

## **Triplets On SM 1131**

Chapter 1131-Molly sighed resignedly.

She never cared about fame. Instead of wasting time thinking about fame, she would rather treat patients.

Besides, without Sean, she would not have this reputation.

Without Sean, she would n't be able to deliver the supplies to all areas in time.

But people were waiting for her now, so it was hard for her to refuse.

Molly then followed Selon to the conference room.

There were many people sitting in the conference room. They came from different countries and were the heads of various medical teams in Domster.

They stared at them as Molly and Selon walked in.

Folke, sitting at the head of the table, stood up and said," Everybody, this is Dr.

May. She played an important role in the delivery of supplies to your area."

Molly took off her mask and greeted, "Hello."

Everyone was shocked to see her face.

“I have heard that Dr. May is young, promising, and skillful, but I didn’t expect you to be so young and so good-looking.” “Dr. May, you saved many lives this time. On behalf of our region, I would like to express my sincere gratitude to you.”

“That’s right. We want to offer our utmost thanks. Previously, due to the shortage of medicine in our region, thousands of injured people were unable to take medicine in time, almost resulting in terrible consequences. Dr. May and Captain Green sent people to get the supplies back in time, which solved our problem. What you have done helped too many people.”

Molly listened to everyone’s words and waved her hand.

“You flatter me. I just made a little effort. In fact, it was Captain Green and his team members who took back the supplies regardless of the danger. I only played a small part. Don’t praise me. We gathered you here to discuss the alliance. At present, the supplies we have found won’t last long, so we need to unite to find the enemy’s other warehouses and retrieve the lost supplies.

Please don’t praise me. It’s better to focus on the supplies.”

The others had no objection to what Molly said.

They appreciated Molly’s attitude of taking no credit.

Soon, people began to talk about the next plan.

Outside the door, Jose, along with his assistant and several trusted doctors, heard the conversation in the conference room.

Daisy was among them and immediately complained, “Molly is very talkative and very good at winning popular support, but she forgot that Selon is the general leader of this trip. Everyone knows his hard work these days. But now, Molly has stolen the limelight.”

Jose frowned when he heard what Daisy said.

Molly became famous after this experience. There were stories about her everywhere, which made the Shepard family insignificant.

Particularly, a lot of medical staff spoke quite highly of Molly.

She was just a doctor, but her honor had covered the whole Shepard family, which was too humiliating for the Shepard family.

Jose snorted and said, "Let Molly come to me after the meeting is over."

After hearing this, Daisy was delighted and said, "OK, Uncle Jose."

Then Jose left.

Daisy was proud of what she had just said because it made Jose angry with Molly.

'Jose will definitely give Molly a lesson she never forgot!'

Chapter 1132-xpect when she just came out of the meeting room, she got stopped by Daisy, "Uncle Jose wants to see you."

Daisy showed a gloating look as she said this.

Molly could tell by Daisy's face that nothing good was going to happen.

Jose didn't like Molly all the time, and now he wanted to see her, so it was clear that he would not treat her well.

But Molly wasn't afraid of him. After she found out where Jose was, she went over.

On the roof of the hospital building.

When Molly just came out, she saw that Jose was standing by the railing. His face was expressionless, and he showed a sharp condescension.

Molly walked over. She asked with a coldness on her face, "Mr. Shepard, what is it you want to see me about?"

Jose didn't beat around the bush. He said directly, "Dr. May, I've called you here to talk about your recent behavior."

"Hmm?" Molly raised her eyebrows and said, "What's the problem with my behavior?"

"Dr. May, I can understand you're young and pushy.

However, in a place like this, the most important thing we have to do is to save people's lives. You're taking this opportunity to make a name for yourself, which puts the cart before the horse in the Shepard family's FREE clinic. So, I hope you can behave yourself."

Jose said in a rude way. Every word he had said was an accusation against Molly.

Molly had expected nothing nice from Jose.

But she didn't expect these "charges" to be placed on her unhesitatingly.

She smiled, "Do you really think these things are putting the cart before the horse, or do you feel resentful that I'm upstaging the Shepard family?"

Jose's face was overcast with madness, "These two things are irrelevant."

"Really? Then why did you accuse me of this?"

Molly said stoutly, "From the day I entered the slum, I spent almost all my time treating the wounded, except eating and sleeping. The only reason I went with Captain Green and his people to get medical supplies was also for the wounded. After I came back, I worked without a break. I performed five operations every day. You said that I put the cart before the horse? Mr. Shepard, let me ask you something. You went out with some people asking for information about the warehouse, but you came back empty-handed, not helping in any way. How dare you stand here and question me now?"

"You..."

Jose was sullen and angry.

But before he could say anything, he was interrupted by Molly, "And, now that you know that the Shepard family is the leader, lots of things should be your job.

But there were only some people were working, for example, Selon, the doctors you recruited, and Captain Green and others who were responsible for protecting the medical staff... And what are the other people in the Shepard family doing?"

Jose was speechless at the retort.

Molly continued to retort, "And you're not here to save people's lives. Don't say that you are very great. Don't think I don't know that you are here for the so-called 'Treasure of Ancient Medicine'. So, Mr. Shepard, there's no need for you to boss me around and ask me to behave myself. You're not qualified."

She didn't want to waste her time talking with him. After finishing her words, she said coldly, "If there are no problems, I've got to go now. And there are a lot of wounded waiting for me."

After finishing her words, she turned and left.<sup>a</sup>

Chapter 1133-Not long after Molly left, Byron Hawk, Jose's assistant, came out of the abandoned water tank aside.

Byron had been hiding there earlier.

As soon as he came out, he narrowed his eyes and said, "What a sharp-tongued girl!"

Jose's face was frighteningly gloomy, with a hint of coldness in his eyes.

"When the free clinic is over, don't let this woman go back alive!"

Byron was stunned. "If we attacked her rashly, I'm afraid that it would be hard to explain to Selon."

"It will just be an accident. It's easy to explain."

Jose laughed coldly.

Byron did not say anything after hearing Jose's words.

It was as if a person's death was no different from a normal meal in his eyes.

Jose did not continue this topic and changed the subject. "The martial art families are on their way. Do you have any clues about the old man from the Ballard family?"

Byron shook his head and replied, "Not yet. The slums are so big, and there are hundreds of thousands of injured people. We don't even know the appearance of the old man. It's a little difficult for me to investigate."

"This time, the old man is not only related to the ancient medical books, but also related to SRS virus! We must find him as soon as possible. This is also an order by the patriarch before we came."

Jose instructed with a serious expression.

Byron did not dare to slight. "I've understood. I will find him as soon as possible."

The two of them chatted for a while and then left.

Not long after they left, Merak climbed up from the railing on the edge of the rooftop.

Just now, she had hung herself in the air with ropes and hooks, trying to eavesdrop.

She was worried that Molly would be bullied, but she didn't expect to hear such an amazing thing.

She thought that there was something wrong with the Shepard family!

As for Byron, he did not look like an ordinary assistant.

Judging from his steady walking posture, she thought that he should have been well-trained.

"What on earth is the Shepard family up to?"

Merak narrowed her eyes and pondered for a moment.

Although she didn't understand their intention, the Shepard family was so bold that they wanted to kill Molly!

The Shepard family was simply tired of living!

Merak soon left the rooftop to find Dubhe, and told him what had just happened.

After hearing this, Dubhe wore a cold expression. "It seems that Mr. Dan is indeed Jordan Ballard! It just so happens that I've also heard the news... The reason why the martial art families destroyed the hospitals and research laboratories of Domster everywhere is that they had secretly developed SRS in

large quantities in Domster! This SRS is different from the virus from a few years ago. This virus can stimulate the potential genes of human beings and make people like monsters! For example, people may have infinite power!”

“As for Jordan, it was said that he was taken away a few years ago.

Presumably, that group of people saw his ancient medical techniques and hoped that he could help develop... Unexpectedly, Jordan escaped, and when he escaped, he took a large number of research materials and evidence.

“Those people from martial art families were afraid that the truth would be exposed, so they went crazy and destroyed all the research laboratories and hospitals! Now, they are even looking for Jordan! If they find him, you can imagine what will happen to the old man!”

After hearing Dubhe’s words, Merak suddenly understood.” So that’s how it is! I finally know why those people are committing evil everywhere!”

“Is what you just said true?”

Just as the two of them were talking, Molly suddenly came out from the corner nearby.

After she left the rooftop, she had planned to return to work.

However, she found that she had left in a hurry this morning and did not bring the set of silver needles she usually used with her, so she turned back to her residence to get them.

She had never expected to hear the conversation between Dubhe and Merak

Chapter 1134-Dubhe and Merak didn’t expect Molly to appear at this second, getting startled.

“Hello, Madam.” They greeted Molly at the same time.

Molly nodded and walked toward them. “What do you mean by saying those words? It seems that you are very familiar with the circumstances in Domster.”

Hearing Molly’s words, Merak took a glance at Dubhe subconsciously, unsure whether to reply.

After a brief hesitation, Dubhe decided to tell Molly everything.

Anyway, the area would plunge into chaos soon, and they couldn’t hide it from Molly then.

Therefore, Dubhe told Molly the situation after marshaling his thoughts.

He described how martial art families caused trouble, when ancient medical families made moves, and who Mr. Dan was.

“We... After we came to Domster, we started to glean information. For one thing, we must ensure your safety. For another thing, we must be braced for any accidents.” Dubhe didn’t mention Sean’s identity, as he thought it more appropriate for Sean to tell Molly his identity personally.

After hearing Dubhe’s description, Molly kept silent for some time.

When Selon said those hidden families were more powerful than countries, Molly thought that he was overstating it.

Unexpectedly, it was true!

To her astonishment, the old man she had saved by accident turned out to be a very important figure.

Judging from the current situation, if his identity was revealed, all the martial art families would chase him.

When they gathered in the slums, the situation would be terrible!

At the thought of this, Molly became serious.

After a long silence, she ordered, "Keep the old man's identity secret. We haven't cured the wounded. If those people come, the situation will be degraded."

"Yes, Madam!" Dubhe and Merak replied.

Though Molly wanted to conceal the old man's identity, Dubhe and Merak were clear that his identity was going to be exposed because many people from the martial art families were heading for the slums.

The slums would turn to ashes shortly.

Molly didn't know what Dubhe and Merak were thinking about. After the order, she took the needles and returned to treat the wounded.

Unexpectedly, she saw a large number of medical staff, all of whom seemed to be new faces.

"Who are these people?" Molly asked Jean in bewilderment.

Jean answered, "They were dispatched by our country to help us. They not only bring many medical supplies, but will also join us in treating the injured."

Molly was about to nod when hearing an excited voice." Molly! Is it Molly?"

Molly looked back and saw Lynn.

She couldn't believe her eyes, "You... Lynn. Why did you come here?"

Lynn rushed to hug Molly and spoke excitedly, "I came to help you. I miss you very much. When I was home, I was very worried about you. Fortunately, you are alright. It is glad to see you!"

At Lynn's words, Molly gave a smile.

Molly was happy and surprised.

After all, it was very rare to meet friends in such a place.

However, Molly quickly calmed down, left Lynn's hug and asked, "Now that you came here, who will take charge of our lab?"

Chapter 1135-"The research laboratory temporarily stopped all the work!"

Lynn quickly explained the situation. "After you left, the reagent development didn't go well. Mr. Scott knew this and then announced a complete stop. He summoned a lot of people and sent them over here!"

"You mean the rest of the people also came?"

Molly was a bit stunned.

Lynn nodded her head vigorously. "Yes. Both Eaton and Kara came. However, they went to another area. You can't see them for now."

"I see."

Hearing this, Molly sighed, "Why did you come here rather than stay at home?"

"I'm here to help. I am idle anyway."

Lynn's face revealed a righteous look, and as she spoke, she caught a glimpse of Jean and Merak next to her. Lynn asked, "Molly, who are they?"

Molly hurriedly introduced them to each other.

After that, she quickly ended this topic. "Lynn, let's not chat anymore. Right now it's urgent to save people. Let's talk later."

Lynn naturally agreed.

Soon, they started to work.

In the afternoon, Molly had just finished an operation and come out when she saw Jean hurry over and say, "Dr. May, Mr. Dan somehow disappeared. I've searched for many places, but I can't find him."

"How come he's missing?"

Molly's face changed slightly as she asked.

Jean shook her head, "I don't know. I asked around. Some of the wounded said they saw Mr. Dan take the wolf out for a walk, but they didn't see him come back."

Molly's heart sank.

Could it be that Dan's identity had been exposed and that he had been captured?

Or had he just gotten lost by accident?

She was in doubt, so she told Jean, "Go elsewhere to look for him, and I'll have someone keep an eye..."

Jean nodded her head and quickly left.

Once she left, Molly was ready to instruct Merak.

Merak said, "Madam, go ask Dubhe. He has someone watching Dan, so he should know the situation."

Molly's spirits lifted. She hurried to Dubhe.

Dubhe seemed to know the purpose of her visit and said, "My men reported that Dan had been captured and locked up by the Shepard family."

"The Shepard family?"

Molly was very surprised to hear this.

Dubhe's tone was calm. "Well, I don't know the details, but the Shepard family seems to know Dan's identity."

Molly guessed that it had something to do with Selon.

Previously, when she found SRS in Dan's body, she had mentioned this to Selon.

And the Ballard family's elder, who was being looked for by many outsiders, had this in his body. Naturally, Selon could quickly associate the Ballard family's elder with Dan.

However, did the Shepard family capture Dan just for his ability to decode the ancient medical books, or was there another intention?

Molly didn't know. She could only ask Dubhe, "Do you know where Mr. Dan is?"

Dubhe nodded. "Inside the basement of the hospital. He is safe for now."

Molly was relieved to hear that.

Her mind was acute.

She felt that she had to go and sound Selon out.

She ordered Dubhe, "Keep an eye on Mr. Dan. Don't let anything happen to him. I'll go to see Dr. Shepard."

Seeing this, Merak rushed to follow behind.

The two of them quickly returned to the intensive care area and asked where Selon had gone.

When they went there, they accidentally heard Selon talking to Jose.

"Uncle Jose, why did you lock Mr. Dan up? He's still injured, and he hasn't done anything wrong. He even has SRS in his body. He needs to be treated now.

What is your purpose for doing so?"

Selon seemed to be unaware of everything and was questioning Jose.

Chapter 1136-Molly and Merak couldn't help but stop when they heard the sound.

They tried to breathe as quietly as possible without making any noise!

Jose's voice came soon. "I have my own purpose of catching him, so you don't have to ask."

"Alright. Then I will ask you something else. You came with me on my father's order to participate in the free clinic. But during this time, you haven't been involved in this matter at all. You took our men out under the pretext of looking for the warehouse, but you actually dealt with those martial art family members in private! What exactly do you want?"

Selon's tone was very cold, and his questioning was extremely sharp.

Jose didn't expect Selon to know so much, and he looked a little surprised.

But the next second, he regained his calmness.

His tone was dull without any emotion. "Master Selon, there are some things that I can't tell you for the time being!

However, I can reveal some secrets about Dan. His real name is Jordan Ballard, and he is a descendant of the Ballard family, the most prosperous one among the ancient medical families.

"Do you know why our Shepard family ranks first among the ancient medical families in recent years? That's because we know more ancient medical books than other families!

"And it's all thanks to those martial art families. It is because of their help that we can maintain our present reputation!

"After Jordan fled, the martial art families are anxious to get him back. If I can send him back to them, it will be of great benefit to the Shepard family in the future."

Molly's face darkened when she heard this in the dark.

It turned out that the Shepard family aimed to achieve this goal in the name of a free clinic.

They had really taken great pains!

Merak's eyes narrowed slightly.

She didn't expect the Shepard family to have colluded with the martial art families long ago.

She suddenly thought of something and put on an astonished and suspicious look.

Molly didn't notice the change in Merak's expression. She heard Selon ask sharply, "When did the Shepard family get in touch with those families? If I remember correctly, martial art families are making trouble everywhere! If you send Jordan back, can he still survive?"

Speaking of which, Selon seemed to have thought of something, and even his tone had changed. "The SRS virus is in Jordan's body. Since you insist on sending him back, does the virus have something to do with the martial art families?"

Jose just remained silent.

Selon's voice became a little nervous. "Why don't you say anything? Could it be that the Shepard family is also involved in the SRS virus?"

"Selon, you asked too many questions. When you get back home, the patriarch will tell you most of the truth. At present, what you need to do is to treat the wounded as much as possible to improve the Shepard family's reputation. As for the rest, I can't tell you now."

With that, Jose left soon.

Selon stood in the same place for a long time before slowly walking away.

After the two left, Molly and Merak came out of the dark with different looks.

Molly planned to save Jordan as quickly as possible!

She still remembered Jordan once told her that someone had deliberately injected the virus into his body.

If she didn't guess wrong, the martial art families must be the culprit.

Injecting this kind of stuff into the human body was no different from murdering.

Jordan had a narrow escape. If he was sent back, he would surely die!

However, if she saved him rashly, it might bring trouble to Merak and others!

Besides, Folke had taken his men to find the warehouse, so she was not sure whether she could succeed on her own.

Molly was going to discuss this matter with Merak, but she saw that the little girl had put on a gloomy and fierce expression.

This was totally different from the cute appearance Merak usually showed.

Chapter 1137-Molly was startled and asked, "Merak, what are you thinking?"

Merak came to her senses and said, "Oh, it's nothing. What's the matter.

Madam?"

Molly stared at her and asked, "You don't look right. What happened?"

"Nothing."

Merak denied it at first and then said hesitantly, "I just remembered one thing."

"What is it? What makes you so mad?"

Molly was sensitive. "Is it related to the conversation between Selon and Jose?"

Merak didn't expect Molly to get the point so quickly and hesitated before replying.

Merak thought that the master cared about Molly so much and there should be nothing she could not know.

So Merak decided to tell her, "It's about the president's leg injury!"

Hearing this, Molly stopped and looked at Merak, "Why did you suddenly mention Sean's leg injury? Does his injury have anything to do with the conversation?"

It was no surprise that Molly didn't know how the master hurt his legs.

After all, the master didn't even reveal his identity, let alone how he was injured.

Merak didn't hide it and said, "It's just my guess! The specific situation needs further investigation. There is a problem with the Shepard family. You know how bad the president's leg is, right?"

"Of course." Molly nodded and said, "His legs were almost completely destroyed. I spent a lot of effort to make him recover."

Speaking of which, Molly got agitated and grabbed Merak's arm. "What do you mean by saying that the Shepard family has a problem? Did Sean's leg injury have anything to do with the Shepard family?"

"After hearing what Jose said just now, I think the master's leg injury is at least indirectly related to the Shepard family," Merak said firmly.

Molly was anxious and said, "Would you speak more clearly? What's going on?"

How did Sean get hurt? I asked him when I was at home, but he didn't tell me.

He told me that when the time came, he would tell me. Now he is not here; you can tell me!"

Merak's hands ached from Molly's scratching.

She could tell that Molly really cared about it.

Merak nodded and comforted Molly, "Don't worry, Madam. Let me tell you. Now, there is no need to hide the president's identity from you."

Merak told Molly about Sean's other identity.

"He is the master of the Grandset and one of the most powerful men in the land, followed by many hidden families. Although his status is noble, he needs to shoulder great responsibilities and should always be on guard. A few years ago, there was a traitor in the Grandset, who secretly revealed the master's whereabouts, leading to the master being surrounded and attacked. We tried our best to save him, but it was late.

"At that time, the master was seriously injured and almost lost his legs. Later, he was sent back to Norlon to recuperate, and we contacted an ancient medical family for treatment. However, we were rejected. That family is the Shepard family."

Molly was shocked after hearing Merak's words.

She hadn't thought about the cause of Sean's injury.

Moreover, his identity surprised her.

However, she understood why Merak would say that the Shepard family was suspected.

She was worried and looked cold. "Since the Shepard family had been in contact with the martial art families abroad for a long time, they refused to treat Sean must because they figured out Sean's identity. They deliberately refused to save him."

Merak said coldly, "That's right. I guess they might want to kill the master if they have the chance. It's just because of the influence of the Anderson family at Norlon and the deterrence of the Grandset, so they dare not do that!"

Chapter 1138-After she heard these words, Molly's eyes dimmed.

She thought back to what Sean had suffered during his treatment.

If the truth was as Merak said, the Shepard family was simply unforgivable.

"Madam, you and that Selon seem to be friends. If they are really involved, then when the time comes..."

Merak subconsciously looked at Molly.

Molly knew Merak wanted to ask her how to choose.

Molly almost didn't even think about it before saying, "I naturally stand on Sean's side unconditionally. Selon did give me a lot of help. I am grateful to him, but if the Shepard family is really involved, they will be my enemies."

She paused, remembering how Selon had questioned Jose just now, and added, "However, from the conversation just now, Selon is probably unaware of it."

Merak said lightly, "That's true, but he is a Shepard after all."

To put it bluntly, if things were revealed in the future, Selon would definitely support the Shepard family.

After all, he was the next head of the Shepard family.

Molly understood this.

However, she was very firm in her heart.

No matter who hurt or was about to hurt Sean, she was hostile to them.

Molly quickly calmed down and said to Merak, "Let's go to Dubhe and find a way to save Jordan. I feel that their purpose is not simple."

Merak nodded. "OK."

The two quickly went to Dubhe to discuss the rescue.

After listening, Dubhe didn't have any objections. "I'll arrange this. We'll make a move tonight to get Jordan out."

Molly said, "Be careful. I guess the Shepard family must have sent someone to guard Jordan. After you rescue him, quickly take him away. Don't stay here."

"Okay."

Dubhe soon left.

After that, Molly returned to work.

Perhaps because she knew something was going to happen, in the afternoon, Molly was a little distracted.

In the evening, she asked Merak, "When is Dubhe going to do it?"

Merak quickly replied, "Around midnight. That's when the wounded are mostly asleep, and it's right the time the paramedics change the shift."

Because of the reinforcements, during the day, the medical team developed a rotation pattern.

At that point, it happened to be when the staff in the old building of the hospital greatly reduced.

It was the best time to take action.

Molly nodded her head. "Got it."

At this time, a hundred kilometers away from the slum, Sean and the others were having a rest.

Tony looked at the route on the map while respectfully reporting, "Mr. Anderson, this road is shorter, but because of the poor conditions, we have to take another two or three hours to reach Mrs. Anderson's place."

Hearing this, Sean felt a bit happy.

Finally, they were going to see each other.

Although it had only been half a month, it was too long for him.

And he was worried about Molly, so he felt tormented every minute.

The good thing was this torment was coming to an end.

“Are you okay?”

Tony asked Sean a little anxiously.

On this journey, they were in a hurry, hardly stopping.

Occasionally, they stopped for a few minutes. Tony was afraid that Sean’s body could not take it.

Sean said lightly, “Yes, I’m in good health. Let’s go.”

“Ok.”

Knowing that Sean missed his wife, Tony did not dare to slow down.

Chapter 1139-About midnight that night.

The night grew blacker. A fine rain was falling.

After Molly finished her handover with the shift doctor, she took Merak back to the residence.

They didn’t expect they saw Dubhe when they had just arrived.

“Why are you still here?” Merak was very astonished, “Why are you still here?”

Aren't you going for action?"

Dubhe answered, "Something has happened. When my subordinates went there, they happened to see that the members of the Shepard family marched Mr. Ballard to leave. They didn't know where they would go, but I think they would hand him over to martial art families."

"If that's the case, it will become a little tricky."

Merak frowned.

"What do you mean?"

Molly looked at the two people confusedly.

Dubhe explained, "Martial art families paid such a great price for him, so I think the people they sent there would be hard to deal with. We don't have enough people on our side right now, and I'm not sure if we can save him and escape safely."

"Oh, I see."

Molly understood the situation. She frowned again, evidently aware of the severity of the matter.

If they met those people, they would fight with them directly.

Before, when she went to the warehouse with Folke and his subordinates, they met two people from martial art families. These two people caused them great trouble, and they managed to win.

This time, their fate might be even worse.

Molly didn't know what to do for a moment.

She didn't want Dubhe, Merak and their subordinates to be in danger rashly.

At this point, Sillow, who had been prostrate at her feet, suddenly jumped from the ground and bellowed fiercely out of the residence.

Molly was taken aback.

Dubhe and Merak quickly got in the way of Molly and shouted, "Who? Get out."

Molly's heart beat faster, and she looked at the dark outside.

At once, a charming female voice met their ears, "Annoying! How can Sillow's senses still be so acute? I thought I hid myself well."

"I told you it wouldn't work, but you didn't believe me."

At this point, a light male voice came.

Soon a man and a woman walked slowly out of the darkness.

The woman wore slinky black clothes that showed off her curvy figure. Her big wavy hair and delicate, mixed-race facial features made her sexy and hot.

As for the man next to her, he had regular features and developed muscles, which made him look like a tough guy. He had a dignified temperament.

Molly wondered who these two people were, but she saw Merak say surprisingly, "Alkaid! Mizar!"

“Merak, long time no see.” Alkaid moved her red lips lightly and stretched out her hands to Merak with a smile on her face, “Come here. I’ll give you a hug.”

Merak ran to hug her immediately.

Dubhe looked at these two people dryly and ignored them. Then she turned her head and looked at Mizar, “Why are you here?”

“We’re here on the master’s order.”

Mizar answered composedly.

Dubhe nodded and introduced Molly to Mizar and Alkaid,” This is Master’s fiancée, Molly May.”

Hearing what Dubhe said, Mizar and Alkaid, who was over there, all looked over immediately.

Molly would have known who they were by now.

Before she heard the names of Dubhe and Merak, she knew they were named after the Big Dipper, but she didn’t think much of it.

Now, knowing that these two people were named the same way, she guessed that Sean might have seven talented subordinates.

Then she smiled at them in a friendly way, “Hello, I am Molly May.”

Chapter 1140-Mizar immediately stepped forward and greeted Molly respectfully, “Hello, Madam!”

Alkaid let go of Merak and eyed Molly up and down.

After a moment, she smiled and said, "I didn't believe it when I heard that master has a fiancée. I've never thought it to be true! No wonder master has fallen in love with you. It turns out that you're a great beauty."

Speaking of this, she came to Molly and got very close to her. "Madam, your skin is so good. How do you take care of your skin? Your skin..."

She raised her hand and touched Molly's face, saying, "It's so smooth and tender!"

Molly blinked her eyes in disbelief. She couldn't believe that she had been taken advantage of by a woman.

However, she did not mind.

Instead, Molly felt that this person was quite interested!

A faint smile played across her lips, and she touched Alkaid's back, saying, "Yours is not bad."

When Merak saw this, she immediately pulled Alkaid away and earnestly advised, "Alkaid, that's enough. You are lucky that master isn't here now. If you dare to tease Madam in the future, he will definitely chop you up and feed you to Sillow."

Alkaid chuckled, "That is exactly why I do it now. He is not here!"

Merak shook her head helplessly and leaned over to Molly's side, saying, "Madam, don't mind her. She's always like this. When she sees a beautiful woman, she can't even walk away. She's a player."

Molly was immediately amused.

She was curious about how Sean had gathered such a group of people together!

After a few simple greetings, Dubhe finally brought back the topic, "Okay, the current situation is urgent. If there is anything, put it aside. Let's talk about saving people first..."

He was about to explain the specific situation.

Alkaid was the first to interrupt. "We've heard what you said just now! Before we came here, we just happened to have gathered information. The one who came to pick up Martial Art Union! They brought quite a few people with them!"

Dubhe's eyes darkened. "That is to say, the Martial Art Union guys are the ones who stirred up trouble?"

"They must have been pulling strings behind the scenes, but on the surface, they are trying to shift the blame to the Grandset."

Mizar nodded. "This time, several families in the Grandset have also participated in this."

"Humph, those families are no match for us. Their wishful thinking will never be realized."

Alkaid scoffed and continued, "We can save Jordan Ballard. Even though the experts. We can still handle them!"

"Even if they have other ambushes, there is no need to be afraid. Megrez and Alioth should also be nearby! If they hear the news, they will definitely come as soon as possible! Not to mention..."

Speaking of this, she suddenly raised her lips and winked at Molly ambiguously, saying, "The master and Phecda should be here soon!"

Molly was stunned and almost thought that she had misheard.

She quickly came back to her senses, grabbed Alkaid's hand, and said agitatedly, "You... What did you say? Will Sean also come here?"

“Yeah.”

Alkaid didn't try to hide anything. “When the master heard that you were going to retrieve the supplies with Folke and the others, he was so worried that he rushed over with his men! If nothing unexpected happens, he should arrive tonight.”

Molly's heart was suddenly in her mouth. She became anxious!

“How could he come? His legs haven't recovered yet! What... what if something goes wrong with his legs?”
