Chapter 481: Scare off Sea Emperor Turtle?

The Sea Emperor Turtle was the guardian beast of the water attribute territory and was extremely powerful.

However, Liu Yan could deal with the powerful guardian beast alone. He had made great progress in his strength during this period.

Liu Yan didn't even open his eyes to look at the long-range attacks from the European Federation team's team members.

An attack of this level would naturally not be able to hit Liu Yan.

With a flap of his Wings of Wind God, Liu Yan did not even need to use his S-grade skill, Sonic Speed. He suddenly appeared tens of meters away, easily dodging the all-encompassing long-range attacks.

Compared to the powerful combination skill displayed by Hans Wilson and the other seven, these attacks were too slow, and they couldn't hit Liu Yan.

As Liu Yan dodged the attack, he looked at the giant Sea Emperor Turtle and grinned.

The guardian beasts were powerful, especially the Sea Emperor Turtle. It was a powerful beast of the water attribute and was extremely good at defense.

It was rare to see such a powerful sandbag.

Liu Yan could use this opportunity to test out the power of his newly acquired SS-grade skill, Flame Blast!

On the ground.

Vice-captain of the European Federation team, Derek Dole, was on the verge of going crazy.

As the vice-captain of the European Federation team, he had always been proud. He could not accept that the European Federation team was about to be eliminated.

"We won't be eliminated. We still have our guardian beast. Sea Emperor Turtle's defense is so strong. It will be able to hold them back until the reinforcements from the Red Star Empire's team arrive!" Derek Dole said with a crazed look.

Seeing this, Hans Wilson shook his head helplessly.

Sea Emperor Turtle, the guardian beast of the water attribute territory, had a sturdy defense. However, its attack power was relatively limited. It probably would not be able to pose a threat to Liu Yan and the others.

No matter how strong its defense was, how could it withstand the siege of Liu Yan and the members of the Land of Origin team?

Even though Hans Wilson was unwilling, he had already recognized the situation and given up.

On the other side, Allen Smith, Murong Xue, and other experts saw the appearance of the Sea Emperor Turtle. They all moved closer and prepared to attack it together.

After all, the Sea Emperor Turtle was a powerful guardian beast. It would be difficult for one person to deal with it.

If they could defeat Sea Emperor Turtle, they would end the battle and eliminate the European Federation team!

Just as experts were about to approach and help, the Sea Emperor Turtle had already launched an attack on Liu Yan.

A huge water pillar shot toward Liu Yan. It contained a terrifying water elemental power and impact.

With the Wings of Wind God, Liu Yan's flying speed was swift. He was agile, easily dodging the attacks.

As he dodged, he also launched a counterattack.

He activated the SS-grade skill, Flame Blast!

A large amount of fire elemental power in the surroundings was quickly condensed and compressed.

In a short while, a large amount of fire elemental power condensed into a small ball.

Liu Yan was secretly shocked. The power of Flame Blast had exceeded his expectations.

With so much fire elemental power being condensed to such an extent, it would burst out with an extremely terrifying power.

The most ridiculous thing was that ordinary people would not be able to detect the power of Flame Blast.

Liu Yan could sense the terrifying power within Flame Blast even with his S-grade skill, Omniscient Insight.

Liu Yan could sense the terrifying power contained within it with the help of the Fire Secret Art and the fact that it was a skill he had used himself.

The other awakened ones in the surroundings did not realize Liu Yan had used such a powerful skill.

Not only did Flame Blast seem powerful, but it was also low-key and reserved.

This way, the terrifying Flame Blast could be used as a surprise attack.

Flame Blast seemed underwhelming and weak. Ordinary opponents would let their guard down.

If they let their guard down, they would inevitably face tragic consequences.

It was the current situation.

Liu Yan could sense the terrifying power within Flame Blast, but the awakened ones on the ground remained calm. They had not realized how powerful Flame Blast was.

On the other hand, Sea Emperor Turtle seemed to have realized the power of Liu Yan's Flame Blast. It revealed a fearful expression and quickly dodged, distancing itself from Liu Yan.

A guardian beast was scared away by Liu Yan's attack alone!

Derek Dole, who was on the ground, realized that the Sea Emperor Turtle was trying to retreat and escape. He was puzzled. "What's going on? Sea Emperor Turtle is so strong, especially its defense. Why is it afraid of Liu Yan?"

Hans Wilson was also puzzled. The skill that Liu Yan used seemed to be an ordinary fire attribute attack skill.

However, Hans Wilson immediately noticed that something was wrong.

It was impossible for an attack launched by an existence like Liu Yan to be so weak that Hans Wilson could not sense the energy fluctuations.

Hans Wilson sensed carefully again and immediately discovered that Liu Yan's attack did not have the slightest energy fluctuation.

Hans Wilson became worried.

"Liu Yan's attack is unusual. It seems like Sea Emperor Turtle is no match for Liu Yan. It retreated before the battle even began." Hans Wilson said with a sigh.

"How is this possible? It is our guardian beast, Sea Emperor Turtle. Why is it so afraid of Liu Yan?" Derek Dole was puzzled.

The members of the European Federation team were also confused when they saw Sea Emperor Turtle retreat from Liu Yan's attack before it even started fighting. They could not understand what was going on.

At the same time, the situation of the Land of Origin team was similar.

"What's the situation? Sea Emperor Turtle hasn't even started fighting yet. Why is it already so afraid of our captain?"

"Haha, this is too funny. It's cowering before the battle even started."

"Isn't this Sea Emperor Turtle too cowardly?"

"Is there a possibility that it's not Sea Emperor Turtle too cowardly, but our captain is too powerful?"

"Captain Liu is awesome. He scared off their guardian beast, Sea Emperor Turtle before he even made a move! Haha!

"Of course! Our captain had defeated a guardian beast by himself!

...

Although the ordinary members of the Land of Origin team did not understand what was going on, they knew how powerful Liu Yan was. They guessed that Sea Emperor Turtle knew of Liu Yan's terrifying strength and did not dare to fight him head-on, so it retreated.

The team members were instantly overjoyed. They didn't expect this battle to be so simple after Liu Yan's intervention. They had almost nothing to do with it.

Chu Long couldn't help but sigh, "Brother Liu Yan, you're so powerful! You scared Sea Emperor Turtle away. Is it so cowardly?"

Chapter 482: Heavily Injured in One Strike

Xu Han's face darkened. He said, "Liu Yan's attack is not as simple as it looks. On the contrary, it's a powerful skill. Sea Emperor Turtle was not afraid but couldn't withstand Liu Yan's attack, so it retreated."

Xu Han was an expert in attribute skills and was a genius among geniuses. Naturally, he could discover things that ordinary people could not.

Xu Han did not know how terrifying Liu Yan's attack was, or how much attribute energy it contained.

However, Xu Han could sense that a large amount of fire attribute energy was gathering around Liu Yan. It disappeared when it reached Liu Yan.

The reason for this was obvious. Liu Yan's attack could conceal the fluctuations of elemental energy, making it impossible for ordinary people to discover the power of his attack.

Only existences with extremely high cultivation bases could sense it, and Sea Emperor Turtle was one of them.

The water-attributed Sea Emperor Turtle was extremely sensitive to the fire attribute energy. Naturally, it could sense the terrifying power of Liu Yan's attack, which was why it retreated in fear.

Liu Yan's attack was too powerful, which was why the Sea Emperor Turtle was in such a state.

Xu Han was shocked. He did not expect Liu Yan's mastery of the fire attribute energy to have reached such a level. Not only could he compress the fire element, but he could also hide the energy fluctuations.

Even Xu Han had not been able to do that.

Xu Han felt helpless. He did not expect Liu Yan to surpass him in the field he was proficient.

Liu Yan was too terrifying. Not only was he powerful, but he was also proficient in all aspects. Furthermore, the speed at which his strength was increasing was extremely fast, causing these so-called top geniuses to shrink back in fear.

At this moment, Liu Yan launched his attack.

A pillar of fire was formed by the accumulation of a large amount of fire elemental power. It was only half the size of a man. It attacked the Sea Emperor Turtle.

The pillar of fire was only half the size of a person and looked small, especially compared to the Sea Emperor Turtle size of a small mountain.

In reality, Flame Blast contained a large amount of fire elemental power.

This large amount of fire attribute energy was compressed together and contained a terrifying power.

Once it hit, it would explode instantly, producing a terrifying explosive force.

Before it hit its target, Flame Blast appeared to be an ordinary attack.

Sea Emperor Turtle was terrified when it saw Flame Blast coming at it.

However, Sea Emperor Turtle was massive and was not good at speed, so it was slow to dodge.

Flame Blast looked slow, but it was fast. The angle was so tricky that Sea Emperor Turtle could not avoid it.

The next moment, the Flame Blast hit Sea Emperor Turtle.

The surrounding air went silent. The next moment, a terrifying fire elemental power burst from Sea Emperor Turtle's body.

The entire lake was turned upside down by the huge explosion, causing huge waves.

The ground around them was also shaking.

Under the terrifying explosive force, the waves around Sea Emperor Turtle were sent tens of meters high, completely covering the Sea Emperor Turtle.

The surrounding awakened ones were all shocked. They did not expect Liu Yan's attack to be so powerful and to be able to produce such a terrifying force.

In the temporary camp of the European Federation team.

Members of the European Federation team went through the shaking ground in fear.

It was the first time they had seen an awakened one's attack with such an exaggerated effect.

Such a terrifying attack effect was like a small nuclear bomb from the old era. It was ridiculously strong.

At the same time, the members of the European Federation team were also in despair.

Initially, they had already felt that there was no chance at all. However, they saw the Sea Emperor Turtle take action under the orders of their vice-captain, Derek Dole. They immediately reignited their last trace of hope.

Sea Emperor Turtle was powerful and good at defense. It could stall Liu Yan and the other members of the Land of Origin team. They might still have a chance.

However, their last hope was extinguished after Liu Yan used his terrifying attack.

Sea Emperor Turtle would not be able to withstand such a terrifying attack for long. It would be taken down soon.

The elimination of the European Federation team was unavoidable.

After working so hard for so long, they still failed here. The team members all had helpless expressions.

Derek Dole finally understood what Hans Wilson had meant.

Liu Yan's attack was indeed weird.

"Why is Liu Yan so powerful? Even a casual attack could have such terrifying power. He is here to train, but his strength has already far exceeded that of the fifth floor. It is not a strength that an awakened from the fifth floor should possess!" Derek Dole said angrily, but he couldn't do anything to Liu Yan.

When Hans Wilson heard that, he smiled helplessly and said, "In this vast world, there's always someone better than you. This time, we've gained some experience. We'll have to work even harder in the future to catch up with this kind of existence.

Although Hans Wilson said this, he knew very well that no matter how hard they tried, they would not catch up to Liu Yan, who was a heaven-defying figure. There was nothing Hans Wilson could do. The difference between strength and talent was just too great.

When the gap was large enough, it was naturally impossible to reduce the difference with hard work.

On the other side, members of the Land of Origin team, the New Continent team, and the Pan-ocean Community team were all resisting the powerful energy fluctuations and huge waves caused by Liu Yan's attack.

At the same time, the team members were also shocked.

"Is this the strength of the team captain of the Land of Origin team? It's terrifying."

"He can be this powerful? It's hard to imagine."

"Captain Liu is so strong. It seems like he can defeat Sea Emperor Turtle alone. We won't be able to do anything."

"No wonder Sea Emperor Turtle was so scared of Liu Yan. It wasn't because it was a coward, but because Liu Yan was too terrifying."

"If I were Sea Emperor Turtle, I wouldn't even show myself when faced with such a terrifying Liu Yan."

"Yup. You'll just be beaten up if you show up. There's no point in doing so."

"I'll be satisfied when I can have a third, no, a tenth of captain's strength!"

"We're so lucky to have such a good captain for our team in the Land of Origin. It's our good fortune."

"Haha. I had agreed to let Liu Yan become our team captain back then!"

...

The team members discussed Liu Yan's strengths in amazement.

Chapter 483: Unyielding

At this moment, members of the Land of Origin team were naturally very proud. To have such a person as their captain, they were honored.

The members of the New World team and the Pan-ocean Community team were also amazed by Liu Yan's terrifying strength. A single attack could cause such an effect. At the same time, they were also a little envious. If they had such a leader, they would not have been eliminated and become prisoners of war.

Although they were envious, they could not join the Land of Origin team. They could only wait for the trial on the fifth level of the Tower to end. They would end their days as prisoners of war and return to the lower levels of the Tower to continue cultivating. They would wait for an opportunity to come back to the fifth level for the trial and attempt to break through to the sixth level.

Murong Xue, who was in the crowd, had a gigantic S-grade shield, Rock Shield, blocking the huge waves and energy fluctuations. She couldn't help but feel a little surprised.

"This guy's strength has increased a lot during this period. He's really a monster!" Murong Xue helplessly replied. She had long gotten used to such situations.

After all, she had become Liu Yan's teammate on the second level of the Tower.

Murong Xue had witnessed countless miracles from Liu Yan. Not only was he powerful, but his improving speed was also rapid.

There were many times when Liu Yan's strength increased substantially in just two days. It was ridiculous.

When Allen Smith heard this, he looked at the huge wave in surprise. At the same time, he felt the power fluctuation of Liu Yan's attack and was a little surprised.

Liu Yan's previous increase in strength was due to the equipment he had obtained from the diamond treasure chest.

However, this strange fire attribute attack was a new skill that Liu Yan had learned, and it was his ability.

Allen Smith frowned slightly. He couldn't figure out how Liu Yan did it. Not only was he skilled in so many different ways of attack, but the power of each of them was strong, making him look like a monster.

At this moment, the energy fluctuations dispersed and gradually disappeared. The huge waves calmed down, finally revealing Sea Emperor Turtle inside.

Sea Emperor Turtle was in a sorry state, lying weakly on the water's surface.

However, there were many cracks on Sea Emperor Turtle's shell. It was the effect of Liu Yan's Flame Blast.

With just one attack, the Sea Emperor Turtle, which had a terrifying defense, had many cracks on its shell.

From the looks of it, if Liu Yan were to cast another Flame Blast, the Sea Emperor Turtle's shell would probably be shattered completely.

One attack was enough to severely injure Sea Emperor Turtle!

The surrounding people were all shocked when they saw this.

The members of the European Federation team were all panicking.

“This Liu Yan is too terrifying.”

“One attack was enough to severely injure our guardian beast, and it’s the Sea Emperor Turtle with the best defense!

“If it was any other guardian beast of the same level, I’m afraid Liu Yan would have killed it instantly.”

“Liu Yan is a monster.”

“Looks like we will get eliminated this time. With this monster Liu Yan, we don’t stand a chance at all.”

“I’m suddenly relieved. With such a terrifying opponent, it’s not a surprise we’ll lose.”

“That’s right. Even if the Land of Origin team didn’t take advantage of the fact that we’ve just finished our battle and come when we’re at our peak, I’m afraid we might not be a match for them.

“Team members of the Land of Origin team have yet to make a move. I think if the Red Star Empire team were to send reinforcements now, our two teams might not be a match for the Land of Origin team.”

“With a monster like Liu Yan, an existence that surpasses his level, who can be his match?”

“With Liu Yan’s strength, he’s completely invincible on the fifth level of the Tower.”

...

The captain of the European Federation team, Hans Wilson, was also surprised to see this.

He had already guessed that Liu Yan’s strength was terrifying. He did not expect the Sea Emperor Turtle to be able to delay the attack of the Land of Origin team.

Hans William thought Liu Yan would need the help of the rest of his team members to defeat the Sea Emperor Turtle.

After all, the Sea Emperor Turtle was a guardian beast. It was powerful and good at defense.

However, to Hans Wilson’s surprise, Liu Yan’s attack was able to severely injure the sturdy Sea Emperor Turtle!

Liu Yan alone could easily defeat the Sea Emperor Turtle!

Liu Yan’s strength had once again exceeded Hans Wilson’s expectations.

The European Federation team had no chance to win, and their last hope was lost.

Hans Wilson sighed and looked at the vice-captain, Derek Dole. He then advised, “Give up. We’ve lost this time. We’re not strong enough!”

Derek Dole was on the verge of collapsing. He was suddenly jolted awake by Liu Yan’s terrifying Flame Blast.

Derek Dole finally realized that the European Federation team was no longer in the lead as they had been in the past.

The Land of Origin team was much stronger than the European Federation team this year.

If one's strength were not enough, one would only be eliminated.

The European Federation team had no chance at all.

Several top experts of the European team, including Captain Hans Wilson and vice-captain Derick Dole, had just used all their strength to launch the terrifying joint technique, Silver Moon Secret Skill. However, Liu Yan still managed to dodge it.

At this moment, they had already used up all their physical strength and energy. They would not be able to fight for a short time.

Sea Emperor Turtle was also no match for Liu Yan.

The ordinary members were even more helpless against the terrifyingly powerful Liu Yan and the other Land of Origin team members.

In the face of absolute power, they had no room to resist.

If they continued to resist, it would only increase the number of casualties.

Derek Dole sighed. He was somewhat unwilling, but he could only accept the reality. He said helplessly, "Forget it. We've lost this time, but we've also witnessed the strength of the Land of Origin team. It seems that we'll have to work hard to improve our strength when we go back. We can't be complacent anymore."

Hans Wilson nodded slightly and said, "That's true. We've always thought the European Federation team was the strongest among the five teams. Unfortunately, we've been ignorant. We still have a long way to go."

At this time, Liu Yan had already arrived above the Sea Emperor Turtle.

The Sea Emperor Turtle was afraid of Liu Yan. It kept retreating.

However, when it retreated to the side of the temporary camp of the European team, it did not retreat anymore. Instead, it used its huge body to block the temporary camp of the European team.

Sea Emperor Turtle prepared to protect the temporary camp of the European Federation team.

In the end, these guardian beasts were the most loyal existences in every territory.

Although these guardian beasts were afraid and were facing death, they still resolutely chose to step forward and protect their territories and team members.

Chapter 484: Took Down Another Team

Liu Yan looked at the captain of the European Federation team, Hans Wilson, and the vice-captain, Derek Dole, waiting for their reply.

Liu Yan naturally did not want to hurt Sea Emperor Turtle. After all, they were only competitors and not true enemies.

If possible, Liu Yan did not want to hurt Sea Emperor Turtle or even kill it.

Liu Yan naturally hoped Hans Wilson would obediently surrender and stop making meaningless resistance.

However, if Hans Wilson insisted, Liu Yan would have no choice but to deal with Sea Emperor Turtle.

At this moment, Hans Wilson and Derek Dole looked at each other, and both chose to compromise.

Hans Wilson walked out and said, "Captain Liu, there's no need to continue. The European Federation team surrenders!"

When members of the European Federation team heard that Hans Wilson had chosen to surrender, they were all a little unwilling.

After the series of battles, the ordinary members of the European Federation team also realized the huge gap in strength between the European Federation team and the Land of Origin team.

The gap between his top combat power and a terrifying figure like Liu Yan was significant.

The battle was one-sided. They couldn't even defend for a longer period, let alone win.

However, even though they understood these things, they were still unwilling to surrender.

After all, they were all members of the European Federation team. They had always been leading in strength among the five continents. They were always proud of it.

Just yesterday, they were still looking for an opportunity to defeat the Land of Origin team and fight for first place to advance.

However, advancing to the third round had become an extravagant hope for them, not to mention getting generous rewards.

"Sigh, we lost."

"I'm so unwilling. I don't want to surrender."

"There's no helping it. We are weaker. The difference in strength is too great."

"I didn't expect the day would come when our European Federation team would surrender. It's ridiculous."

"When I go back, I'll train hard. Next year, I'll break through."

"This failure will be the shame of my life. I will remember it forever."

"It's embarrassing, but there's nothing we can do."

...

Members of the European Federation team discussed in low voices. They were all unwilling to accept this and felt embarrassed.

However, in the face of the absolute difference in strength, they had no choice but to accept reality.

As the captain of the European Federation team, Hans Wilson, announced his surrender. Sea Emperor Turtle also stopped fighting and retreated.

At the same time, the Will of Tower's voice also sounded.

[The European Federation team has announced their surrender to the Land of Origin team!]

[The European Federation team has been eliminated!]

[The European Federation team has become prisoners of war of the Land of Origin team. All the spoils of war obtained by the European Federation team on the fifth level of the Tower will belong to the Land of Origin team. All members of the European Federation team will become the prisoners of war of the Land of Origin team. They will listen to the orders of the Land of Origin team until the trial on the fifth level of the Tower ends!]

...

As the Will of Tower announced, it also meant that the European Federation team had failed and surrendered to the Land of Origin team.

At this point, only two teams remained out of the five teams on the fifth level of the Tower. They were the representatives from the Land of Origin and the Red Star Empire. The Land of Origin team had defeated the other three teams, allowing them to obtain all the spoils of war they had gotten on the fifth level. Members of the three teams had become the prisoners of war of the Land of Origin team.

Members of the Land of Origin team immediately cheered when they heard the announcement of the Will of Tower.

"That's great! We won! Hahaha!"

"We've taken down another team, and it's the most powerful team, the European Federation team. Who would've thought that our team could reach this stage?"

"That's right. When we first arrived on the fifth level of the Tower, our team was targeted by four teams from the two major alliances and was almost eliminated."

"I didn't see this coming."

"We won just like that? We haven't even established a battle yet!"

"Haha. Captain Liu is so cool. He defeated all the experts and guardian beasts of the European Federation team by himself, making them surrender."

"The European Federation team can't compete with our team. The gap in strength is too big."

“That’s right. Our strength has improved a lot during this period. Our strength is no longer weaker than the members of the European Federation team. Moreover, we have an absolute advantage in numbers and conditions!”

...

The members of the New Continent team and the Pan-ocean Community team were not as happy as the members from the Land of Origin. After all, this was only the victory of the Land of Origin and had nothing to do with them. They were prisoners of war who listened to Liu Yan’s orders and worked for the Land of Origin team. The fruits of victory had nothing to do with them.

When they finished the trial on the fifth level of the Tower, they would return to the lower level. On the other hand, the Land of Origin team could go to the sixth level of the Tower and continue their training!

However, the battle had gone so smoothly that the members of the New Continent team and the Pan-ocean Community team were still happy for the Land of Origin team.

“Team members of the Land of Origin team are lucky to have such an amazing captain.”

“That’s right. If we were the members of the Land of Origin team, we wouldn’t be able to feel so comfortable either. It has nothing to do with the other members. It’s all because their captain, Liu Yan, is amazing.”

“I’m indeed envious.”

“Sigh, they could win first place and advance with generous rewards. We, on the other hand, have already been eliminated.”

“Haha, it would be great if I could join the Land of Origin team. Unfortunately, that’s impossible.”

“We’ve already been eliminated, so don’t dwell on it. Just be prisoners of war.”

“Let’s work hard when we get back and try to advance next year.”

“Sigh, even if I advance next year, I’ll still be far behind. The trials after this will be even more difficult.”

...

The New Continent team and the Pan-ocean Community team were discussing among themselves.

At the same time, in the earth attribute territory on the other side, the battle between the Red Star Empire team and the fourth wave of elite monsters had reached its end. They had cleaned up the mess and were almost done.

The captain of the Red Star Empire team, Ye Yifan, looked at the time. Only a short while had passed, and he felt they should be able to make it.

“Hurry up and end the battle. We should still be able to make it. The European Federation team should be able to hold on for a while.” Ye Yifan said.

Chapter 485: Despairing Red Star Empire Team

The vice-captain of the Red Star Empire team, Sun Wen, had a strange expression on his face. "Captain, I've been observing the public chat interface. None of the members of the European Federation team have spoken during this period. The situation doesn't seem good."

When Ye Yifan heard this. He frowned and said, "I know the Land of Origin team has a lot of people and is very strong, but the European Federation team is not weak either. Even when they are exhausted, they can still put up a desperate fight. How long has it been?"

However, as soon as Ye Yifan finished speaking, the Will of Tower's voice suddenly sounded.

After hearing the content of the Will of Tower's report, they learned that the European Federation team had surrendered and lost to the Land of Origin team.

Ye Yifan's expression immediately turned gloomy.

"What's going on with this Hans Wilson and Derek Doyle? The strength of the European Federation team wasn't weak. Why didn't they even resist for a bit longer? They chose to surrender. What a bunch of cowards!" Ye Yifan cursed.

Sun Wen's expression also fell. He felt that something was amiss.

It was reasonable to say that the members of the European Federation team were strong. He interacted with the captain, Hans Wilson, and vice-captain, Derick Dole, and understood their characters.

The personalities of these two people and other members of the European Federation team were arrogant. They should not have surrendered at all. They should have resisted to the last moment and held on until their reinforcements arrived.

However, why did the European Federation team surrender so quickly?

"I don't understand why the European Federation team suddenly became cowards. Didn't we promise to hold on until our reinforcements arrive?" Sun Wen asked in confusion.

Ye Yifan frowned and said, "Now, only the Land of Origin and our team are left on the fifth level of the Tower. The Land of Origin team has four captive teams under them. They are strong and can completely crush us. What should we do?"

"If the Land of Origin team doesn't care about us and only wins first place, we can still win second place. Although the rewards are less, we can still advance. However, if the Land of Origin team attacks us, I'm afraid we cannot resist at all. Our difference in strength is too great." Sun Wen was also worried.

"Hmph!" Ye Yifan snorted coldly and said, "The captain of the Land of Origin team is very ambitious. He will attack us. Otherwise, they could have advanced by collecting the Lord's token fragments since they were close to the target. However, they chose not to collect the Lord's token fragments and instead came to attack us. It's obvious that they don't want us to win."

When Sun Wen heard this, he smiled bitterly and said, "Liu Yan is doing this for the spoils of war. After all, every time he defeats a team, he will be able to obtain all the spoils of war that the defeated team got on the fifth level of the Tower. It's very beneficial to the Land of Origin team. It can help their team members to improve their strengths to a large extent. It's even more beneficial for their subsequent trials in the Tower.

Ye Yifan naturally understood this logic. If it were him, he would not leave the other two forces alone and would take action. After all, he would receive a generous reward for every opponent he defeated.

“It seems that we have to think about our next plan.” Sun Wen smiled bitterly.

The Red Star Empire team was already in a very awkward situation. Initially, they had the European Federation team to support them.

Now that the European Federation team had surrendered. The Red Star Empire would naturally have to face the powerful Land of Origin team alone. Their situation had become more challenging, and they even felt desperate. They did not know what other methods they could take.

At this moment, members of the Red Star Empire team, who had just ended their battle with the monsters, were shocked when they heard the announcement from the Will of Tower.

“What? Why did the European Federation team surrender just like that?”

“What’s wrong with the European Federation team? How can they surrender? ”

“Are they betraying us? The European Federation team is a group of cowards.”

“That’s right. They should stick to the defense if they could not win the Land of Origin team.”

“It’s over. We’re embarrassed now.”

“The Land of Origin team has three captive teams under them. It means we’ll have to fight four teams. It is too difficult.

“This time, we might not even be able to advance in rank.”

...

The team members of the Red Star Empire team were worried. However, the Will of Tower’s announcement rang out once again.

“The captain of the Land of Origin team, Liu Yan, has chosen to declare war on the Red Star Empire team!”

“The initial battle mode will be free to fight. If any of the guardian beasts or the core of the team is defeated, it will be considered a failure and the team will be eliminated!]

...

Hearing the Will of Tower’s announcement, the faces of the Red Star Empire’s team members turned even gloomier.

They were already in an awkward and difficult situation.

Now that the Land of Origin had declared war on the Red Star Empire team. It was undoubtedly adding to the already difficult trial.

“The Land of Origin team is too much. Aren’t they not giving us any chance?”

“We’ll have to face the strength of the four teams led by the Land of Origin team. How can we fight them?”

“Previously, when the European Federation team faced the Land of Origin team, they could still defend and wait for reinforcements from the Red Star Empire. Now, we can only fight alone. We don’t have reinforcements at all.”

“It’s all the fault of the European Federation team. If they hadn’t surrendered, we wouldn’t be in such a terrible situation.”

“Yeah, we’ve cleared the monsters. We’ll be able to reinforce them soon. Why don’t they hold on a bit longer?”

“What do we do now? Are we going to be eliminated? I don’t want to be a weakling. I still want to go to the sixth level of the Tower!”

...

The team members of the Red Star Empire team wailed in despair.

The captain of the Red Star Empire team, Ye Yifan, and the vice-captain, Sun Wen, looked at each other. Their expressions were also gloomy.

“I didn’t expect the team captain of the Land of Origin team to act so quickly. He has just finished off the European Federation team. I think he hasn’t even settled the matters over there and has already declared war on our team. He’s really impatient.” Sun Wen said coldly.

“The Land of Origin team is powerful and can do so. Let’s hurry up and think of a solution.” Ye Yifan sighed helplessly.

The two pondered for a while, but no matter how they thought about it, they could not find a way to defend against the Land of Origin team.

Even though the earth attribute territory had the advantage of terrain, it was easy to defend.

However, in the face of absolute power, it was useless no matter how advantageous the terrain was. It was impossible to defend until the end. After all, the difference in strength between the two sides was too great.

Chapter 486: Two Line Battle

“We can’t defend. We will be destroyed if we only defend. We must take the initiative to attack.” The vice-captain of the Red Star Empire’s representative team, Sun Wen, said after thinking for a moment.

“Take the initiative to attack?” Ye Yifan’s expression was a little strange as he said, “However, the number of people the Land of Origin team has is almost four times more than ours. The difference in our overall combat strength is huge. Under such circumstances, how can we take the initiative to attack? If we take the initiative to attack them, isn’t that just courting death?”

Sun Wen sneered. "Of course, we're not going to look for them. If we attack them, we'll avoid them and go straight to the fire attribute territory. We'll attack the core of the fire attribute territory. As long as we can destroy the core of the fire attribute territory, the Land of Origin team will be eliminated. No matter how many people they have, how good their condition is, or how strong they are, it's useless. They'll be eliminated."

When Ye Yifan heard this, he immediately understood what Sun Wen meant.

In theory, this was indeed a good idea.

But in reality, there were many dangers.

First, they had to decide if they should leave any members behind to defend. The Land of Origin team had declared war on the Red Star Empire team. The Land of Origin team would probably arrive at the earth attribute territory very soon.

If they did not leave any team members to defend, the Land of Origin team would destroy the core of the earth attribute territory. The Red Star Empire team would be eliminated immediately.

The Red Star Empire team had not even arrived at the fire attribute territory when they were already eliminated.

And if they left a team to defend an earth attribute territory, they could leave as many as they wanted.

Facing the powerful Land of Origin team, it would be difficult to have any practical effect even if they left some members behind.

Ye Yifan and Sun Wen immediately started communicating.

However, Sun Wen seemed to have thought about it from all angles.

Sun Wen's plan was for all the ordinary members of the Red Star Empire team to stay in the earth attribute territory to defend.

Although the strength of these ordinary team members was relatively average, they had many of them. Furthermore, they could use the terrain of the earth attribute territory to delay the invasion of the Land of Origin team for a while.

On the other side, all experts from the Red Star Empire team were together. They could send out the sharp knife squad and immediately set off for the fire attribute territory to carry out a surprise attack.

In any case, the fire attribute territory probably did not have any defensive members. Experts from the Red Star Empire team would be able to attack and destroy the core of the fire attribute territory.

In addition, the Red Star Empire team was made up of experts. They were stronger and faster. So, they would reach the fire-attribute territory quickly and launch a surprise attack.

After Ye Yifan heard Sun Wen's plan, he felt it was feasible.

This method was undoubtedly good. It could avoid a head-on confrontation with the Land of Origin team. Moreover, it could also give them a chance to defeat the powerful Land of Origin team.

All in all, it was a race against time. Whoever destroyed the other party's core first would win the final victory.

"That's a good idea. Let's do it this way." Ye Yifan said with a look of admiration.

Ye Yifan was the team captain of the Red Star Empire team. He was also powerful.

However, in terms of commanding ability, there was still a huge gap between him and the vice-captain, Sun Wen. Sun Wen could be said to be the think tank of the Red Star Empire's representative team.

Sun Wen nodded. "That's our only solution. It's our only chance. We need to grasp the weakness that the Land of Origin team has revealed. Only then will we have a chance of winning. We have to grasp it. Let's move!"

"Alright!" Ye Yifan nodded and said, "We'll act separately. You'll be responsible for leading our ordinary members to defend. Try to make use of the favorable terrain as much as possible. If it's impossible, you can also use the guardian beast, sky-devouring Python, to delay as much time as possible. I'll lead my expert team members to the fire attribute territory as fast as possible. We must race against time to get rid of the core of the fire attribute territory and win this battle."

"That's what I was thinking." Sun Wen smiled as he nodded. His strength was average, but he was smart. He was more suited to defend in this battle and tried to utilize the terrain to buy time.

Ye Yifan's strength was stronger. He was the strongest person in the Red Star Empire's representative team. He was undoubtedly the most suitable person to lead the sharp knife squad in this surprise attack.

After Ye Yifan and Sun Wen confirmed their plan, they immediately took action.

On the other side, in the water attribute territory.

After the European Federation team surrendered, members of the Land of Origin team rested on the spot.

Liu Yan and the other core members entered the temporary camp of the European Federation team.

With the surrender of the European Federation team, all the spoils of war obtained on the fifth level of the Tower belonged to the Land of Origin team. Moreover, all members of the European Federation team became the prisoners of war of the Land of Origin team.

With the constraints of the Will of Tower, the members of the European Federation team had to obey Liu Yan's orders during this time.

After entering the temporary camp of the European Federation team, Liu Yan asked Luo Qingcheng to check the spoils of war.

Liu Yan and the others first learned about the situation of the European Federation team.

The European Federation team members had experienced the battle with the monsters and the Land of Origin team. All of them were exhausted, and many of them were injured.

In particular, many team members were hit by Liu Yan's wind God's Effect, Gale Force. They were seriously injured.

Previously, they were in a competitive relationship, so Liu Yan naturally couldn't be soft-hearted to his opponent and could only attack.

At this moment, the battle and the competition were over. These members of the European Federation team were temporarily Liu Yan's subordinates, so Liu Yan naturally had to show them appropriate concern.

Liu Yan first asked Hans Wilson to gather all the members of the European team and check their status.

After some understanding, Liu Yan also heard about the general situation from Hans Wilson and Derek Dole.

The strength of the European Federation team was indeed not bad. They were much better than the other teams.

Among the five teams, they were indeed the strongest. Only the Red Star Empire's team from the earth attribute territory had the smallest gap with them.

Even the Land of Origin team had a clear gap with the European Federation team.

Under Liu Yan's leadership, the Land of Origin team received tons of high-level cultivation materials and consumables, which greatly improved their strength and combat power. Now, the comprehensive combat power of the ordinary members of the Land of Origin team was about the same as that of the European Federation team.

As for their top-tier combat strength, Liu Yan could crush them himself. As for the specifics, Liu Yan did not know much.

Chapter 487: Tough European Federation Team

The members of the European Federation team were strong, but after a long period of continuous battle, they were exhausted. The experts had no combat power at all, and the combat power of the ordinary members had dropped a lot. Many members were even injured.

Hans Wilson finished reporting the situation of the members of the European Federation team. He said with a helpless expression, "Captain Liu, the members of the European Federation team will listen to your orders. However, we are exhausted, and many of our members are injured and need treatment and care. I'm afraid it will be difficult for us to help you fight against the Red Star Empire team. I hope you can be magnanimous and let us rest for a while."

Hans Wilson knew the rules of the Will of Tower. All members of the European Federation team had to obey Liu Yan's orders.

He did not hope Liu Yan forcefully ordered the members of the European Federation team to attack the Red Star Empire team. Otherwise, it would undoubtedly be a nightmare for the European Federation team.

The rest of the team members would be too tired to fight.

However, without the treatment and care of other members, the injuries of European Federation team members would worsen or even die.

It was why Hans Wilson asked Liu Yan to be magnanimous and not make things difficult for them.

As captain of the European Federation team, Hans Wilson had always been proud and arrogant. However, in front of Liu Yan, he could only lower his head in humiliation for the sake of the safety of the European Federation team.

The members of the European Federation team were looking at the members of the Land of Origin team curiously, especially Liu Yan.

Liu Yan shone brilliantly in the battle just now.

It was the first time the European Federation team members saw Liu Yan's terrifying combat power, and they were all a little afraid of him.

They were proud and arrogant. Not only had they lost to the Land of Origin team, but they had even surrendered. It made them feel even more humiliated.

The European Federation team members saw that their captain had chosen to lower his head to Liu Yan for their safety. They couldn't stand it anymore.

"Captain, you don't need to care about us. You don't need to bow down to him!"

"That's right. We've lost, but there's no need to lower our heads."

"We will do whatever he tells us to do. We must follow his orders, but we don't have to lower our heads."

"We can continue fighting and attack the Red Star Empire's team. We can even be the sharp knife squad!"

"That's right. We never bow down to anyone!"

"We can still fight!"

...

The members of the European Federation team spoke out one after another. They were all very unyielding. They would drag their tired and injured bodies to continue fighting rather than see Hans Wilson bow down to Liu Yan.

When Hans Wilson heard this, he glared at his team members and scolded, "Captain Liu is the captain now, so you guys better stop talking."

Although Hans Wilson was scolding them, the members of the European Federation team were not angry at all. They knew that Hans Wilson was doing this for their good.

Derek Dole, who was at the side, stepped forward and said, "Captain Liu, to show my sincerity, I'll reveal something to you. After the Red Star Empire team ends their battle with the monsters, they'll likely

launch a sneak attack on your fire attribute territory. In exchange, I hope you won't make things difficult for our team members. After a long period of continuous battle, it's not easy for them."

Liu Yan was intrigued by the scene before him.

Every continent's representative team had different personalities.

All team members of the European Federation team had a strong spirit.

Even though they lost and surrendered, they were not willing to lower their heads.

They would rather suffer, be tired, bleed, and get injured than bow their heads. They were really tough.

After thinking about it carefully, Liu Yan could roughly guess the reason.

These European Federation team members were born in the powerful European Federation. They had cultivated the quality of self-confidence from a young age, which naturally led to the current atmosphere.

However, Liu Yan still appreciated this kind of temperament. These European Federation team members were undoubtedly outstanding.

In the battle between the Land of Origin team and the European Federation team, there was a huge gap in strength in all aspects.

However, members of the European Federation team resisted until the end in the face of such a desperate situation. They were full of blood to buy time.

If not for Liu Yan, the three teams from the Land of Origin team would not have been able to take down the European Federation team in a short time. Even if they had the upper hand, they would have been delayed by the European Federation team.

From that time on, Liu Yan couldn't help but admire the members of the European Federation team.

Liu Yan had no intention of making things difficult for them. After all, they were all Blue Planet humans, and there was no conflict of interest.

Liu Yan glanced at Hans Wilson and Derek Dole. He then looked at the members of the European Federation team and said with a faint smile, "You don't need to feel so humiliated. It's just a loss, and it's normal. I won't make things difficult for you. You can stay in the territory and recuperate. I don't want to make things difficult for you. It's not because of your captain and vice-captain, but you. I admire your determination in battle. I think you're all good. It's just that you've lost this time. I believe that you'll win in the future."

The members of the European Federation team were stunned when they heard Liu Yan's words. They did not expect Liu Yan to say something like that.

All of a sudden, the team members were touched.

At this moment, they suddenly felt that losing to Liu Yan's Land of Origin team was not humiliating.

It was true that they had lost because they were not strong enough. They had also given it their all, so it was not shameful to lose to Liu Yan.

Hans Wilson and Derek Dole looked at each other in surprise. They did not expect Liu Yan to be so forthright and not target them.

When the two of them thought of their plan to join forces with Alliance Number 2 and the four teams to work together against the Land of Origin team, they suddenly felt ashamed.

Derek Dole hesitated for a moment, but he still said, "Captain Liu, I'm sorry about what happened back then. We worked together to get rid of your team. It was a little immoral. I strongly supported this plan back then. I apologize to you and your team."

Hans Wilson chimed in, "I was the one who passed this plan, so it's my responsibility!"

Hans Wilson and Derek Dole still wanted to argue and take the blame, but Liu Yan waved his hand and interrupted them.

Chapter 488: Fight to the End

"It's okay. I'm not angry about this. You were using strategy to defeat us. There's no martial virtue or anything in this trial. Didn't I also launch a surprise attack on the Pan-ocean Community team and then the New Continent team? It's just a normal strategy. Let the past stay in the past." Liu Yan said indifferently.

When Hans Wilson heard this, he was somewhat impressed by Liu Yan.

Not only did he possess such powerful strength and outstanding commanding ability, but he was also broad-minded.

If it was anyone else, they would have been more narrow-minded and tormented them miserably for revenge. Fortunately, Liu Yan was broad-minded and generous.

"Captain Liu, I only admire a few people, but you are one of them!" said Hans Wilson sincerely.

Derek Dole nodded and said, "Me too!"

The members of the European Federation team behind him also admired Liu Yan.

Liu Yan showed his terrifying strength and outstanding commanding ability in the battle. They thought Liu Yan was powerful and even a monster, so they were afraid of him.

However, Liu Yan's actions undoubtedly won their respect and even worship.

At this moment, Liu Yan didn't care about this. He smiled faintly and said, "Alright, let's not talk about this now. Arrange for some people to hand over all the spoils of war. The rest of the team members can go and rest. There are no other missions for now."

"Alright!" Hans Wilson replied.

Immediately, Luo Qingcheng followed a few members of the European Federation team to hand over all the spoils of war. It would be another huge harvest.

Before leaving, Luo Qingcheng specifically instructed Liu Yan to be careful of the fire attribute territory. Their territory was crucial because it concerned their advancement to the sixth level of the Tower. He must not take it lightly.

Liu Yan naturally understood the importance of this matter and agreed.

After Luo Qingcheng left, Liu Yan gathered the captains of the New Continent team and the Pan-ocean Community team, Jin Cheng and He Yang. Some core members of the Land of Origin team were also there. They needed to plan for the next battle.

Liu Yan had just declared war on the Red Star Empire team, so the battle naturally had to start immediately.

After they gathered, they began to discuss their next battle plan.

He Yang was the first to speak. "Our team members are in good condition and did not suffer too much damage in the battle with the European Federation team. I say we should charge into the earth attribute territory and finish off the Red Star Empire team in one fell swoop!"

Jin Cheng frowned slightly and said, "We cannot forget what Luo Qingcheng told us just now. Derek Dole also specifically reminded us that the Red Star Empire team might make a move on the fire attribute territory. We still have to be careful of fire attribute territory."

"Then we'll split into two groups. One group will attack the Red Star Empire team in the earth attribute territory, and the other will go back and defend the fire attribute territory?" Chu Long suggested.

Xu Han immediately denied it. "It's best if the main force doesn't split up. The Red Star Empire team has been fighting the monsters for a long time, and their combat strength has dropped significantly. However, they are powerful and have skills up their sleeves. In the end, they fought to the death. No one knows how terrifying their power will be."

When they heard this, they all felt that it made sense.

Before the battle with the European Federation team, they had thought that it would be one-sided and that they would take down the European Federation team quickly.

However, the European Federation team was not afraid of suffering heavy casualties. They put up a desperate fight and caused Liu Yan's team a lot of trouble.

If it were not for Liu Yan using his terrifying combat power, it would have been impossible for them to defeat the European Federation team so quickly and without any injuries.

Now that they were fighting the Red Star Empire team, they naturally had to be careful. It was best not to split up and be defeated one by one.

"Then what should we do? We can't split up, but we must take care of both sides." Murong Xue couldn't help but ask in puzzlement.

They continued to discuss but could not think of a good plan. It seemed they could only return to the fire attribute territory, which was the safest way. However, this would only delay the time they would have to deal with the Red Star Empire team.

If they went to fight the Red Star Empire team now, it would undoubtedly be the fastest way to deal with them. However, the fire attribute territory would expose to danger.

The group discussed for a while but did not know what to do.

At this moment, Liu Yan, who had been silent all this while, suddenly laughed, "Alright, the Red Star Empire team has already started moving. We can also start moving on our side."

In reality, Liu Yan had no other choice. However, he was not in a hurry. He was waiting for the Red Star Empire team to make their move.

As long as the Red Star Empire team made a move, he could take countermeasures.

In any case, Liu Yan had the A-grade fierce beast, Purple Wind Falcon, flying in the sky above the earth attribute territory, observing the situation of the Red Star Empire team.

Under the observation of Purple Wind Falcon, Liu Yan was able to know the situation of the Red Star Empire team in the earth attribute territory at all times. It was pretty convenient.

On the other hand, the Red Star Empire team could only guess Liu Yan's movements and arrangements. They had no idea what the actual situation was.

Based on the observation of Purple Wind Falcon, Liu Yan also understood the latest movement of the Red Star Empire team.

Liu Yan looked at the crowd and explained, "The ordinary members of the Red Star Empire team are all using various methods to defend their territory. As for their experts, they have already set off. It seems they are heading towards our fire attribute territory."

Xu Han nodded. "Sun Wen is smart. He must have thought of this plan. He used this method to stall for time while the main force fought desperately to defend. At the same time, the sharp knife squad attacked our fire attribute territory and tried to break through."

"This guy is cunning." Chu Long couldn't help but nod.

"Then what should we do?" He Yang asked.

The rest of the people also looked at Liu Yan.

"We'll use the same strategy." Liu Yan replied, "Let's do the same. The experts will follow me back to intercept them. The main force will head to the earth attribute territory and deal with the Red Star Empire team."

In any case, the Land of Origin team had an absolute advantage in strength. Whether it was the combat power of the ordinary members of the main force or the experts, they had an absolute lead.

Since the Red Star Empire team had chosen to fight a two-front war, Liu Yan would accompany them to the end.

Xu Han thought about Liu Yan's plan for a while and said, "I agree. Our expert members are strong and have a large number of people. It won't be a problem to intercept them. There won't be a need for the main force to return to defend. We can also deal with the Red Star Empire team from the earth attribute territory. Even if by any chance we could not stop them, the main force will destroy the core of the earth attribute territory and eliminate the Red Star Empire team. There will be a double layer of protection."

Chapter 489: Ambush

"In that case, it's indeed not bad."

"I don't have any objections. Let's go with this plan."

"Time is of the essence. We have to hurry and set off."

"This is a good idea. We can deal with the Red Star Empire team."

...

They agreed with Liu Yan's plan.

After deciding on the battle plan, everyone immediately split up.

Luo Qingcheng was in charge of the spoils of war from the European Federation team, so she could not command the team for the time being. Liu Yan left Xu Han in charge of the Land of Origin team.

After that, Xu Han, He Yang, and Jin Cheng led three teams and headed toward the earth attribute territory.

Meanwhile, Liu Yan had gathered the experts from three territories and set off in another direction to intercept and defeat Ye Yifan and the others!

Liu Yan's team consisted of three teams of experts, and they were all quite strong. There were also many of them, so it would not be a problem for them to take care of Ye Yifan and the other experts.

After Ye Yifan and the others set off, Liu Yan ordered Purple Wind Falcon to track and observe the situation of Ye Yifan and the others. This way, Liu Yan could understand their situation and intercept them.

On the other hand, Liu Yan had also prepared a backup plan.

Although almost no team members were left in the fire attribute territory, Liu Yan had placed his pet Shadow Wolf in the temporary camp. It was responsible for guarding the core of the fire attribute territory.

In the Ice and Fire Draconic Wolf form, it was a strong fierce beast with SS-grade potential. In addition, Liu Yan deliberately allowed Shadow Wolf to eat some elite monsters and Moonshine Qilin's corpses during this period. Shadow Wolf's level had also increased by a lot. It had already leveled up several times, reaching level 40. Although its level was still a little lower than the awakened ones on the fifth level of the Tower, its SS-grade potential far exceeded its level. Liu Yan estimated Shadow Wolf's combat

power was the same as an ordinary level 60 awakened one, which was already at the level of a top expert.

Even if Shadow Wolf could not defeat Ye Yifan and the other experts, it was enough to defend and delay them until Liu Yan's team arrived.

All in all, it was safe this time, and it was unlikely for any accidents to happen.

Liu Yan's group headed in the direction of the fire attribute territory.

When they were halfway there, Liu Yan called for everyone to stop and wait.

According to Purple Wind Falcon's tracking and observation, Ye Yifan and the others would pass by this place, so it was better to intercept them here.

After landing, they looked around and decided to wait.

The terrain here was a mountain range, and there was only one road in the middle of the mountains.

If Ye Yifan and the others wanted to go to the fire attribute territory, they would either have to go through this road or waste a lot of time by taking a detour.

The terrain here was suitable for an ambush.

"Let's set up an ambush here. Ye Yifan and the others will pass by this place very soon." Liu Yan said.

"Yes!"

The group of experts split up and prepared for the ambush.

Those who were good at close combat would lie in ambush near the road so that they could attack at the first moment.

As for those who were good at long-range attacks, they hid halfway up the mountain. At this distance, their long-range attacks could hit the target. At the same time, they would not be in danger.

After all, they were all experts with rich combat experience. Without Liu Yan's instructions, they spontaneously divided into two teams. One in front to intercept the opponents and the other in the back to block the retreat path.

They could block the Red Star Empire team from both directions. They were in a mountain range. Hence, it would be difficult for Ye Yifan and the others to escape.

Besides, they did not have to worry about the fight.

After all, Liu Yan had three teams of experts on his side, and his strength was naturally above Ye Yifan and the others.

Furthermore, Liu Yan was also present. With Liu Yan's terrifying combat strength, he naturally did not have to worry about not being able to defeat the other party.

Meanwhile, Liu Yan arrived at the top of the mountain.

The experts below were more than enough to deal with Ye Yifan and the others. There was no need for Liu Yan to make a move immediately.

Liu Yan stayed on the top of the mountain. He could see far from here, so it was convenient for him to observe the surrounding situation.

If anything were to happen, Liu Yan could move quickly to assist with his flying speed.

After the group of experts set up an ambush, the surroundings suddenly returned to silence, as if Liu Yan and the others had never been there.

Not long after, Liu Yan saw a group of people in the distance heading in this direction. It was Ye Yifan and his group.

Even from such a long distance, Liu Yan could see everything clearly with the help of his enhanced vision of his SS-grade Extraordinary Five Senses.

At this time, Liu Yan was also aware of the power of his Extraordinary Five Senses, which could enhance his five senses.

Now, just his vision alone was of immense help to Liu Yan.

With the Wings of the Wind God, Liu Yan could fly high in the sky.

It was difficult to see the specific situation on the ground when flying at a high altitude. One could only see the general picture.

The higher one flew, the further they were from the ground, and the harder it was to see clearly.

However, with the help of his Extraordinary Five Senses, Liu Yan could see the situation on the ground even if he was flying in the air. It was pretty convenient.

The Wings of Wind God and his Extraordinary Five Senses gave Liu Yan a terrifying detection ability, which increased his overall combat strength.

The most terrifying thing was that his Extraordinary Five Senses had not yet truly awakened.

He could awaken his five senses separately. After awakening all his five senses, he could possess the true power of the Extraordinary Five Senses.

And now, even before it had awakened, it could already have such a terrifying amplification.

If his senses truly awakened and erupted with their true power, they would be ridiculously strong.

Liu Yan looked at the ground. He saw Allen Smith, Murong Xue, and the other experts were all prepared. There was no need to worry.

As Ye Yifan and the others approached, Liu Yan pondered for a second. He then decided to use the A-grade skill, Shadow Cloak.

Liu Yan immediately entered stealth mode.

Usually, it would be difficult for others to detect Liu Yan when he was flying in the sky. However, Ye Yifan and the others were all experts from the Red Star Empire team, so it was better to use some skill to conceal himself.

Liu Yan was high up in the sky and went invisible. No one would be able to detect Liu Yan's existence. At the very least, no awakened ones on the fifth level of the Tower would be able to detect him.

Under Liu Yan's watchful eyes, Ye Yifan and the others on the ground had also arrived. However, they stopped below the peak of the mountain. They looked at the peak as if they were hesitating.

Seeing this, Liu Yan frowned slightly.

The terrain here was indeed suitable for an ambush.

It was something that many of the more observant awakened ones would be able to notice.

However, in such a situation, did Ye Yifan and the others still have to be wary of this?

Liu Yan didn't care too much about it. If Ye Yifan and the others took a detour, Liu Yan would chase after them or return to the fire attribute territory to wait.

In any case, Liu Yan's combat strength and speed were both superior. He had absolute confidence in himself.

Chapter 490: Surround

At the entrance of the mountain peak.

Ye Yifan and the others stopped.

They frowned as they looked at one of them.

"Luo Wei, what the hell are you doing? We're in a hurry. Why are we stopping?"

"That's right. We're racing against time. How can we stop here?"

"Let's hurry up. We're not far from the fire attribute territory. We'll be there in a while."

"I heard that the main force of the Land of Origin team has already set off for our earth attribute territory. We don't have much time left."

...

Ye Yifan also looked at this person. Luo Wei was his right-hand man and a famous expert in the Red Star Empire team. He was also known as the number one assassin because his assassination abilities were powerful.

"Luo Wei, what's the situation?" Ye Yifan also asked.

Ye Yifan naturally trusted Luo Wei more. After all, Luo Wei was his right-hand man. If he asked them to stop now, something was wrong.

Luo Wei's face was cold. Facing the scolding of the other members, he acted as if he didn't hear them and directly ignored them.

Luo Wei observed the only path in the middle of the mountains and frowned. "I'm not sure, but the terrain ahead is suitable for an ambush. If the experts of the Land of Origin team are lying in ambush here, it will be dangerous for us to enter rashly."

"You want us to stop just because this terrain is good for an ambush?" Ye Yifan couldn't help but be suspicious. According to his understanding, Luo Wei wasn't suspicious of everything. However, this point should not make him cautious.

Luo Wei looked at the sky with doubt and said, "When I was far away, I vaguely saw a figure in the sky. I wanted to get closer to observe, but that figure suddenly disappeared. However, it was too far and too high, so I'm not sure. However, this place is a good terrain for an ambush, so I keep feeling something is wrong."

When the others heard Luo Wei's explanation, they immediately disapproved.

"Just this? It is too fake."

"Luo Wei, did you see wrong?"

"How could anyone be able to fly? We are on the fifth level of the Tower. Only the awakened ones on the ninth level of Tower were strong enough to fly."

"Flying is possible with special equipment. However, such equipment is rare. I have never heard of any awakened has such equipment on the fifth level of the Tower."

"Luo Wei, don't be so suspicious. How could the Land of Origin team be so smart to ambush us and accurately predict our route?"

"Even if there is an awakened who can fly, how could he suddenly disappear after soaring so high?"

...

Ye Yifan frowned slightly and wanted to believe Luo Wei.

Luo Wei was an assassin, and he was the number one assassin in the Red Star Empire team. He was proficient in all aspects, especially ambushing and assassinating.

Generally speaking, Luo Wei's judgment was more accurate.

But this time, it was too strange.

Ye Yifan also didn't quite believe what Luo Wei had just said. There should not be an awakened one who could fly on the fifth level of the Tower and suddenly disappear.

In addition, the other party had to know their route in advance before they could set up an ambush.

However, the battle between the Land of Origin team and the European Union had just ended.

The Land of Origin team couldn't gather so much information in such a short time.

All in all, Ye Yifan felt that Luo Wei's judgment this time was wrong. No one could ambush them in front.

Ye Yifan looked at Luo Wei and said, "Alright, there's no need to be so cautious. If we take this detour, we'll waste a lot of time. Time is precious, and we can't afford to waste it. Let's continue moving forward. However, everyone must be careful to avoid any danger."

When Luo Wei heard this, he nodded slightly and stayed quiet.

Soon, Ye Yifan led these experts toward the road in the mountains.

Liu Yan, Allen Smith, and the other experts on the ground were relieved when they saw Ye Yifan and the others continue to move forward.

Soon, Ye Yifan passed by Alan Smith and the other experts.

However, Alan Smith and the others naturally didn't make a move. Their duty was to seal off the escape route, so they naturally had to let Ye Yifan and the others pass through.

Ye Yifan and the others continued to move forward. As they went further, the expressions of the few experts became a little tense.

"You don't say. It is indeed an extremely suitable place for an ambush."

"That's right. We're surrounded by tall mountains. If we're ambushed, there's no way we can go."

"Looks like we can't blame Luo Wei for being overly cautious. The terrain here is indeed a little strange."

"I don't believe those guys from the Land of Origin team could have known that we would pass by this place in advance. We've only set off for a short while, so how could they know our route?"

"The three teams from the Land of Origin haven't arrived at the earth attribute territory. It seems like we have a good chance this time."

"Even if their main forces arrive at the first moment, they won't be able to take down our temporary camp and destroy our core in time."

"I have absolute trust in vice-captain Sun Wen's defense, haha!"

...

Ye Yifan turned around and glanced at them. He said coldly, "Be serious. We are on a crucial mission. There can't be any mistakes."

"Yes!"

Ye Yifan and the others continued to venture deeper.

Not long after, a few figures suddenly rushed out from the front. It was Murong Xue leading over ten experts.

Murong Xue was leading the way, holding up a gigantic shield.

"Everyone, I hope you've been well. Where are you going?" Murong Xue laughed as she teased.

Chu Cunrui and others also helped to defend. They blocked the road, not allowing Ye Yifan and the others to pass.

They were all experts, and their numbers were even more than Ye Yifan's group, at least twice as many as Ye Yifan's group.

However, to be safe and not let any of the experts from the Red Star Empire team escape, Murong Xue and the others did not attack rashly. Instead, they blocked the path and stopped Ye Yifan's group from advancing.

When Allen Smith and the others arrived, they could fight Ye Yifan and the other experts together. They could take Ye Yifan's team down easily.

Ye Yifan saw Murong Xue and the others suddenly appear in front of them. Judging from their auras, Ye Yifan knew they were all experts. Their numbers were twice their own. Their expressions instantly changed.

"Don't waste time fighting them. Turn around and leave!" Ye Yifan immediately ordered.

The other party was not weak and had twice as many people as them. They might not be able to defeat them.

Even if they could win, it would be meaningless. After all, Ye Yifan and the others' mission was to rush to destroy the core of the fire attribute territory and eliminate the Land of Origin team.

Ye Yifan and the others immediately turned around and prepared to leave.

However, a few experts led by Allen Smith had surrounded them from behind!
