

## Towers 471

### Chapter 471: Water Attribute Territory with Complex Terrain

When Ye Yifan heard Sun Wen's words, he immediately looked at Sun Wen with a puzzled expression.

"We can get out of the situation without any reinforcements? What do you mean by that?" Ye Yifan was confused.

Sun Wen smiled strangely and said, "We can only take care of the monsters now. We can only let the European Federation team fight the Land of Origin team. It's up to them to fight. We can't do anything."

"If we send reinforcements to the water attribute territory after we clear the monsters, we could not defeat the Land of Origin team. So, instead of going to the water attribute territory, we might as well go to the fire attribute territory!"

Ye Yifan's eyes lit up when he heard this. "You mean to besiege their territory to save the European Federation team? We should use this time to attack the fire attribute territory?"

"Yes. According to the report from the Will of Tower and Derick Doyle, the Land of Origin team has sent out all their forces this time. Three teams have headed to the water attribute territory to attack the European Federation team. In this way, nobody is defending the fire attribute territory. Let's kill our way over. We defeat their guardian beast. We can also destroy the core of the camp to eliminate them. If we can make it in time, we'll destroy the temporary core of the camp of the Land of Origin team in the fire attribute territory and eliminate them. Even if it's too late, we can still attract members of the Land of Origin team back to defend. Wouldn't that be equivalent to saving the European Federation team?"

Ye Yifan thought about it and felt that it made sense.

This time, the Land of Origin team seemed to have sent out all their members to win as quickly as possible. It was obvious that they did not leave any defensive personnel behind.

With that, the fire attribute territory would be left empty.

As long as they quickly dealt with the monsters and rushed to the fire attribute territory, they would have a chance.

It would be even better if they could successfully destroy the core of the temporary camp of the Land of Origin team. It would also be fine if they could not destroy it and attract their team members back.

After all, this would help the European Federation team relieve the pressure and buy time.

As long as they had time, they could rest and recover their combat strength before joining forces to deal with the Land of Origin team. By then, they would naturally have nothing to fear.

"Good plan. It's a race against time now. We can't decide if the European Federation team can hold on. We can only quickly finish off the monsters here." Ye Yifan said with determination.

After that, Ye Yifan joined in the battle against the monsters and ordered all members of the Red Star Empire team to fight the monsters with all their might. They wanted to finish off the monsters in the shortest time possible so that they could free themselves and deal with the Land of Origin team!

At the same time, in the water attribute territory.

Liu Yan and the other members of the Land of Origin team had already entered the water attribute territory.

There were many rivers in the water attribute territory.

It was a little difficult to cross these rivers.

The smaller rivers were still fine, as Liu Yan and the others could cross them directly.

The larger rivers were a bit more troublesome. They had to take a detour to avoid the rivers that were dozens of meters wide.

While Liu Yan and the others were advancing, Undying Fire Phoenix, the guardian beast of the fire attribute territory, was also soaring in the sky.

Liu Yan's three teams had deployed their full strength for this battle.

According to the rules, the guardian beasts of the other two territories could not be brought to the other territories to fight. Liu Yan could only let Undying Fire Phoenix fight with them.

Liu Yan was clear that time was the most crucial factor in this battle. They had to get rid of the European Federation team as soon as possible so that they could have time to fight the Red Star Empire team.

If they could not defeat the European Federation team in time, the reinforcements from the Red Star Empire team would have already arrived.

Although the strength of the Land of Origin team was enough to deal with two teams, it would undoubtedly be much more difficult to deal with. The battle would become more challenging.

The best way was to quickly take down the European Federation team in the water attribute territory.

At this time, Liu Yan was also scouting the situation through the A-grade fierce beast, Purple Wind Falcon.

Purple Wind Falcon made some inquiries in the sky, and Liu Yan could understand the situation in the water attribute territory.

Most of the land in water attribute territory was like this. It was filled with all sorts of rivers. Rivers of different sizes spread out in all directions, making the terrain a little complicated.

There was not a single member of the European Federation team around. The European Federation team had just finished their battle with the monsters. When they heard the news that the Land of Origin had attacked them, they retreated to their temporary camp and used the terrain to defend themselves.

The members of the European Federation team were also getting ready. They were ready to fight to the death.

Liu Yan was surprised when he found out about the situation of the European Federation team. He didn't expect that the team members would still be able to organize a defense with a high fighting spirit.

Despite such a huge difference in strength, numbers, and condition, the European Federation team still had the will to fight. It was impressive and admirable.

Liu Yan couldn't help but admire the members of the European Federation team.

However, admiration was admiration. The battle still had to proceed.

After learning the location of the temporary camp of the European Federation team, Liu Yan led his people in the direction of the temporary camp.

At the same time, Liu Yan asked Purple Wind Falcon to send a message to the New Continent team and the Pan-ocean Community team. It was about the location of the European Federation team's temporary camp.

Liu Yan led his team members to cross the large and small rivers. It did not take long for them to arrive in front of the temporary camp of the European Federation team.

The New Continent team and Pan-ocean Community team also arrived one after the other.

They had initially wanted the three teams to attack the European Federation team from three directions and take them down as soon as possible.

However, Liu Yan didn't expect the members of the European Federation team to organize the defense so quickly.

In such a short time, the members of the European Federation team had all returned to the temporary camp to make defensive preparations.

The European Federation team specially chose the location for their temporary camp.

The temporary camp of the European Federation team was located on a small island in a large lake.

If Liu Yan and the others wanted to attack, they would have to cross the lake and resist the long-range attacks of the European Federation team members.

At this time, the team captain of the New Continent team, Jin Cheng, and the team captain of the Pan-ocean Community team, He Yang, also came to look for him with worried faces.

## **Chapter 472: Discussing Strategy**

In the water attribute territory.

The two captains, He Yang and Jin Cheng, came over.

The complexity of the terrain in this water attribute territory was beyond their expectations.

The temporary camp of the European Federation team was located in the middle of a vast lake.

There was only one narrow path to the island in the middle of the lake.

Without a doubt, if they were to attack rashly, they would be at a disadvantage if they could only take this small path.

They had three times the number of team members on this side, and the state of the team members was much better than that of the European Federation team. However, they could not form a formation despite having many people. Such an attack did not have the slightest advantage.

Even if they managed to attack it in the end, they would suffer great losses.

“Captain Liu, we can’t just attack rashly, right? Otherwise, the losses would be too great.” Jin Cheng couldn’t help but worry.

As the captain of the New Continent team, Jin Cheng knew they were Liu Yan’s prisoners of war. They had to listen to Liu Yan’s orders before the trial on the fifth floor of the tower ended.

At this time, Jin Cheng was worried that Liu Yan would ask them to attack directly. They would suffer a huge loss even if they defeated the opponent.

Even though the New Continent team had been eliminated this time, these team members were still the elites of the New Continent’s students. Naturally, Jin Cheng wanted to bring them back to cultivate and fight again next year.

If Liu Yan were to play any tricks at this time and allow them to attack, it would cause them to suffer huge losses.

He Yang, the captain of the Pan-ocean Community team, also nodded and said, “Yeah, we can’t attack now. It’s too disadvantageous for us.”

He Yang had the same thoughts. As the team captain, he naturally didn’t want to lose too many members.

Liu Yan could tell what the two were thinking with a single glance. He smiled and said, “Don’t worry, I won’t force you guys. I won’t use you guys as cannon fodder.”

Liu Yan naturally didn’t need to push the people from these two teams to their deaths. Although there were conflicts before, it was for their interests.

After all, they were all humans of the Blue Planet and would be on the same side in the future.

They had only competed with each other on the fifth floor of the tower, so they were temporary enemies. Once they reached the higher levels of the tower, they would not meet again, so they were no longer enemies.

Hearing this, Jin Cheng and He Yang heaved a sigh of relief. After thinking about it carefully, they realized that Liu Yan wasn’t that kind of person.

“Then how do we attack? The temporary camp of the European Federation team is on an island in the lake, so it’s difficult to attack.” Jin Cheng was puzzled.

He Yang chimed in, “That’s right. I’ve just observed. There’s only one way to enter the island in the lake, and it’s narrow. If we attack, we can’t go there at all.

Liu Yan looked ahead. The vast lake was a little messy, and the lake was muddy.

Not all members of the European Federation team had taken the small path. Many of them swam across the lake.

Liu Yan looked at the temporary camp of the European Federation team on the island in the lake in the distance. The members of the European Federation team were making defensive preparations.

If the Land of Origin team chose to attack, they would launch long-range attacks.

Liu Yan turned to Xu Han and said, "Xu Han, gather all the members of your team who are good at long-range attacks, especially control skills, and launch a long-range suppression. Do you have the confidence to suppress the other side?"

Xu Han looked at the team members of the European Federation on the island. They were exhausted from the previous battle, and their combat power was limited.

Xu Han nodded. "I can gather three teams of awakened who are good at long-range attacks to suppress the European Federation team."

"Alright." Liu Yan was relieved. He had great faith in Xu Han's long-range attack and crowd control.

Moreover, Liu Yan could also help.

Liu Yan's long-range attacks were not weak. Although his crowd control skills were limited, he could still deal AOE damage by flying in the air with the Wings of Wind God.

Then, Liu Yan turned to Jin Cheng and He Yang. He said, "When Xu Han's side is ready to suppress them, our three teams will wade through the water in one direction. Those who aren't good at swimming can take that small path, and the rest of the team will all wade through the water. With Xu Han's team suppressing them from a distance, the European Federation team won't be able to hurt the rest of us."

He Yang and Jin Cheng's eyes lit up.

Liu Yan's plan was simple, but it was highly effective.

The awakened ones who were good at long-range attacks and control were gathered to cast the spell simultaneously. The spell power suddenly surged, and it was much stronger. It was enough to suppress the European Federation team.

This way, members of the European Federation team wouldn't be able to pose much of a threat to them as they waded toward the island in the lake.

Soon, Jin Cheng and He Yang left and returned to their team to prepare.

Luo Qingcheng did not say anything, but she looked at Liu Yan in surprise.

The plan just now seemed simple, but it was useful. It was impressive that Liu Yan came out with this plan.

A capable commander never needed to come up with a profound plan. The simpler the plan, the more practical it was. The most important thing was decisiveness. After encountering a situation, one should not hesitate and be able to think of a suitable way to implement it at the first moment.

And Liu Yan had undoubtedly achieved this.

Unconsciously, Liu Yan's commanding ability had also grown, and he had become good at commanding.

However, Luo Qingcheng stepped forward to remind Liu Yan. "Under normal circumstances, Xu Han's three teams of awakened ones are good at long-range attacks. They should be enough to suppress the European Federation team. However, this is their last chance. They will fight back with all their might. It's hard to tell what will happen, so we should be prepared.

When Liu Yan heard this, he could not help but feel it made sense.

In terms of strength, they could naturally completely suppress the European Federation team.

However, the European Federation team was still resisting with all their might, and there was no way to retreat. He might even unleash his potential, so he needed to be careful.

When Murong Xue heard this, she didn't think it was true. "What's there to be afraid of? We have three teams against one team. We won't fail! I'll be at the front, so their attacks are useless against me. I'll ensure the safety of my team members behind me!"

When Luo Qingcheng heard that, she looked at Murong Xue helplessly and said, "Murong Xue, it's important for a member to be strong in group combat. However, there is so much a strong member could do. Hence, a strategy is crucial. If every ordinary member were to display a bit more strength, it would be a terrifying force when gathered together. It's far more powerful than a top-tier expert.

Murong Xue was confused as she did not understand what Luo Qingcheng meant.

Chu Long pulled Murong Xue over and said, "Sister Murong Xue, don't bother too much with them. Just listen to their orders. Sister Luo Qingcheng and Brother Liu Yan are enough to give orders.

When Murong Xue heard this, she instantly felt it was very reasonable. She nodded. "Commanding is too annoying. I'll be in charge of charging and breaking through the enemy lines!

Immediately, Liu Yan and Luo Qingcheng communicated for a while and prepared to let the team members adopt a new formation.

The members lined up in rows, but the space between each row was slightly larger.

Such a dense formation allowed the team members to spread out and quickly rush to the island in the middle of the lake to engage in close combat. Furthermore, it also reduced losses as much as possible when the other party launched a long-range attack.

Apart from Xu Han and the others, there were also the undying Phoenix and Liu Yan in the sky. The battle was relatively simple.

Not long after, Xu Han's team was ready. He gathered all the awakened who were good at long-range attacks and control from the three teams. They were all under Xu Han's command to launch long-range

attacks and suppress the enemy. It was to cover the main force as they waded through the water to the island in the middle of the lake for close combat.

The Land of Origin team had more members than the European Federation team. The condition of Land of Origin team members was better too. If the main force could reach the island in the middle of the lake, the battle would be one-sided and end in no time.

After everything was prepared, the three team members were ready to go. They were only waiting for Liu Yan's orders.

Upon seeing this, Liu Yan also unfurled his Wings of Wind God and flew into the sky.

The team members kept staring at Liu Yan's massive Wings of Wind God.

Members of the Land of Origin team had already seen Liu Yan's Wings of Wind God before. But members of the other two teams never saw it before, so they were all surprised.

### **Chapter 473: Helpless Move**

The members of the New Continent team and the Pan-ocean Community team were shocked when they saw Liu Yan flying in the sky.

"Who's that person? How can he fly?"

"Didn't they say that only the top powerhouses on the ninth or tenth level of the Tower can fly?"

"He can fly on the fifth level of the Tower. That's amazing!"

"That looks like the team captain of the Land of Origin team, Liu Yan."

"It should be a special piece of equipment, and it's powerful. I did not expect Liu Yan own such a powerful piece of equipment."

"I think its combat power is also very terrifying!"

...

The members of the New Continent team and the Pan-Ocean Community team looked up at Liu Yan in the sky in admiration.

At the same time, on the island in the lake, in the temporary camp of the European Federation team. The team members were also surprised and shocked to see Liu Yan flying in the air.

Hans Wilson, the captain of the European Federation team, felt his heart sink, and his expression turned gloomy.

Although he had never fought with Liu Yan before, Hans Wilson had already understood that Liu Yan's strength was terrifying from the previous intelligence.

In this battle, the overall strength of the European Federation team was inferior to Liu Yan's team. There was a huge gap between them.

Hence, they could only use the temporary camp on the island to defend themselves and hold on for a while.

However, Hans Wilson did not expect Liu Yan could fly.

With that, Liu Yan, who was in the air, could attack them.

The terrain advantage of the water attribute territory was obliterated in front of Liu Yan.

Hans Wilson could not help but feel helpless. He had no other choice but to pray that Liu Yan's long-range attack was average.

If Liu Yan were only good at close combat, he would not be able to pose much of a threat to them.

At this moment, Liu Yan looked down at the three teams of the Land of Origin team on the ground. His heart was filled with pride.

The feeling of flying was extraordinary.

With the help of the special equipment, the Wings of Wind God, Liu Yan was already so powerful.

If he could fly on his own, how terrifying would that be?

Liu Yan could not help but look forward to it. However, he also knew that it was a matter of the distant future.

Xu Han and the others were ready. After getting Liu Yan's approval, they went up and started suppressing the enemy.

Many awakened ones who were good at long-range attacks and control skills had gathered under Xu Han's command.

Their main task was not to attack but to suppress.

They suppressed the European Federation team so the European Federation team could not launch long-range attacks. It also allowed the other team members to enter the water.

They used many attacks as they moved toward the temporary camp of the European Federation team.

Without a doubt, Xu Han's skill was the most dazzling and effective.

As Xu Han waved his S-grade weapon, Phantom Blue Staff, a blizzard suddenly appeared above the temporary camp of the European Federation team.

Under the terrifying power of the frost attribute, the members of the European Federation team felt cold all over their bodies. Their movements slowed down, and they were greatly affected.

With the help of Xu Han's team members, the European Federation team could only defend and could not show their faces.

Liu Yan saw the time had come and ordered, "Attack!"

At Liu Yan's command, the three teams led by the Land of Origin team were ready and immediately began the attack.

The three teams were all in the same direction. They spread out their formation and waded towards the island in the lake.

Some awakened ones who were not good at swimming took that small path.

At this time, Xu Han and the others were still using long-range attacks and control skills to suppress the team members of the European Federation team.

Under the suppression of Xu Han and the others, members of the European Federation team could not show their faces at all. They could not stop Liu Yan's team members from approaching the lake.

The captain of the European Federation team, Hans Wilson, noticed this and his expression turned ugly.

"I didn't expect them to be so smart. They immediately gathered all the awakened ones who are good at long-range attacks and control to suppress us. This way, we have no way of stopping them from approaching." Hans Wilson could not help but say helplessly.

If it were his past self, he would not be so defensive.

However, the European Federation team had just experienced a great battle. His team members were exhausted, and their combat strength had dropped.

On the other hand, Liu Yan's group had three teams, so they had an absolute advantage in numbers and could crush them with their strength.

The long-ranged awakened ones in Liu Yan's team were much stronger than the European Federation team.

The vice-captain of the European Federation team, Derek Doyle, was also worried when he saw this scene.

"Captain, what should we do? If this continues, their main force will be able to get close very soon. By the time they reach the island in the lake, we won't be a match for them at all." Derek Doyle asked urgently.

At this moment, Hans Wilson was also constantly thinking. If they were to take the initiative to counterattack, their long-range attack and control skills were inferior to Liu Yan's team. Even if they resisted, they would still be suppressed.

When the main force of the Land of Origin team waded through the water and arrived at the island, what awaited them would be elimination. The European Federation team would have no room to resist at all. Hence, they had to fight back now.

"Oh right, what did the Red Star Empire team say?" Hans Wilson could not help but ask.

Derek Doyle nodded slightly and said, "I've asked them about this and told them about the severity and urgency of the matter. However, the progress of the Red Star Empire team is rather slow. They haven't eliminated the monsters yet. They've already promised they'll eliminate the monsters and help us as soon as possible. They want us to hold on as long as possible."

Hearing this, Hans Wilson nodded slightly. In that case, as long as they could hold on for a while longer, they could still be saved.

As long as they had reinforcements, they still had a chance.

Although the hope was slim, Hans Wilson would lead the team members of the European Federation team to persevere.

Hans Wilson pondered for a moment and said, "Let's go all out. We can't care so much anymore. We can ignore those awakened ones who are good at long-range attacks and control skills. We are no match for them in a direct attack. Pass down the order. All team members will attack the opponents approaching the lake in batches. Do your best to prevent them from approaching our island!"

Derek Doyle was stunned for a moment before he said, "Captain. If we ignore the long-ranged opponents in the distance and attack the ones in the lake, won't our team members suffer injuries?"

With a cold expression, Hans Wilson said, "Then what can we do? "We don't have the strength to deal with them. We can only deal with the most troublesome team members in the lake. If they are injured, so be it. It's better than being eliminated. Attack in batches and try to injure as few as possible so we can delay more time!"

Hans Wilson had no other choice but to do this.

He knew the consequences. Many members of the European Federation team would be injured or even killed.

However, this method was the only way to stop and delay the opponent's attack.

#### **Chapter 474: Desperate Resistance**

Derek Dole sighed when he heard this.

After thinking about it carefully, it was the only way at that moment.

They could only use the injured team members in exchange for blocking and delaying the attack of the Land of Origin team.

They had to try their best to seize the chance to advance to the sixth level of the Tower.

"I understand. I'll pass on the order now." Derick Dole nodded and left.

Soon, members of the European Federation team received the order, but none complained.

"I'm fine. It's just an injury. It's no big deal."

"I'd rather get injured than be eliminated."

"If getting injured can be exchanged for a smooth advancement, it would be worth it."

"I hope the Red Star Empire team can move as fast as possible and come to our aid."

"Brothers, it's our once-in-a-lifetime battle!"

...

Members of the European Federation team gradually ignited their fighting spirit.

After that, they split into a few groups and took turns blocking the enemy.

Soon, the first group of team members stood up.

They did not pay any attention to Xu Han and the others on the other side of the lake. They launched a strong attack on the Land of Origin team members in the lake.

The Land Origin team members in these lakes were all moving forward. They were easy targets.

After a series of attacks, many members of the Land of Origin team were injured.

Their injuries weren't serious, but their movements were hindered.

At this time, the attacks of Xu Han and the others also fell on members of the European Federation team in the temporary camp.

The advancing members of the European Federation team were all hit. They were all seriously injured but still trying to dodge the attacks.

The Land of Origin team members, who were advancing in the lake, saw this scene and mocked the enemies.

"What a joke. They ignored the long-range awakened ones behind us and directly attacked us."

"What the hell are they thinking?"

"We're not injured. The enemies hindered our movement, but they suffered a serious injury."

"What's the point of resistance? I don't understand what the members of the European Federation team are thinking."

"Let's keep moving forward. As long as we reach the island, we'll be able to crush the European Federation team!"

"Haha, I've never fought such a rich battle before. This is too much of a crushing advantage!"

...

At the same time, Xu Han, who was on the shore behind them, frowned. He had a bad feeling.

Xu Han knew the European Federation team well, especially their captain, Hans Wilson. He was a talented captain and a powerful person.

With Hans Wilson's temperament, he would naturally not make such a choice that would cause meaningless casualties to his team members.

Since he had made such a decision, he must have had his purpose.

Just as Xu Han was thinking about Hans Wilson's purpose, another member of the European Federation team showed up in the temporary camp.

But this time, a new group of European Federation team members replaced the injured team members. There were no injuries on their bodies.

As soon as the members of the European Federation team moved into the battlefield, they ignored Xu Han and the other long-ranged awakened ones.

They did not even bother with the attacks and crowd control skills of Xu Han and the others and did not even bother to defend.

As soon as they were on the battlefield, they ruthlessly attacked the Land of Origin team members, who were advancing in the lake.

After a series of attacks, the Land of Origin team members at the lake immediately suffered heavy losses, and their progress was also affected.

Of course, the European Federation team members were attacked by Xu Han and the others, and they were injured more.

Then, they went into hiding again.

Every time the European Federation team was attacked, some members would be injured in exchange for the slow progress of the Land of Origin team members in the lake.

They used the casualties to delay the attack of the representatives from the land of origin and stall for time.

After all, the Land of Origin team members in the lake were like live targets. When they were attacked by the European Federation team members, they could only defend themselves.

It was inconvenient to defend in the water, which affected their progress.

After a few rounds, the members of the European Federation team were all seriously injured.

However, at the same time, it also greatly limited the speed of the team members from the Land of Origin team in the lake.

Xu Han was watching from a distance. He finally understood Hans Wilson's intention.

It turned out that he wanted to use the casualties of the European Federation team to buy time.

Although this decision would cause a lot of casualties, it would undoubtedly delay time.

They were constantly using the injuries of a small number of members to delay the speed of the Land of Origin team and stall for time.

"It's a good plan, but it's also ruthless." Xu Han shook his head helplessly.

At the same time, Liu Yan, who was in the air, naturally noticed this scene and was a little surprised.

Originally, Liu Yan was also surprised that the members of the European Federation team would give up in the face of such a tremendous difference in strength.

However, to Liu Yan's surprise, not only did the members of the European Federation team not give up, but they also resisted.

Although the European Federation team would still be unable to block the attacks of Liu Yan and the others, they would be able to delay for quite some time. It would be enough for the Red Star Empire team to arrive.

Seeing this, Liu Yan was not in a hurry. In any case, they had plenty of time. It was a good time for members of the Land of Origin team to hone their combat skills.

On the fifth level of the Tower, the battles they had experienced were still somewhat lacking.

The individual strength of the team members had increased significantly with the help of various high-grade cultivation materials and consumables. However, their team combat ability had not been honed much.

The trial on the fifth level of the Tower was set in stone, but there were still higher levels to go.

Liu Yan needed to improve his strength and help the ordinary members of the land of origin's representative team improve their strength.

Their individual combat strength was not strong, far from Liu Yan's.

However, the combined combat power of the team was still extremely terrifying. Naturally, it would be of great use in the future and could affect the situation.

Liu Yan was watching the battle, but Luo Qingcheng called him as if she had something to discuss with him.

Seeing this, Liu Yan flapped his Wings of Wind God, and a green shadow appeared in front of Luo Qingcheng the next moment. His flying speed was terrifying.

As he landed on the ground, Liu Yan kept his Wings of Wind God so as not to affect his movements.

Luo Qingcheng suddenly looked at Liu Yan in surprise, "Your speed is terrifying. It seems like your strength has increased a lot during this period."

Hearing this, Liu Yan smiled faintly.

Thinking about it carefully, it was indeed so.

The trial on the fifth level of the Tower was tough and full of danger.

Even with Liu Yan's strength, he was in danger many times.

In the last battle with Moonshine Qilin, if Liu Yan had not successfully used the Attribute Fusion to turn the tables, he would have been killed.

However, all the dangers were worth it, as Liu Yan's strength had increased greatly.

Liu Yan's improvement during the trial on the fifth level of the Tower was undoubtedly terrifying.

After collecting his thoughts, Liu Yan looked at Luo Qingcheng and asked, "Why did you call me down?"

Luo Qingcheng nodded slightly and said, "There's something very wrong. We have to be careful."

#### **Chapter 475: Breakthrough Using Absolute Power**

"What's the situation?"

Liu Yan looked at Luo Qingcheng with some doubt.

Luo Qingcheng immediately explained the situation.

Other than commanding the battle, Luo Qingcheng had also been paying attention to the situation in the public channel.

After all, the Land of Origin team had an absolute advantage in strength over the European Federation team. It was only a matter of time before they took down the European Federation team.

What required the attention of the Land of Origin team was naturally the Red Star Empire team on the other side.

The Red Star Empire team was still busy fighting the monsters and could not spare any time. Naturally, they could not threaten the Land of Origin team.

However, the European Federation team could delay the battle for a long time if they fought in a water attribute territory.

Hence, Luo Qingcheng paid more attention to the situation in the chat interface of the public channel. She had used the content of their chat to understand the situation of the Red Star Empire team.

According to the content of the chat, the Red Star Empire team intended to finish off the monsters as soon as possible and then support the European Federation team.

However, Luo Qingcheng soon found something strange.

The Red Star Empire team was planning to support the European Federation team. However, it did not look like they were going to the water attribute territory. It seemed like they were going to help through other means.

The Red Star Empire team had given the order to keep it a secret, and the contents of their conversation were obscure. Luo Qingcheng had also noticed something was wrong. She guessed that the Red Star Empire team had other thoughts.

After Liu Yan heard Luo Qingcheng's words and understood the general situation, he thought about the purpose of the Red Star Empire team.

"You mean the Red Star Empire team will launch a surprise attack on our fire attribute territory after they clear the monsters?" Liu Yan said.

"Yes."

Luo Qingcheng nodded slightly and said, "I've thought about it carefully, and I feel it's possible. After all, we have the New Continent team and the Pan-ocean Community team. With the strength of three

teams, the Red Star Empire team won't be able to do anything to us even if they manage to rush here in time. They can only defend us. However, if they go to our fire attribute territory, it will be a different story."

Liu Yan immediately guessed the thoughts of Ye Yifan, the team captain of the Red Star Empire team.

Thinking about it carefully, it was indeed so.

The current fire attribute territory was empty.

If the Red Star Empire team were to launch a surprise attack on a fire attribute territory, Liu Yan and the others would have no choice but to return and defend.

It would be fine if they could make it in time and protect their fire attribute territory. However, they could no longer attack the European Federation team in their water attribute territory. It was equivalent to the Red Star Empire team supporting the European Federation representative team in a disguised form.

However, if they were too slow in defending, it would be troublesome. If the core of the fire attribute territory was destroyed, the Land of Origin team, including Liu Yan, would be eliminated.

All their previous efforts would be in vain.

"What a good move. Not bad, not bad." Liu Yan smiled. It seemed the Red Star Empire team's captain, Ye Yifan, was quite a character.

This plan was not brilliant, but to think of such an effective method in such a desperate situation was quite impressive.

Luo Qingcheng could not help but worry. "What should we do? I see that the European Federation team is putting up a desperate resistance. In addition, the terrain is complex. It will take us a while to take down the European Federation team. If we are delayed for too long, our camp will be in danger. Why don't we split up a team and return to the fire attribute territory?"

Liu Yan remained calm and sneered.

He did not expect the European Federation team and the Red Star Empire team could fight back even in such a desperate situation. They were even thinking of counterattacking. It was truly unexpected.

On the battlefield before them, the European Federation team relied on the terrain advantage and their fearless resistance to fight to the death. In the face of the massive difference in strength between the three teams led by the Land of Origin team, they could still hold on for a while and buy a lot of time.

On the other side, the Red Star Empire team was still fighting with the monsters and could not pose a threat to Liu Yan and the others.

However, if they could finish their battle with the monsters and attack the fire attribute territory, they would be a fatal threat to Liu Yan and the others.

Not many people were in the fire attribute territory. There were only a few team members and Shadow Wolf. Their combat power was relatively limited.

Against a small number of team members, Shadow Wolf could still take them down. However, Shadow Wolf could not defeat an entire team.

Once the core of a fire attribute territory was destroyed, the Land of Origin team would be eliminated.

If it were another team, they might have lost their lives under the counterattack of enemies.

Liu Yan had let his guard down. He did not take any precautions in this aspect.

Liu Yan ordered Purple Wind Falcon to patrol the sky above the earth attribute territory to understand the situation of the Red Star Empire team.

With the help of Purple Wind Falcon, Liu Yan was able to understand the situation of the Red Star Empire team immediately.

Even if that happened, Liu Yan and the others would still be able to return to the fire attribute territory in time. It would only affect their frontal attack to a certain extent.

After pondering for a moment, Liu Yan turned to Murong Xue and said, "There's no need to go through so much trouble. It's too troublesome to defend and attack at the same time. It's too passive. I've always been aware of the situation of the Red Star Empire team in the earth attribute territory. I'm fully aware of their every move. We only need to defeat the European Federation team in the water attribute territory before their battle with the monsters ends.

When Luo Qingcheng knew that Liu Yan had been paying attention to the Red Star Empire team's every move, she was relieved.

If the Red Star Empire team made any moves, they could learn of the situation through Purple Wind Falcon and then take countermeasures.

However, Luo Qingcheng was a little worried when she heard that Liu Yan intended to ignore the camp and continue to attack. "Liu Yan, our camp is crucial. Why don't we play it safe?"

Luo Qingcheng also felt they could defeat the European Federation team on a head-on battlefield.

After all, the Land of Origin team had an absolute advantage in strength. Not only were they in a much better state, but they also had a massive advantage in numbers.

However, the European Federation team put up a desperate resistance by utilizing the complex terrains. It delayed the attack of the Land of Origin team's attacks.

The Land of Origin team would spend more time taking down the European Federation team. Things would become less favorable to the Land of Origin team if the battle dragged out.

When Liu Yan heard this, he laughed and said, "I know what you mean. The European Federation team's desperate resistance is beyond my expectations. In the face of such a huge power gap, they still managed to delay for a long time. It's impressive. But since time is of the essence, I'll make a move and end the battle as soon as possible."

As Liu Yan spoke, he flapped his Wings of Wind God and disappeared. He had already left.

When Luo Qingcheng heard this, she was relieved. If Liu Yan joined the battle, he would be able to end the battle quickly. Naturally, there was no need to worry about having no time to protect their camp.

### **Chapter 476: Gale Force**

High up in the sky.

Liu Yan flew high in the sky with the Wings of Wind God, observing the situation on the ground from above.

Members of the Land of Origin team were in better condition and stronger. They also had a huge advantage in numbers, so the battle was naturally one-sided.

On the other hand, the European Federation team could rely on the complex terrain, put up a desperate resistance, and delay the time despite their injuries. It had caused a lot of trouble for the Land of Origin team.

Liu Yan, who was high up in the sky, could see the members of the European Federation team would cause a lot of trouble and delay members of the Land of Origin team.

However, Xu Han and the others would also attack them. Each time, they would leave a lot of wounds on their bodies. Some of them were seriously injured, which would make these members lose their combat ability!

The current scene was entirely due to the members of the European Federation team, who were using their lives to buy time.

Initially, Liu Yan wanted to let team members of the Land of Origin team take their time to fight and use this opportunity to gain experience.

But since things became urgent, Liu Yan decided to take action to avoid more trouble.

The European Federation team stalling tactics were useless against Liu Yan.

Liu Yan, who could fly and had powerful offensive capabilities, could easily break through their line of defense.

Liu Yan flapped his Wings of Wind God and arrived at a low altitude in the blink of an eye.

Members of the Land of Origin team were moving forward. From time to time, they would be attacked by the members of the European Federation team. They could only defend while moving forward, which slowed down their speed.

Many team members noticed that Liu Yan was flying at a low altitude. The depressed atmosphere immediately turned for the better.

“Captain Liu is watching us fight. We can’t perform badly!”

“Look at you. If you’re afraid of dying, hurry up and move forward.”

“That’s right. The time of this battle is critical. We can’t slow down the speed of the battle because we’re afraid of getting injured!”

“The sooner we get ashore, the sooner we finish off the European Federation team!”

“I can’t let Captain Liu down!”

...

Members of the Land of Origin team were extremely excited.

Although the members of the New Continent team and the Pan-ocean Community were not as excited, they became more serious when they noticed Liu Yan’s arrival.

Although Liu Yan wasn’t their team captain, they had already started to admire him after spending so much time together.

At the same time, the captain of the European Federation team, Hans Wilson, saw Liu Yan’s arrival again and couldn’t help but worry.

“Liu Yan isn’t planning to attack us, right? If he does, we’ll be in trouble. It won’t be good to delay any longer.” Hans Wilson couldn’t help but worry.

The vice-captain, Derick Dole, heard this and said, “He’s just one person. His attacks are limited. He can’t single-handedly wipe out our entire team. We will be fine.”

“I have a bad feeling about this.” Hans Wilson shook his head slightly.

Derek Dole still didn’t look too worried. He smiled and said, “Captain, don’t worry. I’ve just communicated with the captain of the Red Star Empire’s team, Ye Yifan. They’re speeding up their progress and will be able to finish off all the monsters very soon. From what they’re saying, I don’t think they’ll send reinforcements over. Instead, they’ll go to the fire attribute territory and launch a surprise attack. As long as they destroy the core of the fire attribute territory, we’ll be able to eliminate the Land of Origin team!”

Hans Wilson’s eyes lit up. “I did not think of such a method. It’s a good idea. This way, we can defend against the Land of Origin team and eliminate them at once. It’s killing two birds with one stone. It looks like we’ll have to delay and defend. We must do our best to delay the Land of Origin team!”

“It’s fine. Don’t we still have the guardian beast? It’ll probably be able to delay it for a long time.” Derek Doyle said with a smile.

Hans Wilson didn’t say anything more. He just stared at Liu Yan, who was high in the sky in the distance and observed his every move.

The water attribute territory indeed had another trump card, and that was the water attribute territory’s guardian beast.

However, Hans Wilson naturally did not intend to use their guardian beast until the last moment. After all, if the Land of Origin team defeated their guardian beast, they would be eliminated.

At this moment, Liu Yan was ready to make his move.

Another group of members of the European Federation team emerged, planning to attack the team members of the Land of Origin team in the lake regardless of their injuries.

At this moment, Liu Yan made his move.

Liu Yan's flying speed was terrifying. In the blink of an eye, he arrived in the sky above the temporary camp of the European Federation team.

However, Liu Yan didn't stop and rushed over.

He activated the God's Effect of his SSS-grade special equipment, the Wings of Wind God, Gale Force!

Under the violent speed, it affected the surrounding wind elemental power.

Two massive green tornadoes appeared and quickly attacked the ground.

The speed of tornadoes was fast. They instantly attacked the team members of the European Federation on the ground.

Under the powerful wind attribute energy, a terrifying cutting effect was produced. These team members were knocked down one by one, and wounds appeared on their bodies. They were all seriously injured and had lost their combat ability completely!

However, the two green tornadoes did not stop. They only stopped when they hit the ground, leaving two deep marks on the ground.

The huge depression was as deep as several people's height, showing how terrifying the power of the wind was!

When Liu Yan saw the effects of this attack, he was a little surprised.

During the attack, Liu Yan didn't use his full strength. He didn't use the full power of Gale Force. But even so, it still possessed such terrifying power.

Fortunately, Liu Yan did not directly attack the members of the European Federation team with Gale Force. He only passed by and attacked the members of the European Federation team in the aftermath.

If it were a direct attack, the powerful wind attribute energy would probably split the European Federation team in half and kill them on the spot.

Even if Liu Yan missed his attack, the members of the European Federation team were seriously injured and lost their combat effectiveness!

It seemed that the attack effect of Gale Force was more powerful than Liu Yan had expected. It was worthy of being Gale Force that could easily cut through mountains!

Liu Yan's attack with Gale Force also made the dozen or so members of the European Federation team lose their fighting strength completely.

**Chapter 477: Despair**

Members of the Land of origin team behind him exclaimed in surprise when they saw this.

“D\*mn, Captain Liu has made his move. That’s too powerful!”

“As expected of our team captain. He annihilated more than a dozen of the opponents in one go!”

“Isn’t his combat strength a little too exaggerated?”

“A few more hits and all the members of the European Federation team will be finished, right?”

“I feel like Captain Liu alone is enough to wipe out the European Federation team.”

“That’s right. His combat strength is too terrifying.”

“I feel like captain Liu’s strength has increased quite a bit.”

...

Members of the New Continent team and the Pan-ocean Community team were also surprised. They did not expect Liu Yan’s combat power to be so terrifying.

When Murong Xue saw this, she instantly put down her shield and heaved a sigh of relief. “Let’s see how the bastards from the European Federation team fight back!”

Allen Smith looked at Liu Yan with a strange look in his eyes. It seemed Liu Yan’s combat strength had improved during this period. The way this guy improved his combat strength was too fast. Allen Smith had no idea how Liu Yan did it.

Zheng Tainan, Liu Qing, and Liu Ning were originally in a sorry state under the attacks of the members of the European Federation team. They even suffered some minor injuries.

Seeing Liu Yan kill more than a dozen members of the European Federation team in one hit, they were relieved.

“It’s a good thing that boss is here. We can relax all of a sudden.” Liu Qing said happily.

“Yeah. It’s so relieving to have such a captain.” Liu Ning was also smiling.

Zheng Tainan scratched his head. He could not understand why he had the guts to provoke Liu Yan back then.

Liu Yan’s strength was too terrifying. Liu Yan could have killed him if Liu Yan wanted to.

Previously, Zheng Tainan wanted Liu Yan to pay after Liu Yan snatched his S-grade cultivation herb, the Angry Buddha Purple Lotus.

But now, Zheng Tainan was rejoicing. It was fortunate that Liu Yan did not pursue the matter further. Otherwise, he would probably be finished.

Zheng Tainan did not mind losing Angry Buddha Purple Lotus anymore.

During this period of training on the fifth level of the Tower, under the leadership of Liu Yan, the members of the Land of Origin obtained many high-grade cultivation medicinal herbs.

As for Zheng Tainan, he was the expert in the team, so he got more cultivation material.

Zheng Tainan had obtained many A-grade cultivation medicinal herbs. He had even gotten a few S-grade cultivation medicinal herbs.

Angry Buddha Purple Lotus was nothing compared to the high-grade cultivation herbs he had just obtained.

At the same time, Chu Long and the others were overjoyed when they saw Liu Yan defeat more than a dozen members of the European Federation team. Liu Yan had singlehandedly changed the situation on the battlefield.

“That’s great! Brother Liu Yan has made his move! Our team members won’t get injured anymore!” Chu Long said happily.

Members of the European Federation team were only trying to buy time. Hence, most of their attacks would not cause too much damage to the members of the Land of Origin team. They were only slightly injured and would be healed quickly under Chu Long’s treatment.

However, the team members could still feel pain even though Chu Long could heal them.

Chu Long’s heart ached when she saw her team members getting injured.

Luo Qingcheng felt relieved, “We’ll be able to defeat the European Federation team very soon. We don’t have to worry about our camp being ambushed.”

Among them, Xu Han was the most surprised.

Xu Han was an expert in frost attribute attacks. He could tell Liu Yan’s attack was a wind attribute attack, and it was a strong and pure wind attribute attack.

The wind and frost attributes were both high-level attributes. There were very few awakened ones who could learn high-level attributes, let alone master them to this extent.

Xu Han looked at Liu Yan in surprise and immediately understood. It must be the equipment Liu Yan got from the diamond treasure chest. It was why Liu Yan had such a strong wind attribute ability.

In that case, Liu Yan’s combat strength would undoubtedly be extremely exaggerated. The upcoming fights would naturally be much easier.

Xu Han looked at the team members behind him and said, “Alright, let’s all take a break. Our captain is in killing mode. There’s nothing for us to do.”

Liu Yan’s attack just now could easily defeat more than a dozen members of the European Federation team.

The dilemma on the battlefield was instantly resolved.

Meanwhile, on the island in the middle of the lake, in the temporary camp of the European Federation team.

Hans Wilson arranged for his severely injured team members to receive emergency treatment.

After the vice-captain, Derick Dole, was done, he returned to the room. He said with an unsightly expression, "Their lives aren't in danger, but their injuries are too severe. With the abilities of our priests, they won't be able to recover without a few days. They won't be of any use in this battle.

Hans Wilson had an extremely gloomy expression on his face.

As a result, the European Federation team lost too much combat power.

The already difficult situation became even worse.

Initially, they had adopted the same combat method as before. Batch after batch of team members would be injured in the process of blocking the members of the Land of Origin team.

However, their overall injuries were not serious. With their priests' treatment, even if they did not recover completely, they could at least recover more than 50%.

This way, the same group of team members could block the attacks many times and effectively delay the Land of Origin team.

However, with Liu Yan severely injured more than ten of their team members with his overwhelming combat power. There was no way they could continue this battle.

If they continued with the previous battle plan, it would not take long for all of them to be seriously injured by Liu Yan.

By then, the European team would have been defeated before the ordinary members of the Land of Origin team could even reach the island.

"No, we can't continue with this kind of battle plan. We're just sending our team members to death!" Hans Wilson thought for a while and shook his head.

Although he had let his team members be injured before, it was all within a controllable range.

If they continued to fight Liu Yan like this, their team members would be seriously injured, and their lives would be in danger. Hans Wilson would not let his team members become cannon fodder for nothing.

Derek Dole's face turned gloomy. "Then what should we do? We have no other way."

"We can only hide for now and think of other ways." Hans Wilson sighed and said helplessly.

When Derek Dole heard this, he immediately contacted the Red Star Empire team.

### **Chapter 478: Last Fight**

As Hans Wilson looked up at the god-like Liu Yan in the sky, he suddenly felt powerless.

Hans Wilson became the captain of the European Federation team not only because of his outstanding commanding ability but also because he was a genius with extraordinary combat strength.

However, in the face of existence like Liu Yan, Hans Wilson knew very well that he was no match for Liu Yan with his strength.

He couldn't even fight Liu Yan's attack just now. If ordinary team members fought Liu Yan, they would be seriously injured or even in life-threatening danger. Hans Wilson would not be any better.

Hans Wilson knew his strength.

Hans Wilson thought about it carefully, but there was no feasible way.

In the face of absolute strength, all strategies seemed powerless.

Faced with the Land of Origin team, which had three times their number and better conditions and combat effectiveness, the European Federation team was powerless to resist.

The battle between the top players had not even begun, but Hans Wilson knew he would lose without a doubt.

Previously, Hans Wilson worried Liu Yan, who could fly, would ruin their plan if his long-range attack ability was strong.

However, Hans Wilson did not expect Liu Yan to be even more terrifying than he had imagined. Liu Yan's combat strength was incredible.

At this time, the vice-captain, Derek Dole, also rushed over. He said helplessly, "Captain, I've contacted the Red Star Empire team. They're already rushing their progress but have not cleared the monsters yet. It seems they won't be able to send reinforcements in time."

Hans Wilson sighed and said, "Forget it, forget it. It seems like I can only rely on myself this time. Pass down the order. All the ordinary members stay in the territory and defend. Don't make any unnecessary sacrifices. All experts, prepare to fight with me!"

Hearing this, Derek Dole immediately understood what Hans Wilson meant.

It seemed like he was going to activate that skill.

"Are we going to use that move? Isn't that too risky?" Derek Dole hesitated for a moment before he asked.

That move was indeed powerful. However, they were no longer able to fight after they used it.

It would be difficult for them to be of much help in the subsequent battles between the Land of Origin team and the European Federation team.

The ordinary members of the European Federation team would not be able to stop so many awakened ones from the Land of Origin team. The difference in strength between the two sides was too great.

At this time, Hans Wilson stared at Liu Yan in the sky with a helpless expression.

"There's no other way. Liu Yan can fly and has powerful attack abilities. He alone is enough to annihilate our team. Only our experts can fight with him. After that, we'll let the ordinary members try to delay their team as much as possible. Perhaps there's still a chance for us to delay until the Red Star Empire team arrives." Hans Wilson analyzed with a stern expression.

Hearing this, Derek Dole immediately felt that it made sense.

It seemed like a loss to the European Federation team. They had to use their experts to fight Liu Yan. If they did not do it, all the members of the European Federation team would be suppressed and suffer even more damage.

If they continued to defend, they would not be able to hold on for long under Liu Yan's attack. If that happened, the entire European Federation team would be eliminated.

If they succeeded, they might have a chance.

Derek Dole said sorrowfully, "Our team is ranked at the top among five teams, but I didn't expect we would end up like this. We were so high-spirited when we first entered the fifth level of the Tower. Now, we're struggling with all our strength just to not get eliminated.

When Hans Wilson heard this, his face was filled with bitterness.

When they first entered the fifth level of the Tower to begin their trial, Hans Wilson was proud and arrogant. Members of the European Federation team were in high spirits. They were aiming for the reward of first place and did not think much about advancement. They naturally thought that they could advance without any problem.

However, it became challenging for them to advance now, let alone obtain the rewards for the top two teams.

The European Federation team was at risk of being eliminated at any time. They had to give their all to have a chance of not being eliminated.

And all of this was because of Liu Yan.

Hans Wilson looked at Liu Yan, who was high in the sky and sighed. "Why wasn't such a person born in our European Federation? It's truly fortunate for the Land of Origin to have such a talented student this year."

Hearing this, Derek Dole agreed, "Liu Yan is indeed powerful. He's the main reason the Land of Origin team managed to break out of their predicament and make it to where they are today."

"Go and prepare. It's time for a desperate fight." Hans Wilson said indifferently.

"Yes!" replied Derek Doyle.

Immediately after, Derek Doyle went to the European Federation team and conveyed an order. All ordinary members were to stand by and defend. They did not need to show their faces and did not need to care about any opponents outside.

The experts of the European Federation team were gathered one after another, ready to follow their captain, Hans Wilson, for the final battle!

At the same time, Liu Yan looked down at the temporary camp of the European Federation team.

Seeing that they still didn't have any reaction, Liu Yan couldn't help but feel a little suspicious.

There was no point in resisting anymore, so why didn't the members of the European Federation team surrender?

Did they want to continue fighting and only increase the number of casualties?

Liu Yan shook his head helplessly and hoped that the members of the European Federation team would not be so irrational. If they forced Liu Yan to take action, it would only cause more meaningless casualties.

Liu Yan came to the temporary camp of the European Federation team alone. He shouted, "Everyone from the European Federation team, although we are competitors, we are still humans of the Blue Planet. We know how the battle will end. There is no need to continue the meaningless struggle and increase the casualties, right? Do you want to fight to the death? Why do you have to do this? You've already lost."

The members of the European Federation team felt a little sad when they heard this.

Even though Liu Yan's words were unpleasant to hear, he was telling the truth.

The members of the Land of Origin team had rested and recuperated. Hence, their combat strength and condition were better than theirs.

In terms of numbers, the Land of Origin team was almost three times that of the European Federation team.

Even the terrain advantage of the water attribute territory was meaningless in front of Liu Yan's flying ability and powerful AOE attack.

If this battle continued, it would only cause more casualties to the European Federation team.

However, team members of the European Federation team still had no intention of giving up.

They were born in the European Federation and received superior resources from a young age. They had undergone more rigorous training and naturally possessed stronger strength.

The European Federation team's strength could be ranked in the top two among the five continents.

In terms of self-confidence, the European Federation was well-deserved to be first.

The members of the European Federation team were all proud and arrogant, and they were not willing to yield to others.

Even though their defeat was already set in stone, as long as their Captain, Hans Wilson, did not order them to give up, none of the team members were willing to give up. They would fight until the end and until only one team member was left!

#### **Chapter 479: Powerful Combination Skill, Silver Moon**

"Don't even think about making us surrender!"

"We're the European Federation team. We can't surrender."

"You want us to surrender? Dream on!"

“Either you kill me or shut up.”

“We are not cowards. We won’t surrender easily.”

...

Members of the European Federation team were suppressed to the point where they could only defend and could not fight back. However, they were still unyielding in the face of absolute power and the face of a doomed defeat.

Liu Yan was a to see this. He didn’t expect the members of the European Federation team to be so unyielding.

For a moment, Liu Yan even admired the members of the European Federation team. With such determination, these members would become extraordinary and strong in the future.

Many factors were needed for an awakened one to become strong, including talent, hard work, luck, and so on.

Among them, the most important thing was to have a firm heart.

However, no matter how much Liu Yan admired them, the battle had to continue. He had to defeat the European Federation team.

They would surrender, or Liu Yan would beat them all up until they were seriously injured or even killed!

“Since you guys are so unyielding, don’t blame me for being merciless.” Liu Yan shook his head helplessly.

As he spoke, Liu Yan took out his S-grade weapon, the Flying Cloud Mystic Bow, and prepared to attack.

At this moment, Liu Yan was directly above members of the European Federation team. His position was undoubtedly the most suitable for attacking. When members of the European Federation team faced Liu Yan’s attack, they would not avoid it.

At this critical moment, Hans Wilson and Derek Dole walked over with five other people.

“Captain Liu, thank you for your kindness, but I don’t think we’ve lost yet. We still have to fight to the end. After all, this concerns our advancement, so we can’t be careless.” Hans Wilson laughed.

It was Liu Yan’s second time seeing Hans Wilson. The last time they met was when they had just arrived on the fifth level of the Tower. Hence, they were not familiar with each other.

Liu Yan couldn’t help but observe Hans Wilson.

Hans William was tall and strong, with short golden hair and a burly figure.

He was fierce but calm at the same time. He was a person with a rough yet refined temperament.

At this moment, Liu Yan also frowned slightly, feeling something was wrong.

The six people led by Hans Wilson were not ordinary people. They were all experts.

Liu Yan used his S-grade perception skill, Omniscient Insight. He could sense that the seven people led by Hans Wilson were the top seven experts in the European Federation team.

Hans Wilson suddenly gathered all these experts together. He was up to something.

At this moment, Liu Yan was alone in the enemy's camp, which was not good for him.

Especially since Liu Yan was the captain of the Land of Origin team, he should not be in this position. It was too risky and went against the common sense of command theory.

However, Liu Yan did not care much about that because he was confident in his own strength.

Especially with the Wings of Wind God, Liu Yan's mobility had become even more exaggerated, so he was naturally not afraid of danger.

Because of this, even though Liu Yan felt that something was amiss and that there might be a danger, he did not retreat.

At this time, Luo Qingcheng was observing Liu Yan's situation at the back. She could not help but feel a little worried.

"Liu Yan's position is too deep. He might be in danger. He's too close to the European Federation team and not at a high altitude. It's too dangerous to be at a low altitude." Luo Qingcheng was worried.

Chu Long was a little worried. "Then what do we do? We're too far away from Brother Liu Yan right now. We can't notify him to come back."

Xu Han heard this and laughed, "Don't worry. Liu Yan is terrifyingly strong now. No one can hurt him on the fifth level of this Tower."

Even so, Xu Han still did not know how powerful Liu Yan was, and he was not sure if he had used all his strength last time.

Based on Xu Han's current understanding, he was sure that Liu Yan's strength had surpassed his level.

On the fifth level of the Tower, Xu Han was sure that no awakened ones or beasts could hurt Liu Yan.

Hearing Xu Han's words, Luo Qingcheng and Chu Long were relieved.

"That's good. I hope he's fine."

"I hope Brother Liu Yan is fine."

At this time, the team members of the Land of Origin were approaching the temporary camp of the European Federation team without any interference. At the same time, they looked at Liu Yan in the distance curiously. They were curious about what their captain was trying to do by being so close to the temporary camp of the European Federation team.

"What's Captain Liu doing? It won't be dangerous to be so close, right?"

"Captain Liu is so strong. He shouldn't be in any danger, right?"

"That's right. He's so fast. He won't be able to touch the captain even if he's in danger."

“Captain Liu seems to be negotiating with the people from the European Federation team. He seems to be trying to persuade them to surrender.”

“I don’t think we should. We are so much stronger than them. We should crush them.”

“That’s right, we’ve crushed them with our strength. As long as we get on land, we’ll take care of all the members of the European Federation team in half an hour!

...

At this moment, Liu Yan was calmly looking at Hans Wilson and the others on the ground.

Liu Yan knew what the other party was planning, but he wasn’t afraid. He waited patiently. It was the confidence he had in his strength.

On the ground.

“How is it, Captain?” Derek Dole asked in a low voice. “He’s flying at a very low altitude right now, so we have a good chance. But once he flies higher, we won’t have a chance anymore.”

Hans Wilson felt a little uneasy, and he had a bad feeling.

But he couldn’t figure it out no matter how he thought about it, so he stopped thinking and ordered in a low voice, “Do it!”

With Hans Wilson’s order, the seven people led by Hans Wilson instantly began to move.

The seven top experts of the European Federation team spread out and went to different positions. Their positions seemed messy, but they must be up to something.

In the next moment, the aquamarine light of the water attribute around Hans Wilson’s body glowed brightly, and he punched the ground.

The other experts around him also cooperated.

Suddenly, a strange and complicated formation appeared on the ground.

In the sky, a silver moon appeared, and a powerful beam of light shot toward Liu Yan.

Liu Yan was already on guard. When he noticed it, he quickly dodged.

However, Liu Yan realized that the beam of light was too fast. Even with his flying speed, he was unable to dodge it.

In a moment of desperation, Liu Yan did not hesitate and immediately activated his S-grade skill, Sonic Speed.

With his speed at 16 times the speed of sound, Liu Yan’s speed received a terrifying boost. In the next instant, he disappeared from his original spot, dodging the attack.

After the terrifying attack was missed, it landed on the ground, creating a bottomless hole.

**Chapter 480: Exasperated**

Seeing this, Liu Yan was secretly shocked.

This light wave looked rather ordinary. One could not even sense too much terrifying power from it.

However, Liu Yan's S-grade Omniscient Insight allowed him to sense that the light beam was dangerous.

Even with Liu Yan's extraordinary defensive power, he could not withstand it.

If he got hit, he would be seriously injured!

Liu Yan was surprised. He didn't expect Hans Wilson and the others to have mastered such a skill.

It was the first time Liu Yan had seen a combination skill. It was rumored that a combination skill required a few people to be proficient with the skill. It needed a long time of practice and cooperation to use it in actual combat successfully.

A combination skill with such strict requirements would naturally have a terrifying power.

The combination skill gathered the power of a few people through a special method. When it was gathered, it was not a simple addition of power. It was a terrifying power that exceeded their levels! It was extremely powerful.

If Liu Yan had not dodged with all his might, he would have really lost this time.

Liu Yan couldn't help but feel a little tempted. It would be great if he could obtain such a powerful combination skill.

Liu Yan's strength was strong, so he naturally didn't need such a combination skill. However, the experts and ordinary members under him still needed it.

If they had this combination skill, they wouldn't have been so helpless against Moonshine Qilin earlier.

With this combination technique, the power of Zheng Tainan and the other experts would be gathered through this special method. It would be an extremely terrifying attack!

Liu Yan secretly took note of this in his heart. He would have to see if he could get combination skill from Hans Wilson and the others.

If they could get their hands on these combination skills, they would be able to improve the combat strength of the ordinary members and the experts of the Land of Origin team.

At the same time, Hans Wilson and the others felt helpless when they saw that their combination of trump cards couldn't do anything to Liu Yan.

It was their trump card, a powerful S-grade combination skill.

The power of S-grade skills was already extremely terrifying, and they were rare combination skills. The combined skill, Silver Moon Secret Skill, was fast and powerful when the seven people activated it.

Logically speaking, none of the awakened ones on the fifth level of the Tower should be able to dodge this attack.

However, Liu Yan could dodge it in an almost impossible manner. It was unbelievable.

The failure of this attack also meant that the European Federation team had lost their last chance.

Initially, Hans Wilson had wanted to use this trump card skill to severely injure Liu Yan and make him lose his combat ability.

Without Liu Yan on the other side, the seven would have to use the energy within the radiant body. They would not be able to fight for a short period. It was equivalent to exchanging the seven of them for Liu Yan.

However, it was worth it. Without Liu Yan, the ordinary members of the European Federation team could stick to their previous battle plan. They could rely on the advantageous terrain and sacrifice the team members to delay the attack of the Land of Origin team. They still had a chance to last until the reinforcements of the Red Star Empire team came.

However, Hans Wilson did not expect that they would fail.

Such a powerful combination skill, an existence that surpassed his level, was still dodged by Liu Yan.

“How is this possible? No awakened ones on the fifth level of the Tower can avoid Secret Moon.” The vice-captain, Derick Dole, shouted in disbelief. He couldn’t accept the truth.

Hearing that, Hans Wilson sighed and said, “It’s obvious that Liu Yan has also surpassed the fifth level of the Tower. He’s already invincible on the fifth level.”

Derek Dole was stunned when he heard this. He looked at Liu Yan in the sky in disbelief.

He knew that Liu Yan was stronger than all of them. However, he did not expect Liu Yan to be so powerful.

The surrounding experts had used up all their energy and were sitting on the ground, exhausted. They had lost all their combat power.

Compared to their physical fatigue, their mental suffering was even more painful.

Despite using all their strength, Liu Yan still dodged their ultimate skill. All his efforts were in vain.

“I didn’t expect Liu Yan to be so powerful.”

“Someone with strength that surpasses the Tower’s level ... Such a person probably won’t appear even once in a few decades, right?”

“He’s too powerful. I didn’t expect that we would meet such an opponent.”

“It seems like the European Federation team will be eliminated.”

“Sigh, I can only work harder next year. I won’t have the chance this time.”

“I’m helpless against an opponent like Liu Yan. I have no way to deal with him.”

...

The few experts were all depressed. They had already given up.

They had no choice but to give up. The powerful S-grade combination skill, Silver Moon Secret Skill, had already exhausted all their energy and strength.

At this moment, they had lost their combat power. The experts were not a match for Liu Yan, let alone the ordinary members.

The surrounding ordinary members of the European Federation team were dejected when they saw their Captain and the other experts' last desperate attack fail.

Even the combined might of these experts was no match for Liu Yan, let alone them.

Even these couldn't defend themselves against Liu Yan's attacks.

Hans Wilson sighed helplessly and said, "We have no other choice. We can only give up and accept our fate."

Vice-captain Derick Dole was extremely unwilling at this time and shouted, "No, I don't believe that our entire team can't take down Liu Yan. Sea Emperor Turtle, come out and fight! All members, activate your long-range attacks and attack Liu Yan together!"

Under Derek Dole's orders, all the ordinary members of the European Federation team cast spells one after another. They were ready to launch long-range attacks to attack Liu Yan.

At the same time, the water surface around the island in the lake suddenly fluctuated. The next moment, a huge sea turtle appeared and charged toward Liu Yan.

In front of the giant turtle, Liu Yan seemed tiny, like an ant.

However, Liu Yan did not panic in the slightest, as if he had already expected this.

Before the battle began, Liu Yan had already used his S-grade perception skill, Omniscient Insight. He sensed Sea Emperor Turtle, the guardian beast of the water attribute territory, was hiding under the water.

Sea Emperor Turtle had suppressed its aura and power fluctuations to the best of its ability. With the obstruction of the water's surface, ordinary people could not detect it at all.

However, Liu Yan's Omniscient Insight was a powerful perception skill. After it was upgraded to S-grade, his sensory ability received a terrifying upgrade. Naturally, he could sense everything clearly.

When Liu Yan saw Sea Emperor Turtle. He smiled and said, "You've finally shown yourself!"

Liu Yan had been waiting for Sea Emperor Turtle to appear.

They could win the battle at once if they defeated the Sea Emperor Turtle in the water attribute territory. Members of the Land of Origin team would not have to come to the island and defeat the European Federation team, which would save a lot of trouble.

However, Sea Emperor Turtle was hiding at the bottom of the water. It was hard to predict what would happen under the water, so Liu Yan could not go too deep.

Furthermore, his combat strength would be greatly reduced if he went underwater. Liu Yan, who was not proficient in water attribute power, naturally could not go underwater. He could only wait for Sea Emperor Turtle to appear.

Now that Sea Emperor Turtle had finally appeared, it was convenient for Liu Yan to make a move.
