

## Valiant Life 1021

### Chapter 1021: My fan is crying for help

Niu Da Ming returned into the town. His heart was in a mess. If he said he wasn't afraid, he would've been lying. Looking at the situation at the road entrance, it seemed that no one would be able to escape.

"Mayor, what's going on there? Why do they want to seal off our road?" one of the townsfolk asked. Although he was still on IV drip, they were all very concerned about this.

In their hearts, they thought that there must've been a problem.

Niu Da Ming had wanted to find an excuse to blurt out but thinking about it, he felt that it wasn't right. He couldn't hide the truth. As the Mayor, he had to tell the truth to the townsfolk.

In the end, after pondering for a while, he spoke.

"There has been an influenza spreading in our town that those outside don't even know about. Right now, the professionals outside are finding a solution to this. Meanwhile, our town must be temporarily sealed off. We aren't allowed to leave," said Niu Da Ming.

At that moment, one of the townsfolk yelled, "How can they not let us out? I want to go out. What rights do they have to stop me?"

"Yeah! We're just sick. We won't infect others."

Niu Da Ming gestured with his hands for everyone to calm down. "Everyone, quieten down. What's the point of all this noise? This influenza is contagious. We cannot spread it to the outside. Trust me. The professionals are working hard right now. We just have to do what we usually do and don't think too much."

"Mayor, this can't happen," someone complained. Their hearts were fearful.

“Even if it can’t, this is how it is. What’s the matter with all of you? Don’t you understand the situation? If you go out as you like, you will spread it to others. Right now, the government’s specialists are helping us to resolve this. What more do you want? Go back, all of you. You’re making a ruckus,” Niu Da Ming said angrily.

When the townsfolk saw that the Mayor was angry, they withdrew. Some of them obediently returned to the clinic to continue the IV drip while some of them went home.

After everyone had dispersed, Niu Da Ming sighed in his heart. He was still fine for now but he couldn’t go out either, because no one could guarantee that he was really fine.

The specialist team.

In the research lab, everyone was researching. They all took this unfamiliar virus very seriously. But until now, they hadn’t found a single lead.

Fortunately, this situation had been discovered early. In the city’s hospital, when that patient had come for treatment, they had thought that it was a common cold. But after they did a blood test, they found out that something wasn’t right. Hence, they quickly quarantined him.

After they asked about where he had been, they discovered that the virus came from Huang Yun Town. Hence, they immediately passed down the information and went to Huang Yun Town to check out the situation. With one look, they were stunned. Almost half of the whole town had been infected.

This rate of infection was very high, so they immediately gave the orders to quarantine the town.

Also, they did a mass inspection to see if anyone had come out from Huang Yun Town recently. Fortunately, besides that one patient, no one had come out of Huang Yun Town.

This was a fortunate thing within the misfortune. If there had been a large flow of people, they wouldn’t be able to contain the situation.

However, what was giving the specialist team a headache now was that two days had passed without them finding a single lead. Although they had been able to gradually explain the illness, they hadn’t made any progress in curing it.

Another three days passed.

Cloud Street!

Lin Fan finished making the scallion pancakes and was about to go out to continue finding people suitable for the task. Suddenly, his phone rang.

It was an unknown number and it was even a foreign number. He was a little suspicious but he still answered the call.

“Hello, may I know who it is?” Lin Fan asked.

“Is this Master Lin? That voice on the other end of the call was rather hoarse. The person sounded as if he had no energy at all.

“I am. And you are...?” Lin Fan was a little suspicious as he wondered who this person was. Could it be that it was a prank? But he wanted to see just what this person wanted.

“I’m the Mayor of Huang Yun Town, Niu Da Ming.” The voice from the other end seemed to break off for a moment before continuing.

When Lin Fan heard that, his mind was filled with question marks. He didn’t remember knowing any mayors. Moreover, he hadn’t even heard of this Huang Yun Town before.

Could it be that it was really a prank?

“Oh. Mayor Niu, what is it?” Lin Fan asked. He wanted to see what this Mayor wanted.

Niu Da Ming said, “Master Lin, can you save my townspeople? Our town has been infected by an influenza. Now, most of us have been infected. Our specialists haven’t been able to cure it. I’m a fan of yours and I know your medical abilities are great. I want to ask if you could help our townspeople.”

\*Beep beep!\*

Suddenly, there was no more sound from the other end and the beeping sound came. When Lin Fan redialed that number, that line couldn't be reached because it was out of credit.

Lin Fan thought for a moment and was prepared to top up credits for the opposition. But suddenly, he hesitated before calling someone from the Health Department.

The last time, he had had a conflict with the Health Department's leader. Although they didn't have a good relationship, he didn't care so much right now. Regardless of their relationship, he had to give them a call.

"Hello, I'm Lin Fan. is there really an influenza in Huang Yun Town?" Lin Fan asked right off the bat.

The leader on the other end of the call hadn't expected Master Lin to call and he was momentarily stunned. Then, he cleared his throat and said, "Master Lin, this is a matter within our department. We can't reveal that to you. I'm sorry."

"Don't play around with me. I'm asking you if there is an influenza in Huang Yun Town. If you continue to act like this, believe me, I'll start to go against you guys," Lin Fan immediately scolded him.

The person on the other end was silent for a while. He really hated this Master Lin. However, he had no choice. Master Lin was f\*cking awesome. He couldn't do anything to Master Lin.

"Yes. There is an influenza in Huang Yun Town."

Lin Fan said, "That's not so hard, is it? Why did you have to try and hide it? I'm hanging up."

\*Beep beep!\*

When the person on the other end heard this, he was so furious that he had no words. The last time, he had ended up tragically thanks to Master Lin. Now, he had been scolded by Master Lin. He had really had enough.

Then, Lin Fan didn't think more before charging that number with \$100 of credit using WeChat before calling it again.

But this time, no one answered. Lin Fan was a little helpless.

Then, he checked out the news on the Internet. This news was from a few days ago. Currently, there hadn't been any updates yet. It seemed that even the news had been sealed off. They appeared not to want to cause panic.

That was understandable.

Thereafter, Lin Fan gave Zhao Ming Qing a call.

"Ming Qing, do you know about the situation in Huang Yun Town?" Lin Fan asked.

Zhao Ming Qing was taken aback. "I don't know. What is it, Teacher?"

"Oh, it seems that there's an influenza spreading there. My fan gave me a call and I'm going to go to take a look. Pack up and come with me," said Lin Fan.

When Zhao Ming Qing heard that, he immediately started taking it seriously. "Okay."

## Chapter 1022: Making their hearts jittery

After seeing that Brother Lin had received a call, Wu You Lan's expression became serious. She couldn't help but ask curiously, "What's going on, Brother Lin?"

"Didn't Fraud Tian talk about that influenza in Huang Yun Town the other time? One of my fans, a mayor, gave me a call, asking me to save his townspeople. I want to go and take a look right now," said Lin Fan.

When Wu You Lan heard that, she became a little worried. “Brother, if it’s an influenza, isn’t it fine to just leave it to the professionals? Will it be dangerous if you go?”

Lin Fan waved his hand. “Don’t worry. There will be no danger. If this sickness can put me in danger, I guarantee that no one will be able to treat it.”

He wasn’t even exaggerating. With his Wuxia class of knowledge as well as the medicinal pill knowledge, if that influenza could still cause trouble for him, it would be a really valiant influenza. If that were the case, perhaps even a real god would be in danger.

“Enough talk. I’m going now. You guys watch over the shop. Help me to tell the townsfolk who come to buy scallion pancakes tomorrow that I’ll be busy for the next few days,” said Lin Fan.

Fraud Tian sighed. “Go on. I know you’re going to save people so you’re not selling scallion pancakes. Let me take the blame then.”

Zhao Ming Qing was at home, packing up his things. Notebooks, acupuncture needles, as well as some clothes.

“Old man, where are you going?” Lady Zhao saw the old man packing his things and wondered what he was going to do. It had been so rare to see him resting at home today but then, he was leaving again.

“I’m going with Teacher to treat the sick. I’ll be back in a few days,” said Zhao Ming Qing.

“Where is it?” Lady Zhao did not worry but she still wanted to be clear about it.

Zhao Ming Qing had wanted to tell her but then, he thought that if he told his partner about the influenza, she would be scared stiff. He smiled and said, “I’m going to treat a group of important people. Alright, don’t ask too much. And don’t tell the kids. I’ll be back in a few days.”

“Get as much rest as you can. Don’t tire yourself out too much.”

“Got it.” Zhao Ming Qing finished packing up his things and left through the door. Outside, his teacher’s car was waiting for him. He then entered the car.

In the car.

Lin Fan switched on his phone navigation and did a search. It was quite far and it would be quite a long drive.

“Teacher, do we know what influenza it is now?” asked Zhao Ming Qing.

“Nope. It seems that this influenza is rather severe. The good thing is that it has been controlled and it hasn’t spread to the outside. But a few days have already passed. If we don’t cure it, it will become complicated. We’ll only know the full situation when we get there,” said Lin Fan.

Zhao Ming Qing couldn’t help but become solemn. Typically, when an influenza was discovered, the government would immediately gather professionals to find a cure. Now, a few days had passed and the cure hadn’t been found. It seemed that it wasn’t an average influenza.

But with his teacher, he had a lot of faith. He believed that it would definitely not be a problem with his teacher’s medical ability.

But what made him confused was why the professional team hadn’t looked for his teacher despite the situation being so complicated. Then, thinking about his teacher’s relationship with those people, it became apparent to him. It seemed that they just didn’t want to have anything to do with his teacher.

Although some hospital doctors treated his teacher as an idol, professionals believed more in scientific analysis than in Chinese medicine.

Even though his teacher was a Nobel Prize winner, those people still had conflicting thoughts deep in their hearts.

In the big research lab.

A group of professionals had been researching for very long. Although they had already found out many things from their analyses, they hadn’t found a good treatment solution.

“Sigh. What are we going to do? If this drags on, lives will be lost.”

Although this kind of sickness wouldn't cause death so quickly, the sufferers' conditions were getting worse by the day. The virus was slowly destroying the systems in their bodies.

At that moment, a middle-aged woman spoke, “If we let Master Lin come and analyze this, we'd have a very good chance of conquering the influenza.”

“Hush. Don't talk about Master Lin. The people in charge don't like that Master Lin.”

When the middle-aged woman heard that, she frowned as she lowered her voice. “That's their problem. In such a severe situation, we can't use other people's lives as a gamble.”

“They've been researching for days and nights too and they want to rely on themselves to conquer this influenza. Let me tell you a secret. I've already discussed with a group of people. If the research isn't successful, we'll immediately report to the higher-ups and request Master Lin to join the research group.”

“Right now, the conditions in the sufferers' bodies are still considered stable. They haven't reached the point of no return yet. We still have a chance.”

The male professional spoke softly. Then, he continued immersing himself in the research.

The middle-aged woman didn't say more. She just sighed and continued researching as well. They were all professionals. They had studied countless illnesses before and they were quite capable.

And they knew that most of the people here wanted to prove one thing. And that was that they wouldn't lose to Master Lin.

Huang Yun Town.

Ma Jia Jun was a broadcaster from the county. At that moment, he was hiding behind a tree, holding his phone, and pointing the camera at the town entrance. He spoke softly.

“Brothers, do you see that? Huang Yun Town has already been sealed off. I heard that there’s an influenza spreading inside and they’ve been quarantined. No one is allowed to enter or leave.”

The netizens in the broadcast room were stunned upon hearing this.

“D\*mn! Is that for real? Why haven’t I seen any news reports about this?”

“Huang Yun Town. I remember it now. A few days ago, I saw a piece of news that talked about a problem here. But afterward, there were no more updates. I thought that it wasn’t a problem anymore but I never thought that it would be this serious.”

“Host, you’re pretty awesome. Aren’t you afraid of death? Aren’t you afraid of being infected?”

Ma Jia Jun held the phone as he cautiously went closer to the town. “Wait a moment, I’m going closer to look at the whole situation. But I have to hide my phone. If they see it, it will definitely be confiscated.”

“666... the host is asking for a disaster.”

“Go closer. I want to see what’s the situation.”

“D\*mn. It looks like what the host said isn’t far from the truth. But this place is way too desolate. It looks so poor that it’s scary. I haven’t seen a thatched cottage in a long time.”

When Ma Jia Jun walked over, the workers over there immediately chased him away. “Youngster, this place is out of bounds. Go home quickly.”

“Big Bro, what’s happening to Huang Yun Town? Is there a problem?” asked Ma Jia Jun. He wanted to start a conversation and find out what exactly was going on. Was it the same as he thought?

The worker said, “There’s no problem. Hurry up and leave. Don’t loiter around.”

Ma Jia Jun wanted to ask more but after a long time, he still hadn't managed to find out anything from the worker. He was a little unyielding but he had no choice. He could only walk off into the distance. Then, he faced the camera and spoke.

"I can guarantee that there's definitely something wrong."

The next day!

A piece of news was released. At that moment, all the netizens who saw the news were shocked.

Another f\*cking influenza has appeared?

Although it hadn't happened close to them, it made their hearts jittery

Chapter 1023: The disaster-courting broadcaster

On the Internet. When this piece of news came out, everyone was shocked.

"D\*mn! Is this for real? I was just enjoying my day. When did such a big thing happen?"

"According to the news, a broadcaster revealed it. The influenza started from a small town."

"I saw it. The scene has been sealed off and no one is allowed to enter or leave. It seems rather severe."

"Did you guys see the trending news on WeChat?"

"What news?"

"Go and see for yourself. It's already being spread on WeChat."

Many netizens were curious upon seeing these comments. They had no idea what kind of news was spreading on WeChat. Wasn't it just an influenza spreading in some small town?

Wasn't that something that everyone already knew? Could it be that there was something that they did not know?

Many people opened WeChat and suddenly realized a terrifying thing. How long had this news been out?

The earliest it could have been released was that morning. However, they hadn't expected someone to say on WeChat how horrifying this influenza was and the only way they could guard against it was by eating honeysuckle.

It was a very simple video. It described the terrors of this influenza. The news revealed that, although the small town had been sealed off, someone from the town had already appeared in another city. Later on, it was the person in the other city who had been discovered, which led to this influenza's terror being exposed. The various images made the viewers' hearts feel all jittery. At the end, the video emphasized the effectiveness of several Chinese medications, including the godly medicinal herb, blue mountain root, which everyone knew about.

In a short time, the Internet had gone mad.

"Another new influenza has appeared. Now, the only way we can guard against it is by drinking these medications. I have to buy some for my family to drink."

"I'm still at work. Once I saw this piece of news, I immediately told my family to go and buy some from the pharmacy."

"Scary. I'm on a train now. The person next to me keeps coughing. It can't be this influenza, can it? I have to move further away."

Ma Jia Jun was just a small broadcaster. When he woke up, he went to see the news. Upon seeing this earth-shattering news, he was dumbfounded. He hadn't expected his own broadcast from yesterday to have been leaked out by others.

Moreover, his broadcast room was being publicly announced.

“I’ve become famous?”

The first thing he thought about was not the impact of what he had filmed, instead, he saw that his broadcast room had been published in the news article and he thought about the amount of traffic it would bring to his broadcast room.

He was exhilarated.

He immediately opened his broadcast room. When he saw the number of people waiting inside, he was astounded.

180,000. Before he even started the live broadcast, there were already 180,000 people waiting in his broadcast room. There were even many people chatting on the channel.

“When will the host come? I want to see what’s going on in the small town.”

“Me too. I’m getting really impatient.”

“Host, when the f\*ck are you going to appear? If you start the broadcast now, I’ll immediately send you an airplane.”

The comments kept coming. Ma Jia Jun felt his breathing start to quicken.

I’m famous.

I’m really famous.

In the past, he had always broadcasted because he had wanted to be famous. But because the contents of his broadcast had been too boring, not many people watched at all. For there to be so many people watching now, it was like a dream come true.

Without hesitation, he started broadcasting.

The netizens who had been chatting in the comments realized that the host had gone online and they were thrilled.

“D\*mn, the host is online.”

“I’m a man of my word. Here’s an airplane.”

“Sending gifts over.”

Ma Jia Jun resisted the emotions in his heart. “I’m here, my brothers. Thank you, boss, for the airplane. Thank you.”

“Enough rubbish, host. Hurry up and bring us to Huang Yun Town to take a look.”

“That’s right. As long as you bring us to see Huang Yun Town, we’ll send you plenty of gifts.”

Ma Jia Jun wasn’t an idiot. Naturally, he knew why he had gained his current popularity. These people weren’t here to see him, they were here to see Huang Yun Town. If he didn’t give them what they wanted, they might just disperse all at once.

“Alright, I’ll go right now.”

Without any hesitation, he dressed up and rode his electric bike towards Huang Yun Town. It wasn’t too far but it still required half an hour.

He lived in the county. To get to Huang Yun Town, he had to take a small road.

On the expressway.

Lin Fan was cursing in his heart. His car tire had burst. And it had burst all of a sudden.

“Teacher, what do we do now?” Zhao Ming Qing hadn’t expected this either. But they had already been in the car for a day. He felt that his teacher had to be tired. He wanted to let his teacher have a good rest.

But his teacher looked very relaxed. This left him a little speechless.

Lin Fan looked at him and said, “Ming Qing, you’ll be in the car, controlling the steering wheel. I’ll push from behind. There’s a service center up in front. We’ll go there to fix the car.”

“Teacher, you can push this?” Zhao Ming Qing was startled, so he asked.

“It’s fine. Just hurry up and go. Don’t speak so much rubbish,” said Lin Fan impatiently. If he couldn’t even push this car, he would have wasted all his efforts. If he hadn’t been worried about his disciple or about the impact it would cause, he would have lifted the whole car up and ran. He wouldn’t go through all the trouble of slowly pushing the car.

Zhao Ming Qing didn’t ask more. He went into the car obediently and grasped the steering wheel. “Teacher, I’m ready.

Lin Fan pushed from the back. He didn’t dare to go too fast. He just went at an appropriate speed.

Zhao Ming Qing, who was sitting in the car, was astonished. Teacher’s strength is too great!

But he felt that they had been rather unlucky this time, for the car tire to have burst. Luckily, his teacher was amazing enough to move the car using brute strength. Otherwise, they would’ve stopped in the middle of the road. It would’ve been embarrassing and, not to mention, dangerous.

Huang Yun Town!

Ma Jia Jun sneakily aimed his camera at the town. “See? This is Huang Yun Town. Now, even the front has been sealed off and I can’t go near.”

When the netizens in the broadcast room saw this, they were stunned.

“D\*mn. It has really been sealed tight.”

“Host, go a little closer. I’ll give you a reward. Right now, we can’t even see anything.”

In the broadcast room, some people started directing him.

Under the temptation of the rewards, Ma Jia Jun didn’t hesitate for long. He decided to risk it all for the gifts.

At that moment, at the entrance of Huang Yun Town, a large group of sanitation workers was sterilizing the area. At the same time, there were people in protective uniforms walking towards the town. No matter what, they had to get the situation under control.

And the situation was almost under control now. At least everything was good. With everyone’s combined efforts, the order had been maintained.

However, the Mayor of Huang Yun Town had also fallen sick unexpectedly.

To those people who were sealing off the place, they felt that Huang Yun Town’s Mayor was a pretty good person. It was a shame that he hadn’t been able to resist the virus.

Also, their moods were grave. This influenza was quite powerful and it was very infectious. It was not to be looked down upon.

Chapter 1024: The situation is gradually brewing

The news updates kept appearing occasionally on the Internet. Many people saw business opportunities in this influenza.

But these business opportunities still required some hype to be generated. Otherwise, they wouldn’t be completely effective.

Many small groups were discreetly discussing it.

“Everyone, go and hype this matter up. We have to exaggerate the importance of these medications.”

“Wait, how long will this influenza last? If it is only a short period of time, it would be pointless.”

“Don’t worry, I’ve already inquired. This influenza is quite problematic. A group of professionals has been researching for days straight but they still haven’t found a single lead.”

“Then will Master Lin make a move?”

“Do you think he’s a god? Do you think he knows everything? This influenza is the newest virus. He’s a Chinese doctor. He doesn’t even know the theory behind this. If he wants to conquer it, he has to think he’s a god.”

“That’s true. He was able to conquer leukemia only thanks to the countless findings from his predecessors. Enough talk. I’ll go and hype it up right now. We’ll bump up the price and earn some money.”

“I’m in a broadcast room right now. This small broadcaster is daring enough to give us a look at the situation at Huang Yun Town. Split the cost with me. I’m going to send a big gift to the broadcaster and tell him to sneak into the town so we can get a clear look inside the town.”

“Alright. I’ve sent a red packet to you.”

At that moment, many business people seized the opportunity and were preparing to hype it up. No matter what, they had to earn a big sum of money.

Huang Yun Town.

“Host, if you can infiltrate Huang Yun Town, I’ll send you \$10,000 without saying another word.”

Ma Jia Jun was broadcasting. When he saw these words, he was utterly stunned. But he still felt a little scared.

“I’m not going, it’s too dangerous. Everyone inside is infected. What will I do if I go in and I get infected?”

The netizens in the broadcast room wanted to see what was going on inside as well. They started typing in the comments section.

“Host, you have no guts. You don’t even dare to go in there.”

“Yeah, this is too disappointing. I wanted to follow him at first but looking at this, it’s better to unfollow him.”

“Unfollow. Unfollow.”

Ma Jia Jun panicked. It had been so hard to gain some popularity. If he were to lose it all at once, it would be a big loss. But thinking about the situation in Huang Yun Town, he was very afraid too.

“Broadcaster, \$20,000. And don’t worry, I understand this influenza. You won’t get infected all of a sudden. Just don’t talk to anyone.”

Those \$20,000 made Ma Jia Jun’s heart shift. In this small county, \$20,000 was half a year’s worth of salary.

He was contemplating it. This person was right. As long as he didn’t talk to anyone, he wouldn’t be in danger of being infected. This was something that he knew too.

“Alright. Give me the money first and I’ll go in. I know a small path that leads to Huang Yun Town. This path is definitely unknown by those people who are sealing off the town.” Ma Jia Jun was prepared to sneak in.

“Alright, give me your WeChat ID. I’ll send you a red packet.”

After everything was done and Ma Jia Jun had gotten his money, he went towards the hidden path without hesitation. After passing the heavy obstructions, he immediately ran in while no one was watching. Then, he panned the camera around the surroundings.

“I’m in. Take a look for yourselves,” said Ma Jia Jun softly. When he saw someone pass by, he hid far away.

The netizens in the broadcast room saw the situation and were momentarily stunned.

They realized that the condition of the people wasn’t good. A lot of them looked very sick and all of them were wearing masks. They were completely lifeless and they seemed very gloomy.

Ma Jia Jun furrowed his brows. A piercing smell had entered his nose.

At that moment, the townspeople spotted Ma Jia Jun and all of them were curious. Then, they regained their senses and cried out in shock, “Does anyone know this guy? Where did he come from?”

“I don’t know. Could it be that he sneaked in here? If he sneaks out, won’t he carry the influenza out with him?”

“Hurry up and catch him. Don’t let him run.”

Ma Jia Jun hadn’t realized it at first but when he suddenly heard these voices, he was so frightened that he almost jumped. Seeing these townspeople running towards him, his soul left his body.”

“Hey, what are you all doing? Don’t come near me!”

A few of the townspeople immediately grabbed onto Ma Jia Jun. Ma Jia Jun struggled as he fell to the ground. “What are you all doing? Let go of me. I’ll stop broadcasting. Let go of me!”

Initially, these townspeople had thought of running. But after the Mayor’s explanation, they understood that they couldn’t run. Otherwise, the influenza would be spread to the outside.

Moreover, they believed that the government wouldn’t just ignore them. Hence, they had decided to live their daily lives as usual for now.

In the midst of the struggle, the townspeople kept scolding Ma Jia Jun and their saliva flew from their mouths as they did so. The saliva landed on Ma Jia Jun's face and he felt it. He was completely dumbfounded.

"I've been infected." Ma Jia Jun had a look of despair on his face. And the broadcast ended there.

The netizens in the broadcast room started commenting.

"It's over. The host has fallen."

"I have nothing to say. The host has been captured. This infiltration game has ended."

"For \$20,000, he completely gave himself up. This is truly tragic."

Everyone hadn't expected things to turn out like this. Besides a bit of sympathy for the host, they felt nothing else. Then, they went on to watch other broadcasts. To them, this was just entertainment.

Meanwhile, some of the business people who wanted to hype things up were very satisfied. This had been very rewarding. If they spread this video, they would be able to make the public fearful.

Ma Jia Jun had been caught. The townspeople hurriedly did even more checks to ensure that there were no loopholes where people could sneak in. Meanwhile, Ma Jia Jun could only stay inside. He had not only entered but also had close contact with the townspeople. Unless the professionals were to find the cure, he would not be able to leave anymore.

On the Internet.

Videos started appearing one after another.

'The situation in Huang Yun Town now is very dangerous. The masses should prepare themselves.'

This title drew the attention of many netizens. But when they saw the video, all of them were astounded. The only thought they had was to quickly buy medicine in precaution.

In the research lab.

The specialist team was working hard to solve the problem but they did not have a single lead. This made them all a little anxious.

But at this point, there was no use in being anxious. They could only try their best.

Meanwhile, the relevant departments started taking notice of the sudden appearance of news on the Internet. After all, this sudden revealing of the situation could easily cause panic. Hence, they had to stop the panic as quickly as they could.

But no matter how they tried to explain things, the seeds of panic had already been planted in the citizens' hearts and they were gradually starting to grow.

Chapter 1025: I'll just go in alone

Time passed until it was afternoon.

"Teacher, we're reaching soon." Zhao Ming Qing had been looking at the map the whole time. When he saw that there were just a few kilometers left, he started to get nervous.

"What is it? Are you still a little nervous?" Lin Fan said with a laugh. It was an influenza after all. If they don't manage to cure it, they would get infected as well. Hence, whenever a big influenza appeared in a place, the first line of medical personnel to charge in were all very brave.

After all, just because one was a doctor didn't mean that he or she wouldn't get infected.

"A little bit. But it's fine," replied Zhao Ming Qing.

Even after studying Chinese medicine for so many years, he had never come across such an experience. After all, it was Chinese medicine. Whenever a major problem popped up, he definitely wouldn't be the one to research it.

Lin Fan patted Zhao Ming Qing's shoulder. "Relax. With me around, it will be fine. This influenza is actually nothing much."

This wasn't just bragging. He really believed that. After all, with his current abilities, if he had to panic over a small thing like an influenza, he would just find a hole to bury himself.

Leukemia was difficult to cure. People had researched it for decades but still couldn't completely conquer it. On the other hand, influenzas would only catch people unprepared. In the end, after a period of time, people were sure to be able to resolve it.

Hence, the only difficult part about the influenza was that it was foreign.

If anyone else had said that, Zhao Ming Qing wouldn't believe it. But these words had come from his teacher's mouth. Hence, he had unwavering faith in those words.

Very soon, they reached the scene.

Li Chong was the Commander of this quarantine operation. When he saw a car slowly approaching from the distance, he quickly stuck out his arm and gestured for them to turn back.

But when he realized that they wouldn't leave, he frowned. What are they trying to do?

Could they be reporters?

But that shouldn't be the case. Which reporter would dare to come here now? Is getting the news more important than their lives?

When Li Chong saw an old man come out of the car, he was confused. He had no idea what this old man wanted. "Mister, you can't go in here. Please go back."

Zhao Ming Qing said, "I'm a Chinese doctor. My teacher and I are here to look at the situation of the influenza."

When Li Chong heard that, he was immediately touched. At the same time, he really admired them.

After all, everyone was quick to avoid this influenza. Now that such an old man had come with his medicine box to see the sick, he couldn't help but be touched and shocked.

But the current situation wasn't one that could be resolved with Chinese medicine.

"Mister, you have a goodwill but the government has already formed a specialist team that is tackling the influenza now. So there's no need for this. Go back," said Li Chong.

Zhao Ming Qing waved his hand. "No. My teacher and I came from far away just to resolve this. How can we go back?"

Li Chong was taken aback. He hadn't expected this old man to have come with his teacher. It seemed that it would be another old man. This situation put him in a tough spot.

Then, Lin Fan came out from the car and walked towards Li Chong. "Hello, I'm Lin Fan. We came from Shanghai to look at the situation here."

Li Zhong was about to open his mouth but when he saw the opposite party's face, he was startled and speechless. After a long silence, he finally regained his senses.

"Are you Master Lin?" Li Chong had heard of Master Lin before but he had never been like those fans who chased their idols crazily. However, when something like this happened, his heart was filled with anxiety. After all, he hadn't received any updates in a long time and he had no idea when this influenza would be conquered.

Then, he started to think. Can the Master Lin who cured leukemia also cure this influenza?

"Mmm, I am." Lin Fan smiled. In his heart, he was mumbling to himself. Looks like I'm quite famous. Even in this kind of small place, there's someone who knows me.

Actually, if he had only received the Nobel Prize or cured leukemia, no one would know who he was.

The main thing was that he was in the headlines every day. Anyone using their phones who paid even a bit of attention to the news would have seen him.

For example, the important leaders of the country might not even be known by those who didn't pay attention to the news. If you asked those forty or fifty-year-old men and women if they knew some of the celebrities on the Internet, they would be dumbfounded.

They would have no idea who they were.

But for Lin Fan to be known by the masses, it was because he had done many major things. Li Chong had noticed this and that was why he had recognized Lin Fan with one look.

"Master Lin, why did you come here?" Li Chong was forty-something and close to fifty but he was still young at heart. He liked to follow the news on the Internet. However, he knew that the government hadn't asked Master Lin for help.

"Huang Yun Town's Mayor says that he's my fan. He told me about the situation here. Since I saw that my fan was in trouble, how could I just sit still in Shanghai? That's why I immediately drove here," explained Lin Fan.

"Huh?" Li Chong was stunned. Then, he thought for a moment before saying, "Master Lin, Shanghai is close to 2 kilometers away from here. You just drove here?"

Lin Fan waved his hand. "Let's not talk about all this for now. What's the situation in Huang Yun Town."

When he heard Master Lin ask about this, Li Chong's expression turned serious. "There are 10058 people in Huang Yun Town. There are now more than 3000 people infected. The remaining have mild influenza symptoms. This infection rate is very high but luckily, the Mayor has calmed the townspeople. Also, the townspeople are willing to cooperate with us. They've stayed inside and haven't come out the whole time. If a conflict happens, we wouldn't be able to manage it."

"They've all been infected?" Zhao Ming Qing was taken aback and in disbelief. "It's only been a few days. This infection rate is too great, isn't it?"

“Yeah, the infection rate is great indeed. It’s very dangerous,” said Li Chong. He felt that this infection rate was too great as well. Since when had there been such a powerful influenza? In just a few days, a whole town had been infected.

Moreover, they had even had people go in to sterilize the place but the virus couldn’t be exterminated. This showed that this virus was very strong and very resilient.

Lin Fan thought for a moment before saying. “Alright, enough talk. If we delay any further, who knows what will happen? Ming Qing, give me the equipment. I’m going in to take a look.”

“Teacher, if you go in, what about me?” Zhao Ming Qing was anxious. He had come all the way here as well. He couldn’t just stay outside.

“Don’t go in. If you get infected, who will handle the things at the end?” said Lin Fan.

Li Chong said anxiously, “Master Lin, wait a moment. This isn’t a joke. Once you go in, you won’t be able to come out before there is a solution.”

Lin Fan laughed. “Don’t worry. I’m going in to resolve this. If I couldn’t resolve this, why would I even be here?”

“Alright, enough talk. Ming Qing, wait outside. Keep in contact through the phone. If I need anything, you shall help me prepare them.”

Zhao Ming Qing said, “Teacher, I’ll go in with you. With me around, at least you’ll have an assistant.”

Lin Fan waved his hand. “It’s really not needed.”

Li Chong said, “Master Lin, please wear a protective uniform.”

“I don’t need it. It’ll affect my movements,” said Lin Fan.

“Then wear a mask.” Li Chong was a little stunned. He felt as if this Master Lin wasn’t afraid at all.

Lin Fan smiled. "What's the use of a mask? The infection is so strong, it probably isn't reliant on saliva transmission."

## Chapter 1026: Really powerful

At that moment, those people who had sealed off the scene saw that there was someone who dared to enter and were dumbfounded. Others were trying to avoid the place while this person dared to go in by himself. That was way too scary.

On the path to the town, Lin Fan walked with the medicine box on his back and both hands in his pockets.

Li Chong watched his back view. Then, he took out his phone and was about to take a photo. Through the lens, that back view looked rather lonely. But somehow, that back view became big and mighty as if it was bigger than the skies.

"Master Lin is really worthy of respect."

Zhao Ming Qing nodded. "Mmm, my teacher has always been like this." As he said this, he was filled with pride. After all, being able to become a disciple of such a great teacher in his old age was really a proud and fortunate thing for him.

When Lin Fan entered the town, he sucked in a breath of air. He could feel the virus present in the air. Although the virus couldn't survive in the air for long, it would attach itself crazily to any living person. However, as soon as it entered Lin Fan's body, it was burnt to nothing by a burst of flames.

What a joke. There's no way the Wuxia major class of knowledge could be so weak.

When the townspeople discovered Lin Fan's presence, they were astonished. They had no idea how this person had managed to come in from that side. Moreover, he wasn't even wearing any protective attire. What was he here for?

“Hello. May I know if your Mayor is around?” Lin Fan asked.

“Who are you? Our Mayor Niu has been infected too. He’s resting in the house now. He’s a little dazed,” said one of the townspeople.

Hearing that his fan had become dazed, Lin Fan decided to forget about it. It seemed that he would have to rush the process a little.

“Oh. I’m here to treat your sickness. I’ll see what exactly is going on with this influenza,” said Lin Fan.

The townspeople were taken aback. It seemed like they were in disbelief and didn’t know what to say.

“Are there still any doctors in the clinic?” asked Lin Fan.

“Yes, yes. But there’s only one doctor left. The nurses and the other doctors have all been infected,” said one of the townspeople.

Lin Fan didn’t ask more. He went straight towards the clinic. When he entered, he saw a doctor with weak footsteps. The doctor was wearing a mask and treating the townspeople with IV drips. Meanwhile, he had actually been infected as well but he kept on going.

“It’s fine. Don’t worry, everyone. You will definitely be okay,” said the doctor as he gave the townspeople IV drips. His voice was hoarse. Perhaps it was because he was infected or perhaps it was because he had spoken too much trying to assure the townspeople.

“Yes, you will be okay,” said Lin Fan from the side.

Then, the doctor looked up to see who it was. But when he saw Lin Fan’s face, he was utterly shocked. He hurriedly removed his mask, revealing a flushed face as he said excitedly, “Master Lin, why are you here?”

He was a doctor from the city. Initially, he had worn a protective uniform to treat the townspeople but later on, after he got infected as well, he had stopped wearing it. It didn’t make a difference anyway.

There were very few hospital doctors now who didn't know about Master Lin. In the hearts of these basic level doctors, he was a godly doctor.

Lin Fan patted the doctor's shoulder. "I found out about the situation here, so I came. Alright, leave the rest to me. I'll play with this influenza and see what exactly it is. It has tortured so many people. How naughty."

\*Pfft!\*

The doctor burst into laughter after hearing what Lin Fan said. Then, his body turned soft and he fell towards the ground. Lin Fan immediately caught him and helped him to the side to rest. "Rest well. Just leave the rest to me."

"Master Lin, we'll be depending on you now." He had unwavering faith in Master Lin. He felt that since Master Lin was here, everything would be fine.

Lin Fan nodded, then walked towards the inside of the clinic to see what facilities they had. If they had sufficient facilities, he could use them to analyze the virus. But after looking around, he didn't find the required facilities. It was a bit of a shame.

Then, he went in front of an infected patient and felt his pulse to check the patient's inner condition. At the same time, this virus spread through the air and into Lin Fan's body.

Lin Fan didn't exterminate it. Instead, he used the true qi inside his body to envelope this virus and slowly observe and analyze it. He wanted to see how he could tackle this virus.

Since unlocking the Wuxia knowledge, he had had all kinds of techniques. He could interchange between true qi of different attributes.

Minutes and seconds passed by.

To others, Master Lin was feeling their pulses and pondering about it. But they didn't know that, inside his body, there was a battlefield. The battlefield was split into different areas and in each area, there were viruses present. He was now using various different methods and testing them out to see which one could exterminate the virus.

At that moment, Lin Fan stood up and took out his phone. He immediately called Zhao Ming Qing and listed a long list of Chinese medicine before telling Zhao Ming Qing to buy them.

When Zhao Ming Qing heard that, he immediately rushed towards the county's pharmacy under the lead of Li Chong.

When they reached the county pharmacy, it was packed with people.

"Why is honeysuckle so expensive? Wasn't it just \$90 per kilogram in the past? Why is it \$540 now? This inflated too quickly, didn't it?"

The pharmacy staff looked emotionless as they said calmly, "They're all this price now. If you want to buy it, you have to hurry. They're running out. Also, it'll be a different price tomorrow."

"The blue mountain root that usually goes for \$6 per box is now \$30 too. That's way too expensive."

When the people came to the pharmacy and saw these prices, they were dumbfounded. They had come to buy preventive medicine after seeing the news on WeChat. But the price had made them speechless.

When Zhao Ming Qing heard about them selling all these medications unreasonably, he wanted to argue the staff. But when he remembered that his teacher was still waiting for the Chinese medicine, he resisted the urge. He went in front of the counter and recited a long list of medications.

That staff member who was at the counter was surprised. Other people were all buying other medicine while this old man wanted these. He couldn't help but say, "Mister, these medications are useless. Only those medications can prevent it."

"Enough nonsense. Just get me what I asked for," said Zhao Ming Qing impatiently.

When the staff member heard this old man's arrogant tone, he slammed the table. "We're not selling."

Li Chong saw this and whipped out his credentials. “Get them for me now. You private pharmacies are heartless. When this matter is over, I’ll teach you all a lesson.”

The staff member had wanted to refute but when he saw the credentials, he was stunned. Then, he lowered his head and didn’t dare to say more. He obediently went to grab the medicine.

“Give me the real stuff. If you give us fake medicine and waste our time, you won’t be able to bear this responsibility.” Li Chong was from the county and he was the leader of a certain unit. His tone was very stern.

He had already thought about it. After this matter, he would make things difficult for this pharmacy.

After the Chinese medicine was prepared, the two of them left in a hurry.

Huang Yun Town.

Lin Fan sat there and shook his head before laughing bitterly.

“What a powerful influenza. I’ve gone all out and it still took an hour. It’s quite troublesome but it shall end here.”

The problem had been solved. It was indeed a ferocious influenza. It had managed to resist Lin Fan for an hour.

Now, he had finally found the solution.

All that was left was to wait for Zhao Ming Qing to return with the Chinese medicine and see the effects.

Chapter 1027: A miracle is about to happen

\*Ding ding!\*

The phone rang. He answered.

Zhao Ming Qing said excitedly, “Teacher, we’ve bought the medicine. I’m bringing them to you now.”

Lin Fan was startled. “Why are you coming in? Can’t you just use the machine to send it in?”

“Teacher, you’ve already conquered the influenza. It’ll be fine if I come in. You’ll need an assistant for brewing the medicine and what not, won’t you?” said Zhao Ming Qing. He trusted his teacher very much. Although they hadn’t tested the treatment, he believed that, if his teacher said it had been conquered, then it had been conquered. He had absolutely no doubt.

Lin Fan thought for a moment before replying, “Alright, come in then.”

It wasn’t just Zhao Ming Qing who believed in him, he also had extreme faith in himself. This influenza had indeed been conquered and it wouldn’t be a problem at all.

Outside!

Zhao Ming Qing carried the medicine as he entered Huang Yun Town.

Li Chong was a little anxious and he wanted to stop Zhao Ming Qing. However, Zhao Ming Qing said that his teacher had already conquered the influenza and he was required inside. What else could Li Chong say? In the end, he could only hope Zhao Ming Qing was right.

Initially, he had been exhilarated about Master Lin’s arrival. Later on, he started becoming incomparably worried. Until now, he kept repeating in his heart ‘This has to succeed.’

But before they saw the final outcome, no one apart from Master Lin and Zhao Ming Qing dared to say that the problem had been resolved.

“Do you think it has really been resolved?” asked one of the workers.

Li Chong shook his head. "I don't know. Let's wait and see. If it really succeeds, it would be great."

No one wanted this problem to develop to a stage of no return. They all hoped that it could be resolved.

But even if Master Lin said it personally, they wouldn't believe that it could really be cured until they saw the final outcome.

Zhao Ming Qing entered Huang Yun town and felt that the stench of the town was horrible. When he saw the surrounding townspeople, he felt the terror of this influenza for the first time.

Looking at the pale complexions on the townspeople and their feeble appearances as if they would fall down anytime, he knew that they had to resolve this as soon as possible.

In the clinic.

Zhao Ming Qing saw his teacher sitting there and he hurriedly rushed forward. "Teacher, I've brought all of it."

"Mmm. Follow me to brew the medicine," said Lin Fan.

The doctor who was lying down asked, "Master Lin, how is it?"

Lin Fan smiled. "Don't worry. There will be no problems soon. Just rest here for a bit. I'm going to brew the medicine."

When the doctor heard that, he was taken aback. "Master Lin, has it already been resolved?"

Lin Fan chuckled, then nodded at this doctor without saying whether it had been resolved or not. He was afraid that the townspeople would become too excited and affect his medicine brewing. After all, no one would be willing to see other people cured before themselves.

Moreover, there were way too many sufferers. Just relying on himself and Zhao Ming Qing, how could they brew so much medicine so quickly? Hence, they had to cure one person first and then the rest would be much easier.

On the Internet.

The netizens were all discussing this hot topic.

“D\*mn, it’s unbelievable. This medicine is too expensive, isn’t it?”

“Yeah! Do you know what they said to me when I was about to buy those medications that were posted on Weibo? They said that these medications were temporarily out of stock and they would only be restocked the next day. How scary is that?”

“You think that’s scary? It’s even scarier here. The price increased by five times! Even if they want to snatch our money, they can’t do it like that.”

“Did you see that video that came out subsequently? The people infected in Huang Yun Town are many. I feel like there are definitely people who have escaped from there. If they bring the influenza out, we’re screwed.”

The discussions on the Internet were intense. To some pharmacists, it was great.

In the pharmacies group chat.

“Haha, we’re going to be rich! Honeysuckle has inflated five times and so has blue mountain root. I think the price will be even higher tomorrow.”

“It will definitely be higher. Right now, everyone’s hearts are jittery. Before this sickness is cured, our medicine will keep inflating.”

“The blue mountain root manufacturer is going to stop production.”

“What happened? Why is it stopping?”

“Because of the inflation of Chinese medicine prices, they are losing \$95 for every box of blue mountain root. Those legal manufacturers are under the control of the government. Of course, the government wouldn’t let them inflate the price.”

“There are countless people coming to my pharmacy to buy medicine every day now but I’m telling my staff to tell them that we’ve run out of medicine. I’m going to take out my stock in a few days and sell them for a high price.”

“Of course. We have to make them feel as if the medicine is very scarce. That will make them feel as if the medicine would run out if they hesitate any further.”

“Yeah. I’ve already started piling a large amount of stock. Before this incident was even exposed, I already bought a large pile of medicine from the Chinese herbal medicine suppliers and it was for the uninflated price.

“I bought mine from a Chinese medicine company in Shanghai. I heard that that company hasn’t inflated its prices yet. I don’t even know what they’re thinking.”

“Maybe they want to do good.”

“Haha. As long as this influenza hasn’t been conquered, the price will not fall. I’m guessing that this influenza will still go strong for another one or two months.”

Huang Yun Town.

Lin Fan and Zhao Ming Qing had brewed over ten servings of the medicine. Zhao Ming Qing was very serious about this. He was very afraid that problems might crop up.

“Ming Qing, help the doctor over. Let him take the medicine and let’s see how it goes,” said Lin Fan.

Zhao Ming Qing nodded, then hurried to help the sick doctor over.

“Master Lin, have you conquered it?” Now that there was no one around, he was eager to ask.

Lin Fan said, “I know that I’ve conquered it but we still have to see the effects after you take the medicine. Come, have a try.”

That doctor had no hesitation. He had immense faith in Master Lin. Then, he slowly started to take the medicine. The medicine was still hot. He was very excited. He was just hoping medicine would be useful and that it would completely cure the influenza.

At that moment, his panic completely vanished.

The medicine definitely wouldn't be effective immediately. It needed time to take effect in the body.

"Ming Qing, go and find the more severe patients and let them come in to try it," said Lin Fan.

"Got it, Teacher." Zhao Ming Qing went out again. But this time, he had drunk some medicine as well. Although the symptoms hadn't shown yet, he was already infected.

Very soon, over ten patients with severe cases came in. They didn't know what was going on at first but under the guarantee of the doctor, they found out that they would recover after taking the medicine. Hence, they started taking it without hesitation.

Zhao Ming Qing said, "Teacher, how long must we wait?"

Lin Fan said, "I already know now that this medicine is useful. But the effect will only be made known tomorrow morning."

"Oh." Zhao Ming Qing nodded. It seemed that he would have to wait until the next day.

Chapter 1028: Comparing to others will only drive you mad

The next day!

That doctor from the city hospital had been afraid when he found out that he had been infected but he could still accept it. After all, he had known about this influenza and still come to the clinic to work. He had already prepared himself mentally beforehand.

“My head hurts.”

Ma Yong woke up from the bed and rubbed his head. Suddenly, his hand stopped halfway and his eyes gaped wide open as if in disbelief.

The previous day, he had been feeling dizzy and his whole body had been drained of energy. But now that he woke up, he suddenly felt as if his body was filled with energy and his head was a lot clearer.

It was effective. It was really effective.

Without hesitation, he put on his clothes and got off the bed. He raised his voice as he pushed open the door, “It’s been conquered. The influenza has been conquered! I’m well now!”

When he came out, those people who had taken the medicine the previous day had already gathered in the clinic.

Niu Da Ming was one of them. As Huang Yun Town’s Mayor, if he recovered, he would be able to control the situation in the town as he was more familiar with it.

Li Chong basically stayed there every day. At night, when he was tired, he would rest in the car. The quarantine was managed by two shifts of people. One shift was at night while the other was in the morning.

They believed that that the townspeople wouldn’t try to escape but they were afraid that there would be fearless people who would sneak into the town and then sneak out again. If that were to happen, the influenza would be brought outside and it would be terrible.

Niu Da Ming went to the vehicle at the entrance of the town and yelled, “The influenza has been conquered! I’m well. My body is well!”

When his voice rang out, Li Chong, who had been sleeping in the car, suddenly woke up and got off the car. He looked over at the town entrance. When he saw Niu Da Ming standing there looking full of vitality, he was completely stunned.

Then, he jumped up in excitement. He pointed in front and shouted to the people around him, “Look, he’s fine now!”

His expression was one of elation. It was as if he was about to cry tears of joy.

As a leader in the county, he faced a lot of pressure. After all, Huang Yun Town was under their jurisdiction. When this happened, everyone had been tense and nervous. If it were to spread outside, it would have been a huge issue.

Hearing that the influenza sufferers had recovered, how could he not be excited?

“Okay, okay. I’m going to contact the higher-ups now,” Li Chong yelled. Then, he thought about it and felt that there was no need to fear. He immediately crossed over the barricade and ran in.

“Master Lin, what’s the prescription? I’ll report to the higher-ups now and get them to bring some medicine over,” said Li Chong.

Lin Fan smiled and took out the prescription. “Here. They’re all Chinese medicine. Get the higher-ups to bring the medicine here quickly and bring more people to help to brew the medicine.”

Li Chong did not hesitate at all. He immediately passed the information to the higher-ups. At such an important moment, he had to inform the leaders quickly and get them to send more people over.

In the research lab.

A group of specialists had been researching for days and nights. This period of time had been like a race against death. They couldn’t relax for a single second.

“I’ve discovered something but it isn’t the most important thing. This virus originated from animals,” a specialist shared his analysis.

“Okay. Right now, the most important thing is to quickly solve this issue. We don’t have much time left.”

“Mmm. We’re working on it. I believe that with our combined efforts, we will definitely solve this completely.”

At that moment, a person in charge entered the research lab.

The specialists who walked past him all nodded and greeted him, “Director Huang.”

Director Huang nodded. He was in a very good mood and he couldn’t help but quicken his footsteps. When he saw through the glass window that the specialists were still researching, he spoke into the microphone next to him.

“Alright, everybody stop. There’s no need to keep researching.”

When the specialists who were researching heard that, they were startled and the group leader didn’t bother about it. He replied, “How could we stop researching? We’re about to get results. We just have to analyze the components of this virus and we’ll definitely be able to find a way to treat it.”

The surrounding specialists looked at the group leader and gasped in their hearts. Group Leader Yang was under quite a lot of pressure and he worked very hard.

Director Huang said, “There’s really no need to research anymore. This influenza has already been resolved.”

“What?”

All the specialists were shocked. They were in disbelief.

“Director Huang, did another research lab conquer it?” someone asked. However, they felt that it was strange. Besides them, which other research lab would research this? After all, the sick person had been discovered here.

“No,” replied Director Huang. After some pondering, he decided not to hide anything. “Shanghai’s Master Lin personally went to Huang Yun Town and developed the prescription over there.”

When these words were said, everyone was dazed.

Group Leader Yang was particularly in disbelief as he said, “How could that be? We have so many people researching here but we haven’t found the cure. How could he do it by himself?”

He didn’t dare to believe this because it was way too unreal. Then, he said hurriedly, “That’s not right. He said that it has been developed but it hasn’t been through testing. How would he know if it is successful?”

The surrounding specialists saw that Group Leader Yang had such a drastic reaction and they understood it. He didn’t want to lose to that Master Lin who was often said to be godly on the Internet.

After all, Master Lin was the first recipient of the Nobel Prize in Medicine in the country and he had relied on Chinese medicine.

To those who didn’t think highly of Chinese medicine, it had been a huge blow.

Director Huang thought for a moment before saying, “Master Lin just reached Huang Yun Town yesterday. And he already developed the prescription yesterday but because he was testing the effectiveness of the medicine, he waited until today. There have been over ten patients in Huang Yun Town who have recovered after taking the Chinese medicine. The city hospital’s main troops have already gone over to Huang Yun Town. I came here to inform you all. You’ve worked hard during this period of time. You may go back to rest now.”

When the crowd heard this, their jaws dropped as they stared blankly. What did Director Huang just say?

Master Lin only reached Huang Yun Town yesterday.

And he developed the prescription yesterday too.

He only announced it today because they had been testing it. How can that be? We have so many people and we couldn’t even find the cure after researching for so long.

Could it be that even all our combined efforts don’t even amount to Master Lin alone?

That's too big of a gap! He just reached yesterday and he developed the prescription on the same day. What kind of medical ability must he have to be able to do it so quickly?

\*Clatter!\*

Group Leader Yang dropped the equipment from his hands. His face was blank. It was as if he couldn't accept this reality.

How can it be? Are we really so far apart from Master Lin?

I can't accept it!

Directo Huang looked at Group Leader Yang and sighed. Actually, he wanted to say that comparing oneself to others would only drive one mad.

This time, Master Lin had used his exquisite medical abilities to let the world know the meaning of terror.

Chapter 1029: Everything is f\*cked

"Master Lin, I'm really so grateful for you." Niu Da Ming grabbed Lin Fan's hand. He was filled with gratitude. He hadn't expected Master Lin to really come.

Lin Fan looked at this middle-aged man in front of him and was a little dazed. This Mayor Niu gave off the feeling of a simple farmer. He didn't seem like a modern person who would follow celebrities. Then, Lin Fan said softly, "Mayor Niu, are you really my fan?"

Niu Da Ming was a little embarrassed but he nodded. "Yes, yes. I, Niu Da Ming, am your fan."

"Mayor Niu, I can tell from your eyes that you're lying," Lin Fan said with a smile. But regardless, it didn't matter. Actually, he wouldn't have sat idly by if he had known the severity of this situation.

Niu Da Ming had not expected Master Lin to see through him. He shamefully scratched his head as he said, “Master Lin, I’m really sorry. I’m actually a fake fan. I’ve seen Weibo and I know that you are an amazing person. As Huang Yun Town’s Mayor, I pretend to be a fan of amazing people sometimes so that if a problem arises, I’d be able to request help.”

“That day, I called you because I had no other choice. I couldn’t watch my people continue getting tortured by the illness...”

“Alright, alright. That’s enough, Mayor Niu. You can become my fan from now on then. Next time, if I argue with someone on Weibo, you have to remember what happened here today and help me to scold the opposition,” said Lin Fan with a laugh.

After all, there were sure to be many flame wars in the future. If he had more fans, he would have a greater chance of winning these flame wars.

“Of course. Of course. From now on, you’re my savior,” said Niu Da Ming.

The influenza had finally been conquered now. The townspeople’s health was not an issue anymore.

Li Chong had been watching from the side the whole time. At this moment, he grabbed Lin Fan’s hand and said, “Master Lin, I thank you on behalf of all the county’s citizens. If it wasn’t for you, who knows when the influenza would’ve been conquered? And I don’t know if those townspeople would have been able to make it through.”

“You’re too courteous.” Lin Fan smiled. He had already received many words of thanks. He had had a pretty good rest the previous night as well, so he was very energetic.

“Oh, right. I think this matter has had a large impact on the Internet. I’m going to send a Weibo post now to explain things to the public,” said Lin Fan.

Actually, he felt as if his own Weibo post was more convincing than a Weibo post sent by government units.

When he brought that up, Li Chong thought about something as well.

“After this incident, I have to go to the city’s pharmacies to punish them. They actually raised the prices of medicine and some of them obviously raised it on purpose.”

After the incident when purchasing medicine the previous day, Zhao Ming Qing felt that this problem was rather severe as well. Normal citizens wouldn’t know the full situation but after the scare on the Internet, they were sure to make decisions for their own safety.

This allowed the distributors to take advantage of the situation by inflating the price of the medicine and earning a huge profit.

This indeed needed to be rectified. And it had to be done harshly. That was the only way to let those people know the severity of the situation.

Lin Fan opened his Weibo without hesitation. After putting together his thoughts, he started to type on the screen.

“The Huang Yun Town influenza has been conquered by me, so I’m naming it ‘One-hour influenza’. It has already been resolved completely, so the public doesn’t have to worry anymore. After today, the problem here in Huang Yun Town is over. As for those medications promoted by pharmacies, they are completely useless. Don’t buy them.”

It was very simple. And he had named the influenza. No matter what, he was the one who conquered the influenza, so he had the right to name it.

When this post was uploaded, the comments section instantly blew up.

“????”

“I f\*cking spent hundreds of dollars on the medications. You’re telling me now that you’ve conquered it?”

“F\*ck. Thankfully, I took a look at Weibo before buying the medicine. I would’ve wasted my money otherwise. Do you know how expensive it is?”

“Well done, Master Lin. These evil businessmen are destined for disaster once they meet Master Lin.”

“That scared the heck out of me. But Master Lin is amazing. As long as you intervene, there is nothing that cannot be resolved.”

In a certain city.

There was a huge crowd queuing at the entrance of a pharmacy. These people were all here to purchase medicine. The danger of the influenza had made them all frightened, so they were here to buy medicine for the safety of themselves and their family members regardless of the costs.

“Those in front, please buy less. Leave some for us.”

“Yeah! There’s no point buying so much. I need some for my family too.”

“Sigh, how can this influenza pop up all of a sudden. Is it trying to kill us?”

When the pharmacy owner saw this situation, he felt amazing. I’m going to be rich. I’m really going to be f\*cking rich.

If he sells all those medications, his wallet would be bursting.

Thinking about those bosses in the chat group who had hyped things up to inflate the prices, he was really in admiration. He had really benefited thanks to them this time. Then, he happily opened his Weibo and sent a red packet.

“It’s not much but I hope everyone will be happy.”

Once the red packet was sent, it got snatched up in an instant.

“Haha, looks like Elder He is happily earning money.”

“How can he not be happy? He managed to catch this great opportunity. But don’t sell all the medicine. Leave some for later. When that time comes, we will really earn lots of money. This is just a little teaser.”

“Thanks for the advice, Boss. Don’t worry. I’ve basically kept all of my medicine for later on.”

Just as he was chatting cheerily in the group, a voice broke through his excitement.

In the crowd, a young man looked at his phone and suddenly yelled.

“F\*ck! What are we still buying this for? Master Lin has already conquered the influenza and he even said that the medications being promoted are completely useless against it.”

“What? The influenza has been conquered?”

“D\*mn, that’s amazing. Master Lin’s medical abilities are too strong. He conquered the influenza just like that.”

“Haha, I’m going home to go on the Internet. This gave me a scare but if it has been conquered, I don’t need any medicine anymore.”

“This pharmacy is really evil. I’ll never buy medicine from here again.”

“Me too. They took this opportunity to take our hard-earned money.”

Soon, the crowd dispersed all of a sudden. And as they left, they kept cursing this pharmacy. They really looked down on such behavior.

When the pharmacy owner saw this, he didn’t know what to say.

And when he picked up his phone as he wanted to tell the people in the group about it, he realized that the group was filled with mournful cries and everyone was talking about this.

“F\*ck! This f\*cking Master Lin doesn’t want to let us live.”

“I hoarded so much stock, how am I going to sell it?”

## Chapter 1030: Nothing wrong with that at all

Those pharmacists, who had been talking about how much they had earned a moment ago, now wanted to cry.

Their opportunity to become rich had been taken away from them. It had been such a good opportunity but the influenza got conquered all of a sudden.

If the influenza had been allowed to continue longer, they would have earned so much money

Now, after just a few days, the influenza hadn't even reached its peak. Hence, many pharmacies had been hoarding the medications, getting ready to sell them at a high price when the influenza completely erupted.

Even selling the medications for ten times the original price wouldn't be a problem if that happened.

Because there were simply too many people buying it . If they decreased the supply, the market would naturally increase the price

But now, everything had been ruined.

"Sigh, I'm going to kill myself. I hoarded over two hundred thousand dollars worth of medications. Who's going to buy them now?"

"Two hundred thousand? I bought over three hundred thousand! Who am I going to cry to?"

"I even have a slight urge to kill this Lin now. He ruined our market."

“That’s right. If it wasn’t for him, we would’ve definitely earned a fortune from this influenza. Look, it’s been so many days and the influenza hadn’t been conquered before he came. It was obviously a troublesome illness.”

“I’m done. This pharmacy business isn’t suitable for me. I’ve been screwed too much.”

Meanwhile, at the bottom of Lin Fan’s Weibo page, the number of haters increased as well. The things they said were strange and random but they just wanted to flame him. But to Lin Fan and his huge fan group, they were just a joke. Whenever he made a move, it was earth-shattering.

Huang Yun Town.

Lin Fan wasn’t going to stay here any longer. He was prepared to rush back to Shanghai. But before he left, he had to do something.

“Mayor Niu, this is for you,” said Lin Fan as he took out a wooden carving.

Mayor Niu looked at the wooden carving suspiciously. “Master Lin, this is...?”

“Just a little something for you. Carry it with you or put it at home and it will bring you good luck. You want the town to be rid of poverty, don’t you? This might just be able to help you,” said Lin Fan with a grin.

He could tell that this Mayor Niu was a very kindhearted person but he was quite miserable. He had been a mayor for so long and, although he worked very hard, he couldn’t help the town progress. Moreover, the town even seemed to get poorer and poorer.

Sometimes, things like Feng Shui do make a bit of sense.

But with Lin Fan’s wooden carving, all these wouldn’t be problems anymore.

Mayor Niu held the wooden carving in his hand and replied, “Alright. Thank you, Master Lin.”

Lin Fan went into the car smiling. “Alright, I’ll be leaving now. When the city medical workers come and brew the medicine according to the prescription, the people will definitely be fine.”

“Master Lin, aren’t you going to stay a while?” shouted Li Chong.

“Nah. I’m leaving. I have nothing more to do here so I shan’t disturb you all from your work.” Lin Fan waved and then left along with Zhao Ming Qing.

If he stayed, he would only be drawing attention and not being of much use at all. It was better to hurry back to Shanghai.

In the car.

Zhao Ming Qing looked at Lin Fan with a look of helplessness. “Teacher, this time, I didn’t learn anything at all.”

Lin Fan was a little embarrassed. That seemed to really be the case. He had solved the problem too quickly without giving his student a chance at all.

It was mainly because he had been afraid that Zhao Ming Qing would get infected. Also, he didn’t want to waste any time in that situation. But as the teacher, how could he let his student feel as if nothing had been learned?

He coughed gently a few times.

“Ming Qing, who says that you didn’t learn anything? You did learn something. Think about it, what did you learn?” said Lin Fan, as if trying to guide him.

Zhao Ming Qing was stunned. He really didn’t feel as if he had learned anything. Then, he looked at Lin Fan. “Teacher, could you say it more directly? I really don’t understand.”

“Forget about it then. Go back and think about it properly. I won’t say too much. Concentrate on driving and don’t be distracted,” said Lin Fan with a wave of his hand. Since he doesn’t understand it, let him slowly think.

But even Lin Fan didn’t know what Zhao Ming Qing had learned.

Cloud Street!

Fraud Tian and the rest had been following the news the whole time. When they saw that the influenza had been conquered, besides Wu You Lan who was very excited, the rest of them looked completely indifferent.

It was as if they had been shocked too much that they were already used to it.

“Mmm, this kid is amazing. He accomplished another thing.”

“Brother Lin is just that amazing. Fraud, do you want to follow me to dinner tonight? Let me tell you. There will be girls.”

“Get lost. Don’t try to trick me. If I follow you, you’ll make me pay.”

Zhao Zhong Yang sighed. “Forget it then. Don’t say that I didn’t invite you. This time, the girl is really not bad. And she’s thinking of finding an older guy too.”

Fraud Tian was sitting there and smoking his cigarette as his heart started to shift. Then, he looked at Zhao Zhong Yang. “Is it true? You’re not lying to me?\*

“Sigh, we’re friends aren’t we? If you don’t trust me, who can you trust?”

“Alright then. I’ll trust you one more time.” Fraud Tian thought about it and felt that he wasn’t young anymore. He had to find a partner. Nowadays, young girls all liked older men. Perhaps he would really be suitable for her.

The next day!

On the Internet, the news was announced. A full-scale report was made about the incident that had happened in Huang Yun Town.

Now that the influenza had been cured, the people from the various departments had no more worries.

But these people were really grateful towards Master Lin. To them, this Master Lin was really amazing to be able to solve the issue so quickly.

Initially, when they had seen someone exposing the incident on the Internet, they had lost their minds. After all, they had been controlling the news regarding this incident. If it had been widely spread, it would've caused panic.

Hence, they had suppressed the news all along to prevent unnecessary panic.

Now that things were fine and the matter was resolved, they could openly speak about this subject.

On the Internet, reporters released an image.

This image was the back view captured by Li Chong. Master Lin was carrying the medicine box on his back with both hands in his pockets as he walked towards the panic-stricken Huang Yun Town.

When this photo was released, countless people reposted it.

“This back view of Master Lin is too d\*mn dashing.”

“I get a feeling when I look at this back view. It's as if this matter, to Master Lin, is something that can easily be resolved.”

“Haha, you really make a lot of sense. When I take a close look, I feel that too.”

“Can you be more serious? What I see is a kind of undertaking as well as bravery. No one dared to go to the scene but Master Lin went in without a second thought.”

“You shouldn't think too much. Actually, they're right. Master Lin was probably thinking at that time that the influenza is just a joke. Look at how Master Lin is dressed. He's not even wearing any protective attire. In Master Lin's eyes, this isn't even a problem at all.”

Some netizens were completely convinced when they saw this comment.

They felt that there was nothing wrong with it at all.
