

Triplets On SM 1481

Chapter 1481-ect.

'So something has happened to Kara.' Thinking of that, Molly became anxious. "I need to confirm what has happened to Kara."

"Calm down."

Sean grabbed her hand, fought down his discomfort and said, "Let me confirm it with Alioth first."

He called Alioth.

Alioth answered the phone quickly. "Master, I was about to report to you. Kara is strange. She looks miserable and is shouting at Eaton for the antidote."

Molly heard it clearly. Instantly, her face clouded over. She clenched her hands subconsciously.

As expected, it was related to Kara.

At that time, they heard Eaton laughing madly on the phone.

Eaton may know that Alioth was talking with Sean on the phone. He shouted, "Sean, have you felt it? It's just the beginning. The torment for you has just begun!"

Then he let out a loud burst of delirious laughter again.

Molly's face turned ashen in anger. She had the impulse to rush over to tear Eaton into pieces.

“Eaton, I have never betrayed you. Why did you activate the second Venomous Insect in my body? Stop it and give me the antidote!”

On the phone, Kara shouted hysterically and yowled in pain from time to time.

When Molly heard the word “antidote”, she had an inspiration.

‘If I guess right, Kara needs the antidote to relieve the pain after Eaton activated the second kind of Venomous Insect in her body.’ Thinking of that, Molly took the phone from Sean’s hand and said to Alioth, “Please search Eaton to see if he has carried any medicines.”

“Got it.”

Alioth went to search Eaton immediately.

But Alioth didn’t find any medicines.

It was a big blow for Molly.

‘Eaton hasn’t carried the antidote. Where is the antidote?’ Seeing that Molly became more worried, Sean said, “Call Phecda and ask him to search Eaton’s house.”

Her eyes lit up-Sean was right! She completely forgot it.

“Don’t worry. It’s not that serious. I just feel a little unwell.”

He stroked her hands and comforted her gently.

“Really?” She didn’t believe him.

He smiled faintly. "It's true. I have just been influenced slightly."

It seemed that what he said was true. Only then did she calm down and call Phecda.

"Please go to search Eaton's house. Take all the medicines to me."

Phecda didn't ask for the reason. As soon as he received the order, he rushed to Eaton's house.

At that time, Sean was suffering from the poison of Venomous Insect and couldn't help but cry out in pain.

Hearing that, Molly was worried and anxious.

"I can't stand here and do nothing. It's uncertain when Phecda will find the antidote."

She frowned tightly. 'I must come up with an alternative.' Thinking of that, she immediately called Mr. Ballard and told him about Sean's condition.

Then she asked, "Mr. Ballard, is there any way to relieve Sean's pain?"

"Sean has been influenced this time not because of the Mother Insect, so acupuncture can relieve his pain, but..."

Mr. Ballard paused.

She became anxious and asked, "What do you want to say?"

"The technique is dangerous. If there is any mistake during the process, it will be fatal."

Dangerous?

Fatal?’

Chapter 1482-Molly had always taken pride in her exceptional medical prowess, never fretting over potential complications.

Mr. Ballard, well aware of her capabilities, instructed her directly, “Pierce the crucial acupuncture points encircling the heart, ensuring your technique is unwavering and precise. Not a single error can be afforded.”

“Okay.”

Molly first assisted Sean in lying down before fetching the silver needles and commencing the procedure.

Her technique had always been impeccable-steady and accurate-and in no time, Sean’s chest was adorned with an array of silver needles.

Sean’s brow furrowed. He clutched the sheets with both hands, looking in pain.

“It’s bound to be uncomfortable immediately after the needles are inserted. Wait for half an hour and then assess the results.”

Mr. Ballard said on the phone.

Molly hung up, her heart aching as she gazed upon Sean’s face.

“How does it feel?”

She tenderly grasped his hand, her voice barely above a whisper.

Sean offered a faint smile. "A bit uncomfortable but much better than before."

Molly finally exhaled in relief, noticing the beads of sweat on his forehead. She fetched a towel and returned to his side.

Perched on the edge of the bed, she lightly dabbed away the perspiration and murmured, "Once this is done, get some rest and clear your mind. I'll be here, keeping watch over you. If "Mm."

A hint of remorse flickered in Sean's eyes, "I'm sorry for making you worry."

"No. You haven't done anything wrong!"

Molly shot him a peculiar glare.

Sean simply smiled, offering no further words.

Though it had only been half an hour, to Molly, it felt like an eternity. When it was time, she quickly plucked the needles.

Sean's face had regained some color, although he was still weak.

Molly fetched some medicine and watched him take it.

"Sleep tight."

Molly leaned in, planted a gentle kiss on his forehead, and tenderly watched him as his eyes slowly closed.

Exhausted, Sean drifted into a hazy slumber.

Molly tucked him up and exited the room.

She called Mr. Ballard.

“How is Sean? Is he okay?”

“He’s fine, fast asleep now,” Mollye replied.

Mr. Ballard contemplated for a moment before cautioning, “This time, Sean isn’t much affected because Kara is not attacked by the Love Curse, but it’s still not a good situation.

“You must address Kara’s issue as soon as possible.”

His concerns echoed Molly’s own fears.

“Don’t worry. I’ll handle it promptly.”

“Regardless, Kara mustn’t face any trouble for now, or it’ll impact Sean.”

Molly furrowed her brow, pondered briefly, and declared, “I’ll check on Kara tomorrow.”

“First, figure out the nature of venomous insects within her. Only by resolving that can you tackle the Love Curse.”

Mr. Ballard said on the phone.

“I’ll inform you once I’ve verified it.”

Regarding the venomous insect, Molly’s knowledge paled in comparison to Mr.

Ballard's, so his guidance was essential.

Mr. Ballard, of course, had no qualms about helping and promptly agreed, "Okay."

They conversed for a while and ended the call.

Molly clutched the phone, her brow furrowed in concern. Her once bright visage was now clouded with worry, as the nature of the other venomous insect within Kara remained a mystery.

She could only hope that it would not prove too challenging to resolve; otherwise, there was no telling how long it might take.

Chapter 1483-Molly didn't sleep this night, waiting for Phecda.

After more than two hours, Phecda finally came back.

As soon as he entered the door, he saw Molly sitting in the living room. He was stunned, but soon he reacted and walked over quickly.

"Mrs. Anderson, you are still awake."

"I'm waiting for you." Molly looked at the bag in his hand and asked, "Are those medicines you found in Eaton's residence?"

"Yes." Phecda dumped everything in his bag on the coffee table.

Molly immediately came over and checked these medicines.

It took her a full hour to pick out about seven or eight kinds of medicine.

Most of them were liquid and were put in glass bottles with no labels.

Molly felt it was very suspicious, so she thought these medicines needed to be further checked to know exactly what they were.

Phecda looked at the clock on the wall and advised, "Mrs. Anderson, it's late.

You'd better have a rest. We can do more tomorrow."

Molly looked up at him with a smile, "Well, I know. Put all these away."

"Yes," Phecda did as she had said.

Meanwhile, Molly went upstairs.

She had stepped as gently as she could, but she still woke Sean.

Sean frowned, "Where have you been?"

"Phecda came back. I went down to look at those medicines."

Then Molly asked carefully, "Do you want some water?"

Sean nodded, "Yes, thank you."

Molly hurriedly poured a glass of warm water for him. After watching him drink it, she finally felt relieved.

It looked like now he was all right.

"It's late. Sleep with me." Sean stared at her deeply. His heart ached when he saw the weariness in her eyes.

"Okay," Molly answered and lay down beside him.

Sean took her in his arms.

Listening to his steady heartbeat, Molly closed her eyes and soon fell asleep.

Only one wall lamp was on in the room. Under the faint light, they hugged each other and slept soundly.

The next morning, Sean got his energy and went downstairs with Molly.

Then they saw that Selon had come here.

When Selon saw them, he couldn't help smiling, "You are Sean now."

He had thought today Sean would still use Vaughn's face.

Sean nodded in response.

Molly feigned complaints about Selon's concealment, "Selon, you helped him and didn't tell me!"

If she hadn't noticed that something was strange, she would still be kept in the dark.

Selon passed the buck with a smile, "Joye, you can't blame me for this. I did what Sean had said."

Sean changed the topic and asked faintly, "Have you got any results?"

"Yes," Selon's face turned to solemnness and got down to the business, "It's all done."

Molly didn't know what they were talking about, so she looked at Selon for a few seconds and then looked at Sean before asking curiously, "What are you talking about? What is done?"

Selon just smiled but did not answer.

Sean took her hand and said, "You'll know later."

Molly could not help raising her eyebrows, "Why so mysterious?"

Chapter 1484-With doubts in her mind, Molly finished her breakfast.

After breakfast, they set off.

The car drove for more than half an hour, and it finally stopped on an isolated street.

"Where are we?" Molly asked after she got out of the car and looked around.

She hadn't been to this part of the island since she arrived.

Sean didn't answer. He took her hand and followed Selon and the others. They walked into a small workshop.

It was dim in the workshop. There was a smell of rotting wood in the air.

Molly subconsciously covered her nose. She wondered why Selon had brought them there.

Abruptly, Selon stopped in front of a wall.

He looked back at Sean.

The two exchanged a look. Then Selon raised his hand and pushed on the wall.

To Molly's surprise, the wall was pushed open.

Molly was shocked.

'Is it a secret entrance?' "Mr. Anderson, Dr. May, follow me."

Selon stepped into the entrance.

Sean and Molly followed him. As they walked forward, the passage became wider and wider.

After a few minutes, a modern medical laboratory appeared.

Molly's eyes widened in amazement, an incredulous expression on her face.

No one would have expected this abandoned workshop to lead to such a place.

Molly pulled her hand back from Sean's. She stepped forward and surveyed the medical space. She found the laboratory was fully equipped with medical equipment and medications.

It even had several consultation rooms.

It was unbelievable!

“What’s going on here?”

Molly turned to Selon with confusion.

Selon explained, “Our family secretly built this place. I wasn’t sure if it had been discovered by the base before, so I’ve been having people investigate it for the past few days.”

‘So that’s what happened.¹ Molly now understood.

“Mr. Anderson knows you need such a place, so he asked me to get the laboratory ready the other day. From now on, the laboratory is yours. You can study Mr. Anderson’s Venomous Insect here.”

Molly got excited.

This was exactly what she needed at that moment!

She excitedly took Selon’s hand and exclaimed, “Selon, you’re my savior! You help me every time!”

Selon didn’t expect Molly to be so excited. However, just as he was about to say something, he suddenly felt a harsh glare.

He subconsciously looked at Sean.

With a grim face, Sean was staring at their holding hands.

Selon had a wry smile. He tried to pull his hand back, but Molly’s grip was tight.

“Ahem—”

Sean finally let out a cough. He couldn't stand it anymore...

Molly looked at Sean with confusion, and finally, she realized that Sean was not happy.

She hurriedly let go of Selon's hand and had an awkward smile, "Sorry. I'm just so excited."

Selon teased, "It's okay. We're friends! But don't do that next time. I'm afraid Mr.

Anderson will cut off my hand."

Molly was amused. "Don't worry. He won't do that. I'll protect you!"

Then she glanced at Sean and said, "Don't be jealous. I'm just so excited! With this laboratory, I'll be able to study the Venomous Insect."

Sean still had a stern face.

Selon hastily interjected, "Go and check what's missing and make a list. I'll try to get those things for you."

Molly nodded, "Okay. Let me check."

Chapter 1485-.Now that she had a lab, she got to business.

She turned to Sean and asked, "Where's Kara?"

Just after Molly's question, Alioth came in dragging Kara.

Kara looked frail. Her body was limp. She was in a coma.

Molly frowned.

If she hadn't seen it with her own eyes, she couldn't imagine that this miserable woman was Kara, who used to be so arrogant.

"Master, Madam, Mr. Shepard," Alioth greeted the three.

Molly asked, "What's going on?"

"She had a Venomous Insect attack last night. It lasted over an hour. I guess she couldn't hold it and she passed out."

Alioth replied, "Don't worry. Her vitals seem okay."

Molly sighed in relief and nodded, "Take her to the lab."

"Yes." Alioth responded.

Molly found a pair of gloves, put them on, and went into the lab.

Kara was lying on the bed, her eyes closed, her face pale. If it weren't for her heaving chest, she would look dead.

Molly showed no mercy. She probed Kara's body with a silver needle to wake her up.

Kara opened her eyes and found herself in an unfamiliar place. She immediately sat up. When she saw Molly and the silver needle in her hand, she shouted hysterically, "Molly, what are you doing?"

Her screaming was hoarse. It seemed that her throat was injured.

Apparently, the screaming last night hurt her throat.

Molly frowned and didn't make a sound.

Kara glared at Molly and continued to yell, "You're going to hurt me, too! You'll get what's coming to you..." As she cursed, she tried to catch Molly.

Molly immediately took a step back.

Kara abruptly fell off the bed and hit hard on the floor.

Sean gave a sullen look at this scene.

Alioth tried to help, but Molly had already grabbed Kara's hair.

Alioth was stunned.

Usually Molly was very gentle. He had never seen her so vicious.

Kara looked crazy. She kept cursing Molly.

Molly was enraged. She took out her phone and turned on the camera.

"Kara, are you going to go crazy? Look at you! You're going to die because of Eaton even though he's a jerk." Molly raised the phone to Kara and spat.

She didn't care about Kara's life, but she needed Kara to save Sean, so she tried to wake her up.

Kara was going hysterical. When she saw herself on the phone, she froze.

She looked like a ghost on the phone, her face haggard, her eyes bloodshot, her eyes filled with hostility, and her long hair in a mess.

She looked like a monster!

Chapter 1486-Kara was stunned for a moment. Suddenly, she threw the phone aside and screamed, "It's not me! No! It's not me!"

She shook her head repeatedly and stepped back.

She didn't want to admit the truth.

Molly looked at Kara with an expressionless face and sneered, "That's you. You asked for it yourself!" Molly spoke the truth without mercy.

"No!"

Kara covered her ears with her hands and screamed hysterically, "I said it wasn't me!"

Molly took a step closer to Kara and stared at her indifferently. "I'm telling you, Kara, now you have only one choice: trust me and work with me on the venomous insect to cure your face, or else..."

Molly narrowed her eyes, and a grim look flashed across her eyes. "You'll be tortured by the insect and look like a ghost forever!" novelxo "Trust you?"

Kara dropped her hands and stared at Molly with a scowl. "Molly, are you out of your mind? Why should I trust you?"

Molly wasn't surprised. She pursed her lips and didn't say a word.

Suddenly, Kara burst out laughing. Her laugh sounded horrible.

“Molly, do you think you can find the antidote to the venomous insect?” taunted Kara.

“Yes.” Molly replied with certainty, “But I need time...”

“Don’t be ridiculous!”

Kara interrupted Molly before Molly could finish, “Do you know what the second venomous insect in my body is?”

Molly frowned.

“It lives on my blood and flesh, so I have to take the antidote regularly or it will take me down!”

Kara remembered when the venomous insect attacked her, she was in unbearable pain. Her face was frighteningly pale. She clutched herself tightly and her body kept trembling.

Molly couldn’t help but suck in a cold breath at Kara’s words.

‘What is this venomous insect? It’s so frightening!’ Except for Molly, Sean and the others all frowned.

They were all shocked that the second venomous insect in Kara’s body could be so vicious, and they realized how terrible Eaton was.

Molly rushed up to Kara and grabbed her by the lapels. She demanded, “What’s the name of the venomous insect?”

“Do I know what the venomous insect is?” Kara pushed Molly’s hand away and sneered, “If I knew that, how could I be so miserable?” She spat through clenched teeth, “Molly, you can’t cure the poison. Don’t try to fool me.

“I won’t believe you’ll help me!”

Kara believed that Molly hated her and that Molly wanted her to be killed.

There was no way she would trust Molly.

Molly was enraged. She clenched her fists, but soon she unclenched it. She took a deep breath and said sarcastically, “You believed in Eaton, but you forgot who turned you into a ghost!”

At the mention of Eaton, Kara’s face changed color.

Kara knew very well how miserable Eaton had made her.

But she blamed everything on Molly!

Molly then continued, “I tell you, Kara, if you want to die, I won’t stop you. And after I take care of the Venomous insect, I can have you killed, too!

“But...”

Molly calmed down and warned, “The love curse inside you matters to Sean’s life. You better do what I ask you to do.”

Chapter 1487-ore time trying to persuade Kara to cooperate. Instead, she gave a signal to Alioth.

Taking the hint, the latter immediately came over and dragged Kara to the treatment bed.

“What are you doing? Let go of me!”

Kara screamed and struggled.

Alioth had her under control. Just to be safe, Molly injected her with a sedative. Soon, Kara was quiet and unconscious.

Just then, Selon entered the room and glanced at the unconscious woman, and asked, “Joye, what’s our next move?”

Molly’s brow furrowed. She replied solemnly, “The most important thing now is to find out what the second kind of venomous insect is in her body.”

“Right.”

Selon nodded in agreement.

“Let’s check her overall body condition first and then analyze Eaton’s medicine to see if there’s an antidote.”

Molly turned to Sean. “Get the answer from Eaton’s mouth by force if necessary.”

“I know.”

Seeing that she might get busy in a moment, Sean hugged her and said softly, “Go ahead with what you have to do. If you need anything, just tell me.”

Molly smiled. “I will.”

After Sean left, Selon offered to help, saying, "I'll assist you. Luckily, I don't have to go to the research base today."

"Great."

Molly raised her eyebrows. "Your help is much needed."

The two of them smiled at each other before dividing the work. One started to examine Kara while the other began testing the drugs.

The treatment room was silent, except for the sound of the running machines.

Molly drew Kara's blood and conducted various lab tests. While waiting for the results, she also conducted other physical examinations.

Selon tested the potions that Molly had brought, analyzing their contents thoroughly.

After completing their respective tasks, Molly stretched her back and turned to look at Kara on the treatment bed. She recalled the symptoms of the venomous insect attack that Kara had mentioned earlier.

After thinking for a moment, Molly went out of the treatment room and called Mr.

Ballard.

As soon as the line went through, the old man asked, "Is anything wrong?"

Molly hummed, saying, "I've checked Kara's health condition, and although I'm still waiting for the results, there's something I need to tell you first."

"What is it?"

“Kara said that the second kind of venomous insect in her body will eat away at her flesh and blood, and over time, it may even consume her completely.”

Just repeating what Kara had said sent shivers down Molly’s spine.

Mr. Ballard listened and fell into silence.

“Is there any way to identify this type of venomous insect?” Molly asked anxiously.

Mr. Ballard let out a light sigh. “I’ll look up as soon as possible and let you know.

But be prepared, if this venomous insect is as serious as she says, it could be very difficult to deal with.”

“I know. But we still need to find out... Thank you.”

Molly’s tone was gloomy.

The old man hung up the phone without another word.

Just then, Sean entered the room.

“Alkaid has brought food. Take a break and have lunch first.”

He then asked with concern, “Tired?”

“No.”

Molly shook her head, “It’s much easier than my previous research.”

Sean took her hand. "Still, you should take a rest."

"I know."

Molly smiled and called Selon over to have lunch together.

Molly asked about the results of the drug tests.

Selon pondered for a moment before replying, "I haven't been able to identify the drug yet, but there are some ingredients that seem to be unique to the research base."

Chapter 1488-Research base?

Sean frowned, "If I remember correctly, people are not allowed to bring things out of the research base." Hearing this, Molly turned to look at Selon.

As far as they knew, people must go through many checkpoints before entering and leaving the research base. So, they could not believe Eaton had managed to bring the medicine out of such a place. Even if he had a high status in the base, it would be too difficult.

Selon nodded, "You're right. So, Eaton must have brought these things out for some important reason."

He paused and continued, "Maybe, there is an antidote to the Venomous Insect among them."

It was just his suspicion, and he didn't dare to say anything certain until it was confirmed.

Molly's eyes lit up when she said, "If they were not important, Eaton would not have taken such a risk. After all, he is a prudent person."novelxo If the antidote was among those medicines, it would be easier to solve the second Venomous Insect in Kara's body.

Selon pondered for a moment and said, "I will try to confirm it. After all, I'm working in the research base."

Sean nodded, "OK."

It couldn't be better.

Molly was a little worried and asked, "Will it be dangerous?"

The research base was the territory of the Martial Art Union. If they discovered him, he would get into big trouble. She didn't want to put him in such a dangerous situation.

Selon laughed, "Don't worry, I'll be careful."

Sean said, "Take Alkaid with you. She can assist and protect you."

The task mattered a lot, so he must not let Selon take the risk alone. Alkaid had disguised herself as Beth before and was familiar with the situation of the research base. If they cooperated, things would go on more smoothly.

Alkaid hurriedly nodded, "No problem! Mr. Shepard will be safe and sound. You can count on me."

"Alkaid, I believe you. But it will be a difficult task."

Molly was confident in Alkaid's strength.

"It's not difficult at all!"

Alkaid looked at Selon and grinned, "It's easy for me to protect Mr. Shepard."

When Selon heard this, the corners of his mouth twitched because he couldn't imagine that. It was a bit embarrassing to let a woman protect him. After all, he was a big man. But he knew Alkaid was strong, so he didn't say anything to object.

After all, it was good to have someone protect him. Now, he would have fewer scruples when taking action.

After lunch, Selon and Alkaid left and headed to the research base.

After resting for a while, Molly went to the consulting room to study Kara's medical examination report.

Her blood seemed to have no problem, and all vital signs were normal.

But after picking up the X-ray to have a closer look, Molly suddenly widened her eyes in shock. There was a living thing inside her body! It was an insect the size of a pinky finger.

Molly frowned and uncertainly murmured, "Is it the second Venomous Insect?"

Hearing this, Sean leaned over to take a look. Then, he furrowed his dashing eyebrows hard.

An insect? There was a live insect in Kara's body?

His face instantly became gloomy.

Seeing this, Molly asked in confusion, "What's wrong?"

Sean turned to face her, looked into her clear eyes, and asked, "I don't have such a thing in my body, do I?"

He also had a Venomous Insect in his body. Did it look like this too?

Chapter 1489-Molly was amused by his expression. It was normal for people to be unable to accept that they had such insects in their bodies.

However, she still truthfully said, "Has Mr. Ballard told you we must simultaneously induce out the Venomous Insects from your and Kara's bodies to heal you?"

Sean nodded with a frown, "Yes... But, anyway, is the insect in my body also this big?"

Molly finally figured out his concern and replied, "Yours is a Child Insect, so usually it should be smaller."

She pondered for a while and added, "I estimate the Venomous Insect in your body is about the size of a silk thread."

Hearing this, Sean didn't feel relieved. Even if it was the size of a silk thread, he felt uncomfortable as long as it was inside his body.novelxo "It's okay. Don't be afraid."

Molly gave him a reassuring smile and continued, "I'll help you get it out in person."

Hearing her gently coaxing him as if he were a child, he couldn't help laughing, "Okay, I can only count on you now!" Molly breathed a sigh of relief after finally pacifying him.

When she looked back at the X-ray, her expression slowly became serious.

There were two kinds of Venomous Insects in Kara's body, so she should have seen at least two insects.

Why was there only one? Where was the other one?

Seeing her intently staring at the X-ray, Sean lightly walked out for fear of disturbing her.

Molly almost pressed her eyeballs on the X-ray but still couldn't find the other insect. She blinked her dry eyes hard. When she was about to give up, she inadvertently saw a small white spot.

The shape of the spot was irregular, and it was very close to the heart. She had a bad feeling, so she immediately checked it from multiple angles on the computer.

After observing it for a while, she finally confirmed it was the other Venomous Insect. And her little face instantly became serious.

It was troublesome because it was too close to the heart. It indicated it would invade Kara's consciousness soon.

Molly couldn't help having a sense of urgency. It seemed she must solve Kara's problem as soon as possible.

Molly and Sean did not go back until it became completely dark outside.

But before leaving, she reminded Alioth, saying, "Keep a close eye on Kara. Don't hesitate to contact us if there is any anomaly."

Alioth respectfully nodded, "Yes."

Hearing this, Molly felt less worried and left.

While she and Sean were strolling back to their residence, their shadows were lengthened and shortened under the street lamps.

Although they did not speak much, they felt sweet and at ease.

But suddenly, Molly realized something was wrong.

She frowned at the pedestrians and the speeding cars and said, "I heard there is a curfew on the island at night. Why do I always see cars and people outside at night? What's going on?"

She remembered when she had gotten on the island, that lunatic, Eaton, had repeatedly told her she must not get outside at night. Otherwise, the consequences would be disastrous.

But after staying on the island for a few days, she found the realities were different from what he had said.

Hearing her words, Sean slightly raised his brows and gently asked, "Who told you this?"

Chapter 1490-Molly replied without thinking, "Eaton. He said so on the first day I came here."

Hearing Eaton's name, Sean frowned, "Do you believe what he said?"

"What do you mean?"

"Only the area near the research base has a curfew.

Although there are certain restrictions in other places, people still can walk around."

Hearing this, Molly understood what he meant and said, "That explains it."

She thought she was too stupid. She should not have believed Eaton's words!

The more she thought about it, the more she felt like an idiot. Eaton was a madman, so his words were unreliable!

Sean patted her forehead and smiled, "Honey, you're gullible. N Molly rubbed her forehead and dissatisfiedly muttered, "You think I am an idiot, right? But I've never been here before, so I know little about this place."

Sean put his arm around her shoulders with a pampering smile and softly said, "Stay by my side forever. Don't go anywhere else. I won't lie to you."

Molly felt a trace of sweetness spread in her heart, so she nodded, "Okay, I will stay by your side."

"Let's go home."

Smiling at each other, they held hands again and headed to their lodging.^{novel.xo} But soon, they saw a group of men in black questioning the passers-by on the main road not far away.

They stopped every passer-by and asked, "Have you ever seen this man?"

Hearing this, Molly paused and frowned, "What's going on?"

Sean also frowned and showed a gloomy expression. He knew more information than Molly, so he knew those men were from the research base.

And he wondered why they were looking for a person in the middle of the night.

Before he could figure it out, two pedestrians passed by them while discussing the matter.

"I heard a doctor escaped from the research base with the drugs they developed."

"No way! That person is bold!"

"The peaceful days on the small island are going to end soon."

While chatting, the two people kept sighing and shaking their heads.

After they walked away, Molly still stood in place because she had caught some important information in their words.

A doctor had escaped from the research base with some drugs?

Her heart skipped a beat when she turned to look at Sean.

Sean's lips moved. But before he could say anything, the interrogators over there suddenly noticed them. With great agility, Sean immediately put his arm around Molly's waist and pulled her into the alley beside them.

Things happened so suddenly that Molly was a little dazed.

"Run."

Hearing Sean's deep and decisive voice, she immediately came to her senses, took his hand, and quickly ran after him.

There were rapid footsteps from behind, so she knew those people were chasing them. She felt nervous and hurriedly quickened her pace.

Sean had no disguise now, so they must not be caught.

"Stop!"

The people from the research base shouted while chasing them. Molly was running so fast that she could hear only her heartbeat apart from their shouts and footsteps. And her heart was racing.

There were many old residential buildings in the vicinity, which were close to each other. Therefore, the alleys were so narrow that they could accommodate at most two people to pass through shoulder to shoulder.

They were running fast, but the people of the research base were still at their heels.

After making a few turns, they went straight into a dead end.
