

Towers 501

Chapter 501: Heavenly Genius

1

Sun Wen pointed at the earth attribute core and the rock fragments on the ground, "Look, the earth attribute core is active. It's obvious that someone has just achieved enlightenment through the earth attribute core and made a breakthrough. The rock fragments on the ground are formed by the condensation of earth attribute energy. This density is far beyond you and me. It's even on a different level. Only those who have mastered Earth Secret Art can do this."

When Ye Yifan heard this, he went forward to check it out and found that it was indeed the case.

All the signs seemed to indicate that within the past half an hour, Liu Yan had successfully used the earth attribute core to comprehend and break through to Earth Secret Art.

However, despite all the evidence in front of him, Ye Yifan still found it hard to believe. This kind of thing was impossible.

Ye Yifan had mastered Earth Talent, so he knew how difficult it was.

"B-but, how did Liu Yan do it? No matter how much of a genius he is, he can't break through to Earth Secret Art in half an hour, right?" Ye Yifan said.

Sun Wen shook his head slightly. He was also a little confused. After thinking for a while, Sun Wen said, "The only possibility is that Liu Yan's mastery of Earth Talent is deep. He's very close to the level of Earth Secret Art. It is the first time Liu Yan came into contact with a high-level earth attribute treasure like the earth attribute core. Hence, he suddenly had an epiphany and successfully broke through to Earth Secret Art. It also shows that Liu Yan's talent in the earth element is shocking, far above you and me."

When Ye Yifan heard this, he nodded his head slightly. It seemed like this was the only possibility. After all, many factors allowed Liu Yan to advance from Earth Talent to Earth Secret Art within half an hour.

But even so, it explained two things.

Firstly, Liu Yan's attainment in the earth attribute was far above the two of them, and his strength was probably above them.

Secondly, Liu Yan's talent was shocking and way ahead of them.

"I've heard from the other teams that Liu Yan's strength is terrifying. He can still control the situation in the battle between the two teams. He's indeed extremely powerful. It seems like he lives up to his reputation." Sun Wen couldn't help but ask.

One had to know that Sun Wen and Ye Yifan were already the top geniuses in the Red Star Empire team. In the Red Star Empire, the two of them were also the proud children of heaven among this batch of students.

However, these two geniuses were mediocre in front of Liu Yan. Liu Yan's talent and strength were over the chart.

When Ye Yifan heard Sun Wen's words, he was a little unhappy.

All along, Ye Yifan's talent and strength were extremely outstanding. He was praised by thousands of people.

Even when facing Hans Wilson and Derek Dole from the European Federation team, Ye Yifan still won by a slight margin.

Occasionally, he would lose to them, but it was also because of their equipment or combination skills.

However, in terms of personal strength and talent, Ye Yifan had never lost to Hans Wilson or Derek Doyle.

But this time, Ye Yifan seemed to have encountered an existence even more powerful than him. It was not just a little more powerful, but a lot more powerful. In terms of talent and strength, Ye Yifan crushed him.

Ye Yifan couldn't accept it and said, "Who knows what the actual situation is? It only shows that Liu Yan's strength and talent on earth attribute are better than ours. It may not be the case in other aspects. I've been eliminated anyway, so I'll go back and cultivate to increase my strength. Next year, I'll pass the trial on the fifth level of the Tower and surpass Liu Yan!"

After saying this, Ye Yifan left with some dissatisfaction.

Sun Wen looked at Ye Yifan's back as he left and shook his head.

Ye Yifan's talent and strength were not bad, and his family was very well-off.

Because of this, Ye Yifan had been the focus of attention since he was born. He drew attention, which made him somewhat arrogant and proud.

However, in other aspects, Ye Yifan was still a very good person.

In contrast to Ye Yifan's disapproval of Liu Yan's strength, Sun Wen approved of Liu Yan's strength.

To be able to break through to Earth Secret Art so quickly, Liu Yan must be a powerful existence.

To be able to have such high attainments and talent on earth attributes, Liu Yan must not be weak in other aspects.

Sun Wen immediately believed the previous rumors. Liu Yan was a monster, a genius among geniuses, and the strongest person on the fifth level of the Tower!

At that moment, Sun Wen was also curious about Liu Yan, and he wanted to know more about Liu Yan.

It was a pity that the Red Star Empire team had been eliminated. They had become prisoners of war for the Land of Origin team. They did not have the chance to do so.

Sun Wen couldn't help but sigh in regret. By the time they came to the fifth level the next year to pass the trial and head to the sixth level, Liu Yan would already be nowhere to be found.

In the vast Tower, it would be difficult to have any more opportunities to come into contact with Liu Yan.

The more Sun Wen thought about it, the more regretful he felt. It was a pity that he could not get to know and compare notes with such a genius.

Sun Wen and Ye Yifan didn't expect Liu Yan didn't even advance from Earth Talent to Earth Secret Art. Instead, he went from being completely ignorant of Earth Talent to reaching the level of Earth Secret Art in an instant.

If the two knew about this, they would probably doubt their lives.

At this moment, Liu Yan had already left the earth attribute territory.

Using his SSS-grade special equipment, the Wings of the Wind God, Liu Yan quickly flew toward the water attribute territory.

The matters of the earth attribute territory were handed over to the team members under him.

Now that the fifth level of the Tower had calmed down, there were no more enemies and no more battles. Liu Yan naturally didn't have to worry about his team members. He could focus on his matters.

After Liu Yan extracted the earth attribute core of the earth attribute territory, he successfully obtained Earth Secret Art. He also comprehended the S-grade skill, Rock Wall.

It was a powerful defensive skill and increased Liu Yan's combat strength.

Apart from increasing the power of the Rock Wall, Earth Secret Art had many other uses.

The simplest method was to gather earth attribute energy around him to protect himself and others.

There were many other uses for it in other aspects, and Liu Yan needed to explore it further on his own.

After mastering the earth attribute, Liu Yan's next step was naturally to obtain the water attribute core in his water attribute territory.

Chapter 502: Heading to the Water Attribute Core

Liu Yan pondered as he flew.

Since the earth attribute core could allow him to master the Earth Secret Art, the water attribute core would probably not be bad.

Liu Yan had this idea when they were in the water attribute territory.

However, experts from the Red Star Empire team had already headed towards the fire attribute territory under Ye Yifan's lead.

Liu Yan naturally placed the battle and their camp's safety above all else. He could only go and ambush Ye Yifan and the others.

At this moment, Liu Yan was finally free. He naturally had to head to the water attribute territory immediately to find the water attribute core to perform Divine Extraction and improve his strength.

The Wings of Wind God made Liu Yan's speed very fast, and it didn't take long for him to reach the water attribute territory.

At this time, in the water attribute territory, Luo Qingcheng had already handed over the spoils of war obtained by the European Federation team on the fifth level of the Tower.

Seeing Liu Yan's arrival, Luo Qingcheng walked up to him happily.

She didn't know what had happened in the earth attribute territory. Based on the time between Liu Yan and the others leaving the water attribute territory and the short interval between the report of the Will of Tower, Luo Qingcheng could predict many things.

In such a short time, the Red Star Empire team had surrendered.

It was not because of the main force of the Land of Origin team trying to take down the Red Star Empire team.

Apart from them, there were also Liu Yan and a group of experts.

Luo Qingcheng did not know what exactly had happened. However, she knew why they could take down the Red Star Empire team so smoothly was related to Liu Yan and the other experts, especially Liu Yan.

"You're here. I didn't expect your battle against the Red Star Empire team to be so smooth." Luo Qingcheng walked forward happily.

"Yes, it's indeed going quite smoothly. The main thing is that the Red Star Empire team is rather cooperative. Haha." Liu Yan laughed.

Luo Qingcheng smiled and didn't say much. She immediately reported the loot she had just obtained from the European Federation team.

When Liu Yan heard this, he waved his hand and said, "You're in charge of this. When we return to the fire attribute territory at night, we'll report together with the spoils of war obtained by the Red Star Empire team from the water attribute territory."

Liu Yan was still in a hurry to extract the water attribute core, so he naturally did not want to waste time on these things.

"Okay. By the way, when are we combining the Lord's token and heading to the sixth level of the Tower?" Luo Qingcheng asked again.

The Land of Origin team defeated the other four teams. After ensuring they would be the first to advance to the next round, Luo Qingcheng was extremely happy, and her whole body was relaxed.

After all, Luo Qingcheng had tried her best to break through to the higher levels of the Tower to find her sister.

According to the information she had obtained, most of the awakened ones would stay on the sixth level of the Tower for a long time.

Even a powerful team would need a very long time to break through the sixth level of the Tower.

Most of the teams would need at least one or two years.

Based on the time when her sister left, Luo Qingcheng guessed that her sister was most likely on the sixth level of the Tower.

Now that Luo Qingcheng could also go to the sixth level of the Tower, she was naturally thrilled. It meant that she would have the opportunity to find her sister, so she was looking forward to it.

When Liu Yan saw Luo Qingcheng's happy face, he immediately understood the reason.

When they were in bed before, Liu Yan had also heard Luo Qingcheng mention that her sister was likely to be on the sixth level of the Tower.

Liu Yan touched Luo Qingcheng's hair and comforted her, "We have to wait for our team members to finish recuperating. We'll probably be ready by tomorrow and head to the sixth level of the Tower. Don't worry. When we reach the sixth level, I'll think of a way to help you find your sister."

Although Luo Qingcheng did not ask for it, Liu Yan and Luo Qingcheng had a close relationship. Liu Yan still wanted to help.

Alright." When Luo Qingcheng heard this, she smiled and agreed.

Liu Yan's strength was strong, especially when he entered the fifth level of the Tower. Liu Yan's strength had advanced like a bandit, reaching an exaggerated level.

Initially, Luo Qingcheng only wanted to rely on luck to find her sister. With the help of such a powerful Liu Yan, there might be a high chance of finding her sister.

At this time, the captain of the European Federation's team, Hans Wilson, and the vice-captain, Derek Doyle, also passed by. When they saw Liu Yan, they couldn't help but walk over curiously.

"Captain Liu, what's the matter?" Hans Wilson took the initiative to ask.

Derek Doyle also asked enthusiastically, "Captain Liu, if there's anything you need help with, just let me know."

After half a day, Hans Wilson and Derek Doyle also gradually felt relieved.

In the beginning, they were still upset that the European team had lost to the Land of Origin team. After all, they had worked hard for so long, only to be eliminated here.

It had been half a day since the Land of Origin team defeated the European Federation team in such a short time. However, Hans Wilson and Derek Doyle gradually let go of their worries.

Even the Red Star Empire team, which was almost as strong as the European Federation team, had been eliminated so quickly. It was true that the strength of the Land of Origin team was too strong, especially Liu Yan's.

It was reasonable to be eliminated if one was not strong enough.

With this strength, even if he successfully advanced to the sixth level of the Tower, there would be many casualties when facing the more dangerous trials on the sixth level.

After all, if they couldn't even pass the trial on the fifth level of the Tower, how could they pass the trial on the sixth level?

Even if they failed the Tower's trial on the fifth level, there would not be too many casualties. After all, they were facing the humans of the Blue Planet.

Although they represented different continents and were competitors, they would not kill each other unless necessary.

However, it was different on the sixth level of the Tower. Not only would they face many humans from other planets, but they would also face all kinds of alien races.

Those alien races wouldn't show mercy. Once they failed, they would lose their lives.

During this half a day, Hans Wilson and Derek Doyle had thought it through. Losing to the Land of Origin team was not something to be ashamed of. It was indeed because they were not strong enough.

Rather than being lucky enough to advance and then encounter danger on the sixth level of the Tower, it would be better for them to be eliminated and return to the lower levels of the Tower. They would cultivate and increase their strength harder. Then, they would try to break through to the sixth level the next year.

Only by making more preparations would they have a higher chance of survival in the higher levels of the Tower.

Seeing that Hans Wilson and Derek Doyle seemed to be in a good mood, Liu Yan was slightly relieved. He immediately brought up the important matter, "Oh, I came here to see the core of the water attribute territory to gain some insight."

Chapter 503: Strange Water Attribute Core

"I see. I didn't expect Captain Liu to be proficient in the water attribute. Hans Wilson was surprised to hear this."

Derek Dole nodded and said, "This water attribute core is a rare treasure. I'm sure I'll be able to gain a lot if I study it."

Then, Hans Wilson and Derek Dole led Liu Yan into the water attribute territory and arrived at the water-element core.

The water attribute core was in an underground river in the depths of the water attribute territory.

The water here was still and silent, just like dead water.

However, as Liu Yan got closer, he realized this was not the case.

In this underground river, the water was flowing rapidly.

However, it was amazing that it didn't make any sound even though it was flowing so quickly.

What surprised Liu Yan the most was that one of the water streams seemed to be circling the other rapidly flowing water streams. It had not left this place.

This stream of water must be the core of the water attribute territory. It was truly magical.

When Hans Wilson saw Liu Yan's surprised expression, he smiled and said, "You are indeed Captain Liu. You can recognize this water attribute core at a glance. This water attribute core is truly magical. When I first saw it, I was also shocked. I even managed to break through to the level of Water Secret Art."

As Hans Wilson spoke, he could not help but feel proud.

To be able to reach the level of Water Secret Art on the fifth level of the Tower was already a powerful existence.

Hans Wilson was a genius among geniuses, and he specialized in water attributes. Naturally, he had a deep understanding of the water attribute.

He had been lucky on the fifth level of the Tower this time. He had encountered some good opportunities. With the help of the water attribute core, he had successfully stepped into the level of Water Secret Art.

Derek Dole smiled and said, "Our captain was skillful in the water attributes training. This time, he broke through to the Water Secret Art. It has a lot to do with this water elemental core. My previous comprehension has also improved a lot.

Hearing Derek Dole, Liu Yan nodded slightly, but his face remained calm as if he was not surprised.

Immediately, Liu Yan asked Hans Wilson and Derek Dole to leave and instructed them to arrange for people to stand guard outside. Without Liu Yan's order, no one was to come in and disturb them.

Hearing this, Hans Wilson and Derek Dole both agreed.

After leaving the underground river, Hans Wilson asked in confusion, "Since Liu Yan wants to visit the core of the water attribute territory to gain insight, it means that he has a certain understanding of the water attribute. How come he is not surprised when he heard that I have entered Water Secret Art?"

Hans Wilson was indeed a little confused.

To be able to enter the Water Secret Art level on the fifth level of the Tower meant that Liu Yan was a powerful existence. However, Liu Yan was not surprised. Liu Yan should at least praise a little, right? Why was Liu Yan not surprised? He even had a calm expression on his face as if he was used to it.

Hearing this, Derek Dole shook his head and said, "I don't know either. Maybe Liu Yan is just pretending to be calm. Also, we don't even know if he's proficient in the water attribute. After all, from the previous exchange, his mastery of the wind and fire attributes is already deep. It's already impressive for an awakened one to be proficient in two attributes, but three is impossible, right?"

"That's reasonable." Hans Wilson nodded slightly and said, "I guess he's just curious and wants to look at it. It'll be hard for him to gain much in the end."

After that, Hans Wilson and Derek Dole did not take Liu Yan's comprehension of the water attribute core seriously. They arranged for team members to guard the place according to Liu Yan's orders and went to do other things.

Liu Yan was alone on the other side of the underground river.

Liu Yan carefully observed the water attribute core and felt it was even more magical.

This stream of water could move freely in the fast-flowing underground river without being carried away. It was strange.

Liu Yan took a closer look and realized this was far from the case.

This water stream not only did not move with the surrounding water flow but could move on its own. At the same time, the surrounding water flow seemed to be under its control, which was why it could move so quickly.

At this moment, Liu Yan also remembered that this was a flat underground river. Logically, the water couldn't flow so quickly here. It seemed that it was indeed because of the water attribute.

After the water passed through the water attribute core, it was filled with power.

It was likely that all the water in this water attribute territory would pass through this underground river, through the core of the water attribute territory.

Liu Yan had only observed for a while, but he could feel he had gained something. It seemed that he had gained more insight into water attributes.

However, Liu Yan knew this bit of comprehension was still far from achieving Water Talent.

It was difficult to comprehend talent of any attribute.

Many awakened ones did not have enough talent or opportunities. No matter how much effort they put in, they might not be able to comprehend it in their entire lives.

And even if an awakened had enough talent, they would still need to be lucky and spend a lot of time before they could successfully comprehend it.

On the fifth level of the Tower, anyone who had an attribute talent was already considered a mighty expert.

As for those like Hans Wilson, who could comprehend the secret art of an attribute, they were more top-notch experts. There was only a handful of them in the entire Tower.

Hence, Hans Wilson had been a little proud.

Even though he had seen Liu Yan's terrifying combat strength, Hans Wilson knew the secret art of an attribute was still rare.

However, Hans Wilson did not expect that Liu Yan had mastered the secret arts of four attributes, namely wood, gold, and fire. He had just obtained the Earth Secret Art from the earth attribute core.

At this time, Liu Yan did not waste any more time. He only managed to obtain a small amount of information after observing the water attribute core for so long.

Liu Yan used his SSS-grade talent, Divine Extraction, on the water attribute core.

A milky white light fell on the stream of water.

However, the water attribute core dodged it.

Seeing this, Liu Yan was a little surprised.

When he used Divine Extraction previously, he either succeeded immediately or failed because the item's level was too high to extract.

However, it was the first time he had seen a situation where he did not hit his target.

Liu Yan did not care and continued to use Divine Extraction.

The milky white light once again fell on the water attribute core.

However, the same thing happened again. Just as it was about to hit, the water attribute core changed its direction and dodged it with great agility.

Chapter 504: Water Secret Art, Blessing of Water!

Seeing this, Liu Yan felt helpless.

The water attribute core wasn't big. It was a stream of water.

Furthermore, this water attribute core was flexible.

Its agility wasn't due to speed.

The speed of the water attribute territory core was not fast, and Liu Yan could easily see through its trajectory.

However, the water attribute territory core was flexible. It did not have the slightest stiffness in moving around, and everything was natural and smooth. It was why the Divine Extraction failed twice in succession.

Liu Yan didn't expect the water attribute core to be so unique. It was different from the other cores. Not only could it move, but it could also dodge.

However, Liu Yan was not in a hurry. After all, the underground river was only so big, and the water attribute core did not seem to leave this place. Liu Yan had failed a few times, but he could still try again.

Liu Yan was now over level 40, so he could use Divine Extract hundreds of times.

He could keep using Divine Extraction.

Liu Yan continued to use Divine Extraction. He thought that since the underground river was only so big, he could hit the water attribute core if he was lucky.

The light continued to fall, almost enveloping the entire underground river.

However, after many attempts, Liu Yan still failed even after using Divine Extraction a few dozen times.

Liu Yan looked helplessly at the water attribute core in the river. It was still moving nimbly.

The moving area of the water attribute core was small, which was around this river.

In addition, it did not seem to be moving very fast. It was far slower than the speed at which the white light fell.

However, the water attribute core was surprisingly flexible. It could dodge Liu Yan's Divine Extraction every time.

Just as Liu Yan was feeling helpless, his eyes suddenly lit up.

He activated his A-grade skill, Track!

Immediately, Liu Yan used his Divine Extraction.

The milky white light appeared again and fell on the water attribute core.

The water attribute core easily dodged this time.

However, the milky-white light also changed its direction and chased after him.

The water attribute core changed its direction again, but the milky-white light followed it.

With the help of the tracking spell, the milky white light kept chasing the water attribute core.

Immediately, the water attribute territory core and the milky white light began a great battle of pursuit.

Although the water attribute core wasn't fast, it was extremely slippery. It constantly dodged at very tricky angles.

However, the milky-white light was not weak at all under the effect of the tracking spell. It kept following. Although it was not as flexible as the water attribute core, it was much faster.

Liu Yan could not help but laugh as he watched the two chase each other.

"Wonderful, wonderful. Let's see how long you can run." Liu Yan laughed, not in the least bit anxious.

Sure enough, it didn't take long for the water attribute core to be caught up by the milky white light and directly enveloped.

After hitting the water attribute core, the extraction process was very fast, unlike the earth attribute core.

Not long after, notifications appeared in front of Liu Yan.

[Divine Extraction of water attribute core (SS-grade) completed. Obtained: Water Secret Art!]

[You have mastered Water Secret Art. Automatically comprehended Blessing of Water (S grade)]

Seeing the two notifications, Liu Yan immediately felt relieved.

It seemed that different attribute cores had distinct characteristics.

For example, the earth attribute core did not move at all, but it seemed to have a strong defense. Liu Yan used Divine Extraction and only managed to extract it after a long time.

This time, the water attribute territory core had the characteristics of the water attribute and was flexible.

It wasn't fast, but it was agile, making it difficult for Liu Yan to hit it.

Liu Yan estimated that he would use up hundreds of times of Divine Extraction to catch the water attribute core if he did not use Track. He might not even hit the water attribute core.

Fortunately, he had the tracking technique to catch the water attribute core.

And even with the tracking technique, the speed was even faster. It took them so long to hit the water attribute core, which showed how flexible it was.

However, after it hit, the Divine Extraction was successful.

At this moment, Liu Yan could also feel the changes in his body.

After mastering Water Secret Art, Liu Yan could immediately sense a large amount of water attribute energy around him.

He could now sense the water attribute energy clearly and use it as he pleased.

Liu Yan carefully sensed it and confirmed his previous guess.

After being nourished by the water attribute territory core, the water current was full of vitality and water attribute energy.

The water attribute core had a vast coverage. All the water in the territory was nourished by the water attribute core, which showed how powerful it was.

Liu Yan then looked at his new S-grade skill.

After he had mastered Water Secret Art, he also comprehended a new skill.

Similar to the previous situation, it was also an S-grade skill.

However, Liu Yan knew that an S-grade skill created through the comprehension of secret art was far more powerful than an ordinary S-grade skill.

Liu Yan immediately checked the effect of this skill.

[Blessing of Water]

[Grade: S]

[Effect: Using water attribute power to increase friendly units within a range. Allowing friendly units to gain a certain degree of self-healing, sensitivity, and recovery ability. Can help friendly units reduce fatigue, restore energy, and increase combat power. The specific effect depends on the user's mastery of water elemental power (current range of use: 100-meter radius)]

When Liu Yan saw the effect of his new skill, Blessing of Water, his expression turned strange. It was a support skill.

It was indeed Liu Yan's weakness, as he had never had any skills in this area.

However, Liu Yan had no idea how strong this skill was.

According to the introduction, it had many uses. It could help friendly units recover energy, heal injuries, increase sensitivity, and comprehensively improve combat effectiveness.

It looked good, but Liu Yan wasn't sure about its specific use.

However, the range of use seemed to be quite large.

An amplification ability with a radius of 100 meters was already rare.

During the previous battle, Liu Yan had seen Chu Long use her AOE enhancement skills. However, with Chu Long's talent, most of her skills could only cover a radius of 30 meters, which was enough to cover dozens of friendly members.

On the other hand, Liu Yan's water's blessing had a radius of 100 meters, which was much larger.

Chapter 505: Initial Activation of Law Warlock

Liu Yan was clear.

In the future, Liu Yan could use Blessing of Water to buff members of the Land of Origin team during battle.

Immediately, Liu Yan cast the Blessing of Water on himself, intending to test its power.

The surrounding water attribute energy suddenly condensed and then spread out like waves, causing the surrounding water attribute energy to fluctuate. Then, one of the rings of water attribute energy fell on Liu Yan's body.

After landing on Liu Yan's body, the water attribute energy flowed through his body and entered his body.

Liu Yan suddenly felt a wave of comfort wash over his body, giving him a wonderful feeling.

Liu Yan closed his eyes and carefully sensed the surroundings. His expression immediately changed.

Under the enhancement of the S-grade skill, Blessing of Water, Liu Yan could feel that his body was much more comfortable. The fatigue in his body had been swept away. In addition, his body had become much nimbler, and his overall combat strength had naturally increased by a lot.

These two effects alone were already shocking.

Liu Yan estimated that if he used it on members of the Land of Origin team, it would increase their combat strength by 20% without a problem.

An AOE enhancement skill could increase the combat power of many team members by twenty percent. Just this point alone was terrifying.

In addition, Blessing of Water could also help alleviate fatigue and quickly restore energy.

If Liu Yan had had this skill before, he would have cast it on his team members after they had killed all the monsters. The members of the Land of Origin team would have been able to recover quickly. They would have been able to fight again without having to rest.

This energy recovery skill was useful, especially in a drawn-out battle. It could play a crucial role.

In addition, this Water's Blessing could enhance the self-healing ability of friendly units, helping friendly units to recover from injuries. It was powerful. It was equivalent to a long-term healing skill, which was extremely useful in group combat.

Liu Yan wasn't sure how strong this self-healing ability was. After all, he hadn't confirmed it yet. However, Liu Yan guessed it would not be too bad.

The most important thing was that this self-healing ability was continuous. Naturally, it was powerful.

Liu Yan immediately liked the new S-grade skill, Blessing of Water.

Blessing of Water was not a combat skill but an area-of-effect enhancement skill. It was undoubtedly powerful and could provide Liu Yan with a lot of help.

It was especially true when he led his team in a battle of attrition. Blessing of Water was too valuable.

The strength of the members on both sides was similar. A single Blessing of Water could completely change the situation. It would have a significant impact on the overall combat strength of the team.

Especially after the sixth level of the Tower, there would be team battles. Blessing of Water would shine in future trials!

Liu Yan was satisfied.

He used Divine Extraction on the water attribute core and instantly mastered the SS-grade Water Secret Art. Moreover, he also comprehended the S-grade enhancement skill, Blessing of Water. It naturally gave Liu Yan a huge boost and even filled up the gap in Liu Yan's ability.

So far, Liu Yan learned the secret art of five attributes.

Although they were all five basic elements and not high-level elements, they were not the same.

However, a skyscraper starts from the ground. Without mastering the basic elements, how could one master the high-level elements?

Furthermore, Liu Yan's mastery of the five attributes was proficient, and he had reached the secret art level.

On the fifth level of the Tower, those who could master a variety of attributes were already masters. Those who could master the secret art of one attribute were top masters, which were extremely rare.

However, Liu Yan had mastered the secret art of five attributes at once, which was ridiculous.

As he grasped the secret arts of the five attributes, Liu Yan also gained a deeper understanding.

In reality, there was no difference in strength between the five attributes. Each attribute had its specialty.

For example, the metal attribute was more aggressive and was more suitable for strong attacks.

The fire attribute's specialty was its ferocity. It was somewhat like the metal attribute, but also different. It was also suitable for violent attacks.

The characteristic of the earth attribute was that it was more stable and more suitable for defense.

The wood attribute was more like using softness to overcome strength and had an advantageous effect.

The water attribute was gentler and more suitable for amplification and restriction.

Each of the five attributes had unique characteristics and specialized in different areas.

After Liu Yan mastered the secret arts of the five attributes, he realized that it was only the beginning to master an attribute completely. He had just started to touch the characteristics and powers of these attributes. There was still a long way to go.

As for the stage of attribute talent, it was just scratching the surface. It seemed powerful. It was just the attribute itself that was powerful. It did not unleash the true power of the attribute.

Just as Liu Yan was trying to figure out the advantages and disadvantages of the five attributes, a notification suddenly appeared in front of him.

[You have mastered the secret arts of five attributes. You have met the requirements. You have activated the tier 3 law warlock class!]

Liu Yan's face was filled with joy when he saw the notification.

It was a powerful tier 3 class. Moreover, it was not an ordinary tier 3 class. It was a rare hidden class.

Just the activation conditions for this job class were difficult. It required one to master the laws of five attributes.

Although elemental laws were only one level higher than secret art, the difference was like heaven and earth.

Among the top powerhouses on the fifth level of the Tower, there were already a few who could master arts.

Only the top experts could master the elemental laws.

Only the powerhouses on the 10th level of the Tower could master the elemental laws.

Moreover, not all powerhouses on the 10th level of the Tower could master it. Only a small number of extremely powerful existences could master it, which showed how difficult it was to master elemental laws.

The activation conditions for Liu Yan's current tier 3 class, the law warlock, were ridiculous.

When other people grasped an elemental law, they were already top experts.

The activation condition of the law warlock class was to master the laws of five attributes, which was outrageous.

However, Liu Yan also believed that since the triggering conditions of this law warlock were ridiculous. Its power was exaggerated.

Although Liu Yan was still far from fully activating the law warlock class, he had already begun to do so.

Liu Yan was full of anticipation as he quickly opened his new class panel.

Liu Yan

[Class]: Law warlock (tier three hidden class, initial activation)

[Class introduction]: Have the power to control the law of attributes, the origin power to rule the world!

[Class abilities]: The power of the job class to use each mastered attribute is increased by 50%. The resistance to each mastered attribute is increased by 50%. The user's body can control and use multiple attributes without conflicting attributes.

[Class skill]: Elemental Domain (SS-grade)

Chapter 506: Terrifying Tier 3 Hidden Job Class!

Liu Yan was overjoyed when he saw his new class panel.

This new class panel was simple because it was not fully activated. Liu Yan could not fully possess the power of a law warlock, but the current power was terrifying.

As expected of tier-3 hidden class. It was at the initial stage, but it was already so strong.

Liu Yan felt it was exaggerated when he saw the description of the law warlock class.

The power to control elemental laws was the origin energy to dominate the world. It sounded awesome!

Liu Yan believed that as long as he could meet the conditions to activate the law warlock class completely, he would become the strongest in this world!

Liu Yan only activated the law warlock partially, so the class ability and class skills it gave Liu Yan were limited. He only had three class abilities and one class skill.

However, Liu Yan was satisfied. Any of these class abilities and skills were ridiculously powerful and could be called godly skills. They could bring a significant boost to Liu Yan's strength!

The first class ability was that it could increase the power of each attribute that Liu Yan had mastered by 50%.

Currently, Liu Yan mastered the profoundness of five basic attributes. Although he was still far from reaching the level of attribute law, the 50% boost still buffed Liu Yan's strength.

The secret arts were already powerful. It was terrifying to have their power increased by 50%. It was the same for all five attributes!

The first class ability alone could increase Liu Yan's overall combat strength by nearly 50%!

The second class ability was to increase Liu Yan's resistance to all attributes by 50%. This class ability was to increase Liu Yan's defense against these five attributes.

For example, the captain of the European Federation team, Hans Wilson, had also mastered Water Secret Art.

Both Liu Yan and Hans Wilson had mastered Water Secret Art. However, Liu Yan's first class ability increased the power of Water Secret Art by 50%, which allowed him to crush Hans Wilson.

In addition, Liu Yan also gained an additional 50% resistance, which made his resistance to water attribute energy extremely high.

After all, Liu Yan had already mastered Water Secret Art, and his resistance to water attribute energy was already exceedingly high. With the addition of the second class ability, his resistance had increased by another 50%.

Liu Yan was very suspicious of whether Hans Wilson's Water Secret Art could still hurt him.

The first two class abilities had already boosted Liu Yan's five-element domain. Furthermore, his attack power and defense power received a terrifying boost.

As for the third class ability, it allowed Liu Yan's body to be able to control and use multiple attributes at the same time without backlash.

This one surprised Liu Yan.

When Liu Yan fought Moonshine Qilin, he used his S-grade weapon, the Flying Cloud Mystic Bow, to perform Attribute Fusion attacks.

Attribute Fusion was a difficult skill, and only the top powerhouses of the Tower had the opportunity to do it.

However, Liu Yan succeeded in using God's Effects of the Flying Cloud Mystic Bow and Elemental Fusion.

But even so, before the fusion of the two attributes, Liu Yan still needed to infuse the two completely different elemental energies into Flying Cloud Mystic Bow.

This step was undoubtedly challenging for Liu Yan, and it almost cost him his life.

It was challenging because different attributes were different and mutually repelled each other.

An awakened one using two different attributes simultaneously would cause a backlash.

Previously, although Liu Yan had mastered the skills of many elements, he could only use one element in each attack during each battle.

But now, Liu Yan didn't have these worries.

With the third class ability of the law warlock, Liu Yan could smoothly use different elements simultaneously without any backlash.

Although he could only use different elements and not fuse them, it was already powerful.

After all, different elements had distinct characteristics.

If Liu Yan could use different elements simultaneously, it would allow him to utilize the advantages of the different elements. When different elements were combined, the power would be greatly enhanced.

In the future, if Liu Yan were to use Flying Cloud Mystic Bow's God's effect to perform Attribute Fusion, he would not be in so much danger.

When using two elements, Liu Yan had the third class ability of the law warlock, so he would not suffer any backlash.

As for Attribute Fusion, Flying Cloud Mystic Bow would do it, not Liu Yan himself. Hence, there would be no problem.

With that, Liu Yan could use the Flying Cloud Mystic Bow's God's Effects more smoothly in the future. The fusion of elements would make Liu Yan's trump cards more stable and terrifying!

In addition to these three class abilities, Liu Yan automatically learned a new class skill, the SS-grade Elemental Domain.

Even though he only had one class skill, it was SS-grade and undoubtedly terrifying.

Liu Yan obtained many skills with his SSS-grade talent, Divine Extraction. Many of them were extremely powerful.

Liu Yan possessed many powerful S-grade skills. However, there was only one SS-grade skill, Soul Snatching. He had only been able to learn it after receiving the inheritance of Principal Zhong Yuntian from the Lighthouse Academy on the central resting platform of the three-and-a-half level of the Tower.

Liu Yan never thought he would have the chance to obtain a second SS-grade skill on the fifth level of the Tower.

Liu Yan was filled with anticipation as he quickly checked the effect of the new SS-rank skill. It was Liu Yan's second SS-rank skill!

Elemental Domain

[Grade: SS]

Description: Able to use the elements that you have mastered to form a domain of various elements. It has terrifying power. (The higher the mastery of the elements. The higher the proficiency, the stronger the domain's power. The user can also use multiple elements to form a territory, but only the coexistence of attribute power and not the fusion of attribute power. After fully activating the law warlock class, the user can fuse attribute power)

After Liu Yan saw the effect of the Elemental Domain, he was pleasantly surprised. It was a domain skill.

According to Liu Yan's understanding, there were very few methods to obtain a domain.

One was that after mastering the laws of an element, one would naturally be able to use an element domain.

However, this condition was undoubtedly extremely difficult for Liu Yan.

Even with the Divine Extraction, it was much easier for Liu Yan to master the law of attributes than other awakened ones. However, it was still tricky. After all, it was difficult to encounter such high-level attribute treasures.

In a short period, Liu Yan would not master the elemental laws.

The other method was to use special equipment, skills, and treasures to unleash the territory.

This type of domain was weaker than the natural-formed domain, which had reached a profound level of control over the elements. However, it was still powerful.

Chapter 507: Elemental Domain

Rumors said domains contained terrifying elemental powers.

In the domain of an awakened one, there was almost no awakened or any other living being that could defeat the user.

In a domain, the user could control everything!

Of course, Liu Yan's current domain did not reach that level yet, but it was already powerful.

Liu Yan did not know how terrifying the domain's power was. The specific power and range would naturally have to be determined by Liu Yan's mastery of his attributes and his strength.

However, since it was an SS-grade territory skill and an SS-grade skill, it must be powerful.

In addition, Liu Yan also discovered that the introduction to the Elemental Domain stated that it could form a domain of many elements.

Even though the elements were only coexisting and not fusing, they were still strong.

Liu Yan roughly understood the meaning of coexistence.

It was like half of the domain was fire, and the other half was water.

The fire and water elements were different elements but could form a common domain.

Although the fire attribute energy did not merge with the water attribute energy, they could co-exist without conflict.

In this way, Elemental Domain became complicated and diverse. Different domains could be formed according to specific circumstances and produce different effects.

In addition, Liu Yan also noticed that after fully activating the law warlock class, he could directly merge his attributes to form a domain. It would become brand-new knowledge for Liu Yan.

Liu Yan had never heard of anyone who could form a domain with multiple attributes.

The fusion of two different attribute energies could produce a terrifying power.

Previously, Liu Yan fought Moonshine Qilin, the final boss of the Tower's fifth level. He had successfully used Attribute Fusion with his S-grade weapon, Flying Cloud Mystic Bow.

An attack that successfully combined wood and metal attribute energy had the explosive power and sharpness of metal attribute energy. It also had an endless supply of wood elemental energy. It was terrifying.

And this was only the fusion of attribute energy, yet it could erupt with terrifying power.

The fusion of a portion of attribute energy was already extremely terrifying.

The fusion of domains would be equivalent to the fusion of all attribute energies. Wouldn't this power be even more exaggerated? Liu Yan didn't dare to think about it.

If he could successfully activate the law warlock class and use Elemental Domain, wouldn't he be invincible? Liu Yan couldn't help but look forward to it. At the same time, he knew that he still had a long way to go before he could do it.

After all, top powerhouses couldn't master the power of the laws of five attributes.

However, Liu Yan was not too worried. After all, he had an SSS-grade talent, Divine Extraction.

Other people might not be able to master the law of five attributes in their entire lives, but Liu Yan had a chance.

Although it would be difficult, there was still a chance!

Liu Yan's law warlock class had not been fully activated yet, but it was already powerful. Three class abilities and one class skill had brought a huge increase in Liu Yan's strength.

Liu Yan wasn't sure about the Elemental Domain's strength. Still, the other aspects of his strength had almost doubled Liu Yan's overall combat strength. It was ridiculous.

At Liu Yan's level, it was difficult for him to increase his combat strength by several times.

According to Liu Yan's understanding, top experts like Allen Smith were proud children of heaven.

When they were at a low level, their strength improved rapidly. It was common for their combat power to increase by several times a day.

After a major breakthrough, one's combat power could increase by ten times.

However, after one's strength had reached this level, it was difficult to increase one's combat strength by a substantial extent in one go.

After all, their combat strength was already extremely terrifying. Every 10% increase in their combat strength required a lot of time and even a lot of opportunities.

However, Liu Yan's combat strength had doubled in an instant. It was exaggerated.

If others knew that Liu Yan's combat strength had doubled just now, they would be shocked.

In addition, Liu Yan was also extremely curious about the power of this SS-grade skill, Elemental Domain.

It was the second SS-grade skill among Liu Yan's many skills.

The other SS-grade skill was Soul Snatching. It was a spirit-type skill and not an actual attack skill.

In other words, this SS-grade Elemental Domain was Liu Yan's strongest combat skill.

Only the power of those trump cards like the Elemental Fusion of the S-grade weapon, Flying Cloud Mystic Bow, and Blue Flame Strike of the SS-grade weapon, Blue Flame Gloves, could surpass the power of the Elemental Domain.

Not only was the Elemental Domain powerful, but it was also an area-of-effect skill that combined attack and defense. It was more than a combat skill.

Liu Yan wanted to test the power of his new SS-grade Elemental Domain, but he knew that this place was too small for him to use it.

Even if he used it outside, the fluctuations might be too massive and draw attention.

Liu Yan could only hold back his urge and wait until he reached the sixth level of the Tower. When he faced more powerful enemies, he would test Elemental Domain.

After that, Liu Yan looked at the continuously swimming water attribute core and left in satisfaction.

This water attribute core brought Liu Yan a fruitful harvest.

It gave Liu Yan an SS-grade Water Secret Art and an S-grade Blessing of Water. Besides, it also helped Liu Yan activate his tier 3 hidden class, law warlock, and his combat strength received a terrifying boost.

At this moment, Hans Wilson and Derek Dole rushed to the underground river.

"Captain, what's the matter? I'm busy with the business of our European Federation team, and you called me over in a hurry. Is there an urgent matter?" Derek Dole followed Hans Wilson with a puzzled expression.

Derek Dole and Hans Wilson had known each other for some time, so he knew more about Hans.

Hans Wilson's temperament was calm, especially after becoming captain of the European Federation team. With the responsibility on his shoulders, he became even more collected.

But the current Hans Wilson was undoubtedly a little flustered, and it seemed that something was not quite right.

Derek Dole had not seen such a flustered expression on Hans Wilson for a long time.

Even when the European Federation team was about to be eliminated, Derek Dole didn't see Hans Wilson so flustered.

Chapter 508: Strange Water Elemental Energy

Derek Dole followed Hans Wilson to the underground river. They were not far from the water attribute core.

Derek Dole saw that Hans Wilson was about to enter the underground river, so he quickly stopped Hans Wilson.

"Captain, what are you thinking? Captain Liu is inside. He ordered that no one is allowed to enter and disturb him without his permission. Are you going to disobey his order?" Derek Dole said with a worried expression.

In Derek Dole's heart, he acknowledged Hans Wilson as the captain. Liu Yan was a temporary captain because the European Union's team lost to the Land of Origin team.

After the trial on the fifth level of the Tower, Liu Yan would lead the Land of Origin team to the sixth level of the Tower. They would take the European Federation team back to the lower level of the Tower. At that time, Liu Yan would no longer have anything to do with them.

However, the European Federation team was a prisoner of war of the Land of Origin team. They naturally had to obey Liu Yan's orders.

After all, the higher-ups were bound by the Will of Tower. If they disobeyed Liu Yan's orders, they would suffer the revenge of the Will of Tower.

At this time, Derek Dole saw that Hans Wilson was about to enter the underground river and disobey Liu Yan's order. He tried his best to stop Han Wilson.

When Hans Wilson heard this, he stopped in his tracks. He had also recalled this matter. Indeed, he could not disobey Liu Yan's orders.

But Hans Wilson still wanted to enter the underground river.

Just a moment ago, Hans Wilson was busy with the European Union team and dealing with some matters.

Hans Wilson had Water Secret Art. He suddenly sensed that something had happened to the water attribute core in the underground river.

The violent fluctuations of water elemental energy surprised Hans Wilson.

This kind of fluctuation seemed to be much more powerful than his Water Secret Art.

Although they were at the same level and not many were powerful, they were above him.

After realizing something was wrong, Hans Wilson was surprised and wanted to rush over immediately.

Derek Dole was still at the stage of Water Talent. There was a huge gap between them, so he naturally could not sense the fluctuations.

Hans Wilson looked at Derick Dole with excitement and said, "Derek Dole, did you know that there was a violent fluctuation of water elemental energy here just now? Something incredible must have happened."

"A water elemental energy fluctuation? How intense is it?" Derek Dole couldn't help but ask in confusion.

A while ago, the water attribute core had an energy fluctuation.

Hans Wilson and Derek Dole happened to be there.

With the help of the fluctuation of the water attribute core, Hans Wilson successfully achieved a breakthrough. He entered the stage of Water Secret Art.

Although Derick Dole had not entered Water Secret Art, he benefited a lot from it. His mastery of the water attribute talent had increased by a lot.

He did not expect the fluctuation of water elemental energy happened again.

Hans Wilson looked at Derick Dole in shock and said, "The fluctuation of water elemental energy this time is much more powerful than last time. If we can go in and seize the opportunity, we can improve a lot. You may even have the chance to step into the stage of Water Secret Art!"

"Really?" Derek Dole was a little surprised when he heard this. He then looked at the depths of the underground river and couldn't help but look forward to it.

He naturally did not want to miss such a rare opportunity.

The water attribute core had a lot to do with the fact that they had gradually come to terms with the elimination of the European Federation team.

Because they had used the water attribute core's fluctuation of water elemental energy, they had gained a lot of insight. Their strength had improved greatly. They had not come to the fifth level of the Tower in vain, and they were able to feel at ease.

The previous fluctuation had brought them such a great harvest.

This time, the fluctuations were even more powerful. If they could enter and comprehend it properly, it would make them improve a lot.

However, Liu Yan was still inside and had ordered them not to let anyone in.

At this moment, Hans Wilson and Derek Dole were undoubtedly hesitating. They wanted to seize this opportunity and quickly enter to comprehend and improve.

However, they did not dare to disobey Liu Yan's orders.

If they forced their way in, it would be fine if Liu Yan didn't care.

However, if they made Liu Yan unhappy, they would be punished by the Will of Tower. There would be consequences.

For a moment, both Hans Wilson and Derek Dole were anxious.

It was especially true for Derek Dole. After the previous fluctuation of water elemental energy, his Water Talent had reached a profound level. He was not far from learning Water Secret Art.

This time, the fluctuations were even more intense. If Derek Dole could grasp this opportunity, He might advance into Water Secret Art, which would boost Derek Dole's strength.

This opportunity was rare. It was Derek Dole's only chance.

After all, the trial would end soon, and they could only return to the lower level of the Tower.

No matter how many resources they had at the lower levels of the Tower, they would not be able to come into contact with high-level treasures like the water attribute core.

They would only come to the fifth level of the Tower a year later.

Even if they waited for a year and came to the fifth level of the Tower again, they might not have had the chance to snatch the water attribute territory.

Overall, this was a rare opportunity for Derek Dole.

If he missed this opportunity, it would be difficult to have such a good opportunity in the future.

"Sigh, I want to go in too. But Liu Yan is still inside. We can't disobey him." Derek Dole said with a helpless expression.

At this moment, Hans Wilson said with a strange expression, "Strange, why did the water elemental energy fluctuations inside suddenly disappear? Was the fluctuation not caused by the water attribute core? It couldn't be. It's too strong."

Derek Dole felt a little regretful when he heard this. He had missed such a good opportunity just like that. At the same time, he was a little puzzled.

Logically speaking, the fluctuations caused by the water attribute core would last for a while and would not end so quickly.

Was the fluctuation not caused by the water attribute core but by some other treasure or item?

"That's not right. Only the water attribute core and Liu Yan are in this underground river. There's nothing else. If it's not the water attribute core, is it Liu Yan that caused such a strong fluctuation?" Derek Dole asked with a puzzled expression.

Chapter 509: Rarely Seen Leader

At this moment, Liu Yan had already walked out of the underground river.

Liu Yan saw Hans Wilson and Derek Dole here and greeted them with a smile.

After all, Liu Yan had just gained so much, so he was in a good mood.

"Captain Liu, you're done with your comprehension?" Hans Wilson asked doubtfully.

Liu Yan had only been in there for a short while. How could he have comprehended it in such a short time?

“Yes, it has already ended.” Liu Yan replied with a smile. He then unfurled his Wings of Wind God. He flew out of the water attribute territory, returning to the fire attribute territory.

Derek Dole looked at Liu Yan’s back in the sky. He could not help but ask, “That’s weird. Why did Captain Liu come out so quickly? Did he not comprehend the water attribute core and only went in to take a look?”

“That’s a possibility.” Hans Wilson nodded “It’s true that awakened ones, who are not proficient in water elemental energy, can’t have much insight into the water attribute core. However, there’s one thing that I can’t figure out. Why did Captain Liu look so calm when there was such a huge fluctuation just now?”

Derek Dole also thought of this when he heard this. He was also puzzled.

Liu Yan might not be proficient in water elemental energy, so he was not very clear about the fluctuations of the water attribute core.

However, Liu Yan should have sensed such an intense fluctuation from a close distance.

“I don’t understand. Let’s go in and take a look.” As Hans Wilson spoke, he entered the underground river.

Derek Dole followed him in.

After Hans Wilson and Derek Dole entered the underground river, they checked it out.

After checking, the two of them were surprised to find the water attribute core had not changed. It was still the same as before, and there did not seem to be any energy fluctuations.

On the other hand, some water elemental energy residuals were on the empty ground. It seemed that the water elemental energy fluctuation had just occurred here.

“From the looks of it, it doesn’t seem like the water attribute core caused the energy fluctuations, but something that just caused the energy fluctuations in this open space. But what could cause an energy fluctuation stronger than the energy fluctuations caused by the water attribute core last time?” Hans Wilson could not help but ask doubtfully.

Derek Dole was also confused.

This water attribute core was an extremely powerful water attribute treasure. It contained a terrifying water elemental energy.

Logically, there should be no existence to cause stronger energy fluctuations than the water attribute core.

There was nothing around here. Only Liu Yan had been here just now.

“Don’t tell me it was caused by Captain Liu?” Derek Dole couldn’t help but guess.

When Hans Wilson heard this, he frowned slightly. He felt that this was impossible.

Liu Yan didn’t stay for long after entering this place, and he left immediately.

If Liu Yan had mastered Water Talent or Water Secret Art, he would not have stayed here for such a short time. He would have used the water attribute core to comprehend it.

However, Liu Yan did not stay for long. It meant that Liu Yan was not proficient in water elemental energy.

Although Hans Wilson felt it was impossible, he knew there was no explanation other than Liu Yan. He was even more confused.

“I don’t understand. It seems we can only know the truth by asking Captain Liu.” Hans Wilson shook his head helplessly.

Derek Dole could not help but say in distress, “Captain Liu will probably fuse the Lord’s token tomorrow. He will lead the team members of the Land of Origin team to the sixth level of the Tower. We’ll also return to the lower level of the Tower. I’m afraid we will have a slim chance of seeing Captain Liu again.”

Hans Wilson also understood. Liu Yan and the Land of Origin team were heading to the sixth level of the Tower. On the other hand, they were returning to the lower level.

After a year, they would bring the European Federation team to the fifth level of the Tower for the trial again. They might successfully advance to the sixth level of the Tower.

However, the sixth level of the Tower was different from the lower levels. The sixth level of the Tower was extremely vast. Even if both teams were on the sixth level, the chances of them meeting each other were slim.

Hans Wilson could not help but smile bitterly. “It seems we won’t have the chance to know the truth. Forget it. Let’s go back.

Then, Hans Wilson left the underground river with Derek Dole.

Derek Dole looked back. The water elemental energy fluctuation seemed to be where Liu Yan stood.

Derek Dole thought such a powerful water elemental energy fluctuation was most likely caused by Liu Yan.

Derek Dole also felt that Liu Yan couldn’t cause such a powerful water attribute energy fluctuation with his strength.

However, Liu Yan had done many impossible things. Derek Dole now felt that anything was possible with Liu Yan. The energy fluctuation this time was probably caused by Liu Yan.

Derek Dole was shocked when he thought of this. What kind of existence was Liu Yan? Other people might be geniuses, but there was a limit to their talent.

Liu Yan was also a trial-taker on the fifth level of the Tower like them. However, he had already completely exceeded the power a fifth-level trial-taker should have. He was an existence that did not belong to this level at all. It was truly ridiculous.

At the same time, Derek Dole was also envious of the Land of Origin team members. With such a captain, the members of the Land of Origin team would become stronger in the future.

At the beginning of this trial, the comprehensive strength of the Land of Origin team was considered average among the five teams.

However, the Land of Origin team was the only team without any allies, so it was reasonable to say they would be the first to be eliminated.

However, the Land of Origin team had a figure like Liu Yan as the captain. Under Liu Yan's leadership, the result was the opposite.

The Land of Origin team did not get eliminated. They had even defeated the four strong teams one by one. Under Liu Yan's leadership, the strength of the Land of Origin team members also gradually improved and caught up, surpassing the other teams.

It was what Derek Dole was afraid of. Not only was Liu Yan powerful alone, but he also led the team members of the Land of Origin team to improve their strength together. With his strength alone, he could affect the strength and fate of the entire team!

Derek Dole couldn't help but sigh. This year's Land of Origin team had a leader like Liu Yan. It seemed that they would become stronger!

Chapter 510: Azure Frost Pearl

At night, in the fire attribute territory.

Team members of the Land of Origin team had already returned to the fire attribute territory to rest and reorganize.

At this moment, the team members were undoubtedly excited.

The arduous trial on the fifth level of the Tower was finally about to end.

It had ended perfectly as they won the trial and received generous rewards.

The team members were having rare leisure time as they hung around. They were having a fun time.

"Ha-ha, who would've thought that our team would win first place in the end?"

"That's right. At that time, I thought we were going to be eliminated. I didn't expect the result to be like this."

"Fortunately, Captain Liu chose to attack the Pan-ocean Community team in the wood attribute territory, which reversed the situation."

"I still remember the situation clearly. The four teams from the two alliances wanted to work together to defeat us. It was a desperate situation."

"If we didn't listen to Captain Liu's orders and chose to play dirty, we would have been eliminated the next day."

"I'm so glad we have such a captain."

"The reason why our team is in such a favorable situation is mainly because of our captain."

"I heard that the reward for first place is the Golden Lord Token. I wonder what its effect is.

"It seems related to the trial on the sixth level of the Tower. Rumor says that the trial on the sixth level of the Tower will be much smoother with the Golden Lord Token."

"I wonder what the sixth level of the Tower will be. I heard it's much more dangerous than the fifth level."

...

The team members of the Land of Origin team discussed this among themselves. They were all happy and grateful to their captain, Liu Yan.

At this moment, Xu Han and Luo Qingcheng led a small team from the earth attribute territory and water attribute territory.

A group of team members came over when they learned that Xu Han and Luo Qingcheng's two teams had returned to the fire attribute territory.

They all knew that Xu Han was in charge of receiving the spoils of war that the Red Star Empire team had obtained on the fifth level of the Tower.

Luo Qingcheng was in charge of the water attribute territory to get all the spoils of war obtained by the European Federation team on the fifth level of the Tower.

Now that they had returned. It meant they had brought back the spoils of war from the two teams.

The European Federation team and the Red Star Empire team were not weak. The spoils of war they obtained would be abundant. The team members were all filled with anticipation.

"I wonder what gains the European Federation team and Red Star Empire team will bring us.

"Haha, I'm guessing it will be abundant."

"The members of these two teams would never think that all the spoils of war they obtained on the fifth level of the Tower would eventually belong to us. Haha!"

"I guess they're going to have a mental breakdown. Not only will they be eliminated, but they'll also have to hand over all their spoils of war."

"We're going to be rich this time. Haha. I hope I can get a powerful weapon."

"I want some defensive equipment. I still have enough for my weapons."

"Haha, I'm not lacking in equipment. I want to get more cultivation herbs and consumables. The most important thing is to improve my strength."

"That makes sense. Strength is the most important!"

...

Team members of the Land of Origin team were excited.

At this moment, a figure descended from the sky.

The giant green wings made him look like a god.

The team members looked up to him.

The figure was none other than Liu Yan, the captain of the Land of Origin team.

After landing, Liu Yan kept his wings and came to Luo Qingcheng and Xu Han.

“How is it? Did you bring back the spoils of war?” Liu Yan asked Luo Qingcheng and Xu Han.

“Yes.” Luo Qingcheng nodded slightly and said, “Except for some healing herbs for the European Federation team, I have brought back all the other spoils.”

Xu Han nodded in agreement. “The Red Star Empire team was uninjured, so I didn’t leave anything behind. I brought them all back. I also took all of their equipment without missing a single piece.”

Hearing Xu Han’s words, the team members all laughed out loud. They felt that the members of the European Federation team and Red Star Empire team were pitiful. They even had to take off and give the equipment pieces they had obtained on the fifth level of the Tower to the Land of Origin team.

“Let me look at the list, then prepare to distribute the spoils.” Liu Yan nodded.

These spoils of war were extremely precious, but there was no need to keep them. Of course, it was most meaningful to distribute them to the team members to improve their combat strength.

Luo Qingcheng and Xu Han both handed the list to Liu Yan.

Liu Yan took it and began to check it.

The general situation was like what Liu Yan had expected.

The European Federation team and the Red Star Empire team did not have it as smoothly as the Land of Origin team. Hence, the spoils of war they obtained were not as much as the Land of Origin team.

However, the European Federation team and the Red Star Empire team were not weak. They had also obtained quite a lot of spoils.

Their spoils of war had already exceeded all the Land of Origin team had obtained.

Among all the spoils of war, the most precious was the SS-grade equipment or treasure that the two teams obtained from the platinum treasure chest after killing the fourth wave of elite monsters.

The European Federation team from the water attribute territory got an SS-grade treasure, the Azure Frost Pearl.

Liu Yan immediately took out the Azure Frost Pearl and checked its attribute panel.

[Azure Frost Pearl]

[Grade: SS]

[Description: An orb condensed from the extreme frost elemental energy from the primordial era. It contains terrifying power, but only those who are proficient in frost elemental power can use it. Otherwise, they will suffer a backlash.]

[Usage requirement: Master of frost elemental energy]

[Effect: the power of frost-type elemental skills is increased by 30%. Resistance to frost-type skills is increased by 30%. Automatically helps the user to recover frost-type elemental power.]

[God's Effect: Frost Strike (can store a large amount of frost elemental energy during regular times. It can explode at a critical moment, causing a large area of effect frost attack. It has strong control ability!]

Liu Yan's eyes lit up when he saw the Azure Frost Pearl's attributes.

Azure Frost Pearl was a rare treasure, and its attributes were powerful.

It was similar to the S-grade Mysterious Fog Pearl he gave Chu Long before. Of course, this Azure Frost Pearl was SS-grade and was much stronger. It could be considered an enhanced version of the Mysterious Fog Pearl.

Azure Frost Pearl could increase the power and resistance of the user's frost elemental skills. The increase was significant, reaching 30%.

The other function was to help the user recover their frost elemental energy. It allowed the user to continuously release frost elemental energy, which would enhance their combat power.

Most importantly, Azure Frost Pearl had a God's Effect.
