and cannot be used by ordinary people.

After checking it out, Liu Yan immediately understood it was a good defensive armor.

Compared to the previous armor, the biggest highlight was that it could defend against physical attacks and had a superb defensive effect against all kinds of attribute attacks.

However, the corresponding weight was also relatively heavy. The awakened could not use it. It was more suitable for tanks or heavy warrior classes with strong strength.

In summary, it was a powerful S-grade weapon.

It immediately confirmed Liu Yan's guess. As expected, the golden treasure chest could drop S-grade equipment!

Liu Yan held it in his hand and estimated the weight. This Shiny Golden Armor was indeed extremely heavy, weighing thousands of pounds.

With Liu Yan's terrifying stamina, he could use the equipment effortlessly. However, it would still have a slight effect on his movements.

Moreover, Liu Yan's class focused on flexibility, so defense was not his first priority. After all, the opponent could not touch Liu Yan if he was fast enough. Hence, he did not need to have a strong defense.

Overall, this equipment was of little value to Liu Yan. There was no need to open the A-grade Turin Assassination Set to exchange for this equipment.
