

Unlimited Power - The Arcane Path (Completed)

Novel Chapter 351

Chapter 351: 351

Leon observed things for a while, but the very moment he saw Inglar dropping his guard, which was the moment he was going to sit on the ground, Leon used Prison of Light . The next moment, Inglar got hit by several arrows of light, and before he could even fall, Leon appeared and took Soul Eater from him .

Soul Eater

It drains and stores all the mana of enemy foes .

Mana Stored: 35214633

‘Ugh . . . you . . . ‘ Inglar murmured while trying to keep standing .

‘You guys used a lot of mana and didn’t even scratch them . . . ‘ Leon frowned .

Everyone, with the exception of Inlgar, was shocked, they didn't expect that Leon would appear so boldly and steal Soul Eater just like that . The first one to recover was Alurelle, she turned into her giant form, grabbed her swords, and looked at Leon viciously .

'You!' Alurelle shouted .

'Me what?' Leon asked . 'Please, don't try to act as if you guys don't deserve the current situation you were in . '

Although Leon was pretty close to them, Jertien didn't hesitate to use Ice Meteor, several of them fall almost over Leon, but he used Transfer and moved away .

'Here is a gift for trying to kill me,' Leon said, and then the next moment, Jorhorn got attacked by Prison of Light .

'Brother!' Alurelle cried in despair .

Although he was pretty wounded, Jorhorn endured the attack and even woke up . Although he was in pain, he still found the strength to look at Leon without hiding his hatred . Genelosa and Jertien turned into their giant forms, but Inlgar stepped forward and stopped them .

‘ . . . Where is Ivolaer ?’ Inglar asked .

‘Here,’ Leon took out Lightning Slicer from his magic box and showed to Inglar . ‘Do you want to join him ?’

‘DIEEEEEEEEEEE!’ Inglar shouted after turning into his gigantic form and slashed his sword at Leon .

Leon was in the mood to act like a villain, so he moved as if he was going to block Inglar’s attack using Lightning Slicer . However, it didn’t change anything . Inglar was so blind by rage that he didn’t hesitate to destroy the weapon where Ivolaer’s was sealed . Leon used Transfer and reappeared five meters on the south side of the dungeon . He couldn’t go to the north because he could meet the angels . . . the best option was to lure one or two harvesters from that region to another place . Surprisingly, only Inglar followed Leon, and he only had to show him Lightning Slicer .

‘I guess the others have to look after the wounded . . . well, this works for me . . . ‘

Although he was wounded and tired, Inglar didn’t think twice before activating his Burning Aura to increase his speed . He wasn’t as fast as Ivolaer, but he got twice as fast . . . and he also left a path of lava where he stepped .

‘I don’t know why the angels are taking their sweet time . . . but I have to finish this before they follow such obvious trail . ‘

After using Transfer to keep ahead of Inglar for half an hour, Leon arrived in a mountainous region . Thanks to his aura, Inglar was melting even mountains and creating a sea of magma . Although Leon wanted to use the terrain to make Inglar trip, that much would do .

When Leon stopped, Inglar swung his sword and shot a massive wave of flames toward Leon . However, in comparison to the speed of the beams of light, it was a laughable attack . Without having a better idea to take out his pieces of equipment, Leon used Transfer to escape the attack and reappeared in front of Inglar’s left leg . Leon couldn’t get close enough due to the Burning Aura, so he slashed Inglar repeatedly with the Sword of Light until the light beam pierced Inglar’s leg deeply . However, Leon had to retreat because Inglar was about to split him in two and burn him to pieces with his sword

‘Fire Storm!’ Inglar shouted and raised his sword upward .

The next moment, big Fireballs started to fall from the sky . Leon didn’t know that Inglar had such skill, and the power behind it was no joke . Even though his Fire Resistance was level one hundred and fifty, Leon felt his skin burning when one of the projectiles passed within five meters of him . To make matters worse, Leon had to keep moving while he was avoiding the Fireballs, while several of them were falling around Inglar, creating a barrier around him .

‘I guess I can use this chance . . . ‘

Inglar was too focused on attacking, so even though he was a bit far away, Leon managed to steal his helmet using Telekinesis . Leon didn't have time to use Mana-Eater, so he threw the helm far away . Inglar looked at him annoyed, but he took something out of his pocket and let it fall on his head . . . the next moment, Inglar's old circlet reappeared .

‘ . . . I won't be able to decrease his defense all that much if he is carrying his older equipment, but . . . whatever . If he wants this, then it works better for me . ‘

Instead of running away, Leon used Ice Beam upward and disintegrated all Fireballs that were about to fall on him . At the same time, he used Telekinesis to strip Inglar of his mithril protective gear . He was so focused on attacking that he couldn't do anything to stop Leon . As if that was a joke, Inglar tossed away his mithril sword and equipped all his old weapon and gear . He was outraged beyond reason . . . he thought that he could defeat Leon without relying on the things Leon himself created .

‘Truly madness . . . ‘ Leon muttered .

Leon observed things for a while, but the very moment he saw Inglar dropping his guard, which was the moment he was going to sit on the ground, Leon used Prison of Light . The next moment, Inglar got hit by several arrows of light, and before he could even fall, Leon appeared and took Soul Eater from him .

Soul Eater

Novel Chapter 352

Chapter 352: 352

Even while using his old gear, it didn't take long before Leon could pierce Inglar's left leg all the way to the other side using Sword of Light . He lost some of his mobility, but it looked like only that wouldn't be enough . . .

'What's wrong with these guys . . . ' Leon frowned . 'Was Ivolaer that important to you ?'

Just destroying Inglar's legs wouldn't be enough, so Leon went for his arms to make him stop the damn Fire Storm . Leon didn't move and blocked the Fireballs using only Ice Beam, despite that, Inglar didn't stop, his mana was being drained at fearsome speed, and Leon even attacked his shoulders to make him unable to raise his arms or hold his sword . . . despite all that . . . he didn't stop .

'So, you too, huh . . . ' Leon muttered . 'I guess you two have a hard time faking your feelings . . . you also gave up a long time ago . . . and now only want to destroy everything . '

Inglar and Ivolaer couldn't be considered friends, perhaps rivals they were, and that would explain why Inglar got so angry after learning about Ivolaer's death . Just like Ivolaer, he had no more reason to keep fighting . They were alike in that aspect . . .

Someone who stole the power of the spirits by killing a fragment of them should have better control of using the magic he obtained . . . even if he wasn't a mage, Inglar should have better control at handling Fire Storm . However, he was using his attack as if he wanted to burn the entire planet . . . Leon was getting dizzy because it was getting hard to breathe since he was surrounded by magma .

Leon decided to end it even more quickly, ignoring the piece of armor protecting his chest . Leon pierced everything using Sword of Light all the way to Inglar's heart . He was from a race that focused on increasing their endurance and mentality to survive, so even though he fell because he lost control over his body, he didn't die soon afterward .

‘What is this . . . this sense of defeat . . . ‘ Leon touched his left chest because a cold feeling there was bothering him . ‘This is payback . They deserved that . . . but . . . whatever . I could use both of you since your zombie forms would be useful to solve my current problems, but I won’t torment those who are tired of fighting . ‘

The sky cleared, and even though Inlgar understood Leon’s words, he didn’t react to it . Just like Ivolaer, he was waiting for the end . . . he also couldn’t care less about what happens next .

Flaming Impaler

It grants you the skill: Fire Storm Lv 280 . Strength + 280, Dexterity +280, Speed + 280

Cost: 500 mana per second .

. . .

‘Why can’t I obtain one Electric Aura or Burning Aura?’ Leon frowned those are much more useful . . . ‘

It wasn’t time to complain since Leon just killed a person, but he did it anyway . He couldn’t feel guilty now after coming this far, for every action, there is a reaction . . . If Leon starts to be so forgiven to those who betray him, he won’t live a long life .googletag.cmd.push(function()
{ googletag.display(‘div-gpt-ad-InStory-1’); });

‘Now what?’

The obvious choice is to return to the harvesters and finish them off, but Leon decided to consume the mithril equipment he made for Inglar and transfer his mana to Soul Eater . The best scenario would be the one where he will find later, both harvesters and angels killing each other or at least damaging themselves in order to make Leon’s life easier . However, the chances of that happening were close to none . . . so Leon had to increase his stock of mana at least .

‘It is a pain that Soul Eater can’t absorb the mana from objects, only from living beings . . . ‘

{ googletag.display( 'div-gpt-ad-InStory-3' ); });
```

It took Leon a full day before he could absorb all of the mana in that equipment and transfer them to Soul Eater, the time consumed was annoying, but what annoyed Leon, even more, was the fact that Mana-Eater wasn't that efficient .

Regardless, Leon wouldn't make the same mistake twice . So, he returned to where the harvesters were only using an underground route . He could have arrived much faster if he had used Soul Eater without a care, but despite that, he arrived on time to see the harvesters and angels fighting fiercely . This time, even the angels looked pretty beat up... in fact, they had familiar wounds... wounds caused by plasma .

‘Now, I understand why they took so long to return...‘

Once again, the mithril spear that had a gift for the angels inside broke at the best moment, and the plasma hit all the four remaining angels . While they

were suffering under the effects of the plasma, the zombie made sure to torment them .

Novel Chapter 353

Chapter 353: 353

Even without Soul Eater, and having two of them severely injured, the harvesters managed to scratch the angels here and there... Leon noticed why that was happening, it was because they also relied on their wings to fly, and their wings were damaged .

‘I guess that is because of me... Well then... How should I proceed?’

First of all, Leon wanted some things . He didn't want to fight against them one-on-one, that would take too long, and he was already tired of fighting . He had some preparations to make, so Leon couldn't waste time with that . He also wanted to make some magic items and improve the ones he currently had, but it wasn't worth of risking his life .

While Leon was thinking about that, the region trembled violently . Even the angels were fighting without care now when the light projectiles hit the ground, it destroyed almost everything nearby and caused small earthquakes . . . it wouldn't take long before Leon gets hit by a stray shot .

'I should make some preparations first . . . '

Leon still had those mithril spears filled with plasma, but the angels wouldn't fall for the same trick . So, he would have to attack the angels with them and make the weapons get destroyed at the same time . . . after that, he would have to deal with the harvesters, but he already had a means of how to deal with them .

'Come to think of it . . . shouldn't the plasma corrode mithril as well? If it can destroy the flesh of angels, then . . . '

Leon very carefully took out one of those mithril spears . . . but he didn't find any sign of corrosion . Leon wondered if it was because mithril was made of mana, or if it was both mithril and plasma were made of his mana . . . either way, it didn't matter . Leon didn't have to think about the durability of his spears, and that was good .

```

‘If I hit their armor, the spear should break and spread the plasma .
Fortunately, I have four remaining spears, so I should be able to damage them
quite a bit . . . but I have to be fast and deal with the harvesters soon
afterward . ‘

After preparing his spears, Leon used Transfer and reappeared right behind
the angels . They immediately felt his presence, but since they were in the
middle of firing their magic projectiles, they didn’t have enough time to
react . Leon made his spears spin as much as possible in that brief moment of
time and then shot . The angels turned into their sphere of light form, but
Leon thought that would happen and had aimed at the exact same point the
spheres appeared . The mithril spears broke, and plasma fell on them angels .

‘Oh boy . . . this is insane . . . ‘

Leon recovered from the surprise and attacked Genelosa and Jertien’s arms .
Those didn’t resist all that much too . The wounded Jorhorn and Ismenria
looked at Leon ready to fight . . . however, Alurette stepped forward and
opened her arms to protect them .

‘Wait! We can . . . ‘ Alurette was interrupted by another barrage of Magma
Spears and fell after all her limbs got cut off .

Even Jorhorn and Ismenria were caught by surprise, but soon their turns
came . Leon didn’t hesitate and cut off their limbs too . Magma Spear
cauterized their wounds, so they wouldn’t be healed, even if they had potions

to heal wounds, they couldn't use them in such state . So, Leon faced the angels again and repeated what he just did . Sword of Light was powerful, but it wasn't truly his spell . So Leon attacked using Magma Spear . . .

'Ugh! This isn't over!' Zephon shouted and then flew toward the dungeon .
'We won't die here! We will revive our god!'

Although all the angels returned to their ordinary forms and didn't suffer much damage on their faces, they gave up on fighting and tried to fly to the dungeon . However, using Telekinesis, Leon used Jertien's hammer and crushed all of them at the same time . They were too busy running for their lives to notice Leon's actions, so they received a lot of damage since they didn't try to resist or block the attack .

Even after that attack, the angels were still trying to get up, so Leon damaged them a little more using Magma Spears . He only stopped when their limbs were damaged beyond recognition, and their wings became dust . That annoying feeling was increasing, but Leon didn't stop . The angels weren't holding their weapons anymore, but Leon decided to get them using Telekinesis and then stored them on his magic box, just to be sure .

'You . . . how . . . so much mana . . . it shouldn't be . . . possible . ' Zephon muttered .

Holy Sword (Light) (+5)

It grants you the skills: Sword of Light Lv 495 . Strength + 375, Endurance + 375, Dexterity + 375

. . .

Leon looked around and confirmed that no angels were leaving the dungeon, somehow the harvesters managed to defeat all of them . Upon noticing that, Leon understood what was that annoying feeling . . . it was guilt . . . guilt because he just caused the extinction of a race and that wouldn't be the only race he would end that day .

Even without Soul Eater, and having two of them severely injured, the harvesters managed to scratch the angels here and there... Leon noticed why that was happening, it was because they also relied on their wings to fly, and their wings were damaged .

I guess that is because of me... Well then... How should I proceed ?

The mithril spears broke, and plasma fell on them angels .

Oh boy . . . this is insane . . .

Leon recovered from the surprise and attacked Genelosa and Jertiens arms . Those didnt resist all that much too . The wounded Jorhorn and Ismenria looked at Leon ready to fight . . . however, Alurette stepped forward and opened her arms to protect them .

Wait! We can . . . Alurette was interrupted by another barrage of Magma Spears and fell after all her limbs got cut off .

Even Jorhorn and Ismenria were caught by surprise, but soon their turns came . Leon didnt hesitate and cut off their limbs too . Magma Spear cauterized their wounds, so they wouldnt be healed, even if they had potions to heal wounds, they couldnt use them in such state . So, Leon faced the angels again and repeated what he just did . Sword of Light was powerful, but it wasnt truly his spell . So Leon attacked using Magma Spear . . .

Ugh! This isnt over! Zephon shouted and then flew toward the dungeon . We wont die here! We will revive our god!

Although all the angels returned to their ordinary forms and didnt suffer much damage on their faces, they gave up on fighting and tried to fly to the dungeon . However, using Telekinesis, Leon used Jertiens hammer and crushed all of them at the same time . They were too busy running for their lives to notice Leons actions, so they received a lot of damage since they didnt try to resist or block the attack .

...

Even after that attack, the angels were still trying to get up, so Leon damaged them a little more using Magma Spears . He only stopped when their limbs were damaged beyond recognition, and their wings became dust . That annoying feeling was increasing, but Leon didnt stop . The angels werent

holding their weapons anymore, but Leon decided to get them using Telekinesis and then stored them on his magic box, just to be sure .

You . . . how . . . so much mana . . . it shouldnt be . . . possible . Zephon muttered .

Holy Sword (Light) (+5)

It grants you the skills: Sword of Light Lv 495 . Strength + 375, Endurance + 375, Dexterity + 375

Cost: 500 mana .

. . .

Leon looked around and confirmed that no angels were leaving the dungeon, somehow the harvesters managed to defeat all of them . Upon noticing that, Leon understood what was that annoying feeling . . . it was guilt . . . guilt because he just caused the extinction of a race and that wouldnt be the only race he would end that day .

Novel Chapter 354

Chapter 354: 354

When Leon turned around, he saw Alurette grabbing one of her swords with her teeth . She wasn't wounded enough to fall unconscious . Still, despite her state, she wanted to fight... Alurette wanted to protect her friends and brother . Using Telekinesis, Leon raised Jertien's hammer, but he hesitated in letting it fall on her head . Despite everything, Leon couldn't help but respect someone who had so much fighting spirit... Still...

'An enemy is an enemy... those who betray me... are my enemies,' Leon said . 'You understand that, right?'

Alurette didn't answer, just glared at him as if she was in the right, and Leon was wrong no matter what . She looked at Leon as if her group's actions were all justified... they suffered a lot, and they fought for centuries... someone like Leon couldn't understand their struggle . She was absolutely right, maybe

someday, Leon would be the one who will act like that... but he would fight to prevent himself from following the path of the traitors .

Leon let fall the hammer on Alurette's head . It was better to put the harvesters out of their misery as soon as possible . It was hard if that would be the case, but sooner Leon finishes that job; the sooner he would get rid of that feeling... at least that was what he was telling himself .

Sturdy Helmet (Earth)

Cost: 1500 mana

‘Ah, forget it . . . I don’t have time for this . ‘

Leon got up and started to use Mana-Eater, consuming the harvesters items Leon created and fill Soul Eater with mana . It took Leon three days for him to absorb them, things stayed pretty quiet on the first two days, but then monsters finally started to appear . However, no angels came from the angels’ dungeon .

‘I guess now my true work will begin . . . ‘

The best way to make good use of Soul Eater and the monsters of that world was to keep them alive and drain their mana using Soul Eater . Unfortunately, the monsters were too powerful for them to be locked in a chunk of ice by Leon’s Ice Beam . So, he had no choice but to kill them .

Leon’s next goal would be to go to Celosie and look for the fragment of the spirit of thunder . However, since he would have to pass the test alone, Leon would have to make some preparations . He had no idea what the test would be, but Leon was pretty sure he would have to use a lot of mana to succeed .

‘Well, I guess I have more than enough thanks to the mithril equipment . . . ‘

Soul Eater

It drains and stores all the mana of enemy foes .

Mana Stored: 5253321777

In fact, Leon probably had enough mana even to return to Miebos . However, that wasn't his goal . Regardless, before going to Celosie . Leon decided to bury all the angels and the harvesters . . . although they tried to kill him, they were dead, and there was no sense in hating the dead . Heal didn't work on dead bodies, so it was a bit dreadful burying corpses that were semi-disfigured or missing limbs . Still, it was another feeling Leon had to endure .

Seven days have passed since the angels created the barrier around the planet, and on that day, the sky became blue again . Jorhorn was the last one Leon buried, and before he did so, he looked for the small capsule he kept with himself . It was the miniaturized version of the tower they used . The place had several magic weapons there, and Leon took all of them to himself, even though they weren't that useful .

After burying Jorhorn, Leon started to wonder about Earth . Four years had passed since the lizard summoned him, there was even a chance that time could pass faster on Earth . . . but there was no point in worrying about that . Leon was worried about what might happen to his family and friends while he was away, would an irregular person like himself surge and lead the planets to its doom ? Would the being who summoned the dragons made them rampage again and kill his family and friends ? If that happens, they won't receive a decent funeral . . . just like his parents did . . . Leon thought that when he aimed his Telescope toward Celosie and used Transfer .

When Leon turned around, he saw Alurette grabbing one of her swords with her teeth . She wasn't wounded enough to fall unconscious . Still, despite her state, she wanted to fight... Alurette wanted to protect her friends and brother . Using Telekinesis, Leon raised Jertiens hammer, but he hesitated in letting it fall on her head . . . .

Just as Leon heard from the harvesters, Celosie was really a world that had a lot of mountains . Most of them had more than five kilometers of height, so Leon wondered how that world progressed, having so little space for cultivating their lands and growing crops and things like that . However, those thoughts soon disappeared .

‘Well, now . . . where I will find the temple of the fragment of the spirit of thunder?’

Just like Jorhorn said it would be hard to reconquest that world thanks to its terrain, it would be equally challenging to find anything . Leon could have asked before defeating the harvesters, but it was a bit unrealistic to wait for

them to answer his questions when it was apparent that he wouldn't spare them .

‘Well, it shouldn't be that difficult . . . the angels probably left the temple standing and destroyed everything else created by this world's inhabitants . ‘

Even though he used his telescope to find anything that looked like a temple, Leon didn't find anything . However, he was confident that as long as he flies low, he would feel the presence of the spirit . Things would progress faster if Leon decided to ignore all monsters and look for the temple, but he chose to collect their mana .

It wasn't that surprising, but Leon didn't find any new monster while he was looking for the temple . The power level of the monsters also was pretty much the same, and there was no sign of an angel . . .

‘They probably made the magic circle here too . . . it would be awesome if I could absorb the mana of the magic circle with Soul Eater, but I can't . ‘

Once Leon finds the spirit of thunder, he wouldn't have any reason to return to Celosie . So, it was a good idea to practice Mana-Eater and fill Soul Eater with even more mana . Although the process would be very time-consuming, Leon could speed up things using Fast-Conjuration . Besides, it would be too much of a waste to leave such a reservoir of mana behind .

Celosie had four continents, and as expected, the magic circle was on the largest one . Regardless, Leon had to look for two weeks before he could feel a mighty presence . He looked around but found nothing, only mountains .

‘Is he in a cave ?‘

Still, it didn’t take long before Leon found the end of the cave and noticed that the last part looked like the exterior of a building . The walls weren’t rough, and the ground wasn’t uneven . However, on the altar, instead of seeing a ball floating, Leon found a humanoid figure . Its body was made of electricity, so Leon was having a hard time looking at it . The spirit’s body was pretty average and seemed to be one of a man, but it was hard to be sure if that was the case .

‘Hello, traveler,’ The spirit said .

‘Hey, My name is Leon . . . this may sound like a stupid question, but . . . ‘
Leon hesitated . ‘Are you one of the fragments of Volt ?’

‘Indeed I am,’ The spirit answered . ‘You can call me Volt, the spirit of
thunder, a fragment of a spirit . . . it is your choice . ‘

‘I see . . . well then, Volt,’ Leon said . ‘You know I’m here, right ?’

‘Yes, you want my power,’ Volt nodded .

‘Yes, so . . . what is going to be the test?’ Leon asked .

‘There is no need for a test,’ Volt shook his head . ‘You can have my power .
,

‘ . . . Why?’ Leon frowned .

‘Because you already did what I wanted, you killed those who killed my
brothers and sisters,’ Volt said . ‘Although we are not the original spirits, we
have a great sense of similarity . We were born in the same way, after all .
Besides, we gained consciousness at the same time . So, we used to talk a
lot . . . but now I can only feel faint voices now and then when the original
spirits pass nearby this solar system . ‘

‘I see . . . you can hear them,’ Leon rubbed his chin . ‘When was the last time
you heard their voices ?’

‘Six years ago,’ Volt answered .

‘I guess he or she had a lot of time to get ahead of me . . . ‘ Leon frowned .
‘It will be a waste of time look for them now . . . well, since I don’t need to be tested, I will accept your power . ‘

‘Understood,’ Volt nodded and then sent a sphere of thunder inside of Leon .

At first, Leon thought he had been attacked, his body started to tremble, and he felt like he was being electrocuted . However, soon the energy stabilized, and Leon received several notifications .

Novel Chapter 356

Chapter 356: 356

‘Thank you very much . ‘ Leon smiled in satisfaction .

Thunder Resistance leveled up to the level two hundred, and Leon once again obtained the points for each level up . The Thunder Blessing he was already expected to receive; that being said, Leon thought he would be able to summon a more powerful spirit, not another lesser spirit . . . Regardless, Leon forgot about that when he saw the description of Electric Armor .

Electric Armor: A spell that envelopes your body in electricity . It increases your speed, strength, endurance, and the power of your electric attacks by a certain percentage that equals the level of the skill .

Cost: 100 mana per second

‘The cost is a bit high . . . but I guess it is the thunder version of Dark Aura . I won’t be able to teleport, but it will increase my speed exponentially . However, the stronger it becomes . . . , the more difficult it will become to keep the skill active for longer periods of time . . . that is probably one of the reasons Thunder Resistance is now level two hundred . ‘

It was a pretty good power-up, Leon now could count on three lesser spirits to help him, and he also would be able to learn thunder spells faster . There was no reason for him to feel unsatisfied .

‘May I ask you a question ?‘ Leon asked .

‘Another one ?‘ Volt asked .

‘Yes . . . do you know where I can find other spirits?’ Leon asked .

Sponsored Content

googletag.cmd.push(function()  
{ googletag.display( 'div-gpt-ad-InStory-2' ); });
```

‘Yes, you can go to the planet of angels,’ Volt answered . ‘You will find the fragment of the spirit of light there . Receiving his cooperation will probably be impossible . ‘

‘Why?’ Leon frowned .

‘You killed a lot of the people who worshiped him,’ Volt explained . ‘Even though they didn’t have, the angels offered him many offerings over the decades . Thanks to those offerings, he will be able to live for hundreds of thousands of years . So I doubt that he will have any interest in negotiating with you . ‘

‘I see . . . ‘ Leon looked away, disappointed .

Leon could always kill a spirit in order to obtain a part of its power, but that would probably make things difficult if he finds another spirit and notices what he did . Besides, Leon decided not to think of that, since spirits could read his mind by the movement of his mana . . .

‘Well, I can always find another spirit of thunder somewhere else . . . ‘ Leon said . ‘There is another spirit nearby?’

‘ . . . There is someone who killed another spirit . You can go to his world if you return to Miebos . ‘ Volt said .

‘Ah, that guy . . . ‘ Leon said . ‘I guess I won’t be able to find the spirit of shadow there, but I will be able to recover a part of his power . ‘

‘Indeed . Although you can’t defeat him now, you will receive almost the same amount of power I gave you,’ Volt explained . ‘That being killed a fragment which was far stronger than me, so most likely, you will receive a huge deal of power . ‘

Sponsored Content

googletag.cmd.push(function()  
{ googletag.display( 'div-gpt-ad-InStory-1 ' ); });
```

Leon turned and walked toward the exit of the dungeon, and he only started to think about what he heard when he left the mountain . It was hard to be sure, but there was a possibility that Volt also tempted him with promises of power .

‘Considering Volt’s words and brief hesitation . . . he wants that shadowy figure dead . Well, it is obvious considering that he killed a spirit to obtain its power, but his actions were still a bit dubious . . . considering that he has been alive only for twenty years or so . . . ‘

Regardless, it looks like Leon won’t obtain the spirit of light’s power for the time being since he caused the end of the race that more or less worshiped him . It was a pity, but Leon couldn’t always get what he wanted .

‘Well, I can’t waste time, and should it level up as much as I can . . . ‘

Leon activated Electric Armor, and he felt all his body really ticklish, the spell was really above his skin, but the electricity wasn’t wounding him in any way . However . . .

...

The more the skill leveled up, the bigger the discomfort grew . . . It didn't take long before Leon could feel his skin burning . Thanks to Thunder Resistance, his body wasn't getting numb, but the damage was there .

'As expected . . . the cost to keep such useful skill active isn't only mana . Still . . . I have no other option but to endure this . This spell is too useful to ignore . '

That being said, Leon's primary goal was to return to Earth, so he couldn't just ignore everything to level up Electric Armor . The list of useful skills Leon had to level up was increasing . . . but it couldn't be helped . He wanted to cross the universe, after all . Such a task couldn't be done with guts alone .

Leon returned to the biggest continent of Celosie and then started to use Mana-Eater and drain the mana of the magic circle . He had no idea for how long he would have to do that, but he was decided to stop only when the mana

of the magic circle disappears or until he manages to see Earth using his telescope .

‘This will take a long time . . . I guess I shouldn’t keep thinking about that and should just start . . . ‘

Leon sat on the ground and started to use Mana-Eater . . .

Thank you very much . Leon smiled in satisfaction .

Thunder Resistance leveled up to the level two hundred, and Leon once again obtained the points for each level up . The Thunder Blessing he was already expected to receive; that being said, Leon thought he would be able to summon a more powerful spirit, not another lesser spirit . . . Regardless, Leon forgot about that when he saw the description of Electric Armor .

Electric Armor: A spell that envelopes your body in electricity . It increases your speed, strength, endurance, and the power of your electric attacks by a certain percentage that equals the level of the skill .

Cost: 100 mana per second

The cost is a bit high . . . but I guess it is the thunder version of Dark Aura . I wont be able to teleport, but it will increase my speed exponentially . However, the stronger it becomes . . . , the more difficult it will become to keep the skill active for longer periods of time . . . that is probably one of the reasons Thunder Resistance is now level two hundred .

It was a pretty good power-up, Leon now could count on three lesser spirits to help him, and he also would be able to learn thunder spells faster . There was no reason for him to feel unsatisfied .

May I ask you a question ? Leon asked .

Another one ? Volt asked .

Yes . . . do you know where I can find other spirits ? Leon asked .

Yes, you can go to the planet of angels, Volt answered . You will find the fragment of the spirit of light there . Receiving his cooperation will probably be impossible .

Why ? Leon frowned .

You killed a lot of the people who worshiped him, Volt explained . Even though they didnt have, the angels offered him many offerings over the decades . Thanks to those offerings, he will be able to live for hundreds of thousands of years . So I doubt that he will have any interest in negotiating with you .

I see . . . Leon looked away, disappointed .

Leon could always kill a spirit in order to obtain a part of its power, but that would probably make things difficult if he finds another spirit and notices what he did . Besides, Leon decided not to think of that, since spirits could read his mind by the movement of his mana . . .

Well, I can always find another spirit of thunder somewhere else . . . Leon said . There is another spirit nearby ?

. . . There is someone who killed another spirit . You can go to his world if you return to Miebos . Volt said .

Ah, that guy . . . Leon said . I guess I wont be able to find the spirit of shadow there, but I will be able to recover a part of his power .

Indeed . Although you cant defeat him now , you will receive almost the same amount of power I gave you, Volt explained . That being killed a fragment which was far stronger than me, so most likely, you will receive a huge deal of power .

Leon turned and walked toward the exit of the dungeon, and he only started to think about what he heard when he left the mountain . It was hard to be sure, but there was a possibility that Volt also tempted him with promises of power .

Considering Volts words and brief hesitation . . . he wants that shadowy figure dead . Well, it is obvious considering that he killed a spirit to obtain its power, but his actions were still a bit dubious . . . considering that he has been alive only for twenty years or so . . .

Regardless, it looks like Leon wont obtain the spirit of lights power for the time being since he caused the end of the race that more or less worshiped him . It was a pity, but Leon couldnt always get what he wanted .

Well, I cant waste time, and should it level up as much as I can . . .

Leon activated Electric Armor, and he felt all his body really ticklish, the spell was really above his skin, but the electricity wasn't wounding him in any way . However . . .

. . .

The more the skill leveled up, the bigger the discomfort grew . . . It didnt take long before Leon could feel his skin burning . Thanks to Thunder Resistance, his body wasnt getting numb, but the damage was there .

As expected . . . the cost to keep such useful skill active isnt only mana . Still . . . I have no other option but to endure this . This spell is too useful to ignore .

That being said, Leons primary goal was to return to Earth, so he couldnt just ignore everything to level up Electric Armor . The list of useful skills Leon had to level up was increasing . . . but it couldnt be helped . He wanted to cross the universe, after all . Such a task couldnt be done with guts alone .

Leon returned to the biggest continent of Celosie and then started to use Mana-Eater and drain the mana of the magic circle . He had no idea for how long he would have to do that, but he was decided to stop only when the mana of the magic circle disappears or until he manages to see Earth using his telescope .

This will take a long time . . . I guess I shouldnt keep thinking about that and should just start . . .

Leon sat on the ground and started to use Mana-Eater . . .

Novel Chapter 357

Chapter 357: 357

It took Leon six months for him to absorb all the mana on the magic circle of Celosie . In that period, Mana-Eater leveled up to the level one hundred ninety, and Fast-Conjuration reached the level one hundred fifty .

‘Testing, one, two, three . . . Testing, one, two, three . . . ‘ Leon coughed a little . ‘All right, I guess my voice is normal today too . . . ‘

In those six months, Leon felt like he was back to the island, but the island was now a planet . Gravity couldn’t stop him anymore, and the beasts didn’t scare him . . . thanks to that, Leon was getting worried about silly things like suddenly losing his voice or the possibility that his voice might become more acute due to lack of use of his vocal cords .

```
. . .googletag.cmd.push(function()  
{ googletag.display('div-gpt-ad-InStory-1 '); });
```

‘All right . . . it is time to test the telescope number seven . ‘ Leon said .

Leon knew that to reach significant goals, one had to take slow but steady steps . So, to reach Earth faster, he decided to develop a new telescope every month . However, every new telescope had to be at least one meter longer than the previous one . That way, the efficiency of his skills wouldn’t be the only thing that would multiply the effectiveness of the telescope .

‘Mmm . . . It looks like everything is well on Miebos, a lot more warriors are starting to walk around the city as of late . . . ‘

On the days of clear sky in both planets, Leon could clearly see the inhabitants of Miebos through the lenses of his telescope . Although he was using only one-third of the capacity of the telescope, Leon had to make that kind of test every day just to make sure he wouldn’t screw up .

After doing his usual test, Leon changed the telescope to his full capacity, and now he could see another galaxy even more distant than Miebos . Leon already knew that Miebos and Celosie galaxies were neighbors, but finding another galaxy was a big step . . . However, Leon couldn’t see any of the planets of that place in detail . However, Leon knew that it wasn’t the Milky Way

```
galaxy . . .googletag.cmd.push(function()  
{ googletag.display('div-gpt-ad-InStory-3 '); });
```

Creating a telescope and improving it using mithril seemed the plan who had the most significant chances of success for Leon, but after those six months, several things became clear . . . Magic wasn't omnipotent, if it was, then Leon lacked the mastery to create a telescope much more potent than the ones on Earth . Even if Leon was a powerful mage, he couldn't overcome with his mana alone, centuries of progress the human scientists managed to obtain .

‘ . . . Now what?’ Leon asked after a long sigh .

Leon had more than two hundred million coins, yet, he couldn't find anything useful in the dungeon shops . The chances of him finding were close to none since he was only living being on those six planets killing monsters, after all . Not only that, not a single fucking grimoire had been dropped by monsters in those six months . . .

‘If I return to Miebos and tell Donan how to produce mithril, his scientists will be able to create a much better telescope . . . that being said, I will have to use a lot of mana to return, and there is always a chance that the shadowy figure prepared a trap . . . ‘

Leon wouldn't work for someone like Donan who mistreated Darya, but he could make some demands in exchange for knowledge . Was it worth the risk? Leon couldn't say . . .

‘If I take my telescope to Miebos, I will be able to see the next galaxy with more precision . Perhaps there I will find a planet that has been assimilated, and then I could go there . . . but it would be the right direction? It is impossible to know If by traveling like that, I could be getting closer or even farther away from Earth . ‘

Congratulations! The skill Rage has leveled up .

You obtained 01 status points .

Leon could also go to different worlds through dungeons and use his telescope there . Still, considering the vastness of the universe and the fact that his current telescope could only see anything two galaxies away from his current position, the chances of him succeeding were slim .

‘I wonder if that guy lied when he said that he could take me back to Earth . . . no, he wasn’t lying . He said that he wanted Earth’s mana . . . so he definitely the way to go and how to go . . . I guess my only real option is to beat the crap of a being that is called the ‘god of death . ’”

Leon stopped thinking and let out a long sigh . His life was stupidly hard . If he could compare with a game, it would be like playing Dark Souls, blindfolded and without his arms . . .

Regardless, defeat such a being that was consuming mana from several planets to get stronger was too realistic . Most likely, that shadowy figure was on a world that was on the fourth stage of assimilation . A creature was so powerful that it couldn’t even materialize itself on worlds like Miebos . Leon thought for a while, but he didn’t find an answer to his questions . . . in the end, once again . . . he could only open his path with steel and blood .

It drains and stores all the mana of enemy foes .

Mana Stored: 12123625412

After returning to Dasaliv, Soul Eater had that much of mana . Although it wasn't a small amount, against a creature that was absorbing mana of several worlds, Leon would have to increase it by many times . So, he also decided to use half of the mana he obtains by using Mana-Eater to store it in Soul Eater and the other half he would use to level up his skills .

After the end of the first day of training, Leon made a mental note to increase the level of his lowest skills at least once every day . Although he wouldn't always have such a convenient way to recover his mana, it was too easy to level up the low-level skills he learned years ago . His mana pool grew to the point where that kind of thing was possible, and he also had the tools to recover his mana quite fast . So, leveling up his weak spells in order to gain some status points was a must .

‘Why I feel so empty doing this . . . Is it because I got used to it? Or is it because I have a lot of skills? It has been a while since I felt any sense of accomplishment . . . ‘

Suddenly, Leon stopped and frowned due to his feelings . He obtained a lot of status points, and those would help him to go home . . . but Leon couldn't

feel even a bit happy . At first, Leon thought it was his usual depression after so many failures, but that wasn't the case . He wasn't feeling lethargic, after all . It was just . . . as if everything had become routine . Training his spells, obtaining status points, getting stronger, and failing at reaching his goal . . . it became . . . normal .

'This is a very bad feeling . . . no matter what, I can't let myself get used to failures . '

Maybe it was because his goal became even more difficult, or perhaps it was because the scale of his problems was much bigger . Either way, Leon couldn't let himself be overwhelmed by any situation or problems .

Novel Chapter 359

Chapter 359: 359

It took Leon one week for him to level up all his skills to level thirty, he was a bit satisfied with his progress, but to change the mood of the last days, he decided to take a break from his never-ending training . Since his only days off on his eight years were the days he was depressed on the island, he decided to take a day off for a change of pace . However, Leon didn't have any hobbies, and there was nothing nor even anyone to talk to .

‘So, my only option is to go insane talking to myself or keep acting like a workaholic who doesn't feel anything . . . ‘ Leon sighed . ‘I don't think I sinned so much in this life to deserve this . . . ‘

Still, Leon tried to relax even for a few hours . . . looking at the starry sky .
That didn't help him . It only made Leon feel like he didn't have time to
waste . Regardless, it looked like only impressive accomplishments would
make him forget that . . .

‘This will be a bit troublesome . . . but I guess it is the only way to avoid
myself from getting too lax .‘

Instead of thinking of new spells, Leon decided to look for them on the
dungeon shop and try to replicate them . He would do that once every three
days and would only return to his task of filling Soul Eater with mana once he
learns a new spell . That would add the sense of urgency Leon was missing as
of late .

Congratulations! You have learned the skill: Electric Rope .

Cost: 150 mana

googletag.cmd.push(function()  
{ googletag.display('div-gpt-ad-InStory-1 '); });
```

Two days later, Leon learned another skill and again leveled up the skill up to level thirty . It was thanks to Electromancy, so it couldn't be helped that he was learning new skills fast . In the end, Leon decided to learn other types of the spell, because he wasn't feeling accomplished doing that .

‘I don't even know what I'm doing anymore... I'm trying to go home by making myself motivated, or am I just trying to feel proud of myself?’

Trying to learn spells like Ice Meteor would take too long, and if Leon keeps failing, he would only feel depressed and make things worse . So, he decided to keep things as simple as possible .

Congratulations! You have learned the skill: Orb of Magma .

Cost: 50 mana

Duration: 5 seconds

You obtained 01 status points .

```

Unfortunately, the same type of attack with other elements wasn't that useful . The same thing couldn't be applied for Fire Slash, Ice Slash, and Earth Slash, so Leon practiced those for the next ten days . However...

Congratulations! You have learned the skill: Fire Slash .

Cost: 40 mana

You obtained 01 status points .

Cost: 40 mana

You obtained 01 status points .

‘Yep . Although I’m getting stronger, this isn’t changing my mood... I lived an irregular life since that dragon crashed that plane... only random and surprising things will change my mood . Only real tension will motivate me to keep me working hard and let me stay focused . ‘

It was pathetic, but Leon would never feel that way as long as he stays alone on such a planet . There were no challenges for him there... he finally understood why he felt so motivated and focused on the island . It was because he was never safe . He didn’t know at the time that dragons suddenly disappeared, but he thought that he would see them the very moment he leaves the island . At that time, two species of Apex-predators dominated the skies and the seas, so he couldn’t help but feel motivated to obtain the power to defeat them .

‘I guess I will have to return to Miebos much sooner than I planned... It is a massive waste to leave all the mana on those four planets, but I guess it can’t be helped...‘

In the end, Leon decided to at least absorb all the mana in the magic circle on Dasaliv . Still, quite surprisingly, he didn't feel all that bothered anymore . He soon would get close to another enemy, and this time the enemy had for sure the means to send him back to Earth . Although the monsters were weaker and the mana Leon will be able to collect, there couldn't be compared to a world on the third stage of assimilation; everything wasn't just bad news . Leon could obtain access to knowledge of the researchers on Miebos, after all . He already kicked Donan's ass once, so he can do it twice if he has to . Of course, he would negotiate, but when someone doesn't listen to reason, the chances of that someone listening to painful lessons increase .

'Well, I should get going... I'm quite scared of what long periods of isolation can do to my psyche, considering that those four years sealed my holy sword...'

It took Leon one week for him to level up all his skills to level thirty, he was a bit satisfied with his progress, but to change the mood of the last days, he decided to take a break from his never-ending training . Since his only days off on his eight years were the days he was depressed on the island, he decided to take a day off for a change of pace . So, my only option is to go insane talking to myself or keep acting like a workaholic who doesnt feel anything . . . Leon sighed . I dont think I sinned so much in this life to deserve this . . .

Still, Leon tried to relax even for a few hours . . . looking at the starry sky . That didnt help him . It only made Leon feel like he didnt have time to waste . Regardless, it looked like only impressive accomplishments would make him forget that . . .

This will be a bit troublesome . . . but I guess it is the only way to avoid myself from getting too lax .

Instead of thinking of new spells, Leon decided to look for them on the dungeon shop and try to replicate them . He would do that once every three days and would only return to his task of filling Soul Eater with mana once he learns a new spell . That would add the sense of urgency Leon was missing as of late .

Congratulations! You have learned the skill: Electric Rope .

Cost: 150 mana

Duration: 15 seconds

You obtained 01 status points .

Congratulations! The skill Electromancy has leveled up .

You obtained 01 status points .

I guess I also should level up this to the level thirty . . .

Much faster than he expected, thanks to Electromancy, Leon learned a new spell . Although the cost was a bit high, Leon leveled up the skill until level thirty within a day . Thus, he had two days to keep draining mana from the magic circle .

Congratulations! You have learned the skill: Thunder Slash .

Cost: 50 mana

You obtained 01 status points .

Two days later, Leon learned another skill and again leveled up the skill up to level thirty . It was thanks to Electromancy, so it couldnt be helped that he was learning new skills fast . In the end, Leon decided to learn other types of the spell, because he wasnt feeling accomplished doing that .

I dont even know what Im doing anymore... Im trying to go home by making myself motivated, or am I just trying to feel proud of myself?

Trying to learn spells like Ice Meteor would take too long, and if Leon keeps failing, he would only feel depressed and make things worse . So, he decided to keep things as simple as possible .

Congratulations! You have learned the skill: Orb of Magma .

Cost: 50 mana

Duration: 5 seconds

You obtained 01 status points .

Unfortunately, the same type of attack with other elements wasn't that useful .
The same thing couldn't be applied for Fire Slash, Ice Slash, and Earth Slash,
so Leon practiced those for the next ten days . However...

Congratulations! You have learned the skill: Fire Slash .

Cost: 40 mana

You obtained 01 status points .

Congratulations! You have learned the skill: Ice Slash .

Cost: 50 mana

You obtained 01 status points .

Congratulations! You have learned the skill: Earth Slash .

Cost: 40 mana

You obtained 01 status points .

Yep . Although I'm getting stronger, this isn't changing my mood... I lived an
irregular life since that dragon crashed that plane... only random and
surprising things will change my mood . Only real tension will motivate me to
keep me working hard and let me stay focused .

It was pathetic, but Leon would never feel that way as long as he stays alone on such a planet . There were no challenges for him there... he finally understood why he felt so motivated and focused on the island . It was because he was never safe . He didnt know at the time that dragons suddenly disappeared, but he thought that he would see them the very moment he leaves the island . At that time, two species of Apex-predators dominated the skies and the seas, so he couldnt help but feel motivated to obtain the power to defeat them .

I guess I will have to return to Miebos much sooner than I planned... It is a massive waste to leave all the mana on those four planets, but I guess it cant be helped...

In the end, Leon decided to at least absorb all the mana in the magic circle on Dasaliv . Still, quite surprisingly, he didnt feel all that bothered anymore . He soon would get close to another enemy, and this time the enemy had for sure the means to send him back to Earth . Although the monsters were weaker and the mana Leon will be able to collect, there couldnt be compared to a world on the third stage of assimilation; everything wasnt just bad news . Leon could obtain access to knowledge of the researchers on Miebos, after all . He already kicked Donans ass once, so he can do it twice if he has to . Of course, he would negotiate, but when someone doesnt listen to reason, the chances of that someone listening to painful lessons increase .

Well, I should get going... Im quite scared of what long periods of isolation can do to my psyche, considering that those four years sealed my holy sword...

Novel Chapter 360

Chapter 360: 360

One month later, Leon finally managed to drain all the mana of the magic circle . Then, he started to wonder about what he should do to the tower of the harvesters . It had probably been made on that planet... it belonged to that place, and it would be a good sign that a sentient race lived there once since everything else had been destroyed .

‘The dead won’t need this... maybe the researchers of Miebos will be able to study it . It will serve as a good gift for them, and I’m pretty sure they will give me access to their database of magical knowledge if I give it to them . ‘

Leon didn’t know how, but some researchers that were once the harvesters’ companions managed to use space magic to increased and decrease the size of many things . Leon always wondered how they did that, but he would never know... since they died more than twenty years ago, and the harvesters themselves had no idea how even their weapons worked .

Regardless, after miniaturizing the tower, Leon adjusted his telescope and then used Transfer once he could see Miebos .

Congratulations! The skill Transfer has leveled up .

. . .

To save some time, Leon used Transfer and reappeared five seconds later, right in front of the research center . The hole his created had been repaired a long time ago, and he also could see some of the warriors that lived under the city walking around... but they stopped, everyone stopped when Leon suddenly appeared .

‘I must look for someone in the research center that can contact Donan... things look to be quite normal around here, so I should go down to business without wasting time . ‘

Although Leon could create things like knives to cut his hair and beard, it couldn't be helped that he still had a somewhat messy appearance . He wasn't that skilled, after all . So, he was quick to draw the attention of others... or perhaps he was attracting many stares because he was holding Soul Eater and a ten meters long telescope . It was hard to tell...

Leon headed to the entrance of the research center and was welcomed by the security of the place . They looked pretty wary of him, but at least they didn't attack .

‘Hello, I want to talk with Donan,‘ Leon said . ‘Can any of you call him?’

The guards ignored Leon's words and kept staring at him, it looked like they were waiting for something, and they were also looking at him as if he was a weird creature . It couldn't be helped since he didn't have bulging muscles or a mana crystal on his forehead, but that was still annoying .

'Do I have to make a scene again? Why didn't I ask where Donan works before?'

'You look familiar...' Anton said .

'It is me, Leon...' Leon said, 'I didn't think you were the type of man who had a bad memory . '

'Leon... Leon... Ah! The traveler that appeared years ago,' Anton said . 'It is okay, guys; you can relax . I know this man, and he isn't dangerous... right?'

'Why are you asking me that?' Leon frowned . 'Did I cause problems before without reason?'

'Well... a long time has passed...' Anton said . 'People can change...'

'I don't think can change so much in a year or two,' Leon said .

'Yeah, that is right...' Anton hesitated .

Something was off, Eadmund was older than Leon, but he recalled that he was a pretty chill guy to talk with . Judging by his clothes, it looked like now that he was working as a member of the security of the research center . Still,

it was hard to imagine such a job could change him so much after just two years .

‘Am I missing something?’ Leon asked . ‘Did something happen?’

‘You left with the harvesters, right?’ Anton asked . ‘Are they back, too?’

‘Are you seriously going to answer my question with another question?’

Leon furrowed his eyebrows . ‘They are dead... they won’t come to this world anymore, and you can rest assured . Now, answer my question . ‘

‘That is good to hear...’ Anton said . ‘Still, nothing happened after you left . So, I don’t think there is anything worth saying . ‘

Everything was a bit weird, but considering that Leon left by making some threats, it couldn’t be helped that even Anton was looking at Leon with caution . He left to work with the harvesters, and now Leon returns without them telling why that they are dead... anyone sane would be suspicious .

‘... Whatever, I want to talk with Donan,’ Leon said . ‘Where is he?’

‘... Mr . Donan died, Ms . Darya is our leader now,’ Anton answered . ‘You can find her on the government tower North of here . ‘

Leon couldn’t help but frown, Anton looked quite sad after mentioning Donan’s death, as if that wasn’t weird enough he said that Darya took his place . If those two things were worth mentioning to him, then something was wrong with Anton’s head... that or he wanted to get his ass kicked .

Still, it was hard to imagine Donan dead . He was a tough bastard, the only person in that world who could defeat a harvester... how did he die considering that the harvesters left Miebos two years ago ? Besides, it was bizarre that Darya took his place . The people of that world only learned about her after Donan erased her memories ? If that information was confidential, how Anton found that information ?

‘I see...‘ Leon said . ‘When did he die ?‘

‘Ten years ago,‘ Anton answered .

One month later, Leon finally managed to drain all the mana of the magic circle . Then, he started to wonder about what he should do to the tower of the harvesters . It had probably been made on that planet... it belonged to that place, and it would be a good sign that a sentient race lived there once since everything else had been destroyed .
