An Understated Dominance by Marina Chapter 1981

Chapter 1981

From the appearance of the giant strange fish, to swallowing the members of the Black Scorpion team, to sinking into the lake, the whole process happened so fast that no one could react at all.

The eaten members of the Black Scorpion team disappeared without even making a scream.

I saw the water surging, and bright red blood rolling out from the bottom of the water.

“Huh?”

Bull and another member of the Black Scorpion team were stunned.

The two of them looked around with their eyes wide open, their faces full of horror.

What just happened?

Where has his little brother gone?

What’s going on with the blood boiling out of the bottom of the lake?

“Why are you still standing there? Run away!”

After a slight start, Leo Alexander roared.

“Run...run away!”

The two bulls woke up from a dream. Without any time to think, they kicked their hands and feet wildly and swam towards the shore as fast as possible.

At this time, everyone who had been preparing to enter the water was also frightened and froze in place.

Although I didn't see it clearly just now, I can be sure that there is danger in the lake.

The huge black shadow that flashed past, the missing member of the Black Scorpion team, and the surging blood were all enough to prove that there was a man-eating monster in the water!

"Boom~!"

Just as the two bulls were swimming desperately, the giant strange fish jumped out of the water again, causing turbulent waves.

This time the strange fish was faster and pounced directly from behind, biting the second Black Scorpion member's head.

"Ah~!"

The members of the Black Scorpion team turned around as if feeling something. They saw a bloody mouth covering their heads, swallowing them up in an instant.

The screams suddenly stopped in the water.

Apart from the gushing blood, not even a single wreckage was left behind.

"F*ck!"

Bull was so frightened that his liver and gallbladder were split apart. His hands and feet were like motors, and he kept thrashing in the water, trying to swim back to the shore.

On the shore, even if he encounters monsters, he is still capable of fighting them.

However, in the water, his hands were tied and his strength was greatly reduced. Facing this giant monster fish with a mouthful of one person, there was no room for resistance.

"Damn it! Are you treating my brother like a vegetable? Let me see if I don't kill you!"

Leo Alexander, who was on the shore, was furious. He took out his AK rifle and pointed it in the direction behind the bull.

As long as the strange fish dares to show up again, he will beat it into a hornet's nest with one stroke.

"Boom~!"

Two seconds later, the water splashed, and the giant strange fish shot up from the water again, biting the leaping bull.

"Die!"

Leo Alexander gritted his teeth and directly pulled the trigger.

"Da da da da..."

Just a burst of gunfire was heard, and bullets poured out like a rainstorm, most of which hit the strange fish.

However, what was different from Leo Alexander's expectation was that the bullet did not directly penetrate the scales of the strange fish, but seemed to hit the armor, making a crisp sound of gold and iron impacting, and at the same time spattering sparks.

No defense breach at all.

"What?!"

Seeing this scene, everyone in Leo Alexander was dumbfounded.

He really didn't expect that the scales of this giant monster fish were so hard that even bullets couldn't penetrate it.

Terrible!

"Captain! Save me!" Bull roared unwillingly.

The giant monster fish showed no mercy. It opened its huge mouth and bit the bull fiercely.

"Beast! Get out of here!" Bull roared angrily, took out the knife from his waist, and struck the strange fish's head with all his strength.

“Qiang!”

The blade of the knife struck the strange fish’s scales, causing a splash of sparks but not damaging it at all.

The strange fish used the inertia of its attack to swallow Bull directly into its mouth.

Bull was burly and much taller than ordinary people. The giant monster fish did not swallow it in one bite, but left a pair of legs outside.

The gap between the sharp teeth of the monster fish is revealed, and the screams of Bull can be clearly heard.

Sad and scary.

“Wow!”

The giant monster fish raised its head, reopened its bloody mouth, and threw Bull into its belly.

After three people ate, the giant monster fish did not leave directly. Instead, it lingered silently more than ten meters away from the shore, as if waiting for the prey on the shore to come.

At this time, everyone was shocked and speechless.

The previous excitement and surprise completely disappeared, replaced by fear and apprehension.

Three powerful warriors were eaten like snacks. This giant strange fish was really terrifying.

“Ah~!”

Leo Alexander was furious after losing three brothers. He kept firing his gun into the water to vent his anger.

The bullets hit the lake surface as if they were free, causing splashes of water, but had no effect.

“Damn! It’s a good thing I didn’t go into the water just now, otherwise it would have been a disaster!” ”

Who said otherwise? I thought the lake was safe, but I didn’t expect such a monster to be hidden.” ”

If you ask me, those three are really good. Unlucky enough, he was eaten alive, not even a body was left behind. Thinking about it makes my scalp numb.” “...

”

Looking at the blood gradually fading on the lake, everyone couldn’t help but whisper, in fear. At the same time, I was also a little lucky.

“Look! What is that?!”

At this time, a man suddenly pointed to the depths of the lake.

Everyone looked at the sound and couldn’t help but be dumbfounded and trembling with fear.

In the depths of the lake, huge fins like sailboats emerged one after another from the water.

At first, there were only three or five.

Soon, there were thirty or fifty.

Gradually, there were three to five hundred.

Finally, there is a densely packed area, hundreds and thousands, countless.

These giant strange fish seemed to smell the smell of blood, began to wake up one after another, and gathered quickly.

In just a few minutes, the mist-shrouded lake was already filled with strange fish.

Seeing the astonishing number of strange fish, everyone was dumbfounded.

Even one strange fish is difficult to deal with. How terrifying would it be if thousands of strange fish gathered together?

If they had all just entered the water, they would probably have become a meal for the strange fish by now.
