

UNIVERSAL JOB CHANGE: I CHOSE JOBLESS INDIVIDUAL

Chapter 12

"With two guns in hand, this is to show the beginner skills of a sharpshooter?".

"Wait..... Wait, did anyone tell me what the Sharpshooter's primary skills are?"

"

"That's a lot. "

"Quick Draw, Lethal Ammo, Quick Reload, Passionate Chase, Sliding, Explosive, Aerial Shooting,

".

"In fact, there are quite a lot of passive skills in the pre-occupation of the sharpshooter. "

"Yes, if the bullet hits accurately, it can cause a lot of damage without the need for shooting skills. "

At this moment, there was a lot of discussion in the audience.

"I have a feeling that I'm going to show off again.....

".

The

head teacher of Class 5 was originally teaching sharpshooter-related coursework, but now, when he thought of the passive skill of 'Passionate Pursuit', he felt that the other party was going to show off.

And watching Yunchen's posture of holding two guns, he inexplicably found a sense of familiarity that resonated with the gunman.

Bang!

It's too late, it's too soon.

Gunshots have already been fired.

Yunchen had already pulled the trigger.

"Here comes

".

"It's going to be killed again!".

.....

.....

The moment Yunchen pulled the trigger.

Bang!

The muzzles of the two guns burst into a burst of gunpowder, and the deadly spiral bullets flew towards the enemy in the distance.

Less than half a second

Poof!

The sound of two bullets piercing through different skulls overlapped again.

I saw two goblin figures rushing towards me, and under the impact of ammunition, their bodies flew out in a small reverse direction.

And the skull was blown out.

[If you successfully shoot and hit the enemy, the passive ability 'Passionate Pursuit' will be stacked with the first layer of killing intent, and the shooting speed and movement speed will be increased by 2%].

[If you successfully shoot and hit the enemy, the passive ability 'Passionate Pursuit' will be superimposed on the second layer of killing intent, and the shooting speed and movement speed will be increased to 4%].

.....

Passionate Pursuit (C+).

When the bullet hits, it can stack Killing Intent, up to 25 stacks, and generate up to 50% movement speed and rate of fire bonuses.

Of course, thanks to the two quality improvements, when the full stack is full, it will also come with 45% armor penetration.

Of course

As long as you leave the battle for 8 seconds, the accumulated killing intent will dissipate.

I have to say that this passive skill does have a lot of chase meaning.

Thanks to this passive skill, the Sharpshooter has been one of the most popular classes for solo farming dungeons.

Bang!bang!bang!

Gunshots rang out one after another.

Yunchen, who was standing in place, kept pulling the trigger, and the goblins who kept coming forward and one after another narrowed the distance between them to within five or six meters.

That..... Yunchen himself didn't even need to deliberately preview too much.

The skulls continued to bloom and explode.

Time.

It was enough to remind him of the great watermelons bursting and blooming from within, and the red and white filth spewed out.

Of course..... It can support Yunchen's unscrupulous pile output.

Thanks to its own summons, it has the output of the Goblin Mage in the front row.

Less than a second.

The two water spirits of pure elemental structure were completely bombarded by the spells in the back row.

The three Goblin summons were slaughtered to death by their own compatriots.

The only remaining Thunder Eagle was extremely ruthless, still struggling alone, and when it swooped down, it grabbed a shaman into the air, flew to a high place, and released its claws, causing it to fall to the ground to death.

The twentieth layer of killing intent

The twenty-first level of killing intent

.....

The twenty-second layer of killing intent

.....

The twenty-fifth layer of killing intent!

After losing the sacrifice of the front row, at this moment, Yunchen was already full of enthusiasm for twenty-five layers.

Buzz!!

In a moment, a faint red luster lingered around him.

The buffs of movement speed, attack speed, and armor piercing are undoubtedly pulled to the fullest.

Under the lingering killing intent, Yunchen's cold temperament inexplicably became more and more dangerous.

The next second.

He moved

Just stepped on his left foot, and the moment his body started, an afterimage was slightly pulled.

With this dodge, he threw all the multiple spell attacks that came from afar to the side at once.

Hurry!

So fast!

.....

After stepping on it in a few steps, the swift and shadowy Yunchen even spanned more than ten meters, and had already approached the goblin pile.

The silver gun he held in his left hand was almost stuck into the other's mouth.

BANG!!

The trigger was pulled, and the bullet at close range easily pierced the opponent's skull.

Almost at the same moment, the Goblin Guard on the other side was thrown out.

It turned out that Yunchen's other gun was shot at the same time.

"Roar

".

The

roaring goblin guards swung their swords at the approaching enemy.

How do you know that the human figure that suddenly approached, with a step on it, the whole figure of the whole person floated back a few meters without anything, and instantly opened the distance between each other.

Bang!bang!!

But this distance is still the best range.

There were two more heads, and the middle of the eyebrows was directly hit by a bullet and died.

Click!!

Click!!

At this moment, two empty magazines had fallen from the guns to the ground.

Now.

The secret hidden in the belt is also revealed, and numerous magazines are placed inside.

And Yunchen's way of changing ammunition is also quite chic and sophisticated, and his hands are quickly filled at the same time, and he can't even see some clumsiness and trickiness.

After the reload, his figure sped up again.

Yunchen used the 'Speed' skill, so much so that he dragged out a series of afterimages.

At such a speed, the natural dodge is full.

All the blades, the flying bullets of light, and the bursts of irritable roars were all thrown behind.

Soon

Yunchen, who was tossing and turning, relied on his fast movement speed and had single-handedly killed the back row.

Passive skills don't consume mana, and after such a long time, he only uses speed, relying more purely on his excellent body and nerve reactions to support his dodge and attack.

Click!

With a light step, he even made a sliding step and rapid fire effect.

Like a roaming gunner on the second turn, he doesn't even forget to move and shoot while flickering, and the bullets on his guns are plunged into the enemy's head.

It's just

It's not a skill.

Rather, it is purely physical to make the corresponding effect.

Whoosh!!

Stacked with murderous intent, the cold bullets had terrifying armor-piercing power, constantly piercing through the mage's shields and barriers, and quickly taking the lives of these goblin mages.

As the bullets whirled, the goblins' figures fell in denser and denser rows.

Along with this, bullet casings continued to fall to the ground, and empty magazines were thrown out.

.....

.....
