

Unlimited Power - The Arcane Path (Completed)

Novel Chapter 471

Chapter 471: 471

‘My name is Leon . . . You are a human from Earth, aren’t you?’ Leon asked . ‘Don’t you think it is strange that whoever you are working with sent you here at this point in time?’

‘Why are you so friendly all of a sudden?’ The man frowned . ‘ It isn’t strange, and I don’t have to explain to you why . Those guys are coming with me on their own volition . You are not going to stop us . ‘

It was evident why, but Leon couldn’t help but think that things wouldn’t solve itself just by talking . That human didn’t even want to reveal his name, after all . While Leon was thinking about that, the six rat-men approached that guy, and then he suddenly took something out of his armor and broke it . Instantly a shadow enveloped them, and Leon felt his mana again . Little by little, the shadow decreased in size until it becomes small and round . . . like the shadow, Leon saw when he met that cloaked figure after that weird dream . When the shadow finally disappeared, the man and the five rat-men weren’t there anymore .

‘Shit . . . what the hell is going on . . . ‘

Before Leon could think of anything, he was teleported back to Ilyana's castle, and she was looking at him as if he had disappointed her greatly . . . It couldn't be helped, but Leon felt annoyed by it .

'You have failed,' Ilyana said .

' . . . Perhaps if you had given me more information, things would have been different,' Leon said .

'So, do you want to receive every piece of information necessary to help you do every single thing ?' Ilyana frowned . 'It surprises me that you survived so far with that kind of mindset . '

' . . . You sent me because you knew that I would meet that guy,' Leon said .
'Why ?'

'Because you are not the only one who is working with people more powerful than yourself,' Ilyana answered . 'That man is working with the woman I want to kill, the same person that summoned the dragons that caused the death of your parents . The terrorists were just a minor nuisance . If you want

to get your revenge, you will have to deal with people like him again and again . ‘

Leon couldn't help but wonder if that was really true . Ilyana didn't say anything before, just that he had to kill some individuals, and now she was telling such convenient information . Maybe that guy was being tricked, but for all that Leon knew, he could be being tricked as well . To powerful people like Ilyana, keeping an eye on Earth and its people, it shouldn't be more complicated than lifting a finger, after all . Still, Leon failed in hiding those thoughts from his face .

Leon left the castle because, just like Ilyana, he didn't feel like chatting . Although it looked somewhat obvious, things were far less black and white than Leon had imagined . Even though Ilyana could be right, the inverse was also true . In the end, there was no point in trying to save every single sentient species of every world because they didn't need to be rescued . They had to understand that they needed the power to protect themselves . The only way to obtain that was by first tasting real despair . In fact, even Leon sometimes couldn't help but wonder if all that effort wasn't just a waste of time . In the end, even if he achieves his vengeance, nothing would change . His parents wouldn't return, and his friends wouldn't remember him . . . he could make new memories with them, but it wouldn't be the same thing .

‘You don't have to feel that depressed, Leon,’ Sylph said . ‘It would be very suspicious of you if you had obeyed her others without questioning them . In

the end, nothing says that they will follow the path that Ilyana things they will . ‘

‘That is right,’ Undine said . ‘Just observe things with your own eyes and reach your own conclusions . There is no point in living if you have to obey and follow the thoughts of someone else every single time . ‘

Undine was serious for a change, so she was probably right . Still, it didn’t change the fact that Leon owed a lot to Ilyana . He doubted that he could obtain alone half of the powers will he obtain by working with her . He had to pay his debts, but considering how powerful someone like her was, few things could be considered a problem for her .

‘Man, I wish I could have fought that human,’ Efrete said . ‘He looked even stronger than Leon . . . I can’t understand why he ran away, though . ‘

‘He escaped because he thought Leon would be far weaker without his magic,’ Volt explained . ‘He got caught by surprise since that wasn’t the case, so he decided to escape because he couldn’t measure Leon’s strength . ‘

Leon nodded since that made a lot of sense . . . Regardless, at least that served well to make Leon understand that he still needed to train and learn more spells . The list of things he needed to learn increased since he failed for several reasons . The number one was because he didn’t know how to counter Anti-Mana Field . He couldn’t let himself lose his powers, even temporarily again .

My name is Leon . . . You are a human from Earth, aren’t you ? Leon asked .
Dont you think it is strange that whoever you are working with sent you here at this point in time ?

Why are you so friendly all of a sudden? The man frowned . It isnt strange, and I dont have to explain to you why . Those guys are coming with me on their own volition . You are not going to stop us .

It was evident why, but Leon couldnt help but think that things wouldnt solve itself just by talking . That human didnt even want to reveal his name, after all . The list of things he needed to learn increased since he failed for several reasons . The number one was because he didn't know how to counter Anti-Mana Field . He couldn't let himself lose his powers, even temporarily again .

Novel Chapter 472

‘Because I also don’t fight using my fists all that much, I didn’t cause much damage when I punched his neck . He messed up my stance when he activated Anti-Mana Field . ‘

Leon decided to increase his health and stamina little by little, but he didn’t expect such an event would happen so fast . He doubted that it would happen again, but he couldn’t just rely on such possibilities . Until now, from the very moment, the monsters appeared, several things that Leon didn’t wait for happened . Instead of imagining when that kind of thing may happen, he has to work and prepare himself for it .

‘Still, prepare myself without relying on tools or weapons is difficult . . . that kind of problem will only disappear once I learn how to absorb mana from the ambient . But until then, I have to manage to solve the problems using my body and mana alone . ‘

It would take a while before Leon learns or discover a way to counter Anti-Mana Field directly, so he decided to experiment with it to find its weakness . First, Leon created an earth sphere and let it float above his hand, and then he activated Anti-Mana Field . At the same time, he lost control over the sphere . Unfortunately, when deactivated Anti-Mana Field, the sphere didn’t float again . . . Leon lost control over the mana inside of it .

‘I can’t use unless I put my mana inside of it . . . that means . . . ‘

Leon tested that using the Auxiliary Earth Swords, as expected, he lost control over them, but they didn’t lose their shape . They fell to the ground, but Leon could control them with his hands .

‘It isn’t the best weapon . . . but it is better than my fists . ‘

Unfortunately, the more that skill leveled up, it only increased the number of swords Leon could summon . It didn’t increase their power or durability . That kind of strategy would only work against weak foes . Leon would have to think of another way to counter that spell while he trains . Although his hesitation helped, he ultimately failed because he wasn’t strong enough to overpower that other human . He didn’t feel like learning new spells the hard way, so he decided to buy some tomes .

Maybe it was just a coincidence, or perhaps it was because he was in a bad mood, but the first tomes he found that could be useful for him were quite nasty . The first one was self-explanatory . . . Leon could make rain stones over an area . Getting on the head by dozens of stones wasn't something pleasant .

As for the other skills, they were quite nasty too . Leon could summon a barrier around the target, and after two seconds, the barrier would decrease the size and attack everything inside of it . It looked like some torture spells . . .

'I guess I need to work on my mood . . . I just spent ten thousand million coins without a second thought . Still, I can't understand how those spells can be more expensive than the ice meteor . . . is it because their cost is low?'

Time was of the essence, so Leon started to practice those new spells on Ilyana's ghost-swords . Some of them died, but Leon decided to ignore that . After training for a single day, Leon leveled up his new spells up to level fifty . However, at some point, the ghost-swords stopped leaving the castle, and a new monster appeared . Much to his surprise, the new ones were the mechanical spiders he faced before .

‘Your golems probably can scratch those at least for a while,’ Ilyana said directly to Leon’s mind . ‘ Let’s make our monsters fight . Since you can’t create them at the same speed I do, you can absorb the mana of some . They will die once you do that, but they will obtain the experience as if they had fought, so it isn’t a problem . ‘

‘ . . . Alright . ‘ Leon said .

Leon couldn’t help but wonder how Ilyana still could keep herself hidden when he, after a few months, she changed the monsters that she was making spawn in this world . It was probably because the big guns didn’t have time to worry about smaller or the planets that got annihilated by monsters . Regardless, Leon had his own problems to worry about .

Although the mechanical spiders didn’t have enough mana to grant Leon the chance to create an earth golem, two had . That being said, even though they had the advantage at the beginning, his level seventy golems so started to fall against the mechanical spiders . One hour after Ilyana started to summon them, they were already on the same level as them golems . . . and they had to fight for three days to reach that level . Leon had a long way ahead of him . . .

Three days later, Leon's golems reached level one hundred . Meanwhile, the mechanical spiders already surpassed the level two hundred . . . Ilyana's monsters already could decimate Leon's golems in a single strike, so she stopped them from attacking Leon . Although she didn't say to Leon to stop, he did stop killing them by absorbing their mana .

‘I have to level up Alchemy and Farming, so I guess it is time to stop . ‘

‘It is time for your resistance training,’ Ilyana said, using Telepathy .

Leon headed toward her castle without wasting time because he had some questions to ask, not because he was eager for another torture session .

‘It looks like you have some questions,’ Ilyana said when Leon arrived .

‘What is this time?’

‘The human I faced used Anti-Mana Field, and that made things a little bit difficult for me,’ Leon said . ‘How can I counter it?’

‘It is simple, just break his spell,’ Ilyana said . ‘As you know, Anti-Mana Field consumes your mana to stop magic attacks or effects from reaching . Even if you don’t feel it, if you try to use your mana, the enemy will lose his mana to block your attempt to use it . All in all, the best way to try to cancel or break Anti-Mana Field is to have a larger mana pool than your enemy and try to use spells that consume a lot of mana . ‘

The answer was a bit too simple than Leon had imagined . Still, it made sense . That spell was like Mana Armor, after all .

‘ . . . Does a high level in that skill increases how much time the enemy can stop me from using mana?’ Leon asked . ‘It makes the spell more efficient?’

‘Yes, but if you have a high-level spell that uses a lot of mana can counter that effect,’ Ilyana explained . ‘Training the skill can help, but not all that much .’

‘That guy also attacked me, and his magic projectiles ignored my Mana Armor,’ Leon said . ‘How is that possible?’

‘Once you become skilled enough, you will be able to create Anti-Mana Fields even around magic projectiles without making them lose their magic properties,’ Ilyana said . ‘It will take a long time and insistence, but it is possible . Mana can do pretty much anything . The secrets are your imagination and non-stop practice .’

Ilyana was a lot more collaborative and friendly than Leon imagined she would be after the failure of that job . It was weird, but Leon didn't have much time to think about that because since his health increased, the torment became longer as well .

At the end of another training session, Leon suddenly had an epiphany . Blue angel plants were magical plants, so could exist monster plants that could produce it . Leon returned to Ilyana's castle to ask about it .

'They do exist,' Ilyana said . 'I made use of them before, but unlike the blue angel plants, they needed to eat to produce the mana fruit . They have to eat other monsters . The stronger the monster, the more mana its fruit can restore . . . I guess it can become useful for you, but you are not strong enough . I doubt that I can explain to you how to produce an organic monster, and to learn by using a tome, you will need to have ten thousand points in control and thirty thousand in intelligence . '

Leon opened his eyes widely . . . it would take some long years before he can obtain that level of power, after all . Regardless, even though Leon hated to say or even think about such a thing, it looks he was destined to keep working doing menial chores . Although he could increase his speed and quickly replant more blue angel leaves and use the same spells to fabricate the mana

liquid, it wasn't that simple because his speed could easily affect the environment . If he tries to move at his max speed around his plant, he could quickly burn down his plants .

Even if Leon tries to use only Telekinesis now that his control reached an absurd level, things wouldn't just progress as fast as he wants . Although Leon had to level up Farming and Alchemy eventually, he didn't want those skills to slow down his growth or the growth of other spells .

'The only way for you to grow strong as fast as possible is by facing my monsters,' Ilyana gave the answer Leon wanted even though he didn't ask for it or liked the method . 'Although you are strangely adamant in not using that method frequently, it is the best option for both of us . I would say that your strength is around the same level of the species that fought daily, and their planet is about to reach the fifth stage of the assimilation . Even if I make my monsters fight against thousands of other monsters on the same as them, they won't grow strong as the same speed as you . '

Ilyana was strangely very interested in making Leon cooperate with her . Although her arguments were sound, Leon could help but think that she was planning something or that he would be the only one that would receive benefits from that . . . in the end, Leon decided to accept her idea .

Things started to progress much faster once Leon began to face the mechanical spiders Ilyana was creating . Using Mana Absorption alone, he could destroy in less than a second, but since he had to spend the mana obtained, he was taking a few more moments . However, considering that Ilyana could create mechanical spiders once every three seconds . It was more than enough to make Leon stop her whole army of monsters alone .

‘Come to think of it, following the logic of games and some stores . . . Fire, Ice, and Thunder Breath were supposed to be techniques of dragons . ‘

‘Dragons can learn that kind of technique faster, but it doesn’t mean other species can’t replicate the same action,’ Ilyana said via Telepathy .

Leon sighed . Now the number of people monitoring his thoughts increased by one . Although Ilyana wasn’t as troublesome as his spirits, Leon couldn’t relax around her . Regardless, putting such thoughts aside, at least Leon returned to the pace where he could obtain three hundred status points every day . Still, Leon couldn’t help but feel out of place since things were too easy, and he could even create some golems and slimes to help him with the extra mana .

‘Things would be much more convenient if you guys helped me,’

‘Getting stronger by training and facing real opponents is one thing,’ Celsius said . ‘but this isn’t either of that . Unless those mechanical spiders reach level five hundred, it wouldn’t be a real challenge to destroy them . ‘

‘And if we destroy them, you won’t be able to absorb their mana,’ Undine added .

Leon nodded since it made a lot of sense . In the end, the spirits would get stronger faster, and at a fast pace, the mechanical spiders would become even

more boring . Much to Leon's surprise, even the battle-freak Efreet wasn't interested in that . In contrast, Sylph and Gnome were more interested in relaxing if Leon wasn't going to play with them . Volt was the only one who said that he was fine with it . But Leon noticed by the tone of his voice that he also wasn't that happy in getting stronger facing weaker but numerous enemies .

...

'You will kill them, but you will spend some mana and won't be able to drain any,' Ilyana said via Telepathy . '

Although the answer was welcome, once again, Leon couldn't help but feel . . . troubled . Overthinking about every single thing wasn't good, but obtaining the answer to his questions quickly wasn't good either . Regardless, Ilyana and even helped Leon to train his Mana Armor even without saying anything . It was convenient, but weird . . . Leon couldn't even think that Ilyana was strange since she was practically monitoring his thoughts .

‘ . . . I have to focus on the training,’ Leon said after a long sigh .

One week later, Leon finally achieved his current small goal . . . all his skills were on level fifty . Leon started to wonder what he should do . . . learn new spells or level up his current ones ? In the end, he had another idea .

‘Ilyana . . . won't I learn the debuff version of Health Zone and the other spells like that one ?’ Leon asked .

‘The reverse skill of Health Zone can drain the health of enemies around you,’ Ilyana answered . ‘Can you even drain the health and stamina of a single monster ?’

‘ . . . No,’ Leon answered . ‘Why do you ask when you already know the answer ?’

‘You will eventually learn both, but you are not ready yet,’ Ilyana said .

In the end, Leon could only shrug . It looked like to prepare himself for the battle that will take place on Earth . He would have to learn many things . It was clear that Leon was a magician, but he wondered if it was fine in becoming a jack-of-all-trades magician . Status changed his body down to a molecular level, but it looked like that changed didn't apply to elemental

properties or anything similar . That was why Ilyana intended to make Leon learn offensive magic, support magic, and even summoning magic . They had some time until the battle, so it couldn't be helped that she wanted to teach him everything .

Still, Leon couldn't help but wonder . . . wouldn't it be better to have several students instead of a single one ? If Ilyana decides to teach magic to all the people on the Earth, Leon was pretty sure that they would be able to accomplish much more than Leon could do alone .

Just teaching and learning weren't enough . Leon was aware of it . Things like loyalty and battle experience were necessary to create a good soldier . Most likely, Ilyana didn't think that the humans of Earth could become loyal or that they even had enough battle experience . It was also necessary to consider that other harvesters may notice if she decides to make such a big move . . . in the end, Ilyana had to consider many things .

Leon wasn't special, but considering everything, Ilyana knew that he fought plenty of battles against stronger enemies and that he would never betray those who helped him in some way . He was a safe investment . . .

. . .

Things started to progress much faster once Leon began to face the mechanical spiders Ilyana was creating . Using Mana Absorption alone, he could destroy in less than a second, but since he had to spend the mana obtained, he was taking a few more moments . However, considering that Ilyana could create mechanical spiders once every three seconds . It was more than enough to make Leon stop her whole army of monsters alone .

Come to think of it, following the logic of games and some stores . . . Fire, Ice, and Thunder Breath were supposed to be techniques of dragons .

Dragons can learn that kind of technique faster, but it doesnt mean other species cant replicate the same action, Ilyana said via Telepathy .

Since Leon was facing several mechanical at the same time, it was the best moment to level up his Area of Effect spells . So, he decided to buy some of them and use them against Ilyana monsters . He also learned the thunder version of the spell Efreet taught him, even though it wasn't exactly a safe skill to use since he had to touch the enemy and even receive some of the shocks, it was the perfect way to immobilize the careless enemies that may approach .

'More than a few days must have passed on Earth . . . I wonder how everyone is . '

Someone once said that no news is good news, but Leon couldn't help but worry about his friends . It couldn't be helped since Amanda, Maya, and his friends were the sole reason for him to struggle so much and return to Earth after so many years . Regardless, even though Leon had been warned to leave them be, he still wanted to help them a little more .

'Those monsters are weak, and since I can defeat them fast, my concentration is wavering . '

Leon still could improve on the patience department, but it looked like it would take a long time before he becomes a patient person . He was already thirty-five years old, but he still a single day older than twenty . Several life and death situations didn't change that, so only a lot of time would make him feel older and wiser .

‘It won't be fast to level up my skills past level fifty against the mechanical spiders . . . it will take a few months, but I guess my best option is to learn new spells and train them up to that level . ‘

The only problem was that he couldn't stop from destroying the mechanical spiders . So, Leon's only option was to buy more tomes . Leon wanted to learn things the harder way in order to get rid of the demerits that he would have to deal with by using tomes like the cooldown time . . . but it couldn't be helped .

‘You could have obtained those spells by using my tomes,’ Ilyana said via Telepathy . ‘I don’t understand why do you spend coins when you can have them for free .’

‘It is the force of the habit . . .’ Leon said . ‘Do you have those skills at the max level?’

‘Of course,’ Ilyana said .

‘Well . . . I have to feel that I deserved those skills,’ Leon said . ‘That feeling is small even by buying the tomes since I’m used to learning spells the hard way . So, I guess this much is fine . ‘

Despite the demerits, those skills were pretty useful . The damage caused by the thunder that enveloped Leon’s body was amplified by his intelligence, Wind Transformation, Wind Creation, Electromancy, and Thunder Blessing, after all . So, he could destroy the mechanical spiders just by staying nearby them for a few seconds, and the same thing applied to Fire Rush . In that meantime, he could use Mana Absorption . So, it wasn’t all that bad .

‘Focusing on learning new spells in order to have the means to escape all kinds of troublesome situations is good and all,’ Ilyana said . ‘But it is time for you to learn some physical skills as well . Although the effectivity of those skills will decrease given your status, it is necessary nonetheless . ‘

‘I guess you are right . . . ‘ Leon sighed .

Congratulations! You have learned the skill: Ghost Punch .

Cost: 50 stamina

Novel Chapter 476

Chapter 476: 476

‘Do you know how I can learn those myself?’ Leon asked . ‘Waiting for the cooldown time is a pain . ‘

‘No,’ Ilyana said .

‘No . . . what?’ Leon frowned . ‘You don’t know, or you don’t want to teach me?’

‘I don’t know, and I never got interested in learning that,’ Ilyana said . ‘It is fine if you use it just now and then . ‘

‘Heh . . . that is surprising,’ Leon rubbed his chin . ‘I thought you would know everything . ‘

‘Although I’m old, I don’t know everything about every single fighting style,’ Ilyana said . ‘No one can know everything . Not even the harvesters that are much older than me know how to fight using their bodies or magic alone . If you try to become an all-round fighter, you won’t reach the apex of neither . ‘

Leon wasn't interested in that . He just wanted to kick the asses of the bastards who messed with him and wanted to mess with Earth even more . Regardless, Leon decided to follow Ilyana's advice again . . . to some extent . Since he already knew Stamina Manipulation, he was sure that with some training, he would know how to replicate those moves . It wouldn't be his primary goal, but it would be a good hobby . . . he was really in need of one . Soon, after Leon decided that, Ilyana talked to him once again using Telepathy .

'I have a job for you,' Ilyana said . 'This one is much easier, so you don't have to worry about failing again . '

Leon didn't feel any contempt on Ilyana's words, but her choice of words made him imagine her looking at him as if she was showing a very annoying smile full of contempt . Regardless, every change of pace was welcome, so Leon headed toward Ilyana's castle without wasting time .

'A certain dungeon in a certain world us spawning a lot of mutant enemies,' Ilyana said . 'I want you to go there and deal with the problem without letting anyone notice you . '

'Why? ' Leon frowned .

'Because they need to think that the problem solved itself after several mutant monsters appeared,' Ilyana explained . 'It would be troublesome if they see a stranger solving their problems and get used to it . '

'I mean . . . why do you want to help them? ' Leon asked . 'Even if I do that without being noticed, shouldn't they solve the problems themselves in order to grow stronger? '

‘You still didn’t answer my question . . . ‘ Leon said . ‘Why would you help the species of another world without reason?’

‘I have a reason, they can be useful, that is why,’ Ilyana explained . ‘That world is on the second stage of assimilation, and something similar happened when it was on the first stage . They managed to solve the problem by luring the mutant monsters into a death zone . After that, they never let dungeon breaks happen so frequently . ‘

‘If that is the case, how come the dungeon breaks happened again?’ Leon asked . ‘Unless . . . ‘

‘Yes,’ Ilyana nodded . ‘Most likely, someone is causing the dungeon breaks . . . someone that unlike me, thinks that the people of that world will become a problem . ‘

‘A harvester . . . ‘ Leon said .

‘The chances are high, but I can’t say for certain that that is the case,’ Ilyana closed her eyes .

In the end, Leon could only nod even though Ilyana’s behavior was suspicious . Fortunately, he didn’t have to overthink about it since it was a dirty job . The people he was going to help were strangers, but helping strangers wasn’t a bad thing . Besides, he would decrease his debt a little .

‘Before killing the beast, suck all their mana and then take their body to the place I will send you to,’ Ilyana said . ‘Don’t let the body touch the land, or the planet will gain ownership over it . ‘

Those were some strange rules . Most likely, Ilyana would transport the beast's corpses to her planet in order to prevent their mana from behind sucked by that planet . Ilyana probably knew why such a phenomenon happened, but Leon decided not to ask . He liked to keep things simple in his head, after all .

'Are you ready?' Ilyana asked . 'Ah . . . you will need this . '

Ilyana made a tome appear floating above her right hand . As expected, Leon hesitated in receiving that but considering it was a necessity for the job and he had to solve that problem as soon as possible . He had no other choice . . .

Congratulations! You have learned the skill: Invisibility .

Cost: 10 mana per second .

You obtained 01 status points .

Leon frowned when he received that notification . He just learned the spell that most male teenagers wished for at some moment in their youth . Despite the usefulness of that, Leon didn't feel even a little bit excited . . . it was all due to the curse that affected the holy sword .

'You can't use other spells while you keep that active,' Ilyana said . 'So, you should increase your recovery in order to be able to keep that skill active while you investigate that world . '

As expected, Invisibility had some drawbacks . It was troublesome, but since Leon didn't allocate the status points that he obtained in the last few days, it wasn't that annoying .

Do you know how I can learn those myself? Leon asked . Waiting for the cooldown time is a pain .

No, Ilyana said .

No . . . what? Leon frowned . You dont know, or you dont want to teach me?

I dont know, and I never got interested in learning that, Ilyana said . It is fine if you use it just now and then .

Heh . . . that is surprising, Leon rubbed his chin . I thought you would know everything .

Although Im old, I dont know everything about every single fighting style, Ilyana said . No one can know everything . Not even the harvesters that are much older than me know how to fight using their bodies or magic alone . If you try to become an all-round fighter, you wont reach the apex of neither .

Leon wasnt interested in that . He just wanted to kick the asses of the bastards who messed with him and wanted to mess with Earth even more . As expected, Invisibility had some drawbacks . It was troublesome, but since Leon didnt allocate the status points that he obtained in the last few days, it wasnt that annoying .

Novel Chapter 477

Chapter 477: 477

Putting such thoughts aside, Leon looked around to analyze the place he was in . Invisibility was already active, but caution was still more than necessary . Although Leon could see forests in the south and mountains in the north, Leon quickly found a pretty large city in the west . Not only was the place large, but the buildings were quite tall, but at first glance, Leon couldn't see anything but a dull place since everything was gray or brown . Every single building had been built using enriched stones . . . a material as resistant as carbon steel . It was necessary because the dominant species of that world was the Grizzly Giants . Leon didn't know if that was the real name of the species, but it was that Ilyana referred to them .

The city looked dull not only because of the colors but because every building was pretty uniform and straightforward . The grizzly giant couldn't waste their materials worrying about appearance because they were tall and heavy . So, their structures had to be sturdy more than anything .

'It is quite surprising that they became so tall before the mana even appeared on this world . . . '

Leon could see some scouts walking around in search of monsters . The grizzly giants were just like that, four meters tall and covered in a thick grizzly layer of hair in most parts of their bodies . Contrary to Leon's imagination, they didn't look particularly strong . In fantasy games and books, some portrayed giants as nice and calm creatures, but Leon imagined the reverse .

Regardless, that world wasn't much different from Earth . Leon also couldn't feel in the air or its surroundings anything that could explain the size of the

dominant species of that world, but soon he forgot about that . He came to that world to solve a problem, not to study .

‘It is a good thing that Lion’s Pride still increases my status . . . but I guess I can’t run . I’m pretty sure that I’m not good at concealing my presence all that much . Besides, even if I’m invisible, I can still make noise while walking and running . ‘

Considering his recovery, Leon would be able to stay a little more than eight minutes invisible before he recovers his mana . So, he had to be careful . If he messes up and someone starts to look for him, they would have a little less than two minutes to find him .

Fortunately, Leon couldn't see any monster in all directions, not even in the skies . It looked like the dungeon that was causing problems was an irregularity . Still, despite that, Leon found more and more scouts the more he walked through the east .

‘The people here are already suspecting that someone caused the dungeon breaks, that explains why there are no monsters around, but too many scouts can be found . ‘

Although there were no signs of destruction, Leon found many places where scouts weren't investigating . Thanks to that, he found several places to rest and recover his mana while he walked toward the east . Fortunately, after just three hours of walking, Leon found the dungeon mentioned by Ilyana, and he also found hundreds of giant grizzly soldiers around it .

Leon found several buildings, and most of them looked like facilities that were being used to treat the wounded soldiers . That became evident when Leon saw the creature they were facing .

Leon felt shivers while looking at that thing . Much to his surprise, the monster was a variation of the devourers, but that species had more or less a humanoid body . It was still long and large, but it also had legs and arms . . . it was one the creepiest things Leon had seen so far since it had arms, legs, but no real head .

Putting such thoughts aside, Leon looked around to analyze the place he was in . Invisibility was already active, but caution was still more than necessary . Although Leon could see forests in the south and mountains in the north, Leon quickly found a pretty large city in the west . Not only was the place large, but the buildings were quite tall, but at first glance, Leon couldnt see anything but a dull place since everything was gray or brown . Every single building had been built using enriched stones . . . a material as resistant as carbon steel . It was necessary because the dominant species of that world was the Grizzly Giants . Leon didnt know if that was the real name of the species, but it was that Ilyana referred to them .

The city looked dull not only because of the colors but because every building was pretty uniform and straightforward . The grizzly giant couldn't waste their materials worrying about appearance because they were tall and heavy . So, their structures had to be sturdy more than anything .

It is quite surprising that they became so tall before the mana even appeared on this world . . .

Leon could see some scouts walking around in search of monsters . The grizzly giants were just like that, four meters tall and covered in a thick grizzly layer of hair in most parts of their bodies . Contrary to Leon's imagination, they didn't look particularly strong . In fantasy games and books, some portrayed giants as nice and calm creatures, but Leon imagined the reverse .

Regardless, that world wasn't much different from Earth . Leon also couldn't feel in the air or its surroundings anything that could explain the size of the dominant species of that world, but soon he forgot about that . He came to that world to solve a problem, not to study .

Novel Chapter 478

Chapter 478: 478

‘It has a lot of health, mana, and stamina, considering that it is only a mutant monster of a world that is in the second stage of assimilation,’ Celsius said .

Leon nodded, it wasn’t weird that the creature was causing problems and hundreds of grizzly giants had to face the thing at the same time . He arrived on time to see a battalion of them shooting steel arrows toward the beast, but the projectiles only caused scratches .

‘Their bows are big like their wielders . . . the power should be greater than any normal bow . Still . . . ‘

Although the grizzly giants were tall, they liked light armor . In fact, Leon couldn’t see a single one among those hundreds of warriors wearing heavy armor . Their weapons were bows and lances . Weapons that had a big range and could keep them away from the monsters . They were a race that survived the assimilation for decades, but it looked like their nature didn’t change . Either they didn’t like to fight, or they always focused on winning the battles without suffering any wound .

Even though they were equipped with magic weapons, only a few hits were necessary for the mutant devourer to break those . Those creatures were powerful, but not powerful enough to do that . Leon noticed that when those things got too close, the magic weapons little by little lost their glow .

‘Oh boy . . . their presences alone suck the mana of everything around . I want to learn that . ‘

‘That is a skill the monster evolved at random when it suffered the mutation,’
Undine explained . ‘Even though the other mutant devourers probably have
that same skill, I doubt that you can replicate or even understand as of now .
‘

‘Thanks for the vote of confidence . . . ‘

Despite saying that, Leon knew that it was true . If he could learn such a
technique, Ilyana would have taught him since mana could increase Leon’s
training speed exponentially .

Leon frowned when he received those notifications again, but soon understood why it appeared . While Leon was talking with the spirits, the grizzly giants finished off the mutant devourer, and some of them looked around in search of something . It was quite an interesting way to level up skills . Leon wasn't spending more mana than usual, after all .

'The problem is . . . how the heck will I manage to stop the monsters from appearing and then leave carrying all the corpses?'

'The grizzly giants will probably enter the dungeon to investigate the very moment the mutants stop coming . . . I can't help them directly and let them see me . So, if that happens, they will probably die since the monsters have the advantage in a confined space . '

It would be a pity, but Leon didn't come to save some lives . He had come to that world in order to make things a bit more convenient for Ilyana in the future . Regardless, Leon had to wait for several hours until things got dark and quiet . During the day, the number of attacks by the mutant devourers was intense . At least one every ten minutes was bound to appear . Thanks to that, Leon saw several grizzly giants being knocked down unconscious . They

weren't that physically strong, either . . . Leon saw some of the warriors' arms being broken like twigs .

'It doesn't make any sense . . . but it looks like they even disturb the mana inside of living beings' body and make them frailer . '

Leon wondered if things would be fine with him, but considering that Ilyana said that he had to drain their mana, it wouldn't be that difficult . It was a mutant version of a monster in a world that was on the third stage of assimilation, but Leon would be fine as long as he is careful .

At night, some warriors watched the entrance of the dungeon, but since the mutant devourers didn't appear that frequently, they relaxed a little, and Leon obtained his chance to enter the place . Using Transfer, he appeared inside of the dungeon and behind the guards . They had good instincts and felt the presence of something behind them . But when they turned around, they found nothing . The giant grizzly guards waited for a monster to appear for a while, but after a few minutes, they relaxed and just shrugged while looking at each other .

Leon sighed in relief when he activated Mana Dominion and confirmed that no one was following him . However, he couldn't help but worry when he didn't feel any signs of monsters in the range of his skill .

'That is weird . . . I already don't understand how this place can spawn only mutant monsters, but I can't understand why it spawns so frequently during the day and almost nothing at night . '

Leon didn't know anything about monsters' biology . He doubted that even if such a thing exists could be applied to a mutant species . But it looked like the

mutant devourers were a species that only could function well during the day . Leon found the purple crystal, but there was nothing weird in any place .

‘Now what ?‘

It has a lot of health, mana, and stamina, considering that it is only a mutant monster of a world that is in the second stage of assimilation, Celsius said .
