

## Towers 371

### Chapter 371: Three Thousand Pounds

Liu Yan looked at the A-grade Turin Assassin Set that he was wearing.

Although it was a grade lower than the Shiny Golden Armor, it was still a set of equipment. In addition, it was more suitable for Liu Yan's class. In summary, it was naturally incomparable.

Liu Yan looked at the team members and explained the attribute of this equipment.

When members of the Land of Origin team heard this, they were all surprised.

They had obtained a piece of S-grade equipment. Before this, they had rarely even seen A-grade equipment, let alone S-grade equipment.

Although the experience on the fifth level of the Tower was simple, the rewards were similarly huge.

Usually, the ordinary members would not even have the chance to come into contact with A-grade or B-grade equipment, let alone S-grade equipment.

"Generally speaking, it is a piece of equipment suitable for the tank or heavy soldier class. Its defense is extremely outstanding, but at the same time, it is heavy. It is not something that ordinary members can use." Liu Yan explained.

When the members heard this, they were filled with envy. However, they also knew their limits. With their strength, it was obvious that they could not unleash the true power of this Shiny Golden Armor. Even if they could use it, it was uncertain.

Moreover, the top-tier combat strength personnel would have the priority to get this equipment. Ordinary members like them would not have the chance to use it.

After Zheng Tainan learned about the properties of the Shiny Golden Armor, his eyes immediately lit up. He could not help but ask, "I am a heavy armor warrior. Can this piece of equipment be allocated to me?"

Liu Qing, who was at the side, could not bear to watch this any longer. He said in a bad mood, "Didn't you obtain A-grade equipment yesterday? It is battle armor. It should be enough for you to use."

"Everybody wants something better." Zheng Tainan still said with a thick face.

When the surrounding team members saw this, they were instantly unhappy.

They had obtained many good items previously, but top-tier awakened ones like Liu Yan and Xu Han still looked down on them. As a result, many of them benefited geniuses like Zheng Tainan.

During this period, Zheng Tainan and the others changed from top to bottom, and their strength increased significantly.

Now that top-tier equipment had appeared, Zheng Tainan still wanted it. Naturally, everyone was unhappy.

“Zheng Tainan, aren’t you too greedy? You want this too?”

“That’s right. You already have two or three pieces of A-grade equipment, yet you still want S-grade equipment. You’re dreaming.”

“S-grade equipment is definitely for top-tier combat power. It’s not your turn yet.”

“You guys have already taken good equipment. Don’t be unsatisfied.”

...

Many team members voiced out one after another.

However, Zheng Tainan did not mind and said, “I’m just asking. It’s best if you can give it to me. It’s fine if you can’t. It’s not like you must give it to me. Why are you guys in such a hurry? Anyway, it’s Captain Liu’s decision, not mine.”

Liu Yan smiled faintly and said, “I just weighed this Shiny Golden Armor. It weighs about 3,000 pounds. Zheng Tainan, are you sure you still want it?”

Zheng Tainan’s expression changed when he heard that.

A piece of equipment that weighed 3,000 pounds. It was indeed a little beyond his understanding. Was this the terror of an S-grade weapon?

Zheng Tainan’s entire equipment was less than 3,000 pounds. He could barely withstand another 3,000 pounds, but he could not move normally or even fight.

Zheng Tainan knew if he wore Shiny Golden Armor, which weighed 3,000 pounds, his defense would increase. However, his overall combat strength would decrease, which was equivalent to a side effect.

Thinking of this, Zheng Tainan shook his head repeatedly and said, “Ahem, it’s too heavy. I can’t use it. I don’t want it. You should give it to someone who can use it...”

When the surrounding team members saw this, they immediately laughed out loud.

“Haha, Zheng Tainan told you long ago. Don’t even think about getting this S-grade equipment.”

“Even if the captain gives it to you, you won’t be able to use it.”

“You should improve your strength first before considering S-grade equipment.”

“That’s right. No matter how good the equipment is, you must have enough strength to use it. Only then can you unleash its power.”

...

Liu Yan also looked at the remaining top team members at this time.

Liu Yan did not want to use it himself. Other than that, Luo Qingcheng and Chu Long were not from the combat class. They could not use this Shiny Golden Armor that weighed 3,000 pounds.

The remaining candidates were naturally Xu Han and Alan Smith.

Xu Han was a job similar to a mage. She was also good at long-range attacks. The equipment on her body was mainly light armor. Naturally, it was not suitable for her.

Allen Smith was a warrior class, but there were many types of warrior classes. The other warrior classes were not compatible with this armor except heavy-arm warriors.

After all, the Shiny Golden Armor was too heavy. Although one could increase the defense by wearing it, it would also hinder the movement and combat strength of regular warrior classes. It was not worth it.

However, Liu Yan did not know much about Allen Smith. He was not sure if Allen Smith was suitable for this equipment.

Liu Yan could only ask, "Allen Smith, is this equipment suitable for you?"

When the surrounding people heard this, they also looked at Allen Smith.

Allen Smith's strength was tremendously strong. Everyone called him a war machine. In the entire Land of Origin team, he was probably only second to Liu Yan. Naturally, he was worthy of this S-grade equipment.

Alan Smith faced Liu Yan's question and the expectant gazes of the team members. However, he shook his head and said, "The heavy armor is not suitable for me. You should give it to Murong Xue."

When everyone heard this, they were immediately a little disappointed. However, there was nothing they could do.

When Liu Yan saw this, he nodded slightly and said, "Alright, there will be suitable equipment for you later on."

Saying this, Liu Yan looked at Murong Xue.

"This equipment should be suitable for you, right? Three thousand pounds should not be a problem for you, right?" Liu Yan asked.

Hearing this, Murong Xue sneered and said, "It's only three thousand pounds. My shield is five thousand pounds. How dare you look down on me!"

The surrounding team members were all shocked when they heard Murong Xue.

They had seen Murong Xue use that huge Rock Shield before. Its defense was terrifying.

Many team members had guessed that the shield was extraordinary. At the same time, it was also heavy.

They did not expect it to be so heavy. It was at least 5,000 pounds, but Murong Xue could use it easily. It showed how terrifying Murong Xue's strength was.

She was such a beautiful goddess, yet she had such terrifying stamina. It was too much.

Liu Yan was not surprised when he heard this. He threw Shiny Golden Armor to Murong Xue.

Liu Yan threw the Shiny Golden Armor, which weighed three thousand pounds effortlessly. Murong Xue caught it. Both of their stamina was extremely terrifying.

Liu Yan said again, "Just give your B-grade equipment to the ordinary members below. I'll take inventory of the remaining items in this golden treasure chest."

As he said this, Liu Yan continued to take inventory.

Besides the S-grade Shiny Golden Armor, there were also many precious medicinal ingredients in this golden treasure chest. Among them, there were even several A-grade medicinal ingredients that were of great help to Liu Yan.

Apart from that, there were also nearly a hundred Lord's token fragments!

### **Chapter 372: Phantom Blue Staff**

There were so many things in a golden treasure chest.

Whether it was the S-grade equipment, the nearly 100 Lord's token fragments, or those precious medicinal ingredients, they were all worth a lot.

Liu Yan directly put away the Lord's token fragments and selected some of the medicinal ingredients that were useful to him. As for the rest, he handed them over to Luo Qingcheng, who was in charge of distributing them according to the strength and needs of the team members.

When the group of ordinary members saw that there were so many medicinal ingredients in a golden treasure chest, they were instantly overjoyed.

For ordinary members like them, high-grade equipment had little to do with them. They would be given priority to the strong team members, so they could only get the lower-grade equipment.

The Lord's token fragment did not have much to do with them. It was the team's harvest. It would ultimately affect whether the entire team could advance smoothly, so it was important to each team member. However, at the moment, it was indeed not of much help to them.

However, these cultivation medicinal ingredients were different. Every ordinary team member would be able to obtain some of them.

Although the medicinal herbs were not comparable to high-grade equipment and treasures, they were still precious. It was hard to get these medicinal herbs in the first four levels of the Tower. They were expensive too.

The ordinary members could use these cultivation medicinal ingredients to raise their strength quite a bit.

At this moment, Liu Yan also opened the second golden treasure chest.

After the golden light faded, they could see the inside.

A staff emitted a faint blue light. Liu Yan stood at the side and could feel a trace of coldness. It should be an ice attribute staff.

Liu Yan took out the staff and used the smart wristband to check the attribute.

[ Phantom Blue Staff ]

Grade: S

Effects: Magic attack + 3,000, casting speed increased by 20%, frost attribute increased by 20%, group skill increased by 20%!

Description: An ancient dark blue staff. No one knows its exact origin, but its power has left a deep impression on humans.

After looking at the attributes panel of the Phantom Blue Staff, Liu Yan knew about the information of the staff.

It was a powerful S-grade staff and compatible with the frost attribute.

The awakened one that was good at long-range attacks with the frost attribute was the most useful, especially for those good at AOE attacks.

Liu Yan had a frost attribute skill, A-grade Frost Control, but he had this one only.

Liu Yan could use this Phantom Blue Staff, but he might not be able to unleash its full power.

After all, Liu Yan only had one Frost Control. The other skills had nothing to do with the frost attribute.

Moreover, Liu Yan's long-range attacks were usually mainly bow and arrow, so the power was even more powerful.

It was just that to increase the power of Frost Control, using this Phantom Blue Staff was a bit too wasteful. Hence, Liu Yan did not want to use it. It was better to let his subordinates use it.

However, Liu Yan could not think of a suitable candidate for the genius under him.

Murong Xue was a rock pugilist, leaning towards the tank class.

Chu Long was a priest, so she did not need this staff. Luo Qingcheng was leaning towards the functional class, so she did not need it either.

Allen Smith was a warrior, while Xu Han seemed to be a mage. Liu Yan did not know if the staff was compatible with Xu Han.

Liu Yan looked at the crowd and introduced, "It's a frost attribute S-grade staff. It's compatible with a frost attribute mage class. Do we have a frost attribute mage class in our team? Especially one that specializes in group attacks."

As soon as Liu Yan finished speaking, many team members looked at Xu Han. These team members were students from Gifted Academy in the past. It was obvious that they understood Xu Han quite well.

Seeing this, Xu Han hurriedly walked forward. "Hey, hey, hey, me. I'm the most compatible, so give it to me. Why are you still looking for someone else? Seriously, to think that I still treat you as a brother!"

Hearing this, Liu Yan was a little surprised. Previously, Liu Yan had not seen Xu Han make a move. Not to mention the frost attribute spells, Liu Yan had not even seen how Xu Han used spells. Most of the time, he used close combat skills to fight enemies.

“Are you a mage with frost attribute? Didn’t I see that you have a lot of close combat skills?” Liu Yan looked at Xu Han suspiciously.

Xu Han was speechless and replied immediately, “I’m most proficient in frost attribute spells, alright? I didn’t use them because I haven’t had a good chance to use them yet. I dealt with those small fries in close combat not long ago. Even if I use long-range attacks, I don’t need to use the frost attribute spells, right?”

The surrounding students from Gifted Academy hurriedly explained.

“Xu Han used to be known as the number one ice spell user in our academy.”

“That’s right. Xu Han’s ice spell is incomparably powerful. His damage output is terrifying.”

“There are even people who call Xu Han a mage master. Incomparably powerful.”

“Xu Han is usually too lazy to use his ice spell. He will only use it when he meets a powerful opponent.”

...

Liu Yan finally understood when he heard that. It turned out that Xu Han was most proficient in frost and ice spells. Liu Yan did not know about it before. After all, they were not very familiar with each other. It had only been a few days since they became teammates.

“Alright then. I’ll give you this Phantom Blue Staff. It saves me the trouble of finding another suitable person.” As Liu Yan spoke, he threw the staff at Xu Han.

Xu Han quickly received it cautiously as he carefully sized up Phantom Blue Staff. The more he sized it up, the more he felt that it was suitable for him. He was so happy that he kept smiling.

“You’re right. I’ve read about this S-grade Phantom Blue Staff in a book before. It’s powerful, but it’s a treasure among treasures. Even among S-grade weapons, it’s also powerful. Why does it seem like you despise the staff?” Xu Han said. He carefully put away Phantom Blue Staff. It was extremely precious as if he was afraid of damaging it.

Seeing this, Liu Yan was not surprised. The class that relied the most on weapons was probably the mage class.

A powerful staff could be a good guiding weapon. It could help the mage to channel the surrounding elemental energy better. Then, a mage could burst out with even more powerful spell-type attacks.

Liu Yan did not think much of Phantom Blue Staff.

Liu Yan had SS-grade and S-grade weapons. Even his equipment was A-grade.

Even Liu Yan’s S-grade weapons had God’s Effect because he used Divine Extraction. They were more powerful than regular S-grade weapons.

Liu Yan did not think much of these ordinary S-grade equipment and S-grade equipment that did not have God’s Effect.

At this moment, Liu Yan could not help but feel a little distressed. His equipment was too good. It seemed that it would be difficult to find equipment that would be of great help to him from this golden treasure chest.

Liu Yan immediately counted the remaining items in the second golden treasure chest. It was almost the same as the first golden treasure chest.

It was also dozens of Lord's token fragments, precious cultivation medicinal ingredients, and consumables. Liu Yan still left it to Luo Qingcheng to be in charge. He could not be bothered with these trivial matters.

### **Chapter 373: Mysterious Fog Pearl**

Under the gazes of many members, Liu Yan walked to the third golden treasure chest.

Up to this point, the first two treasure chests had S-grade equipment. In addition to the Lord's token fragments and cultivation medicinal ingredients. It could say that he had obtained a huge harvest.

The members of the Land of Origin team were all filled with anticipation.

They had only opened two golden treasure chests. Yet, they had already obtained many items. There were still three golden treasure chests left. It was hard to imagine how great the rewards would be.

"One golden treasure chest and one S-grade equipment. The rewards are too great."

"That's right. In the past, I did not even dare to dream that we would obtain so many S-grade equipment pieces."

"This is the first time I've seen S-grade equipment."

"That's normal. It's a golden treasure chest. You can find hundreds of bronze treasure chests but only one or two golden treasure chests. They're incredibly rare."

"I participated in the search for a golden treasure chest in our territory. It's located more than 20 meters below us. It took us quite a while to find the exact location. If we were to search for it on the ground, we probably wouldn't be able to find it in our lifetime."

...

The team members were all discussing excitedly.

At this moment, Liu Yan opened the third golden treasure chest.

After the dazzling golden light, Liu Yan finally saw the items inside.

Unlike the first two treasure chests, there was S-grade equipment, a pile of Lord's medallion fragments, medicinal ingredients, consumables, and others.

The third golden treasure chest was more spacious. There was only a fist-sized pearl, nothing else.

However, this pearl looked incomparably divine. Liu Yan could sense terrifying energy from it. It was far from an ordinary item.

Liu Yan picked it up and used his smart wristband to check the information.

[ Mysterious Fog Pearl ]

Grade: S

Effect: Contains a terrifying amount of energy. It can increase the user's recovery speed. At the same time, the user can use the energy in it at any time. (The Mysterious Fog Pearl will automatically recharge and store energy.)

Description: It says that it contains a terrifying amount of energy. The awakened can continuously cast spells for three days and three nights after using it.

After looking at the information panel, Liu Yan was a little surprised. It was a treasure.

Liu Yan had seen many S-grade equipment pieces but had not seen many S-grade treasures. It was really too rare.

Treasures were different from equipment. They had more powerful effects.

Treasures of the same grade were far more precious than equipment of the same grade.

Only then did Liu Yan understand. No wonder there was nothing else in the third golden treasure chest. It was just a Mysterious Fog Pearl.

The Mysterious Fog Pearl was too precious. An S-grade treasure was already more precious than all the items in the previous two golden treasure chests combined.

The function of this Mysterious Fog Pearl was also simple. It had a lot of energy, which could help the user recover energy quickly. At the same time, the user could also directly extract the energy within to replenish their strength.

It was more or less the meaning of mana regeneration.

The awakened one would feel tired as the battle continued. If they continuously cast spells, they would also lose energy. They would need to rest for some time before they could continue fighting.

With the Mysterious Fog Pearl, they could continue fighting.

However, the effect of Mysterious Fog Pearl would be different on different awakened ones. Some awakened ones would run out of energy after a few minutes of fighting.

Liu Yan was different. Usually, even if he fought with all his might for half a day, Liu Yan felt he could continue fighting.

It was probably because of the high spirit that he could store more energy in his body.

The Mysterious Fog Pearl was naturally a top-tier treasure. Liu Yan needed to give it to the most suitable awakened for the best use.

Liu Yan pondered for a moment. There were only three suitable candidates.

The first was Chu Long, which Liu Yan felt was the most suitable existence. After all, when Chu Long was a healing priest. She had repeatedly experienced a lack of stamina and spiritual energy. It was obvious that the energy in her body was not enough.

In reality, Chu Long's mental strength was not low either. It was just that her healing talent was too good. Those powerful healing skills consumed far more energy than skills of the same grade, which was why these situations occurred.

If Chu Long had the Mysterious Fog Pearl, she could avoid this situation in the future.

This way, Liu Yan and the others would have a powerful priest who could constantly heal them. This priest also did not lack mana and could continuously heal them. It was ridiculous.

The second person was Liu Yan himself. However, Liu Yan's spirit was relatively high, so he did not need the Mysterious Fog Pearl for the time being.

Liu Yan might need it, but that was a matter for the future. Moreover, if he gave the Mysterious Fog Pearl to Chu Long, he could still ask Chu Long to give it back.

The third candidate was Xu Han. As a powerful mage, he also had a high energy demand.

However, according to Liu Yan's understanding, Xu Han's spirit was tremendous, and he did not need the Mysterious Fog Pearl for the time being.

Moreover, Xu Han had just obtained S-grade equipment. Giving it to Xu Han would undoubtedly be a little unfair.

It was still better to increase the strength of the team members in all aspects and comprehensively increase their combat strength.

After thinking about it, Liu Yan looked at everyone. First, he told everyone about the use of the Mysterious Fog Pearl. Then, he said, "I've thought about it. This Mysterious Fog Pearl is most suitable for Chu Long. Does everyone have any objections?"

When the team members heard this, they shook their heads.

They had already witnessed Chu Long's terrifying healing abilities. The Mysterious Fog Pearl would maximize Chu Long's healing ability.

Moreover, under Liu Yan's leadership, the injured members had long since recovered. Naturally, they were extremely grateful and worshipped Liu Yan. Naturally, they did not have any objections to Liu Yan's words.

"I don't have any objections. Whatever the captain says."

"Chu Long has such strong healing abilities. She's completely worthy of it."

"If Chu Long has this Mysterious Fog Pearl, she won't lack energy. Coupled with her terrifying healing abilities, do we still need to be afraid of getting injured?"

“If we were to fight again, I would directly charge to the front. There’s no need to be afraid of getting injured. As long as I don’t die, I’ll be okay. In any case, Chu Long will heal us. There’s no need to worry! Haha!”

“I didn’t expect this golden treasure chest would have an S-grade treasure. It’s really rare.”

“No wonder there’s only one thing in a treasure chest. It’s a treasure, not a piece of equipment.”

...

Murong Xue, Xu Han, and the others naturally did not have any objections.

Seeing this, Liu Yan did not say anything else and directly handed the Mysterious Fog Pearl to Chu Long.

Seeing this, Chu Long was a little hesitant. This Mysterious Fog Pearl was too precious. Two pieces of S-grade equipment could not even compare to an S-grade treasure, and Liu Yan gave it to her just like that.

“Why don’t we give it to someone who needs it more?” Chu Long hesitated for a moment before saying. As a priest, she felt she did not need such a good treasure.

Hearing this, Liu Yan forcefully stuffed the Mysterious Fog Pearl into Chu Long’s hands and said with a smile, “You’re the most suitable candidate. Keep it well and treat us well in the future.”

Seeing this, Chu Long could not refuse anymore and could only keep it.

“Alright then.”

### **Chapter 374: Blood Flame Sword**

After distributing the S-grade treasures from the third golden treasure chest, Liu Yan turned his gaze to the remaining two golden treasure chests.

Liu Yan immediately stepped forward and opened the remaining two golden treasure chests.

These two golden treasure chests were somewhat similar to the previous two golden treasure chests. There were many Lord’s token fragments, medicinal ingredients, and consumable items, as well as a piece of high-grade equipment.

The two pieces of equipment were a sword and a pair of boots.

Liu Yan picked up the sword and examined it.

[ Blood Flame Sword ]

Grade: S-grade

Effect: Attack + 4,000, with fire attribute damage

Special Effect: Absorbs the opponent’s blood essence during battle. The blood can continuously increase the power of the sword, emitting sword qi. At the same time, it can replenish the user’s stamina, allowing the user to have the ability to fight for a long time.

Liu Yan's eyes lit up when he saw the effect of the Blood Flame Sword.

This S-grade weapon had a special effect. It was indeed not bad.

Although it was not as strong as God's Effect, it was still pretty good.

Overall, it was a powerful S-grade sword-type weapon. It was incomparably sharp too.

The biggest highlight was that it could absorb the opponent's blood essence during battle.

The blood essence absorbed could not only increase the power of the sword itself, allowing the Blood Flame Sword to emit a powerful sword aura. At the same time, it could complement the user by recovering their stamina, thus maintaining the ability to continue fighting.

Previously, the Mysterious Fog Pearl was used to help the user recover energy to cast spells for a long time.

On the other hand, the Blood Flame Sword could help the user recover stamina. This way, the user would have more strength to keep fighting.

These two items had different recovery effects. One was energy, and the other was stamina.

However, Liu Yan was immediately disappointed. Liu Yan naturally wanted to find a good weapon or equipment to replace and strengthen himself.

However, the Blood Flame Sword was not suitable for Liu Yan. It seemed too ordinary.

Liu Yan did not need the additional fire attribute damage. After all, he already had an A-grade skill, Flame Control. He could give any weapon additional fire attribute power.

As for the special effect, Liu Yan did not need them.

After rebuilding his body, Liu Yan's stamina and endurance were strong.

If he relied solely on his stamina to fight, Liu Yan would be able to fight for three days and three nights without getting tired. It was because Liu Yan's stamina was already too exaggerated.

The most crucial point was that this Blood Flame Sword was a sword-type weapon. Liu Yan did not have much exp and did not have any related skills.

Moreover, in terms of close combat, Liu Yan already had Blade of the Night as an assassination weapon and Blue Flame Gloves for the frontal battle.

Blade of the Night and Blue Flame Gloves both had God's Effect. One was an S-grade weapon, while the other was an SS-grade weapon. Both were extremely powerful and were much better than the Blood Flame Sword.

These two weapons were more compatible with Liu Yan's class and skill. They could form a system of battle.

If Liu Yan was allowed to use this Blood Flame Sword, he could only randomly wave it around. His combat strength would reduce without a skill to match Blood Flame Sword.

After thinking about it, Liu Yan decided to give this Blood Flame Sword to someone who needed it even more.

Among the top team members, they were not suitable. Only Allen Smith was suited to use Blood Flame Sword.

If Allen Smith could not use it, then Liu Yan could only temporarily keep the Blood Flame Sword. He would give it to them in the future when his team members were strong enough to use it.

At the moment, not to mention these ordinary members, even a good member like Zheng Tainan would not display the true power of an S-grade weapon.

It would be a waste if it were in their hands. It would be better to let Liu Yan eat dust.

Liu Yan then explained the attribute of the Blood Flame Sword to his team members.

Then, Liu Yan looked at Allen Smith and asked, "Allen, is the Blood Flame Sword suitable for you?"

Liu Yan had seen Allen Smith's attacks before. It seemed that he did not use any weapons.

However, looking at Allen Smith's style, he was somewhat compatible with the Blood Flame Sword.

Xu Han could not help but say, "Allen Smith likes to use swords the most. He hasn't found the sword he wanted, so he would rather not use weapons to fight barehanded. Allen Smith should be satisfied with this Blood Flame Sword."

As expected, Allen Smith stared at the Blood Flame Sword in Liu Yan's hand after listening to Liu Yan's explanation of its attribute. He was always calm, but he revealed a passionate expression toward Blood Flame Sword. It was obvious that he was very interested.

"It suits me very well." Allen Smith said directly.

Although his words were short, Allen Smith's gaze undoubtedly revealed his inner thoughts. It was obvious that he liked this Blood Flame Sword very much.

Seeing this, Liu Yan decided to let it be. He handed the Blood Flame Sword to Allen Smith.

After Allen Smith received the Blood Flame Sword, he could not help but carefully examine it and feel it. From time to time, he would gently touch it.

Following that, Allen Smith said, "You guys continue. I'll find a space to test my sword."

As he said that, Allen Smith could not wait to leave. He was no longer as cold and calm as he usually was.

When the team members saw this, they immediately started discussing it.

"I didn't expect Allen Smith to look excited. I thought he had always been cold and aloof. Haha."

"That's normal. Allen Smith has always liked swords, but he has never found a sword he's satisfied with."

“It’s said that Allen Smith had a sword before. It seemed to be a B-grade sword, but it couldn’t withstand Allen Smith’s strength at all. It was damaged during the battle. Later on, Allen Smith never found a good sword again. This time, he finally found one.”

“For a swordsman who loves swords, no other weapon can replace it.”

...

Liu Yan heard the discussions of his team members and gained a better understanding of Allen Smith.

Liu Yan could not help but feel some anticipation in his heart. Allen Smith, who liked to use swords the most, was able to have such powerful combat strength even when he did not have a sword. How strong would he be if he used a sword?

Liu Yan could not help but look at Xu Han and teased, “If Allen Smith gets his hands on the Blood Flame Sword, it looks like you won’t be his match in the future.”

When Xu Han heard that, he said with a disapproving expression, “Didn’t I also get the Phantom Blue Staff, and my strength increased greatly? It’s hard to say who’s stronger. Besides, so what if Allen Smith is stronger than me? In the end, he can only fight one-on-one. I can fight many people at once, so my role in the battle is even greater. He won’t be able to compare to me for the rest of his life!”

When the team members heard Xu Han’s words, they could not help but laugh out loud. It was obvious that they had long gotten used to Xu Han’s personality.

When Liu Yan heard this, he could not help but laugh at Xu Han.

However, Liu Yan also understood that Xu Han’s words were somewhat reasonable.

On the battlefield, a powerful mage-type awakened one was more able to control the battle situation than a swordsman-type awakened one.

However, Allen Smith’s class would have an advantage in a special battle. It could be said that each of them had its own advantages.

### **Chapter 375: Second SS-grade Equipment**

After distributing the Blood Flame Sword, Liu Yan looked at the last piece of equipment remaining in the golden treasure chest.

The last piece of equipment was a pair of boots. The boots were white, and they looked somewhat ordinary. They looked inferior to the previous S-grade equipment or even S-grade treasures.

However, Liu Yan still picked up the boots and inspected them.

[ Heavenly Cloud Boots ]

Grade: S-grade

Effect: Speed + 3,000

Special Effect: Able to step on the air and soar into the air temporarily (lasts for 3 minutes at most)

When he saw the Heavenly Cloud Boots' effect, Liu Yan's eyes lit up.

The overall attributes of the boots were very ordinary. Their speed only increased by 3,000. It did not have any additional attributes too. So, it was no different from other S-grade equipment.

The main point was its special effects.

Previously, in the metal attribute territory battle, Liu Yan had fought on Undying Fire Phoenix.

That was also the first time Liu Yan flew into the sky. He felt that it was novel and nice.

Besides the excitement of being able to fly in the sky, it was also very helpful in battle.

Firstly, he could see the situation on the ground from the sky. It would be very convenient for Liu Yan to command the battle.

Secondly, it would be more convenient. After all, many attacks from the ground could not reach the sky. On the contrary, Liu Yan was good at long-range attacks. He would have a huge advantage if he could attack from the sky.

After experiencing that battle, Liu Yan looked forward to flying. After all, he could not always rely on the Undying Fire Phoenix.

Sometimes, Liu Yan also needed Undying Fire Phoenix to perform other battle missions. Also, when he left the fifth level of the Tower, he would no longer have Undying Fire Phoenix to use.

However, flying was extremely difficult for the awakened.

Only a top-tier expert on the tenth level of the Tower could fly freely. That was too far away from Liu Yan.

Other than that, he also had to grasp the wind attribute secret art. It was not too far from Liu Yan but still some distance away.

There was another way, and it was the most convenient shortcut. That was to rely on equipment or treasures.

Heavenly Cloud Boots in front of him was one of them.

Heavenly Cloud Boots itself was a piece of regular S-grade equipment. However, its special effect made it special. Liu Yan really liked it.

However, the flying time was indeed a little short. Three minutes were far from enough.

Fortunately, Liu Yan could still use Divine Extraction to raise the grade of Heavenly Cloud Boots.

After Heavenly Cloud Boots reached SS-grade, he believed the boots would not be so ordinary anymore.

Liu Yan liked Heavenly Cloud Boots very much.

Liu Yan explained the attributes of the Heavenly Cloud Boot to his team members. He also stated that he wanted to keep it. This way, he could command them in the air.

When the team members heard about Heavenly Cloud Boots' attribute, they felt it was ordinary and did not take it seriously. They thought it was not as good as the previous few pieces of equipment. They did not understand why Liu Yan liked this pair of Heavenly Cloud Boots.

However, none of the team members had any objection to Liu Yan's choice.

After distributing a few pieces of S-grade equipment and S-grade treasures, the other harvest in the golden treasure chest had also been distributed.

What was left were the cultivation medicinal ingredients and consumables in the golden treasure chest. Moreover, there were many bronze treasure chests and silver treasure chests.

Naturally, Liu Yan could not open these low-grade treasure chests one by one. He handed them all over to Luo Qingcheng. Luo Qingcheng then arranged for people to open them and recorded the loot they obtained.

They gave all the Lord's token fragments to Liu Yan as usual.

They distributed the equipment to the members according to their strengths. It would increase the overall strength of the team members to the greatest extent.

As for the cultivation medicinal ingredients and consumables, they kept some of them for backup. The rest were distributed according to the strength and condition of the team members to help them cultivate and increase their strength.

After Liu Yan returned to his tent, he could not wait to take out the Heavenly Cloud Boots he had just obtained.

Other than being able to fly for three minutes, the other qualities of Heavenly Cloud Boots were ordinary.

Even the attribute of being able to fly for three minutes was somewhat ordinary.

Although the flying attribute was rare and precious, three minutes of flying time was still limited. Its effect would be relatively small.

However, Liu Yan was not worried about this. In any case, he had the SSS-grade skill, Divine Extraction, which could directly raise the level of Heavenly Cloud Boots.

According to experience, equipment that was enhanced through Divine Extraction would retain and strengthen its original attributes. At the same time, it would get God's Effect.

If the flying attribute of Heavenly Cloud Boots was slightly strengthened, it would probably be able to meet Liu Yan's needs. Its God's Effect was something worth looking forward to.

Then, Liu Yan used Divine Extraction.

A milky white light landed on Heavenly Cloud Boots, and a notification appeared in front of Liu Yan.

[ Divine Extraction of Heavenly Cloud Boots (S-grade) successful. Congratulations on obtaining Gale Boots (SS-grade)! ]

At this moment, Liu Yan also noticed that the original appearance of the Heavenly Cloud Boots had undergone some changes. The overall changes were not drastic. There were only some patterns added to the boots. These patterns seemed to be the shape of the gale, and one would not be able to see them without looking carefully.

Overall, the SS-grade Gale Boots still looked somewhat ordinary and not powerful.

However, Liu Yan knew that Gale Boots was SS-grade equipment, so it could not be ordinary. Since it had been upgraded to SS-grade after the Divine Extraction, it would be more powerful.

Liu Yan hurriedly checked the attribute of the Gale Boots.

[ Gale Boots ]

Grade: SS-grade

Effect: Speed + 8,000. The user's body is light enough to step in the air and fly.

God's Effect: Gale Force (after activation, the user's body can transform into a gale and fly. The user's speed is fast, and the user can also use high speed to pierce through the opponent and instantly kill the opponent!)

Seeing the effect of Gale Boots, Liu Yan knew he was right.

SS-grade equipment looked ordinary, but it was extraordinary.

After leveling up, Gale Boots' speed suddenly increased to 8,000. It was almost equal to Liu Yan's speed.

It meant Liu Yan could double his speed by wearing Gale Boots. It was a huge increase.

After all, it was SS-grade equipment, and the basic attribute were all so exaggerated.

And the increase of the basic attribute was only the smallest aspect.

The flying ability of Gale Boots suddenly increased by quite a lot. Liu Yan could stay in the air as long as he could instead of three minutes.

It also meant that if Liu Yan wore Gale Boots, he could fly completely, possessing the flying ability of a top-tier expert.

Of course, Liu Yan also understood that there was still a huge gap between this kind of flying and the complete flying of a top-tier expert.

But even so, it was already powerful and enough for Liu Yan.

And apart from these improvements, as expected, there was also God's Effect.

Gale Force could temporarily turn Liu Yan's body into a gale and allow him to fly rapidly in the air. It was a little exaggerated.

Its basic attribute could only allow him to fly, but his speed would not be too fast. It was slower than the flying creature like Undying Fire Phoenix, not to mention the flying speed of a top-tier expert.

After all, stepping in the air was equivalent to walking in the air.

However, with Gale Force, there was no need to worry about that. Liu Yan could use Gale Force to increase his flying speed.

In addition to increasing one's speed, Gale Force could also be used as an attack skill. It could use a fast speed to charge at the opponent and cut the opponent.

### **Chapter 376: The Gale Force**

Liu Yan kept fiddling with Gale Boots in his hands.

With Gale Boots, Liu Yan could fly freely in the future. It was naturally very convenient.

The original Heavenly Cloud Boots were weaker. After the Divine Extraction, its quality suddenly changed. The result made Liu Yan satisfied.

In the end, all of this was still because of the power of Divine Extraction.

It was a pity that Liu Yan could not help them raise their levels with the previous few S-grade equipment and treasures. Otherwise, he would reveal the secret of Divine Extraction, which would bring unnecessary trouble to himself.

It was why Liu Yan explained the attributes of Heavenly Cloud Boots to his team members. He kept it vague and did not explain it very clearly.

Otherwise, if they knew Heavenly Cloud Boots could allow users to fly for three minutes, they would be suspicious if Liu Yang flew in the air longer than three minutes.

Liu Yan withdrew his thoughts and put on Gale Boots. Instantly, he felt that his already light and lithe body became even lighter. If he exerted a little strength, he could fly into the air.

Liu Yan tried to walk into the air. Instantly, he walked into the air and stopped in the air.

After carefully feeling it, Liu Yan had some understanding.

The function of Gale Boots was to make the user's body extremely light. Then, the user could step into the air and fly in the air.

When the user stopped in the air, their body would slowly descend, but the speed was slow. As long as the user took two more steps in time, they could stay in the air, thus achieving the effect of flying.

Although it wasn't really flying, Liu Yan was still satisfied with the result

Liu Yan wore Gale Boots and went outside the tent. Then, he walked into the air and familiarized himself with Gale Boots.

At this moment, many team members were receiving all sorts of loot.

This time, they had collected many treasure chests. Some of them were high-grade treasure chests. Naturally, they obtained a lot of useful items.

More than half of the team members had replaced and strengthened their equipment.

The overall combat strength of the team members had been greatly improved.

In addition, these team members also obtained a lot of medicinal ingredients and consumable items.

In the future, they could use these medicinal ingredients and consumable items to increase their strength. It was much faster than their regular training.

The team members were thrilled. Soon, someone noticed Liu Yan in the air and immediately looked up at him.

Seeing Liu Yan flying freely in the air, everyone was immediately envious.

“Wow, Captain can fly by himself.”

“Captain’s long-range attack ability is already ridiculously powerful. Last time, he displayed its terrifying long-range attack ability while riding Undying Fire Phoenix. Now that he can fly by himself, isn’t it amazing?”

“Haha, in future battles, with such powerful support in the air, are we afraid that we won’t be able to defeat the other party?”

“In that case, that S-grade boot is special.”

“We could not fully utilize the boots, but an expert like Liu Yan could fully display the effect of the boots.”

“No wonder Captain wants to keep that pair of boots. That pair of boots look ordinary, but they are quite strong.”

“Which piece of flying equipment can be bad?”

...

The team members looked up at Liu Yan, feeling extremely envious.

However, it didn’t take long for Liu Yan to disappear from their line of sight.

Liu Yan tried to use Gale Force when there was no one else around him.

Liu Yan had been flying slowly just a moment ago. After using the skill, he transformed into a gust of gale instantly. His speed was incomparably swift and fierce.

In the blink of an eye, Liu Yan had already arrived at the boundary of the fire attribute territory.

Liu Yan hurriedly stopped using Gale Force, his face full of astonishment.

The speed of Gale Force far exceeded Liu Yan’s expectations.

Liu Yan had an S-grade skill, 16 Times Sonic Speed, so he was naturally more sensitive to speed.

After thinking about it carefully, he estimated that the speed just now was at least eight times the speed of sound if it wasn’t ten times the speed of sound.

Although this speed was not as fast as Sonic Speed, Liu Yan was still in the form of a gale. He was not in his human form.

It was different.

After all, as a human, Liu Yan was only fast, but he could not hit a thing. The terrifying impact of such a high-speed collision might very well kill Liu Yan.

It was also not possible to attack a human. Under the terrifying impact of such a high-speed collision, it was possible to smash the opponent into pieces. However, Liu Yan himself probably would not be able to recover.

However, Gale Force was different. It could let Liu Yan turn into the form of a gale, so he could naturally ignore the impact.

In this way, other than using the Gale Force to travel, Liu Yan could also use it to attack.

With such a fast speed, he could kill his opponent instantly.

It was only at this moment that Liu Yan realized the terror of Gale Boots.

Following that, Liu Yan continued to give it a try. After he familiarized himself with Gale Boots a little more, he returned to the camp to rest.

This night was a sleepless night for many team members.

They had all obtained high-grade equipment, and their strength had increased. They were extremely happy.

Apart from that, they also obtained many high-grade cultivation medicinal ingredients and consumables. The members did not rest and were busy using these high-grade cultivation medicinal ingredients and consumables they had just got to increase their strength.

Among them, Zheng Tainan was also overjoyed. Previously, he had lost Angry Buddha Purple Lotus to Liu Yan. But now, Zheng Tainan did not care at all.

Although Angry Buddha Purple Lotus was precious and had cost Zheng Tainan all of his wealth, it was inferior to the high-grade medicinal ingredients he obtained these few days. It was not even one-tenth of what he had got.

Zheng Tainan could not help but feel a little regretful. If he had known that following Liu Yan would bring him so many benefits, he would give Angry Buddha Purple Lotus to Liu Yan. Perhaps he would have been able to befriend Liu Yan and obtain even more benefits.

Liu Yan was so powerful. The additional benefits he gave Zheng Tainan would be enough for Zheng Tainan to work hard for several years.

Putting everything else aside, if he could obtain an S-grade weapon, he would be rich!

At the same time, the rest of the team members were also absorbing the high-grade medicinal ingredients they had obtained to increase their strength.

That night, the strength of team members of the Land of Origin team was increasing rapidly.

On the other side, in the temporary camp of the European Federation team.

Hans Wilson was discussing the plans with a few of his core subordinates late at night.

They could not take down the Red Star Empire team, and their camp was attacked. As a result, they lost their ally, the New Continent team.

In this battle, the European Federation team suffered a huge loss.

They lost their dominance in this competition. They had gone from being the strongest of the three forces on the fifth level of the Tower to being the weakest.

The current situation was extremely awkward for the European Federation team.

Hans Wilson had a stern expression as he discussed the solution with a few of his core subordinates.

### **Chapter 377: Rapid Development**

Water attribute territory, in a conference room in the temporary camp of the European Federation.

Captain Hans Wilson and vice-captain Derek Dole were discussing.

“We’ve lost too much in this battle. We offended the Red Star Empire team. We’ve also allowed the Land of Origin team to develop. Sigh.” Hans Wilson sighed helplessly.

Derek Dole said helplessly, “The first thing I did was to lead all the remaining members to support them. Unfortunately, the metal attribute terrain was complicated. We were also attacked by the Land of Origin team. Although they didn’t have many members, their individual strength was great. They caused us quite many injuries and delayed our actions.”

“It’s not your fault. I didn’t expect the Land of Origin team to be so strong, to be able to attack the metal attribute territory so quickly.” Hans Wilson waved his hand.

Hans Wilson thought about it, but he still felt that the loss this time was because he had underestimated the strength of the Land of Origin team. It affected his judgment, and he made the wrong decision, which led to this situation.

If Hans Wilson had known earlier that the Land of Origin team was so strong, he would not have decided to attack the Red Star Empire team.

“We need to learn our lesson and send more people out to scout for information. We must understand the movements and strength of the other two forces, especially the Land of Origin team. They have always been so low-key. We have too little information about them.” Hans Wilson said painfully.

Hearing this, Derek Dole also felt that it made sense. Only by knowing oneself and the enemy could one win a hundred battles.

“Alright, I’ll make arrangements later. We’ll go out overnight and be in charge of scouting for information.” Derek Dole said with a nod.

Then, the two of them discussed the next step of their plan.

The current situation was undoubtedly disadvantageous to the European Federation team.

Naturally, they could not take the initiative to attack the Red Star Empire team later on. They had to observe the situation first.

The European Federation team was no longer the strongest among the three forces. They had to be careful in their actions.

At the same time, in the temporary camp of the Red Star Empire team in the earth attribute territory.

Captain Ye Yifan was also discussing the next step of their plan with a few of his subordinates.

This time, they had achieved victory in their defense and had narrowly escaped elimination. The few core members were all filled with joy.

“Alliance Number 1 dared to make a move against us. Now, they have suffered.”

“Let them taste the feeling of losing an ally.”

“Previously, it was because they had an ally that we dared to make a move against us. Otherwise, they wouldn’t have dared to do so even if they were eight times braver.”

“At first, I thought they had been eliminated, but they suddenly came back to life.”

“If there’s a chance, we must eliminate Alliance Number 1 and take revenge!”

...

Ye Yifan was not that happy at this moment. His team had narrowly escaped elimination, but the situation was still disadvantageous to them.

The European Federation team had lost an ally, and their attack had failed. They had been advancing steadily in the process of attacking and did not attack forcefully. Hence, they did not lose too much combat strength.

The European Federation team still had strength. They were not even weaker than The Red Star Empire team.

The most troublesome thing was the Land of Origin team was eyeing them like a tiger watching its prey.

Up until now, the Land of Origin team had already eliminated two teams. They had defeated the Pan-ocean Community team and the New Continent team. Their strength was indeed somewhat astonishing.

Ye Yifan thought for a moment. He said in a deep voice, “No matter how big the conflict between us and the European Federation team is, we can’t take the initiative to attack now. If the European Federation team dares to attack again, we naturally have to strike back fiercely. However, if they don’t come, we can’t take the initiative to attack either. We can’t let the Land of Origin team get benefit from it.”

When his subordinates heard this, they were unwilling and wanted to take revenge on the European Federation team. However, they could only helplessly agree when they heard captain ye Yifan’s order.

Ye Yifan knew that the next move was crucial. It would affect whether they could advance or not and whether they would be rewarded.

Therefore, every next step was crucial. They could not make a wrong move and had to be careful.

Following that, Ye Yifan also sent people to investigate the movements and status of the European Federation team and the Land of Origin team, especially the situation of the Land of Origin team.

Ye Yifan learned his lessons and no longer dared to underestimate the Land of Origin team. He had long regarded the Land of Origin team as their greatest enemy.

The next day, in the fire attribute territory.

Liu Yan and the others had a rare chance to take a break.

After two consecutive battles, Liu Yan knew he needed to take a break. He could not continue fighting. If he were under too much pressure, it would put him and his team into trouble.

In any case, the current situation was already advantageous to his side. There was no need to be in such a rush.

Moreover, with Gold Talent and his Extraordinary Five Senses, Liu Yan could open up the whole map. He could gather tons of treasure chests from the three territories. It was the best time for his team to develop.

Of course, Liu Yan also sent some people to investigate the movements of the European Federation team and the Red Star Empire team. He needed to monitor their every move.

The best candidate to investigate the situation was undoubtedly Purple Wind Falcon.

Purple Wind Falcon could fly high in the sky and freely enter other territories. It would not attract the attention of the other teams.

After all, no one could see Purple Wind Falcon flying high in the sky.

Although Purple Wind Falcon did not have much combat strength, its functionality was powerful.

Purple Wind Falcon had been a great help to Liu Yan on the fifth level of the Tower.

This experience also made Liu Yan realize the importance of functional pets. In the future, he had to find an opportunity to help Purple Wind Falcon improve so that it could display greater functionality.

Liu Yan and the other top team members were completely free.

But the ordinary team members were not free.

The members of the Land of Origin team were very busy. Some were guarding the territory, while some were collecting treasure chests.

Occasionally, some team members were allowed to take a break. However, they did not rest. Instead, they used the high-grade medicinal ingredients and consumables they obtained to cultivate and improve their strength.

The rules of the Tower's trial were incomparably cruel. They all understood the importance of increasing their strength. Thus, they did not dare to relax in the slightest. Seizing every minute, they tried to increase their strength as much as possible. They wanted to play a greater role, walk even further, and head to a higher place in the Tower and a wider world.

Besides the fire attribute territory, many members of the metal attribute territory and water attribute territory were also busily on guard and collecting treasure chests.

Of course, they had to hand over the treasure chests they collected to Liu Yan, which was equivalent to working for him.

### **Chapter 378: In the Lead**

At dusk.

Liu Yan was taking a break when Luo Qingcheng came looking for him.

Seeing Luo Qingcheng, Liu Yan looked up and asked, "How was it? Did everything go well?"

Luo Qingcheng nodded slightly and reported, "Everything went smoothly. We have collected all the treasure chests you marked in the three territories. We have opened all the treasure chests and obtained tons of cultivation medicinal ingredients and consumables. Most of them are good grades and are very helpful to the team members. During this period, the strength of the team members has been increasing rapidly. I have a rough understanding. The level of combat strength has increased from the previous average of level 35 to level 39, and it is still increasing rapidly. Currently, the overall combat strength of our team has already surpassed that of the other two representative teams."

When Liu Yan heard this, he was a little surprised. He did not expect the improvement to be so fast.

However, he remembered they had many treasure chests with tons of high-grade cultivation medicinal ingredients and consumable items. It was impossible for the members to increase their strength slowly. It was within the expectation that they could improve their strength at such a speed.

Moreover, they could continue to increase their strength. When they completely consumed all the cultivation medicinal ingredients and consumable items, the members' strength would be much stronger.

"It seems that those medicinal ingredients and consumables are helpful." Liu Yan could not help but praise.

"Yes." Luo Qingcheng nodded her head and said, "The level of the team members has increased, and their combat strength has increased even more. Now, many of the team members can fight beyond their grades. The increase is huge."

"That's good." Liu Yan heard her words and felt relieved.

They could not rely on top-notch team members like Liu Yan for every matter. The combat strength of these ordinary team members was also crucial.

It was indeed a good thing that these ordinary team members could improve their strengths significantly.

Luo Qingcheng continued to report, "In addition, we have also obtained a lot of equipment. There is no golden treasure chest. The highest level of equipment is A-grade, but it is already powerful. For these ordinary team members, it is also a significant improvement. We're still using the previous distribution rules. We distributed the equipment according to the occupation, compatibility, and strength of the members. The strong will first obtain better equipment. Then, they give their original equipment to the weaker members. Because of this reason, our members are training crazily to improve their strength as if they were injected with stimulants. They want to be stronger, so they can be allocated better equipment and become powerhouses."

Liu Yan was a little surprised when he heard this.

Initially, this equipment distribution rule was set up so that these team members could better display the power of their equipment. At the same time, it could also increase the overall strength of the team members.

However, Liu Yan did not expect more members were encouraged to train harder because of this rule. They wanted to become stronger so that they could obtain better equipment.

It just so happened that these members also had a good environment, with many high-grade cultivation medicinal ingredients and consumable items.

It was their most extravagant and the best cultivation environment for most members.

When the members were training in the academy, how could they use many high-grade medicinal ingredients and consumable items?

After understanding the equipment and consumables, Liu Yan was also concerned about the Lord's token fragment, which was extremely important to the entire team.

"How is the collection of Lord's token fragment coming along? There are so many treasure chests. There should be a lot of Lord's token fragments, right?" Liu Yan asked.

Luo Qingcheng nodded slightly and opened her storage ring. A pile of Lord's token fragments appeared in front of Liu Yan.

"I've counted them all. There are a total of 4,201 Lord's token fragments. According to your instructions, all the Lord's token fragments are here. There's nothing left out." Luo Qingcheng reported.

Liu Yan's face was filled with joy when he heard this. Previously, Liu Yan had close to a thousand Lord's token fragments.

Adding these four thousand Lord's token fragments, the Land of Origin team collected more than five thousand Lord's token fragments. They had completed half of the competition's goal.

The rules set by the Will of Tower were to collect 10,000 Lord's token fragments.

If Liu Yan's team could collect 10,000 Lord's token fragments and synthesize them into a Lord's token, they could be in the top 3. Then, they would be able to complete this competition on the fifth level of the Tower and smoothly advance.

Three days ago, Liu Yan and the others were still worried about collecting Lord's token fragments. They felt it would be long before they could collect 10,000 Lord's token fragments.

Three days later, Liu Yan and the others had completed half their goal. They had collected more than 5,000 Lord's token fragments. They were no longer far from their goal of collecting 10,000 Lord's token fragments.

And the most crucial factor in all of this was Liu Yan's Gold Talent and Extraordinary Five Senses.

Of course, eliminating the two representative teams and conquering three attribute territories were crucial for them.

Things would be different if Liu Yan only had one territory even though he could sense the location of the treasure chest. Otherwise, he could not get his team members to go to the other teams' territories to collect the treasure chests.

If there were only one territory, the harvest would be much lesser. Naturally, it would not be able to reach the current 5,000 Lord's token fragments.

Just as Liu Yan was feeling happy, the Will of Tower's voice suddenly sounded.

[ Reporting the current situation on the fifth floor of the Tower. ]

[ Currently, there are three teams left. They are the European Federation team of Alliance Number 1, the Red Star Empire team of Alliance Number 2, and the Land of Origin team. ]

[ Alliance Number 1 has collected 732 Lord's token fragments. Currently, the Second Alliance has collected a total of 542 Lord's token fragments. The Land of Origin team has collected 5,014 Lord's token fragments. Currently, the Land of Origin team is number one. I hope that everyone will continue to work hard! ]

Liu Yan was stunned when he heard the Will of Tower's announcement. Then, his face turned a little awkward.

This Will of Tower was really something. It made the announcement when Liu Yan was collecting bunches of Lord's token fragments.

Initially, Liu Yan had hoped that Alliance Number 1 and Alliance Number 2 would continue to cause some friction and wear down their strength. Then, the Land of Origin team could relax and develop slowly.

However, the Will of Tower exposed their progress. No matter how slow the reactions of the other two forces were, they would be able to realize how powerful the Land of Origin team was. They would not fight each other.

However, Liu Yan was not worried. In any case, the Land of Origin team was strong enough.

Currently, Liu Yan's team had collected the most Lord's token fragments, more than twice as many as the other two forces combined. They still had a huge lead.

Apart from that, his team members were cultivating and increasing their strength quickly. Their overall combat strength was also continuously improving.

In addition, Liu Yan still had three territories and three guardian beasts.

Liu Yan's team had advantages in every aspect.

As long as they kept moving forward, they would have a great chance to receive generous rewards and advance in the competition.

### **Chapter 379: Overlord**

Fire attribute territory.

When the Land of Origin team heard the Will of Tower's announcement, they were surprised.

Although they had seen so many treasure chests and guessed that they had obtained a lot of Lord's token fragments, they had not expected that there would be so many. They collected over 5,000 Lord's token fragments in just a few days.

They were halfway to his final goal of collecting 10,000 lord token fragments.

After all, it had only been three or four days since they entered the fifth level of the Tower.

In such a short period, they had already collected 5,000 Lord's token fragments, which was half the final goal. It was really fast.

"D\*mn, we're already collected so many?"

"I thought it would be hard to collect them before, but now it's so fast."

"The map that Captain Liu gave us had the marks of the treasure chests' locations. Otherwise, it would not be so fast."

"This way, we have too much of an advantage. Hahaha!"

"I didn't expect our team would have such a glorious day."

"I want to cultivate well and raise my strength. I can't disgrace Captain Liu!"

...

The members of the Land of Origin team discussed excitedly.

On the other side, in the wood attribute territory, the members of the Pan-ocean Community team heard the announcement and were shocked. They had not expected the progress of the Land of Origin team in collecting Lord's token fragments to be so fast.

A few days ago, they had four representative teams from the two major alliances preparing to attack the Land of Origin team together. The Land of Origin team faced the risk of being eliminated.

However, a few days passed in the blink of an eye, and the situation changed.

Not only were the Pan-ocean Community team and the New Continent team eliminated by the Land of Origin team, but they had also become their prisoners of war. Now, the Land of Origin team had become the most powerful existence among the remaining three forces.

For a time, team members of the Pan-ocean Community team sighed.

On the other side, the members of the New Continent team of the metal attribute territory were in a similar situation.

After hearing the announcement of the Will of Tower, they were also surprised.

They also knew the Land of Origin team had collected more than 5,000 Lord's token fragments. Many of the fragments had been collected by the Land of Origin team in the metal attribute territory.

"The Land of Origin team is so comfortable now."

"I really envy them. They have three territories and 5,000 Lord's token fragments. They have a huge advantage."

"There's nothing we can do. Who asked us to lose? Now we can only work for them."

"Sigh. It's a pity we missed out on a great opportunity back then."

"Now we can't do anything. We can only let the Land of Origin team win. We had to work hard the next time we come to the fifth level of the Tower."

...

The captain, Jin Cheng, had a strange expression on his face.

The others were envious that the Land of Origin team had a huge advantage.

Jin Cheng knew the Land of Origin team was in the lead because of the captain of the Land of Origin team, Liu Yan.

When attacking their metal attribute territory, Liu Yan and Undying Fire Phoenix played a crucial role.

Otherwise, Jin Cheng felt it would not be a problem for them to hold on until the reinforcements arrived.

Although Undying Fire Phoenix was able to counter Golden Tiger, it could not finish off Golden Tiger in such a short time. Undying Fire Phoenix was also unable to defeat Golden Tiger.

They could defeat Golden Tiger and end the battle quickly because of Liu Yan.

This time, the Will of Tower reported that the Land of Origin team had 5,000 pieces of the Lord's token.

Jin Cheng knew the Land of Origin team had three territories. The main reason was that Liu Yan had given them a map with the locations of treasure chests.

Without that map, it was impossible to collect so many treasure chests.

In such a large territory, the speed of aimlessly searching for treasure chests would be much slower.

Jin Cheng was a little puzzled. Logically speaking, he should have heard someone as eye-catching as Liu Yan.

However, he had never heard of Liu Yan's name before. It was as if he was a top-notch genius that had suddenly appeared. He was too dazzling.

Compared to a heaven-defying genius like Liu Yan, Jin Cheng suddenly felt that the radiance of an ordinary genius like him was overshadowed, making him seem so ordinary.

At the same time, the earth attribute territory on the other side.

The captain of the Red Star Empire team, Ye Yifan, and the other team members also heard the Tower Will's announcement.

"What? 5,000 pieces already? How can it be so fast?"

"Even though they have three territories, they can't be so fast. We only have a few hundred pieces."

"The Land of Origin team is too exaggerated. Their Lord's token fragment is almost ten times more than ours."

"The gap is too big. How can we catch up to them?"

...

At this moment, Ye Yifan's expression was a little ugly.

Ye Yifan was looking at the news that his subordinates had gathered. According to the latest news, the Land of Origin team was far more than just collecting the Lord's token fragment.

According to the investigation, members of the Land of Origin team had improved tremendously during this period. Their average combat strength was already around level 40, even surpassing members of the Red Star Empire team.

In addition, the Land of Origin team still had three territories, three guardian beasts, and two representative teams as their prisoners of war. They were incredibly strong, and they were currently the overlords of the fifth level of the Tower.

After comprehending all sorts of information, Ye Yifan immediately realized the strength of the Land of Origin team. At the same time, he also sobered up. The Red Star Empire team and the European Federation team had a grudge against each other. They had only fought recently.

However, in such a situation, they could not continue to fight with the European Federation team no matter what. If they had more conflicts with the other party, they would be wasting each other's strength.

The Land of Origin team was already incomparably powerful. If the two of them continued to fight, the Land of Origin team would become invincible.

Thinking of this, Ye Yifan looked at them and said, "Everyone, we are clear about the current situation. Although we have always had enmity with the European Federation team, we can only temporarily put aside our enmity. We cannot have any more conflicts with the European Federation team. We cannot continue to waste our strength."

The group of team members looked at each other. They were somewhat unwilling. They had always wanted to take revenge on the European Federation team.

However, the situation forced them. Everyone also understood that if they continued to fight with the European Federation team, they would be defeated by the Land of Origin team even if they won.

Everyone discussed for a moment and immediately agreed to a truce with the European Federation team for the time being.

Following that, Ye Yifan sent one of his team members to the European Federation team in the water attribute territory to make peace.

The two teams always had a feud, so they could not work together. However, it was still possible for them to make peace and not invade each other. It was also good for both sides.

### **Chapter 380: Rapid Upgrade, 7 Levels in a row**

Water attribute territory, in the temporary camp of the European Federation team.

Captain Hans Wilson discussed the next step with his subordinates based on the current situation.

Two days ago, they still dominated the competition. They were the strongest existences on the fifth level of the Tower.

However, after losing the offensive and being attacked from the rear, they lost their ally, the New Continent team.

At this point, the European Federation team lost their advantage.

Now, on the fifth level of the Tower, there were three forces. Undoubtedly, the Land of Origin team was the strongest.

Especially after hearing the announcement from the Will of Tower, Hans Wilson and his team members realized that the Land of Origin team had a huge lead. They had already collected more than 5,000 pieces of Lord's token fragments. They had already achieved half of their goal.

"How did the Land of Origin team collect so many pieces of Lord's token fragments?"

"After all, they had three territories and so many prisoners of war. They have a lot of people."

"Then, they should be only three times more than us instead of ten times."

"Something is not right. The Land of Origin team has a huge advantage."

"According to the information we just received, the strength of members of the Land of Origin team is also increasing rapidly. Their average combat strength is no weaker than ours."

“The Land of Origin team is a little too terrifying. The strength of the members has increased rapidly, and they also have three territories, three guardian beasts, and so many prisoners of war.”

...

For a moment, the expressions of members of the European Federation team were gloomy.

Hans Wilson thought about it and said, “In this situation, we can’t have another conflict with the Red Star Empire team. Otherwise, we won’t stand a chance.”

Derek Dole hesitated for a moment, “But what if the Red Star Empire team attacks us? After all, our two sides have always been at odds with each other. There’s a lot of animosity between us. Especially since we took the initiative to attack them previously. If it wasn’t for the interference of the Land of Origin team, we would have already eliminated the Red Star Empire.”

When the team members heard this, they felt a little helpless.

Under the current situation, they could not continue to clash with the Red Star Empire team. If that happened, they would have even less of a chance.

In truth, the best choice would be for the two sides to join forces to eliminate the Land of Origin team. That way, they would still have a chance.

However, the relationship between the two sides was also awkward. Previously, there had always been hatred between them. Not to mention joining forces, it was impossible for them not to clash with each other.

At this moment, a team member walked into the hall and reported, “Captain, a member of the Red Star Empire team has arrived. He says that he wants to make peace with us.”

When Hans Wilson heard this, he was instantly elated. He hurriedly said, “Let him in!”

When members of the European Federation team heard this, they were also elated. It seemed that there was hope for this matter.

After that, they brought members of the Red Star Empire team over.

After a series of discussions, the European Federation team and the Red Star Empire team reached an agreement. Both sides were making peace, and there would be no conflict for the time being. Both sides would recuperate and develop well.

At this point, the fifth level of the Tower had finally calmed down, which was rare.

The next day, the Land of Origin team was still recuperating.

They had just experienced two big battles and needed some time to recover.

Liu Yan told members of the Land of Origin team to make good use of the high-grade cultivation medicinal ingredients and consumables. This way, they could raise their level and strength.

As for the Pan-ocean Community team and the New Continent team, they continued to collect treasure chests.

Although they had already collected all the high-grade treasure chests, there were still many black iron treasure chests.

Black iron treasure chests could not compare to high-grade treasure chests. There was usually only a Lord's token fragment in a black iron treasure chest, so the harvest was minor.

However, no matter how small a mosquito was, it was still meat. Naturally, they could not ignore the black iron treasure chests.

As for Liu Yan, it was rare for him to have free time. He also used those high-grade cultivation materials to cultivate.

Of course, those that could reach Liu Yan's hands were A-grade or even S-grade cultivation resources. The lowest grade was B-grade cultivation resources.

Liu Yan took out the cultivation materials and prepared to start cultivating.

Naturally, Liu Yan did not need to slowly absorb the cultivation materials one by one to increase his strength like the ordinary members.

With Divine Extraction, Liu Yan could directly absorb them.

Rays of white light descended, and notifications appeared in front of Liu Yan.

[ Divine Extraction of Dark Crow Rock (A-grade) successful. Congratulations: Strength + 523, Frost Control's power increased by 10%, combat experience + 5,000! ]

[ Divine Extraction of Dragon Demon Fruit (B-grade) successful. Congratulations: Spirit + 234, Poison Control's power increased by 5%, combat experience + 2,000! ]

[ Divine Extraction of Magical Eagle Crystal (S-grade) successful: Congratulations: Vitality + 1,032, adaptability + 533, combat experience + 12,000! ]

[ Divine Extraction of Impermanence Poison Herb (A-grade) successful: Congratulations: Adaptability + 367, Strength + 345, combat experience + 4,000! ]

...

After Liu Yan used Divine Extraction, the high-grade cultivation resources withered one after another, turning into Liu Yan's various powers.

It was not until noon that Liu Yan finished all the cultivation resources he had on him with Divine Extraction.

The awakened ones could use up this many cultivation resources in a few months.

However, Liu Yan had used up all of them in just half a day.

After absorbing all of them, Liu Yan received a tremendous boost.

Liu Yan checked his attributes panel.

[ Liu Yan ]

Level: 35 (12,000/35,000)

Class: Dark Ranger (second transition)

HP: 5,800/5,800

Elemental laws: Gold Talent (S-grade), Wood Secret Art (SS-grade)

After looking at his attributes panel, Liu Yan was instantly satisfied.

His level increased from level 28 to level 35 instantly, and his attributes also received a significant increase.

Other than the attribute bonus that came with the increase in level, Liu Yan also used Divine Extraction to extract these high-grade cultivation resources. He had received a huge boost in an instant.
