

Towers 451

Chapter 451: Persevering

Liu Yan felt like his entire body was being cut into a thousand pieces. However, his expression did not change. Instead, he was full of determination.

Attribute Fusion was hard to begin with. There was no room for the slightest distraction.

It was especially so since this was the first time Liu Yan attempted Attribute Fusion. He did not dare to let his guard down in the slightest. Instead, he focused on every step of Attribute Fusion.

The people watching from afar could see that the wood attribute energy and metal attribute energy around Liu Yan had almost materialized and were colliding with each other. At the same time, they were rebelling against Liu Yan, and wounds kept appearing on Liu Yan's body.

Allen Smith, who had always been calm, saw this scene and immediately exclaimed, "This is... Attribute Fusion? Has Liu Yan gone crazy?"

"What is Attribute Fusion?" Murong Xue asked with a blank look on her face.

The rest of the team members also had blank looks on their faces.

Even though they were all experts from their respective continents and were the cream of the crop, they were not familiar with attributes.

Xu Han's face was filled with disbelief as he explained, "The so-called Attribute Fusion refers to the combination of two types of attribute energy. Each type of attribute energy has its characteristics and temperament. They are two completely different types of attribute energies."

"It can still be like this? Then what will be the result?" Murong Xue continued to ask.

Xu Han explained with a grave expression, "Ninety-nine percent of people who used Attribute Fusion would suffer a backlash from the two types of attribute energies. At worst, they will be severely injured and disabled. At worst, they will die on the spot and not even have their bones left. Only the remaining one percent of people will succeed. They will need to meet all the requirements and even have a certain amount of luck to succeed. And once the Attribute Fusion is successful, it can also erupt with unimaginable power, directly surpassing the user's strength by many levels!"

"Is it that difficult? Then can Brother Liu Yan succeed?" Chu Long immediately exclaimed. She looked at Liu Yan in the distance with a worried expression, afraid that Liu Yan would fail.

The other team members were also shocked. They did not expect their captain, Liu Yan, was using Attribute Fusion. It was beyond their understanding.

Xu Han sighed slightly and said, "Attribute Fusion is a heaven-defying method. It is a method that goes against the laws of the elements. Naturally, it is hard to succeed. Only a few top experts on the tenth level of the Tower can succeed, let alone Liu Yan on the fifth level of the Tower. I think the odds are against us."

Xu Han had the best understanding of elemental energy. He was also the one with the highest attainments in the field of attribute energy. Naturally, Xu Han had a better understanding of the difficulty and danger of Attribute Fusion.

Xu Han knew Liu Yan was a rare genius who could accomplish many impossible things.

However, Attribute Fusion was too exaggerated. It was beyond what the awakened ones on the fifth level of the Tower could do. Even the top experts on the tenth level of the Tower might not be able to do it, let alone Liu Yan.

Even though Xu Han trusted Liu Yan, he could not believe that Liu Yan could successfully use Attribute Fusion.

Hearing Xu Han's words, everyone's faces were filled with despair.

Although they did not know much about this, just listening to Xu Han's explanation, they could roughly imagine how difficult it was to fuse different attributes. No matter how talented Liu Yan was, he could not do it.

"I did not think Captain Liu would work so hard to do something as dangerous as Attribute Fusion."

"Captain Liu is doing this for us. Otherwise, with his strength, wouldn't it be easy for him to escape from the Moonshine Qilin's pursuit and save his life?"

"Sigh, what can we do now? I want to help Captain Liu."

"Yeah, letting the captain bear the burden alone. We're nothing."

"No, we have to think of a way to help."

...

Everyone was ashamed of their powerlessness.

Chu Long saw the wounds that kept appearing on Liu Yan's body. In the beginning, they were only superficial wounds and would only cause extreme pain.

However, as time passed, the collision between the wood attribute and the metal attribute energy became more intense. The wounds on Liu Yan's body also became more severe.

Until now, many of the wounds on Liu Yan's body were so deep that one could see his bones. It was extremely shocking.

With Liu Yan's recovery speed, it was naturally difficult for him to recover from such a severe wound in a brief period.

Not long after, Liu Yan's body was covered in wounds. His body was covered in blood.

When Chu Long saw this scene, her heart instantly ached.

"Can I cast a healing skill on Brother Liu Yan to help him recover from his wounds and alleviate the pain?" Chu Long could not help but ask.

Xu Han heard Chu Long. He shook his head repeatedly and said, "No! Although it seems we are doomed, there is still a tiny glimmer of hope. If you use a healing skill and disrupt the elemental fluctuations over there, you will likely kill Liu Yan and make him die on the spot."

Upon hearing this, Chu Long immediately understood this reasoning and dismissed the idea of helping Liu Yan.

Even though her heart ached when she saw Liu Yan covered in blood and wounds, Chu Long could only endure it.

Allen Smith also said, "We can't do anything now. We can only wait for the result quietly and don't disturb Liu Yan."

When the team members heard this, they sighed helplessly. They could not help in any way. They could only watch as their team captain, Liu Yan, endured such terrifying pain.

At the same time, Liu Yan, who was in front of them, had reached a critical moment.

Even though the metal attribute and wood attribute energies were clashing constantly, Liu Yan had gradually grasped some of the characteristics of these two elements.

The metal attribute energy was more overbearing and fierce, and the wood attribute energy was gentle but firm.

Relying on his mastery of the secret arts of the two attribute energies and his understanding of these two attributes, Liu Yan could control the two attribute energies in front of him.

Although this was only the first step of fusing the two attribute energy, it was also the simplest step.

However, this was already enough for Liu Yan.

With Liu Yan's strength, it was impossible for him to fuse two attribute energies successfully.

Liu Yan would at least have to reach the eighth or ninth level of the Tower to become a top expert, if not the tenth level.

Right now, Liu Yan used all his strength to barely stable the fusion of two attribute energies. His entire body was full of injuries.

If Liu Yan did not rebuild his body, he probably would not have been able to hold on.

And even now, Liu Yan was still forcefully holding on by relying on a sliver of his will.

As for the remaining process of the Attribute Fusion, it was left to Flying Cloud Mystic Bow to complete.

When the time was right, Liu Yan immediately activated God's Effect of Flying Cloud Mystic Bow, Elemental Condensation!

The instant the Elemental Condensation was activated, Liu Yan felt much more relaxed. He hurriedly charged the two attribute energies into Flying Cloud Mystic Bow's body.

As the large amount of two attribute energies left Liu Yan's control and entered Flying Cloud Mystic Bow, the pressure on Liu Yan's body also decreased.

Chapter 452: Elemental Condensation, Terrifying Power!

Xu Han and the others were staring at Liu Yan in front of them.

Even though they were worried, they did not dare to disturb Liu Yan to avoid distracting him.

Under Xu Han's observation, he had a better understanding of Liu Yan's situation.

After all, Xu Han's attainments in attribute energy were very high.

Under observation, Xu Han also discovered that Liu Yan had succeeded in the first step, barely controlling two different attribute energies.

Although this was only the first step, there was still a long way to go before he could complete the Attribute Fusion.

But the first step was difficult and was not something an ordinary person could do.

Xu Han knew he probably could not do it with his current strength.

Liu Yan was already extremely powerful to be able to do this step.

Unfortunately, Xu Han also noticed that Liu Yan was already at the end of his rope when he completed this first step. He could not continue to persist.

Xu Han could not help but sigh and say, "Liu Yan has expended all his strength and completed the first step. He is already ridiculously strong. However, he is still far from completing the complete Attribute Fusion. Liu Yan is going to fail."

At this moment, Xu Han could no longer see any hope.

When the surrounding people heard this, their expressions became gloomy.

Murong Xue and Chu Long met Liu Yan on the second level of the Tower. Xu Han, Zheng Tainan, and others became acquaintances with Liu Yan from the fourth level of the Tower. Chu Cunrui and the others finally followed Liu Yan from the fifth level of the Tower.

During this period, everyone gradually trusted Liu Yan.

And it was also thanks to Liu Yan that everyone could reach this stage. They first broke through the joint attack of the four representative teams. They also defeated the Pan-ocean Community team of the wood attribute territory.

Then, they found an opportunity to defeat the New Continent team of the metal attribute territory.

Now, they were the first to finish off all the monsters from the first four waves of the monster riot. They were the first to kill the final boss and compete for the final reward of the final boss.

During this time, everyone had long been filled with affection for Liu Yan.

However, they did not expect that they would end up dying here.

For a moment, everyone felt frustrated. The team members wanted to go and help Liu Yan, but they could not do so.

Just as everyone was grieving, Xu Han noticed something strange about Liu Yan.

The two attribute energies were rapidly weakening and disappearing.

Xu Han carefully observed for a while and realized that the two attribute energies were rapidly flowing into Liu Yan's Flying Cloud Mystic Bow.

Usually, a weapon would not contain two different attribute energies.

However, Flying Cloud Mystic Bow could. Not only could it contain two types of attribute energies, but it could fuse the two types of attribute energies.

Xu Han was in shock. He had never thought that Liu Yan's Flying Cloud Mystic Bow would be so magical. It could fuse attribute energies!

"Wait, there seems to be a chance. Liu Yan's weapon has an explanation." Xu Han quickly said.

Everyone looked over when they heard this. Only then did they realize that Liu Yan's condition was much better.

At this moment, Liu Yan was still covered in wounds. Many of them were so deep that one could see his bones. His body was also covered in blood.

However, no new wounds appeared. Meanwhile, the pressure on Liu Yan seemed to have lessened significantly.

"What's going on? Didn't you say that Liu Yan is still far from successfully completing Attribute Fusion? Could it be that he has succeeded?" Murong Xue said in surprise.

At this moment, Xu Han's face was also filled with disbelief. He shook his head slightly and said, "Liu Yan has only managed to complete the first step. Although he is already extremely powerful, he is still far from successfully fusing the attribute energies. It should be because of Liu Yan's weapon. This weapon can help to fuse attribute energies. No wonder Liu Yan dared to use Attribute Fusion. It seems that Liu Yan is indeed quite confident. He is not taking a risk. I have underestimated Liu Yan."

When everyone heard Xu Han's explanation, they immediately heaved a sigh of relief.

Although Liu Yan didn't complete Attribute Fusion himself, his strength was incredible.

The most important thing was that Liu Yan didn't have to die here because of this. He even had a chance to successfully fuse his attribute and finish off Moonshine Qilin in one fell swoop.

"That's great. Captain Liu succeeded."

"He's still our captain. He could do all the impossible!"

"Captain Liu is my idol. He's too amazing!"

"That's great. If Captain Liu successfully integrates his attribute, he'll be able to finish off Moonshine Qilin instantly. Let's see how it can still be so arrogant."

“That’s right. Captain Liu can instantly kill Moonshine Qilin!”

“Captain Liu is too amazing. He can integrate his attribute. Doesn’t that mean that he’s invincible? Who can be his opponent?”

...

The team members were all extremely excited.

At the same time, Liu Yan had successfully poured a large amount of metal attribute energy and wood attribute energy into Flying Cloud Mystic Bow.

Under the Elemental Condensation of Flying Cloud Mystic Bow, these two completely different attribute energies were fused.

After Attribute Fusion was completed, a green and gold arrow suddenly appeared.

On the arrow, one could not feel any elemental power undulations. It was novel and mystical.

It was filled with two different attribute energies. Just a moment ago, it was still violent. Even Liu Yan, the user, was injured from the backlash.

But at this moment, after the two different attribute energies fused, they directly lost the energy undulations.

Although there was no attribute energy fluctuation, Liu Yan could feel the terrifying power of this arrow.

Others might not be able to feel it, but Liu Yan knew very well that this arrow was extremely terrifying. It was an existence that completely surpassed the power of the fifth level of the Tower!

After the arrow feather had finished condensing, Liu Yan no longer hesitated. He shot out an arrow and hit Moonshine Qilin in the crater.

The arrow, which had been extremely quiet just a moment ago, exploded with terrifying elemental power after hitting it.

Wood and metal attribute energies continued to wreak havoc.

The two different attribute energies had completed coexistence at this moment.

Not only could they unleash their respective powers, but they also exploded with terrifying power after fusing.

“Boom!” The power of the attribute energy exploded forth.

Under the tremendous power undulations, the entire ground shook.

Meanwhile, the large crater was filled with thick smoke. It was impossible to see the situation.

After waiting for quite a while, Liu Yan used his SS-grade skill, Omniscient Insight, to sense that the power undulations within had gradually disappeared. Liu Yan used his C-grade skill, Wind Control, to blow away the thick smoke. Then, he finally saw the situation in the crater.

He saw that the size of the large crater had suddenly expanded a few times. The middle of it had sunk even deeper.

As for Moonshine Qilin in the middle, it had already disappeared, leaving behind only the broken limbs of Moonshine Qilin.

Through his SS-grade skill, Omniscient Insight, Liu Yan could sense that these were indeed the broken limbs of Moonshine Qilin.

Liu Yan could no longer sense the life force fluctuation of Moonshine Qilin. After all, there were no bones left.

Among the broken limbs, there was a diamond treasure chest that was emitting a dazzling light. It was the diamond treasure chest that dropped after killing Moonshine Qilin!

At this point, Liu Yan and the others had finally defeated Moonshine Qilin, the final boss of the fifth level of the Tower!

Chapter 453: There's Always Someone Better than You

When the team members saw Moonshine Qilin was instantly killed by Liu Yan, they were all extremely shocked.

Everyone had just fought a fierce battle with Moonshine Qilin, so they knew how powerful it was.

And Moonshine Qilin had already recovered more than half its strength after its quick recovery.

Even so, Moonshine Qilin was killed by Liu Yan in one hit!

There were so many experts, including Allen Smith, Xu Han, and Murong Xue on the team. Even if they worked together, they wouldn't be able to do anything to Moonshine Qilin.

However, Liu Yan killed Moonshine Qilin in one hit.

Such strength was too terrifying.

The team members were shocked. After a short period of silence, they all cheered.

"Damn! Captain, you're too awesome!"

"Captain is awesome!"

"I thought we were dead for sure this time. I didn't expect Captain Liu to stand out again."

"Captain is too strong."

"This is the first time I've seen Captain Liu use his full strength. It's too terrifying."

"If I hadn't seen it with my own eyes, I would never have thought that there would be such an expert on the fifth level of the Tower."

“That’s right. Captain’s strength has already completely surpassed the fifth level of the Tower. He’s too powerful.”

“It won’t be long before Captain Liu become stronger. He’ll become a top expert on the tenth level of the Tower. He’ll be a legendary figure!”

...

Allen Smith looked at Liu Yan in shock. Although he did not say anything, a storm was brewing in his heart.

Allen Smith knew that Liu Yan was strong and might even be stronger than him.

Allen Smith had already expected this, but he did not care. Allen Smith believed that with his hard work, he could surpass Liu Yan.

However, when they killed the fourth wave of elite monsters, Liu Yan’s strength shocked Allen Smith. He began to doubt himself.

Could he surpass Liu Yan?

During the battle with the final boss, Moonshine Qilin, Allen Smith used all his cards. However, it still did not have much of an effect.

Under such circumstances, Liu Yan used Attribute Fusion and instantly killed Moonshine Qilin.

Such strength truly shocked Allen Smith.

As a young prodigy, Allen Smith naturally knew about Attribute Fusion. He understood how difficult it was to use Attribute Fusion.

Only an expert from the tenth level of the Tower could use Attribute Fusion successfully.

But in reality, it was far more difficult than he had imagined.

There were very few experts on the tenth level of the Tower who could successfully use Attribute Fusion.

Anyone who could use Attribute Fusion would definitely become a legend.

However, Liu Yan could use it on the fifth level of the Tower. It was too shocking.

Even though Allen Smith could tell that Liu Yan had relied on the special ability of that powerful weapon to succeed, it was still quite impressive.

Most importantly, the first trial of Attribute Fusion was always the most challenging thing to do.

Now that Liu Yan had successfully used it, it meant that Liu Yan had an exceedingly high chance of success in using it again in the future.

The godly Attribute Fusion had the power to destroy everything on the scene.

Liu Yan could use this godly skill to defeat the Red Star Empire team and the European Federation team by himself.

For a moment, Allen Smith had mixed feelings as he looked at Liu Yan in the distance. There was shock and envy in his eyes, but most of the time, he still did not understand how Liu Yan had done it.

Xu Han, who was standing at the side, seemed to have seen through Allen Smith's inner thoughts. He could not help but tease Allen Smith, "What? You've been a genius since you were young and always had the stars supporting you. Now, you've suffered a blow?"

Allen Smith shook his head slightly and said, "I'm not the kind of genius who grew up in a greenhouse. Naturally, I wouldn't be dispirited. I'm just curious how Liu Yan did it."

When Xu Han heard that, she could not help but say helplessly, "I don't understand either, but Liu Yan did it. He can do things that we can't understand. It is what makes him so amazing. Back when we were on the fourth level of the Tower, we lost the five altars trials to Liu Yan. Although we were amazing, Liu Yan was even more amazing. Now, I'm not surprised by what Liu Yan can do. With this man around, anything can happen."

Hearing this, Allen Smith felt the same way. Liu Yan was too mysterious and powerful. It seemed that nothing was impossible.

At this moment, Xu Han recovered her relaxed expression and said, "It's normal for there to be people better than us. In the future, when we go to the higher levels of the Tower, perhaps there will be more powerful experts. We can only be ourselves and continue to improve. As for Liu Yan, he is our captain. The stronger he is, the better it will be. It will be more beneficial to us."

Allen Smith nodded slightly and did not say anything more.

On the other side, Murong Xue and Chu Long also rushed forward and came in front of Liu Yan.

"You're good. You're so powerful. You killed Moonshine Qilin in one shot!" Murong Xue patted Liu Yan's shoulder and said happily.

However, Liu Yan suddenly fell.

Chu Long, who was behind him, quickly went forward to support Liu Yan.

"Brother Liu Yan!" Chu Long cried out in surprise.

When the members behind heard this, they also recovered from their cheers and joy. They hurriedly came to Liu Yan's side.

Although the wounds on Liu Yan's body had already been scarred by his terrifying self-healing ability, there were still many bloodstains on his body. He looked like a person covered in blood. It was unbearable to look at.

They could not personally experience it. However, just by looking at Liu Yan's miserable appearance, everyone could imagine how much pain Liu Yan had suffered during the casting of Attribute Fusion.

For a moment, the team members were all moved and grateful.

If it wasn't for their team leader Liu Yan taking the risk and successfully completing the Attribute Fusion, killing Moonshine Qilin in one go, they would not have been able to do anything to Moonshine Qilin at all.

If they waited for Moonshine Qilin to fully recover, they would not just be eliminated. Instead, they might even be hunted down and killed.

All of this was thanks to their captain, Liu Yan, who had successfully avoided all of this.

Chapter 454: Wings of Wind God

"How is Captain Liu?"

"He must be fine."

"Is Captain Liu okay?"

"Hurry up and heal Captain Liu. If you need anything, just tell us. We will do our best!"

"Captain Liu has given up too much for us."

...

The team members were all very concerned.

At this moment, Chu Long used her detection skill to inspect Liu Yan's body. After a while, her expression became much more relaxed. She raised her head to look at the team members.

"Brother Liu Yan is fine. His self-healing ability is terrifying. His injuries have almost recovered. He fainted just now because he used too much strength and was too tired. I'll help him recover. After that, he'll be fine after a good rest."

When the team members heard this, they felt much more at ease.

Following that, Chu Long waved her staff. A few rays of white light fell, helping Liu Yan to clear the blood stains on his body and heal the remaining injuries. At the same time, it helped him recover some of his stamina.

Under the powerful healing ability, it did not take long for Liu Yan to wake up.

When Chu Long saw that Liu Yan had woken up, she quickly went forward and asked with concern, "Brother Liu Yan, how are you feeling now?"

The team members also came forward.

"Captain, how are you feeling?"

"Captain, you have to recover."

"Captain, we still want to follow you to the higher level of the Tower."

"Thank you for your hard work, Captain."

...

Liu Yan slowly regained consciousness and said, "It's very soft, no, very comfortable."

Under Chu Long's treatment, Liu Yan's exhaustion from using Attribute Fusion had been reduced by a lot. He felt comfortable.

Although he had not fully recovered, he could move and fight some simple battles.

When Chu Long and the other team members heard Liu Yan's words, they immediately felt much more at ease.

"Alright, I'm fine now. Let's see what we got first." Liu Yan stood up and said to the others.

Subconsciously, Liu Yan also glanced at Chu Long. How did this girl develop so well during this period? When he met her for the first time, she was petite. Now, she had become plumper. Her body seemed to have developed very well after becoming a priest.

At this time, Xu Han also brought the diamond treasure chest that the Moonlight Qilin dropped to Liu Yan.

"It's the final boss. It drops a diamond treasure chest. I wonder what kind of good stuff it will have. I believe it will be great. Liu Yan, you killed the boss alone. You can open the treasure chest and distribute the things inside." Xu Han put down the diamond treasure chest and spoke.

At this moment, the team members were also curiously looking at the diamond treasure chest.

It was the first time that everyone had seen a diamond treasure chest. The highest-grade treasure chest they had seen before was only a golden treasure chest. They had never seen a platinum treasure chest before. Only Liu Yan and the elite members saw it when they went to kill the elite monsters.

Meanwhile, the golden treasure chest could drop S-grade equipment, weapons, or treasures. There were also a bunch of rare items. It was incomparably precious.

And the diamond treasure chest before him was two grades higher than the golden treasure chest. Who knew what kind of rich harvest it would give?

Liu Yan also came in front of the diamond treasure chest at this moment and sized up the diamond treasure chest.

The diamond treasure chest was a lot bigger than the golden treasure chest and the platinum treasure chest.

The previous treasure chests were only half the size of a person.

This diamond treasure chest was bigger than a person.

Apart from that, the diamond treasure chests were also emitting a dazzling light.

Just this treasure chest alone felt extremely valuable.

Liu Yan didn't say much and directly went forward to open it.

Under the dazzling light, Liu Yan saw everything inside.

There were many things inside the diamond treasure chest.

The first thing that attracted the most attention was a huge cyan-colored wing, which looked extraordinary.

Out of curiosity, Liu Yan also picked it up and looked through the information.

[Wings of Wind God] (sealed)

Grade: SSS

Description: The Wings of Wind God, which is created by an expert, are filled with mystery and have terrifying effects

Unsealed effect: Flying Speed + 10,000, wind attribute skill (s) + 50%

God's Effect: Gale Force (passive skill. The area it flies past will emit a terrifying wind attribute cutting effect, causing terrifying damage), Whisper of the Wind (active skill. When activated, it can detonate wind elements in a large area, causing tremendous damage in a large area!)

When Liu Yan saw the attributes panel of the Wings of Wind God, he was instantly stunned. It was a piece of SSS-grade equipment!

It was the first time Liu Yan had seen an SSS-grade equipment piece, and he was instantly surprised.

After carefully looking at the attributes panel of the Wings of Wind God, Liu Yan was even more shocked.

After all, it was SSS-grade equipment. Even if its seal had not been lifted yet, it had an impressive effect far better than SS-grade equipment.

Any effect of the Wing of Wind God under the seal state was incomparably powerful.

Flying Speed + 10,000 was already extremely terrifying.

Liu Yan had Divine Extraction and all sorts of attributes. However, his agility was only just over 10,000.

On the other hand, there was still a difference between agility and flying speed.

After all, agility was just agility and speed on the ground. It did not fully translate into flying ability.

Just like the current Liu Yan, even though his agility was more than 10,000 points, his flying speed was slow even with the help of the SS-grade equipment Gale Boots. His flying speed was less than 1,000 points. It was greatly weakened.

Flying was not something that the awakened ones on the fifth level of the Tower could dream of.

However, the Wings of Wind God completely solved this problem.

Previously, Liu Yan had the Gale Boots, which allowed him to fly. Although his flying speed was slow, he could still fly. It was convenient, and it gave Liu Yan a great help.

And this Wings of Wind God was undoubtedly a huge bonus.

Liu Yan could imagine that he could fly effortlessly with this SSS-grade special equipment, the Wings of Wind God. His agility and combat strength would receive a huge bonus.

Besides the 10,000 increases in flying speed, the Wings of Wind God also had many other effects. Any one of them was extremely powerful.

Especially this Whisper of the Wind. Liu Yan felt that it would be a godly skill. It would be extremely powerful!

At this moment, Liu Yan could not help but feel shocked. He did not expect an SSS-grade equipment piece to be so powerful. Even when it was still sealed, its attribute had already far surpassed that of SS-grade equipment.

After all, Liu Yan now possessed the SS-grade weapon, Blue Flame Gloves, and the SS-grade equipment, Gale Boots. He still had some understanding of the attribute of SS-grade equipment.

Even the Wings of Wind God were sealed, it was already so powerful. If it was unsealed in the future, wouldn't it be heaven-defying? Liu Yan did not dare to think about it.

Chapter 455: Huge Lead

Although Xu Han and the others did not see the attributes panel of the Wind God's Winds, they could tell it was extraordinary. It was far more powerful than the S-grade equipment that had been dropped previously.

Liu Yan was about to tell everyone about the attributes of the Wings of Wind God. However, Xu Han interrupted him, "Wait, there's no need for us to know about this. This is the best equipment in the diamond treasure chest. It will definitely belong to you. You put the most effort into killing Moonshine Qilin."

When the others heard this, they all felt that it made sense.

This time, they had killed the final boss, the Moonshine Qilin. They had many experts working together to kill it. In reality, the MVP had always been Liu Yan.

The others were also useful, but their contribution was limited. In fact, the others might not even be as useful as Liu Yan alone.

Without Liu Yan, they would be lucky if they could survive, let alone defeat the Moonshine Qilin.

"I have no objections." Chu Long said directly.

Murong Xue also said, "Of course, Liu Yan should get it."

The rest of the team members also agreed.

"That's right. Captain Liu contributed the most this time. It should be given to him."

"Such a powerful piece of equipment can only be of maximum use in the hands of Captain Liu."

“We don’t have any objections. Captain, you should accept it.”

“That’s right. Without the captain this time, we would not be alive.”

...

Seeing that all the members had the same request, Liu Yan no longer declined. He immediately accepted the Wings of Wind God.

Wings of Wind God was indeed something that Liu Yan desperately needed.

With this Wings of Wind God, Liu Yan’s combat strength would receive a qualitative increase!

After putting away the Wings of Wind God, Liu Yan checked the rest of the items in the diamond treasure chest.

Other than the Wings of Wind God, they did not find any other equipment.

It seemed the diamond treasure chest was the same as the previous treasure chest. Each treasure chest only had one piece of equipment at most.

However, Liu Yan was already satisfied. Just this pair of Wings of Wind God was already powerful.

It was SSS-grade equipment, incomparably powerful.

It could be so powerful even without unsealing it. When it was unsealed, the Wings of Wind God that possessed true strength would be even more terrifying.

All sorts of materials, ores, and cultivation consumables were in the diamond treasure chest. There were many of them, and their levels were also very high. Many of them were even SSS-grade materials.

Even for an existence like Liu Yan, these materials and consumables would help Liu Yan tremendously, not to mention the rest of the team members.

Liu Yan picked a few materials and consumables and handed the diamond treasure chest to Xu Han.

“You can distribute the rest. I’ve seen that the things inside are all of a high grade. Distribute them to the team members on site. There’s no need to give them to ordinary team members back at the camp. They won’t be of much use.” Liu Yan said directly.

It just so happened that these members had just experienced a great battle. After obtaining these materials and cultivation consumables, they could help them quickly recover and increase their strength. They could be of great use.

Xu Han nodded and went to distribute them.

As for Liu Yan, he turned his gaze to the pile of Lord’s token fragments that he had just taken out from the diamond treasure chest.

A lot of Lord’s token fragments were in the diamond treasure chest. There were more than a thousand of them.

Liu Yan, who already had many Lord's token fragments, was once again able to obtain so many. He was not far from his goal of getting 10,000 Lord's token fragments.

With a little more effort, he could collect 10,000 Lord's token fragments at any time. Once he fulfilled the requirements of the trial, he could leave the fifth level of the Tower and head to the sixth level.

In addition, Liu Yan and the others collected Lord's token fragments the fastest. In the end, they would undoubtedly win first place. Not only would they receive generous rewards, but they could even directly receive a gold-rank lord token.

Liu Yan did not know much about Lord's tokens, but he still knew a little about them.

From the sixth level of the Tower, it was not an individual trial, nor was it the trial of a representative team. It was the trial of a territory.

Entering the sixth level of the Tower meant establishing a territory.

And a gold-rank Lord's token was undoubtedly a good start. It could bring a huge advantage in the early stages, which was beneficial for the subsequent trial.

Of course, this was only what Liu Yan had heard. As for the specific rules of the trial on the sixth level of the Tower or even higher, he would only know when the time came.

Liu Yan immediately put away the thousands of Lord's token fragments. Just as he was about to retrieve the S-grade cultivation materials, the Will of Tower suddenly announced.

[The Land of Origin team killed the final boss and obtained a generous reward. They have 9,317 Lord's token fragments. Currently, they are ranked first among the three forces!]

Although it was just a simple announcement, it resounded throughout the world. The awakened on the fifth level of the Tower heard it.

On Liu Yan's side, the experts who were distributing the high-grade cultivation materials were all filled with pride when they heard it.

The other teams were still killing the monsters in front of them. They took the lead to finish all the monsters in the first four waves. They also came over to kill the only final boss and obtained a generous reward. It could be said that they had a huge lead.

Of course, the team members also knew their achievement was because they had a mighty team captain, Liu Yan.

The other team members were surprised when they learned that the Land of Origin had collected more than 9,000 Lord's token fragments. They did not expect they have collected so many Lord's token fragments.

As a result, they were very close to collecting the final 10,000 Lord's token fragments.

Before today, they had only collected a few dozen Lord's token fragments in a day. They thought they were still far from collecting 10,000 Lord's token fragments.

They did not expect to have experienced so many things in the past few days.

First, they raided the Pan-ocean Community team in the wood attribute territory. They took out the opponent in one fell swoop. Then, under Liu Yan's strategy, they found an opportunity to take out the New Continent team from the metal attribute territory.

Not only did the Land of Origin team charge out of the predicament that the four representative teams from the two major alliances, but they also even changed the situation and directly took the lead. They became the number one among the teams.

In the monster riot, the Land of Origin team was the first to kill all the monsters in the first four waves under the command and leadership of Liu Yan. In the end, they successfully defeated the only final boss.

In this way, the Land of Origin undoubtedly gained a huge advantage. They had already collected more than 9,000 Lord's token fragments. The gap between them and the final goal of collecting 10,000 Lord's token fragments was small. There was a high chance that they would be the first to advance to the sixth level of the Tower!

Chapter 456: The Strongest Trump Card

"So fast. It's already over 9,000 pieces."

"If we collect a few hundred more pieces, we can advance!"

"That's really fast. A few days ago, I never thought that we would be able to advance so quickly."

"We still have three more territories. It should be no problem for us to collect a few hundred Lord's token fragments?"

"Looks like we'll advance to first place."

"I thought advancing was already good, but now we can easily advance to first place. I don't dare to think about it."

...

The team members were thrilled. They were happy about their good harvest.

Liu Yan felt a little helpless at this moment.

Liu Yan was not very happy because of the annoying Will of Tower. It kept reporting the latest situation.

Initially, Liu Yan wanted his team members to rest after the big battle before fighting the remaining two factions.

However, the Will of Tower had reported the situation. The Red Star Empire team and the European Federation team were aware of the situation here. They would be on high alert.

As such, there was naturally not much time left for Liu Yan and the others.

Liu Yan shook his head helplessly. It looked like he could only continue to fight.

However, he had these few S-grade cultivation materials in front of him now. They were enough for Liu Yan to recover most of his stamina and raise his strength. It would not be a big problem for him to continue fighting.

As for the other members, they also had a large number of medicinal ingredients and consumables that they had obtained from the treasure chest. After a short rest, they could recover most of their combat strength.

Liu Yan was a little happy when he saw his team members. He could not help but reprimand them, "Don't forget our plan. The battle is not over yet. The trial on the fifth level of the Tower is not over yet. Everyone, gather your spirits and quickly recover. Get ready for the upcoming battle!"

After being reprimanded by Liu Yan, the team members immediately quieted down. They timidly used these high-grade cultivation materials and consumables to recover their stamina and increase their strength.

They were usually experts and were proud existence.

However, when facing Liu Yan, they were incomparably respectful and fearful at the same time.

Facing Liu Yan's reprimand, they did not dare to resist in the slightest and obediently listened to his orders.

When Liu Yan saw that the team members were resting to recover and increase their strength, he also relaxed.

Following that, Liu Yan summoned the A-grade fierce beast, Purple Wind Falcon. After writing two letters, he sent Purple Wind Falcon off to deliver the letters.

The battle between Liu Yan and the others against the final boss, Moonshine Qilin, had ended smoothly. It was probably about time. The battles in the metal attribute territory and the wood attribute territory on the other side were also about to end.

They could naturally start planning the next battle plan.

After sending out the wind chasing Purple Wind Falcon to convey the order, Liu Yan picked up the few materials in front of him and began to use them.

The awakened ones could only absorb a small portion of energy after using them. They needed to absorb the rest of it slowly, which required a long time.

However, Liu Yan did not have this problem. With his SSS-grade talent, Divine Extraction, everything was much easier for him.

Liu Yan immediately used divine extraction. Rays of white light descended, and notifications appeared in front of Liu Yan.

[Divine Extraction of Tiger Tail Spirit Leather (S-grade) successful. Congratulations: Strength + 789, Vitality + 982!]

[Divine Extraction of Pill Heart Secret Spring (S-grade) successful. Congratulations: Spirit + 1,290, Adaptability + 578!]

[Divine Extraction of Inferno Spirit Fruit (S-grade) successful. Congratulations: Fire Attribute Talent + 10%!]

...

After a round of Divine Extraction, Liu Yan's various attributes and strengths received some improvements.

Liu Yan had consumed a lot of stamina in the battle, especially after using Attribute Fusion. Now, his stamina had recovered more than half.

Although he had not recovered all of his combat strength, he had recovered most of his combat strength. It was enough to deal with the upcoming battle.

Although the battle with the final boss, Moonshine Qilin, was full of perils, Liu Yan managed to overcome all of them.

During this process, Liu Yan also used all his strength, so he was extremely exhausted.

Especially the Attribute Fusion. Although Liu Yan had the help of Flying Cloud Mystic Bow, he still had to complete the first step himself.

Naturally, Liu Yan had to bear a lot of pressure and risk.

If there were even the slightest mistake, it would fail.

The consequences of failing the Attribute Fusion were severe. If Liu Yan were lucky, he would be heavily injured. If he were unlucky, he would explode and die.

Fortunately, even though Liu Yan was covered in injuries, he still succeeded in the end.

And for Liu Yan, this was undoubtedly a huge gain.

Everything was difficult at the beginning. The first time was the most difficult.

This first time, Liu Yan had already used Attribute Fusion. He already had a rough understanding of it. If Liu Yan continued to use it, it would become less dangerous. It would be much safer, and there would be no risk of failure.

After this battle, Liu Yan's gains were fruitful.

He obtained the powerful divine skill, Attribute Fusion. It was Liu Yan's most powerful trump card skill.

According to Liu Yan's estimation, this Attribute Fusion was too powerful. It was an invincible existence on the fifth level of the Tower. Even if it was on the sixth or even seventh floor of the Tower, it was already a top-tier battle strength.

With this trump card, Liu Yan's heart was undoubtedly much more at ease.

With such a godly skill, why would he need to fear anyone or any fierce beast?

Of course, Liu Yan had other gains in this battle. The first to bear the brunt was the newly obtained SSS-grade special equipment, Wings of Wind God. Not only did it greatly enhance his flying ability, but it could also significantly enhance his combat strength.

Other than these, the high-grade medicinal ingredients and consumable items also brought Liu Yan quite a bit of improvement.

At the same time, what Liu Yan was looking forward to the most was undoubtedly the corpse of Moonshine Qilin.

Previously, Liu Yan had gained quite a lot after using Divine Extraction on Moonshine Qilin's Extreme Fire Blood. He obtained Fire Talent!

Using Omniscient Insight, Liu Yan could sense that Moonshine Qilin's body contained an even more powerful fire attribute treasure. If he continued to extract it, he could gain even more. He might even be able to grasp Fire Secret Art!

Of course, it was still not convenient for him to extract it now. Liu Yan did not want others to see it, so he could only do it privately.

Thinking of this, Liu Yan placed Moonshine Qilin's corpse into the intermediate storage ring.

After the storage ring had been upgraded to the intermediate level, the space became much larger. Only now could Moonshine Qilin's corpse, which was the size of a small mountain, be placed in the storage ring. Otherwise, it would not be able to be placed in the storage ring.

As for Moonshine Qilin's corpse, it had other uses than using Divine Extraction on it.

After all, this was a branch of the divine beast qilin. Although it was only a collateral bloodline, it was still related to the divine beast qilin.

Moonshine Qilin's body was full of treasures and was extremely useful. Liu Yan naturally had to make good use of it.

Chapter 457: A Flawless Plan

Wood attribute territory.

The Pan-ocean Community team was a little strenuous when facing the third wave of monsters.

However, after half of the members of the Land of Origin team arrived to provide support, their strength increased significantly. They formed an encirclement to trap the monsters. Soon, they finished all the monsters in the third wave with relative ease.

At this moment, they were clearing the fourth wave of elite monsters.

The elite monsters of the fourth wave were individually strong, but there were not many of them.

With the support of the Land of Origin team, the Pan-ocean Community team relied on their numerical advantage to deal with the fourth wave of elite monsters. It was relatively easy.

At this time, the battle had reached the end. There were not many monsters left.

The Pan-ocean Community team killed all the elite monsters in the fourth wave.

At this time, everyone heard the Will of Tower announce that Liu Yan had successfully finished off the final boss and obtained the final generous boss reward. His Lord's token fragments reached more than 9,000 in an instant.

Among them, the ordinary members of the Land of Origin team were naturally excited when they heard the news. They did not expect their captain, Liu Yan, to be so successful.

It also meant that the Land of Origin team only needed to collect a few hundred Lord's token fragments to gather 10,000 Lord's token fragments. This way, they could fulfill the requirements of the trial on the fifth level of the Tower and advance to the sixth level of the Tower.

Moreover, the Land of Origin team was in a huge lead. It meant that they were likely to win first place this time, and they would be able to obtain generous rewards.

"That's great. It seems that the team leader's side is going very smoothly."

"After all, all the top-tier experts are there. Although the final boss is strong, those top-tier experts aren't weak either."

"I didn't expect our team would have such a good situation after the worst start."

"If nothing goes wrong, our team will successfully take first place and advance in this trial on the fifth level of the Tower."

"Haha, that feels good!"

The members of the Land of Origin team were thrilled.

The members of the Pan-ocean Community team were also surprised when they heard this news.

A few days ago, they formed Alliance Number 2 with the Red Star Empire team to target the Land of Origin team together with Alliance Number 1.

A few days later, they were already prisoners of war of the Land of Origin team. The Land of Origin team had obtained such a huge advantage.

"I didn't expect the representative team of the land of origin to be so powerful now."

"To be able to kill all the monsters so quickly, they are indeed powerful."

"Yeah, at least for now, there is a huge gap between our team and the Land of Origin team."

"I'm envious that they could advance first."

"Sigh, we can only be eliminated. Let's wait until next year to see if we can succeed again."

"Entering the sixth level of the Tower a year ahead of us, the advantage of the Land of Origin team is too great."

...

The members of the Pan-ocean Community team were all extremely envious.

At this moment, He Yang, who was commanding from behind, could not help but feel a little emotional.

As the team leader, He Yang naturally understood more about the Land of Origin team, especially their team leader, Liu Yan, than the ordinary members under him.

During this period of contact, He Yang also admired Liu Yan. He lost to Liu Yan previously and had even become a prisoner of war, feeling extremely aggrieved.

However, Liu Yan used his terrifying personal combat strength and his wise commanding ability. He Yang could not help but admire him.

Even though He Yang was a genius, He Yang felt that there was still a huge gap between him and Liu Yan. They were not even on the same level.

“It is lucky that the Land of Origin team has such a legendary figure this year.” He Yang could not help but sigh.

He Yang could foresee that it wouldn't be long before Liu Yan matured and became a legendary figure. He would lead the Land of Origin team and stir up the situation!

At this moment, Liu Yan's A-grade fierce beast, Purple Wind Falcon, flew over. It descended to a low altitude and threw an envelope into He Yang's hands.

He Yang knew the envelope was sent by Liu Yan. There must be something going on, so he hurriedly opened it and read it.

Seeing the next step of Liu Yan's plan and the order in the envelope, He Yang could not help but look surprised. He did not expect Liu Yan would continue his plan under such circumstances.

After putting away the envelope, He Yang sighed slightly. He felt that the Red Star Empire team and the European Federation team were going to be doomed this time.

In this monster riot, Liu Yan's plan was too ambitious.

The other teams only needed to think about how to defend against the attack of the monster riot.

However, Liu Yan didn't only think about how to lead the main attack and finish off all the monsters first.

Then, he used the extra time to finish off the final boss.

Now, he needed to take advantage of the remaining time to attack the other two teams.

The entire plan was flawless.

He Yang had always had a good relationship with the Red Star Empire team, especially with their captain, Ye Yifan.

However, as a prisoner of war, especially with the restrictions of the Will of Tower, He Yang could only act according to Liu Yan's orders. He could not care less about Ye Yifan and the Red Star Empire team.

Immediately, He Yang looked at his team members. He ordered, "Hurry up and finish off all the remaining elite monsters. After finishing them off, immediately use the medicinal ingredients and consumables to recover your stamina and energy. Recover your combat strength as soon as possible. We still have things to do!"

The team members were a little confused when they heard this.

This time, the monster riot was just five waves of monsters. They had already finished off all the monsters in the first four waves.

The fifth wave boss was the only one. It had already been defeated by Liu Yan and the others. Logically, they should be able to relax after the battle here. Why did they still have another step to take?

"What's going on? We still have to continue fighting after the battle?"

"This is too tiring. We've been fighting for the entire day."

"Who are we going to fight next? Haven't we already taken care of all the monsters?"

"Captain, what's going on?"

...

The team members were all puzzled.

It was not convenient for He Yang to explain too much at this moment. Although this operation was not top-secret, they still had to pay attention to keeping it a secret. If they could keep it a secret, they would have the greatest chance of success. It was also an order given by Liu Yan.

He Yang looked at his team members and said calmly, "You don't need to ask about the situation. Just carry out the order properly. This is also an order from Liu Yan."

Chapter 458: Shock

The team members still did not understand the situation after hearing He Yang's words.

However, there was one thing that they were sure of, and that was that this was Liu Yan's order.

Immediately, all the team members obediently carried out their duties.

Even the members of the New Continent team seemed to admire and believe in Liu Yan. They were more willing to carry out Liu Yan's orders.

He Yang also noticed this and sighed helplessly. However, he felt that it was normal.

Even though He Yang felt a little aggrieved, he thought about it carefully. If he was an ordinary team member, he would also admire people like Liu Yan even more.

Liu Yan was not an awakened one from the Pan-ocean Community team but from the Land of Origin team. Still, he was a human from the Blue Planet and belonged to the same camp.

After that, everyone in the wood attribute territory quickly killed the last elite monsters and rested on the spot. They took the time to recover their combat strength and prepare for the next battle.

At the same time, in the metal attribute territory.

The situation of the New Continent team was similar to that of the Pan-ocean Community team. With the support of half of the ordinary members of the Land of Origin team, the New Continent team had an easier time dealing with the monsters. They went from passive defense to offense.

They had just finished off the fourth wave of elite monsters and were currently cleaning up the battlefield and regrouping.

At this moment, members of the New Continent team also heard the voice of the Will of the Tower.

The Will of Tower's voice reverberated throughout the world, and everyone heard it.

The members of the New Continent team and the Land of Origin team heard everything. They knew that Liu Yan's team had successfully killed the final boss and obtained a generous reward. They had even got many Lord's token fragments.

The members of the Land of Origin team were also thrilled.

Such a favorable situation was good for the Land of Origin team.

As such, the Land of Origin team earned a lot from this monster riot.

He was only a few hundred pieces away from his goal of collecting 10,000 of the Lord's token fragments. It was very smooth.

The members of the New Continent team were also envious of this situation.

"The team members from the Land of Origin team are so awesome. They're going to advance, and they're going to be the first place."

"Yeah, it's so cool to have such a strong captain."

"I've heard about it too. It's said that the team captain of the Land of Origin team is extremely fierce."

"With such a powerful captain, the normal members did not need to do anything."

"That's right. Do you guys remember how weak ordinary members of the Land of Origin team were when we just arrived at the fifth level? Now, they're all so strong."

"I'm so envious. If only I were a member of the Land of Origin team."

...

The members of the New Continent team were all envious.

Captain Jin Cheng's face was also a little awkward.

As the team captain, Jin Cheng tried his best but lost to Liu Yan.

During this period, He Yang also realized that Liu Yan was a little outrageous. It was not an injustice that they lost to Liu Yan and the Land of Origin team.

Jin Cheng shook his head slightly and did not say anything more.

They didn't grasp this opportunity well. They could only try again next time.

On the other side, in the earth attribute territory.

The progress of the Red Star Empire team was relatively slow. They had just cleared the third wave of monsters and had just begun clearing the fourth wave.

Compared to the other territories, the Red Star Empire team had suffered losses previously. The strength of their members was average.

Before this, the expert team members had not joined the battle, so the progress at the front was slower.

In addition, the Red Star Empire team did not receive any reinforcements, unlike the New Continent team and the Pan-ocean Community team.

Due to many factors, the progress of the Red Star Empire team in clearing the monsters had suddenly slowed down.

However, the strength of the Red Star Empire team was still impressive. They did not feel too much pressure when they faced the third wave of elite monsters. On the contrary, they went relatively smoothly.

Although these elite monsters were strong and had a large number, they could not compare to the number of monsters from the previous waves.

With all members of the Red Star Empire team attacking together, it was still relatively smooth.

Ye Yifan saw that the current situation was smooth. It would not be a problem to deal with the fourth wave of elite monsters. It would just take some time.

The team members were all rather excited.

As long as they could finish off the fourth wave of monsters, they would be able to fight the final boss.

"The Land of Origin team isn't doing too well either. They're just a little faster than us."

"That's right. We can also kill the elite monster in a while and get a platinum treasure chest."

"They're the first to drop the platinum treasure chest. We can drop it too. There's no difference."

"We'll be able to make it in time after we're done with this."

"The final boss will be insanely strong. They won't be able to take it down by themselves."

"Instead, they'll attack the boss first. Both sides will consume each other's energy, and we'll benefit from it. Hahaha!"

...

The team members were all full of confidence.

At this time, Ye Yifan also relaxed a little. Although his progress was behind, it didn't seem to affect him too much. He would only be able to face the boss first, but it didn't mean he could defeat the boss and obtain the final reward.

It was still unknown who would get the final boss reward.

But at this time, the Will of Tower's announcement suddenly sounded.

The announcement resounded through the heavens and the earth. All the Red Star Empire team members present heard it.

They were shocked to hear the announcement that the Land of Origin team had successfully defeated the final boss and obtained the boss reward. It was more than 9,000 Lord's token fragments.

Ye Yifan heard the announcement and frowned. His face was filled with confusion.

Although Ye Yifan didn't know what the final boss was, he had a rough idea. The final boss was extremely powerful. A team was not enough to defeat it. Several teams of experts needed to fight together to have a chance to kill the final boss.

However, how did the Land of Origin team defeat the final boss by themselves?

Ye Yifan's expression immediately turned gloomy. In this way, the Land of Origin team would undoubtedly obtain a favorable advantage. They were very close to collecting 10,000 Lord's token fragments. It would probably not take long for them to be the first to advance directly, receiving a generous reward.

As for the Red Star Empire team, they were destined to miss out on the reward for first place.

Chapter 459: Key Equipment Related to the Sixth Level of the Tower

The members of the Red Star Empire team were shocked.

"How did the Land of Origin team do it?"

"That's too fast! We've only cleared the fourth wave of monsters, but they've already killed the boss!"

"We're done for. We're not going to get the boss reward."

"Not only that, but they also almost have enough Lord's token fragments."

"It seems like we're going to lose to the Land of Origin team in the trial on the fifth level of the Tower trial."

"In the past, the strength of the Land of Origin team wasn't that great. This year, they're so powerful."

...

Team members of the Red Star Empire team all sighed.

They still had to deal with the fourth wave of monsters, but the Land of Origin team had already killed the final boss. The gap was too big.

Ye Yifan noticed that his team members' morale was a little low, so he quickly said, "Right now, we're far behind the Land of Origin team, but it doesn't mean we have lost. We still have a chance. After we finish the fourth wave of elite monsters, we'll also be able to obtain many Lord's token fragments. The gap between us and the Land of Origin team won't be too big!"

When members of the Red Star Empire team heard this, it was as if they had seen hope.

Although the number and strength of the monsters in every territory were similar, the level and number of treasure chests that dropped were random. The number of Lord's token fragments dropped from the treasure chest was also random.

At the moment, their earth attribute territory's luck was pretty good. They did not get many treasures and equipment, but they had many Lord's token fragments.

The Red Star Empire team had collected over 7,000 pieces of the Lord's token fragments. They had already narrowed the gap between them and the Land of Origin team.

Before the start of the monster riot, the Land of Origin team had over 5,000 Lord's token fragments. The Red Star Empire team only had over 1,000 pieces. There was a difference of over 4,000 pieces.

However, they were only 2,000 or so pieces away from the Land of Origin team.

Moreover, they had not finished off the fourth wave of monsters yet. There were still many Lord's token fragments to drop.

By the time the Red Star Empire team had finished dealing with the fourth wave of elite monsters, their Lord's token fragments would not surpass that of the Land of Origin team. However, the difference would not be too great.

Ye Yifan saw that his team members' expressions had brightened, and their combat strength had recovered a little. He said, "Furthermore, we've already sent members to the water attribute territory to prepare for an alliance. Although we've always had conflicts with the European Federation team, I believe they are willing to cooperate with us. We still have a chance to deal with the Land of Origin team."

"Everyone, we haven't lost yet. We still have a chance. We can't relax. We must fight to the last moment!"

When members of the Red Star Empire team heard this, hope and fighting spirit were reignited in their hearts.

"That's right. We still have a chance."

"In that case, although the Land of Origin team is in the lead, they will also become the common enemy of us and the European Federation team."

"It seems that being too eye-catching will attract hatred. It might not be a good thing."

“I feel like we have a good chance.”

“Brothers, let’s work harder and quickly finish off the monsters. We still have to deal with the Land of Origin team!”

...

The team members of the Red Star Empire team became excited once again. They did their best to kill their enemies, and their speed increased significantly.

At the same time, in another water attribute territory.

The strength of the European Federation team was not ordinary. Even without any reinforcements, they could clear the monsters at a fast speed by relying on the powerful strength of their team members.

At this time, the European Federation had cleared more than half of the fourth wave of monsters. It was coming to an end.

The members of the European Federation’s team were all fighting hard.

Even though they were not slow, from the previous reports, they knew that the Land of Origin team was even faster.

The members of the European Federation team were trying their best to kill the monsters in front of them. They tried to catch up with the progress of the Land of Origin team.

But at this time, the Will of Tower’s voice sounded.

The members of the European Federation’s team were shocked.

“What’s going on with the Land of Origin team? How did they kill the boss so quickly?”

“Didn’t they say that the final boss was strong? A single team can’t deal with it. How did they manage to deal with it so quickly?”

“What’s going on with the Land of Origin team? How can they be so strong?”

“This is ridiculous.”

“I didn’t expect our speed is still too slow even though we’ve worked so hard.”

...

Hans Wilson was also confused. He knew that the Land of Origin team was faster than them. He had even ordered his team members to work hard to speed up the clearing of monsters.

Even so, they were much slower than the Land of Origin team.

The most outrageous thing was that the final boss was so powerful, but the team from the land of origin had defeated it just like that.

Initially, Hans Wilson wanted to speed up the progress. This way, his team could fight the heavily injured final boss and the Land of Origin team. Then, they could take down the boss to obtain a generous boss reward and deal with the heavily exhausted Land of Origin team.

This plan could be said to kill two birds with one stone, and the harvest would be exceptional.

But now, Hans Wilson's plan was ruined with the Will of Tower's announcement.

Hans Wilson could not help but sigh. It seemed that he would not be able to get the final boss reward.

As captain of the European Federation's team, Hans Wilson knew some secrets.

Not only was this boss's reward extremely generous, but it was also extremely crucial. It was said that it was related to the sixth level's trial.

Usually, the boss treasure chest would have a piece of equipment related to the sixth level of the Tower.

If he could obtain it, it would naturally be beneficial to the trials on the later sixth level of the Tower. To a certain extent, it was even more crucial than obtaining the reward of first place on the fifth level of the Tower.

Hans Wilson shook his head helplessly. It seemed that he could only think of a way to ensure that his team would advance. Then, they would try to get some rewards as high as possible in the rankings.

As for the key equipment, he would have to find out who had obtained it and see if there was any way to get it.

The trials on the sixth level of the Tower were extremely difficult. If he could not obtain this equipment, it would be challenging to pass the trial on the sixth level of the Tower.

Hans Wilson was determined to get this equipment!

Chapter 460: Enemies Became Friends

Hans Wilson kept thinking of countermeasures.

He could only grab that crucial equipment when he had the chance.

The most important thing at the moment was to ensure that his team could advance, and it would be best if they could get the rewards too.

Although they could win third place, they would not receive any rewards.

Although his team could advance this way, the trials after the sixth floor of the tower would be extremely difficult.

Starting from the sixth floor of the tower, the difficulty of the trial would increase significantly. Without a solid foundation in the first five levels, it would be even more challenging.

Therefore, they would fail if they became third place without any reward.

Hans Wilson couldn't help but feel helpless. The current circumstances were undoubtedly extremely disadvantageous to them.

There were only three forces on the five floors of the tower.

One of them was the European Federation team. Although the members were strong, their progress was indeed a little slow.

The other was the Red Star Empire team. Their situation was probably not as good as the European Federation team. However, they were helpless because of the various conflicts from before. There was still enmity between the European Federation team and the Red Star Empire team. It would be a little troublesome to handle.

The last one left was naturally the Land of Origin team.

Among the three forces, there was no doubt that the Land of Origin had the greatest advantage.

Not only did they get rid of the other two teams, but they also got two extra territories.

They had made the fastest progress and killed all the monsters. They had even killed the final boss and obtained a generous boss reward, as well as that crucial piece of equipment.

Furthermore, the number of Lord's token fragments the Land of Origin team collected had reached more than 9,000. Soon, they would be able to gather 10,000 Lord's token fragments to synthesize a Lord's token and complete the requirement of the tower's fifth-floor trial. Being the first to advance to the tower's sixth floor would also receive a generous reward.

The remaining hundreds of Lord's order fragments were undoubtedly extremely easy for the Land of Origin team.

After searching the three territories, they would be able to gather everything. It was extremely simple.

After thinking for a while, Hans Wilson felt a headache. The current situation was undoubtedly unfavorable to the European Federation's team.

With the current strength of the European Federation's team, it was impossible to stop the Land of Origin team from being the first to complete the collection of the Lord's token fragments and advance smoothly.

The vice-captain, Derek Doyle, saw Hans Wilson's bitter face. He suggested, "Captain. Why don't we put aside our differences and join forces with the Red Star Empire team to fight the Land of Origin team? If we work together, we'll be able to defeat the Land of Origin team. Both of our teams could advance and get the rewards. Moreover, since we're stronger than the Red Star Empire team, we'll become first place. What do you think?"

Hearing this, Hans Wilson's eyes lit up. He had forgotten about this idea.

Previously, Hans Wilson had thought of this, but he had given up.

After all, there had always been friction between the European Federation and the Red Star Empire. There was a huge conflict between them, and they were long-time enemies.

But in the current situation, it seemed that there was a need for the two teams to cooperate.

After all, if the battle continued, the result would be obvious. The Land of Origin team would win first place and receive a generous reward. On the other hand, the European Federation team would only

become second place. Although there were some rewards, they were too little to face the trial on the sixth floor of the tower.

As for the Red Star Empire team, they were the weakest and could only win third place without any rewards. The trial on the sixth floor of the tower would be extremely difficult for them.

However, if the two teams could successfully join forces to deal with the Land of Origin team, it would be good for both sides. They needed to join forces.

However, Hans Wilson said with some worry, "If we can successfully ally, it will naturally be a good thing. However, we have a conflict with the Red Star Empire team. We even almost eliminated them. I'm afraid that they won't be willing to ally with us.

Hearing this, Derek Doyle smiled and said, "Captain, your worries are unnecessary. The conflict between us and the Red Star Empire team was because of benefits. If there was no conflict of benefits, why would there be any conflict between our two teams? We have the same interests now, so there is no reason for the Red Star Empire team not to ally with us. It is a good thing for both sides. If they are unwilling to ally with us because of the previous conflicts, then I can only say they are too stupid. Especially their team captain, he is too unwise."

When Hans Wilson heard this, he could not help but nod and say, "I've come into contact with the Red Star Empire team's captain, Ye Yifan, quite a few times. He's a wise person. In that case, he shouldn't continue to fight with us because of the previous conflicts. He should be willing to put down his previous prejudices and join forces with us. At the very least, he can put them down temporarily."

Just as Hans Wilson and Derick Doyle were discussing their strategy, a member brought a member from the Red Star Empire team came over.

Members of the Red Star Empire team were extremely eye-catching among the European Federation team.

After all, most of the members of the European Federation team had blond or brown hair, and a few had blond hair. Most of their eyes were dark green and blue.

On the other hand, this member had black eyes and hair. He was eye-catching among the members of the European Federation team.

"Captain, vice-captain, he is a member of the Red Star Empire team. He says that he's here as an emissary. He's here with his captain's order and has something important to discuss with you." The member of the European Federation team reported.

Hearing this, Hans Wilson and Derek Doyle looked at each other, both surprised.

Just as they were discussing this matter, the Red Star Empire team's emissary arrived. Could it be that he was here for this matter as well?

At this moment, the team members added, "He was sincere when he came over. We asked him to hand over his weapon, and he did. I saw his sincerity, so I brought him to meet you."

"I know. You can go back and continue fighting. We'll have a chat with him." Derek Doyle nodded and waved his hand.

“Yes!” The team members quickly left.

Hans Wilson and Derek Doyle looked at the emissary sent by the Red Star Empire team.

“Hello, captains. I’m here under the orders of our team captain, Ye Yifan. I want to discuss with you about putting aside our differences for the time being and joining forces to deal with the Land of Origin team” the emissary explained his intentions directly.

Hans Wilson and Derek Doyle looked at each other and saw the joy in each other’s eyes.

They did not expect the Red Star Empire team’s captain, Ye Yifan, would think of this before them and send an envoy even earlier.

Hans Wilson and Derek Doyle were instantly overjoyed. They did not expect the alliance to go so smoothly.
