

Unlimited Power - The Arcane Path (Completed)

Novel Chapter 236

Chapter 236: 236

As much as Leon wanted to let Darya obtain the power to protect herself as soon as possible, he couldn't afford to wait any longer if she couldn't learn that on the easy way, which was by forcing herself to get used to her fear, Darya would have to get used on the hard way . . . while fighting for her life .

'Let's go,' Leon said .

'Are you going to try to clear the dungeon?' Dary asked . 'You think I'm ready?'

'No, you are not ready,' Leon answered . 'But time is of the essence . . . just try to learn as you keep fighting and make sure to focus on keeping yourself alive . You didn't practice all that much, but you probably can fly pretty fast if you use an earth platform . If something happens, escape and don't look back . '

Four months have passed since Leon came to that world . Although he got strong enough to defeat five elemental golems before running out of mana, he was aware that only that wasn't enough to clear the dungeon . However, Leon intended to compensate that by using mana potions . It wouldn't be that efficient, but by using mana potions to recover his mana and using his spells against a boss, he would be able to get stronger faster . Instead of using

ordinary elemental golems, he would use the spirit of a boss to create his magic staff .

‘Let’s just hope my defenses increased to the point where I can survive for a while in a long battle . . . ‘

Leon’s battle plan was . . . unconventional . Just like the time he left the island, he would try to recover his mana in a weird way . It was better to find a way to cultivate some blue angel leaves; in fact, he had some in his magic box . He visited the island when he was using megalodons to create magic items for his friends . However, when Leon tried to plant those... the poison mist sucked their mana and killed the plant .

Leon and Darya walked toward the dungeon, some golems tried to stop them, but they failed miserably . Although she wasn’t that efficient, Darya was equally powerful as Leon, and with someone nearby to offer support, she didn’t feel afraid . So, the golems were being defeated at a crazy pace .

Although they reached the dungeon quite fast, they stayed at the entrance for quite a while, because Leon brought fifty thousand mana potions .

‘ . . . Are you sure you are going to need that much mana potions?’ Darya frowned .

‘This is for both of us,’ Leon said . ‘It pains me to admit, but even though the level of your skills is lower, we can cause more or less the same amount of damage . ‘

‘It’s because of the mana crystal in my forehead,’ Darya said . ‘Still . . . to think that I would have to participate in such weird plan . . . ‘

‘It is just to save time . . . since we have the same strength, the battle won’t become easy, just shorter,’ Leon explained .

His plan could have been much more convenient if Leon could customize his magic box . . . but he couldn’t . Not only that, but Leon also couldn’t even see on the dungeon shop anything related to the magic box being sold .

◆◆◆I wonder if I can create a magic box . . . Nah, it would be too weird . . . but I should at least try . ‘

Reaching the dungeon had been quite fast since the enemies were scattered, and there was enough space to run in case something happens . But things changed inside the dungeon . . . Leon and Darya didn’t have room to dodge the magic projectiles, but their mana was being consumed a little faster . That being said, neither of them was in a hurry . Besides, the elemental golems were still formidable enemies that could make their skills level up incredibly fast .

Regardless, it has been a while since Leon saw a weird dungeon . Except for the Frozen Dire Wolves' dungeon, most dungeons looked like just regular caves . However, that dungeon had parts that were frozen, while others had small pits of lava, and some parts seemed to be made of some sort of metal .

‘This is the first time I have seen a dungeon like this . . . ‘ Leon frowned .

‘I don't know much about dungeons, but I do know that monsters that have strong magic powers can influence the interior of the dungeons,‘ Darya explained . ‘I heard once that monsters sometimes just stop to rest, and their presences change the place itself to let them have an easier time resting . . . ‘

‘I wonder why something inorganic would have to rest . . . much less even without fighting . ‘ Leon looked around and touched a frozen wall to confirm its nature .

That dungeon had many bifurcations and dead-ends, adding that to the battles against the golems . . . Leon and Darya only reached the end after one day, and they finally saw the boss . The creature had a humanoid shape, but it was eight meters tall . Leon and Darya didn't see the core of the beast, and despite having a human shape, it didn't have eyes, nose, and mouth .

‘The heck is that . . . ‘ Leon murmured .

As if its overall appearance wasn't weird enough, the golem had parts that were made of metal, magma, ice, and thunder . . . Adding to all that, the creature could move those parts at will . So, if at some point the head was made of ice and Leon decided to attack the head with magma or fire, the creature could change the element of its head to magma, and it would heal itself .

'This is going to be difficult . . . ' Leon murmured .

Even without fighting, he knew that the strategy he used to defeat the golem boss on Earth wouldn't work . That thing was several times stronger, and even if Leon got stronger, he wasn't strong enough to freeze that part of the dungeon and kill the creature before it could react .

Novel Chapter 237

Chapter 237: 237

‘What is the plan?’ Darya asked . ‘It looks like a few of my spells will be less effective here .’

‘You are right . . .’ Leon rubbed his chin . ‘That thing can counter our spells, but it can’t counter both of our spells . . . we just have to use different spells at the same time .’

‘Mmm? Ah . . . you want to attack with a certain element, and when the creature tries to absorb that element, we will use others to cause even more damage .’ Darya said .

‘You understand my point . You should try to put the boss in a sphere of water and then freeze it .’ Leon frowned . ‘The boss will probably try to melt off,

absorbing the ice . It doesn't matter, either way . I will use thunder attacks to counter and stop the creature . ‘

‘What are we going to do if that thing decides to absorb your thunder attacks?’ Darya asked .

‘We will change and attack him with earth and magma and keep doing that until we kill it,’ Leon explained . ‘In the end, it's metallic, and magma parts will be useless against our combination of attacks . ‘

‘I see . . . ‘ Darya nodded .

Before the fight, Leon had to make some preparations . In an ordinary battle against a tough opponent, the moment that would cause Leon's defeat was the moment he runs out of mana . Although it wasn't cheap, there was a way to avoid that . He just had to keep a huge container of mana potions nearby . The moment his mana decreased, he only has to touch the liquid, and he would recover his mana . Instead of transporting something like that, it was better to have someone keeping throwing mana potions at him, but there wasn't . Leon tried to make some skeletons do that, but the stupid things could only obey commands like attack, defend, move and stop .

It was weird, but with the help of some steel lines, Leon knitted a hose, using the leather of the three-eyed rats . After creating two containers of steel and

filling them with the liquid of mana potions, Leon opened a hole, put the hose and connected the magic liquid to their backs... every time they use their mana, their backs would absorb the liquid .

‘I always imagine myself fighting against monsters... but not like this . ‘
Darya frowned while looking around and seen the disgusting rat leather almost glued to her back .

‘Don’t complain... I don’t like to fight like this either . ‘ Leon massaged his eyebrows .

It was a plan that would only work against a monster . A smart opponent would quickly find a way and destroy Leon’s supply of mana . Anyway, it was the best way Leon could think of to fight against a monster, keeping himself alive, without having to stop attacking .

Leon didn’t want to use that method for longer than the necessary, so he and Darya walked toward the boss . When the creature saw them, it attacked shooting Magma Arrows, Ice Arrows, Steel Arrows . But Leon and Darya’s Mana Shield blocked the attack, even though they lost the chance to cause a lot of damage with a preemptive strike, that didn’t bother them . Without a care in the world, they shot several magic projectiles .

As Leon had expected, the creature moved its body parts to absorb those attacks, but when it tried to absorb a massive layer of water that Darya created and shot, it got electrocuted when Leon shot used lightning .

The creature got caught off guard, so Leon and Darya had a lot of time to increase the water and strengthen the electric discharge . The creature suffered a lot of damage but eventually recovered itself because its left leg, which was made of thunder, decreased the power of their attacks . The creature created a layer of thunder around its body to nullify all damage, but that had been a bad move .

Darya shot several Earth Arrows, and Leon hit the creature with Magma Spears . It was an incredible feeling using his most powerful spell without caring about the cost, but soon Leon stopped because the creature covered its body with magma this time .

‘It is powerful . . . but it is just a dumb monster, in the end . ‘ Leon murmured .

Leon and Darya attacked using ice magic and after a few seconds managed to cool down the magma . . . after that, the same pattern repeated itself a few times . Although the Mystical Golem was far stronger than that weird robot, the creature didn’t pose a threat against Leon and Darya . The battle ended after ten minutes, and both of them still had some mana liquid that could be used to restore their mana . Before giving the final blow, Leon quickly cast a thick layer of ice around the creature, and when the beast managed to free itself using its right arm covered in magma, Leon used Seal and put the creature’s spirit inside the replica of a magic staff .

Steel Staff VIII

It grants you the skill Magma Arrow Lv 50, Ice Arrow Lv 50, Steel Arrow Lv 50, Thunder Arrow Lv 50 . Intelligence + 60, Mentality + 40 .

It was the best weapon Leon had, but he regretted creating a staff . . . if he had created a shield, he probably would have obtained the skills to absorb the elemental attacks of the ordinary elemental golems .

‘This was easier than I thought it would be . . . ‘ Darya frowned . ‘My skills also leveled up like crazy . . . your plans are weird but certainly efficient . ‘

‘Don’t thank me yet, I want the coins you obtained,’ Leon said . ‘It is payment for the mana potions you consumed . ‘

In the end, Leon didn’t feel like celebrating because he spent one million coins and only obtained ten thousand from defeating that boss . Anyway, it was time to use the remaining mana to kill the golems that would soon begin to spawn .

Novel Chapter 238

Chapter 238: 238

Since it was too impractical to move those steel containers, Leon used all the mana liquid in those to defeat the elemental golems and practice Haste . He only used the purple crystal to see the other world after twelve hours, Darya stayed behind because she was tired .

Still, there wasn't much to see on the other side . Leon got attacked by several mystical golems, but he managed to escape from them flying to the sky . If Leon had to describe that world, he would use the word Pandemonium . In one direction, he couldn't see anything, but ice, on the other only volcanoes and magma . On the different directions, he saw a wasteland and then a seemingly endless mountain range where rain clouds were constantly letting lightning bolts hit the ground . It was a weird world with weird ecosystems . . .

Leon managed to return using Mana Concealment . The golems didn't have eyes . So thanks to that skill, they couldn't notice Leon . . . like many other monsters, they used their target's mana to find them .

◆◆◆ Another failure . . . ' Leon sighed .

On the opposite side of the boss room, Darya was sleeping without a care in the world . . . another boss would appear in twelve hours, but it looked like that didn't concern her . Although she was short, Leon decided to let her sleep instead of carrying her outside the dungeon . The poison mist didn't enter dungeons, so it was a pretty good place to rest .

Although Leon also felt like it was a good moment to rest, he decided to keep an eye on things and learn his next spell . Besides, every ten minutes, six new golems would appear, so he would have to kill them . Although previously, he only had enough mana to beat five, with his steel staff, he could keep fighting them for one hour without having to use mana potions .

'I wonder why that VII represents... is the quality of the weapon or the level?'

It was evident that it was important information, but Leon had no idea what that means . . . Anyway, he would learn it later . So, Leon forgot about that, and before Darya finally woke up, he learned a new spell .

Congratulations! You have learned the skill: Magma Bullet .

Cost: 30 mana per second

You obtained 01 status points .

‘Did you find anything on the other side?’ Darya asked .

‘I found a weird ecosystem . . . ‘ Leon said . ‘You should rest while you can, we will fight against the boss again because I want to make a shield and obtain the skills to absorb spells . ‘`googletag.cmd.push(function()
{ googletag.display('div-gpt-ad-InStory-1 '); });`

‘Do you think that will be useful?’ Darya frowned . ‘You wanted to face stronger monsters to grow stronger, right? Against stronger opponents, a shield like that won’t help you all that much . ‘

‘Why do you think so?’ Leon asked .

‘Because those passive skills that can let you absorb spells, only work on spells that have a lower level than the skill,’ Darya explained .

‘I see . . . so if my shield has Magma Absorption Lv 50, it can’t absorb magma spells that are stronger than that . ‘ Leon nodded .

‘That is right . ‘ Darya nodded .

In the end, it was a real waste of time . If Leon couldn’t level up those skills and the opponents would only grow stronger, it was useless . After a long sigh, Leon decided to move toward other dungeons . The magic items he creates would be useful, but if he creates a lot of them, he could grow over-dependent of them . If something happens and he loses those items, he would be in trouble .

```
.googletag.cmd.push(function()  
{ googletag.display( 'div-gpt-ad-InStory-3' ); } );
```

‘I wish there was a dragons’ dungeon in this world . . . ‘ Leon sighed again .
‘I’m already missing their meat, and the extra status points those could give me . ‘

‘I heard that we had one,’ Darya said . ‘But the dungeon became inactive when the harvesters appeared . ‘

‘What about the purple crystal ?’ Leon asked .

‘The crystal disappeared . . . that was why it was considered inactive,’ Darya explained .

In the end, there was no easy way to obtain status points . However, Leon had an idea . If he could understand the logic behind Area of Effect spells, he could learn several of them quite quickly, and by using them against several targets, Leon would be able to level up them quite fast . Thus, granting him status points . Although Leon had to learn spells like Steel Arrow, Magma Arrow, Magma Punch, and others... he decided to learn the Area of Effect

spells first because the nearest dungeon didn't have strong monsters but had a lot of monsters .

'So, this time, are we going to fight the Bloody Wasps?' Darya frowned . 'I can't imagine ourselves getting that stronger fighting against that type of enemy . '

'It is the nearest dungeon, and this is also a good opportunity for us to learn Area of Effect spells,' Leon explained . 'Besides, even if the enemies don't look like that they can pose a challenge, I still have to check their worlds . '

'I can understand that...If I were in your position, I would do the same . '

Darya said . 'In fact, I would use the dungeons of the other worlds to look for the information you want... Instead of trying to obtain the power to defeat a harvester or at least torture them for answers . '

Truth to be told, Leon didn't want to face those enemies too . He had never seen them, but Leon could imagine their powers . Considering that mana can increase the lifespan of everyone . . . the amount of power a sentient being could obtain after fighting and training for thousands of years would be bone-chilling just to think about it .

Even Leon wanted that kind of power because, with that, he would be able to protect his family, his friends, his world . . . However, before obtaining that, he had to get the knowledge that also comes alongside with power . Leon didn't find that knowledge in the city above, and the chances of him finding in other worlds were also small . But he was sure . He would obtain that knowledge from the harvester . . . They were invaders, after all .

Although Leon had to learn spells like Steel Arrow, Magma Arrow, Magma Punch, and others... he decided to learn the Area of Effect spells first because the nearest dungeon didnt have strong monsters but had a lot of monsters .

So, this time, are we going to fight the Bloody Wasps? Darya frowned . I cant imagine ourselves getting that stronger fighting against that type of enemy .

It is the nearest dungeon, and this is also a good opportunity for us to learn Area of Effect spells, Leon explained . Besides, even if the enemies dont look like that they can pose a challenge, I still have to check their worlds .

I can understand that...If I were in your position, I would do the same . Darya said . In fact, I would use the dungeons of the other worlds to look for the information you want... Instead of trying to obtain the power to defeat a harvester or at least torture them for answers .

Truth to be told, Leon didnt want to face those enemies too . He had never seen them, but Leon could imagine their powers . Considering that mana can increase the lifespan of everyone . . . the amount of power a sentient being could obtain after fighting and training for thousands of years would be bone-chilling just to think about it .

Even Leon wanted that kind of power because, with that, he would be able to protect his family, his friends, his world . . . However, before obtaining that, he had to get the knowledge that also comes alongside with power . Leon didnt find that knowledge in the city above, and the chances of him finding in

other worlds were also small . But he was sure . He would obtain that knowledge from the harvester . . . They were invaders, after all .

Novel Chapter 239

Chapter 239: 239

From what Darya knew, it looked like Bloody Wasps weren't much different from the wasps Leon knew . The only real difference is that they were one meter long and wide . . . they also could suck their target's blood with their sting . The blood could be used to heal their wounds or to increase their attack power and speed . Either way, it wasn't a good idea to let them get too close .

'I guess fire magic is the best way to deal with them . . . so, shall I combine wind and fire magic to create something like a Fire Tornado? It might be dangerous, so I should start with something more simple . '

Leon recalled Sandstorm, the spell and that mutant wolf that almost crushed him to death used . The spell itself didn't cause much damage, but it blinded everyone nearby due to its scope . It was safer starting using that, so Leon decided to practice while he and Darya headed toward the Bloody Wasps area .

Much to his surprise, soon, Leon managed to create a small version of the Sandstorm on the palm of his hand . The wind was strong, and the sand didn't spread toward all directions . . . Leon was on the right track .

'I don't think a spell-like that will be useful against the bloody wasps . . . '

Darya also replicated the smaller version of the Sandstorm .

‘I’m just learning the fundamentals before trying anything more dangerous . . . ‘ Leon said . ‘Mana Armor doesn’t protect yourself from your own attacks, so you should be careful . ‘

Little by little, Leon’s control over the sandstorm increased as he also enlarged the scope of it . After walking for three days, they finally reached their territory of those creatures . Leon and Darya noticed that because they didn’t see any three-eyed rats . . . Regardless, they only began to fight one day later when they both received the notification .

Congratulations! You have learned the skill: Sandstorm .

Cost: 10 mana per second

You obtained 01 status points .

The spell barely caused damage, but it was enough to prevent the wasps inside from moving . Although the consumption of mana wasn’t big, it wasn’t small either . The effectiveness of the spell was kind of small . It only created an area of four meters tall and large, strong winds and sand . However, both the speed of the winds and the range of the spell were increasing as the skill leveled up .

Although they bought a lot of mana potions after leaving the golems dungeon, Leon and Darya decided to save their mana and also divided the work in order to increase efficiency . Sometimes Leon used Sandstorm to stop the wasps, and Darya used Fire Bullets to kill them, and sometimes they changed their roles .

‘It looks like these dungeons can spawn more monsters than others . . . ‘
Darya said after noticing a few dozen wasps approaching . ‘

‘Somehow, I feel things aren’t that simple . . . ‘Leon furrowed his eyebrows .

It has been a while since Leon saw so many monsters in a small area .
Although those monsters were so weak and a single Fire Bullet was enough to kill them, Leon was quite worried . . . he felt like he forgot something . . . something very important .

Although Leon was in a hurry, he decided to at least learn one more Area of Effect spell before challenging the dungeon . Since the battles would happen in a confined space and the enemies were insects, the best option was to learn a fire attack .

‘Let’s try to learn something like a Fire Tornado,’ Leon said . ‘The boss of that dungeon is probably the bigger version of those wasps, it should be a little more resilient, but its weakness probably still is fire . ‘

‘So, we just create a tornado and add fire, right?’ Darya asked .

It looked pretty simple, in theory . But if that were true, Lennart would use Fire Tornado instead of a Frozen Mist . . . perhaps the climate of the ambient could help or disturb the caster in that regard, but it didn’t change the fact that they had to be careful . Otherwise, their own attacks would harm them .

Like always, progressing at baby steps, Leon practiced the spell . In the end, he had to be extra careful because the fire was more complicated to control than sand . . . Still, instead of controlling both wind and fire, Leon started to wonder why Darya was progressing at the same speed Leon was .

‘Are you holding back or something?’ Leon frowned .

‘ . . . What are you talking about?’ Darya looked away after making for a brief moment, an expression of surprise .

‘If you are worried about hurting my ego, I recommend you stop wasting time with that,’ Leon said . ‘I don’t know if it is thanks to your natural talent is due to the mana crystal in your forehead, but it looks you have an easy time learning the spells related to the basic elements . Regardless, learn as many as the spell you can, as fast as you can . Then use your remaining time to get rid of your hesitation . ‘

‘...All right,’ Darya nodded .

Although it was a bit depressing after Leon said that, Darya managed to learn Fire Tornado in four days, while Leon had to practice for a week . It couldn’t be helped since Darya had the mana crystal in the forehead . The people of her world also had decades of experience using mana . Not only that, but she was also the third generation of a family who became leaders in that world using mana .

Congratulations! You have learned the skill: Fire Tornado .

Cost: 15 mana per second

You obtained 01 status points .

Still, Leon started to wonder if it wasn’t a good idea to implant the mana crystal on his forehead . However, even without asking, he was aware that the surgery to put that wasn’t something simple, or it was something anyone could do . Darya’s grandfather probably had control over that, and Leon was quite sure that it wasn’t a good idea to get himself involved with the most influential person of that world .

Novel Chapter 240

Chapter 240: 240

In the end, learning Fire Tornado had been one of the best things Leon had decided to do . After Leon and Darya headed to the dungeon and spending one million coins in mana potions, they entered the cave . Finally, they noticed why the number of Bloody Wasps was so significant . The walls of the dungeon were covered with thousands of cocoons, and every minute dozens of new wasps were born . Still, only a small fraction left the dungeon, and most of them stayed inside the place to protect it from invaders . . .

‘Eww . . . this is so creepy,’ Darya said while she trembled .

‘I must admit this is quite a sight . . .’ Leon frowned . ‘Is this the work of the boss of the dungeon ? To think that a single creature could lay so many eggs . . . Ah!’

‘Did you notice something ?’ Darya said .

‘Yes . . . I had this feeling that I was overlooking things for a while .’ Leon answered . ‘I finally recalled what I was overlooking . . . Do dungeon breaks still happen in this world ?’

‘Yes . . .’ Darya answered .

‘Every time that kind of events happen, dozens of bosses appear,’ Leon said .
‘Still, there isn’t much food here for wasps, and we didn’t find any boss
either .’

‘So, you think they returned to their planet?’ Darya asked .

‘That, or perhaps they died of hunger,’ Leon explained . ‘After noticing that
they wouldn’t obtain much food in this world, dungeon breaks stopped
happening . That would explain why we only found a single elemental golem
boss .’

‘That makes sense . . .’ Darya nodded . ‘Some monsters eat meat, but some
want to consume mana of their prey . . . a lot of information about monsters
and dungeons are military secrets, so it wouldn’t surprise if that is the case .
Still . . . that means that the bloody wasps’ world is . . .

‘Yep, it probably billions, perhaps we will find trillions of those monsters
once we touch the purple crystal,’ Leon said .

```

‘Yikes . . . the idea alone makes me feel shivers all over my body .’ Darya
contracted her body .

It looked like they would have to use a lot of mana even to kill the mob
monsters of that dungeon, so Leon tried to find a concentrated version of the

mana potions, but he didn't find it . In any case, to avoid being surrounded by the front and the back, Leon and Darya burned down those cocoons . Quickly, the smell of burned insects got strong, and it started to bother them, but they didn't stop .

The smell alone was strong enough to attract other wasps, so Leon and Darya sometimes had to stay one hour without moving forward because the wasps didn't stop from coming . It was a pain to consume mana potions at that speed, but since they killed numerous enemies every moment, they more or less obtained enough coins to pay for the potions .

'I should try to create an earth platform a few dozens of meters above the poison mist... wasting so much time and coins to buy potions is a pain . '

What Leon and Darya thought it would be a hunt that would take only a few hours, became a test of patience that lasted one week . The number of wasps was too big, so they had to return several times to the entrance of the dungeon to buy mana potions . Fortunately, their attacks leveled up a lot, and thanks to that, the wasps were burned until nothing was left behind, otherwise, at some point, the number of corpses on the way would have stopped them .

Finally, Leon and Darya found the last part of the dungeon, and if the other parts of the dungeon were disgusting enough to make Darya tremble, the previous room made her face turn blue . Even Leon, like his back, was itching . . . what was supposed to be the boss room was a space large enough

like the place Leon fought the three-headed earth dragon . However, instead of walls, they were seeing more cocoons and flying to all directions, they saw fifty or so colossal bloody wasps laying eggs without stop .

Leon stopped to wonder how in the hell those things could lay so many eggs so fast, but soon he was forced to move because the wasps finally noticed their presence . Hundreds of wasps left their cocoons and flew to attack Leon and Darya alongside the bosses . Leon and Darya cast their Fire Tornados, but Darya was having difficulties controlling her spell because she was about to faint .

‘You really have to train your nerves . . . ‘ Leon sighed .

Although Leon said that, he was also scared since he wasn’t a fan of insects either . However, there was no reason to worry . Leon and Darya already had implemented their plan to fight the boss and clear dungeons . . . those containers filled with mana liquid were behind and connected to their backs .

At an astonishing rate, wasps began to die . Even a few of the bosses tried to attack them, but using their Fire Tornadoes, Leon and Darya blocked their advance and killed . It was all because they managed to level up that skill several times . It looked like that battle wouldn’t be difficult . . . Leon and Darya just have to keep using the Fire Tornado to stop their monsters’ charge . However, things changed when several of the bosses started to flap their wings and dropped some shining dust around the battlefield .

‘Are you for real ? Sleep Powder ? ‘ Leon frowned .

Although it looked similar to the skill of a game Leon and Betty played in the past, he didn’t imagine that he was right . . . but he was . Leon and Darya

tried to block the dust, but soon one of the Fire Tornado disappeared, and Darya fell asleep on the floor .

‘Great . . . she didn’t last even a second . ‘

Leon frowned, it was all because Darya never had any reason to learn that skill . He only sleeps once every four days, after all . Still, despite his Sleep Resistance being level thirty, Leon started to feel a little sleepy . However, he got rid of that when he hit his magic staff against his head .
