

## **Towers 381**

### **Chapter 381: The Rarely Peaceful Fifth Floor of the Tower**

The temporary camp of the Land of Origin team.

After Liu Yan finished his cultivation, he leisurely went out to inspect the situation in the territory.

At this time, some members took turns being in charge of guarding. The rest of the team members were all cultivating.

In any case, only a few black iron treasure chests were left in the territory, so the harvest was limited. Liu Yan had two representative teams of prisoners of war working for him to collect black iron treasure chests in the other two territories. Liu Yan naturally did not need to waste his team members' precious time collecting black iron treasure chests.

Seeing that the team members were all seriously cultivating and their strength was improving, Liu Yan was satisfied.

Although these members were ordinary, they were also the cornerstone of the Land of Origin team. They were also important.

In a team, the strength of top-tier members was crucial so did the ordinary members.

Especially in large-scale battles, the strength of ordinary members was even more vital.

For example, in the previous battle in the metal attribute territory, Xu Han led the ordinary members stronger than the opponents. It was the reason they could suppress members of the New Continent team.

Only then could Liu Yan and the Undying Fire Phoenix have a good environment and be able to attack Golden Tiger with their full strength.

Otherwise, the opponent's long-range attacks would hit Liu Yan and the Undying Fire Phoenix. Liu Yan and Undying Fire Phoenix would never defeat Golden Tiger?

The ordinary members were cultivating seriously. On the other side, Murong Xue, Chu Long, and the other top members were also training seriously.

Allen Smith's Xu Han and Xu Han had just finished their training. At this moment, they were familiarizing themselves with the powerful weapons they had just obtained.

Seeing Liu Yan's arrival, Xu Han called out, "You've also stopped training? The two of us felt that we could not finish training in a short time. There were too many training resources, and we wouldn't be able to finish absorbing them in time. We better familiarize ourselves with the weapons to improve our combat strength."

Liu Yan nodded slightly and naturally agreed with Xu Han.

Xu Han and Allen Smith had both just obtained powerful weapons.

Although weapons were powerful, the user needed to be familiar with them. This way, the user could fully display the effects of powerful weapons.

Xu Han and Allen Smith could only become stronger after they got used to the newly obtained powerful weapons.

“How is it? Are you comfortable with the new weapon?” Liu Yan asked with a smile.

“I’m very comfortable with it. I feel that my combat strength has increased by leaps and bounds. I’m just waiting for the next battle to display my might! Haha!” Xu Han immediately said smugly. He was satisfied with the newly obtained S-grade weapon, Phantom Blue Staff.

Beside him, Allen Smith had just finished familiarizing himself with the Blood Flame Sword. He nodded and admitted, “This sword is not bad. My combat strength has increased quite a bit. If I were to face that Sturdy Back Ape again, I feel I have the strength to fight.”

When Liu Yan heard this, he immediately laughed in his heart. It seemed Allen Smith was still brooding over his previous loss to the guardian beast of the wood attribute territory, Sturdy Back Ape.

However, when Liu Yan thought about it carefully, it was also normal.

After all, Allen Smith was a proud son of heaven. Since he was young, he had never lost many times. Naturally, he had a deep impression of every time he lost.

The last time Allen Smith faced Sturdy Back Ape, he was at a disadvantage because he didn’t have any weapons.

Allen Smith was an awakened one who was good at using a sword. Even though his combat strength was strong when he didn’t have a sword, he would be much stronger if he had a weapon. It was like the difference between heaven and earth.

Allen Smith believed he became much stronger after obtaining his S-grade weapon, Blood Flame Sword.

“Oh right, Liu Yan, the other two forces are quiet. There aren’t any movements. Should we make a move against them?” Xu Han could not help but ask.

“What? You can’t sit still anymore?” Liu Yan smiled as he looked at Xu Han.

“A little.” Xu Han admitted, “After obtaining this Phantom Blue Staff, my combat strength has increased quite a bit. In particular, my group attack has increased by a lot. Now, I could display my power if there were a large-scale battle. I can’t wait.”

Hearing this, Liu Yan nodded slightly. However, he said, “We have just experienced two great battles. The ordinary members all need to rest and improve their strength. Give them some time. Although the Red Star Empire team and the European Federation team are not as strong as us, we should not underestimate them. It is better not to act rashly. We should be more cautious and see if there is a chance later.”

Liu Yan also discovered that the European Federation team and the Red Star Empire team seemed to have become much quieter today.

According to the investigation, these two teams did not make any moves today. They also sent lesser intelligence agents.

The two major factions were both recuperating and improving their strength. They were no longer as restless as before.

Liu Yan could faintly feel that the two teams were both so well-behaved. Perhaps they had come to an agreement to make peace and wouldn't make a move.

However, Liu Yan wasn't in a hurry. It would be best if the two other forces could fight and let Liu Yan reap the benefits.

Even if they didn't fight, it didn't mean that Liu Yan didn't have a choice. In any case, the Land of Origin team was powerful and had a huge lead. Liu Yan didn't need to be anxious.

Today, the fifth level of the Tower was undoubtedly quiet.

The three forces were well-behaved. They were recuperating and developing to increase their strength. Hence, there were no more conflicts or disputes.

It wasn't until dusk when the Will of Tower suddenly sounded.

[ Tomorrow will be the start of the monster riot. All teams, please get ready! ]

[ After the monster riot begins, many fierce beasts will appear on the fifth level of the Tower and invade every territory. ]

[ There would be normal monsters, elite monsters, and bosses. ]

[ Killing normal monsters will grant you a chance to obtain a normal treasure chest. The grade will be random. Killing elite monsters will give you a chance to get a platinum treasure chest. Killing bosses will give you a chance to obtain a diamond treasure chest! ]

[ Please make your preparations. All monsters will invade the territory. The target will be each guardian beast. If the guardian beast is defeated, the party will be eliminated! ]

When Liu Yan heard the report from the will of the Tower, he was a little surprised. He did not expect that there would be a monster invasion.

Currently, on the fifth level of the Tower, there were only five teams of awakened ones and guardian beasts. The rest did not have any fierce beasts. Therefore, it was usually a competition between teams. There was no other danger.

Liu Yan did not expect that there would be a monster invasion from now on.

After listening to the rules, Liu Yan had a rough understanding of the situation.

In short, they had to defend against the monster invasion. Otherwise, if the team members died, they would lose their members and combat strength. Moreover, the entire team would be eliminated if their guardian beasts were defeated.

However, the corresponding monster invasion also had its benefits. That was, they could drop treasure chests.

The three territories under Liu Yan's control had all of the high-level treasure chests collected. Only a pile of the lowest-level black iron treasure chests was left. It was hard to obtain a large harvest.

However, they could obtain treasure chests and even advanced treasure chests by defeating these monsters.

By killing the elite monsters, one would have a chance to obtain a platinum treasure chest that they had never gotten before.

If the previous golden treasure chest could yield S-grade equipment, wouldn't the platinum treasure chest be even more ridiculous?

Not to mention, killing the boss could also yield a diamond treasure chest. Liu Yan was excited. At the same time, he also understood that this monster invasion was likely to be a great battle.

### **Chapter 382: Opportunity**

Water attribute territory.

The members of the European Federation team heard the announcement from the Will of Tower. They knew that there would be a monster riot.

For a moment, many of the team members were discussing.

However, Captain Hans Wilson's eyes suddenly lit up. This monster riot would have a certain degree of danger.

In reality, the European Federation team had not lost much combat strength before this. They had only lost an ally, and their combat strength was not severed.

Therefore, their own combat strength was not bad. Hence, there was not much danger facing the monster riot.

The monster riot this time was an opportunity for their European Federation team. It was a chance to close the gap and catch up with the Land of Origin team.

Although the fifth level of the Tower was peaceful today, the European Federation team did not make any movements. They were all recuperating and developing.

In reality, Hans Wilson was worried. After all, there was a huge gap between the European Federation team and the Land of Origin team.

The European Federation team had collected less than 1,000 pieces of the Lord's token. On the other hand, the Land of Origin team had collected more than 5,000 pieces of the Lord's token. They had a great lead in the competition.

Hans Wilson was annoyed that the Land of Origin team still had three territories. They could continue collecting the pieces of Lord's token fragments from the treasure chests. Hence, their development speed would not be slower than the European Federation team.

It also meant that if they continued to rest and develop like this, the European Federation team would not be as good as the Land of Origin team.

But now, an opportunity had come.

The monster riot was both dangerous and an opportunity.

As long as they could successfully kill those fierce beasts, they would have a chance to drop treasure chests.

Especially if they could successfully kill elite monsters or even bosses. They would get high-grade treasure chests that they had never seen before.

Among these high-grade treasure chests, there must be powerful treasures. At the same time, there were also many Lord's token fragments. Wasn't this the chance for the European Federation team to catch up to the Land of Origin team?

At this moment, the team members were still worried about the monster riot.

"I wonder what level the fierce beast the monster riot is."

"It should be powerful. After all, it's the fifth level of the Tower."

"I wonder if we can hold on."

"Fortunately, we still have the help of the guardian beast. It shouldn't be that difficult, right?"

"It's not easy for us to start recuperating, but we're going to fight again. We don't have a chance to catch our breath."

"Yeah, we've been fighting non-stop for the past two days. We've been collecting treasure chests non-stop, and now we have to face the monster riot. It's really tiring."

...

Hans Wilson heard the discussions of his team members. They were more worried about the monster riot this time.

Hans Wilson interrupted, "Everyone, perhaps we don't have to be so worried. Although the monster riot this time is difficult, it's also our chance. We should adjust our mentality and fight well to seize this opportunity."

When the team members heard this, they looked at Hans Wilson with some confusion.

Vice-captain Derek Dole could not help but ask, "Captain, how is this our chance? Please tell us."

Hans Wilson nodded slightly and explained everything he had just thought to everyone.

When everyone heard this, they felt that it made sense. It seemed like it was indeed an opportunity.

If they could successfully kill some elite monsters, they could obtain a platinum treasure chest. This way, they could get tons of Lord's token fragments. They would have a chance to catch up to the Land of Origin team.

If they could successfully kill a boss and obtain a diamond treasure chest, they could surpass the Land of Origin team.

After thinking for a while, Derek Dole had a different opinion.

"Captain, but we have a chance to obtain platinum treasure chests or even diamond treasure chests. The other two teams also have a chance, especially the Land of Origin team. If they can successfully obtain a high-grade treasure chest, they will not be far from obtaining 10,000 Lord's token fragments." Derek Dole could not help but say.

The other team members also looked at their captain, Hans Wilson.

When Hans Wilson heard this, he smiled and said, "That's the logic. But in reality, we have a better chance. The reason is simple. We attacked the Red Star Empire team. So, they are still tired and have not fully recovered. Their combat strength is not as good as ours. It would be impressive if they could defend against the monster riot. How would they have the energy to kill the elite monsters or even the boss? Impossible. As for the Land of Origin team, they had just been through the battle in the metal attribute territory. They are also quite tired. Although their members are strong, they have to protect three territories. The rules are clear. Every territory will be attacked by monsters, especially the guardian beasts."

Derek Dole's eyes lit up when he heard that.

"That's right. The Land of Origin team has three territories and three guardian beasts. Naturally, they have to defend three territories. It's even more troublesome. Although they have two teams of prisoners of war, their strength is limited. They need the support of the Land of Origin team. In this way, they will be tired of defending. It will be difficult for them to kill elite monsters and obtain high-grade treasure chests." Derek Dole said in surprise.

After hearing the analysis, members of the European Federation team felt it made sense.

Although the monster riot was troublesome, it was indeed an opportunity for them.

If they missed this opportunity, they would not have a chance to surpass the Land of Origin team. The Land of Origin team was too strong. They had collected many Lord's token fragments. Their advantage was too great.

Instantly, the worries of members of the European Federation team were swept away. Then, under the command of their captain, Hans Wilson, and their vice-captain, Derek Dole, they began to make all sorts of preparations before the battle.

Since the monsters had the highest priority in supplying the guardian beast, they might as well use the guardian beast as the core and surround the Guardian Beast in a defensive counterattack. It would be more beneficial to the representative team of the European Federation, and they would be able to take the initiative.

For a time, the members of the European Federation team were all filled with confidence. Their fighting spirit surged, and they were fully prepared.

At the same time, in the earth attribute territory on the other side, members of the Red Star Empire team had also heard the voice of the Will of Tower. They received the news that the monster riot was about to arrive.

For a time, the expressions of the members of the Red Star Empire were gloomy.

The initial combat strength of the Red Star Empire team was pretty good.

However, after experiencing the battle with the two elite teams of Alliance Number 1, the Red Star Empire team lost a lot of combat strength.

Many of their members had yet to recover, and their combat strength had yet to recover.

The overall combat strength of the entire Red Star Empire team had decreased quite a bit compared to when they were at their peak.

Among the current three forces, the overall combat strength of the Red Star Empire team was the weakest.

Now, they still had to face the chaos caused by the monsters, which undoubtedly gave many members of the Red Star Empire team a headache.

### **Chapter 383: Battle Plans of the Various Parties**

Ye Yifan's expression was a little cold as he continuously pondered.

Only three teams remained on the fifth level of the Tower. As long as the Red Star Empire team could safely survive and avoid being eliminated, they would still be able to advance to third place in the end. However, they could not get any rewards.

However, Ye Yifan was a genius blessed by the heavens since he was young. He was naturally unwilling to accept this result.

At this moment, the team members were also discussing in low voices.

"This monster riot is too disadvantageous to us. Our overall combat strength is about the weakest among three forces."

"I saw the people from Alliance Number 1 discussing in the public chat interface just now. They said that although the Land of Origin team is strong, they still need to defend three territories. They could only defend because they would have a hard time killing elite monsters."

"Then we won't be any better. I guess we can only defend too."

"Our defense should be fine. After all, we're in earth attribute territory. The terrain is good for defense."

"Sigh, if we can't do it, we can play dirty and keep defending. We can try to advance to third place."

“Yeah. Although there’s no reward, at least we can advance.”

...

At this moment, Ye Yifan’s eyes suddenly lit up as if he had an idea.

Although the overall combat strength of the Red Star Empire team was currently the weakest, it wasn’t like the Red Star Empire team didn’t have any advantages.

The most advantageous thing was that their territory was an earth attribute territory. The guardian beast was also an earth attribute guardian beast and was the best at defense.

The fierce beasts from the monster riot were all coming for the guardian beasts.

Ye Yifan could get most ordinary members to work with the guardian beast to defend. They could only focus on defense.

Meanwhile, Ye Yifan would lead his top-tier members to find an opportunity to charge out. They would see if they could kill the elite monsters or even try to kill a boss.

With that, the Red Star Empire team would have a chance to catch up to the other two forces. In the end, they would be able to obtain a reward and advance.

Although the overall combat strength of the Red Star Empire team was slightly damaged, their top combat strength was still fine. Ye Yifan was also confident in the top combat strength of these people, including himself. Ye Yifan believed that he and the others had a complete chance.

However, the defense of the ordinary members and guardian beasts would be difficult and risky.

If everyone defended, it would be extremely safe. However, the benefits would be relatively small. They would only be able to kill ordinary monsters, and it would be difficult to obtain a high-grade treasure chest. It would be difficult to surpass the other two forces. Then, they could only pursue a safe way to survive and not be eliminated. After that, there would be no reward for advancing to third place.

There would be a certain amount of risk in using this method, but it would also be a high-yield method. It could be considered a gamble.

Following that, Ye Yifan directly told his thoughts to his team members.

“Overall, there are only these two methods. One is to have all the members defend, which is the safest way but lower yield. The other is for the ordinary members to defend, while the elites will follow me to charge out. The risky way but with high yield.” Ye Yifan finally analyzed.

When members of the Red Star Empire team heard this, they began to discuss it.

“Should we not be more stable in advancing? I don’t want to miss out on the sixth level of the Tower.”

“I feel that we can give the second method a try. Although there are risks, there are also high benefits. As long as we succeed, we can turn the tables instantly.”

“That’s right. No matter what, we are still an earth attribute territory with an earth attribute guardian beast. Isn’t our defense our best?”

“I also feel that we can be more aggressive. If we were to defend ourselves with all our might normally, we will lose our chance.”

“That’s right. The Land of Origin team wants to defend three territories. This time, they will also be restricted. This is our chance.”

...

After a discussion among the team members, most of them supported the second plan. They chose to be more aggressive. The risk was high, but the benefits were also richer. They could try their best to have a chance to surpass the European Federation team or even the Land of Origin team.

After confirming the defensive plan, members of the Red Star Empire team also began to make preparations.

The ordinary members cooperated with guardian beasts and hid within the small and advantageous terrain of the temporary camp to defend themselves.

These ordinary members and guardian beasts only wanted to be able to defend themselves. They had no other thoughts.

As for Ye Yifan and a few other top experts, they formed a small team and prepared to kill the elite monsters when they discovered them.

Anyway, the main target of these large numbers of fierce beasts was also the guardian beast. They wouldn’t surround and attack them. Ye Yifan and the others had a chance.

At the same time, in the fire attribute territory. Luo Qingcheng, He Yang, Xu Han, and Jin Cheng were in charge of the wood attribute territory and the metal attribute territory. After they received a message from Liu Yan’s Purple Wind Falcon, they came to the fire attribute territory.

Murong Xue, Chu Long, and Alan Smith, who were the core members of the core team, had also gathered and started to discuss the defense plan for this monster riot.

“Let’s talk about our ideas first.” Liu Yan looked at his teammates and spoke.

During this short time, Liu Yan also briefly thought about the battle plan, but he hadn’t thought about the specific details yet, so he might as well listen to their ideas first.

He Yang’s expression was somewhat helpless as he said, “Although we have three teams with strong strength and three guardian beasts, we are also responsible for defending three territories at the same time. The pressure will be very great. I suggest we hide in each territory and defend. In any case, we have more Lord’s token fragments than the other two teams.”

Xu Han immediately shook his head and said, “According to the information I have obtained, Alliance Number 1 and Alliance Number 2 are both planning to seize this opportunity to take a gamble in this monster riot so that they can surpass us. If we are too cautious, we might lose our dominance in this competition.”

Chu Long also agreed, "In this monster riot, we will get a treasure chest by killing a fierce beast. There is also a chance for a high-grade treasure chest to drop. We can obtain more Lord's token fragments at once. We cannot miss this opportunity."

"However, we do have to defend three territories. The pressure will be quite great. If we cannot defend, we will be finished." Zheng Tainan could not help but be a little worried as he said.

"Why don't we adopt a plan like the Red Star Empire team? The ordinary members and guardian beasts will hide and defend. The top members will form a sharp knife squad to kill their way out and find the elite monsters?" Murong Xue could not help but suggest.

The European Federation team and the Red Star Empire team did not keep the plan of this battle a secret. They were discussing it on the public channel chat interface. Everyone in the Land of Origin team had long known about it. Hence, they were also considering their battle plan according to the battle plan of the two forces. It could be considered as a reference.

When Luo Qingcheng heard this, she agreed, "We can indeed implement the Red Star Empire team's battle plan. It's more stable. At the same time, there's a certain chance to increase the profits. In addition, we had a huge lead, so it's more stable to adopt this plan."

#### **Chapter 384: Offense is the Best Defense**

Fire attribute territory. In the temporary camp of the Land of Origin team.

A few backbone members were discussing the battle plan.

They needed to defend three territories. Hence, they would undoubtedly be somewhat passive in the battle.

After listening to their opinions, Liu Yan had almost thought it through.

"The ordinary members of the wood attribute territory and the metal attribute territory cooperate with the guardian beasts for defense. The terrain of the wood attribute territory of the metal attribute territory is advantageous for defense. The ordinary members with the guardian beasts should be enough, right?" Liu Yan said directly.

When Jin Cheng heard this, he immediately nodded and said, "Of course, I have no problem. I can easily lead all the ordinary members and the guardian beast to defend the small city."

The metal attribute territory had tons of giant ores. The fierce beasts could not move freely in it.

Especially in the small city of the temporary camp, the intersection was even narrower. Two to three fierce beasts could launch an attack at the same time. Jin Cheng naturally had no problem leading the ordinary members to defend.

He Yang nodded and said, "Our wood attribute terrain is ideal for defense. Although it can't be compared to the metal attribute territory, our team has more members. The wood attribute is also an attribute that is compatible with defense. There is no problem for us to hide and defend."

Liu Yan nodded slightly and said, "As for your top team members, send them to me and listen to my orders."

"Okay."

"Yes!"

He Yang and Jin Cheng both replied.

Xu Han saw the situation and could not help but praise, "This is not bad. Our fire attribute territory is a desert. It is indeed not very conducive to defense. With the help of these top team members, our pressure will be much lesser."

Luo Qingcheng looked at Liu Yan suspiciously. Based on her understanding of Liu Yan, Liu Yan was naturally unwilling to defend passively.

They needed good defense to withstand the monster riot. But at the same time, it was also a great opportunity. Luo Qingcheng did not believe that Liu Yan would miss such an opportunity.

"Liu Yan, you don't want us to defend only, right? Do you want to send the top team members of the other two teams to attack?" Luo Qingcheng asked.

Chu Long became worried when she heard this, "Our fire attribute terrain is not conducive to defense after all. Wouldn't it be a little dangerous for us to adopt a battle plan like the Red Star Empire team? After all, our fire territory is a plain desert. If many fierce beasts attacked here at once, we might not be able to hold them off."

Liu Yan could not help but smile. "According to my understanding, many team members have been increasing their levels and battle prowess with the help of high-grade cultivation resources. Many of our members could kill monsters above their grade, right?"

"That's true. So, do you think that the strength of our ordinary members should be able to defend against the monster riot with our guardian beasts?" Xu Han asked.

The rest of them also looked toward Liu Yan.

It was true that the strength of members of the Land of Origin team had increased. However, they did not know just how strong the monster riot was.

Therefore, if they only let the ordinary members coordinate with the guardian beast to defend, they would also be more worried.

Liu Qing reminded them, "The terrain of our territory was not inconvenient for us to defend. Besides, our guardian beast, Undying Fire Phoenix, is also not a fierce beast that is good at defending. Without the help of your top members, we might not be able to hold on."

When the others heard this, they all felt that it made sense.

Murong Xue said unwillingly, "Then we can't all defend, right? That would be too boring."

When everyone heard this, they all felt the same.

Those who were able to reach this point were all geniuses among geniuses. They all had a certain level of confidence. So naturally, they would not be willing to defend. However, reality would not allow them to do so.

At this moment, Liu Yan smiled and said, "Did I say that I wanted to defend only?"

When everyone heard this, they were instantly stunned. They did not understand what Liu Yan meant.

Allen Smith, who had been silent all this while, immediately saw through Liu Yan's intentions. He said, "You want to dispatch the top members of the other two teams. Then, we will attack the fierce beast together with all members of the Land of Origin team?"

When everyone heard this, they were instantly stunned.

Liu Yan's idea was not to defend but to attack. It was too bold!

Everyone else thought about how to defend while trying to gain as much as possible.

Liu Yan, on the other hand, did not think about defending but attacking.

At this moment, Liu Yan nodded and admitted. "That's right. Our fire attribute territory's terrain and our guardian beast, the Undying Fire Phoenix, are not conducive to defense, but they are good for offense. In addition, our members' strength has generally increased during this period. We have top members like us working together and the help of the top members of the other two teams. Why do we still need to defend? We'll attack directly!"

Hearing this, they felt that it was unbelievable. They thought that this idea was too bold.

Although they felt that Liu Yan's analysis was very reasonable, they still did not dare to think of implementing it in this way.

Liu Yan continued, "In addition, according to my understanding, the duration of this monster riot will not be short. It will likely last for a few days. Moreover, the monster riot's fierce beast tide will come in waves. If we can take the initiative to attack and kill these fierce beasts, we can rest and heal in these gaps. On the contrary, although the other teams could defend with less pressure, they lost the time to catch their breath. If they were to fight for a long time, would they be able to hold on? Since we have enough strength, we might as well attack. Under such circumstances, attacking is the best defense!"

Hearing this, they suddenly felt that it made sense.

Luo Qingcheng was the first to agree, "I think this plan is good. It seems to be risky, but in fact, the feasibility is very high. It is even very stable. It is far better than defending."

At this moment, Luo Qingcheng also looked at Liu Yan in shock. She did not expect Liu Yan to think of such a good idea.

Previously, Luo Qingcheng came out with many battle plans, but she always felt that it was not very good, not perfect enough.

It was not until she heard Liu Yan's battle plan that Luo Qingcheng's eyes suddenly lit up. She immediately decided that this was the best battle plan.

Now, Luo Qingcheng finally understood why she could not think of the best battle plan just now. Her thoughts were too limited, and she always thought of defense.

But she had forgotten that forcefully defending in the terrain of fire attribute territory would only be disadvantageous to them. On the contrary, attacking was the best defense. In any case, she had enough strength.

At this moment, Luo Qingcheng had to admit that with this period of experience, Liu Yan's command level had already surpassed hers.

Murong Xue and Allen Smith also agreed with her.

Murong Xue did not think so much at all. She only thought of taking the initiative to attack and fight. Defending was too boring.

Allen Smith was appreciative of Liu Yan's battle plan. He praised, "Your command is great!"

### **Chapter 385: The Great Battle Begins**

Everyone quickly agreed with Liu Yan's battle plan.

Liu Yan also began to deploy.

Metal attribute territories and wood attribute territories all adopted a defensive plan.

Ordinary members would coordinate with guardian beasts. They would use the terrain to counterattack.

As for the experts of the two teams, they were all transferred to Liu Yan's side.

There were eight experts from the two teams. Liu Yan had a rough understanding of them. They were almost stronger than Zheng Tainan. However, they were still not as strong as Murong Xue.

Liu Yan picked the most skilled member of the team. His name was Chu Cunrui. He would be the leader of this team. When the time came, Chu Cunrui would personally command them.

Following that, Liu Yan began to deploy.

The fire attribute territory was originally a desert, and most of it was plain. The terrain was open, and there was no favorable terrain for defense.

Liu Yan led all his team members out of the temporary camp and set up a battle formation with the guardian beast as the core in a large plain.

The overall formation was around the guardian beast. The team members who were good at close combat were in the front, while the team members who were good at long-range attacks were in the back.

At the same time, some people became reserves in case of emergency.

Just as everything was ready, the Will of Tower's voice suddenly sounded.

[ The monster riot has begun. All parties, please get ready! ]

As the Will of Tower's voice sounded out, Liu Yan and the others immediately felt the ground tremble slightly.

Liu Yan stepped on the SS-grade equipment, Gale Boots, and flew high into the sky. He looked down at the ground to understand the situation.

When he reached the sky, he immediately saw the situation around him.

Around the territory, all types of monsters began to spawn in all directions.

There were many monsters, and they immediately formed groups.

The groups of monsters all headed toward the territory. They were charging toward the fire attribute territory's guardian beast, Undying Fire Phoenix.

It seemed that these monsters' aggro was on the guardian beasts. The awakened were second.

Liu Yan released Purple Wind Falcon and went to the metal attribute territory to understand the situation.

If they encountered any difficulties, Liu Yan would be able to support them.

At the same time, he also let Purple Wind Falcon observe the situation of the two forces in the water attribute and wood attribute territories. Meanwhile, Liu Yan returned to the sky above his team and prepared to start the battle.

The members of the Land of Origin team had long been prepared. They arranged themselves in formation and quietly waited for the arrival of the monster hordes.

The number of monster hordes was not small. However, the members used the cultivation resources to increase their levels and strengths. They were all extremely confident.

Moreover, Liu Yan and the other top experts of the three teams were behind them in this battle, so they were not afraid at all.

Soon, a group of monsters appeared in their line of sight.

Luo Qingcheng checked the information about these fierce beasts. She said, "The overall potential is C-grade and B-grade, while the level is around level 30. Their average combat strength is around level 35. The average combat strength of our team members is already at level 42, so it won't be a problem to kill those fierce beasts."

Liu Yan nodded slightly. After all, this was only the first wave of monsters, so their strength would naturally not be too strong. Members of the Land of Origin team would probably have no problem dealing with them.

Seeing that the monster group was approaching, Liu Yan shouted, "Everyone, you must maintain your formation during the battle. You must not be aggressive or timid. Pay full attention. When the monster group gets close, attack together. Do not attack for now."

"Yes!" The members of the Land of Origin team responded one after another.

In this battle, Liu Yan was in the air above them. These members were even more confident.

The reason why Liu Yan asked his team members to maintain their formation and stand in their positions was to prevent any gaps.

Although the team members might be able to kill more monsters if they were aggressive, they would leave their original positions, and a gap would appear. The pressure on the team members would be even greater, and accidents would happen.

At this moment, the team members only needed to face the monsters in front of them, so the pressure would naturally be much less.

In addition, Chu Long and a group of priests were in charge of healing. After these team members were injured, they would be treated. With the help of their priests, they could receive treatment immediately.

It was especially true for Chu Long, who had the S-grade treasure, the Mysterious Fog Pearl. Not only did she have an exaggerated healing ability, but she also did not lack energy. If she could continuously heal, her healing ability would be terrifying.

This battle formation would be more beneficial for the entire team.

Liu Yan quietly waited for the monster horde to approach.

Many members were ready to attack at this distance, but Liu Yan did not let them attack.

Liu Yan was waiting for the fierce beasts to get closer, so close that all the long-range attackers could attack at the same time. This way, the attack effect would be better.

Behind them, Luo Qingcheng was cooperating with the commander in the battle. She saw that the entire team was under the command of Liu Yan. She could not help but exclaim in her heart.

Liu Yan's command talent was good. Luo Qingcheng discovered it very early on.

However, Liu Yan had never received the command system's command, so he was somewhat lacking.

However, after coming to the fifth level of the Tower and experiencing a series of actual battles, Liu Yan's command ability had grown.

Now, Liu Yan's command ability could be said to be at the pinnacle of perfection. Even Luo Qingcheng could not help but exclaim in admiration.

In addition, members of the Land of Origin team were strong, and they admired and trusted Liu Yan from the bottom of their hearts. They all believed in Liu Yan's command.

This battle had not started yet, but Luo Qingcheng seemed to have already predicted the outcome. The battle would go smoothly!

At this time, the monster group was already very close. The distance was already less than 100 meters.

At this distance, some monsters might be able to rush to the front with just a charge.

But Liu Yan was still waiting for them to get closer.

The reason was that he wanted the effect of the first round of attacks to be better.

When the distance was close enough, the attacks would be able to hit all fierce beasts. At the same time, the range of those AOE attacks would also be wider.

The team members would be in danger if the distance were too close. Therefore, Liu Yan needed to grasp the perfect timing.

Seeing that the distance was about 80 meters, Liu Yan felt it was about time, so he gave the order.

“All long-range attacks, attack!”

Under Liu Yan’s order, the team members were already prepared and ready to attack and immediately launched a round of attacks.

Archers shot arrows, spell casters cast spells, and all kinds of long-range attacks of different attributes shot into the sky.

All the team members launched long-range attacks simultaneously, and the power gathered together was terrifying.

After a round of attacks, the monsters in front of them instantly fell.

Some of the monsters dropped treasure chests. There were black iron treasure chests, bronze treasure chests, and even silver treasure chests. However, there were no higher-grade treasure chests.

As the monsters in front fell, the monsters behind stepped on the corpses and continued to charge forward.

The battle had officially begun!

### **Chapter 386: Substitute Puppet**

Fire attribute territory.

Under the long-range attacks of the Land of Origin team, the monsters in front of them kept falling.

However, there were too many monsters. The monsters behind them kept coming up, stepping on the corpses in front of them and charging forward.

Not long after, some monsters rushed to the front and engaged members of the Land of Origin team in a melee fight.

Close combat was unavoidable in the end.

However, members of the Land of Origin team had long been prepared. The members who were good at close combat had long stood at the front to protect the rest of the members at the back.

As soon as the monsters charged up, the members at the front followed Liu Yan’s orders and maintained their battle formation.

Individual team members were powerful and could quickly deal with the fierce beast in front of them. However, they would not rush in to deal with the other monsters. Instead, they would stick to their positions and stand in their positions. They would ensure that the flanks of the other team members did not have the slightest worry.

In this way, all the team members would only need to face the monsters. It was equivalent to a one-on-one battle.

The long-range attacking team members behind them could continue to help.

The battle was going on in full swing.

Liu Yan, who was high in the sky, looked around.

Although there were many monsters, their strength was relatively average.

The main reason was that the Land of Origin team had improved too much recently, so it was relatively easy to face these monsters now.

If it were the old Land of Origin team, they would probably be having some trouble now.

Although they could hold on, Liu Yan still chose to help. He asked Chu Cunrui to bring a small team of experts and join the battle.

With the help of Chu Cunrui and a few experts, members of the Land of Origin team, who had been relatively relaxed, became even more relaxed.

Monsters fell one after another, dropping some treasure chests from time to time.

Occasionally, the free members would collect the nearby treasure chests.

They left some treasure chests and continued to battle.

As for Xu Han, Murong Xue, and the other top experts, Liu Yan did not let them join the battle yet.

These ordinary monsters were not worth their efforts.

Undying Fire Phoenix was in the middle of the formation. From time to time, it would help out but did not use its full strength. It had been saving its stamina for later battles.

At this time, Liu Yan also roughly understood the situation of the other territories through Purple Wind Falcon.

The situation of the metal attribute territory and wood attribute territory was not bad. Although it was not as easy as here, the metal attribute territory and territories had ideal terrain for them to defend.

In addition, the Pan-ocean Community team and New Continent team only wanted to defend. They were eliminated, so they only needed to defend the territory according to Liu Yan's orders. They did not have much desire to kill monsters and collect treasure chests. Liu Yan himself did not ask too much of them.

As a result, the two teams were quite relaxed. They hid in the terrain, and the team members cooperated with the guardian beast to defend. For the time being, there was no problem.

The European Federation team was in a water attribute territory. The terrain was not ideal for defense. However, their water-attribute territory guardian beast, Sea Emperor Turtle, was a guardian beast with superb defensive abilities. In addition, all the members of the European Federation team participated in the battle, surrounding the guardian beast to fight.

The Red Star Empire team did not have all the members participating in the battle. Only the ordinary members participated.

However, they were in earth attribute territory. Hence, it was beneficial for defense.

The earth attribute territory's guardian beast, Heaven-swallowing Python, was also powerful. Its combat strength was terrifying. As a result, the Red Star Empire team could still hold on.

The battles of the five territories surrounded the guardian beasts. The team members fought around the guardian beast.

Such benefits could naturally guarantee the combat strength of the team members to a greater extent.

However, Liu Yan also felt that something was not right.

Such a combat method was indeed very beneficial. It was relatively stable and could also preserve the combat strength of the team members.

However, at the same time, it also had a big drawback.

The biggest drawback was that guardian beasts with strong combat strength were restricted by these ordinary monsters.

The guardian beasts could only stay in the same place and fight. They could not go anywhere else.

If the guardian beast could escape from the battle and get rid of these normal monsters, it would have a chance to go and kill the elite monsters or even the boss.

The guardian beasts of the other territories were earth-type and water-type guardian beasts. They could not leave their original spots and were trapped in their original spots.

They could only leave after killing all the small monsters.

Although these small monsters were not strong, there were many of them. One could not see the end of them at a glance. They needed a long time to kill them.

Liu Yan's guardian beast of the fire attribute territory, Undying Fire Phoenix, could leave through the air.

Unfortunately, these monsters had the highest aggro toward the guardian beast.

If Undying Fire Phoenix left, these monsters would follow the Undying Fire Phoenix and chase after Undying Fire Phoenix.

At that time, Undying Fire Phoenix's battle would still be affected by these monsters.

The change in the formation of these monsters might put pressure on members of the Land of Origin team. The team members would have a hard time dealing with these monsters.

“It would be great if these monsters could maintain their aggro and charge toward the center of the formation while Undying Fire Phoenix could leave.” Liu Yan could not help but mutter.

Immediately after, Liu Yan thought of a solution.

That was the enchanted puppet!

Liu Yan had made the enchanted puppet into a substitute puppet. It could die for Liu Yan once, but it could not fight directly.

However, Liu Yan could make other combat puppets.

Moreover, now that Liu Yan had mastered Gold Talent, he was more sensitive to metal and could control metal. Therefore, it was much easier to make puppets. Unlike before, the required materials and the process of making it were complicated. Liu Yan also needed a soul.

Now, Liu Yan could make an enchanted puppet that did not need a soul.

This type of enchanted puppet did not have a soul, did not have a hint of battle consciousness, and could not fight automatically. However, Liu Yan could control them through his Gold Talent, allowing them to fight continuously.

However, the enchanted puppet that he made could only help in battle and could not replace Undying Fire Phoenix.

However, according to Liu Yan’s understanding, if his Gold Talent was upgraded to Gold Secret Art, he could use metal to simulate the aura of the soul.

At that time, Liu Yan could create an enchanted puppet to replace the aura of Undying Fire Phoenix. Then, he could use his Gold Talent to conceal the aura of Undying Fire Phoenix. That way, the enchanted puppet would be able to attract the monsters. Meanwhile, Undying Fire Phoenix would be able to leave these annoying monsters safely and follow Liu Yan to the real battlefield.

### **Chapter 387: The Special Use of the Enchanted Puppet?**

Liu Yan kept thinking.

He carefully recalled the production of the substitute puppet in his mind. This method was indeed feasible.

Then, the only thing he lacked at the moment was Gold Secret Art.

His current Gold Talent was still not enough. He had to upgrade it to Gold Secret Art.

Upgrading to Gold Secret Art was difficult for ordinary people. They had to come into contact with a vast amount of metal elemental energy. They also needed to comprehend metal attribute treasures continuously.

Even if one were talented, one would still need to spend a long time to succeed.

Without talent, one would not successfully upgrade to Gold Secret Art for the rest of their life.

However, Liu Yan had the SSS-grade talent, Divine Extraction. it saved him a lot of trouble.

For Liu Yan, there were two shortcuts.

First, when he came into contact with a high-grade metal attribute treasure, he could directly obtain it through Divine Extraction.

Previously, Liu Yan had obtained the metal attribute core of the metal attribute territory. Then, he used Divine Extraction on it to get Gold Talent.

This method was undoubtedly the simplest and faster, but it also had a fatal point. Liu Yan had to come into contact with a high-grade metal attribute treasure.

Currently, Liu Yan naturally had no way to come into contact with metal attribute treasures.

Then, another method was to extract many metal attribute monsters through Divine Extraction.

Liu Yan had tried it before.

Liu Yan could strengthen his Gold Talent and Wood Secret Art as he extracted fierce beast corpses, monster corpses, or various treasures of the metal attribute.

Although the accumulation was relatively slow, he could level up after it was done.

Right now, there were tons of monsters. Many of them were metal attribute monsters. They were nutrients for Liu Yan's Divine Extraction to level up his Gold Talent.

Immediately, Liu Yan looked at the fierce beast in front of him and could not help but look forward to it.

At this moment, in the fire attribute territory, ordinary members of the Land of Origin team were fighting against the monsters.

These ordinary monsters were no match for the ordinary members of the Land of Origin team.

However, there were too many monsters. The team members had been fighting without rest.

Many treasure chests had already dropped on the empty ground. They came from the small monsters. Most of them were not of high grade, but the combined harvest was still quite good.

However, the ordinary members kept defending their positions and maintaining their battle formation. They did not have the time to pick up the treasure chests.

Liu Yan relied on his SS-grade equipment, Gale Boots, and flew high into the air to observe the situation of the monsters at the back.

The first wave of monsters was about to end.

At the end of the first wave of monsters, there was a giant monster. It should be an elite monster.

Naturally, there would be the second and third waves of monsters.

However, the second wave had not started spawning yet. Hence, there was still some time. The ordinary members of the Land of Origin team could use this period to rest.

Liu Yan saw that there were not many monsters left in the first wave anyway. He took out an S-grade weapon from his spatial ring, Blade of the Night. He came to the ground and joined the battle.

The earlier he helped his team members deal with the first wave of monsters, the better he could rest. At the same time, Liu Yan could also try to extract some metal attribute monsters from them to see if he could level up his Gold Talent.

Liu Yan had only reached Gold Talent and not Gold Secret Art. Moreover, he was still quite far from the Law of Gold.

However, Liu Yan could feel that his Gold Talent should be at the late stage, not far away from Gold Secret Art. He might be able to successfully level up from Gold Talent to Gold Secret Art after a few extractions.

Liu Yan held the S-grade weapon, Blade of the Night, and directly entered the monster crowd on the ground.

Naturally, Liu Yan did not have to maintain the formation like the ordinary members. He held his position to fight and directly charged into the monster crowd.

Relying on his strong stamina, Liu Yan felt like he had entered an uninhabited land.

Liu Yan observed one of the metal attribute monsters and immediately used a C-grade skill, Backstab.

Then, Liu Yan's figure disappeared from where he was.

When Liu Yan reappeared, he was already behind the metal attribute monster more than ten meters away. He immediately used the Backstab.

A terrifying power erupted. With a single strike, Liu Yan killed the metal attribute monster.

Liu Yan also took the opportunity to activate his Divine Extraction.

White light shone down was inconspicuous in the midst of the chaotic battle and the light of attacks from various attributes.

Then, a notification appeared in front of Liu Yan.

[ Divine Extraction of alloy monster (potential B-grade, level 28) successful. Congratulations: Strength + 132, Vitality + 145, Gold Talent (S-grade) power increase by 5%! ]

Immediately, Liu Yan felt that his stamina and vitality had slightly increased. At the same time, he also thought that the comprehension and power of Gold Talent had improved a little.

Liu Yan confirmed he could increase the comprehension and power of Gold Talent through Divine Extraction. He might even reach the level of Gold Secret Art and the Law of Gold. He immediately felt relieved.

He could increase his comprehension of Gold Talent through the Divine Extraction of metal attribute monsters. It was probably because of the changes brought by Gold Talent.

With that, Liu Yan was relieved. He could kill tons of metal attribute monsters and then use Divine Extraction to upgrade his Gold Talent.

As long as he successfully advanced to Gold Secret Art, Liu Yan could create a substitute puppet with the aura of Undying Fire Phoenix's soul to attract the monsters.

At this time, Undying Fire Phoenix could also get rid of these annoying little monsters. Then, it could go with Liu Yan to kill elite monsters or even bosses to obtain high-grade treasure chests.

At the same time, if Liu Yan could upgrade Gold Talent to Gold Secret Art, it would also bring a huge boost to Liu Yan's strength.

Currently, his Gold Talent alone brought great benefits to him.

Liu Yan had opened up the entire map with Extraordinary Five Senses and found many treasure chests. Then, he obtained a huge harvest all of a sudden. Liu Yan even got a total of 5,000 Lord's token fragments. Besides, he also improved his combat power and the strength of the enchanted puppet.

Liu Yan knew talents, secret arts, and laws were the highest level of power at the moment. They could make awakened ones much stronger.

On the higher level of the Tower, there were more powerful powers. For example, the origin power and the like, but those were still too far away from Liu Yan.

Liu Yan came back to his senses and saw a bunch of monsters charging at him. He was not afraid at all.

In Liu Yan's eyes, these large numbers of monsters were just a bunch of experience points, various attribute points, and raw materials for Divine Extraction.

Liu Yan immediately activated his S-grade skill, Fire Scythe Dance, and his A-grade skill, Flame Control.

Instantly, Blade of The Night was imbued with terrifying fire energy.

Then, Liu Yan began his massacre.

### **Chapter 388: Not Enough**

Fire attribute territory.

The ordinary members of the Land of Origin team saw Liu Yan charging into the monster horde alone and slaughtering the monsters in all directions. It was like his mind was in the zone. The team members were all amazed.

The strength of the monsters in the first wave was not that great. Their combat strength was only at level 30. So, it was relatively easy for ordinary members to deal with them.

However, being able to deal with them one-on-one and being able to deal with them in a siege were two different concepts.

The team members had long known about Liu Yan's strengths. However, they were still shocked when they saw Liu Yan display his skills at such a close distance.

“Captain’s strength is strong.”

“Yeah, these monsters are like paper in front of him. He killed them effortlessly.”

“I guess Captain Liu hasn’t used his full strength yet. I don’t even dare to think about him using his full strength.”

“After all, he’s a man who can deal with guardian beasts one-on-one. It’s already beyond our understanding.”

“Last time, I saw Captain Liu make a move on the guardian beast, Golden Tiger. He trapped it in an instant. No matter how hard Golden Tiger tried, it couldn’t escape. Captain Liu is too powerful!”

...

At the back of the formation, Murong Xue and a few other top experts didn’t take action until they received Liu Yan’s order. They were waiting for Liu Yan’s arrangements.

At this moment, they were also watching Liu Yan’s every move.

Liu Yan was slaughtering the monsters in all directions. Murong Xue immediately said with envy, “This guy doesn’t want us to attack, but he’s enjoying himself. Damn it!”

Xu Han smiled and said, “This first batch of small monsters is too ordinary. It’s indeed not worth us making a move. There will be opportunities for us later. However, Liu Yan is in a good mood. He’s willing to make a move against such a low-level monster.”

At this moment, Allen Smith was looking at Liu Yan with great interest. As an expert of such a level, he could see more things.

Allen Smith did not believe that Liu Yan would attack such a low-level monster. Clearly, he had other motives.

After careful observation, Allen Smith quickly made some discoveries. He found that Liu Yan seemed to be deliberately picking some monsters to kill.

There were some monsters not far away that could be killed easily.

As long as they did not provoke Liu Yan, Liu Yan would usually be too lazy to pay attention to them. Instead, he would go far to kill some monsters.

Soon, Allen Smith discovered that these monsters that Liu Yan had chosen had a special characteristic. Almost all of them were metal attribute monsters. Some of them were wood attribute monsters.

Although Allen Smith did not know Liu Yan’s specific purpose, he could roughly guess that Liu Yan was probably training.

Allen Smith immediately looked at Liu Yan with a strange expression. When facing the chaotic monster hordes, everyone else thought about how to defend and deal with the monsters. However, Liu Yan was thinking about how to use these monsters to increase his strength. What a guy. Allen Smith admired Liu Yan even more.

At this moment, Liu Yan did not care about the gazes of the surrounding team members. Instead, he focused on finding the metal attribute and attribute monsters.

Once he found the metal attribute and wood attribute monsters, Liu Yan would rush over to kill them and then use Divine Extraction immediately.

Sometimes when he found a metal attribute or wood attribute monster on the ground, Liu Yan would also use Divine Extraction along the way.

Immediately, notifications appeared in front of Liu Yan.

[ Divine Extraction of Swamp Tree Spirit (talent C-grade, level 32) successful. Congratulations: Spirit + 178. Wood Secret Art (SS-grade) power increased by 1%! ]

[ Divine Extraction of Golden Swamp Monster (talent B-grade, level 29) successful. Congratulations: Vitality + 198, Gold Talent S-grade) power increased by 4%! ]

[ divine extraction of Milling Iron Monster (talent C-grade, level 34) successful. Congratulations: Strength + 167, Gold Talent S-grade) power increased by 5%! ]

...

Notifications kept appearing one after another as Liu Yan's body continued to gain various attributes.

Although Liu Yan did not gain many attributes in one go, he still gained quite a number of them together. Liu Yan's strength had increased a little.

At the same time, Liu Yan's Gold Talent and Wood Secret Art were continuously increasing. His comprehension and power were also improving visibly.

The strength of the first batch of monsters was generally not that great. Their combat strength was only around level 30, while the average combat strength of ordinary team members had already reached level 40. It was naturally easy for them to deal with these monsters.

Liu Yan's order was to attack, not to defend.

Members of the Land of Origin team maintained their formation. After these monsters charged at them, they switched from defending to attacking and gradually advanced. The team members constantly kill these monsters.

Every time Liu Yan waved his Blade of the Night, it would kill a small patch of monsters.

The first batch of monsters was soon wiped out under the massacre of Liu Yan and the team members.

Liu Yan finished killing the last monster. When he looked around, there was no longer a single monster standing.

Looking into the distance, he saw a giant monster approaching. It looked much more powerful.

Liu Yan checked the information about this monster through his bracelet.

[ Gnawing Monster ]

Potential: A (normal)

Level: 42

...

It was a normal monster but much stronger than the other monsters in the first wave. However, it was still not at the level of an elite monster.

In addition, this monster was not a metal attribute or wood attribute monster, so Liu Yan was not interested.

Seeing Chu Cunrui not far away, Liu Yan asked Chu Cunrui to kill this monster.

This monster was much stronger, and ordinary members could not defeat it alone. However, it was still not enough for top-tier members to take action. It was enough for an expert like Chu Cunrui to take care of it.

Murong Xue, who was not far away, was excited as she wanted to fight it. When she saw that Liu Yan had arranged for Chu Cunrui to take care of it, she was pissed.

At this moment, Liu Yan felt that he hadn't had enough. He was still enjoying himself. He didn't expect the first wave of monsters to end so quickly.

After a round of slaughter and Divine Extraction, Liu Yan felt that his Wood Secret Art had improved a little. It was difficult to raise it to the law by slaughtering these ordinary monsters. There was still a long way to go.

However, with this improvement in his Gold Talent, Liu Yan could sense that he was not far from the Gold Secret Art.

If this continued for a while longer, he might be able to upgrade his Gold Talent smoothly.

However, since the first wave of monsters had already ended, Liu Yan could only stop. There was no need to rush. After all, there were still more monsters to come.

Liu Yan turned around and saw that Chu Cunrui had successfully killed Gnawing Monster and dropped a silver treasure chest.

### **Chapter 389: Tier 2 Combat-enchanted Puppet**

Liu Yan looked at the members Land of Origin team and asked them to quickly build the battlefield, clean up the monster corpses, collect all kinds of treasure chests, and then rest on the spot. They had to prepare for the second wave of monsters.

The team members carried out the orders orderly. They cleaned up the battlefield and collect the treasure chests.

Meanwhile, Liu Yan had also arrived at the rear.

Liu Yan knew he could upgrade his Gold Talent to Gold Secret Art by extracting from the second wave of monsters.

Since that was the case, he might as well make some enchanted puppets first.

Coincidentally, he had opened a bunch of treasure chests earlier. The materials were abundant. With his Gold Talent, he did not need any soul-type items. Thus, he could make a bunch of combat-enchanted puppets. There was no limit to the number of them.

These enchanted puppets had extraordinary combat strength, especially when they were not afraid of getting injured or tired. They would undoubtedly be of great use in the battle against these monsters.

Just as Liu Yan went to the back to take the materials, Luo Qingcheng and the others came over.

“The first wave of monsters dropped 78 black iron treasure chests, 12 bronze treasure chests, and three silver treasure chests.” Luo Qingcheng reported.

Liu Yan was not surprised to hear Luo Qingcheng’s report.

These treasure chests were generally of lower grades. After all, they were the first wave of monsters. The strength of these monsters was limited, so the level of the treasure chests was lower.

The overall harvest was not small either. It could be considered a pretty good harvest.

“Got it. For the treasure chests below gold grade, you can arrange for people to open them and distribute the loot. Just hand over the Lord’s token fragment to me.” Liu Yan said directly.

A silver treasure chest could only drop A-grade equipment at most, and the probability was small. Liu Yan naturally did not need it. It would be enough if there were a Lord’s token fragment. As for the rest, he could leave it to Luo Qingcheng.

As for gold treasure chests, they could already drop S-grade or even better equipment and treasures. Naturally, Liu Yan wanted to keep them personally.

“Okay.” Luo Qingcheng agreed. “Then I will continue to arrange for the members to rest and prepare for the next battle.”

As she spoke, Luo Qingcheng left to get busy.

Behind her, Murong Xue saw that Luo Qingcheng had left and hurriedly came to Liu Yan. She said furiously, “Good for you, Liu Yan. You didn’t let us fight, but you did it yourself? How can you be so shameless?”

Hearing this, Liu Yan glanced at Murong Xue helplessly. This woman seemed to only think about fighting all day long. She didn’t even think about anything else.

The monsters in the previous rounds were weak, so there was no need for top experts to fight.

Liu Yan joined the fight because he wanted to improve his Gold Talent. This way, he could create an enchanted puppet to replace Undying Fire Phoenix. Then, it could go to fight stronger monsters instead of sticking in here.

However, Liu Yan was too lazy to explain to Murong Xue.

“I have my own reasons. There will be plenty of opportunities for you later. Why are you in such a hurry?” Liu Yan said impatiently.

Murong Xue’s expression was a little unhappy when she heard this, but she did not say anything else.

After all, Liu Yan was the team leader. Not only was he her good friend, but he also naturally had to listen to Liu Yan’s orders.

Following that, Liu Yan sent Murong Xue to the side.

At this time, Purple Wind Falcon returned from its investigation.

Through telepathy, Liu Yan immediately sensed everything that Purple Wind Falcon had just discovered.

The wood attribute territory and the metal attribute territory were good at defense. They were also facing the first wave of monsters, so they did not have much pressure.

However, they were still defending, so they were slower in killing the monsters. They had yet to finish off the first wave of monsters.

The situation on the Red Star Empire team was similar.

They relied on the earth attribute territory and their guardian beast to defend. Although they were only ordinary members, it was still easy for them to deal with the first wave of monsters.

However, they still had not finished off the first wave of monsters.

The European Federation team from the water attribute territory was slightly better. After all, their experts had joined in the fight. They were a bit faster at killing the monsters. They had just finished off the first wave of monsters.

Although the situation of the other four territories was different, there was a similarity. The speed at which they finished off the monsters was relatively slow. They were all slower than the Land of Origin team.

The experts of the Land of Origin team did not participate in the fight. Only Liu Yan joined the battle. On the contrary, the Pan-ocean Community team and the New Continent team sent their experts into the battle.

The most crucial point was that the Land of Origin team was not defending but attacking the monsters. Therefore, they were faster at killing the monsters.

As a result, the Land of Origin team finished off the first wave of monsters faster and had more time to rest.

Liu Yan raised his eyebrows. It seemed that the defense of the other four territories was somewhat problematic.

The metal attribute territory and the wood attribute territory were fine. They only needed to defend and did not need to have other goals.

However, the earth attribute territory and the water attribute territory would be in trouble if they did not improve their progress.

Liu Yan shook his head and did not overthink. After all, he had nothing to do with it. It would be fine if nothing happened to the fire attribute territory and his team.

Liu Yan collected his thoughts and asked Purple Wind Falcon to continue investigating the situation in the other territories.

Meanwhile, Liu Yan was preparing to make some combat-enchanted puppets.

After that, Liu Yan took out all kinds of materials and used his Gold Talent to start making the enchanted puppet according to the method in his mind.

Because there were no soul-type items, the enchanted puppet made in this way did not have independent consciousness. It only had some battle instincts and was not a complete combat-enchanted puppet.

A complete combat-enchanted puppet would automatically fight with just a command from Liu Yan.

Meanwhile, the combat-enchanted puppet that Liu Yan made now required Liu Yan to control it with his Gold Talent before he could use his battle instincts to fight.

Although it was not automatic and would be slightly more troublesome, it was still much easier. Liu Yan did not need to look for soul-type items, and he could create a bunch of them at once.

Liu Yan was busy for a while. It did not take long for Liu Yan to complete the first batch of finished products. There was a total of twenty combat-enchanted puppets.

There were still enough materials for Liu Yan to make many of them. The equipment he had obtained from the treasure chests of various grades had all been distributed. He collected the Lord's token fragments, and the other cultivation resources were distributed to other members.

However, only some team members needed these large amounts of materials. The remaining majority of these materials were not usable by anyone at all. They had been thrown into the storage ring all this time. Now, Liu Yan could put them to good use.

Liu Yan could continue to produce more. However, Liu Yan could already sense tons of monsters were gradually spawning around the fire attribute territory, so he stopped.

### **Chapter 390: Ancient Technology**

Liu Yan sensed the situation around him. Many monsters were respawning and heading toward the fire attribute territory.

These monsters were stronger than the first wave of monsters. It seemed to be the second wave of monsters.

Knowing that the second wave of monsters was about to spawn, and the battle was about to begin, Liu Yan stopped.

It was a great opportunity to test the combat strength of this batch of combat-enchanted puppets.

Usually, the combat strength of Liu Yan's tier 2 combat-enchanted puppets should be around level 35.

However, the actual combat strength would also change due to many factors.

For example, Liu Yan used Gold Talent to make these tier 2 combat-enchanted puppets. Liu Yan felt that the actual combat strength should be higher, but he did not know how much higher it was.

Putting away this batch of tier 2 combat-enchanted puppets, Liu Yan went to the front line.

At this time, the Land of Origin team had finished their rest and maintained their formation under the command of Luo Qingcheng. They were ready to face the second wave of monsters.

Liu Yan went to the front and took out 20 newly made tier 2 combat-enchanted puppets. He threw them in front of members of the Land of Origin team. As the first batch to face the monsters, he wanted to test his combat strength.

Fire attribute territory.

Members of the Land of Origin team were at a loss when they saw the 20 enchanted puppets released by Liu Yan.

They had never seen an enchanted puppet before, so they did not know what these puppets were.

The appearance of the enchanted puppet was similar to that of a human, but it was much taller. It was almost three meters tall, much taller than a normal human.

The enchanted puppet was also thicker, and its eyes were glowing red. Although it was not alive, it gave off a murderous aura.

At this time, the second wave of monsters had just begun to spawn. They were slowly approaching the fire attribute territory. There was still a certain distance, so it was not very dangerous.

Members of the Land of Origin team were not anxious. They looked at the inhuman thing that Liu Yan suddenly released and discussed curiously.

"What are those things? How come I've never seen them before?"

"It looks like a human, but I can't feel any life waves from its body. It shouldn't be alive at all."

"Although it's not alive, I feel that its aura isn't weak. It seems to be quite powerful."

"Why do I feel that those things are powerful?"

"This is the first time I've seen such a thing."

...

At the same time, Murong Xue and the others behind Liu Yan were also puzzled when they saw the enchanted puppets released by Liu Yan.

Although Liu Yan had an enchanted puppet before, Liu Yan did not use it because it was not strong enough.

Even though Murong Xue and Chu Long had followed Liu Yan for a while, they did not know that Liu Yan had such a thing.

“How come Liu Yan has those things? I never knew about it before.” Murong Xue was puzzled.

“It seems so powerful.” Chu Long said curiously.

Luo Qingcheng frowned slightly, “It seems a little familiar. I seem to have read about it in a book, but I don’t remember it.”

“It’s the enchanted puppet!”

The three women looked back when they heard the voice, but the person who spoke was Xu Han.

“Do you recognize those things?” Luo Qingcheng could not help but ask curiously.

The three girls all looked at Xu Han curiously.

Even Alan Smith, who was at the side, also cast his gaze over. He was a little curious about this so-called enchanted puppet.

Xu Han nodded and explained, “That’s right. It is an enchanted puppet. It is a combat machine made from a special method in ancient times. Although these enchanted puppets are not alive, they have a sense of combat. They can fight continuously and are not afraid of any pain. Unless their core is destroyed, they will listen to their master’s orders and continue to fight!”

“Really? Then this is too useful. How about combat strength?” As a battle maniac, Murong Xue was immediately interested in this kind of enchanted puppet that could automatically fight continuously.

Xu Han shook his head slightly, “I don’t know about that. Enchanted puppet is an ancient combat technique. Nowadays, there is almost no one in this world has mastered this kind of technology. I know very little about the enchanted puppet. I didn’t expect Liu Yan to know this kind of ancient technology. I remember that the enchanted puppet is divided into many tiers. The higher the tier, the stronger the strength. Of course, the actual combat strength depends on the material, especially the grade and strength of the origin stone and soul as the energy core. It also has a lot to do with the technical strength of the creator. We can only evaluate Liu Yan’s enchanted puppets when they fight.”

After hearing Xu Han’s words, they finally had a basic understanding of the enchanted puppet.

“I didn’t expect Liu Yan to know this kind of technique. I must have him teach me this technique some other day.” Murong Xue could not help but make up her mind.

“I’ve never seen Brother Liu Yan use it before.” Chu Long also looked at Liu Yan in the distance, somewhat puzzled.

Xu Han smiled at this time, “The technique of this enchanted puppet is complicated. It’s difficult for normal people to learn it. Moreover, it’s usually a one-on-one inheritance. Even if Liu Yan is willing to teach you, it’s not easy for you to learn it. It is an ancient technology.”

Murong Xue suddenly looked a little disappointed when she heard that.

At this time, Luo Qingcheng was looking at Liu Yan in the distance with some curiosity.

This man seemed to have a lot of secrets.

Luo Qingcheng felt she could not see through Liu Yan more and more.

Fortunately, Luo Qingcheng was sure that Liu Yan was on the same side as them. Hence, Liu Yan would not harm them.

This was enough.

At this time, the ordinary members of the Land of Origin heard the discussion between Xu Han and the others. They immediately had an understanding of the enchanted puppet and admired Liu Yan. At the same time, they were also curious about the combat strength of the enchanted puppets.

“I didn’t expect Captain Liu to have such skills. He’s really amazing.”

“He is the captain. He’s really amazing.”

“I wonder how strong the combat strength of these enchanted puppets is.”

“They don’t look weak at all. At the very least, they should be able to deal with these small monsters, right?”

“It would be great if they could deal with these monsters. These are combat machines that don’t know fatigue. With these enchanted puppets, wouldn’t it be much easier for us?”

“Yeah, I hope that the combat strength of these enchanted puppets is stronger.”

...

While the team members were discussing, the monster horde in the distance was gradually approaching.

Then, the team members stopped discussing and became serious. They were getting ready for battle.

At this time, Liu Yan directly controlled the 20 enchanted puppets with his Gold Talent to charge toward the monsters ahead.

Liu Yan wanted to let the enchanted puppets fight before the monster horde reached the attack range of his teammates. This way, he could determine the combat strength of the enchanted puppets. He could avoid being disturbed by his teammates. Otherwise, it would affect Liu Yan’s assessment of the combat strength of the enchanted puppets.
