

Triplets On SM 911

Chapter 911-When Sean saw that she looked so adorable, he smiled and said, “Okay, I won’t worry you anymore in the future.”

“OK!” Molly nodded vigorously.

The atmosphere between the two of them was exceptionally harmonious.

In the afternoon, Tony first drove Molly back to the laboratory, and then returned to Northfolk with Sean.

Molly was a bit reluctant to part from Sean and she said, “When you go back, remember to send me a message.”

Sean raised her soft hand, and gently placed a sweet kiss on the back of her hand, “I will.”

Molly was relieved a lot and then devoted herself to her work without thinking too much about it.

But that afternoon, in the middle of her work, Wayne called again, “Dr. May, I’m sorry I’m calling to disturb you again!”

Molly could tell from Wayne’s tone that he seemed in a very good mood!

Molly respected Wayne very much in her heart, so she smiled nicely, “Not at all, Mr. Harrison. You are a senior I respect a lot. If you have anything, just say it.”

Wayne laughed heartily when he heard this! He just liked Molly’s gentle, kind, but straightforward character.

Then he didn’t beat around the bush, and said bluntly with a smile, “Dr. May, I didn’t mean to bother you about this, but I just couldn’t stand the pressure from the university. So I have to call you to negotiate!

“Here is the thing. Ever since you gave the lecture at the school in the morning, it seems the students have become your fans. They insisted on requesting the school, hoping that the school can keep you!

“I refused and I told them that you have your work to do. How can you have time for these students? But the students didn’t listen and insisted on keeping you in the school.”

Wayne shook his head, helpless yet relieved, and said with a smile, “Dr. May, I have no choice but to call you. I wonder if you have any intention to stay in our school as visiting professor.”

Molly refused immediately.

“Mr. Harrison, I appreciate your offer, but you know that I still have to manage the research laboratory. There are so many things to do here, and I’m afraid I won’t be able to spare so much time to teach the students.”

Although Molly liked the feeling of teaching students, she still had to consider the actual situation.

Her original intention of coming to Xesxia was to help her teacher manage the research laboratory, and she had no plans to do anything else for the time being.

Wayne was impatient, and quickly explained, “Dr. May, don’t worry. You only need to come to the school for two classes a week and it won’t take too much time!

“Also, we need more people for the reagents we collaborate on, right? Our students have very good grades. If you are interested, I will recommend some of them to you later! They will be useful.”

He was right! She had gone to school to teach for this purpose.

Molly was a little tempted.

But she still didn't make a decision right away. She just said softly, "Mr. Harrison, can you let me think about it? After all, I'm busy with work, and it's a bit difficult to find time to teach, so..." Wayne understood her feelings and nodded, "Of course, Dr. May, take your time. I respect your wishes!"

Chapter 912-Wayne hoped Molly could stay, but he would not force her! After all, her work at the research laboratory was already busy and overwhelming enough. The pace of modern life was inherently fast. Who wouldn't want to live a more relaxed life?

However, Molly was not unwilling to be a visiting professor because she was afraid of hardship and fatigue.

She was worried that she would be too busy at work every day to spend some time with her children and family! Work was important, but it was not as important as a family!

So, Molly decided that she had to discuss with her family first about going to school as a professor.

In the evening, she had a video chat with her grandfather and three children.

After a brief greeting, she mentioned becoming a professor.

Grandpa Dave frowned tightly and he said worriedly, "Molly, if you are so busy, your body will not be able to handle it, right?"

What the elderly care about the most is never how accomplished their children and grandchildren are. They generally believe that as long as they are safe and sound, it is a blessing!

The three children were also very worried about their mother's body, so they hurriedly reminded Molly on the other end of the phone, "Mommy, don't make yourself too tired, or we will feel sorry for you!"

Molly's heart melted when she heard the children's soft voices.

She immediately comforted them, 'Don't worry, children, I won't make myself too tired. I usually pay attention to rest and sleep well at night.'

"But..." The children pouted and looked hesitant to speak.

'What's wrong?' Molly asked, raising her eyebrows.

The children bit their lips, shook their heads, and stopped talking.

They wanted to say that if Molly went to be a professor, wouldn't she have no time to come back to see them? They missed her so much...

But after thinking about it, they thought they shouldn't stop their mother from doing what she wanted to do.

Since their mother asked their opinions, it meant that she wanted to be a professor herself! She was just worried that her family would disagree, so she asked.

Thinking of this, Alex said crisply, "Mommy, you don't need to ask US. If it's something you want to do, we will fully support you."

"That's right. Mommy, just do whatever you want. We are not three-year-olds anymore." Ben said calmly.

Claudia forced a cute smile and asked, "Mommy, if we miss you, can Daddy take US to see you?"

"Of course." Molly smiled softly, feeling warm at the same time.

These three children were sensible and cute!

She raised her hand subconsciously, wanting to touch the cute faces of the children, but what her fingertips touched was the cold screen.

She had no choice but to sigh in frustration, and then comforted the children, "Children, thank you for your understanding. I promise that after I've been busy for a while, I'll go back and be with you, okay?"

'If you miss me, let Daddy bring you here! Anyway, I live in a spacious house, and it's big enough for US."

"OK!" The children nodded obediently.

Molly was relieved.

The next morning, she called Wayne and gave her answer, "Mr. Harrison, I've thought about it carefully. I can become a visiting professor at the school, but I have a request. I don't know if you will agree to it."

When Wayne heard that Molly was willing to come over, he was happy from ear to ear. There was no reason for him not to agree.

"Dr. May, just ask if you have any requirements. We will try our best to satisfy you!"

Chapter 913-Molly smiled and said, "Actually, it's not too much to ask. But sometimes, the work of the research laboratory is too busy, and I may not be able to balance the school and the research laboratory. Besides, my long-term career development is still based in Northfolk. After finishing my research, I will still go back. So I can only promise you that I will be a professor at Xesxia University for half a semester. As for the rest, we will talk about it later. Is that okay?"

After Molly finished it, she fell silent, waiting for Wayne's reply.

'Half a semester..."Wayne hesitated, feeling a little pity!

If only Molly could be in school all the time!

But after thinking about it, he felt it was good enough that Molly was willing to stay!

Even if she was willing to stay only for a month, it would be great news for the school, let alone half a semester.

Therefore, Wayne nodded briskly, "Okay, half a semester is fine as long as you can come to teach when you're free! Of course, in terms of remuneration, our school will be generous."

Molly smiled peacefully, "Okay."

She thought about it and then reminded Wayne, "By the way, as I said, I need to select some talents to work in the research laboratory. I hope that you can help me pay more attention! I wonder if you could make a list for me? I will incorporate them into my research and development team according to their situation." "Sure!" Wayne nodded hastily, and replied affirmatively, "Dr. May, you don't have to worry about this. I will make a list of the most outstanding students for you as soon as possible, and then you can choose by yourself!"

Molly nodded in satisfaction and hung up the phone. Then she put her phone on the desk and went back to work.

"Molly, Molly! Is this you?" Suddenly there came a cheerful female voice from outside the door.

Molly looked up and saw Lynn rushing into the office excitedly with her mobile phone in hand.

Lynn put the phone in front of Molly, pointed to the person on the screen, and asked eagerly, "Molly, the person in this video is you, right?"

Molly followed her hand and saw the video of her lecturing in the classroom yesterday.

"It's me. What's wrong?" Molly raised her eyebrows and asked casually.

Lynn suddenly widened her eyes, looked at Molly in disbelief, covered her mouth, and said in amazement, 'Molly, you are so awesome! Did you go to give lectures at Xesxia University? And your lectures are so good! Oh, Molly, I adore you even more!'

She looked at Molly with a look of admiration. She was so impressed by Molly!

Molly smiled and said, "Don't exaggerate it. I'm not as good as you say."

"No, Molly, you are great!" Lynn raised her voice and said with affirmation from the bottom of her heart, "Molly, if I could meet a teacher with such good looks like you when I was in school, then I would study harder!

Maybe I would be as accomplished as you instead of just being an assistant."

As she spoke, she covered her forehead, pretending to be sad, and sighed.

Molly was amused at once!

Molly felt both amused and helpless. She looked at Lynn and disagreed," Well, don't belittle yourself! Your future achievements will be limitless.

Otherwise, the teacher wouldn't pay so much attention to you...Go back to work. Don't always sit idle and flatter me!"

'I'm not flattering you. What I said is true!' Lynn pouted and retorted.

Chapter 914-"Molly, I have never seen a girl who is more interesting, beautiful, and spiritual than you! I wish I had known you earlier." After Lynn said that, she sighed in self-pity and held her cheeks in her hands, feeling very sad!

She thought that if God had given her a little more beauty and talent, she wouldn't have admired Molly so much.

Indeed, she was no match for Molly at all! It seemed that Molly was blessed by God, but she wasn't. 'Alas!

God is unfair!' the young girl thought with a broken heart.

Molly didn't think much.

Seeing that Lynn's hair was messed up, she raised her hand to help her tidy up the hair around her ear, and then urged with a smile, "Okay, let's not talk about it. There are still many things to be done!"

"Now, the research laboratory has successfully developed Reagent One, and will soon start the research and development of Reagent Two and Reagent Three. At that time, the staff of the research laboratory will be divided into two groups, and the manpower may not be enough. At that time, we can only recruit some students from Xesxia University to help...

"Anyway, we still have a lot to do! Pull yourself together and go to work."

After Molly urged Lynn, she didn't stay idle. She took a document report on the desk and checked it carefully.

Although Lynn liked to chat and laugh, she had never taken important matters lightly. She nodded with a smile and went back to work.

Time flies by when one is busy. Molly was finally tired from work. She stretched herself in a relaxed way and unconsciously looked out the window, only to realize that it was already dusk.

At this time, the evening glow dyed half of the sky red, and the sun was hanging on the horizon like an egg, sprinkling the remaining warm yellow afterglow on the large buildings in the city.

It looked beautiful as a painting.

Molly was in a good mood. She immediately took out her mobile phone and took a picture of the beautiful sunset.

Then she casually shared it with Sean and texted him. [Does it look good?] Sean quickly replied. [It looks good.] Molly smiled, feeling better.

While she was in a daze, the computer beeped twice. She immediately came to her sense, turned on the computer, and found that it was Wayne who had sent the list of the school's most outstanding students.

After Molly clicked on the email, she suddenly found that the three names on top of the list were Cody, Mario, and Laila whom she was familiar!

Moreover, the grades of the three of them were very impressive!

Molly hadn't expected that she would be so lucky. She had gone to Xesxia University and met three such outstanding students.

She quickly learned about the grades of the three of them as well as the papers they had published, including their outstanding performance in school.

After two hours, Molly was very satisfied and decisively ticked off the names of the three students. She wanted all three of them!

In addition, she selected another four or five top students and then handed the list back to Wayne.

After Wayne saw the list, he smiled and praised, "Dr. May, you have a unique vision. The students you've selected happen to be the best in our department.

"Well, I will send you the detailed performance of these students in school as well as their grades in various specialized courses! You can carefully weigh them and see which positions they are suitable for!"

Chapter 915-'Okay, thank you.'" Molly thanked him quickly.

'You're welcome!' Wayne smiled broadly.

Then the detailed information of the students was sent over soon. Molly was very patient and carefully selected these students.

It took her another two hours. When she got off work, it was already dark outside.

Molly yawned, turned off the lights, and was about to get off work when she received a video call from her children.

"Mommy!" When she answered the call, three cute little faces immediately appeared on the other end of the phone. The children's eyes were black, clear, and bright!

Molly was a little tired at first. But when she saw the children, she suddenly felt that her exhaustion had disappeared.

She immediately smiled and asked gently, "Children, have you had dinner yet?"

'Yes!' The children responded excitedly, "Mommy, Daddy took US out to dinner.

He also said that he would take US to play karts tomorrow! But we are young and not tall enough, so we can only play the children's version."

"Really? That's great. I can rest assured that you have Daddy playing with you.' Molly had been worried that the kids would be bored when she wasn't home.

Now it seemed that she had worried for nothing!

Sean didn't ignore the children and took them out to eat and find places to play.

With him around the children, she felt more at ease.

At this moment, Alex glanced aside with his big eyes. He suddenly found that the background of Molly's video call seemed to be in the office.

He immediately looked nervous and asked, "Mommy? You haven't got off work yet, have you?"

Molly froze for a moment before realizing that she had revealed herself. Before she got home, she answered the children's video call. It probably made them worry!

Molly quickly explained with a gentle smile, "Don't worry, children. I'm a bit busy at work today, so I worked overtime for a while and I will come home soon."

But the children were still not happy! It was already nine o'clock in the evening, and their mother was still at work! How could she bear it if she worked overtime every day?

'Daddy...' Seeing their mother work so hard, Claudia turned around, threw herself into Sean's arms on the side, and complained softly, "Daddy, talk to your future wife. Every time she gets busy, she ignores her body. She wouldn't listen to US. Arent you going to say something?"

"That's right. Daddy, talk to Mommy!" Ben echoed.

Although Alex didn't speak, he felt upset too.

At this moment, the camera focused on Sean.

Only then did Molly realize that Sean was there. She somehow felt a little guilty and said hello first, "Oh, you...are here too."

Sean nodded and explained, 'I thought the kids would give you a video call, so I followed them to see you.'

After all, he didn't dare to give Molly a video call himself. He could only come over and took advantage of the children. Even if he just took a look at her from a distance, it would be better than never seeing her!

But right now, seeing that Molly was still working overtime, Sean really couldn't stand it anymore.

He hurriedly warned in a deep voice, 'Molly, don't work overtime so late in the future! You keep telling me to pay attention to rest, but what about you?

■ "I..." Molly was too guilty to answer.

Chapter 916-She hesitated for a while, then lowered her voice and retorted softly, "I don't want to be so busy, but there are a lot of experiments to be done recently. Besides, the lab is short-staffed, and I have no choice..."

There was a bit of grievance in her weak voice.

Sean was worried that she was working too hard, so he couldn't help but talk to her.

In fact, how could he blame her?

He immediately restrained his serious attitude and comforted Molly patiently and gently, as if he was petting the children, "Okay, I know, you have to work overtime because you have no other choice. I don't blame you.

But you still need to pay attention to rest in the future!

"I will transfer some people to your research laboratory to help. If you have anything to do, just tell the staff to do it, and don't make yourself so tired, okay? Otherwise, the children and I would be worried."

"Yes, Mommy, take a good rest, and don't make yourself too tired." The children nodded.

If their mother was tired, they would feel distressed! If their mother was sick, they would be even more afraid! They wanted their mother to be healthy.

Seeing the children and Sean being so nervous about her, Molly couldn't help but smile warmly, and nodded, "Okay, I promise you. I will take care of myself."

"Really? Mommy, you must keep your word!" Ben hastily said to Molly.

Molly looked at him and somehow felt amused.

The boy was so cute and serious.

She was still extremely patient, and coaxed, "Okay, I will keep my word. You should feel relieved now, right?"

"That's about it." The children breathed a sigh of relief. It was reassuring.

As long as their mother was healthy, they would have nothing to fear!

Finally, after Molly hung up the phone, she quickly packed her things and turned off the lights to get off work.

After returning home, she was not idle, but continued to use the computer to sort out some materials for tomorrow's work.

Reagent Two and Reagent Three would be developed separately soon, and Molly had to think carefully about how to allocate the personnel of the research laboratory reasonably so that the development of the two reagents would be smoother.

So, she was busy working until midnight.

In the end, she was so sleepy that she simply tilted her head and fell asleep on the desk.

The next day, Molly woke up at dawn. She rubbed her sleepy eyes, washed up hastily, and then rushed to the research laboratory.

Then she was busy working alone in the laboratory for a long time. She had no choice. The development of reagents must be taken seriously. As the manager of the institute, Molly must pay more attention than her colleagues!

At ten o'clock in the morning, Wayne came over with the students that Molly had specified.

Lynn received them politely, told them to wait a moment, and immediately ran to the laboratory to find Molly.

"Molly, Mr. Harrison from Xesxia University has brought a group of students over to see you. Come out and receive them!"

"Coming!" Molly nodded.

Then she took off her white dustproof clothing and walked outside.

At this moment, Wayne and several students were waiting in Molly's office. Among them, Laila and Mario were particularly excited!

They had never expected that Wayne would arrange them in the key group.

They were even directly sent to do research in a research laboratory that cooperated with their school!

Chapter 917-They were so lucky!

If they could get a certain amount of training in this institute, their graduation papers and plans after graduation would be settled.

Thinking of this, Mario and Laila became more and more excited, feeling that today they were really lucky.

At this time, with a click, the door of the office was pushed open! Molly walked in slowly wearing a white coat and a pair of white flat shoes.

As Molly approached, they smelt a fresh and pleasant smell of perfume and a touch of medicine.

Mario and Laila's spirits perked up and they opened their mouths!

Molly came to stand in front of them. The white coat she was wearing made her look mature and capable.

With exquisite facial features, she looked as beautiful as a fairy!

She was stunningly beautiful! It was hard for them to take their eyes off her!

But they were a little puzzled. Why was...Dr. Joye here?

When the two were puzzled, Molly sat down on the sofa calmly, and said hello to Wayne, "Mr. Harrison, thanks for bringing so many students over. I appreciate it!

'Lynn, why don't you make coffee for Professor Harrison?'

'The coffee is ready!' Lynn quickly brought coffee and entertained them warmly.

Wayne took a sip of the coffee, and then smiled, "Dr. May, you are welcome! We should help each other!

“You are willing to stay and teach at the school. It’s already a great favor to me and the school. Now that your research laboratory needs manpower, of course, the school and I can’t stand by and watch!”

Then Wayne introduced Molly’s identity to the students behind him again,”

Students, this is Ms. Molly, the famous genius doctor Dr. Joye who gave you a lecture at school several days ago. You still remember, right?’ “Yes!” The students answered in unison.

It was Dr. Joye, beautiful, funny, and charming when she was lecturing.

Who could forget her?

Molly couldn’t help laughing. She pointed behind Wayne and said, “To be honest, Mr. Harrison, I know three of your students.”

“Oh? Who?” Wayne was very curious.

Molly looked at Mario, Laila, and Cody frankly, and smiled brightly at them,’ Why, you forgot me so quickly? You dont even say hello to me?’ Hearing her words, Laila and Mario finally came to their senses!

“Molly...oh, no...Dr. Joye!’ Laila looked at Molly, feeling that her head was still buzzing, and she was a little incoherent, ‘Do you remember US?”

‘What? Do you know each other?” Wayne was a little surprised to see Laila’s panicked look.

Molly laughed, “When I went to the lectures, I sat next to them.”

After she answered Wayne’s question, she looked at Laila again, “Of course, I remember you. It’s only been a few days and my memory is not that bad...”

"I... I didn't mean that." Laila was embarrassed but excited.

Unexpectedly, they met Dr. Joye by accident and became friends with her.

Moreover, they were honored to be remembered by her. She was even asking them to work at the research laboratory!

Laila felt that she was about to pass out from happiness.

It was so unreal!

Chapter 918-Laila was so excited that she didn't know what to do. She quickly nudged Mario, winked at him, and urged, "What are you waiting for? Say hello to Dr. Joye!"

"Oh!" Mario suddenly came to his sense and smiled quickly, '...Dr. Joye! Hello, I'm Mario Reed. Thank you for recruiting US to the research laboratory. We will work hard and won't let you down.' Molly could tell that he was very reserved. But she didn't mind, and smiled with satisfaction, "Okay."

Cody stood silently, not saying a word.

"Cody, aren't you going to say hello to me?" Molly turned her gaze to Cody with a teasing smile.

After all, he was her fan.

The students around all looked at Cody at this moment. Unexpectedly, Cody lowered his head and ignored Molly! What was going on?

Seeing that Cody was silent, Wayne hurriedly urged, "Cody, why are you silent?"

Say hello to Dr. Joye.”

Cody still kept his head down. No matter how Wayne urged him, he didn’t respond.

“This boy!’ Seeing that Cody was unresponsive, Wayne couldn’t help feeling angry, and he reprimanded, “Cody, you are usually one of the nicest students in our department. Why are you so impolite today? You...”

“Forget it. It’s okay.” Before Wayne could finish his sentence, Molly interrupted.

She lifted the corners of her mouth in a good-tempered manner and comforted Wayne, “Mr. Harrison, since Cody is here to help me, you can just leave him to me, and I will communicate with him properly.”

“Well, okay!” Since Molly said that, Wayne had no choice but to stop interfering.

But he still reminded Molly, “Dr. May, you are willing to take the students of our school to do research and development together. This is a great respect for them! If they don’t obey your rules, you can give me feedback at any time. I will send them back and replace them with better students.”

“Okay, thank you very much.’ Molly nodded gratefully.

“You’re welcome!” Wayne said and left first.

Only Molly, Lynn, and the students were left in the office. The atmosphere instantly became a little awkward.

“Well... Molly, are we assigning the students to their respective groups now, or what?” Lynn reminded Molly at this time.

Molly thought for two seconds and nodded, “Okay, let’s assign them this way. You guys go to the group of Reagent Two.

You, go to Reagent Three...”

After the arrangement, Lynn left with the students first.

In the end, only Laila, Mario, and Cody were left standing in place somewhat cautiously. They didn't know how Molly would arrange them.

Molly was not in a hurry to arrange the three of them. She slowly picked up the coffee on the desk and took a sip. Then she smiled and asked jokingly, 'Why, can't you talk? Didn't you guys say that you wanted to make friends with me?'

“Oh...” Laila was stunned for a while. She forced a smile and explained awkwardly, “It's not that we can't talk. We suddenly feel that you have been upgraded from a friend to an idol! We are so happy that we don't know what to do...”

So she was nervous! Naturally, she didn't know how to get along with Molly like before.

Chapter 919-Molly understood Laila and Mario's mentality. After all, they were just college students.

After finally meeting a new friend, they found that the new friend turned out to be their teacher... Anyone would be stunned when such a thing happened to them!

However, since they came to the laboratory, Molly would no longer regard them as students, but as colleagues.

Molly smiled and she sounded very relaxed, “Don't think so. Since you have come here to work, you and I will be colleagues and equals from now on.

“I just hope that from now on, we can work together to do the work of the laboratory well!”

“OK!” Hearing Molly's words, both Laila and Mario looked happy.

They felt that Dr. Joye was nice, and she had no airs at all. They could learn a lot from her in the future, which was great. Thinking of this, the two were very excited! They would try their best to do a good job!

“What about you?” Molly turned to look at Cody with kind eyes.

When there were so many people around just now, the boy was unwilling to speak, and she didn’t force him.

But now that Cody had stayed, Molly thought she had to communicate with him.

Thinking of this, Molly subconsciously approached him, raised her eyebrows, and asked, “Cody, can you say something? I only kept you because of your outstanding ability. If you don’t want to work with me, then I won’t force you, and you can leave anytime.”

If he were unfriendly, she wouldn’t tolerate it! Even if he was her fan, he couldn’t always be silent like this.

At this moment, Cody slowly raised his head, looked at Molly tentatively, and pursed his lips. It seemed he wanted to speak, but he hesitated. He was blushing!

It was not that he didn’t want to talk. He just didn’t know what to say...

He couldn’t believe that the legendary Dr. Joye, whom he had admired for so many years, was standing right in front of him!

They would even become colleagues! Cody felt like he was dreaming. His mind went blank and he couldn’t react for a long time...

However, now that Molly was pressing him, it would be impolite if he didn’t give any response.

Thinking of this, Cody finally bit his lips and said nervously, “I..I’ll listen to you!”

Hearing his words, both Laila and Mario burst out laughing.

They had been worried that Cody was not happy and he didn't want to talk to Molly because his idol had concealed her identity. Now it seemed that they had been completely wrong.

He looked cold and arrogant, but in fact, he couldn't resist his idol at all!

Seeing Cody's blushing face, Molly couldn't help but smile slightly.

Then she arranged, "Okay, the three of you will follow me into a group. From tomorrow, you must work and learn hard.

"If you perform well, I can recommend you to some good medical institutions later. You will have a bright future!"

"Okay!" The three of them replied forcefully.

They would work and study hard. After all, there were not many such good opportunities.

Molly nodded in satisfaction and then told Lynn to call all the staff together for a simple meeting

Chapter 920-At the meeting, Molly was on fire, like a masterful female general. She arranged all the work of the laboratory in an orderly manner!

During the process, Lynn came to Molly with some documents, pointed to the difficulty, and asked, Molly, about the product we are developing, the experimental results have come out, but there are still some difficulties that have not been resolved. What should we do?"

Molly took a look at the documents and gave advice decisively, "If it is unsuccessful, it means that the data is incorrect, and the formula is wrong... For example, in this group, if I remember correctly, the data should be accurate to the decimal point! Just reorganize the data if something like this happens. I don't think I need to teach you this." "OK!" Lynn responded quickly when she was criticized.

The senior members of the laboratory weren't surprised. Joye had an amazing memory and they had long been used to it.

However, the new members were still surprised by her efficiency. She was indeed a famous genius doctor.

After the meeting, everyone started to work according to the positions arranged by Molly. Soon, everyone got into the swing of things.

The new college students were relatively slow because they were not familiar with the work and were afraid of making mistakes.

Molly came over to inspect and found that among these college students, Cody had the highest work efficiency, so she stopped and gave him a few more words of guidance.

"First transfer the sodium carbonate in this test tube to this test tube, and then..." Molly demonstrated it to Cody herself.

Cody nodded while watching, and wrote down all the knowledge points Molly said.

Immediately, his gaze fell on Molly's delicate face, and he suddenly blushed. He quickly lowered his head and stammered, "Thanks, Ms. May, for your guidance."

Molly smiled casually, patted him on the shoulder, and encouraged him, 'Come on. Your qualifications are very good, and you are the best one among all these college students. I hope you can perform well. Maybe you can become my partner in the future!"

Partner? Would he become a partner with Joye? Just the kind where two people were alone in a laboratory doing research?

Cody suddenly thought of it, and he blushed again. His heart was pounding!

With a blushing face, he quickly nodded and said, "Okay, I will work hard."

Molly nodded with a smile and went back to her post. Cody breathed a sigh of relief.

Whenever he saw Molly, he somehow felt very tense, as if his heart was being tightly grasped. He couldn't help clutching his chest, telling himself to calm down!

Time flew, and it was time to get off work again in a blink of an eye.

It was rare for Molly not to work overtime today. She packed her things and planned to leave. As soon as she walked out of the laboratory, she suddenly heard someone yelling in unison, "Ms. May!"

Looking back, she found that it was Laila, Mario, and Cody. She greeted them with a smile.

"It's time to get off work. Aren't you leaving?" Molly smiled gently.

"No..." Laila bit her lips shyly as if hesitating.

Suddenly, she took out a notebook from behind and handed it to Molly. She summoned up her courage and said, "Ms. May, can you give me your autograph?"

"But it is not for me. He wants it!" Laila quickly betrayed her friend and pointed at Cody.

Molly froze for a moment, and then looked at Cody.

The boy instantly blushed, and he couldn't help but glare at Laila lightly. How could she betray him?
