

## Triplets On SM 1531

Chapter 1531-Alkaid hurriedly lined up the medicine bottles. Then she took out her phone to take a picture and sent it to Molly.

Meanwhile, Molly and Sean were waiting for their news at home.

The phone on the table suddenly rang.

Molly hastily picked up the phone and found it was a message from Alkaid. She immediately tapped it.

Seeing that it was a picture of many medicine bottles, she couldn't help but get excited.

Then she received a voice message from Alkaid.

"Madam, we don't know what kinds of medicine you want, so could you please identify them?"

Molly immediately sent a voice message, "OK. Wait a moment."

After that, she zoomed in on the photo and carefully looked at the labels attached to each medicine bottle. Then she circled what she needed and sent Alkaid the marked photo with a voice message, "Just bring back the bottles I circled."

In No. 46 Research Lab.

After reading the message, Alkaid immediately said, "Madam has already chosen the medicine bottles she wants."

Hearing her words, Blackrose took the phone to have a look. Then she said to Phecda, "Take all the medicine bottles Madam wants."

Phecda nodded.

He quickly put the medicine bottles Molly wanted carefully into the cooler and carried it directly on his back.

After that, they left No. 46 Research Lab quickly. On the way they tried to avoid the patrols on the base.

They had thought that everything would go smoothly.

Unexpectedly, they had just left the area of No. 46 Research Lab when Tevik, who had been knocked out before, woke up in advance.

He shouted regardless of the pain, "Help! Some people have sneaked into the base!"

His voice drew a lot of people in the base.

Blackrose was always alert. Hearing the noisy sound, she immediately realized that they were exposed.

"He woke up so quickly! Alkaid, go out with the cooler first. The three of us stay behind."

Blackrose gestured for Phecda to give the cooler to Alkaid.

Alkaid knew very well the importance of the medicine and the strength of the three of them, so she took the cooler without hesitation and turned around to leave quickly.

Blackrose, Phecda and Megrez exchanged glances and quickly separated to distract the patrols, in case they would find Alkaid.

Selseey, the head of the base, rushed in. He looked around with a gloomy gaze and ordered, "Arrest those people quickly. Also, search every research lab to see if anything is missing." The men hurriedly did what he had said.

In the No. 39 Research Lab.

At this moment, Selon stood at the window, looking faintly at the chaos outside.

He turned his head and said to his assistant, "Keep an eye on the research data. I'll go see what was going on outside."

The assistant nodded.

Then Selon left the research lab.

Alkaid intended to go out from where she had come from with the cooler on the back.

The drainage outlet was not far away. But she didn't expect that the patrols had returned and were lined up in front of the patrol building.

The team captain was giving his speech, "Some people sneaked into our base to make trouble and neglect of defense. We are going to catch them whatever it takes!"

Seeing this scene, Alkaid frowned and cursed in her mind. Then she hid in the shadows, lost in thought.

There was no way she could get out from where she had come from now.

She had to think of other ways.

She clutched the cooler tightly, frowning tightly.

Anyway, she couldn't let their efforts be in vain tonight.

Chapter 1532-Soon, Alkaid found a concealed flower bed. Then she hid behind it.

As time passed by, more and more security guards were patrolling.

The security guards, who had gone to suppress the rowdy families at the gate, were also called back to patrol.

As more and more security guards patrolled, they soon searched every corner of the base.

Alkaid was anxious.

She was afraid that they would eventually get to the flower bed!

She picked up her cooler and prepared to move.

But as she turned around, she accidentally bumped into a nearby bush.

The movement immediately drew the attention of a security guard not far away.

"There seems to be a noise over there..." One of the guards said, and he was coming up.

Alkaid's heart sank. A harsh look flashed across her eyes.

'Looks like I'm going to kill someone tonight!' Just as Alkaid reached for the dagger at the back of her waist, someone suddenly tapped her on the shoulder.

Alkaid was startled. She turned her head alertly to see who it was. Her eyebrows furrowed coldly...

Immediately, however, a gentle voice whispered to her ears, "Don't panic!

It's me."

She was stunned, and now she saw the man clearly.

It was Selon!

Selon breathed a long sigh of relief, "I've been looking for you for so long...

Come with me."

Alkaid immediately withdrew the dagger and followed Selon behind.

Shortly after, the security guard came over, but he only saw a white cat purring.

"It's a cat..."

The security guard immediately let down his guard and left.

Alkaid followed Selon and the two crossed many alleys. They finally got rid of the security guards and the surveillance. After about twenty minutes, they came to a place so remote that no one was around.

"Where are we?" Alkaid looked around nervously.

Selon whispered, "The base dump."

Alkaid was confused, "Why did you bring me here?"

Selon smiled, "You'll know soon..."

The two walked onward.

Two minutes later, they reached a corner covered with weeds, and Selon went to part the grass.

Surprisingly, a hole appeared in the corner through which a person could pass.

Alkaid subconsciously asked, 'You don't want me to crawl into this dog hole, do you?' "This is the only exit you can take. It took me many days to find it.

Everywhere else is blocked. You won't be able to leave if you don't hurry." Selon explained with a smile.

Alkaid gritted her teeth. Come one! She was a prestigious killer in style! How could she have anticipated she would have to go into a dog hole one day?

Selon saw her dilemma. He urged, "Molly is waiting for the antidote. Are you sure you don't want to leave through this hole?"

Alkaid had no choice.

"I will go through it!" She said with sublime heroism.

Selon nodded. He took her cooler and shoved it into the hole.

A few seconds later, a muffled sound rang out from the hole. It seemed to be the sound of the cooler hitting the ground.

Then Alkaid bent down and prepared to go into the hole.

Before she entered the hole, she paused and asked, "Where does this hole lead to?"

Selon grinned, "I just told you this is the garbage dump."

Alkaid nodded. She assumed this was where the medical waste was disposed of, so she didn't hesitate and quickly got into the hole.

She plummeted downward.

The sudden imbalance made her panic. But soon, she landed on something soft.

Before Alkaid could see where she was, she smelled a foul odor. She almost suffocated.

Chapter 1533-"Oh, my god, what the hell is the smell?" Alkaid cursed and swiftly sprang to her feet.

And she saw the scene in the front.

It was a huge dump, which consisted of not medical waste, but domestic waste!

The place infuriated Alkaid, who snapped, "Selon, can't you find a clean place?"

Hearing her words, Selon, who was on the other side of the wall, laughed and took out his phone to send a message. "You wouldn't have crawled through the hole if I had told you! Hurry up! If you talk loudly and alert those people, well get into trouble."

Alkaid shook the rotten vegetable off her body and replied, "I'll teach you a lesson later."

Then she picked up the cooler and left the dump.

Though the place was smelly, it was very safe because those inspectors wouldn't come here.

After Alkaid walked away from the dump, she contacted Molly and Sean.

The two of them were waiting for news at home and rather worried at the moment without receiving any message.

Fortunately, Alkaid called them. "Madam, Master, I've gotten the antidote."

"Great... I'm still anxious about whether something wrong has happened to you!"

Molly breathed a sigh of relief.

Alkaid replied, "Something unexpected indeed happened. I'll tell you later.

Shall I send the antidote to your home or the underground lab?"

After thinking for seconds, Molly answered, "Send it to the lab. There are inspectors of the base outside now. To avoid trouble, send it to the lab." "Yes, Madam," Alkaid responded and then hung up.

Molly put aside her phone and said to Sean, "Alkaid is returning with the antidote. Let's go to the research laboratory." "Okay." Sean stood up. He picked up a coat and asked Molly to put it on. Then they headed for the underground research laboratory hand in hand.

Ten minutes later, they arrived. Before entering in, Molly took Sean's hand and uttered in a jealous tone, "After the meeting, go and stay in the office! If everything goes well, I'll handle the second type of mother insect in Kara's body.

But before that... you can't let her see you."

At her words, Sean smiled.

He loved it when Molly got jealous for him.

Squeezing her chin happily, he kissed her and said, "As your command, my little jealous princess."

Hearing the form of address, Molly flushed but didn't deny it.

She indeed became jealous, as she didn't want him to be coveted by other women!

She soon took Sean to walk into the underground laboratory.

When they reached the office, Alkaid had been there, along with Logan and Edmund.

However, the two men kept their distance from Alkaid with awkward expressions.

Molly had initially wanted to ask what was wrong with them, but the moment she moved near Alkaid, she smelled something stale.

Subconsciously covering her nose, she asked, "Has something gone bad?"

Sean also frowned.

At this time, Logan and Edmund pointed at Alkaid together.

Sean looked at Alkaid. Some fish bones and leaves were on her dirty and stinky clothes.

Sean felt disgusted and said, "Alkaid, I asked you to take the antidote, not to pick up rubbish."

Alkaid felt wronged and aggrieved. "Oh, that's way harsh, boss! And I didn't pick up any rubbish. It's all Selon Shepard's fault!"

Chapter 1534-Alkaid told Molly how Selon had tricked her.

She was very angry, "He has gone too far. He didn't even tell me before I got out."

Molly couldn't help but burst out laughing.

"Madam, why are you laughing?" Seeing this, Alkaid complained plaintively.

"I didn't mean to," Molly stopped laughing and coughed, but her beautiful eyes were still full of smiles.

Alkaid pretended to be aggrieved, "Madam, you don't care about me."

Such a charming and aggrieved face made Molly really want to say something to comfort Alkaid.

However, Sean was impervious, "You should thank Selon for helping you.

Otherwise, you may not be able to come out."

Hearing what her master said, Alkaid pressed her lips together and then said reluctantly, "You are right. I will thank him."

She deliberately stressed the word "thank."

Molly could not help but chuckle, thinking, 'It seems that there is a grudge.' "You really sneaked into the base and even got the antidote? r» After hearing the whole thing Alkid had gone through, Logan and Edmund took a long time to come to their senses.

Both of them showed incredible expressions.

Molly looked at them and nodded gently, "Yes, they have gotten the antidote."

"Wow, that's awesome," Edmund could not help giving a thumb up to Alkaid.

Anyone who had been in the base knew how difficult it was to break through its checkpoints; even a mosquito couldn't fly in the base leisurely.

"Alkaid, good work. After this, you can go back and have a good rest."

Molly gave Alkaid genuine praise and then frowned slightly, "By the way, why are you the only one coming back? Where are Blackrose and the others?"

They had been talking for a while, but they did not see the others come back.

"They guarded our backs. When I came out, they were still in the base. I think...

they should be fine." Alkaid was very confident about the strength of Blackrose.

"But..."

Molly was still a little worried, but she was interrupted by Sean, "You don't have to worry about them. Let's go to see if the antidote works. Blackrose will find ways to make sure they are fine."

Hearing his words, Molly had to nod her head because she also knew there was really something more important to deal with, "Okay."

Then she looked at Logan and Edmund, "I need your help."

“Just say it,” Logan agreed without hesitation.

Edmund shrugged, “I have already done things for you. Do you still need to ask me?”

Molly said with a smile, “Thank you.”

She picked up the cooler and went to the research lab.

Logan and Edmund hurriedly followed her.

“Molly, can you tell me exactly what’s going on?” Logan didn’t know the details yet.

Molly glanced at him, “I’ll tell you later.”

Logan nodded.

After he entered the research lab, Molly told him about Kara’s situation.

“Venomous Insect?” Logan frowned, and what surprised him even more was that Kara’s situation was critical to the Venomous Insect in Sean’s body.

Logan knew he should thank Sean for helping him escape from the base, so naturally he would help Molly. Without saying a word, he began to test the antidote brought by Alkaid.

The three of them were all top doctors, so in less than half an hour, they found the antidote for the second Venomous Insect.

“This is it,” Molly picked up the bottle containing the antidote with her luminous eyes, and excitement appeared on her beautiful face.

Logan and Edmund were also very happy for her.

Now that they had the antidote, it was time to solve Kara's problem immediately

Chapter 1535-Molly immediately went to find Kara.

As soon as she pushed open the door, Kara went crazy and screamed, "Molly, you crazy bitch! Why do you lock me in here? Where did you send Sean? Bring him to me!"

If it was two days ago, Molly would have given Kara a pill to make her shut up.

But now Molly had the antidote, so she was in a good mood. She didn't pay much attention to Kara's tantrum.

"Molly, you are disgusting. Are you out of your mind?" Kara kept cursing.

Logan asked suspiciously, "What's going on here?"

"She's Molly's love rival." Edmund replied nonchalantly. He had got used to it.

Molly looked sideways and cast a fierce look at Edmund. She raised her eyebrows and questioned, "What love rival? Do you want a taste of muting pills?"

The look in Molly's eyes was frightening.

Edmund winced. He immediately gave a pleasing smile and explained, "Sorry, I was kidding. My bad." After that, he dragged Logan aside and briefly explained the situation.

Logan was amazed.

He glanced at Kara and then at Molly. 'So that's what's going on.' Molly ignored them. As Kara would not stop cursing, Molly lost her patience.

She grabbed the tape from the table, walked up to Kara, and sealed her mouth with it.

Then Molly warned Kara in a vicious tone, "If you ever mention Sean again, I'll make sure you will be dumb for the rest of your life!"

"Oooh-"

Kara couldn't curse anymore. She could only glare at Molly, her eyes burning with hatred.

Molly ignored that and dragged her to the operating room.

Along the way, Kara stumbled and she almost fell several times because her hands were tied up.

Logan and Edmund followed them. Looking at Molly, who gave out an intimidating aura, they were both dumbfounded.

Molly was usually a gentle woman. They never imagined she could become so frightening when she was angry.

When they got to the operating room, Molly held Kara down on the bed.

Kara didn't want to lie there. She struggled to stand up.

"Logan!" Molly shouted.

Hearing Molly's call out, Logan immediately stepped up and held Kara down on the bed.

Edmund tied Kara to the bed with straps. Then he reassured Molly, “She can’t move now.”

“Thanks.” Molly said seriously, “I need your help. Jordan has told me how to deal with the second Venomous Insect. I have to give her the antidote and then use the silver needle to lure the Venomous Insect out.” As Molly said this, she turned to Logan and Edmund.

Logan and Edmund knew how important it was to get the Venomous Insect in Kara’s body out. They both nodded solemnly.

Molly brought the antidote and the silver needle over.

When Kara saw the bottle, her eyes widened and she kept shaking her head, a fierce resistance on her face.

She thought Molly was going to poison her, so she struggled hysterically.

Logan and Edmund immediately held her down.

“Later the Venomous Insect will crawl out of her mouth. To prevent her from swallowing the insect, I need your help!”

Molly opened the bottle. With the help of Logan and Edmund, she poured the antidote into Kara’s mouth.

Kara tried to spit the medicine out.

But Molly wouldn’t let that happen. She grabbed Kara’s jaw and spat, “If you don’t want to die, you better swallow the medicine!”

Finally, Kara was forced to swallow the medicine.

The antidote was bitter. Kara's eyebrows were furrowed. She looked in pain.

Molly took out the silver needle. After sterilizing the needle, she quickly stuck it into Kara's collarbone.

Chapter 1536-Logan and Edmund fixed their eyes on Molly.

It was the first time that they saw such a treatment.

Especially, Molly's technique was quick, stable, and accurate. Her medical skills were so excellent!

They all marveled in their hearts.

At the same time, Kara didn't look well. She writhed and struggled uneasily.

The pain was so intense that it felt like a sharp knife was tearing through her flesh and blood.

"Ah..."

She cried out in pain. Her forehead was covered with sweat. Her face twisted.

Kara struggled violently. Molly was unable to acupuncture accurately.

Molly was furious and shouted, "If you don't keep still, it will writhe back into your body, and you will die!"

If it weren't for Sean, Molly wouldn't care about Kara's life at all!

"Don't lie to me!"

Kara clenched her fists tightly, bore the pain, and glared at Molly. "You want to torture me and snatch Mr. Anderson from me!"

Suddenly, Kara felt pain inside her body again. She raised her head and cried out in pain. Blue veins stood out on her neck.

The Venomous Insect lived by drinking Kara's blood and eating her flesh. When it writhed out, all her nerves were being pulled, so it was extremely painful.

When Logan and Edmund saw the scene, they were shocked, though they were doctors.

Molly didn't have the mood to feel pity for Kara.

Molly grabbed Kara's hair and forced her. "Look at your chest!"

As soon as Molly finished speaking, Kara lowered her head and saw something writhing in the blood vessel of her chest. It was terrifying.

Kara asked with a pale face, "What... is it?"

Molly replied tonelessly, "Venomous Insect."

"Venomous Insect?!"

Kara widened her eyes in surprise. "Why is it in my body?"

Although Kara's memories were in chaos and she didn't remember why the Venomous Insect was in her body, she knew its harm by instinct as a doctor.

Thus, she instantly didn't have the guts to move anymore.

Seeing that, Molly breathed a sigh of relief.

‘Although she’s delirious, she’s not stupid.’ “Why is it in your body? You asked for it... You will know it later. Now you only need to know that I’m saving you! If you struggle again and it writhes back into your body, you will die and no one will save you anymore!”

Hearing that, Kara felt suspicious.

However, when she thought that such a disgusting thing was in her body, she didn’t have the guts to move anymore!

Seeing that, Molly continued to acupuncture to lead the Venomous Insect out of Kara’s body.

During the process, Kara still cried out in pain. She wailed painfully but didn’t have the guts to struggle violently.

Her one thought was to be alive!

The atmosphere in the room was thick with tension. The foreheads of Logan and Edmund were also covered with sweat.

Half an hour later, Kara retched. Then she felt something writhing through her throat. Her throat tickled.

Molly’s gaze became sharp. “It’s coming out.”

In the next second, Kara spat out a fat blood red Venomous Insect.

It was as thick as an adult’s thumb.

Kara glanced at it and fainted in fright.

“Oh, my God!”

As soon as Edmund saw the Venomous Insect, it made his hair stand on end.

Instantly, he ran far away.

Molly frowned and looked away.

The Venomous Insect was so disgusting. It was unimaginable that it had been in Kara’s body

Chapter 1537-By contrast, Logan was calm.

He quickly found a glass jar and carefully put the Venomous Insect in it.

Seeing this, Edmund frowned severely. “Why do you keep this? It’s so disgusting.”

Logan smiled slightly, “This thing is of great research value.”

As a doctor, Molly also knew the research value of this Venomous Insect, so she did not stop Logan.

She looked at Kara, who had fainted, frowned, and then said, “Edmund, please help me get some medicine.”

After they led out the Blood Venomous Insect in Kara’s body, Kara almost lost half of her life and was very weak. They had to save her or her life might be in danger again.

Edmund nodded, get the medicine, and helped Molly put Kara on a drip.

Molly said to Edmund and Logan sincerely, "Thank you for your helping."

"Don't say that. Anytime!" Edmund waved his hand.

They just helped Molly to control Kara, and Molly was the one who was responsible for leading out the Venomous Insect and spent a lot of energy.

Logan also knew Molly must be tired now, so he smiled and said, "Go and have a rest. Edmund and I will clean up here."

"Okay," Molly did not refuse.

After leaving the research lab, she went to see Sean.

When Sean saw her, he asked, "How's it going?"

Molly looked at him, "It goes well."

"It seems that Kara didn't howl in vain."

The noise that had just come from the operating room was not low, and he heard it clearly.

Hearing his words, Molly couldn't help smiling. Then she raised her hand and pinched her sore neck.

Noticing her tired face, Sean frowned, took her hand, and said worriedly, "Let's go home and rest."

Molly smiled and nodded, "Hmm."

Leading out the Venomous Insect was a really exhausting thing, so now she was really tired.

Soon, they left the underground lab and went straight back to their residence.

After taking a bath, Molly fell asleep as soon as she touched the bed.

Looking at her weary face, Sean was overwhelmed with helplessness and affection. He gently hugged her into his arms and closed his eyes.

Early the next morning, Molly woke up at almost nine o'clock.

As soon as she finished washing and changing her clothes, the door was pushed open from the outside.

It was Sean!

There was a gentle smile on his face, and he whispered, "Breakfast is ready.

Let's go down and eat."

"Okay," Molly answered. Then she obediently went over and took his hand.

While they were having breakfast, Lesley came to see them.

Watching the woman in front of her, Molly was stunned, then frowned, and asked sadly, "Why are you so haggard?"

Lesley touched her face, and chuckled, "Don't you think my face looks more convincing now? Just as miserable as someone who has just lost her lover."

Molly was amused by her words.

“But...” Lesley stopped smiling and became serious, “Why did the base suddenly ignore the troublemakers? They removed a large number of inspectors last night.”

At this point, she frowned tightly, “And it seems that someone broke into the base last night and even destroyed a lot of medicine. What on earth is going on? Molly, do you know it?”

Being asked, Molly finally remembered that she had not told simply said what they had done last night.

Sean added, “Those medicines should be destroyed by my men.”

Chapter 1538-“I see!”

After hearing the brief from Molly and Sean, Lesley understood. She asked with concern, “Have you got the antidote?”

“Yes. With the help of Logan and Edmund, I got the second Venomous Insect out of Kara’s body last night. Now we are just waiting for Mr. Ballard to come to the island.” She then turned to Sean and asked, “Has he set off?”

Sean smiled, “Yes. I have arranged it. He should be arriving soon.”

Lesley was glad.

She could finally see Jordan again!

“If Logan knows that Uncle Jordan is coming, he will be thrilled.”

There was a happy look on Lesley’s face. Then she exclaimed, “But Sean, I’m surprised at you. It’s very difficult for anyone to come to the island. Why did you sneak to the island so easily?”

“The island seems to be strictly guarded, but in fact, it’s not! They mainly focus on the research base. The guard on the rest of the places is not that strict.

There are many loopholes that we can take advantage of. All you need is a ship.” Sean said nonchalantly.

But Lesley knew it was not that simple. “The surrounding waters are also under surveillance. Any ship approaching the island will be detected. I remember that Logan told me that there is a monitoring station in the base.”

“Yes, but we can jam it.”

Sean’s expression became unreadable. “The base is not so perfect. Managing the operation of the island is tons of work. They can’t take care of everything, so we can find opportunities.”

Lesley nodded. She agreed with Sean.

After all these things, she believed in Sean.

Sean could always do something incredible.

After knowing the situation, Lesley was about to leave.

Before she left, she handed Molly a bag and said, “I’ve prepared some necessities and clothes for Logan. How’s he doing there?”

“He’s fine. Trust me.” Molly took the bag and reassured her.

Lesley smiled and said, “Okay.” Then she left briskly.

Molly watched Lesley leave. After Lesley disappeared, she closed the door and breathed a sigh.

Sean walked towards her and asked in a gentle voice, "What's wrong?"

Molly shook her head and smiled. "Nothing. I feel sorry for Lesley and Logan. I hope they can live a happy life in the future."

"They will." Sean patted her head gently and comforted her.

Molly nodded. Then she looked up at him seriously. "I know we will be happy because I have you!"

Then she wrapped her arms around Sean's waist and leaned against his chest.

"Too many things have happened these days. If it weren't for you, I might still be threatened by Eaton. In the past, I always thought that I could protect our children and my family, but now I find I'm so useless.

Without you, I don't know what I should do."

Hearing Molly sigh in his arms, Sean hugged her and said, "No, that's not true.

You have experienced all these because of me. Don't blame yourself.

"If you hadn't married me, you wouldn't have been involved in so many dangers.

Maybe you would be a doctor, treat people, and be with your family every day.

You wouldn't have so much trouble in your life."

Chapter 1539-ty that I feel like no matter what happens, I will be well protected!"

"I don't deny that," Sean smiled and said softly.

Molly also smiled and took the initiative to tiptoe and kiss him.

Sean's eyes darkened as he held her and deepened the kiss.

After quite a while, they reluctantly ended the kiss. "Okay, let's go. We'll go to the underground lab, deliver the things to Logan, and see how Kara is doing." "Can I come too?" Sean raised his eyebrows.

"Of course, but like last night, you need to stay in the office and don't meet her,"

Molly said.

Sean chuckled and nodded.

The two of them quickly left the house and went to the lab.

Upon arrival, they heard Edmund's scream from the research lab. "I just finished breakfast and you're studying this fat worm. I'm about to vomit... Can't you put it away first?"

Logan didn't seem to care, and he used tweezers to examine the Venomous Insect carefully. "You're a doctor after all. You've seen corpses before, so why are you afraid of this thing?" he asked.

Edmund was rendered speechless for a while, and then he said, "These two things can't be compared, right? This worm is wriggling, which looks so disgusting!"

"You'd better overcome it. According to Molly, Kara still has one inside her body.

When the time comes, you'll have to take it out. Do you plan to just look at it from a distance? Also, as a doctor, you should have the spirit to take on challenges... You've never got the chance to know about Venomous Insect before. Aren't you curious about it?"

Logan didn't even glance up. He put the worm back into the glass jar, flicking it twice with tweezers.

Edmund's hair stood on end. "Although what you said is true, I still can't accept it so quickly..."

Molly looked at their different reactions and couldn't help but smile.

She came into the lab with Sean and joked, "You're a big man. Why are you so timid?"

"Mind your own business," Edmund snorted.

Molly smiled and handed a bag to Logan. "This is for you."

"What is it?" Logan was surprised, and he put aside his work to open the bag.

Then he saw that some brand-new daily necessities and clothes were inside the bag, and there was even a razor.

Edmund leaned over to take a look, and he couldn't help but ask with jealousy, "You are biased! How come I didn't receive these things earlier?"

Molly smiled meaningfully at him. "Only someone with a fiancée can have everything prepared so thoughtfully. Do you have one?"

Edmund suddenly understood that it was prepared by Logan's fiancée.

He shrugged and turned away, saying, "I don't need it."

Molly chuckled and shook her head. Then she turned to Logan and asked, "How's Kara?"

“She’s a little weak, and she hasn’t woken up since last night. This Venomous Insect has caused considerable damage to her body, so she will need to rest for a while before receiving a second treatment.”

He then said to Edmund, “Show Molly the examination report.”

Edmund nodded and quickly brought over the report. “We gave her a physical examination later. Please have a look.”

Molly frowned as she looked at the whole report. It turned out that Kara’s situation was indeed not good.

The harm of Venomous Insect was much more serious than she had imagined.

Chapter 1540-Edmund said, “Considering her condition, it might take a long time for her to recover.”

After reading all the reports, Molly nodded.

She handed the reports to Edmund and then uttered, “Please take care of Kara and contact me if anything wrong happens to her.” “No problem.” Edmund agreed without any hesitation.

Logan smiled. “Don’t worry. As Edmund and I care for Kara, she will be fine.”

“Thank you.” Molly smiled.

“It’s all right.” Edmund rubbed the back of his head, feeling embarrassed. ‘I should thank Molly.’ Molly walked toward Logan and cast her eyes at the insect wriggling in the jar. A wave of disgust came over her.

Seeing Molly furrow her eyebrows, Logan said with a laugh, “You’ll find the insect cute when you stare at it for long.” “Cute?” Edmund queried in a loud voice, feeling incredible. “Are you crazy? Why do you feel that terrible insect is cute?”

Different from shocked Edmund, Molly was calm.

She took the jar and observed the insect, holding back her sickness.

Narrowing her eyes, she uttered, "Such a rare insect is worth studying. Perhaps it can help improve our medical knowledge."

When Logan heard her words, his smile deepened, as his impression of Molly became better. "I think the same."

Both Logan and Molly were doctors, who wanted to save lives and heal the wounded.

They hoped that they could do something to benefit others.

"Let's study it together." Molly pulled out a chair and sat down. Then she carefully withdrew the insect from the jar with forceps.

As the two of them started studying the insect intently, Edmund twitched his mouth. 'Well, let me nurse Kara. I won't spend anytime on that damn insect.' Molly stayed in the underground lab for a whole day, and Sean took the opportunity to deal with the business in his office.

It was not until evening that Sean went to the underground lab to pick Molly up.

The situation lasted for several days.

The good news was that Kara gradually became healthy under the careful treatment of Edmund and Logan.

Molly got up early this morning. She was going to the underground lab after breakfast as the previous few days.

“Molly, wait.” Sean stopped her.

“What’s up?” Molly turned around and looked at him with confusion.

Sean smiled and replied, “We’re not going to the lab for now. Let’s pick someone up.”

Molly couldn’t understand his words. “Pick who up?”

Sean smiled without saying a word while staring fixedly at her.

Suddenly, Molly thought of someone, and her beautiful eyes widened slowly.

Then she asked excitedly, “Are we going to pick up... Mr. Ballard?”

“Yes.” Sean nodded with a smile.

“Great! Mr. Ballard has arrived!” Molly was overjoyed. “Why didn’t you tell me earlier?”

No one was more eager than her to hope that Mr. Ballard could come here sooner.

“Because I wanted to give you a surprise.” Sean held her hand. “Are you still going to the underground lab?”

“No!” Molly answered at once and then shot a glance at him in pretended annoyance. “Mr. Ballard has come here personally. How can I not pick him up?”

Sean raised his eyebrows. “Okay. Let’s go.”
