

Valkyrie 1351

[Chapter 1351: Nourishing Gu and Melting Fire](#)

Yan Chidao glanced at the people plainly, but the arrogance in his eyes could not be concealed.

And the last one to test was Qin Chen.

As the only Qin Chen who has integrated all the flames, what is the value?

Nine hundred?

Nine hundred and five?

Will it be higher or lower than the Yan Equator?

This is the focus of everyone's attention.

For a while, everyone clenched their hands and became extremely nervous.

Can you not be nervous? Almost half of them suppressed Qin Chen and couldn't win the championship. If Qin Chen really wins this game, I am afraid that they will have the heart to jump off the building.

"Hmph, that Qin Chen didn't even refine the flames, just let the nine flames in front of him swallow them by themselves. In this case, the flames will annihilate each other, and the flame power that is eventually formed must be extremely weak."

"I think so too, let alone nine hundred, I'm afraid there may not even be five or six hundred?"

"Look at it, everyone. It's not that the more fusion flames, the higher the certain value. Everything depends on the mutual reaction during the flame fusion."

Many people mocked and said, emboldened themselves, but stared at the instrument in front of them, without blinking.

Even the face of the old man in the Wuyu Dan Pavilion showed a hint of curiosity. He waved his hand slightly, and the flame in front of Qin Chen suddenly floated over and fell into the instrument.

"drop....."

The originally quiet instrument suddenly screamed, and at the same time it exploded with a bang.

Everyone stood up in shock, what happened? Why did the instrument explode inexplicably?

"Everyone, don't worry, our instrument just broke down, but we still have a spare instrument." A second instrument appeared in the hands of the old man.

This was the first time that the instrument exploded during the assessment, and the old man was quite speechless.

He gently waved, and the flame in front of Qin Chen floated into the instrument again.

Only this time before he could react, the instrument exploded with a bang again, making the old man embarrassed and embarrassed.

Damn, there is more to it?

The old man's face sank, what's the matter? Have these instruments rebelled one by one? Before leaving, who did the preparation work, and all the preparations were substandard products. After returning, I have to criticize it.

At this time, Master Ouyang Zhengqi suddenly said: "Zuo Feng, use a seventh-order instrument to test."

hiss!

Could it be said that Master Ouyang Zhengqi felt that the flame after Qin Chen's fusion had reached the seventh level?

Zuo Feng was also taken aback. After composing his mind, a black instrument appeared in his hand, and the flame of Qin Chen's fusion was inserted into it again.

Dididi...

This time, the instrument did not explode for the first time, and the number on it rose rapidly.

"One thousand two hundred and thirty-seven!"

When the final value freezes, everyone's eyes are almost bursting.

Damn, how is this possible?

The flame that Qin Chen blended casually, unexpectedly exceeded the value of one thousand, reaching a height of one thousand two hundred and thirty-seven? Are you dazzled?

In disbelief, a master alchemist pinched himself forcefully, grinning with pain, tears almost flying out.

It hurts, this is not a dream.

But how is this possible? The nine flames prepared by Ouyang Zhengqi are all Tier 6 peak flames. Even if the nine are fused together, the normal score should be infinitely close to one thousand, not more than one thousand, because more than one thousand, this Represents the flame after Qin Chen's fusion has reached the seventh flame level

do not.

But no matter how much the sixth-order flames are fused, it is only the sixth-order flames, just like six pinnacle martial masters teaming up, it is impossible to be an opponent of the seventh-order early martial king.

The flames below the sixth order are just ordinary flames, while the seventh-order flames belong to Wang Huo. Although the two are only a small first-order difference, they represent the same sky and the same ground.

"Could there be a problem with the test instrument?"

"Yes, the instrument must be broken, otherwise how could such a high result be obtained!"

"The flame level, everyone has a feeling. Although the flame in front of Qin Chen is fused with all nine flames, from the aura, it is clearly the peak of Tier 6, and it is definitely not a Tier 7 flame."

"Yes, the flames of Tier 6 and Tier 7 have completely different breaths, and we can still see the difference."

The crowd was in an uproar, like a frying pan.

Even if it is witnessed with their own eyes, most people still can't believe it.

"Everyone, I'm sorry, there is something wrong with the instrument I prepared by Dange, I will re-test it immediately." Master Zuo Feng was sweaty and embarrassed.

You just said that one mistake is enough, and the successive mistakes have completely lost his face.

His face was pale, he took out a black seventh-order flame tester again, and tested Qin Chen's flame again.

Didi di...

The instrument beeps quickly, and finally the value stops.

One thousand two hundred and thirty-seven!

The two tests were exactly the same, and even one number was unchanged. Now everyone can say that there is something wrong with the instrument.

It is indeed possible that the instrument has a problem, but the final results of the two instruments that can't fail are the same, and even one number has not changed, right? If the instrument is broken, it's amazing.

Did this kid really merge the seventh-order pill?

"really!"

On the ring, after seeing the results twice, Master Ouyang Zhengqi suddenly snorted, which immediately attracted everyone's attention.

"Master Ouyang Zhengqi, what do you understand?"

"This kid is cultivating Gu, what a cultivating gu and melting fire technique!" Ouyang Zhengqi looked excited, as if he had seen something unreasonable.

Raising Gu and Melting Fire?

Everyone was at a loss. Most of the pharmacists had never heard of this term, and the expressions of the few pharmacists who had heard of it changed.

"That's right, the technique of cultivating gu and melting fire, this is a method of fusing flames in the form of cultivating Gu."

"The so-called raising Gu, as everyone knows, is to put many Gu worms together and kill each other. In the end, only one will survive to the end and become the Insect King, and the same is true of this

technique." We have all seen just now that Qin Chen put nine kinds of flames together and swallowed them voluntarily. At first, we thought that this was to let these flames swallow them freely, but in fact, it was not. Nine flames, as gu worms, make them fight each other and pass

Swallow other flames to strengthen yourself and eventually become the Fire King. "

Ouyang Zhengqi's eyes flickered, he had only seen it in ancient books, and he had seen it with his own eyes. This was the first time, so he had not recognized it for a while.

"But, the flame aura in front of me is indeed only Tier 6, and clearly not Tier 7?" At this time, someone was puzzled.

[Chapter 1352: All heavens](#)

This is where everyone is most confused.

Everyone is a pharmacist. Everyone can perceive the strength of the flame. The flame Qin Chen merged is indeed less than the seventh rank, and even in terms of senses and power, it is completely inferior to the flame merged by the strict equator.

"If I'm not mistaken, what everyone sees is the surface form of Gu Insect King Fire." Master Ouyang Zhengqi said.

"Surface shape?"

Ouyang Zhengqi didn't continue to explain, and then he shook his figure and instantly came to the arena. He waved his hand and attracted the flame. At the same time, he lifted his right hand and slammed down towards the flame.

laugh!

Under the fierce palm strength, the flame was immediately dispersed. After the original scarlet flame was separated, a blue flame suddenly appeared inside, and a breath that made everyone's heart palpitating spread out from it.

This breath is extremely terrifying, and it is definitely not something that Tier 6 flames can do. Only Tier 7 Wang Huo has such power.

"Damn, really."

"In the center of that flame, there is actually a brand new flame."

"This....."

"incredible."

If they hadn't seen it with their own eyes, no one would have believed that there was still a flame in the center of Qin Chen's fusion flame. Although this flame was weak, it was definitely a seventh-order Wang Huo.

"The technique of cultivating Gu and Melting Fire will form a new King of Fire. When the King of Fire is young, he will protect himself and disguise himself until he grows stronger."

Ouyang Zhengqi's exclamation voice sounded. It was the first time he had seen this kind of fire melting technique. He looked around and said, "Now I will announce the results."

"In the first round of assessment, Qin Chen from the North Tianyu scored 100 points."

"The South China region is strictly on the equator, with 97 points."

"Ye Mo, ninety-five points."

"Chou Tian, ninety-three points."

"Yu Sihui, ninety-one points."

"Kui Xinyu, ninety minutes..."

Looking at the flames in front of Master Ouyang Zhengqi, everyone's face was shocked, and there was no room for rebuttal to Qin Chen's first result.

"Everyone, put away the flames of your own fusion. This is also a benefit for you. Next, we will immediately conduct the second round of testing."

Ouyang Zhengqi is not nonsense, and soon announced the start of the second round of testing.

Ouyang Zhengqi took out a simple box from his body, opened the box, and a sphere made of mysterious material appeared in front of everyone.

This sphere is made up of silver-white mysterious substances, giving people an incomparably deep feeling. The naked eye looks as if it is deeply trapped in it, unable to extricate itself.

Seeing this treasure, Qin Chen was shocked immediately, his eyes showed shock.

This turned out to be Wuyu Dange's extremely defying true treasure, the heavens and the world.

"The heavens and the realms are a treasure in the Martial Domain Pill Pavilion, how could it appear here?" Qin Chen's heart was shocked, and no one on the court understood.

Because in the entire square, he is probably the only one who knows the importance of the heavens and ten thousand realms in the Wuyu Dan Pavilion, even the elders of the Wu Yu Dan Pavilion, rarely have the qualifications to take out the heavens and ten thousand worlds.

But now, the heavens and worlds have appeared in Ouyang Zhengqi's hands. How could this not shock Qin Chen?

"Could it be that these heavens and myriad worlds are fake?" Qin Chen frowned, but in his previous life, he had also entered the heavens and myriad worlds several times, and he had a very good understanding of these heavens and myriad worlds. It's not like fake.

Different from Qin Chen, other pharmacists on the field saw Ouyang Zhengqi taking out such a weird real treasure from the ancient box, and they were all confused.

"Everyone, this thing is a real treasure of my Wuyu Dange. In the next two rounds of assessment, all the players will be evaluated under the power of this real treasure."

"The content of our second round of assessment is to cultivate elixir."

Ouyang Zhengqi's words fell, and everyone on the court was a little confused.

Cultivating elixir? How is this assessed? The cultivation of elixir is by no means an overnight effort. Some powerful elixir cannot be cultivated without a century or a thousand years. Obviously Ouyang Zhengqi also knew the doubts of the people, and he didn't talk nonsense. He immediately urged the heavens and worlds in his hand, hum, and in an instant, a terrifying aura erupted from the ball in Ouyang Zhengqi's hand, a creamy light. Halo, instantly all the remaining two hundred players in the ring

Wrapped in it.

In addition, the scene in front of everyone changed. A huge garden appeared in front of each contestant, the size of an acre, but such a garden appeared in front of the audience, but it was very small, only a few feet in square.

As if under the shroud of this ball, the ring where many players are located has become a world.

"Everyone, the garden in front of you seems to be very small, but in reality each piece is an acre in size. Next, each of you will be allocated ten virtual sixth-order panacea seeds. All you need to do is to These ten kinds of seeds are planted in their own nursery and cultivated

."

"In this nursery, the flow of time is very fast. Half an hour is equivalent to one hundred years. After half an hour, when the game is over, which one has cultivated the most elixir and has the highest level? The more points you have."

"Om!"

As Ouyang Zhengqi's voice fell, ten elixir seeds appeared in front of everyone.

"Now everyone thinks for five minutes. After five minutes, the second round of assessment officially begins."

"hiss!"

As Ouyang Zhengqi's voice fell, everyone sucked in air-conditioning.

What kind of treasure did Master Ouyang Zhengqi bring out? Under its envelope, the vast world can continue to evolve, and in this world, the flow of time can still be controlled, half an hour is equivalent to a hundred years, is this too scary?

Although Master Ouyang Zhengqi has already said that the elixir planted in it is all virtual, the process is extremely real. The operation of each player in the garden will also affect the growth of the elixir.

This is simply a cheating device against the sky.

Think about it, in the future, if anyone encounters a problem in the process of planting a real elixir, he only needs to simulate it again in this treasure to know what to do next. Isn't it all disadvantages?

Moreover, can this treasure really only be used for elixir planting? Would it have some effect if it was sent to insight?

For a moment, everyone was in an uproar, and the noise went straight into the sky.

Qin Chen stood proudly under this light, but his heart was very emotional.

The heavens and myriad worlds are indeed the heavens and myriad worlds. He had entered the heavens and myriad worlds several times in his previous life, and he couldn't understand these heavens and myriad worlds, and he could never be wrong.

But it's just a small four-domain comparison. The Wuyu Dange will let Ouyang Zhengqi bring such treasures as the heavens and ten thousand worlds. What is the purpose of this Wuyu Dange? While other players desperately analyzed the elixir seeds in front of them and simulated their calculations in their hearts, Qin Chen's brows wrinkled slightly.

[Chapter 1353: Spirit](#)

The heavens and ten thousand realms are extremely important treasures in the alchemy pavilion. Under normal circumstances, they will never be taken out easily. Qin Chen also entered the heavens and ten thousand realms at the alchemy headquarters.

But now these heavens and myriad worlds actually appeared in the Northern Heaven Region, and they were in the hands of Ouyang Zhengqi, which made Qin Chen feel the extraordinary.

Suddenly, the parasitic seeds in his mind felt as if they felt some threat, buzzing, and instantly became nothingness.

In Qin Chen's perception, the parasitic seeds that existed in his mind suddenly became transparent. If the non-parasitic seeds were in his mind, his soul power could easily perceive that Qin Chen even thought that the parasitic seeds in his mind have disappeared.

But at the moment when the parasitic seeds disappeared, an extremely cryptic force swept over Qin Chen's body.

This power is extremely subtle, but terrifying. If Qin Chen's soul power hadn't noticed the changes in the parasitic seeds, and was very sensitive to changes in external power, he would not have found such a power sweeping over him.

Under such a force, Qin Chen felt that his body was invisible, and everything in his body was spied out clearly, without any secrets.

"This is... the spirit of the heavens and the world?"

Qin Chen was surprised, what was the other party scanning?

Qin Chen has known that there is a tool spirit in the heavens and ten thousand realms. The name is "Xiaojie", which is the actual controller of the heavens and ten thousand realms. His intelligence is not high and it is very cute and naive.

But now "Xiaojie" scans and scans on himself, as if looking for something, Qin Chen, who originally wanted to contact Qi Ling, suddenly burst into a cold sweat, not daring to move at all.

Under normal circumstances, the "small world" of the device spirit is usually in a deep sleep, and the device spirit itself has no likes or dislikes, and has no interest in the outside world. Then the appearance of the "small world" must have its own purpose, and it seems to be specifically looking for something.

But what are you looking for specifically?

Thinking of the active disappearance of parasitic seeds before, Qin Chen couldn't help but secretly startled. Could it be that "Xiaojie" was searching for parasitic seeds?

It's possible, but it's only possible. Perhaps the parasitic seed felt the threat and hid it deliberately.

Qin Chen's mood suddenly became a little heavy. The disappearance of the parasitic seed gave him a faint feeling. Although the parasitic seed is only a seed, it is very likely that his own consciousness has begun to slowly recover, otherwise he will not hide it spontaneously. stand up.

If this is the case, then you have to hurry up and look for the town boundary beads, the parasitic seeds are activated much faster than you think.

At this time, Qin Chen couldn't help but think of the **** cat. The guy who claimed to be the Black Emperor didn't know where he went. Since leaving the Secret Realm of the Heavenly Demon, he mysteriously disappeared and never saw him again.

When Qin Chen was thinking wildly, five minutes had already passed and the second round of assessment officially began.

The many alchemists who were under the envelope of the heavens and worlds moved one after another and began to cultivate their own elixir.

"In the last round, it was Qin Chen who won. In this round, it will be me who won."

Yan Equator, Ye Mo and the others were livid, and each one secretly competed.

The faces of Qiu Tian on the side were even more gloomy.

They are all alchemy geniuses from the martial domain. They originally entered the lower four domains for the alchemy competition in order to win the place in the ancient Yu realm. But who ever thought, they all ranked behind the top three in the first round of assessment , The inner anger can be imagined.

This aroused their desire to win even more.

"It's just some ants from the lower four domains. In this round of refining medicine, I will let these ants from the lower four domains know what the real elixir is."

call! call! call!

At the beginning of the game, everyone moved, and countless figures appeared on the field. They began to level the land and measure the aura content of the entire land.

Elixir cultivation is an extremely basic task, but it is also an extremely complex task.

Perhaps in the lower four realms, the cultivation of elixir is not popular, but in the martial realm, most of the apprentices in the martial arts before the apprentice, in addition to being a pill boy, a considerable number of people will become drug boy.

The so-called medicine boy is a boy who helps take care of high-level elixir in the pharmacy. Therefore, to the geniuses from Wuyu Dange, this skill is a required course for them.

Almost every alchemist in Wuyu has a wealth of experience in elixir cultivation, which is unmatched by alchemists in the lower four fields.

Seeing Qiu Tian, Yu Sihui, Kui Xinyu and others quickly took action, the originally messy spiritual field was instantly cleaned and organized.

Qin Chen has also recovered, and now it is useless for him to think more. For the present plan, he can only deal with more crises by improving his strength as soon as possible.

And if he wants to improve himself, he must get the quota of Guyu World this time.

Thinking of this, Qin Chen suddenly shot a sharp light in his eyes.

This time, he must get the quota of Guyu World.

It's his, no one can grab it.

call!

Qin Chen moved, his figure was like electricity, and he came to the garden in an instant. His hands quickly outlined patterns. These patterns turned into mysterious runes and poured into the ground instantly.

For a long time, Qin Chen has been keeping a low profile, for fear of being discovered by the people of Misty Palace, for fear of being seen as special by others.

He suppressed.

But at this moment, Qin Chen completely let go.

In order to be in the Guyu world this time, he must win the championship of this competition, enter Dan Pavilion's eyes, and use Dan Pavilion's financial resources and Dan Pavilion's resources to improve himself.

Otherwise, without waiting for him to regain his strength, I am afraid that he will have been taken away by the parasitic seed in his mind and become a walking dead.

Pinch the handprints with both hands, the runes quickly fell into the garden in front of him, and the powerful force rushed into an astonishing beam of light.

"What is Qin Chen doing?"

Everyone stood up.

Generally, when cultivating elixir, the land is first rectified and the seeds of the elixir are classified. Some elixir have completely different properties. If they are planted in the same area, conflicts will inevitably occur.

But like Qin Chen, who constantly squeezed his handprints and used runes, it was the first time that the alchemists on the field saw him.

In full view, after Qin Chen displayed a large number of runes and entered the garden.

Hum!

In the nearly one-acre wide garden, the light of debut suddenly appeared, and a strong spiritual aura spread out and gathered in the center of the nursery. Originally, the elixir in this spiritual field was scattered, but after Qin Chen displayed the runes, all the elixir in the spiritual field were suddenly attracted to the same place and gathered in the center of the spiritual field.

[Chapter 1354: Planted dead](#)

This is the center of the spiritual field. It is only a few feet in size and very small, but the aura is rich and scary, as if there is a gushing essence, it has become a spiritual spring.

Everyone was shocked, what is this Qin Chen doing?

The growth of elixir does require a lot of aura, and the stronger the aura, the better.

But different elixir have different properties. Each elixir needs its own growth space. If Qin Chen disperses the elixir in the entire spiritual field and divides it into areas, it is normal. After all, each elixir The climate in which the medicine needs to be grown is different.

But Qin Chen gathered all the auras together, which was a little weird.

In the second round of assessment, a total of ten elixir was given. After all the auras were gathered together, how could Qin Chen separate these elixir so that they would not affect each other?

This is simply impossible.

"How can ten elixir grow in such a small space?"

"A space of a few feet in size is not enough even to plant three or two elixir. If the properties of the medicine are different, conflicts will easily arise."

"Does Qin Chen want to plant one or two elixir, relying on these two elixir to reach an absolute height and overwhelm other players?"

Everyone guessed that their minds were turning.

Otherwise, I can't explain all this.

Ouyang Zhengqi also frowned. Qin Chen's first round of results made him understand that Qin Chen in the Northern Territory was definitely not like the former Taiyuan Pavilion Master in the Southern China Region. He was a two-tone genius. He must have his own intention to do this.

After gathering all the spiritual energy, Qin Chen took all the spiritual seeds in his hands, and then cast them into this spiritual field at the same time.

Buzzing...

Every seed is glowing, exuding the breath of life under the rich spiritual aura, which is instantly activated.

The aura here is too strong, the seeds fall into the soil, and within a short time, they have already begun to take root and sprout, and young sprouts begin to grow, stubbornly drilling out of the soil.

Of course, in the eyes of the outside world, it was only a blink of an eye, but in fact, several months have passed in the Lingtian under the lapse of high magnification.

But Qin Chen's actions made all the pharmacists speechless again.

"This guy actually planted all the spirit seeds together."

"I'm dizzy, will he be nurtured by elixir?"

"It's not that this son is extremely amazing in the alchemy talent, but he has never cultivated any elixir, right?"

"It is possible that places like the Northern Heaven Region are extremely remote. It is said that the elixir needed by pharmacists is basically picked in the wild. As for the medicinal fields, there are very few high-level elixir cultivations, maybe the entire Northern Heaven Region Even if there is no panacea to cultivate this discipline, it is not necessarily."

"That's right, I don't know that the growth of elixir requires their own space. How can they be planted with such a brain." "It's really speechless, so many elixir grows together in such a small space. Competing for nutrients, such consumption will cause huge damage to the growth of the elixir. In the end, not only the aura gathered together will be consumed in vain, but all the elixir planted in it will also be consumed.

Malnutrition. "

Everyone shook their heads, all speechless.

I thought that Qin Chen had scored against the sky in the first round of assessment, and the previous preparations were so maverick, there would be some unexpected surprises, but who would have expected that he made such a common sense mistake. Let everyone be surprised.

really.

Under the stimulation of the aura, the elixir began to compete for the aura after the shoots grew. What is the picture of the ten elixir competing for the aura? Intertwined with each other, no one can grow, everyone is extremely sluggish.

Even two of the elixir had just germinated, because they were restrained by the elixir next to them and couldn't absorb the aura between the heavens and the earth, they just wilted.

And when he was sluggish, his own living space was naturally suppressed again, and within just a few dozen breaths, the two elixirs completely vanished and lost their vitality.

It can be said that he died before his birth!

In contrast to the other players, there hasn't been any other than Qin Chen who has cultivated necrophilic medicine so far.

The elixir in front of them, both good and bad, are still growing tenaciously. Among them, the elixir in front of Yu Sihui has the most gratifying growth.

Coming from a family of ancient medicines, her cultivation of elixir is naturally far beyond comparison.

It can be seen that for the same elixir, the same elixir, the elixir in front of her is obviously growing the fastest, and the next ones are Ye Mo and Kui Xinyu, and again, Qiu Tian and Yan Equator.

Yan Equator, which shined in the first round, seemed a bit ordinary in this second round of assessment.

Of course, the five of them are still the strongest. Except for the five of them, the rest of the players are inferior to them in terms of growth speed and growth situation, and there is a sharp contrast. "Strange, Kong Mingzi and Shen Yuanguo are two elixir, one attribute is Yin, the other is Yang, and the other four of the leading five are separated by a certain distance. Nurture, but Yu Sihui actually put the two together, but it grows better than others

It's so weird, isn't it? "There are also Flamingo and Yang Mazi, both of which are fire-attribute elixir, and the growth environment is very similar. Shouldn't they be placed together to promote each other? Why did you get to Yu Sihui's place, but separated the two by a distance, instead planted a Yuanzun vine in the middle. This is not to let the two form

Was the small environment destroyed instantly? But why did the elixir planted by Yu Sihui grow faster than the other four who planted the two together? What's the matter? "

Among them, the cultivation of Ye Mo, Kui Xinyu, Qiu Tian, and Yan Equator is very suitable for everyone. Almost most people can understand. Even if they don't understand, they can get a little from careful thinking.

However, the distribution of the elixir planted by Yu Sihui made everyone unable to understand. It seemed to be quite different from common sense. On the contrary, it grew best and couldn't understand it.

Not only the ordinary pharmacists, but also the masters of the Great Pill Pavilion, including Tai Yuan, were also confused and a little puzzled.

"Haha, in fact, Yu Sihui's planting method is truly perfect. It is clearly superior to the other four." At this time, Master Ouyang Zhengqi suddenly smiled.

"Oh? What do you say?" Everyone looked at it.

Could it be that Yu Sihui's planting is still unreasonable? But also, if it doesn't make sense, how could it be possible that the elixir cultivated by Yu Sihui is growing the best, and the others will fall behind, and there must be something they didn't understand.

[Chapter 1355: Variation six-leaf lotus](#)

Ouyang Zhengqi smiled slightly, and said: "As everyone knows, Kong Mingzi and Shen Yuanguo are Yin and Yang. They have different attributes. In fact, although the two have different attributes, they are both different in the growth environment. It is yin-loving and suitable for growing in places with low temperature and humidity." "And the breath released by the ginseng fruit during the growth process can help the growth of Kong Mingzi to a certain extent, so these two elixir It is the most suitable to cultivate together. Just build an independent climate range between the two to create an effect that one plus one is far greater than two.

fruit. "It's like working at the same time. Two men work very fast, but it is not long-lasting and not detailed enough. If you pair a man and a woman, although there will be some influence on the speed in the early stage, but in the later stage, not only the speed Will not be affected, even beyond letting two men work together.

"

"Flamingo and Yang pock are even simpler. In most people's imagination, elixir of the same attribute should be planted together, and they will complement each other. This theory is correct, but it depends on the situation." "Huo Lie Both grass and Yang Mazi belong to the fire-attribute elixir. They are extremely bursting. They need a lot of heaven and earth aura during their growth. If they are placed together, although they have a bonus in attributes, they may Cause the situation that the aura is not enough in a short period

Cause the growth of both. "But it's different with Yuanzun Vine. Yuanzun Vine is a neutral elixir. The absorption of spiritual energy is not so exaggerated. On the contrary, it will form an invisible barrier between the flaming grass and the Yang pock. The two rely on each other's fire environment, and they will

The fetch conflicts. "

"This is like two strong tempered men exercising together. Although they will urge each other, they are also likely to have conflicts. At this time, adding a gentler personality to exercise together can lubricate the three. To achieve three wins..."

Listening to Master Ouyang Zhengqi's explanation, everyone was stunned.

There are so many theories in it.

Many people only know that elixir of the same attribute will support each other, and elixir of different attributes will conflict with each other, but they did not expect that there will be other different situations between elixir of the same attribute and elixir of different attributes, and we must not generalize.

Here, they are all taught another lesson, and they only feel very fulfilling.

"By the way, Master Ouyang Zhengqi, what about Qin Chen? Why does he plant it like this?"

At this time, someone asked suspiciously on the side.

Qin Chen?

Ouyang Zhengqi was taken aback, and everyone turned to look at Qin Chen.

At this look, they couldn't help being speechless, full of black lines.

In this moment, three more elixir in Qin Chen's spiritual field had died, and only five survived.

But it is also true, planting so many elixir in such a palm-sized space, it's strange to survive. Didn't you see that the shrubs that usually grow next to tall trees are? Even ordinary plants will compete for resources once they get close, not to mention this kind of heaven-defying panacea.

"Ahem, Qin Chen did this, obviously because of his intentions. Just look at it carefully."

Ouyang Zhengqi gave a dry cough and said somewhat mysteriously.

In fact, he didn't know why Qin Chen planted it like this. How could this be cultivating an elixir? Obviously, it's just fooling around! But the first round of assessment greatly improved Ouyang Zhengqi's senses of Qin Chen. In his opinion, Qin Chen can get to this point, even if he doesn't understand the cultivation of elixir, he won't be like this, right? In case he speaks now, and Qin Chen slaps his face back, he is much bigger than the old face of the referee

Where to put it?

But what made Ouyang Zhengqi speechless was that as time passed, the situation on Qin Chen's side had not improved, on the contrary, it became more and more ugly.

Five minutes later, the sixth elixir died.

After another five minutes, the seventh elixir died!

When it was only ten minutes before half an hour, nine of the ten spirit medicines in front of Qin Chen withered, leaving only the last six-leaf lotus plant that grew sickly.

Although this six-leaf lotus survived to the end, because of the previous competition for resources, its growth was also very sluggish, and it was not as good as other people's elixir.

Even in the past half of the game, only three lotus leaves grew.

At this time, the elixir in front of Yu Sihui and others have grown extremely astonishing. Although they are located in the outer envelope of the heavens, looking at it from a distance, everyone seems to be able to smell the formations coming from the medicine garden. Elixir and fragrance.

Every elixir has almost reached the level of the sixth-order peak, and the fruit on it is dazzling with fresh green and red.

"It seems that in this matchup, Yu Sihui in the gate area should have won."

Someone asserted.

The beholders nodded.

"Look at it!"

At this moment, someone suddenly whispered, staring at Qin Chen's place.

Everyone hurriedly turned their heads, under everyone's eyes, the six-leaf lotus in front of Qin Chen was growing at an astonishing speed at this moment.

Yotsuba!

Five leaves!

Six leaves!

In a short period of time, it grew crazily to Liuye, and the speed was so fast that everyone was stunned and stunned.

"No, why is this six-leaf lotus still growing?"

I saw that after six leaves had grown, the growth of the six-leaf lotus hadn't stopped. On the edge of the sixth leaf, a new leaf quietly pulled out and slowly grew.

Although this leaf is extremely young, it is less than one-tenth of the other palm-sized leaves, but it is indeed a seventh leaf.

"Six-leaf lotus actually grew a seventh leaf, is this still a six-leaf lotus?"

"This....."

Everyone is dumbfounded and can't believe their eyes. Six-leaf lotus is a six-leaf lotus. It can only grow six leaves at most. Once six leaves are grown, it is equivalent to reaching the peak of the six-leaf lotus. , But now...

The seventh leaf actually grows, which is like someone growing three hands. What the **** is it?

Hum!

In the shock, the game time finally ended, a halo passed across the field, and the elixir in front of everyone stopped growing, freezing at this moment.

Ouyang Zhengqi's eyelids jumped wildly.

Huh!

He came to the court for the first time, an instrument appeared in his hand, and swept towards Liuyelian in front of Qin Chen.

This is a drug tester that can test the level, year, quality, and other information of the elixir.

After the instrument's red light swept across the six-leaf lotus, there was a sudden drop, and a few lines of large characters appeared on the public screen on the ring.

"Name: Six-leaf lotus (mutation)!"

"Rank: Early stage of the seventh stage!"

"Drug age: one hundred years!"

"Growth: the seventh-order peak!"

"Finished form: excellent!"

puff!

Everyone vomited blood, and their eyes burst.

Oh my god.

This Qin Chen actually planted the sixth-order elixir into the seventh-order elixir, really? Everyone shook their bodies and their hearts were extremely shocked. They couldn't restrain themselves for a while.

[Chapter 1356: Elixir swallowed](#)

In this assessment, the ten elixir seeds given were at most only the elixir of the sixth-tier peak. Under normal circumstances, no matter how they were cultivated, in the end, only the elixir of the sixth-tier peak could be cultivated. This was a fixed number.

But now, Qin Chen actually cultivated the six-leaf lotus that was originally the peak of the sixth order into a seventh-order elixir, this...

unbelievable!

If the seventh-order spirit medicines were really so easy to cultivate, how could there be so few high-ranking spirit medicines on this continent, but Qin Chen had done things that ordinary people couldn't even imagine.

Even before Yu Dange asked this question, he thought that the top of the players was nothing more than cultivating all the ten elixir to the sixth-tier peak. He never thought that there would be such a result.

Ouyang Zhengqi also stared at the elixir in front of him, no matter from his breath, form, or even strength, he could tell that it was indeed a seventh-order elixir, even if it hadn't stopped the heavens and all realms just in half an hour. If the time flow rate is high, it is very likely to break through to the seventh-order peak.

However, how did Qin Chen upgrade the elixir that was originally only Tier 6 to Tier 7?

"How did he do it?"

"The elixir of the sixth-level peak, according to the truth, is not impossible to grow to the seventh-level, but the process will be extremely long, and it is definitely not a simple one hundred years."

"Could it be related to the other nine elixir before?"

"Hey, it's very possible. Did you forget the first round of testing? Nine Tier 6 peak flames merged to form a brand-new Tier 7 flame, so why can't these ten Tier 6 elixir form one? A seventh-order elixir?"

"However, flames are flames. During the process of fusion, their power will increase. However, when the elixir competes with each other and only consumes each other, how can they become stronger instead? Unless it is the same as the first round of flames. Medicine is not competing, but swallowing!"

"Is it possible that the spirit medicines swallow each other?"

All kinds of discussions sounded on the court, and there were incredible eyes everywhere.

Yu Sihui and the others also had pale expressions, looking at the horse chestnut lotus in front of Qin Chen in disbelief, the only feeling of frustration in their hearts was the only strong one before.

Among them, Yu Sihui, the strongest, not only completely cultivated ten elixir, but also cultivated all ten elixir to the limit of Tier 6 peak.

This kind of achievement can be said to be extremely dazzling, but compared to the horse chestnut cultivated by Qin Chen, it suddenly looked bleak.

No matter how many Tier 6 spirit medicines are, they are only Tier 6 spirit medicines. How can it be impossible to compare with Tier 7 spirit medicines? This is a chasm, an insurmountable chasm.

"How is it possible, why this kid can cultivate a Tier 7 elixir? It's impossible, it's impossible. Even in the Martial Domain, I've never heard of someone who can use a Tier 6 peak elixir. , Cultivated into the seventh rank..."

Yu Sihui muttered, shaking his head, still couldn't believe it.

Master Ouyang Zhengqi also looked shocked, his eyes flickered, and his heart muttered, but in his mind, he suddenly remembered the discussion that had come before.

Swallowed?

Devour!

By the way, it is swallowing!

Ouyang Zhengqi suddenly shot a brilliant glow in his eyes, as if an electric light flashed in his mind, his gaze suddenly looked at the spiritual field in front of Qin Chen.

"Sure enough, there is actually a devouring formation in this spiritual field."

Ouyang Zhengqi was agitated. He had already seen it at this moment. In addition to the spirit gathering formation, there was another formation in Qin Chen's formation, but this formation was extremely subtle, so he was also Can't tell.

Now, under careful observation, I found that there is actually another swallowing formation.

"In other words, when this son was planting the elixir, on the surface, ten elixir were competing with each other and died one by one, but in fact, the ten elixir were swallowing each other.

Just like the Gu worm melting fire technique, these ten elixirs are ten elixirs. In order to survive and swallow each other, the last elixir that survived the competition was very sluggish, but it has actually been absorbed. The lives of the other nine elixir have a certain chance of mutation. "

"Of course, there is a probability of mutation, and this Qin Chen obviously succeeded."

Ouyang Zhengqi couldn't help but glance at Qin Chen. In such an important competition, he actually dared to make such a decision, not knowing whether Qin Chen was confident or arrogant.

However, Qin Chen succeeded.

Soon, the results of the other players were also counted.

"At the end of the second round of assessment, Qin Chen from the North Tianyu scored 100 points."

"Yu Sihui, ninety-nine points."

"Ye Mo, ninety-six points."

"Kui Xinyu, ninety-four points."

"Chou Tian, ninety-two points."

"Yan Equator: Ninety minutes."

Since then, the two rounds of competitions ended. Qin Chen ranked first with a high score of 200 points, while Ye Mo ranked second with 191 points, Yu Sihui ranked third with 190 points, and Yan Equator ranked third with 190 points. One hundred and eighty-seven ranked fourth, Qiu Tian one hundred and eighty-five fifth, Kui Xinyu one hundred and eighty-four sixth.

And Wei Jinzhou actually ranked ninth with 167 points, entering the top ten.

At the end of the two rounds, Qin Chen had been ranked first, and everyone's expressions instantly became very strange.

According to this posture, this Qin Chen won't really get the first place, right?

If so, what is the market opened by Wanbaolou?

The crowd suddenly took a breath, and heard that the entire handicap has reached 200 billion, which is a huge sum of 200 billion middle-grade real stones.

Only Ouyang Zhengqi took a deep look at Qin Chen and returned to his seat. This is evil.

Qin Chen's two assessments, even he could not see through, made him shocked, and secretly pondered Qin Chen's origin.

He comes from Wuyu Dange. Although he is not at the level of elders, he is not the lowest level. He has a wide range of knowledge. What's more, he can serve as the chief examiner this time because his background is also very strong. Taoism knowledge is extraordinary.

But now, he couldn't see through Qin Chen's assessment method, which shocked him greatly.

"However, no matter how weird this method is, this third round of assessment will not be so easy. It will be clear whether it is a dragon or a worm."

With a flash of expression, Ouyang Zhengqi stood up.

"Everyone, immediately start the third round of assessment, and the content of this third round of assessment is alchemy."

Ouyang Zhengqi Hong said.

"really....."

His voice fell, and there was a clear voice on the court without much surprise.

According to the records of the previous Alchemy Grand Competition, no matter what the assessments performed in the first two rounds, the probability of almost 90% or more in the last round will be alchemy. Because, although other assessment methods can test the strength of a pharmacist, they are often extremely one-sided. Only alchemy can prove the true strength of a pharmacist and return to its origin.

[Chapter 1357: Impossible to do](#)

A pharmacist, no matter how fast you refine the flames and how strong the elixir is, you will eventually return to the path of alchemy.

After all, a pharmacist who cannot refine a pill, no matter how good the others are, they are not counted.

Hum!

Ouyang Zhengqi suddenly raised his hand, and within a short time, countless elixirs appeared between the world and the earth. Suddenly, an astonishing aura of elixir rose to the sky and filled the ring.

Looking around, there are strains of high-level elixir suspended in the entire world. More than half of them are Tier 6 elixir, and about 40% are Tier 7 elixir. There are so many types. Thousands of species.

When so many spirit medicines appeared in front of everyone, everyone was shocked and dumbfounded. The magnificent scene shocked every pharmacist on the field.

So many high-level elixir appear instantly, what kind of scene is this? Suspended in the air one after another, like the wonder of the world.

"Everyone, in this third round of assessment, the pill pavilion will not impose any restrictions, which means that you can refine any pill that you are familiar with, but the medicinal materials must be prepared by the old man in these 3655 kinds of spirits. Choose among medicines." Ouyang Zhengqi pointed to the many elixir above his head, and said: "These 3,655 elixir are specially selected by my Dange, and they can be refined after combining them. There are more than 200 kinds of seven-pin pill, covering more than 90% of the basic Wang Dan on the market. You don't have to worry about finding it.

To the pill that suits you. "

"However, although you can choose the elixir of this third round at will, it is not free." Ouyang Zhengqi glanced at the people and said: "You can choose the elixir you want, but the old man is here. Will make a record. If you can successfully refine in this third round, then you only need to take out one pill from the refined pill as compensation for the elixir material, but if

Because the refining failed, please return the elixir you lost to the old man again. "

Everyone looked at each other and smiled bitterly.

Originally, they thought that Wuyu Dange was so majestic and allowed them to take the elixir at will, but now they know that it was just borrowed, and they will have to be repaid in the end.

Of course, for players who can come here to participate in the Grand Competition, even if the refining fails, they will not be unable to afford some Tier 7 elixir.

But for Wuyu Dange, there are more than 180 players who passed the second round of assessment. It is a huge expenditure to provide each of these people with their most profitable pill. It is a seventh-order elixir, I am afraid that thousands of them will be prepared.

Of course, this kind of loss is not necessarily a big deal to Wuyu Dange. The reason why Dange allows players to exchange elixir is to tell all the alchemists on the field that if you want to harvest, you must pay. , In this world, there is nothing for nothing.

"Now, please prepare the elixir needed for the next refining."

"But before that, let me let you feel your next refining environment."

When the voice fell, Ouyang Zhengqi suddenly raised his hand.

Hum!

The heavens and myriad worlds floating in the sky suddenly emitted a terrifying storm of mental power and suddenly rushed into the ring below.

boom!

In an instant, all the players under the ring turned pale and their hearts trembled.

Damn, what's the matter?

Everyone looked up in amazement and looked at Ouyang Zhengqi.

What's up? Should they be evaluated in such an environment? Ouyang Zhengqi smiled slightly: "You are all Seven-Rank Medicine Kings. Normal refining is easy for you. In order to better distinguish your results, and to test your strengths more fairly, you are the third The assessment of the wheel will be one of the spiritual storms of the heavens and the world

Refining under. "Don't worry, everyone, the mental power storm released by the heavens and the world is not strong, and it is barely close to the seventh step, which can't affect your strength. Of course, in order to prevent accidents, I also ask you to choose your own elixir before the assessment. Don't overestimate yourself and cause

Refining failed. "

This.....

Everyone changes color, is Master Ouyang Zhengqi kidding?

Is the mental strength still barely close to the seventh rank? Damn, does he know what it means to have such a mental storm during refining?

When refining the pill, the pharmacist needs to be absolutely careful and cautious, and his attention must be fully concentrated, otherwise any slight mental power fluctuation can cause the refining to fail.

But for now, Master Ouyang Zhengqi still feels a difficult attitude, and deliberately let this real treasure release a storm of mental power to interfere with them during refining. Is this because he wants them to be unable to refine the pill?

"Master Ouyang Zhengqi, this... doesn't seem appropriate?"

"Yes, how can we refine it under this mental storm?"

"Totally impossible."

The crowd was in an uproar, and they all spoke out.

"If you think it's impossible, just give up the challenge. This is the rule of Taibi, do I have to say it a second time?"

Ouyang Zhengqi snorted coldly and looked at everyone in front of him indifferently. How can he not know how much concentration and concentration the pharmacist needs for spiritual power when refining? But if it is simply refining, what is the point of such a competition? Simply investigate the highest level of the elixir that each of these players has ever refined, and rank it.

The Dan Dao Grand Competition is to evaluate these players in some difficult circumstances to dig out their true strength.

"Who else thinks it's impossible, can't compete, stand up, I can let him go straight, count as a failure in the assessment, who else thinks it's impossible?"

Ouyang Zhengqi's eyes were cold, and he scanned everyone coldly.

be quiet.

No one answered.

"Very well, it seems that everyone now thinks it is possible." Ouyang Zhengqi said lightly: "In that case, you should start choosing your own elixir."

"Remember, this third round of assessment is your level of alchemy. The final assessment result is calculated based on your pill formation. The level of the pill is the first element. If the level is the same, we will then assess the level of pill formation. Grade, so I hope you can make a good choice, let's get started!"

With the fall of Ouyang Zhengqi's voice, all the players on the field had no choice but to accept their fate and looked up to the sky.

Thousands of elixir suspended in the sky, dazzling everyone and overwhelming.

For a time, many viewers were almost stunned. There are more than a thousand kinds of seven-tier main medicines, and there are more than two hundred kinds of seven-tier pill in combination. How do you choose?

[Chapter 1358: Everyone's determination](#)

For the players in the ring, although there are many elixir in the sky, these choices are not really difficult.

After all, no matter how strong the cultivation base of a pharmacist is, no matter how strong he is, he will also have a major and a minor pill. In this large-scale assessment, no one will choose a minor pill, and will naturally come up with his own assassin. Choose one of the major medicines.

In order to assess the victory, naturally, he would choose the one with the most confidence and the highest rank among the many major medicines.

But now that Master Ouyang Zhengqi has laid down the new rules, the players have headaches.

Under the influence of the mental power storm approaching the seventh order, their most powerful pill can never be refined, and they can only choose one from the most skilled pill.

Moreover, this kind of pill must be successfully refined under the influence of the mental storm.

For a while, everyone scratched their heads, causing headaches.

Even some medicine kings lacked self-confidence, and even searched for the sixth-order elixir.

Ouyang Zhengqi shook his head secretly.

Naturally, these people's thoughts are clear to him. The players selected in this way are not very strong, and it is impossible to get the top three rankings. Therefore, they can only fall back to the second place, trying to successfully refine the pill and try to make them these martial arts Dan Ge's people fancy.

But don't they think about it, if someone who doesn't even have the courage to challenge themselves, even if they finally succeeded in refining a sixth-grade pill, how would they like them?

Look at those Qin Chen, their expressions have not changed much.

On the ring, Qin Chen stared at the elixir above his head, thinking about the next round of assessment in his heart.

What kind of medicine is refined?

To be safer, it must have been the refining of the seventh-stage late-stage pill, but Qin Chen had seen before that the pill of Ye Mo and others were indeed terrifying, and it might not be without the seventh-stage later stage of cultivation.

Although I don't know how they behaved under the influence of the mental storm, once the other party also refines the late seventh stage pill, it will be troublesome.

Qin Chen must take the quota of Guyu Realm, and he will never allow any problems in this level.

In that case...

Qin Chen glanced over the many elixir above his head, a thought in his heart suddenly rose, and he had an idea.

There was a crazy look in Yan Chidao's eyes. After the first two rounds of assessment, he was only fourth.

However, only the top three places in the Guyu Realm will be awarded. In other words, if he continues to do this, he will inevitably miss the Guyu Realm's quota.

"No, I can't lose here. Once I can't enter the Guyu Realm, even if I go to the Martial Realm, I will start one step later than the others. The martial artist's practice is like traveling a boat against the current. The quota will definitely be mine."

His eyes were crazy. Originally, under the suppression of the mental storm, he had already considered whether to reduce the difficulty of refining himself, but now he changed his mind.

Once he reduces the difficulty, although the success rate will be 100%, but...

This certainly couldn't win Qin Chen and Ye Mo, maybe even Yu Sihui couldn't win.

Qipin late pill.

He felt that there was something about to break in his heart, giving him unprecedented confidence. As long as he firmly believed in himself, he would surely be able to refine the late seventh stage pill.

He had this feeling before, but it was not as strong as this one. Under the threat of many powerful enemies, he seemed to have some shackles broken in his heart, giving him a strong premonition. Today He must succeed.

Wait, he is the first genius of Alchemy.

Ye Mo gently looked at the many elixir on his head. He was very familiar with each of these elixir. Most of them could be refined by him, just like a part of his body, so kind. .

There are several medicines in it, and he has full confidence that they will be able to refine them successfully. Originally, Ye Mo was also going to choose these medicines.

But looking at it now, his eyes suddenly became determined, and he moved away from these elixir.

Ye Mo's eyes burst into an unprecedented light, and there was a strong determination in his eyes.

No, he doesn't want to continue refining those pills. He knows that even if he refines these pills, his success rate will be higher, and even the probability of getting the top three is very high.

But for Ye Mo, as long as it is not the first, it is a failure.

I am the top alchemy genius in the Lower Four Domains Pill Pavilion, and no one can take away the glory that should belong to me.

Therefore, he turned his head, as if resolutely abandoning the honor once belonged to him.

Today is a new beginning!

Ye Mo's aura changed drastically in an instant, his eyes were sharp, and there was a feeling of a personal change.

He wants everyone to know who is the king of genius in the four domains.

Yu Sihui had a bitter smile on her face.

At the end of the first three and two rounds of assessment, he, a genius from the ancient pill family, only won the third place, and it was because the last round of assessment was the most proficient cultivation elixir in her family.

If not, she would not even be able to get the top three.

But she was a genius from the ancient pill family. Originally in her heart, she came to the Lower Four Realms, and she should be a figure capable of sweeping, but in the end she gave her a fierce slap in the face.

No, Yu Sihui, she will never give up easily, and there will be the final round of assessment.

She wants to find the dignity that belongs to her ancient pill family. Otherwise, when she returns to Wuyu, what face will she have to meet her father and the elders in the family?

First, it must be hers.

The faces of Qiu Tian and Kui Xinyu were undoubtedly more ugly than Yu Sihui.

The dignified martial arts alchemy genius, the ancestor of the pill kingzong, a rare genius in the Tianyao sect in a century, came to participate in the alchemy competition of the lower four realms, and he couldn't even get the first three, no, not only the first three, Even only got fifth and sixth, shame, unprecedented shame.

The two only felt that their faces were hot, and their hearts felt like fire.

"No, the winner must be me!"

Both of them clenched their fists. In this third round of assessment, the competition was for real alchemy techniques, not fire control or elixir cultivation, but alchemy.

He doesn't believe that with their strength, they will lose in this third round. They want everyone on the court to know what their true strength is.

Temporary glory is nothing.

What matters is who can really go to the end.

boom! boom! boom.....

At this moment, it was as if they had acted in advance, Ye Mo and others moved at the same time, their hands swiftly swept, engulfing the elixir in the sky.

The shape of these elixirs is very vague, and when they enter the area around each person, they become vague, making it impossible to see their appearance at all.

And in the sky, once an elixir is dragged away, another elixir will appear immediately, making it impossible for others to discern what the elixir is taken by everyone. This is to protect every player.

[Chapter 1359: Lost and recovered](#)

After a quarter of an hour, everyone has chosen their own elixir.

Master Ouyang Zhengqi waved his hand and put away all the elixir.

Everything is ready, let's start.

After an order was given, the final competition began.

boom!

A powerful mental storm swept down, madly disturbing every player.

Qin Chen had already figured out what pill to refine, but he did not do it the first time, but was thinking and analyzing.

The pill he was going to refine was quite special. He didn't decide to take it rashly before he was completely sure. There was only one chance for this assessment. Once he failed, there would be no hope of redemption.

Therefore, after he took a deep breath, he was not in a hurry to start training, but while thinking, he was adapting to the terrifying spiritual storm of the heavens and the world.

But the others were not as careful as Qin Chen.

Some alchemists immediately sacrificed real fire and pill furnace after the game started, and in an instant, amazing flames filled the field.

The third round of competition time is much longer than the previous two rounds, but it only takes half a day. For many alchemists, they want to refine a pot of king-pin medicine in half a day, and under these conditions, and it's not easy.

Therefore, at the beginning of the game, they directly began refining.

call!

Under the control of spiritual power, the strong flames licked the furnace cauldron continuously, and began the first step of alchemy to heat the cauldron.

In the past, such steps were almost a skillful thing for Wang Pin Alchemists who could enter the third round, but this time, it seemed extremely funny.

The real fires controlled by these pharmacists were all crooked. Some pharmacists wanted to wrap the flame around the pill furnace. As a result, under the impact of mental power, the circular flame was thin on one side and thick on the other.

There are also pharmacists who want to turn the flame into a pagoda-like shape, and the entire pagoda is tilted there as if it was not built.

Some alchemists disperse the real fire into dozens or hundreds of tiny flames, so that the furnace can be heated more evenly. The flames that can be dispersed are of different sizes, the big one is the size of a fist, and the small one is the size of a soybean. Even many flames are dying.

The whole scene was very embarrassing and extremely funny.

"It is too difficult to refine the pill under the influence of a spiritual storm close to the seventh!" "The alchemist relies heavily on the spiritual power to refine the pill. Fire control requires spiritual power, and the tempering of elixir requires spirituality. Strength, fusion of medicinal properties also requires mental power, not to mention pill condensing, any fluctuation of mental power will affect the refining of pill, not to mention such an environment

Down. "

"If it's me, let alone alchemy, I am afraid that just resisting the mental energy storm from the outside world will exhaust all energy. Where is the energy to make alchemy?"

Everyone opened their eyes wide and exclaimed.

The difficulty of refining, just thinking about it, has already made them sigh.

But it has to be said that almost everyone who can enter the third round is weak. Although the flames on display are crooked and very embarrassed, these players quickly got used to it after the initial discomfort, and they barely controlled one by one. With the flame, refining.

But some people are not so.

Huhuhu!

After a brief perception, clusters of flames were released from the hands of Ye Mo and others, and immediately shocked everyone on the field. Compared with the embarrassment and hardship of others, the flames released by Ye Mo and others were incredibly proficient. Although mental storms also had a certain impact on them, it was obvious that the flames controlled by several people swayed slightly, but they were different from others. Compared with people, it's just like being still, let

People have to marvel.

"Awesome, worthy of being the saint son of every major domain."

"This is too strong? How can it be possible to control it so well under a mental storm?"

"Hi, even though they are disturbed by mental power, how do I feel that Ye Mo's flames are even more precise than when I waited without interference."

"Cut, you can compare with Master Ye Mo?"

There was a lot of exclamation on the court, and there was a lot of discussion.

As the champion of the first two rounds, Qin Chen naturally received a lot of attention, but when everyone looked at Qin Chen, they couldn't help but be taken aback.

Because Qin Chen didn't even have the slightest preparation to start refining.

"This preparation time... seems to be a little longer, right?"

Although the alchemist needs to be prepared before refining, generally speaking, the time is not long, not to mention that it is a competition now and there is a time limit.

Moreover, even if it is necessary to adapt to the interference of the mental power storm at the beginning, it should be the familiar fire first, display the real fire, and fight in the real refining. How can it be like Qin Chen who has been unmoved. To adapt?

It takes a long time to adapt this way and the time available for refining is shorter, which will inevitably have some impact on the next refining.

"Could it be that Qin Chen is not weak in fire control, but not strong in alchemy?"

"No, Qin Chen is also the champion of the first two rounds anyway. Without strength, how can he get to this point?" "This is not necessarily true. After all, Qin Chen is too young. How strong can he be in refining medicine? The two rounds of assessment were fire control and elixir cultivation. In the first round of fire control, Qin Chen just let the flames compete with each other and did not even refining. As for the second round of elixir cultivation, he also did not show. Outstanding

Don't have a strong mental power. It is very likely that he is the weakest among many players in terms of mental power level. After all, he is only about 20. "

"If you say that, it's really possible."

"Because of his young age, although his talents are high, but his mental power level is not enough, he was immediately exposed in the third round of assessment. Being disturbed by such a strong mental power, it may be difficult for Qin Chen to even refine, let alone Said it was a good grade."

"possible."

Everyone nodded.

With that said, it is really possible that Qin Chen is too young. No matter how well he performed in the first two rounds, the third round of assessment is the refining of elixir, and the assessment of the pharmacist is comprehensive, Qin How could Chen be as perverted as the first two rounds of assessment?

In this way, it is still unknown that Qin Chen wants to win the championship?

When this idea came out, everyone was excited, ten times the odds, how upset the feeling of regaining lost?

At this time, other players have already started to refine medicine.

Putting a strain of elixir into the pill furnace, many pharmacists sweated and struggled to control the reaction in the pill furnace. It used to be very easy to refine. At this moment, it seems so difficult. Any step is almost costly. All the hard work of everyone.

puff! Suddenly, a pharmacist made a mistake, and his mental power was immediately disrupted by the mental power storm, a mouthful of blood spurted out, and the pill furnace in front of him burst open.

[Chapter 1360: Break through](#)

boom!

The pill furnace exploded, like a bolt from the blue, the alchemist opened his mouth and spouted blood, his robe was charred, and the whole person was instantly moved out of the ring.

Whoosh whoosh!

Suddenly, a pharmacist stepped forward, helped him up, and was relieved after checking.

Although this son was embarrassed, it was only a mental backlash, and his injuries were not serious, but he had already lost the opportunity for the third round of assessment.

With a sullen look on his face, after a simple treatment, he returned to his team in embarrassment with a sad look on his face.

After the first pharmacist failed in refining, it was like a domino being pushed down, bang, bang, and there was a continuous roar from the ring. One after another, the pharmacist failed to control and was eliminated.

In less than a quarter of an hour, no fewer than a dozen people have been eliminated and disqualified from the competition.

Everyone was moved by this scene.

It's too difficult.

Many pharmacists themselves are only the peak medicine kings at the early stage of the seventh stage, and Wang Dan, who refining the seventh stage, does not dare to say that he is 100% successful, let alone being under the influence of approaching the seventh stage mental power storm.

Some players, even if they barely blocked the impact of their mental power, they only carefully refine them, and they don't have much confidence in their success.

Of course, not everyone will be affected.

Huhuhu!

The refining of Ye Mo and others was not affected by the impact of mental power in the slightest. They had calm eyes and focused on it, shielding all interference from the outside world.

"Hiss, how is this done?"

"Under the interference of close to the seventh-order mental power, can you be so skilled in refining?"

"how can that be?"

The crowd was shocked.

"Look, there seems to be a transparent barrier beside Ye Mo and them." Suddenly, someone whispered.

"It is a mental power barrier, able to resist external spiritual power invasion."

"Awesome, use your own mental power to form a mental power barrier outside your body, so that you can minimize the interference of external mental power storms."

"No wonder their refining seems to be completely unaffected."

Everyone suddenly realized the reason.

But some people still asked suspiciously: "Since the mental power barrier is so easy to use, why don't other players do the same?" Someone suddenly sneered: "Do you think the mental power barrier is so easy to form? The loss of the pharmacist's mental power is great, if it is normal, but in such an intense refining, any mental power is extremely important, and Ye Mo and others can do it.

At the same time as the mental power barrier is used, it will not have much effect on the self-refining medicine. "

"That's it."

Some players who weren't alchemists suddenly came across. Although the game was not over yet, just this one detail had already revealed the cultivation skills between Ye Mo and others and the other players.

With the passage of time, players continue to be eliminated on the field. The original number of players with more than 180 people has become only more than 130 people left, and the faster they are eliminated, the faster they get eliminated.

In the blink of an eye, half of the time passed, and Ye Mo and others' refining gradually reached the later stage.

Buzzing.

The pill furnace was trembling violently, and he had entered the final stage of pill condensation.

Snapped!

On the ring, Ye Mo suddenly shouted, and slapped a palm on the pill furnace, with a bang, the furnace lid opened, and the rays of light rose into the sky, bursting with amazing glow.

He let out a long roar, and his eyes burst with radio bursts, like a **** king descending to the world, with great power.

"Look, Ye Mo has succeeded in refining!"

"What pill did he refine?"

"Such a vision is definitely a seventh-rank Wang Dan, and it's definitely not the Wang Dan of the early seventh-ranking stage. I just don't know if it will be the middle or late seventh-ranking."

After everyone's discussion, the halo in front of Ye Mo dissipated. He was holding ten crystal clear pills in his hand, and there was a hint of pride on his face.

He succeeded!

Instead of being overwhelmed by the pressure, he completed his self-flying flight. Under the suppression of the mental power storm, he successfully completed a feat, and refined a pill that he could not necessarily refine under normal conditions. From then on, He can be called a master, a true alchemy master.

With a proud face, he put the pill in his hand into the pill bottle, with his hands behind him, and he seemed confident.

"This pill breath, this confidence, is definitely the pill of the late seventh stage, but I don't know what pill it is, and how high the grade is." The alchemy master who came from the Martial Domain gave it after careful observation. in conclusion.

Suddenly, there was a sensation all around.

Qipin late pill?

And it is the seven-stage late-stage pill under these conditions. How can this be done?

"It won't be Master Ye Mo. Under such pressure, he has completed his own breakthrough and refined Wang Dan of the late seventh stage."

"The thirty-two-year-old seventh-stage late-stage pharmacist, hiss, is this still a human?"

"It's hard to believe that it was refined under these conditions."

Everyone looked at Ye Mo with shocking gazes. There were also many Medicine Kings who came to watch the assessment this time. The weakest one was also the Tier 6 Medicine Master. As for the weaker, they didn't have the face to come and watch.

And among these medicine kings, which one is not the Seventh and Eighty, is working hard to break through to the first level. As for the later stage of the Seventh Stage, it is enough to serve as the pavilion master of the first realm in the North Tianyu, even in the Eastern Continent, he can become the elder of the Supreme. It is the goal that most of the lower four domains alchemists will strive for in their entire lives.

But now, a junior in his thirties has arrived earlier than them. How can they bear this kind of shock?

Although the difference between the middle stage of the seventh stage and the late stage of the seventh stage is only one level, for most alchemists, it is an insurmountable gap, one is heaven and the other is earth.

"Master Ye Mo must be the first this time."

"After the first two rounds, he ranked second, but after this round, he can surpass Qin Chen in scoring. He is not a champion, who is a champion?"

"Hey, I said it a long time ago, Master Ye Mo must be the number one this time."

"My pharmacist in the Eastern Continent is so awesome."

"Fortunately, I bought Master Ye Mo to win the championship, and also bought a million real stones."

"Haha, what are you buying Master Ye Mo? I bought two million Qin Chen and can't win the championship. You can earn hundreds of thousands of real stones at most, and I can earn 20 million, hehe, hehehe!"

The crowd was overwhelmed with excitement.

At this moment, there was another astonishing roar, Kui Xinyu also completed the refining.

Hum!

The dazzling pill light reverberated between heaven and earth, and it was not weaker than the pill light made by Ye Mo.

"Hey, did Kui Xinyu also refine Wang Dan in the late seventh stage?"

Before he was shocked.

Boom boom boom... one after another roar sounded, I saw Yan Equator, Yu Sihui, Qiu Tian and others have also completed their own refining. For a time, the bright Dan light obscured the sky and the sun, and the whole ring was dazzling. It's stunned.
