Chapter 12 Refining

This completely scared Liang Yu, knowing what Qin Chen said was true, he could no longer maintain his composure.

"Please tell me the detoxification method. I am grateful." Liang Yu grabbed Qin Chen's shoulder with excitement and said with a trembling voice, his eyes full of pleading.

It happens to be a remote place here, no one saw this, otherwise everyone would be surprised to see Liang Yu begging a young man like this.

Qin Chen said, "Didn't you say that I was alarmist? Why do you believe it now?"

"I don't know Taishan in the next, and I would like your Excellency a lot." Liang Yuyan said with a smile, but his heart was very angry, full of resentment, and secretly said: "First get the cracking method, and then see how I can deal with you!"

Qin Chen glanced at Liang Yu, how he didn't know what he was thinking, but just said lightly: "Let's go."

Liang Yu was startled: "Where to go?"

"Go to your refining room and refining something for me first."

Although Liang Yu was astonished, he still walked ahead and led Qin Chen into the instrument hall.

As a Tier 2 refiner, Liang Yu naturally has his own separate refinery room. Along the way, Liang Yu has a respectful attitude towards Qin Chen. Many people around him have been talking about this scene, wondering who this young man is?

"Arrived."

Not long after, Liang Yu brought Qin Chen into a room with all kinds of refining tools.

"I don't know what you want me to refine?" Liang Yu said solemnly.

Qin Chen took paper and pen, quickly drew the drawing of the Tianmai Shenzhen, and said lightly, "I need you to refine 18 magic needles of this size."

Liang Yu took the drawing indifferently, and looked down indifferently. The original random expression froze for an instant, and gradually revealed a hint of surprise. Then it became shocked, and his heart was greatly impacted.

I saw a very slender black needle drawn on the drawing that Qin Chen gave. It was three inches long. It was spiral in shape. Each part was very fine. The diameter and width of each part were also different. On the thin needles, there are also all kinds of complex inscription runes, which is dazzling.

At first glance, the drawing on the drawing is only a thin needle, but it can be analyzed carefully, but it is extremely delicate, like a work of art, the difficulty is far higher than that of some second-order soldiers.

What surprised Liang Yu even more was Qin Chen's drawing technique, which was completely based on the refined structure, and every detail was depicted to the extreme, which was much more detailed than he had seen many drawings of treasure soldiers handed down from the past. What is alive is a textbook-like forging drawing, and no flaws can be found.

Liang Yu took a deep breath, his eyes converged in shock, and he said: "Although I am a Tier 2 refiner, the sophistication of this needle far exceeds that of Tier 2 precious soldiers. Even if it is Tier 3 precious soldiers, I am afraid it is far away. Why don't you let me refine it?"

"I can't think of anything you can think of, don't worry, I will guide you by the side."

"You?" Liang Yu looked at Qin Chen suspiciously.

But seeing Qin Chen's face calm and not joking at all, his heart was shocked, and he said in a deep voice, "What is the material used for refining?"

"Just use the Black Yao Mingshi you just got!"

"What?" Liang Yu said angrily: "This is what the second son of Anping Hou asked me to refining precious soldiers. If it is used up, how can I explain it to him."

Qin Chen glanced at him with a smile, and said, "You must have a way."

Liang Yu looked gloomy and changed several times before gritting his teeth and said, "How can I trust you?"

Qin Chen smiled slightly and slowly uttered a few infuriating mantras, and said: "If you use the mantras I said, you will know that I didn't lie to you."

Liang Yu was puzzled, but the zhenqi in his body circulated according to Qin Chen's formula, and his body was shocked.

The vigorous heavenly zhenqi circulated smoothly in his meridians, but at this time, there was no feeling of biting by ten thousand ants, and even the pain at the acupoints was relieved a lot.

For a moment, Liang Yu thought that his condition was cured.

Qin Chen on the side ruthlessly interrupted his fantasies: "This method is only to relieve the pain of your illness, treat the symptoms but not the root cause. If you want a real cure, I will tell you when you are done."

"You better not lie to me." Liang Yu took a deep breath and snorted coldly.

The feeling of being controlled by others made him extremely angry, and he couldn't wait to hack Qin Chen on the spot.

Under Qin Chen's command, Liang Yu quickly ignited a real fire. As a Tier 2 refiner, Liang Yu's basic skills were quite solid, and he didn't need Qin Chen to say anything, he had already begun to heat the Hei Yao Mingshi.

The blue and white real fire licked on the black Yao Ming stone, exuding heart-palpating heat.

However, after a cup of tea, the Hei Yao Mingshi also turned red slightly, showing no signs of melting.

Qin Chen frowned. The Black Yaoming Stone was the top-tier material for Tier 3 refining. It was cold. The real fire of Tier 2 Liang Yu wanted to melt it, and it would be impossible for a while, and the efficiency was too slow.

"Sprinkle some talcum powder on the Hei Yao Ming Stone, so slow, how long will it take to refine." Qin Chen said impatiently.

"Stone talcum powder?" Liang Yu frowned, and said with a sneer: "The function of stone talcum powder is mainly used as a catalyst for the removal of impurities from various mysterious irons. What is the use of sprinkling on the black Yaoming stone? And Hei Yaoming Shi Nai is a third-order material, and the melting speed is slower. That is normal. What's the worry?"

Qin Chen's pupils condensed, and said coldly: "If you want to add it, you can add it."

Liang Yu was so angry that his old face flushed, and he was about to drip blood, and said angrily: "Okay, you asked me to add it. Don't blame me for destroying the Black Yao Mingshi."

He angrily took out some stone talcum powder, and sprinkled it on the Hei Yao Ming stone little by little according to the method Qin Chen instructed.

An unbelievable scene happened to him. The white stone powder fell on the black Yao Ming stone. The black Yao Ming stone, which was originally only slightly red, brightened up quickly, and it melted at a speed visible to the naked eye. The ground became liquid.

This scene made Liang Yu's eyes rounded, as if he had seen a ghost.

Having been a craftsman for so long, it was the first time he heard that the stone powder can accelerate the melting speed of the Black Yao Mingshi.

"What are you doing in a daze, don't get rid of the impurities quickly."

Qin Chen's stern shout suddenly interrupted Liang Yu's thoughts, making him instantly recover.

Seeing Qin Chen's dissatisfaction, he quickly came to the refining table, picked up the array pattern pen, and quickly carved the formation pattern.

He swayed like clouds and flowing water, and a complex and mysterious six-pointed star array quickly appeared on the array table. The entire array pattern was very smooth and mysterious. Each stroke was like art. Liang Yu's eyes were colorful. The heart was greatly impacted.

In just a dozen breaths, Qin Chen carved an extremely complex pattern on the pattern platform. Liang Yu was dazzled to see the entire pattern, and he couldn't tell what the function of the pattern was.
