Chapter 391: Powerful Tier 2 Combat-enchanted Puppet

Fire attribute territory.

The twenty enchanted puppets rushed into the monster horde and began to fight.

The tall enchanted puppets' combat strength was impressive. They could continuously take down the monsters in the chaotic monster horde. Their combat strength was good.

Although they were not like Liu Yan, who entered a zone and killed mercilessly, these enchanted puppets could withstand a group of monsters without being at a disadvantage.

Liu Yan watched for a while and understood the enchanted puppet's combat strength. He controlled the combat-enchanted puppets to come to his team members. Then, he let them fight with the team members.

The average combat strength of the first batch of monsters was around level 30.

The second batch of monsters was slightly stronger, with an average combat strength of around level 32.

After watching the battle process of the enchanted puppets, Liu Yan concluded that the overall combat strength of these tier 2 combat-enchanted puppets actually exceeded level 35. They reached around level 40.

Liu Yan guessed that it was due to his Gold Talent that made these enchanted puppets' combat strength even stronger.

With that, these enchanted puppets would be helpful to Liu Yan and the Land of Origin team.

These enchanted puppets seemed to be only around level 40 in combat strength. But they were much stronger than the average level 40 team members.

After all, ordinary members would be tired and injured, and there would be all kinds of dangers. After all, they were just humans.

And this enchanted puppet was a machine, an emotionless war machine.

The enchanted puppet would not be tired at all. As long as Liu Yan gave the order, these enchanted puppets would fight emotionlessly and tirelessly. They would keep killing until their cores were destroyed. Or, they would only stop when the energy in the origin stone in their core was exhausted.

These 20 enchanted puppets were all using low-grade origin stones. Liu Yan obtained 20 low-grade origin stones from Lighthouse Academy.

And even if they were low-grade origin stones, the energy contained in them was tremendous.

According to Liu Yan's estimation, even if these enchanted puppets kept fighting, they would need at least seven days to exhaust the energy in the origin stones.

Besides that, the enchanted puppets did not feel any pain and were not afraid of being injured.

Even if their arms and legs were broken, they would continue fighting until their energy core was destroyed.

In this way, the level-40 enchanted puppet's combat strength might already be stronger than the average level-40 team member, and it could still fight non-stop.

With these enchanted puppets, it would undoubtedly help the members relieve the pressure. It would be easier for them. Moreover, some members would be able to go down and rest for a while when they were tired. After all, they had the enchanted puppet to support them.

At this moment, Liu Yan was also thrilled. He did not expect Gold Talent would be so useful. Not only could they make enchanted puppets without soul-type items, but the enchanted puppets were even more powerful.

The only trouble was that Liu Yan needed to control them to fight. However, this was nothing to Liu Yan, who had powerful spiritual power.

These tier 2 combat-enchanted puppets were made from low-grade origin stone.

Liu Yan still had some medium-grade origin stones and even a few high-grade origin stones that he had obtained from opening treasure chests in his spatial ring.

With these origin stones that contained even more terrifying energy, he would be able to create a tier 2 enchanted puppet that had even greater combat strength.

If Liu Yan were free in the future, he could also learn the method to create an enchanted puppet in his mind.

If Liu Yan could master the method to create a tier 3 enchanted puppet, he could create an even more powerful tier 3 enchanted puppet.

Compared to a tier 2 enchanted puppet, a tier 3 combat enchanted puppet improved significantly.

However, it would take a certain amount of time to learn, and the production also required relatively rare materials. Naturally, Liu Yan would not spend the time to learn and produce. After all, a tier 2 enchanted puppet was enough for the time being.

At the same time, when members of the Land of Origin team saw the combat strength of these enchanted puppets, they were all shocked.

These enchanted puppets were not at a disadvantage when facing a group of monsters. It meant that these enchanted puppets' combat strengths were not weak at all. They were already slightly more powerful than ordinary members like them.

More importantly, judging from Xu Han's words, these enchanted puppets never tired and were not afraid of being injured. Wasn't their combat strength stronger than theirs?

Instantly, the team members became excited and cheered for Liu Yan.

"I didn't expect these enchanted puppets' combat strength would be so powerful."

“With the help of these enchanted puppets, we are much more relaxed now.”

“I didn’t expect Captain’s enchanted puppet would be so powerful. Captain Liu is too powerful, isn’t he?”

“It’s so comfortable now. We can relax a lot.”

“Now that we have twenty war machines, the pressure on us has been greatly reduced!”

...

For a moment, the team members felt even more grateful that they had such a mighty captain like Liu Yan, which was why they were in such a good situation. Now, they could even deal with the monster riot with such ease.

Chu Cunrui and the others looked at each other. These experts were from the New Continent team or the Pan-ocean Community team.

At this moment, these people could not help but feel a little envious. The Land of Origin had a high chance of becoming the first place in this competition.

With such a ridiculously strong captain, these members did not need to do anything. They just needed to lie down properly, and they would be able to advance.

Zheng Tainan was complaining that it would be very tiring to keep fighting. The battlefield would become even more dangerous.

But at this moment, these enchanted puppets were right in front of Zheng Tainan and the others, and the pressure on Zheng Tainan and the others suddenly decreased.

The enchanted puppets blocked most of the monsters. Occasionally, a few monsters would pass by the enchanted puppets and rush in front of them. However, they were already alone or even injured. Zheng Tainan and the others casually waved their weapons to kill the monsters effortlessly. Sometimes, the team members behind them who were good at long-range attacks killed the monsters before them.

Zheng Tainan, who had been frowning a moment ago, suddenly beamed with joy.

“Captain, these enchanted puppets are useful. We’re relieved all of a sudden.” Zheng Tainan could not help but smile.

Liu Qing also said with a relaxed expression, “Yeah, we can even paddle here.”

“Captain Liu is still the best. He knows how to cover us. He’s really too good to us.” Liu Ning looked touched.

The other team members were also in a similar situation as Zheng Tainan and the others.

It seemed that 20 enchanted puppets were not a lot, but they were free combat strength. They did not know fatigue and were not afraid of getting injured.

The Land of Origin team only had 60 people other than the top members. It was equivalent to the overall combat strength increased by one-third. The battle became a lot easier.

Chapter 392: Substitute Puppet Completed!

Fire attribute territory.

The battle between the Land of Origin team and the monsters was going on intensely.

Compared to the first wave of monsters, the second wave of monsters was much stronger. In addition, the number of monsters in the second wave was much more than in the first wave.

Overall, the second wave of monsters put a lot of pressure on the team members.

However, members of the Land of Origin team were not afraid. Instead, they were eager to fight.

During this time, through many high-level cultivation resources, members of the Land of Origin team improved their combat strength tremendously. Therefore, they were full of confidence.

Apart from that, they also had a terrifyingly powerful captain, Liu Yan.

Liu Yan gave them twenty powerful combat-enchanted puppets to fight together. It also eased a lot of their pressure. Even now, Liu Yan was fighting at the front.

With Liu Yan leading the team personally, the team's morale was stable. They were all extremely confident, bursting out with an even stronger desire to fight.

Liu Yan was still holding the Blade of the Night among the monsters. He constantly searched for metal attribute and wood attribute monsters. He wanted to kill and extract them.

Notifications kept appearing before Liu Yan's eyes.

[Divine Extraction of Golden-eyed Gorse (potential C-grade, level 35) successful. Congratulations: Agility + 324, Gold Talent (S-grade) + 5%!]

[Divine Extraction of Patterned Leopard (potential B-grade, level 33) successful. Congratulations: Vitality + 432, Wood Secret Art (SS-grade) + 2%!]

[Divine Extraction of Willow Tree Spirit (potential B-grade, level 31) successful. Congratulations: Spirit + 345, Wood Secret Art (SS-grade) + 3%!]

With the appearance of many hints, Liu Yan's various attributes are constantly improving.

At the same time, his Gold Talent and Wood Secret Art were also constantly improving.

Liu Yan was getting closer and closer to breaking through to Gold Secret Art.

Finally, as Liu Yan killed another metal attribute monster for Divine Extraction, two notifications appeared in front of Liu Yan.

[Divine Extraction of Golden Zebra (potential B-grade, level 34) successful. Congratulations: Agility + 621, Gold Talent (S-grade) + 5%!]

[Congratulations, Gold Talent (S-grade) to Gold Secret Art (SS-grade)!]

Seeing the notification, Liu Yan was secretly delighted. He had finally leveled up Gold Talent to Gold Secret Art!

Liu Yan immediately stopped fighting and left the battlefield.

Although he continued to kill these ordinary monsters, it could also continuously increase Liu Yan's strength.

Not only could he gain exp and attribute points to increase his strength, but he could also increase his two attribute secret arts.

However, Liu Yan was not satisfied with this small gain.

Liu Yan still wanted to help Undying Fire Phoenix kill these weak monsters and head to the bigger battlefield at the back. There was still a greater harvest waiting for Liu Yan there.

When Liu Yan was observing from the sky, he sensed that there seemed to be an elite monster at the border with his Extraordinary Five Senses.

However, it did not seem to have reached the turn of the elite monster. It did not move, nor did it attack any territory. It had been waiting on the spot.

Liu Yan was willing to give up on these weak monsters and headed for the elite monster. He could leave it for these ordinary members.

Liu Yan left the front battlefield and returned to the space at the back. Then, he took out all the necessary materials and began to produce the enchanted puppet.

Liu Yan first closed his eyes and reviewed the production method of the substitute puppet.

After all, the enchanted puppet was an item from ancient technology. It was complicated.

Even if Liu Yan received the inheritance, it directly appeared in his mind. Liu Yan had to review it a few times before he could remember it and start producing it.

It was hard to imagine how long he needed to learn it.

After all, the process of making an enchanted puppet was complicated, and there was no room for error.

If there were any mistakes, all the previous efforts would be wasted immediately. It could be said that the requirements were extremely high.

Fortunately, the most complicated step was making the consciousness of the enchanted puppet using the related items to the soul. Liu Yan did not need to go through so much trouble.

With the gold profound, it was much easier for Liu Yan to make the puppet. He had directly omitted the hardest step.

At this moment, Liu Yan could not help but feel lucky again. Fortunately, he had Gold Secret Art, which was also compatible with the enchanted puppet. Otherwise, Liu Yan would not be able to make such a complex substitute puppet. Even making those ordinary tier 2 combat-enchanted puppets just now required tons of effort.

With everything ready, Liu Yan glanced at Undying Phoenix in the sky, who was helping the ordinary members. He stepped on his SS equipment, Gale Boots, and flew into the sky. Then, he came to Undying Fire Phoenix and took a feather from its body.

Undying Fire Phoenix, who was in the middle of the battle, glanced at Liu Yan. It seemed a little confused why Liu Yan would suddenly take its feather. However, it did not mind and continued to fight.

After returning to the ground, Liu Yan obtained one of the feathers of the Undying Flame Phoenix. With its aura, everything was ready. He immediately started to make the enchanted puppet.

After a complicated process, a huge enchanted puppet was made.

The previous tier 2 combat enchanted puppet was similar to a human. It was about three meters tall and half a body taller than a regular human. It had a pitch-black body that looked extremely cold.

The new substitute puppet was at least five meters tall. It looked like a miniature giant, giving off a very oppressive feeling!

After making the substitute puppet, Liu Yan was not in a hurry to experiment. Instead, he continued to make tier 2 combat-enchanted puppets.

He had only made twenty tier 2 combat-enchanted puppets just now because time was limited. It was not because he was out of materials.

Previously, he had obtained tons of materials from the treasure chests. Now, Liu Yan could be said to be extremely rich. As long as he had enough origin stone, he could make many tier 2 combat-enchanted puppets.

This result might have been difficult to achieve. After all, apart from the complicated production process, rare materials, and precious origin stones, the most precious thing needed to make an enchanted puppet was the soul-related items.

Any soul-related item was extremely precious, but it was not easy to find.

Even Liu Yan, who had tons of treasures, did not have an item related to his soul. It showed how precious soul-related items were.

Liu Yan had Gold Secret Art. That was why he could make an incomplete enchanted puppet without an item related to the soul. Although it was incomplete and did not have the independent consciousness of an ordinary enchanted puppet, it was still enough. Liu Yan just needed to control it personally. It was not too troublesome.

Liu Yan sat down and continued to make the puppet.

Chapter 393: Mass Production of Combat-enchanted Puppets

A group of ordinary members of the Land of Origin team was fighting the second wave of monsters in front of them.

Although there were many monsters in the second wave, the team members were equally powerful. Moreover, the team members had the help of Chu Cunrui, the other eight experts, and 20 tier 2 combat-enchanted puppets. They did not have much pressure fighting at the battlefield. Instead, they became even braver as they fought.

Meanwhile, Liu Yan was in the space behind them. He was making an enchanted puppet with all his attention.

One after another, the enchanted puppets gradually took shape through Liu Yan's hands.

After a long time, Liu Yan finally stopped.

There were many tier 2 combat-enchanted puppets in front of him.

Liu Yan had recently used 20 low-grade origin stones to make a white tier 2 combat-enchanted puppet. Their combat strength was about the same, which was level 40.

In addition, Liu Yan used ten medium-grade origin stones to create ten tier 2 combat-enchanted puppets. Although they were all tier 2 combat-enchanted puppets made of the same materials, they were made of medium-grade origin stones. Naturally, their combat strength was stronger. Liu Yan used red as their outer appearance to make it easier to differentiate between the two types of puppets.

Finally, Liu Yan used the only remaining high-grade origin stone to create a tier 2 combat-enchanted puppet.

The combat strength of tier 2 combat-enchanted puppets made of high-tier origin stone was naturally more powerful. Liu Yan used orange as the appearance difference.

The combat strength of a white tier 2 combat-enchanted puppet was around level 40. Liu Yan needed to test the combat strength of red and orange tier 2 combat-enchanted puppets.

Liu Yan only had two high-tier origin stones, and he obtained them from the golden treasure chest. One was used to make an orange tier 2 combat-enchanted puppet, and the other was used to make a substitute puppet.

When everything was done, Liu Yan stood up and put away all the enchanted puppets before him, then went to the front line of the battlefield.

The ordinary members were fighting fiercely. They were surprised to see Liu Yan coming again.

After seeing Liu Yan, the desire of the members to fight grew stronger, and they began to put in more effort.

The monsters could not hold on any longer. Then, they were forced to retreat as the Land of Origin team fought back fiercely.

Seeing this situation, Liu Yan was satisfied.

The top combat strength of a team was important, but the combat strength of the ordinary members was also crucial.

Especially in such a large-scale battle, the ordinary members had a great influence.

After experiencing a series of events on the fifth level of the Tower, these ordinary members were motivated and were gradually becoming stronger.

Most importantly, they had a stronger desire to become stronger.

Liu Yan believed his team members would become stronger and stronger in the future.

However, Liu Yan still needed to test the effects of the new substitute puppet and the combat ability of the red tier 2 and orange tier 2 combat-enchanted puppets.

Then, Liu Yan shouted, "Everyone, stop attacking first. Just defend yourselves. Let me test the effects of the enchanted puppet first."

"Yes!"

The team members answered one after another. They were convinced by Liu Yan's words.

Some of these members might not have trusted Liu Yan.

But now, they had already trusted Liu Yan very much.

Zheng Tainan and the other two had a conflict with Liu Yan before. Even if they had some petty thoughts, they still trusted Liu Yan very much as their captain and obeyed his orders.

Seeing that the team members had stopped attacking, Liu Yan began the experiment.

Liu Yan first released 20 newly made white tier 2 combat-enchanted puppets, ten red tier 2 combat-enchanted puppets, and one orange tier 2 combat-enchanted puppet.

After releasing these puppets, Liu Yan directly controlled these tier 2 combat-enchanted puppets through his Gold Secret Art to start the battle. To be precise, it was a massacre.

Instantly, dozens of tier 2 combat-enchanted puppets killed the monsters and forced them to retreat.

The team members were shocked when they saw this scene.

The twenty white tier 2 combat-enchanted puppets that Liu Yan released earlier had already helped them and relieved a lot of pressure.

However, the team member did not expect Liu Yan had more than 20 white tier 2 combat-enchanted puppets.

The new combat-enchanted puppets looked similar in size, but their colors were different. Their combat strength was also completely different.

Soon, some team members noticed that the newly released red combat-enchanted puppet was much stronger than the white one.

The only orange combat-enchanted puppet was even more ridiculous. A single orange combat-enchanted puppet crushed many monsters.

At this point, there were 51 combat-enchanted puppets fighting in front of the team members. Almost none of the monsters were able to charge forward. They were killed by the enchanted puppets.

Occasionally, a few monsters charged through. However, they were also severely injured. The team members raised their blades and killed them.

It also meant that these combat-enchanted puppets alone were enough to deal with the second wave of monsters. There was no need for the team members to make a move at all!

The team members immediately started discussing in surprise.

“Damn, this new red combat-enchanted puppet is so powerful. I feel that it’s even stronger than me.”

“I also feel that these enchanted puppets are so powerful. They are incredible.”

“Not only that. You guys didn’t see the only orange enchanted puppet. It’s too powerful. It’s almost as strong as an expert.”

“I saw it too. It’s simply killing randomly. Look, it’s over there!”

“With these enchanted puppets, we don’t even need to attack.”

“Captain is too powerful. He has so many enchanted puppets.”

“Now that we don’t have to fight, we’ll be fine. Isn’t this too easy?”

...

The team members were all in high spirits. They never expected Liu Yan to have so many powerful enchanted puppets.

At the same time, Murong Xue, Xu Han, and the others at the back noticed this scene and were also very surprised.

“What did Liu Yan go to the back to do just now? Did he make these enchanted puppets?” Murong Xue could not help but wonder.

“Impossible!”

Xu Han immediately shook his head and said, “Although I don’t know much about making enchanted puppets, I know this is an extremely complicated technology. Even those who are proficient in it would need a lot of time to make one. How could Liu Yan make so many enchanted puppets in such a short time?”

“I still don’t know how strong Brother Liu Yan is, but no matter what, it’s still a good thing. With so many enchanted puppets, the team members will have a much easier time and don’t even need to fight.” Chu Long said happily to her team members

Chapter 394: Experiment Successful

Fire-attribute territory.

Liu Yan carefully observed the battle effect of the three colors puppets. He knew the combat strength of these tier 2 enchanted puppets.

The newly produced white tier 2 combat-enchanted puppet was similar to the previous one. Its average strength was still around level 40.

The red tier 2 combat-enchanted puppet used a medium-tier origin stone. Its strength was much stronger now that it had reached level 45.

The only orange tier 2 combat-enchanted puppet used a high-grade origin stone. Its combat strength was even more exaggerated, reaching level 50.

After the combat strength test of tier 2 combat-enchanted puppet was completed, Liu Yan began to test the effect of the substitute puppet.

Liu Yan first used Gold Secret Art to control fifty-one tier 2 combat-enchanted puppets to form a defensive formation.

Then, Liu Yan directly took out the substitute puppet from his spatial ring and placed it in the center of the group of tier 2 combat-enchanted puppets.

At the same time, Liu Yan had Undying Fire Phoenix suppress its aura first.

Immediately, the aura of Undying Fire Phoenix weakened a little while the substitute puppet emitted the aura of Undying Fire Phoenix.

The monsters were initially heading toward Undying Phoenix. Then, they immediately changed their direction to the substitute puppet.

Seeing this scene, Liu Yan immediately felt relieved. His idea was indeed correct.

Liu Yan's plan was successful. He could use the substitute puppet to replace Undying Fire Phoenix, thus freeing Undying Fire Phoenix from the entanglement of these ordinary monsters. It allowed Undying Fire Phoenix to head to fight stronger monsters and gain more rewards.

Before that, Liu Yan also needed to test the combat strength of the substitute puppet.

The substitute puppet was not made for combat. Its combat strength was not as good as a tier 2 combat-enchanted puppet. Still, it cost a lot of precious materials. Liu Yan even spent a high-grade origin stone to make it. It should still have some combat strength.

Liu Yan controlled the tier 2 combat-enchanted puppets through Gold Secret Art, cooperating with the substitute puppet to fight.

He was trying to prevent the substitute puppet from being crushed by too many monsters. After all, the substitute puppet might not be very good at fighting. The aggro of these monsters was on the substitute puppet.

But soon, Liu Yan found that his worries were unnecessary.

Although the combat strength of the substitute puppet was not very strong, it used a high-grade origin stone. Its combat strength was not particularly weak.

After a series of battle experiments, Liu Yan estimated that the substitute puppet should have a combat strength of level 45. Although it could not compare to the combat strength of the orange tier 2 combat-enchanted puppet, it had no problem protecting itself.

Moreover, the best use of the substitute puppet was to release the aura of Undying Fire Phoenix. It could replace Undying Fire Phoenix to attract these monsters. Then, Undying Fire Phoenix could be free.

Liu Yan put away the substitute puppet and went to the open space in the group's center. He then put it down. He ordered the substitute puppet to stay on the spot and wait for orders. When the battle became dangerous, it only needed to protect itself and did not need to get into a fight.

The monsters were attracted by the substitute puppet again. They rushed toward the formation of team members of the Land of Origin team. The effect was exactly the same as the Undying Fire Phoenix.

Xu Han was stunned when he saw this scene. He exclaimed, "This is a substitute puppet. Liu Yan can already make a substitute puppet?"

"What is a substitute puppet? Is it powerful?" Murong Xue was puzzled.

Chu Long and Luo Qingcheng also looked at Xu Han in puzzlement.

Xu Han's expression was a little strange. He also looked at Liu Yan in disbelief. Then, she explained, "The substitute puppet can use a special method to release the same soul aura, which can confuse the enemy. Now, Liu Yan has made a special enchanted puppet that exudes the aura of the Undying Fire Phoenix. It makes these monsters mistakenly think that this substitute enchanted puppet is Undying Fire Phoenix. They are all attracted by this substitute enchanted puppet."

"Is that so? Great! It's not very good at fighting either." Murong Xue curled her lips and spoke. She had not realized the powerful special effect of the substitute enchanted puppet and only thought about combat strength.

Luo Qingcheng quickly realized the heaven-defying special effect of a substitute enchanted puppet.

Luo Qingcheng said with surprise, "There's such a magical enchanted puppet. Doesn't this mean that from now on, Undying Fire Phoenix will be completely free and not limited to this?"

"It seems to be true. That's too amazing." Chu Long said in surprise.

Murong Xue finally reacted, "If that's the case, doesn't that mean Undying Fire Phoenix will be free to fight those high-level monsters? That's really not bad."

When the team members saw this scene, they were a little stunned at first. They did not know what the new enchanted puppet was. But after Liu Yan's experiments, the team members quickly guessed the function of this enchanted puppet.

This enchanted puppet could attract the aggro of all the monsters.

According to the rules of the Will of the Tower, the biggest aggro of all the monsters was the guardian beast, followed by the team members, and then the enchanted puppet, which was a subsidiary combat unit.

But now, Liu Yan's special enchanted puppet had suddenly attracted the aggro of all the monsters. The aggro of monsters toward it was higher than the guardian beast, Undying Fire Phoenix!

"Damn, what kind of enchanted puppet is this? It's too amazing."

"Yeah, the aggro is even higher than the guardian beast, the Undying Fire Phoenix. It's ridiculous."

"Combat strength isn't bad either. It's about the same as the combat strength of those red enchanted puppets."

"It seems that Captain Liu is going to use this special enchanted puppet to replace Undying Fire Phoenix."

"In that case, Undying Fire Phoenix will be free. There's no need to be confined here forever."

"Captain Liu is too amazing. He can create such a magical enchanted puppet!"

...

Liu Yan had completed the substitute enchanted puppet. He walked up to the team members and said, "This substitute enchanted puppet can replace Undying Fire Phoenix. Undying Fire Phoenix can follow me to battle the more powerful monsters later. Then, we can pick up higher-grade treasure chests and obtain even greater rewards."

When the team members heard this, they cheered for Liu Yan. At the same time, they were looking forward to Liu Yan and Undying Fire Phoenix defeating the higher-grade monsters and dropping higher-grade treasure chests.

Now, their team had already collected 5,000 Lord's token fragments. Compared to the other two forces, they had a huge advantage.

If they dropped a few more high-grade treasure chests, they could obtain even more Lord's token fragments and become way ahead of the other two forces.

They might even have the chance to gather 10,000 Lord's token fragments. Then, the Land of Origin team could fulfill the requirements. They could obtain a generous reward and advance.

The first place could get a gold Lord's token fragment. Compared to an ordinary Lord's token fragment, it had a qualitative increase, and it would be helpful on the higher levels of the Tower!

Chapter 395: The Ordinary Members were Equally Important

When Xu Han, Murong Xue, and the others heard Liu Yan's words, they were overjoyed.

Previously, they had always stayed here and guarded their territory, unable to leave.

Now, they had a substitute enchanted puppet. Undying Fire Phoenix could finally leave. The few top experts could also leave together to go out and kill more powerful monsters. They did not have to be constantly entangled by the annoying monsters here.

In any case, Liu Yan made so many combat-enchanted puppets. The Land of Origin team would not be in any danger here.

“Now we can at least go out and fight, right?” Murong Xue rubbed her fists, her face full of anticipation.

Xu Han smiled and said, “I guess so. We can finally get out.”

Xu Han could not help but feel a little excited, especially after obtaining Phantom Blue Staff. Xu Han wanted to test his current strength.

Xu Han could not test it out on these weak monsters.

Chu Long sighed and said, “I can’t go. I’ll have to stay here to support the main team.”

After all, Chu Long was a powerful priest. The Land of Origin team needed her very much.

On the other side, Liu Yan stood in front of the ordinary members of the Land of Origin team. He said, “I will leave half of these combat-enchanted puppets here to help, and I will keep the rest. I hope that you don’t rely too much on the enchanted puppets. Although this battle is dangerous for you, it is also an opportunity to gain experience. Don’t miss such a good opportunity to fight.”

Liu Yan knew very well that it was crucial to nurture the combat strength of these ordinary members.

With so many tier 2 enchanted puppets, Liu Yan’s combat strength was powerful. Not only could the puppets help the team members, but they could also even replace the team members.

However, this was not the outcome that Liu Yan wanted.

His teammates did not have to participate in the battle and did not have to fight the monsters. Hence, there would not be any danger.

However, they would also lose the opportunity to improve themselves through this battle.

Liu Yan could help them once, but he could not help them time and time again.

In the future, these team members would have to face danger head-on.

They had to face the challenges bravely at this time to prepare themselves for the future.

In any case, these monsters were not very strong. It was an opportunity for the team members to gain experience.

With Chu Long and a few priests behind them, it was difficult for them to face any great danger.

When the team members heard Liu Yan’s words, they were stunned at first. Then, they quickly reacted and understood captain Liu Yan’s intentions.

“Captain wants us to become stronger.”

“I think it makes sense. These monsters are not strong, and we can deal with them. It’s just that there are too many of them.”

“They’re just some weak monsters. We don’t have to be afraid.”

“Yeah, this is a rare opportunity for us to gain combat experience. We can’t miss it.”

“Captain, you’re doing this for our good.”

...

The team members discussed animatedly and agreed with Liu Yan’s decision.

These team members trusted Liu Yan’s decision. Therefore, they also believed in Liu Yan’s order and would follow him.

Following that, Liu Yan continued to leave the twenty white tier 2 combat-enchanted puppets and five red tier 2 combat-enchanted puppets. He kept the rest for his use.

These monsters were not very strong, and the team members could fight them.

The only problem was that there were too many of these monsters, so it would be more troublesome to deal with them. Therefore, Liu Yan also left these enchanted puppets to help the team members relieve the pressure and prevent danger.

After Liu Yan handled everything, he returned to the rear. He found Xu Han, Murong Xue, and the others. They were prepared to set off.

Seeing Liu Yan’s arrival, Murong Xue immediately walked forward with a face full of anticipation.

“How is it? Can we go out and fight now?” Murong Xue hurriedly asked with an impatient look.

Liu Yan glanced at Murong Xue and said indifferently, “What’s the rush? You can fight after I understand the situation and confirm the direction. If we go out now, do you know where to fight?”

As he said that, Liu Yan directly stepped on his SS-grade equipment, Gale Boots, and flew into the sky.

Murong Xue, who was at the same spot, immediately felt relieved when she heard that. She was eager to fight stronger monsters. Otherwise, it would be too boring to stay in the territory and fight those small monsters.

On the other side, Liu Yan had already arrived in the sky and carefully observed the situation around him.

Previously, Liu Yan had wanted to bring Murong Xue, Xu Han, and Allen Smith to fight powerful monsters.

The situation of the Land of Origin team became stable, and there was no danger.

After all, members of the Land of Origin team had improved during this time. Especially now that the enchanted puppet was participating in the battle, the pressure was much less. Naturally, they did not need the help of Liu Yan and the others.

However, there was nothing they could do about it. There were a large number of weak monsters around them, and they could not see the end of them.

Even if the team members continued to kill the monsters, they would still need to fight for a long time before they could kill all monsters.

No matter how powerful Murong Xue and the others were, they could not fly. They could only kill the weak monsters and leave. That would take too long.

Therefore, Liu Yan also thought of freeing Undying Fire Phoenix and replacing it with a puppet.

After freeing Undying Fire Phoenix, not only could it fight alongside Liu Yan, but it could also carry Murong Xue and the others.

With that, Liu Yan and the other top experts of the Land of Origin team could leave. Undying Fire Phoenix fighting alongside was a reliable combat strength. He believed that it should be enough to deal with elite monsters.

The elite monsters could drop platinum treasure chests.

There was an S-grade treasure in the golden treasure chest. The items in the platinum treasure chest would be unimaginable.

However, Liu Yan needed to investigate the situation of the other territories. After understanding the situation outside, he would make a decision.

Liu Yan asked Purple Wind Falcon to investigate the water and earth attribute territories. Meanwhile, Liu Yan went to the wood and metal attribute territories to look at the situation and help.

From what he had learned before, the wood and metal attribute territories did not have any problems in defense. However, they were under a lot of pressure when facing many weak monsters. They were slower in killing the monsters.

The members of the New Continent team and the Pan-ocean Community team were not as strong as the Land of Origin team. There was still a gap in strength. They had a hard time resisting the monsters. Therefore, Liu Yan's support was needed.

Liu Yan happened to have some extra tier 2 combat-enchanted puppets.

Following that, Liu Yan stepped on the SS-grade equipment Gale Boots and headed to the nearest wood attribute territory.

Chapter 396: Yearning to Fly

Liu Yan arrived in the sky above the wood attribute territory.

In the wood attribute territory, He Yang was leading the members of the Pan-ocean Community team. They were using the terrain to defend.

The Land of Origin team chose to fight the monsters head-on or even take the initiative to attack. They were in a direct formation to fight against a large number of monsters.

On the contrary, the Pan-ocean Community team was on the defensive. They used the unique terrain to defend themselves.

The monsters could not spread out in this complex terrain.

No matter how many monsters there were, the number of monsters that could attack the Pan-ocean Community team was relatively limited.

As a result, the Pan-ocean community team members were more relaxed. They did not need to face so many monsters at a time.

Members of the Pan-ocean Community team were divided into two squads. One squad fought at the front to resist the monsters. The other squad took a simple rest at the back. When the first team was tired, they would take turns fighting.

Overall, the battles in the wood attribute territory were well-organized and well-defended.

Liu Yan saw the scene on the ground and nodded slightly.

He Yang and his team members performed very well in defense.

If this went on, they would probably be able to defend for a long time without any problems.

It was also an order that Liu Yan had given to He Yang and the Pan-ocean Community team.

At this moment, these team members were defending very well with their guardian beast, Sturdy Back Ape.

However, Liu Yan knew it was not the best tactic.

The Pan-ocean Community team used a defensive method and took advantage of the terrain. This way, the monsters could not spread out and could only advance bit by bit.

As a result, the members of the Pan-ocean Community team had a much easier time. However, they were slower at killing the monsters.

The Land of Origin team had almost killed the second wave of monsters. On the other hand, the Pan-ocean Community team from the wood attribute territory had only just begun to fight the second wave of monsters.

Their killing speed was too slow when they dealt with the first wave of monsters. The battle dragged out for too long. They did not have the time to take a breather.

The Pan-ocean Community team was divided into two squads. They were intermittently defending and resting.

However, this situation could not continue, especially in a long battle. Otherwise, the members of the two squads would not withstand the fatigue no matter how much they rotated.

Of course, the overall situation was still relatively good.

Liu Yan observed for a while. The Pan-ocean Community team was killing too slowly. Moreover, there were no experts in the Pan-ocean Community team, so it might be difficult for them to face the elite monsters later.

After thinking for a while, Liu Yan decided to use the only orange-tier 2 combat enchanted puppet to support the Pan-ocean Community team.

The Pan-ocean Community team had many members but lacked top-tier combat strength. The powerful orange tier 2 combat enchanted puppet was exactly what they needed.

Thinking of this, Liu Yan controlled his boots to slowly descend under the wind and soon arrived above the battlefield.

Half of the Pan-ocean Community team was fighting intensely, while the other half was resting.

The rest of the members soon noticed Liu Yan. They were surprised. At first, they thought it was some flying monster, so they stood up nervously and prepared for battle.

However, as Liu Yan approached, the members recognized that it was him.

The members of the Pan-ocean Community team finally relaxed and put down their weapons. At the same time, they were also surprised.

Flying was not something only top experts or powerful wind attribute controllers could do. At the very least, it could only exist on the eighth level of the Tower.

How could Liu Yan have already mastered flying when he was only on the fifth level of the Tower?

“What’s going on? How did he manage to fly?”

“Didn’t they say that only top experts or wind attribute controllers on the tenth level of the Tower could fly?”

“This is only the fifth level of the Tower. How can Liu Yan fly?”

“This is too amazing. Liu Yan can fly on the fifth level of the Tower!”

“D*mn, he can fly already. It looks comfortable.”

...

The Pan-ocean Community team looked at Liu Yan in the air and discussed animatedly. At the same time, they were all filled with envy.

Flying was something that many humans envied. However, it was too difficult to achieve. Only true experts could do it.

He Yang was commanding the defensive battle. He also noticed Liu Yan had arrived in the sky. His expression immediately became a little strange.

Liu Yan was ridiculously strong. Liu Yan was strong in all aspects, including his combat strength and commanding ability.

After interacting with Liu Yan for a period, He Yang was impressed by Liu Yan.

It was especially so after the initial plan had caused Alliance Number 1 and the Red Star Empire team to fight. Only then could the Land of Origin team suddenly reap the benefits of the other side, obtaining the huge advantage they had now.

And now, Liu Yan could even control flight. He was ridiculously strong.

However, after careful observation, He Yang also found that Liu Yan was not flying smoothly and naturally. It was obvious that Liu Yan had not mastered flight completely. He must have used a special method to achieve flying.

But even so, it was still impressive.

There were five representative teams on the fifth level of the Tower. There were many awakened ones. However, the awakened ones that could fly could be counted on one hand.

No one else could fly continuously as Liu Yan did. It seemed that Liu Yan was the only one.

At this moment, Liu Yan ignored the discussions of members of the Pan-ocean Community team about his flying. Instead, he looked at He Yang and asked, "How is it? Is there a lot of pressure on the defense?"

"It's alright." He Yang nodded and said truthfully, "The strength of these small monsters is average, but they are too many. It's just that we need to spend more time and effort dealing with them. It's just that we're a little worried about the elite monsters behind us. When that time comes, our members will not be strong enough. After all, you know that the top combat strength of our Pan-ocean Community team has never been eye-catching."

Liu Yan nodded slightly. Liu Yan had long known about this situation. So, he was here to help.

With a wave of his hand, Liu Yan released the tier 2 combat-type enchanted puppet from his spatial ring and placed it at the front of the Pan-ocean Community team.

The members of the Pan-ocean Community team had never seen this orange enchanted puppet before. They were all curious and did not know what it was.

It looked like a human but was much taller than a regular human.

There was no life aura on its body, but it had a powerful aura. It was strange.

"Captain Liu Yan, who are you?" He Yang could not help but ask with a puzzled look.

Chapter 397: Supporting the Wood Attribute Territory

Faced with the doubts of He Yang and the other Pan-ocean Community team members, Liu Yan looked at the orange-colored tier 2 combat enchanted puppet and directly explained,

"It's just an enchanted puppet. It's here to support you. Its combat strength is pretty good. It has about level 50 combat strength."

Hearing Liu Yan's words, He Yang was momentarily stunned. He then looked at the orange enchanted puppet in surprise.

What kind of enchanted puppet had a combat strength of level 50?

One had to know that the average combat strength of the members of the Pan-ocean Community team was only level 37.

As the strongest expert in the Pan-ocean Community team, He Yang's combat strength was slightly above level 50.

This orange enchanted puppet's combat strength was actually about the same as his. Besides, it was far ahead of the ordinary members.

When the ordinary members of the Pan-ocean Community team heard Liu Yan's words, their faces were filled with astonishment.

"Is this for real? This thing can have the combat strength of level 50?"

"If this is real, isn't it too powerful?"

"What the hell is this enchanted puppet? Why haven't I heard of it before?"

"It does look strong."

"I didn't expect Liu Yan to have such a thing. It's too powerful."

...

Members of the Pan-ocean Community team discussed animatedly. Most of them were skeptical of Liu Yan's words.

Liu Yan did not have time to explain too much to them. He Yang and the members of the Pan-ocean Community team continued to defend. Liu Yan directly stepped on his gale boots and flew high into the sky, leaving.

Before He Yang and his team members could ask more questions, Liu Yan had already left.

He Yang and the others could only continue to defend and fight. At the same time, they also observed the combat strength of the orange enchanted puppet.

The orange enchanted puppet stood at the front, facing the monsters charging at it. It waved the long saber in its hand.

With a swing of its saber, a group of monsters were killed and fell to the ground instantly.

Meanwhile, the orange enchanted puppet continued to fight and kill the monsters. It did not stop at all, just like an emotionless war machine.

When members of the Pan-ocean community team saw this scene, they were all stunned.

They did not expect that the combat strength of the orange enchanted puppet would be so powerful.

"This is too powerful."

"What is this called? An enchanted puppet, right? It is too powerful."

"Wow, is it that powerful?"

"Now, we can relax a lot."

"This enchanted puppet doesn't need to rest. Can it fight all the time?"

“I think so. After all, it’s not a human, and it won’t get tired.”

...

Members of the Pan-ocean Community team were tired from fighting tons of monsters. They felt much more confident when they saw how powerful the orange enchanted puppet was.

The captain, He Yang, was also surprised when he saw the orange enchanted puppet’s terrifying combat strength.

As an expert, He Yang could see more.

After all, the strength of the ordinary members was limited. There were some details that they did not notice.

He Yang realized that the combat strength of the orange enchanted puppet was indeed at level 50.

However, it was far more efficient than a level 50 awakened one.

After all, the orange enchanted puppet had no emotions and no fatigue. It would fight non-stop. It was too powerful, especially in the long battle against the monsters. It had a huge advantage.

He Yang even felt the orange enchanted puppet was more effective than him in such a battle.

With the help of the orange enchanted puppet, the Pan-ocean Community team did not have to worry about facing the elite monsters later.

With the powerful combat strength of the orange enchanted puppet, coupled with the excellent combat strength of the Pan-ocean Community team, it was almost enough to deal with the individual elite monsters later.

Now, the Pan-ocean Community team was also under tremendous pressure. The orange enchanted puppet was at the front, constantly killing monsters. It helped them take off a lot of burdens.

Due to the advantage of the wood attribute, there were only a limited number of monsters that could attack at the same time.

The orange enchanted puppet had blocked many of the monsters. There were only a few monsters that could reach the Pan-ocean Community team. The pressure on the team members became much lesser.

He Yang observed the situation in front of him and immediately made adjustments.

Previously, He Yang had his team into two squads, which took turns in defending. One squad could rest while the other team fought.

It was not bad, but it was not enough. After all, the monster riot this time might last for a long time.

But previously, He Yang could not divide more squads, so they could not rest longer.

However, he had the orange enchanted puppet now. The situation had changed. The team members in the front were facing fewer monsters, and the pressure was much lower. The orange enchanted puppet was shouldering all the burdens.

Following that, He Yang reorganized his team into three squads.

The three squads took turns. One team fought in the front while the other two squads rested at the back.

This way, the resting members could almost double their rest time before returning to the battle. The pressure on them would undoubtedly be greatly reduced. They could also fight for a longer time.

He Yang could not help but feel a little grateful towards Liu Yan. If not for Liu Yan's help with the orange enchanted puppet, the Pan-ocean Community team would undoubtedly be under pressure.

Although they might be fine for a short period, they would be in trouble if they kept fighting in a tired state.

Now that they had the orange enchanted puppet, everything was much better, and the pressure was much less.

The Pan-ocean Community team had the advantage of having many members. But their weakness was the slightly weaker top-tier strength.

Liu Yan helped the Pan-ocean Community team to smooth out their weaknesses and increase their strengths. It would be strange if the Pan-ocean Community team did not do well.

Then, He Yang confidently continued to organize a defensive battle. His confidence to overcome this monster riot had increased.

On the other side, Liu Yan was heading toward the New Continent team of the metal attribute territory.

Not long after, Liu Yan arrived above the metal attribute territory.

At this time, members of the New Continent team were under the leadership of their captain, Jin Cheng. They were relying on the temporary camp and the favorable terrain of the small city made of giant ores to defend.

However, the number of members of the New World was lesser. They could not let the team members take turns defending their territory.

The New Continent team could only allow all its members to participate in the battle. Their strength was not weak. They had already taken care of more than half of the monsters in the second wave. Their speed was still not slow either.

However, Liu Yan, who was high in the sky, used his Extraordinary Five Senses to observe briefly. He could see that members of the New World team had a hint of fatigue on their faces.

Chapter 398: The New Continent Team under a lot of Pressure

Liu Yan frowned slightly.

The situation of the New Continent team in the metal attribute territory seemed to be even worse than the Pan-ocean Community team in the wood attribute territory.

The terrain of the metal attribute territory was somewhat inferior to the wood territory.

The terrain of the metal attribute territory was not bad, and it was also good for defense. However, the team members needed to guard many places.

In addition, the number of members of the New Continent team was not very large. At this time, only all the members could participate in the battle. There were not many members who could rest.

Although there was only a hint of fatigue now, all the members had a hint of fatigue.

And now, they were only half as tired as the second wave of monsters.

If this continued, they would not be able to hold on until the monster riot ended.

If the New Continent team could not hold on, their members would be injured. Moreover, Liu Yan would also lose his guardian beast of the metal attribute territory, the Golden Tiger. It was not what Liu Yan wanted.

Fortunately, Liu Yan came over in time. He could still help now.

If another wave or two of monsters were to arrive later, the members of the New Continent team would be exhausted. At that time, it would be too late for Liu Yan to help even if he wanted to.

Following that, Liu Yan stepped on his SS-grade equipment, Gale Boots, and slowly descended. He arrived above the members of the New Continent team.

Many members of the New Continent team had also noticed Liu Yan's arrival. They were all somewhat surprised that Liu Yan could fly.

However, the team members were all busy fighting, so they did not have much time to discuss and observe Liu Yan.

The team captain Jin Cheng glanced at Liu Yan and called out in puzzlement, "Captain Liu Yan, do you have any orders?"

"Nothing much. I just came to take a look. Things are not looking good here." Liu Yan said indifferently.

When Jin Cheng heard this, his expression immediately became a little awkward.

Jin Cheng also noticed there was no problem with the defense now. But if this situation continued, there would be problems sooner or later.

Jin Cheng noticed that some of the weaker members were already tired. They would not be able to hold on for long.

If it continued like this, all the members would become more tired, while the strength and number of monsters would continue to increase. Eventually, they would not be able to hold on for long.

However, Jin Cheng had no other choice. The strength of his team was limited, and there was nothing he could do about it.

Just like now, Jin Cheng also wanted to rest his exhausted team members and recover their stamina before continuing the battle.

However, Jin Cheng had no other choice. If they withdrew this part of the team members, they would not hold on in the battle.

Jin Cheng looked at Liu Yan helplessly and nodded slightly. "It's indeed not good."

Upon hearing that, Liu Yan did not say anything more. Instead, he waved his hand, and 20 white enchanted puppets instantly appeared on the battlefield. The puppets blocked the members of the New Continent team. They threw themselves into the battle and began to fight against the monsters.

In the end, the New Continent team did not have enough manpower, so 20 white enchanted puppets were enough to help.

In terms of top-tier combat strength, the New Continent team was not lacking, unlike the Pan-ocean Community team.

The situation of the two teams also made Liu Yan realize that the top-tier combat strength and the strength of ordinary team members were crucial and indispensable.

What the Pan-ocean Community team lacked was top-tier combat strength. On the other hand, the New Continent team lacked the combat strength of ordinary members.

The two teams had their weaknesses. Usually, they might not be able to see it, but in the face of the test of such a big battle, the problem was immediately exposed.

At this time, 20 white enchanted puppets had joined the battle, and the members of the New Continent team instantly felt much more relaxed.

Although the combat strength of these white enchanted puppets could not compare to the red or orange enchanted puppets, their actual combat strength was sufficient. They could fight monsters with level 40 combat strength. Although they could not kill effortlessly like the orange enchanted puppet, they were enough to hold off the monsters.

Most importantly, the white enchanted puppet had the advantage in numbers.

Twenty enchanted puppets would be of great help to the New Continent team.

The members of the New Continent team had become much more relaxed. They were shocked when they saw the white enchanted puppets in front of them. The white enchanted puppets' combat strength was extraordinary, and there were so many of them.

"What is this thing? Its combat strength seems to be pretty good."

"I feel that its combat strength is more powerful than mine."

"What on earth are those things? It's not a life form, but it's strong enough to fight on its own."

"It's so powerful. It's able to withstand so many monsters at once."

"Phew, I can finally catch my breath. The pressure just now was too great."

"Yeah, I feel that if it continues like that just now, I won't be able to withstand it. I can finally breathe a sigh of relief now."

...

Jin Cheng, on the other hand, recognized the enchanted puppet. With a confused expression, he asked, "These are enchanted puppets? Why are there so many of them?"

"That's right." Liu Yan nodded slightly. "The combat strength of these white enchanted puppets is around level 40. Although they aren't that strong, they should be able to help you."

"Enchanted puppet? What is this?"

"It's so powerful."

"Thank you so much, Captain Liu Yan."

"We finally have reinforcements. I didn't expect them to come."

"Enchanted puppet? I think I've heard of it."

...

The members of the New Continent team discussed animatedly.

At this moment, Jin Cheng explained to everyone, "Enchanted puppet is a kind of ancient secret. It's a war machine made using a special and extremely complicated method. Although it has no life, it can fight automatically and continuously!"

When members of the New Continent team heard that, they finally understood

After knowing the function of the enchanted puppet, the members were also happy.

These enchanted puppets were quite powerful, and there were many of them. Most importantly, they could fight continuously. It would undoubtedly help them a lot and relieve a lot of pressure.

With these enchanted puppets, many members could finally take a break. They would not be under so much pressure. They could adjust their condition and face more powerful monsters later on.

With the support of the enchanted puppet, the pressure on the defense of the New Continent team was greatly reduced.

At this time, Jin Cheng looked at Liu Yan in the air with a strange expression.

Liu Yan had given too many people a shock. Not only did he defeat Golden Tiger with his terrifying combat strength. Liu Yan had also defeated their team. He could even fly now. Moreover, he knew ancient technology and could produce such a powerful existence as the enchanted puppet.

Most importantly, Jin Cheng knew it was impossible to produce enchanted puppets in batches. Otherwise, those big shots who could produce enchanted puppets in ancient times would have already mass-produced them and become the dominators.

Enchanted puppets could be said to be powerful in all aspects. The only drawback was that it was difficult to produce them in batches.

However, Liu Yan seemed to ignore this rule.

If Liu Yan produced more enchanted puppets in batches in the future, he would become powerful or even invincible.

The more Jin Cheng thought about it, the more terrified he felt.

Chapter 399: Liu Yan's Plan

Above the fire attribute territory.

Liu Yan met with Purple Wind Falcon, who had returned from investigating the situation.

Through telepathy, Liu Yan immediately learned about the situation Purple Wind Falcon had just investigated.

On the water attribute territory, the European Federation team was still doing their best to defend against the monster horde.

The battle plan adopted by the European Federation team was for all of them to participate in the battle, and they would mainly focus on defense.

Members of the European Federation team did not expend too much of their strength, so they were still quite strong. Facing the attacks of the monster horde, they could handle it easily. They did not have too much pressure.

But in reality, it was not so.

Based on what Liu Yan knew, he immediately saw through the hidden dangers of the European Federation team.

The European Federation team was powerful. They did not have much pressure when facing a monster horde. However, they were still defending. Therefore, they killed the monster at a slower speed.

When they finished off the first wave of monsters, the second wave of monsters had already spawned. The members of the European Federation team did not even have time to rest before they threw themselves into the next battle.

Members of the European Federation team were able to deal with the second wave of monsters at ease. They almost killed the second wave of monsters, but the third wave of monsters was about to spawn.

As a result, the members of the European Federation team did not even have time to rest during the entire battle.

After continuous battles, they would be exhausted, especially when the monsters were getting stronger wave by wave.

The average combat strength of the monsters in the first wave was only level 30, and the average combat strength of the monsters in the second wave was level 32.

Meanwhile, the average combat strength of the monsters in the third wave had reached level 35.

The average combat strength of the members of the European Federation team was around level 40.

If they were strong enough, they should still be able to crush the monsters in the third wave.

However, due to the continuous battles, they defeated the first and second waves of monsters. The members had already begun to feel exhausted.

Although the first and second waves of monsters were not strong, they were too many. Therefore, the team members used a lot of their stamina and energy.

At this moment, the European Federation team could still defeat the third wave of monsters. However, there was no doubt that they would be under pressure.

The fourth and fifth waves of monsters were even more powerful.

At that time, the European Federation team would have a hard time.

On the other side, the Red Star Empire team from the earth-attribute territory was in an even worse situation.

The representative team of the Red Star Empire was attacked by the elite squad formed by the two representative teams of Alliance Number 1. As a result, they lost even more of their strength. Their overall strength was inferior to the European Federation team.

In addition, the Red Star Empire team's battle plan was to let the ordinary members adopt a defensive plan in the battle.

They relied on the terrain of the earth attribute and the guardian beast. They were still able to defend relatively stable.

However, the top members did not participate in the fight. Hence, they killed those monsters at a slower speed.

Until now, the Red Star Empire team had not even finished the second wave of monsters.

After they finished dealing with the second wave of monsters, they still had to continue fighting and face the even more powerful third wave of monsters.

The European Federation team from the water-attribute territory had a hidden risk. On the other hand, the Red Star Empire team from the earth-attribute territory was facing a deadly threat. Anyone with a discerning eye could see that they had reached the end. The Red Star Empire team would not be able to hold on.

After Liu Yan understood the situation of the other two forces, he suddenly had some ideas.

According to the rules announced by the Will of Tower, they just needed to withstand the monster riot.

In addition, killing the monsters would also allow one to obtain various treasure chests of the corresponding grade. One could get a Lord's token fragments and some other treasures. Then, they could achieve the goal of trial on the fifth level of the Tower and increase the strength of the team members.

Other than that, the rules of the Will of the Tower did not have any other restrictions.

In other words, if Liu Yan and the Land of Origin team had the strength, they could defeat the monsters before dealing with the other two forces.

Just now, Liu Yan had also carefully observed the situation of the monsters spawning outside the fire attribute territory.

After observing for a while, Liu Yan also discovered the third wave of monsters was currently attacking. There were still many weak monsters.

However, when the fourth wave of monsters became chaotic, there would be some elite monsters.

The number of elite monsters was much smaller compared to the first three waves. However, the strength of the elite monster would not be affected.

According to the rules, there would be a boss after the elite monsters.

Right now, members of the Land of Origin team were quickly dealing with the third wave of monsters.

Liu Yan could return to the fire attribute territory at this time and bring Undying Fire Phoenix and a few top-tier members to the outer area.

Before dealing with the third wave of monsters, he would attack the fourth wave of monsters in advance.

This way, Liu Yan could obtain high-grade treasure chests from these elite monsters to increase his strength. Moreover, he could also deal with the fourth wave of elite monsters in advance.

The ordinary members would deal with the third wave of weak monsters. On the other side, Liu Yan and a few other top-tier members would deal with the elite monsters of the fourth wave.

This way, the speed of killing the monsters would be faster, and they would also be able to face the final boss earlier.

As long as they killed the boss, the Land of Origin team would have completed their mission in this monster riot. They would have a lot of time to catch their breath.

During this time, Liu Yan could let his members help the wood and the metal attribute territories. Then, he would take the opportunity to take the lead of the elite members to declare war on the other two forces.

The Red Star Empire team in the earth attribute territory and the European Federation team in the water attribute territory would probably still be busy fighting with the monsters. They would also be flustered. How would they have the time to deal with Liu Yan and a few other top-tier members?

As long as Liu Yan and the others seized this opportunity, they could take advantage of the chaotic battlefield to finish off the remaining two great forces in one fell swoop. Then, they would be the only force!

Liu Yan and the other top members had to deal with the fourth wave of powerful elite monsters ahead of time. After that, they could also successfully deal with the boss. Only then could they carry out this surprise attack plan.

However, Liu Yan was still relatively confident in his strength.

Liu Yan thought about it carefully and felt that the feasibility of this plan was high.

Then, Liu Yan stepped on the SS-grade equipment Gale Boots and returned to the fire attribute territory.

At this moment, the Land of Origin team finished the second wave of monsters and rested for a while. Then, they faced the third wave of monsters again.

They had time to rest and the help of the enchanted puppet. Hence, the Land of Origin team did not feel much pressure even when facing the stronger third wave of monsters. They were dealing with the attack of the third wave of monsters with ease.

From the looks of it, they had withstood it. They would be able to switch from defending to attacking in a while and take the initiative to deal with the third wave of monsters.

Chapter 400: A Bold Plan

In the fire attribute territory, in the open space behind the ordinary members of the Land of Origin team.

Murong Xue and the others were still waiting for orders.

Liu Yan had not let Murong Xue, Xu Han, and Allen Smith fight in the battle.

In addition, the pressure on the ordinary members of the Land of Origin team was not too great, so the three of them had not taken action, waiting in place.

Allen Smith was still calm as he quietly observed the battle. From time to time, he would look at Liu Yan's white enchanted puppet fighting at the front.

These white enchanted puppets had been fighting nonstop ever since they were released. They were emotionless war machines with strong combat strength.

Allen Smith was also known as a war machine before. At this moment, he was interested in the enchanted puppet which was also a war machine.

Xu Han noticed Allen Smith's interested gaze and was surprised.

Allen Smith was rarely interested in anything.

"Are you very interested in those puppets? Why don't you ask Liu Yan to give you two puppets?" Xu Han teased with a smile.

Allen Smith shook his head slightly and said, "This shouldn't be an ordinary enchanted puppet. It didn't use an ordinary soul-type item, so it doesn't have a basic consciousness. It should be controlled by Liu Yan through a special method. He probably can't give them to me."

When Xu Han heard that, he nodded and said, "Yes, you've also noticed that these enchanted puppets shouldn't be complete enchanted puppets. They are lacking in some aspects. They were controlled by Liu Yan through a special method, but it's already pretty good. They can continue to fight."

Immediately after, Xu Han smiled and asked again, "Hey, Allen Smith, you said you are also known as a war machine. This enchanted puppet is also a war machine. You said that if you were to compete with this enchanted puppet, who would be able to continue fighting for the longest time?"

Allen Smith glared as if he had been insulted. He felt that this enchanted puppet could not compare to him at all.

Seeing that Allen Smith was pissed, Xu Han did not say anything more. He knew the enchanted puppet was as powerful as the ordinary members. However, it was weaker than the top-tier members like Allen Smith.

At this time, Liu Yan returned from the sky. He came to the ground and returned to the front of them.

Murong Xue, who had been bored and could not stand it any longer, saw Liu Yan coming over and quickly walked forward.

"Liu Yan, where have you been? It's been so long. How is it? Can I go out and fight now? If you don't let me participate in the battle, the battle will be over. I won't be able to fight anymore." Murong Xue said anxiously, he was a martial arts fanatic.

Liu Yan was already used to Murong Xue's personality. He brought Murong Xue to Xu Han and Allen Smith.

"Captain, what do you say? What's the situation outside?" Xu Han also asked. She also wanted to participate in the operation. It was too boring to stay behind like this.

Allen Smith also looked at Liu Yan, looking a little excited.

Liu Yan saw the situation and smiled, "No need to rush. I didn't let the three of you participate in the battle with the weak monsters. I have something else for you."

"Hurry up and say it." Murong Xue urged.

Liu Yan did not keep them in suspense anymore. He immediately told the three of them about the situation of the five territories facing the monster riot.

After listening to Liu Yan's investigation, Xu Han nodded slightly. "In that case, we need to take the initiative to attack. After finishing off the first wave of monsters, we can rest and breathe for a period. Only then will we be in a better condition to face the monsters. These territories are mainly on defense. It looks like they have the initiative in defense, but they have wasted their time. They are extremely passive."

"That's right." Liu Yan nodded slightly and said, "Right now, it's the third wave of monsters. They are still weak monsters, but there are too many of them. From the beginning of the fourth wave, there will be powerful elite monsters. The fifth wave will be the boss. When the fourth wave of monsters arrives, I believe the other teams have not finished the third wave of monsters. When that time comes, they will

have to face the third and fourth waves of monsters. The European Federation team and Red Star Empire team will be under a lot of pressure.”

“So, what are you thinking?” Xu Han could not help but look at Liu Yan in surprise and asked.

After hearing what Liu Yan said, Xu Han immediately thought of an idea. However, she doubted herself, so she did not bring it up.

Murong Xue had a blank look on her face and said, “It’s already good enough for us to kill the monsters in front of us. What does their situation have to do with us?”

Allen Smith was staring at Liu Yan with a face full of interest. He had the same thoughts as Xu Han just now. At this moment, he was looking forward to Liu Yan’s plan.

Liu Yan noticed Xu Han’s disbelieving gaze and Allen Smith’s expectant gaze. Then, he nodded his head. “That’s right. I have some ideas about how to deal with the other two teams. I plan to act together and finish off the fourth wave of elite monsters ahead of time. After some time, the ordinary members should have finished the third wave of monsters. When that time comes, we will work together with them to defeat the boss. At this time, the European Federation team and the Red Star Empire team are still dealing with the third and fourth waves of monsters. We have already freed up our hands to declare war on them. What do you think?”

After hearing Liu Yan’s words, Xu Han immediately confirmed his bold idea.

Xu Han did not expect Liu Yan’s plan.

The awakened ones of the other teams were thinking about how to protect their guardian beasts. They were trying to survive the monster horde.

However, Liu Yan did not only want to defend against the monster horde. Instead, he wanted to take the initiative to deal with these monsters quickly. Liu Yan was thinking about taking the opportunity to declare war on the other two teams after dealing with the monster horde.

This idea was really too bold.

“You’re really bold!” Xu Han looked at Liu Yan with a strange expression.

Murong Xue did not hear Liu Yan’s logic. She only felt that it was a mess.

However, there were two points that Murong Xue heard very clearly. They had to deal with the fourth wave of powerful elite monsters and the fifth wave’s boss. However, they also had to take the initiative to declare war on the other two teams.

Murong Xue immediately felt very excited. She repeatedly agreed, “This plan is good. It feels good enough. We can finally have a good fight. Haha!”

Allen Smith also said with a face full of anticipation, “It is indeed a good plan. I agree.”

Seeing that the two of them had agreed, Xu Han was momentarily speechless.

“You two are really bold.”

However, Xu Han turned her head and thought carefully. There was a great possibility, especially since they were powerful. There was even a greater chance of success.

1

After thinking for a while, Xu Han nodded and said, "Although this plan is very bold, it's good. I agree!"
