

## Valiant Life 1141

Chapter 1141: Are you trying to scare me to death?

In the research lab.

The little girl sitting in the wheelchair seemed very happy when she saw Lin Fan. “Uncle Lin, what are you doing?”

She looked around with her childish gaze and she felt curious about everything. Every single thing seemed fresh and new to her.

But because of her legs, she could not be like the other children who were able to go wherever they wanted. She always needed someone to help her.

However, she had a joyful heart and she loved everything that she had right now because she had many friends.

In particular, the welfare institute’s Director, Uncle Han, and all the teachers really loved them. This made her feel very fortunate.

Although Uncle Lin wasn’t always with them, the children of the welfare institute all knew that Uncle Lin was earning money outside to buy good food for them and to let them live comfortable lives.

“Little Mei Mei, do you want to be able to run?” Lin Fan squatted down and patted this little girl’s head.

This was the little girl that Lil’ Fatty liked the most. Thinking about how Lil’ Fatty would push the wheelchair around every day to bring Little Mei Mei to the various places in the welfare institute, Lin Fan realized that Lil’ Fatty was quite gifted. He was a pretty good little boy.

“Run?” Little Mei Mei was a little excited but then, she looked at her legs. “Uncle Lin, will I really be able to run?”

“Of course.” Lin Fan smiled. “With Uncle Lin around, how could anything be impossible?”

He had to implant a glorious image of himself into the hearts of these children.

Lin Fan had actually always been waiting for the Encyclopedia to give him a class of knowledge that could be of help to these disabled children.

Now, it had become a reality and it was great. The Encyclopedia was pretty awesome after all.

Now, the research lab was done and the product had been developed as well.

Of course, Lin Fan couldn't only think about the welfare institute. After all, there were lots and lots of disabled people outside who had lost all hope because of their physical disabilities. There were some who were able to maintain a positive outlook.

However, if they could have perfect artificial limbs to replace their missing limbs, why not?

They would be able to climb mountains, run, and even swim. It was such an exciting thing.

“Uncle Lin, I do want that,” said Little Mei Mei loudly.

“Alright, wait a moment.” Lin Fan smiled as he quickly brought a pair of perfect artificial limbs over. These artificial limbs had automatic sensors. They could adjust and would change according to the growth of the user. They wouldn't have to be changed throughout the user's lifetime.

Unless they were to break, they wouldn't have to be replaced. They would follow the user for life.

The materials used were the best. Moreover, these materials were not expensive. The most expensive thing was the core technology.

Lin Fan brought the artificial limbs over and started to attach them. The limbs possessed nerve sensors and they were able to respond according to messages sent by the brain.

At the same time, they would send nervous feedback.

Lin Fan didn't understand all this but he understood the theory behind it. This was why the Encyclopedia was so terrifying.

"Come. Try and move." Lin Fan helped Little Mei Mei up from the wheelchair, then supported her. "Can you feel it?"

"Uncle Lin, let me try." This was Little Mei Mei's first time standing on the ground but the perfect artificial limbs didn't move momentarily. However, with Little Mei Mei's persistent effort, they slowly started to move. Although she wasn't very used to it, it proved that this product was a success.

"Uncle Lin, I can move!" Little Mei Mei exclaimed excitedly.

Lin Fan was all smiles. He felt an indescribable joy. "Don't be in too much of a hurry, Little Mei Mei. With some effort, these will become like your very own legs. In the future, you'll be able to run around like your friends and you'll be able to go wherever you want."

"Mmm." Little Mei Mei lowered her head and looked at the ground. She was a little nervous and a little afraid. But she would press on.

Time passed, minute by minute and second by second.

Outside.

Wang Ming Yang shifted anxiously. He had no idea what was going on inside.

Initially, he hadn't cared much about this. But when the experiment started today, he suddenly became nervous.

His fists were tightly clenched as he mumbled to himself.

"Succeed. This has to succeed."

The secretary stood at the side, a little nervous as well. She hoped that Master Lin would be able to create a miracle but she didn't know if it was possible. The answer to that was behind that tightly shut door.

At that moment, the door opened.

Wang Ming Yang immediately lifted his head and saw Lin Fan standing there.

"Brother, how did it go?"

Lin Fan was expressionless and he didn't reply. He looked as if it had failed.

Wang Ming Yang had been all smiles at first but when he saw this expression from Lin Fan, his excitement slowly faded away. Then, he patted Lin Fan's shoulder and gave a consoling smile.

"Brother, it's fine. If it failed, so be it. Who hasn't failed before in their lives? Come, let's go and drink. No matter what they do, we don't have to care about all that."

Since his brother had failed, he was thinking about the situation on the Internet. He thought about how they would resolve it. Perhaps his brother would have to say something on Weibo in order to defend himself against the criticism.

But other people might not even accept that. Still, they would have to suppress the situation no matter what.

"Uncle Lin, I can run! Uncle Lin..."

At that moment, a little girl came over and tugged Lin Fan's sleeve excitedly.

Wang Ming Yang lowered his head and looked at that little girl who was drenched in sweat from running around. Isn't this the girl we brought here just now? But look at her now...

"This..."

Lin Fan patted Wang Ming Yang's shoulder and smiled. "Brother, what were you talking about?"

"F\*ck"!" Wang Ming Yang didn't care who was around and just burst out cursing. "Brother, are you trying to scare me to death? Have you really succeeded?"

Lin Fan didn't bother about Wang Ming Yang but patted Little Mei Mei's head instead. "Let's walk back to the welfare institute later, okay?"

"Okay." Little Mei Mei nodded with excitement. "I can run. I can run with Lil' Fatty from now on!"

When the secretary, who was beside Wang Ming Yang, saw this, she was completely dumbfounded as well.

To her, this was too surreal.

She had felt sorry for this little girl initially. The little girl had lost her legs at such a young age. But looking at her now, it was too f\*cking mystical. It was beyond scary.

Moreover, looking at the situation, these perfect artificial limbs seemed exactly like real legs. There didn't seem to be any difficulty when the little girl ran. She looked very agile.

This...this...

Chapter 1142: To everyone's delight

"How is it?" asked Lin Fan with a smile. He was very satisfied with these perfect artificial limbs. The Encyclopedia was really valiant after all.

"Good."

Wang Ming Yang nodded. He didn't know what to say anymore. If he hadn't seen it for himself, he would never have believed it.

In the research lab, Little Mei Mei was running about in joy. Going from not being able to stand stably to being able to run with ease, this little girl was overjoyed.

“Little Mei Mei, it’s time to go. We’ll go back to the welfare institute to show the rest of them,” said Lin Fan with a smile. He couldn’t wait to bring Little Mei Mei back to the welfare institute.

Director Huang and the rest were probably waiting eagerly.

“Oh.” Little Mei Mei really loved running around. Even though she was drenched in sweat, she didn’t get tired of it.

Wang Ming Yang thought about the situation on the Internet and said, “Brother, what are you going to say on the Internet?”

Lin Fan smiled. “No need to worry about that for now. There are still things I haven’t settled over here. But you have to keep this place secure. All that we have is here.”

“Hahaha!” Wang Ming Yang burst out laughing. “Don’t worry. Who would dare to steal anything from here? If anyone dares, he or she would be in deep trouble.”

Lin Fan actually didn’t really care about this. Even if someone stole his things, it would be useless.

He had developed these artificial limbs not for earning money but to help the crippled become like normal people again.

The secretary had been by Wang Ming Yang’s side the whole time, staring at that little girl’s legs. She really wanted to see if there were anything abnormal about these artificial limbs. But after a long time, she couldn’t see anything wrong at all.

Instead, these legs were exactly like a normal person’s legs. They were extremely nimble.

She couldn’t figure out just how much Master Lin knew. Master Lin was actually able to develop something like this.

Was there anything he didn’t know?

Nanshan Children's Welfare Institute.

Everyone was waiting. Director Huang was pacing back and forth. She knew that Little Mei Mei had been fetched over to Eastern Han Organization. Master Lin had developed perfect artificial limbs but she had no idea how those perfect artificial limbs were. Had he really succeeded?

Han Lu said, "Director Huang, trust in Master Lin. He can definitely do it."

"Mmm, I do trust him. But I can't stay calm. If it really succeeds, it would be a great joy for the children."

Director Huang spoke excitedly. Right now, there were many children in the welfare institute who were crippled.

In the welfare institute, these children wouldn't feel any discrimination but she was afraid that the children would receive unsettling gazes from others when they enter society.

If Master Lin's perfect artificial limbs were to succeed, it would really be great.

However, she didn't know how different these perfect artificial limbs would be. What differences would they have as compared to those artificial limbs on the market?

If the differences weren't huge, it probably wouldn't be enough.

Thinking about all this, Director Huang started getting anxious.

At that moment, Director Huang's phone rang. When she answered, her expression changed. Then, she hung up.

"Let's go. Master Lin and the rest are coming."

Hearing that, Han Lu stood up immediately. Even the other teachers did the same as they all rushed towards the main entrance of the welfare institute.

Master Lin was coming and they had no idea what exactly had happened. They just hoped that it had really succeeded and that the artificial limbs were as perfect as they had imagined.

A car stopped outside.

Lin Fan got off the car and opened the passenger door. "Come, get out of the car by yourself. Let's go back to the welfare institute."

Little Mei Mei nodded happily, then got off the car without any issues. To her, these legs really felt like her own legs. There was no difference at all.

In the distance.

Director Huang and the rest saw a little figure dashing towards the welfare institute.

Han Lu was stunned. "Director Huang, I can't seem to tell that there's anything abnormal about her legs."

Director Huang nodded. "Let's go. Let's go over there quickly."

When they saw Little Mei Mei running happily, they were stunned. From her running posture, one couldn't tell that anything was wrong. She seemed just like any normal person.

"Director Granny."

Little Mei Mei called out joyfully when she saw them.

Very soon, Little Mei Mei was in front of Director Huang. There was an excited grin on her face and she was clearly very happy.

"Quick. Let Granny take a look," said Director Huang impatiently. Then, she removed Little Mei Mei's pants and saw a set of perfect artificial limbs. She was astonished.

Little Mei Mei said, “Granny, my butt feels cold.”

Director Huang touched those legs with her hands and a look of shock appeared on her face. There was no metal on the external surface of the legs. Although they didn’t feel like real skin, they were soft and tender. Even at the bend of the leg, there was only a very, very narrow chink. If one didn’t look very closely, one wouldn’t be able to notice it.

Lin Fan walked over. “Director Huang, do you think this is fine?”

“Yes. It’s not just fine. This is really brilliant!” Director Huang was so moved that she almost cried. She hadn’t expected that the artificial limbs would turn out like this. They were really perfect.

Lin Fan squatted down and said. “Director Huang, these artificial limbs are really good. In the future, she won’t have to take them out. Even if she goes for a bath and she submerges herself completely, there wouldn’t be a problem. Moreover, these will gradually expand according to Little Mei Mei’s growth. They will change proportionally to her body.”

As he said all this, he actually didn’t understand it as well. However, this was what the Encyclopedia said and the knowledge in his mind was as such.

Compared to those artificial limbs, these were better and more advanced.

“Master Lin, then these must be very expensive,” said Director Huang inquiringly. She knew that Master Lin had developed these because he wanted to solve the children’s problem. However, such a powerful thing was definitely very pricey.

Lin Fan smiled and shook his head. “They’re not expensive. The cost of manufacturing each set is only just over two thousand dollars.”

When Director Huang heard that, she instantly let out a sigh of relief. That was really not expensive. However, even if they had been expensive, she would have wanted them for the children.

“Little Mei Mei.” At that moment, Lil’ Fatty appeared. When he saw Little Mei Mei standing there, he immediately ran over.

“Ah! Lil’ Fatty is here. I can’t let him see my butt.” Little Mei Mei saw Lil’ Fatty running over and immediately pulled up her pants. “Director Granny, Uncle Lin, I’m going to play with Lil’ Fatty.”

Lil’ Fatty came over with his mucus dripping from his nose. Then, he wiped his mucus and said, “Little Mei Mei, you can walk now.”

“Mmm. Uncle Lin made these for me,” said Little Mei Mei cheerily.

“That’s great! From now on, you can follow me to other places,” Lil’ Fatty exclaimed in joy.

“Go on. Go and play.” Lin Fan waved his hand and let the two kids go and play.

Chapter 1143: I’m leaving this matter in your hands

Watching the two kids leave, a smile appeared on Lin Fan’s face. These days were really pretty good. Now that Little Mei Mei could run together with Lil’ Fatty, Lil’ Fatty would definitely have to thank him in the future.

“Master Lin.” Director Huang was smiling but there was something on her mind. “Can the perfect artificial limbs be spread to everyone else now?”

Lin Fan said with a smile, “Of course. I got Little Mei Mei to put on the artificial limbs to see how they would work. Now, everything seems good.”

Han Lu lived here and he was close to the children. He cared very much about the crippled children of the welfare institute. Now that Master Lin had developed perfect artificial limbs, it was as if a large rock had been lifted off of his heart.

Although these weren’t real limbs, he was very delighted with what he had seen. Just by looking, one simply couldn’t tell that these artificial limbs were any different from real limbs.

“Master Lin, what’s the next step now?” asked Han Lu. He couldn’t wait for the crippled children of the welfare institute to have those limbs, to be able to move about like normal people and to be able to use chopsticks like normal people.

He had initially thought that this would only happen in the distant future but now, Master Lin had made it happen. This made him very excited and moved.

“The next step is for Wang Ming Yang’s private company and the government to collaborate,” said Lin Fan.

“What about you?” asked Han Lu in surprise. Did Master Lin develop this just to bring fortune to the crippled?

Lin Fan smiled. “Me? I’ll still be at Cloud Street.”

Naturally, Lin Fan knew what Han Lu wanted to say but he wasn’t bothered about all that.

There were over eighty million disabled people in the country and among them, ten to twenty million had missing limbs. This was a very large group of people. And who knew how many of such people there were in the whole world?

Hence, in such a situation, whoever could seize control over the market of artificial limbs would definitely gain huge market dominance.

Becoming a wealthy tycoon was naturally not a problem.

“Ming Yang, I’ll leave this matter to you. I won’t be getting involved,” said Lin Fan. It was best to leave the matter of communicating with the government to Wang Ming Yang. Lin Fan wouldn’t bother about it.

Wang Ming Yang nodded. “Then what about the selling price?”

That was what he was most worried about.

“Price? Just add the workers’ wages. The cost of materials is only over two thousand. We’re not going to sell it at an insane price. Go and talk to the government’s side. If they feel that it’s too cheap, then don’t work with them. Treat this as a charity in the future,” said Lin Fan.

Wang Ming Yang nodded. “I’m just afraid that this would draw negativity. There are many artificial limb companies. If we sell ours at such a low price, I’m afraid that they would protest and that would cause a chain of events.”

Lin Fan smiled and said, “That’s why I want you to cooperate with the government. But you should decide for yourself if you’re going to cooperate with the government or do it on your own. That’s not my problem anymore. Oh right, register for a patent at once so that moths won’t come and steal our product.”

“Mmm. Don’t worry. Just leave this matter to me.”

Wang Ming Yang nodded. He knew what to do.

He knew what his brother meant. He, too, understood what he had to do.

“I feel that I should hurry back and produce a few more artificial limbs for the rest of the welfare institution children,” said Lin Fan as he heard the sounds of laughter and joy from afar.

The teachers of Nanshan Children’s Welfare Institute had probably found out about this matter as well.

They were astounded by these perfect artificial limbs.

Wang Ming Yang nodded. “Alright then. I’ll go to the government to initiate our negotiations. Since we want to collaborate, of course the private company has to initiate it. But there are many potential profits involved, so I have to guard it strictly. I’ll make sure to pay extra attention to the contract terms.”

“Mmm. I can relax with this matter in your hands,” said Lin Fan with a smile. He understood what Wang Ming Yang meant.

There would definitely be corruption even in the government. But whether those corrupted officials would be able to take advantage of this was another story.

Director Huang didn't care about these business-related matters. But seeing that Master Lin was going back to continue developing more artificial limbs, she said worriedly, "Master Lin, aren't you going to rest?"

Lin Fan waved his hand. "I don't need to rest. My energy level is still very high!"

Han Lu really respected Master Lin. To him, although Master Lin was young, Master Lin was really mystical. Sometimes, he felt that, if he hadn't seen all this for himself, he wouldn't believe that such a person actually existed in this world.

Weibo.

"Ah, how many days has it been? Master Lin is still not appearing. Could it be that he's really out of ideas?"

"I think that might really be the case."

"I think so too. Look at how long Master Lin has disappeared. Right now, there's no news from him at all. I think that he boasted too much. That's why one should never be too confident."

"That Lin has probably gone into hiding, waiting for this piece of news to die down. But I'm telling you all now that that isn't possible. I'll be here every day, scolding him and keeping this piece of news going."

"D\*mn. I, on the other hand, believe in Master Lin. Do you think something like this can be developed in just a few days?"

"That's right. If Master Lin says that he can develop it, he will definitely be able to develop it. I have absolute faith in him."

"If Master Lin manages to develop it, it would really be great. My son is seventeen this year. Because of a car accident, his leg had to be amputated. Right now, he's just staying at home every day, unable to go out. Just seeing that pains me."

“My husband got burnt by a fire at work and his leg was amputated as well. Now... Sigh... I just hope Master Lin will succeed.”

Many people on the Internet were paying attention to this incident. Some of their family members had gotten into similar accidents in the past. Hence, when Master Lin made that Weibo post, a glimmer of hope had appeared in their hearts.

Some others simply had faith in Master Lin and were here to support him.

Some artificial limb specialists would pop out occasionally to add a few comments. They definitely wouldn't believe this even if they were beaten to death.

Especially after so many days had passed without any updates, how could they believe it?

This Master Lin didn't even have a team of specialists, yet he wanted to develop such a thing. They felt that it was a complete joke.

Right now, Lin Fan had returned to the research lab and continued his development.

Meanwhile, Wang Ming Yang was going to bring Little Mei Mei to the government to propose their collaboration on this project.

Money was secondary. According to the wishes of his brother, this would be treated as a charity project.

Chapter 1144: Collaboration established

Two days later!

Lin Fan was in the research lab, producing sets of perfect artificial limbs one by one. Although it took very long, he would definitely be able to resolve the problem for the children in Nanshan Children's Welfare Institute.

\*Ding ding!\*

Lin Fan answered the call.

"Brother Lin, how are things going?" asked Zhao Zhong Yang anxiously through the phone. He didn't know how the situation now. Brother Lin hadn't been to Cloud Street in a few days. Initially, Zhao Zhong Yang hadn't dared to call for fear of disturbing Brother Lin.

But as time passed, and with the rest of them in the shop urging him, he decided to call.

"Things are going pretty well."

Zhao Zhong Yang: "Brother Lin, does that mean you've succeeded?"

He didn't ask too directly. If Brother Lin didn't answer this question, he wouldn't ask more. However, he felt that it would have a pretty big impact on Brother Lin if it failed.

After all, there was the situation on the Internet. A lot of people were waiting to laugh at Brother Lin.

Zhao Zhong Yang really felt helpless about those people. They were a bunch of people with nothing better to do than to laugh at others.

In the research lab, Lin Fan finished producing another set of artificial limbs and said with a smile, "Of course I succeeded. Don't you know who I am? If I fail on something like this, it would mean that I've wasted my whole life."

"You've really succeeded?" Zhao Zhong Yang was thrilled. His tone suddenly went very high as if he couldn't believe it.

Lin Fan replied, “Yes, really. Why would I lie to you? If there’s nothing else, I’m hanging up. I still have to make a few more artificial limbs. When I’m done here, I’ll head back.”

Lin Fan was busy working. In these two days, he had helped many of the children from the welfare institute regain working limbs. Although they weren’t real limbs, these limbs allowed the children to move about like normal people.

“Mmm. We’ll be waiting for you at the shop.”

They hung up.

Cloud Street!

Wu You Lan immediately came over and asked, “How is it? Did Brother Lin succeed?”

Zhao Zhong Yang nodded. “Mmm. He succeeded. Judging by his tone, there weren’t any problems at all. But I still don’t know the full situation.”

Fraud Tian commented from the side, “Are you all stupid? What are you still waiting here for? If you want to know, why don’t you just go straight to the welfare institute?”

“You’re right!” Zhao Zhong Yang suddenly realized that, then said to Fraud Tian in surprise, “Fraud, you’re actually really wise! You even thought of something like that. Let’s go. We’ll go to the welfare institute right now to check out the situation.”

“Alright.” Wu You Lan was now very curious about this matter. She wondered what exactly had happened.

Nanshan Children’s Welfare Institute.

Wu You Lan and the rest appeared.

“Why are you all here?” Han Lu asked curiously when he saw them.

“We came to take a look at the situation,” said Zhao Zhong Yang.

Hearing that, Han Lu instantly smiled. “That’s a good idea. Master Lin is really too incredible. I have to respect him. Let’s go. I’ll bring you to see how the children are doing.”

Even though two days had passed, Han Lu was still thrilled when this matter was brought up.

Lil’ Fatty brought Little Mei Mei to play in the courtyard and they were running around crazily, so were the other children.

Wu You Lan was startled. “Isn’t something different here?”

Han Lu pointed at those children. “Can’t you tell what’s wrong with these children?”

“What’s wrong?”

The group of them strained their eyes, trying to take a closer look but they couldn’t find anything wrong at all. “What’s wrong? I can’t see anything wrong with these children.”

“Yeah, these children seem really happy running around. But it isn’t good to run around so vigorously. They might collide into something or trip over.” Fraud Tian nodded in agreement. He had no idea what Han Lu had brought them here for.

Han Lu smiled. “Can you really not tell?”

“Nope.” Everyone shook their heads. Then, Fraud Tian suddenly jolted in shock. He said in disbelief, “Don’t tell me that these children...”

Seeing Fraud Tian’s shock, Han Lu nodded. “Mmm. Your guess is right. These children were all previously crippled. But now, after putting on Master Lin’s perfect artificial limbs, they can run and jump as they want. You couldn’t tell, could you?”

“Actually, it’s not just you. Even I wouldn’t have been able to tell if I hadn’t known.”

“D\*mn. Those are actually artificial limbs. But they don’t look any different from real limbs. They’re so nimble. Can artificial limbs really do that?” Zhao Zhong Yang was dumbfounded and he couldn’t believe it.

“Little Mei Mei, come here,” Han Lu called out to the little girl beside Lil’ Fatty.

Lil’ Fatty held Little Mei Mei’s hand as they came over to Han Lu.

“Uncle Han,” Lil’ Fatty and Little Mei Mei greeted.

“Lil’ Fatty, why didn’t you greet me when you saw me?” Fraud Tian pinched Lil’ Fatty’s face as he asked.

“Hehe,” Lil’ Fatty giggled. “Hello, Grandpa Tian.”

Zhao Zhong Yang went forward and rolled up Little Mei Mei’s pants. When he saw what was underneath, he couldn’t help but be stunned. “This is incredible.”

Fraud Tian was looking as well. Those legs were too nimble. They seemed like real legs. It was really astounding.

Han Lu smiled. “If you ask me, it’s Master Lin who’s incredible.”

Over at the government side.

Wang Ming Yang had started working on this matter. He wouldn’t look for just any leader because it would be useless. Instead, he went straight to the most powerful leader in Shanghai.

He had already recorded videos and gotten through some procedures to prepare for the discussion.

When he had brought this matter up to some leaders previously, no one believed him. They felt that Wang Ming Yang was just boasting or perhaps he was bluffing.

Hence, they hadn’t paid much attention to this matter at all.

This time, Wang Ming Yang was looking for the biggest leader in Shanghai. He hoped that they would find a good way to collaborate on this project. According to his brother's wishes, the price definitely couldn't be too high.

When Wang Ming Yang met Secretary Chen and they looked through the information and documents, Secretary Chen paid a lot of attention. When he found out that these limbs were developed by Master Lin, Secretary Chen was shocked.

The last time he had met Master Lin was for the construction of the apartment building. But he hadn't expected something like this to happen not long after.

To him, this was great news!

Thinking about how Master Lin was actually willing to collaborate with the government in distributing these artificial limbs, Secretary Chen was speechless.

He had met many people before.

But he had never met someone who would give away a fortune that was put in front of him.

After Wang Ming Yang had explained Lin Fan's intentions, Mayor Chen immediately nodded. As long as they could maintain the flow of production, he didn't demand a high price. He would abide by Master Lin's intentions.

Chapter 1145: Master Lin has appeared!

Another few days later.

In this period of time, Lin Fan had completely immersed himself in production. He felt that he had gotten better and better at it. The core contents were inputted into the machines. Also, Wang Ming Yang had given him a very good piece of news.

Wang Ming Yang had managed to reach the initial stages of collaboration with the government and they had even come to an agreement regarding the price.

Initially, when Wang Ming Yang had presented the product to the leaders, they had thought that such a perfect artificial limb would definitely be very expensive, at least several tens of thousands in cost. But when they found out that it only cost two thousand dollars to produce, they were completely stunned.

They felt that it was impossible.

A leader had suggested to price it at around ten thousand. But once this was suggested, Wang Ming Yang immediately declined. He would follow his brother's instructions and he definitely had to price it at the lowest possible price. It was absurd for that leader to suggest ten thousand dollars.

However, what surprised Wang Ming Yang was that the other leaders actually agreed with that suggested price and they felt that it was very appropriate. After all, to them, this perfect artificial limb was very impressive indeed. It was much more advanced than the other artificial limbs on the market.

It was so advanced that they couldn't quite believe it.

Then, when Wang Ming Yang announced the final price, everyone was stunned.

"Three thousand dollars!"

To them, three thousand dollars was way too cheap. They couldn't quite accept that.

Wang Ming Yang immediately revealed that this artificial limb had been developed by Master Lin and it wasn't meant to be used to generate income. If the government wouldn't accept it, Wang Ming Yang would just bring the product into the market on his own.

However, Secretary Chen slammed the table and decided on the spot to begin producing the artificial limbs and bring them into the market as Master Lin intended. At the same time, he initiated a discussion regarding the issue of other artificial limb companies in the market.

After all, if these perfect artificial limbs were to be released, it would have a great impact on those companies.

But it couldn't be helped. This was an inevitable problem that came with any reform.

Cloud Street!

Lin Fan was feeling refreshed and energetic. After working hard for this period of time, he had already finished producing artificial limbs for all those crippled children of the welfare institute. He really felt amazing.

When he reached the shop and Fraud Tian and the rest saw him, it was as if they were looking at an amazing person. They were all so excited that they didn't know what to say.

"Kid, you're finally back. If you still didn't come back, I would have thought that you were so addicted to your research that you couldn't stop."

Zhao Zhong Yang and Wu You Lan came over as well. They were all in immense admiration of the things Brother Lin had done. They had no idea how to even express their admiration. They could only say that he was amazing.

"Haha. I was busy doing big things," said Lin Fan with a laugh, "How is it? Judging by your expressions, you probably already know about the perfect artificial limbs."

Zhao Zhong Yang nodded. "Mmm. We all know about it. We specially went to the welfare institute to take a look. These perfect artificial limbs are really too amazing. If they wear clothes over those artificial limbs, you wouldn't even be able to tell that those are artificial limbs."

Lin Fan grinned. "Of course. Don't you know who made those artificial limbs? But this matter isn't over yet. I've resolved the situation at the welfare institute but there are still many people outside that are just like those children. That's why I've gotten Wang Ming Yang to talk to the government to start spreading these artificial limbs to the masses. I think it should be done soon."

"That would really be amazing!" Zhao Zhong Yang exclaimed. At the same time, he thought that if these were to be spread to the masses, those artificial limb companies would probably be miserable.

However, since they were collaborating with the government, the government definitely wouldn't let those companies take too great of a hit. The government would probably find a solution.

Of course, this matter was out of their hands. It was the government's concern now.

On the Internet.

Lin Fan took out his phone. He hadn't posted anything on Weibo in a long time. If he were to remain silent for any longer, those netizens might start to forget about him.

"Ah, after being secluded for so long, I'm finally out. I can finally let loose now."

When this post was sent, the netizens instantly boiled over with excitement.

"D\*mn. Master Lin has finally appeared."

"Where the heck has he been recently? I didn't see any updates from him and I even thought that he had run away."

"Master Lin, how is the perfect artificial limb research going? A lot of people are mocking you. You have to show them your true abilities."

"Some specialists have been talking a lot recently. You have to teach them a lesson."

"Master Lin, did you manage to develop it or not? They're all saying that you haven't appeared recently because you were waiting for the news to die down. But some people are deliberately bringing up the topic and not letting it go."

The netizens kept commenting below the post. They were very curious about this matter and they were all wondering what exactly was going on.

However, judging by the situation, something didn't seem right.

Master Lin hadn't said anything after sending that post. To them, it really seemed like he was avoiding the problem.

At that moment, the official Weibo account of Bor Artificial Limbs Company made a post.

"Master Lin, have you successfully developed it? How is it? How are the perfect artificial limbs? Our company has recently released a new product, which is an improved version of our previous product. Right now, it is only priced at \$48,000 and it will change the lives of our crippled friends."

When Bor Artificial Limbs Company sent that post, many netizens commented below it.

These netizens were all either crippled or they had family members who were crippled, so they paid special attention to these companies. They would always pay attention to the latest updates. When they saw that Bor Artificial Limbs Company had released a new product, they were excited.

However, when they saw the price, they were stunned. This was too expensive and it was difficult for them to accept it.

But when they thought about the condition of their bodies, they had no choice but to accept it.

When Lin Fan saw Bor Artificial Limbs Company's post, he commented as well. "You're selling your product at too high of a price. People won't be able to afford it."

Bor Artificial Limbs Company: "Expensive? This isn't expensive at all. This is a very high-tech product."

Lin Fan continued to comment. "The perfect artificial limbs that I've produced will be sold for just three thousand dollars. And all the materials used are very good too. You're too greedy."

Bor Artificial Limbs Company: "Master Lin, please mind your words. We're already offering a very generous price. What could a three thousand dollar artificial limb possibly do? You must be joking. Talking to an outsider like you about this subject is like talking to a cow about feelings."

Meanwhile, when the netizens saw Master Lin's reply, they were astonished.

Three thousand dollars?

What kind of artificial limbs are those?

Chapter 1146: This is way too domineering

The netizens couldn't sit still anymore. Initially, they hadn't known what the situation was like but after seeing Master Lin say that the artificial limbs would be sold for three thousand dollars, they were completely dumbfounded.

In their minds, there was no way it could be so cheap.

Three thousand dollars? What kind of f\*cking artificial limbs would that be able to buy? Is this a scam?

"Haha. I'm dying of laughter. I feel that this Master Lin has completely lost his mind."

"I think so too. A three thousand dollar artificial limb? Why not three hundred dollars?"

"I'm prostrating in admiration. I don't even know how to describe Master Lin anymore. I can only say that he is truly f\*cking awesome."

"It's clear that he doesn't know anything about artificial limbs. Three thousand dollars? That wouldn't even be enough to buy the materials needed for an artificial limb. I've given up on him."

In an instant, the people on the internet had been riled up.

Regarding this matter, they didn't want to say much. To them, it seemed that Master Lin was just boasting.

Cloud Street.

Zhao Zhong Yang looked helpless. “Brother Lin, look at the situation on the Internet. They don’t believe you at all!”

Lin Fan looked helpless as well. “That’s troubling me as well. What do you think I should do?”

“Hahaha,” Fraud Tian chuckled. “Kid, you’re too treacherous. If you release those products, I can guarantee that it would shut all of them up.”

“Hehe,” Lin Fan laughed and looked at the comments on Weibo. Right now, he was very calm. He was going to take things slow. He was in no hurry. This matter would be left to Wang Ming Yang to handle.

Wang Ming Yang and Secretary Chen had already reached an agreement.

And Lin Fan didn’t bother about this at all. He just wanted the patent to be registered to his name and the rest could be left to Wang Ming Yang.

At that moment, the surrounding shop owners gathered around.

“Little Boss, why aren’t you taking care of the matter on the Internet?” asked Elder Liang. He already knew about the situation at Nanshan Children’s Welfare Institute. He was very moved by it. He had not expected that such a day would really come.

“Soon. Not long from now, I will be able to take care of it,” said Lin Fan with a smile.

However, there was something giving him a headache right now. Why hadn’t the task completion notification come from the Encyclopedia yet? Could it be that he would have to wait until the very end for it to be completed?

If that was the case, he would probably have to wait for quite a long time.

In the afternoon.

As Lin Fan was looking at the situation on Weibo, something that he hadn’t expected happened.

Reporters charged towards him from all corners. They were very curious since Master Lin had come out from the research lab. They were wondering what the final outcome was.

Master Lin had disappeared for a long time and they had been waiting the whole time as well. They were also wondering how those perfect artificial limbs would turn out.

Before getting an answer, they wouldn't be able to relax.

"Master Lin, could you answer some questions from us?" the reporters shouted from outside the shop as they held their cameras. They were genuinely curious about this matter.

They had all seen the situation on Weibo. To them, it was difficult to make any comments before the final product came out.

Lin Fan looked at the reporters outside and sighed. They really are crazy. I just came out and they've already come here. That's really insane.

But it looks like I have no choice but to give them some answers.

"Alright. Ask me whatever you want," said Lin Fan.

A male reporter raised his hand and said excitedly, "Master lin, may I ask if they perfect artificial limbs have been developed?"

At that moment, all the reporters were in anticipation. This was the question that they were most concerned about. They were all wondering how the situation was.

Lin Fan nodded." It's been developed."

Another reporter yelled, "Master Lin, since it's been developed, can you let us take a look at the product?"

Lin Fan waved his hand helplessly. "The products are already being used. I don't have any more at the moment."

“Huh?”

The reporters were stunned. They were clearly in disbelief. To them, it seemed to unreal.

However, they had an exceptional relationship with Master Lin. They definitely wouldn't think that Master Lin was lying just because of that.

“Master Lin, then when will the products be shown to the public?” asked the reporters.

Lin Fan replied, “Very soon.”

A reporter asked, “Master Lin, is it true that these perfect artificial limbs will only be sold for three thousand dollars? According to those artificial limb companies, this is not even enough to cover the manufacturing cost.”

Lin Fan shook his head. “I don't know if it's enough for their manufacturing costs but it's definitely enough to cover my manufacturing cost. My manufacturing cost is only about two thousand dollars per unit. As for why I'm selling it at three thousand dollars, that's because we need a bit of income to keep the production going. Otherwise, I would sell it at the manufacturing cost.”

When the reporters heard that from Master Lin, they were momentarily stunned. They believed what Master Lin was saying. Master Lin probably really wasn't concerned about earning money.

But were these perfect artificial limbs really that amazing?

“Master Lin, how do you think your perfect artificial limbs compares to those artificial limbs on the market?” asked a reporter.

However, when this reporter asked this question, the other reporters suddenly looked at him and seemed a little angry.

“F\*ck. Where is this guy from? What kind of question is that?”

“Are you here to cause trouble? You’re actually asking how Master Lin’s perfect artificial limbs compare to those on the market? Are you trying to make things difficult for Master Lin?”

The reporters knew Master Lin very well now. Moreover, they really liked Master Lin. Now that a reporter had actually asked such a question, it seemed as if that reporter was trying to make things hard for Master Lin.

If Master Lin were to say that his perfect artificial limbs were better, he would be offending the artificial limb companies.

If he were to say that they were not as good as those on the market, he would be admitting that he was inferior.

The reporters were very displeased about that question. They felt that that reporter was just looking for trouble.

Who does he think he’s interviewing?

When the reporter who asked that question saw the glares from the other reporters, his heart started thumping furiously. This is just a normal question, isn’t it? Why is everyone so angry?

Although he was new to this job, he really put his best efforts into his work.

“Why did you ask that question?” A senior reporter pulled him from behind and glared at him. Then, the senior reporter said hastily, “Everyone, this kid is new and he doesn’t know the rules. Please excuse him.”

When Master Lin saw that, he waved his hand and said, “Alright, alright. There’s nothing wrong with that question. I can tell you outright that my artificial limbs are much better than those on the market.”

“Moreover, you can all publish articles to tell those artificial limb companies to quickly lower their prices. Tell them to stop selling at ridiculous prices.”

When the reporters heard this reply, they were instantly dumbfounded.

This Master Lin is way too domineering.

## Chapter 1147: Immense shock

After the reporters all left, Lin Fan stood at the entrance with a bright smile. He had absolute self-confidence regarding this matter.

The perfect artificial limbs were definitely perfect. There wouldn't be any problems at all.

\*Ding ding!\*

At the moment, his phone rang. It was from his parents who were all the way in Zhongzhou.

It seemed that this incident had drawn their attention. Lin Fan answered.

His mother said worriedly, "Son, how's the situation on the Internet lately? Why am I hearing that you're going to develop artificial limbs? Did something bad happen?"

Lin Fan smiled. "Mom, there's no problem. That's just what the Internet is saying. I've actually already developed it."

Mama Lin: "If you've already developed it, why are so many people scolding you on the Internet?"

Was Lin Fan supposed to tell his mother not to care about those people? It didn't make sense.

"Mom, don't worry about this matter. The artificial limbs are a success. Recently, we've been in talks with the government and I haven't been bothering about the situation on the Internet. It will be settled in a few days," Lin Fan assured her.

At that moment, his father's voice rang out, "Son, do your best! Your dad believes in you."

Lin Fan smiled. "Mom, tell dad not to worry. It will be fine."

Mama Lin: "That's good. When I saw the situation on Weibo, I thought you were in trouble. If there are no problems, that's good. Your dad and I will be able to relax."

Then, they chatted a while more before hanging up.

Fraud Tian gave a thumbs up. "F\*ckng awesome. What you said in front of those reporters was quite admirable."

Lin Fan smiled. "It's nothing. I shouldn't even have to explain all this. When Wang Ming Yang's discussion with the government is settled, it will be publicly announced."

"But I really respect you, kid. You really didn't choose to sell it yourself. That would have earned you a lot of money." Fraud Tian really respected that decision. He had seen those artificial limbs and they were simply perfect. If Lin Fan were to manufacture and sell the artificial limbs himself, he would definitely dominate the market and become rich in an instant.

Lin Fan waved his hand. "You don't need to respect me for that. Money is nothing to me. It's not even worth mentioning. If I wanted this kind of money, I would have become rich a long time ago. Do you believe me?"

"I believe you. I believe whatever you say." Fraud Tian nodded. He would never doubt this kid's words.

Even without the artificial limbs incident, the number of diseases the kid had cured was enough to make Fraud Tian respect him.

The next day!

The news came out on the Internet.

'Master Lin has already successfully developed the perfect artificial limbs.'

‘Master Lin warns artificial limbs companies not to sell at ridiculous prices. Don’t regret it when it’s too late.’

‘Master Lin has personally said that his perfect artificial limbs are much better than any artificial limb on the market.’

When the netizens saw this situation on the Internet, they didn’t know what to say.

‘I’m maintaining neutrality in this matter. He’s just boasting every single day. I don’t even know what to say anymore.’

“Me too. All this scolding is really tiring.”

“Master Lin is f\*cking awesome. I absolutely believe in him.”

“I trust that the perfect artificial limbs developed by Master Lin are definitely very amazing. Those on the market definitely can’t match up to them.”

Bor Artificial Limbs Company was helpless when they saw the news. They had been battling against Master Lin on the Internet for the past few days and they didn’t even want to say more. But they hadn’t expected that this Master Lin would provoke them even further.

Don’t sell at ridiculous prices? He must be joking!

Bor Artificial Limbs Company: “Master Lin, our company doesn’t want to say anything more to you. Please conduct yourself with dignity.”

Arc Artificial Limbs Company: “Our artificial limbs are all high-tech and reasonably priced. You don’t have to worry about us, Master Lin.”

Lin Fan was now very famous. He had so many haters on the Internet that it was scary. Hence, the number of people scolding him in the comments was scary as well.

“That Lin is trying to generate hype again. I give up.”

“That’s right. If he isn’t anything special, he should just stop pretending. Perfect artificial limbs? Why don’t you show us instead of bragging so much?”

“F\*ck!”

At that moment, a netizen cursed.

“Hurry up and take a look at Shanghai’s official Weibo. Something big is going to happen!”

“What’s going on?”

“Just go and see for yourself. I’m shocked. When I saw that video, I was completely stupefied.”

Many netizens had no idea what was going on but when they saw these comments, they became very curious. Then, they immediately went to see what Shanghai’s official Weibo had posted.

When they saw the message from Shanghai’s official Weibo, they were all stunned.

Shanghai Official Weibo: “Our department is collaborating with Eastern Han Group to manufacture the perfect artificial limbs developed by Master Lin. These artificial limbs will be officially named ‘Run My Life’. This will be the biggest development in the history of artificial limbs. We have also invited some of the children from Nanshan Children’s Welfare Institute to exhibit the capabilities of the perfect artificial limbs. Furthermore, we’d like to thank Master Lin for his selfless contribution. These artificial limbs, which cost over two thousand dollars to manufacture will officially retail for three thousand dollars.”

When the message was posted on Weibo, everyone was dumbfounded.

Meanwhile, some netizens clicked on the video. The video was of a scene at Nanshan Welfare Institute.

Little Mei Mei appeared in front of the lens and she was in her wheelchair. “Director, I want to run.”

But because she had lost her legs, she had no way to get off the wheelchair. At that moment, Director Huang brought the perfect artificial limbs over. Then, the incredible function of the artificial limbs allowed them to fuse perfectly with Little Mei Mei's body.

After the limbs had fused to her body, Little Mei Mei jumped off the wheelchair and landed stably on the ground. Then, she started sprinting away like a little rocket man. She even kicked a ball on the ground playfully as she passed it.

The scene changed and she was going to take a bath.

Little Mei Mei went into the bathtub, then lay down and played with the water. She didn't even remove the artificial limbs.

After that, more children appeared.

Some of them had missing arms. But after putting on the perfect artificial limbs, they were able to hold chopsticks, use pencils and do all kinds of things without any problem at all. They did all these very nimbly and with great ease.

At that moment, the netizens watching the videos stared blankly at the screen with their mouths gaping. They were clearly in disbelief. It was as if they had seen a ghost.

"This is too f\*cking unreal, isn't it?"

"D\*mn. It's f\*cking waterproof? And are those movements really possible with artificial limbs? If I didn't see them put on the artificial limbs, I wouldn't even believe that they were doing all those things using artificial limbs."

"D\*mn..."

Chapter 1148: Organized protest

"Is this for real? Could it be some kind of act?"

“Act my a\*s. Take a closer look. This post was uploaded by the Shanghai Official Weibo. Do you think they would spread false information?”

“Are those really the artificial limbs developed by Master Lin? That’s too f\*cking incredible, isn’t it?”

“These artificial limbs can be used to run like that and kick like that and they can even be worn when showering. That’s way too valiant. And did you guys notice how the artificial limbs attached to their bodies? It was like a seamless connection!”

“I’ve watched it several times already and I watched it very closely. It really seemed like a seamless connection.”

“These artificial limbs are only retailing for three thousand each? You’ve got to be kidding me!”

“Can’t you see for yourself? The Shanghai Official Weibo has already stated that it will only be three thousand each. That’s too d\*mn cheap. And did you see the description? These artificial limbs can automatically adjust themselves. When children use these artificial limbs, they wouldn’t have to be afraid of growing out of these artificial limbs. These artificial limbs will automatically adjust according to the user’s growth. That’s way too valiant.”

“D\*mn. I understand now. It turns out that Master Lin wasn’t bragging at all. He really succeeded.”

“Haha, I told you so. How could someone as awesome as Master Lin be bragging? You guys didn’t believe me. Now that you’ve seen the outcome, what do you have to say?”

“I’m convinced. I have nothing more to say. He’s f\*cking awesome.”

In an instant, the Internet had completely blown up.

In a certain city, a young man saw the video and leaped up from his seat. Then, he started hurrying home excitedly.

When he saw his wife lying on the sofa and watching the television, he approached her delightedly.

“Wife,” the young man hollered. But his wife, who was lying on the sofa, just nodded dully.

The young man started playing the video and fast-forwarded it before passing it to his wife. “Wife, take a look at this video.”

The woman looked at the video. In the video, children were happily running around, kicking a ball around. She was very jealous. In the past, she used to be like this as well. But after a car accident, her life had changed.

She used artificial limbs too but she felt that it was very uncomfortable. When she walked, it felt very strange. When others looked at her, it was clear that she had a problem with her legs. Moreover, the cold metal on her artificial limbs always made her feel miserable.

“Did you see that?” the man exclaimed excitedly.

The woman nodded. “I did.”

“I’m asking you if you could tell what was wrong with those children,” said the man.

The woman shook her head. “There’s nothing wrong with them. They’re all very happy and cheerful.”

The man rewound the video to the first scene. “Take a look at this.”

The woman turned her head to the phone. When she started watching the video, she couldn’t turn her head away.

That child in the wheelchair had both legs crippled and she looked very pitiful. But as the video continued to play, she saw an old lady bring a set of artificial legs over and the girl put them on.

Then, upon putting on the artificial legs, the girl completely changed. She suddenly became extremely nimble.

“How is that possible?” the woman said in disbelief.

The man replied, "It's real. These are the perfect artificial limbs developed by Master Lin. Look at all these children. They are all disabled but, after putting on the artificial limbs, they seem completely normal."

"Could it be fake?" The woman looked up at the man. She knew who Master Lin was but the scene shown in the video was really hard to believe.

The man said excitedly, "How could it be fake? These were developed by Master Lin and the Shanghai government's official Weibo account already announced that they will be collaborating with Eastern Han Organization to manufacture it."

"Then it must be very expensive," said the woman. They weren't very well-to-do. In her mind, such perfect artificial limbs were probably very expensive. They might even cause up to \$200,000.

"It's not expensive at all. It only costs three thousand dollars each," said the man. He hadn't expected such perfect artificial limbs to be sold for just three thousand dollars. In the past, he had bought a set of artificial limbs for his wife for over twenty thousand dollars but those weren't good at all.

The woman's eyes widened as she muttered in disbelief, "Three thousand dollars..."

...

In Bor Artificial Limbs Company's conference room, all the executives were sat. They had just received the notice and they had quickly called a meeting. They had no idea what had happened but they all turned silent upon watching the video.

"Do you think that our product can be improved to such a standard?" the boss spoke with worry written all over his face.

After watching the video, his first thought was that it was definitely a f\*cking act. How could those artificial limbs be so f\*cking awesome?

But later on, he understood that it was all real. Because this video had been posted by the Shanghai government. How could it be an act?

If those artificial limbs were really as good as the video showed, there was only one outcome for the company. They were done for. They were completely and undeniably done for.

“It can’t.”

“Boss, it must be an act. How could an artificial limb possibly do all that?”

“Yeah. They look way too nimble. The video is definitely fake.”

“Even the most high-tech artificial limbs in the world aren’t as good as these.”

“Look at how they connect so seamlessly. It’s obviously fake.”

The executives of the company kept rambling one after another. They couldn’t believe what was in the video at all. It was really too unreal.

It was so unreal that it was scary.

“No, this is real. These are the perfect artificial limbs developed by Master Lin.”

When the boss of the company said this, everyone on site was astounded. One of them shot up from his seat.

“That’s not possible. That Master Lin doesn’t even understand this line of work, how could he develop this?”

The boss looked at him. “Then tell me. What is this?”

“This...”

Everyone was lost for words. They didn’t know how to reply to that.

They suddenly realized that this situation was about to become terrifying. If the video was real and those artificial limbs were to appear on the market, they would be completely done for.

Moreover, the most important part was that these artificial limbs were too f\*cking cheap.

Three thousand dollars? How could they compete against that?

At that moment, Bor Artificial Limbs Company wasn't the only one in distress. All the other artificial limb companies were the same.

There weren't many people in this line of work and there were even less who were successful. The market could be said to be dominated by just a few companies. Hence, the price of artificial limbs was very high.

After all, these were high-tech products, not just normal products.

But now that these perfect artificial limbs had appeared, they had been met with a brick wall.

"No. We can't just sit idly by. We have to protest. We have to file a lawsuit. These perfect artificial limbs from Master Lin would monopolize and ruin our marketplace."

"That's right."

At that moment, throughout the country, all the artificial limbs companies banded together and decided not to sit idly by. Otherwise, they would be heading towards a dead end.

Chapter 1149: I really didn't do anything wrong

These artificial limb companies felt that a tragic situation had suddenly appeared. Those sales agents were all sending feedback to their companies, saying that Master Lin's perfect artificial limbs had been developed.

They only cost three thousand dollars. It was too big of a hit for the companies. They couldn't sell their products at all because the citizens were all waiting for those perfect artificial limbs.

On a certain artificial limb forum.

Disabled people from all over the country were gathered on this forum to discuss the quality of different brands of artificial limbs. They would also talk about how to repair certain problems with their artificial limbs.

There were also some recently crippled people who had been unable to accept the reality of their situation. But when they started getting involved in this forum, they found a place of belonging.

On top of that, there were some kind people who appeared on the forum to provide counseling for the disabled people and alleviate their psychological troubles.

However, there was a certain thread today which had been pushed to the top of the forum. Countless people were commenting on it.

"Have you guys taken a look at Weibo? Master Lin's perfect artificial limbs are going to be released."

"I saw it. I don't think it's fake. It was posted by Shanghai's official Weibo account. Moreover, they are manufacturing it in collaboration with Eastern Han Organization. I saw the video too but I'm a little doubtful. Are they really as good as the video shows?"

"Yeah, I'm very curious too. The scenes shown in the video were way too shocking. I don't even dare to believe it. Can artificial limbs really be so nimble?"

"Definitely. I trust Master Lin. Moreover, this was posted by the government, it definitely can't be a false advertisement. I'm just eagerly waiting right now. When will these perfect artificial limbs be released? Three thousand dollars is way too cheap. It's truly a generous price. Compared to those artificial limbs that sell for tens of thousands, this is much better.

"Yeah! I bought an artificial limb for over thirty thousand dollars and it still has all kinds of problems. Putting it on is so tiring. I can't tolerate it."

“Some families are very poor. Those who can’t afford artificial limbs have no choice but to remain immobile. But now that these artificial limbs are going to be sold for three thousand dollars, it wouldn’t be a problem at all. And if you ask me, the government and Eastern Han Organization will probably have policies to take care of those financially needy disabled people.”

“Master Lin is really too awesome. In the past, he conquered different kinds of diseases. Now, he has developed artificial limbs. I don’t even know what to say anymore.”

“I’m a fan of Master Lin. Actually, I knew that this would happen long ago and I’ve just been waiting for it. My mother wanted to buy artificial limbs for me but I declined. I was waiting for Master Lin’s perfect artificial limbs to be developed. It seems that it hasn’t been in vain. I’m thrilled!”

On the forum, the netizens were discussing intensely. Over here, all of them were in the same situation and they didn’t feel inferior. No one would look down on them.

Now that Master Lin had developed perfect artificial limbs, they felt very hopeful.

Cloud Street!

Lin Fan was lying there when his phone suddenly rang.

When he saw that it was an unknown caller, Lin Fan’s brows furrowed as he wondered who it was.

He answered.

Before Lin Fan said anything, a voice came through the phone.

“You’re Master Lin, aren’t you? Let me tell you that you will be in trouble. You b\*stard, I’ll slash you to death.”

“Retard.”

Lin Fan immediately hung up. Then, he thought for a moment before picking up his phone and redialing that number.

The call was answered.

“You’re the guy who wants to slash me to death, right? I’m right here at Cloud Street waiting for you. Come and slash me to death then,” said Lin Fan. He hadn’t expected someone to call him and threaten him at such a time.

Thinking about it, he realized who it was.

It was obvious whose benefits he had taken away.

“You b\*stard, I’m warning you to humble yourself. Otherwise, no one will be able to save you.” That voice came through the phone once more.

Lin Fan smiled. “I can’t humble myself, nor do I need anyone to save me. I’m right here at Cloud Street. Come and slash me to death. Are you going to come or not?”

“Just you wait.”

“Okay, I’m waiting.”

“Don’t think that I’m kidding you.”

“Okay, I don’t think you’re kidding me. I think you’re saying the truth.”

“F\*ck your mom. You’re too arrogant.”

\*Clatter!\*

The person on the other end of the call hung up. He seemed furious.

Wu You Lan asked curiously, “Brother Lin, who was that?”

Lin Fan shrugged. “I don’t know either. He just told me to watch out because he’s coming to slash me to death. But I told him to come. I wonder if he’ll come.”

Fraud Tian said helplessly, “Sigh. People these days are too violent. Whenever they’re not agreeable with something, they want to slash someone to death. But this guy is really brave. If he really dares to come and slash you, I would respect him for being a brave man.”

Zhao Zhong Yang said, “Fraud, you’re really bad with your words. If Brother Lin gets slashed to death, who’s going to pay your wage?”

Fraud Tian laughed. “You must be joking. If anyone can slash him to death, I, Fraud, will eat sh\*t.”

Wu You Lan said worriedly, “Brother Lin, it wouldn’t be a problem, would it?”

“It would.” Lin Fan’s expression was very stern. “Just now, I’ve already been threatened. My life is being threatened. This must be reported to the police. I need to look for the police’s help.”

“Huh?”

Wu You Lan was stunned. It was as if she didn’t understand what Brother Lin meant. But then, she suddenly understood.

The next moment, Brother Lin made a call. “Hello, is this the police? I just received a threat. Someone said he wants to slash me to death and he told me to watch out. I’m very afraid now. My life is in danger. I’ve already recorded the call. Yes, I will send the recording to you. And I’ll give you his number too.”

“My name is Lin Fan. My identification number is...”

The person on the other end of the call said in astonishment, “You’re Master Lin?”

“Yes, I am. I just received a death threat,” said Lin Fan.

“Alright, we’ll look into the location of the caller and identify the owner of that number.”

At a certain artificial limb company.

An executive of the company had just put down the phone and felt great.

“D\*mn. That Lin just has to meddle around every day. He even tried to mess with me. He’s just looking for death. If I don’t scare you to death today, I would eat sh\*t.

“Perfect artificial limbs? Is he trying to screw us over? F\*ck. Just thinking about it makes me angry.”

A Mediterranean man had a fierce expression on his face as he felt an indescribable resentment towards this Master Lin who had gotten in the way of his wealth. If it hadn’t been for this Master Lin, his artificial limb company wouldn’t have turned out like this.

\*Ding ding\*

At that moment, his phone rang. When he looked at it, he saw that the number of the caller was 110.

What the f\*ck? Why is the police calling me?

He answered.

“Hello, is this Zhao Da Hai? Please come over to the police station immediately. We have to conduct investigations on you.”

“What for? I didn’t commit any crime.”

“Someone reported you for threatening his life through the phone. We need you to cooperate with us.”

“I didn’t do anything wrong. Why should I go?”

“Please come to the police station in the afternoon today and cooperate with us. If we wait until you really commit the crime, a life would have been lost.”

“F\*ck. I...”

Zhao Da Hai was dumbfounded. What the f\*ck is going on? Can’t I even make a call and say some harsh words?

Chapter 1150: Whatever you say

He didn’t care about that death threat call at all.

At that moment, some other calls came.

These calls were all from various investment firms that asked about collaborations or joint distributions. It was a mess. Lin Fan didn’t even know what to say as he felt that it was really strange.

Many people saw this as a business opportunity. They wanted to collaborate with Master Lin and become distributors of those artificial limbs.

Thinking about it, there were many disabled people in the country. If they could sell those artificial limbs to all of them, their wealth would blow up.

Even three thousand dollars was fine. If everyone would buy those artificial limbs, it would add up to a huge amount.

Moreover, these artificial limbs were so impressive. Their agility was scary. Every disabled person in the country would probably buy at least one set each. Adding all those numbers up, it would really be an insane amount.

The path to wealth was just in front of them. All that was left was to see if they could grab this opportunity.

Lin Fan answered so many calls that he was a little dazed. These investment firms were really opportunistic. At such a time, all of them were thinking of getting involved in this. They really had wishful thinking.

The next day!

The news on the Internet instantly blew up.

Reporters were doing a large-scale dissemination of the news shared by the Shanghai government.

‘Perfect artificial limbs have become a reality. Their effectiveness is shocking. These can even be called the King of Artificial Limbs.’

‘The crippled are in luck. These three-thousand-dollar artificial limbs are extremely functional.’

‘Master Lin has produced a shocking miracle once again. Let us step into Master Lin’s world to see what kind of person Master Lin is.’

‘The Shanghai government has stated that they will collaborate with Eastern Han Organization to manufacture the perfect artificial limbs so that the crippled citizens can purchase them as soon as possible.’

‘Eight artificial limb companies from all over the country are expressing their protest: “This is a monopoly! We need to make a living too!”’

‘Bor Artificial Limbs Company has requested for Master Lin to publicize the technology behind the perfect artificial limbs so that they can manufacture them together.’

In an instant, the news on the Internet had shaken the Earth. Countless people around the country were drawn in by the news.

Usually, this kind of news wouldn't draw the attention of many netizens. But because this incident was related to Master Lin, it was sure to make the headlines. ( Boxno vel. co m )

The most important part was that the product described in the news seemed really high-end. It wasn't something that could be matched by any of the other current artificial limbs. To the crippled, this was a great cause for celebration.

"D\*mn. What has happened to this world? How could something so huge happen all of a sudden?"

"Yeah! Master Lin is really generous. He's selling those perfect artificial limbs for three thousand dollars. That's way too cheap."

"That's expensive. Why can't it be even cheaper? It looks like he's trying to earn money again."

"^You're a f\*cking idiot, really. Why don't you go and take a look at how much those other artificial limbs on the market cost? Moreover, Master Lin even said himself that these artificial limbs cost over two thousand dollars to produce. He's selling them at three thousand dollars each in order to maintain the flow of production. That's to pay for the workers' wages and to buy the raw materials. Why don't you pay for the workers' wages instead?"

"Ignore that guy. I've looked through his history of comments. It's clear that this guy has a mental problem. Nothing he says makes sense."

"These artificial limb companies are really miserable. They used to sell their products at such a high price but now, Master Lin has developed perfect artificial limbs. He's crushing them in terms of price and in terms of the functionality of the product. I don't think those companies will be able to last any longer."

"This Bor Artificial Limbs Company is really shameless. They even asked Master Lin to publicize the technology. They should just kill themselves."

"Actually, this is really a big problem. Let's see how the government will resolve this. After all, Master Lin's artificial limbs are too incredible. He's completely crushing the other artificial limbs on the market. Once those perfect artificial limbs start being manufactured, the other companies will definitely be crushed."

In a government unit.

Secretary Chen was having a headache. It was a joyous thing but even so, it had caused quite a bit of trouble.

The artificial limb companies from around the country were protesting. He couldn't just ignore them.

Other provincial leaders had even called to complain about this situation. After all, those artificial limb companies were established in their provinces. If those companies were to be affected by the perfect artificial limbs, they would definitely become bankrupt. Hence, they were hoping to obtain a more favorable agreement.

Secretary Chen was thinking about this matter too. He hoped to come up with a good idea to resolve this situation.

He had thought about publicizing the technology as well. However, it wasn't realistic. It was okay not to earn money from the buyers in the country. However, whether they would try to earn money from outside the country was a question to be discussed.

Wang Ming Yang, on the other hand, didn't bother about this matter. He just wanted to get the factory set up.

However, Wang Ming Yang had been receiving a lot of calls as well.

Each of his past business partners had called to inquire. They asked him whether they could invest in this project. They were all directly rejected by him.

Right now, the plan of collaborating with the government was already very good. They didn't need anyone else to invest in the project. Moreover, if too many people were to invest in it, things would start to change.

He could guarantee that nothing would change initially but he couldn't be sure that nothing would change eventually.

Wu Yun Gang was far away in Beijing. He called Wang Ming Yang as well. Through the phone, he sounded extremely envious.

This made Wang Ming Yang quite pleased with himself. After all, his brother trusted him enough to entrust him with such an important task.

This project had opened up a completely new path for him.

After chatting to the end, Wu Yun Gang hung up. He knew about Master Lin's intentions as well, so he didn't say too much.

However, he couldn't quite accept the fact that the artificial limbs would be sold for three thousand dollars each. If they sold it for such a low price, it would feel like a cheap product.

At that moment, Wang Ming Yang saw his brother's latest Weibo post and was dumbfounded.

Lin Fan: "Those in the mountainous region who are earning less than ten thousand dollars a year may have the artificial limbs for free. This was said by me. If anyone asks you for money, give me a call and I guarantee that I'll resolve it for you. This wouldn't be a problem, would it?  
@ShanghaiOfficial @EasternHanOrganization"

When this post was uploaded, it instantly caused a huge stir.

To the netizens, Master Lin was really too domineering.

Anyone with eyes could clearly see that Master Lin simply didn't care about earning money. Otherwise, he wouldn't sell the artificial limbs for so cheap, nor would he make this Weibo post.

Wang Ming Yang immediately called him. "Brother, once you say that, things will get out of hand."

Lin Fan smiled. "What? Can't I say that?"

Wang Ming Yang: "You've already said it. Am I supposed to slap your face for saying that? Don't worry. I've already discussed this with Secretary Chen. We were definitely going to offer this kind of benefits. But now that you've said that it's going to be free, it will definitely have to be free."

Lin Fan: “That’s the way to do it. Some people in the mountainous regions don’t even earn ten thousand dollars in a year. Three thousand dollars for an artificial limb would be too much.”

“Alright, alright. You’re the boss. Whatever you say.”
