

Valkyrie 2711

[Chapter 2711: second round](#)

He was in a daze, as if seeing the twelfth heaven of the Holy Array move.

"Have it?"

"It seems not?"

Even Master Mu Gutian frowned, he seemed to feel it vaguely, but when he looked carefully, there was no change in the twelfth heaven of the Holy Array.

This is a treasure that was refined by the creators of Tiangong, who can shake the thing of that adult?

It must be dazzled.

boom!

When everyone was puzzled, the time for a stick of incense was over, Qin Chen never engraved the formation pattern of the ninth layer, and was shaken down from the steps.

"Hey, it seems that Qin Chen still couldn't go further."

"Damn, this is pretty awesome, the ninth floor, do you still think it's not enough? Are you going to guard against the sky?"

"Isn't that Qin Chen broke into the ninth floor when he was in the ancient sacred tower? I wonder if he can also reach the last floor on the steps of the formation." "Are you an idiot? One is the martial arts test, and the other is the refining master test. Are they not the same difficulty at all? If you reach the twelfth floor, that is the qualifications of the holy master-level refining master, the whole heaven will be a sensation, and countless cities will be swarmed

Guanghan Mansion, dare you imagine? "

The crowd was sensational, and everyone looked at Qin Chen in shock, the formation and martial arts duo, this was more shocking than anything else.

Although the assessment of Tiangong's refiner had just begun, Qin Chen had become the only core in everyone's mind.

The twelve heavens of the nine-story holy formation are enough to stir up the entire Guanghan Mansion.

"The ninth layer, boy, you are indeed very good, but you can achieve this result only because the little master opened a desert, you wait, the next round, little master, I will not let you occupy what should belong to the little master My limelight."

Bai Yutang came to Qin Chen and said proudly to Qin Chen.

The nostrils are upside-down, very complacent.

After defeat, there is still such arrogance, and this is Bai Yutang, as if it was him who broke into the ninth floor, and Qin Chen was his defeat!

Qin Chen ignored the other party, showing off? If he wants to be popular, he won't go straight down on the ninth floor, as long as he is willing, he can go up on the tenth floor, or even higher.

"Huh, this Qin Chen... really **** it, but the high formation talent does not mean that the refining base is also high. In the next round, I must defeat this Qin Chen." Yun Mengze looked at Qin Chen with cold eyes. Endless killing intent emerged in his heart.

Hum!

The first round of assessment is over.

Above the sky, the strong man who worked in the sky flew down again. He raised his hand, and immediately, the twelve heavens of the Holy Array that had been standing on the square flew away, quickly became smaller, and returned to the sky. Above.

"At the end of the first round of assessment, a total of 3,456 people passed the assessment. Among them, 3,297 were eliminated on the sixth level, and 156 on the seventh level. , Two people on the eighth floor and one on the ninth floor."

This expert in the refining division gave a shocking look at Qin Chen.

It was this young man who didn't even know what the role of the twelfth layer of the Holy Array was and needed his special explanation. He actually broke into the ninth floor. He no longer dared to show any disrespect to Qin Chen. Some of them are full of envy.

Heaven, respect the strong, no matter who you are, as long as you are strong enough, you can gain respect.

"Now, the second round of assessment will begin immediately. All those who failed the first round of assessment, please leave, and those who have passed, please come to the center of the square."

Suddenly, more than 3,000 people gathered in the center of the square.

I saw above the sky, array plates and array flags suddenly fell, enclosing this area. At the same time, the staff of TianWorks put up a series of refiners in the center of the square. station.

There are more than 3,000 refining tables, vast and immense, giving people an extremely shocking feeling.

"This second round, is it a refining process?"

"It should not be that simple. The first two rounds should be the assessment of certain different projects, and there will be no direct refining assessment."

"It makes sense. If the refining is carried out directly, those experienced refining masters will have the absolute upper hand, and they will not be able to select true geniuses."

The crowd talked to each other.

The strong man of Tianwork continued: "This second round of assessment tests everyone's ability to analyze, understand, and build materials." "Everyone should see the refining platform in front of them. The work will give each contestant twelve different materials. These twelve different materials are all materials from other places in the heaven outside Guanghan Mansion.

Moreover, the properties and origins of each material are different, and they are materials that the entire Guanghan Mansion has never had. "Moreover, the grades of these materials are not high, they are all local grades. What you need to do is to use your own experience and means to identify the characteristics of the following materials during the time of a stick of incense, and Use these materials mentally

Activate to release the characteristics of the material perfectly. "

"One stick of incense time, as long as you can successfully activate the six materials, even if you successfully pass the assessment, you can participate in the third round of final assessment."

The examiner's voice fell, and the whole audience was boiling. Twelve kinds of materials, activate six of them, and they are only local products. This sounds not difficult, but in fact, the difficulty is extremely astonishing, because the assessment is all outside Guanghan Mansion, Guanghan Mansion. The craftsmen have never seen

Materials.

Too much work was spent on assessments this day, right?

Everyone wanted to see if the materials that came out were really that special.

"Now, go to the assessment item!"

Seeing that the strong man gave an order, immediately, the staff of TianWork came to the refining platform in front of everyone and took out all the twelve materials.

What are these?

There are black rocks, earthy clods, a piece of wood with grains, some metals, and even liquid materials.

"Hi, what kind of material is this?"

"I haven't seen any of them?"

"It's incredible."

"Where did Tianjiao find these weird materials?"

The twelve kinds of materials in front of everyone are the same, exuding a variety of different auras, making every refiner feel uneasy.

Because they all discovered with amazement that these materials were as good as the examiner who worked in heaven said, that they didn't even know any of them, and they were not all the materials of their Guanghan Mansion.

How vast is the heaven?

Each place has its own unique materials, and there are many types, such as the sky full of stars, which are simply innumerable.

Yitian works all over the many realms of the heavens, and it is too easy to find twelve kinds of materials that the Guanghan Palace refiner has never seen before. At the beginning, many refiners on the field still felt that it was not difficult to activate the six materials, but now everyone felt a sinking heart. It was definitely not easy to activate the six materials in one incense stick.

[Chapter 2712: Twelve materials](#)

Feeling the solemn atmosphere on the court, Qin Chen nodded involuntarily.

Tian Jiao really took great pains to select the top refiner.

The so-called activation material is actually very simple. Any kind of material has its own characteristics, such as cold star iron, the toughness of meteorite iron with stars, and the coldness of the outer space. If you want to use cold star iron to make saints, you must first understand its characteristics. Then activate it to make

Its characteristics are perfectly distributed.

Here, there are two steps, the first is to understand and analyze the material, and the second is to activate it.

The first of these is extremely important. If you don't know a material and smelt it directly, it's easy to cause problems. For example, cold star iron is a material with cold properties. If you directly activate it with sun fire, it will cause its cold properties to be destroyed, material damage, and refining.

The natural grade of the weapons that came out dropped, and even became waste.

A powerful refiner needs to distinguish its attributes and special and special treatment after obtaining a material.

After all, some materials are very cherished. If the refiner makes a mistake and directly destroys the materials, once the materials are scrapped, where can I find them again?

Second, it is not easy to activate materials.

Different materials have different mental power activation methods, and each material is different, which also tests the experience and ability of the refiner.

This is actually a method that any refiner must master. Both of these are the most basic but also extremely important steps when refining tools. The understanding of materials and the strength of activation techniques represent the strength of a refining master at the most basic level, which is enough to test. A real refiner

Foundation.

And this second round of assessment is to see how many materials the assessors can activate within the specified time.

The more activated, the natural representation of this refiner's understanding and manipulation of materials, the stronger the strength and the more boundless natural future.

Moreover, in order to maintain a certain degree of fairness, the twelve kinds of materials that Tian Gong found were all materials that were completely absent in Guanghai Mansion, and they were all local materials.

This is enough to see the dedication of Tian's work.

First of all, only the local refiner can participate in the assessment of Tianjiao's refiner. Both are local refiners and analyze the materials of the local products. Although the later stage has experience advantages, the early stage will not fail to analyze.

Secondly, everyone has never seen materials before. Starting from scratch, it can better reflect the level of material analysis by examiners.

On this day of work, there is indeed a set of assessments for the refiner, first the formation method, and then the material analysis. The assessment is carried out from the most core, most basic, and most critical place.

Rather than from the fancy refining techniques and other aspects of assessment.

The understanding of formations and materials are all basic skills and the basis of refining tools. These are difficult to improve in a short period of time. If you have this talent, then there is, and nothing else.

As for the refining techniques that many refining masters usually pay the most attention to, the ratio of the materials of the sage weapons, etc., they are not evaluated for daily work.

Because the work of heaven is very clear, the technique of refining tools, the proportion of holy weapons, etc., can all be acquired from his daily work, and only the most basic things can be evaluated to select a truly powerful refiner.

And this most basic thing tests the true skills of a refiner. As long as the basic skills are solid, the refiner at the early stage of the plot may not necessarily be worse than the refiner at the later stage of the plot.

"Well, this second round of competition, I must stage a Jedi counterattack."

"Material analysis, this is what I am best at. This round, I must be a blockbuster."

Many refiners are eager to read their hands, full of confidence.

On the arena, more than three thousand contestants, all stood by their positions.

Suddenly, Qin Chen felt a vague murderous intent, turned his head to look, and found Yun Mengze staring at him with cold eyes, and an icy chill appeared between his brows.

Obviously, Yun Mengze was very unwilling to lose to Qin Chen in the first round, and wanted to find his place in this second level and regain his first place.

Aside, Bai Yutang also looked at Qin Chen frequently, gearing up, full of excitement. "Hey, that kid named Qin Chen, you wait, although the materials in front of you are all you have never seen before,

but I am the young master of the treasure hall, I have seen and contacted since I was young. Material, beyond your imagination, hey, you

Just wait to adore me. If I still lose to you in this round, I will give you my last name. "

Bai Yutang pointed out a **** to Qin Chen, triumphantly.

Qin Chen didn't bother to pay attention to this narcissist. This guy is so narcissistic than the **** cat. Isn't the fat man thick-skinned?

As for Yun Mengze, Qin Chen ignored it even more, and Yun Mengze would never be his target and opponent.

Qin Chen's attitude of not paying attention to Yun Mengze immediately angered him, and a trace of killing intent passed quietly through his eyes, gloomy and cold.

Hum!

Suddenly, countless arrays above the square glowed, forming an array, forming an independent space around each player.

This is to prevent interference between each other, set up a barrier.

Above the sky, the assessment expert said loudly: "Now, the second round of assessment, start!"

Buzzing... As his voice fell, a series of strong or weak mental powers rose to the sky, densely packed mental powers, in their respective small spaces, descended on the materials in front of them one after another, beginning Analyze the structure inside and find

Ways to activate these materials.

In front of the square, a stick of incense slowly ignited and gradually burned.

Every refiner knows how to activate the materials, but it is not an easy task to activate six materials that have never been seen before in a short stick of incense.

First, we must analyze the material characteristics and internal structure, and secondly, construct different mental power lines.

What's more, these twelve materials also randomly have various different attributes. For the players, each activation will consume a lot of their energy.

For a time, countless mental energy permeated, and every player looked solemn and highly nervous.

Hum!

After dozens of breaths at the start of the game, Bai Yutang suddenly swept his hands against a rock material on the refining stage, and a series of terrible mental powers poured into the material and began to build a mental power array. .

"What? Bai Yutang started preparing to activate the first material so soon?" Everyone was shocked, and only then began dozens of breaths. Many people have not analyzed the structure and characteristics of the first material. After coming out, Bai Yutang actually started to activate, is there such a big gap?

[Chapter 2713: Start activation](#)

"Hey, this first material should be some kind of star magnet. It is very rare, and its internal structure is also very complicated. However, I have seen something similar to this kind of star magnet before.

Activated, not available

The ordinary method of activating elemental ores usually requires a specific mental formation structure..."

Bai Yutang's heart was triumphant, and under his mental power formation, the originally black rock started to emit a faint blue light.

"This...really activated?"

The crowd was stunned, the speed was too frightening.

"Om!"

And when everyone was shocked, on the other side, Yun Mengze's hands quickly moved, and in his eyes, an endless whirlpool of spiritual power burst, covering the material in front of him.

He also started to activate.

call out!

The material in front of him quickly burst into a faint light. Although it was the second one to activate, the speed was actually faster than Bai Yutang, and the latter came first.

"what?"

Everyone was shocked and looked at Yun Mengze in amazement.

He shot after Bai Yutang, and he was activated faster than Bai Yutang seemed to be. It was terrifying.

No one knows that Yun Mengze, who has absorbed the experience of the seven top crafting masters, has memories of countless materials in his mind, plus he himself is a top crafting genius. Only when the two are combined, they can come first.

"Haha, my son is really amazing. The champion of this round must belong to my son."

Yun Dongguang clapped his hands excitedly.

Although Tianwork's assessment is not ranked, everyone will automatically form this name in their hearts. In the first round, Qin Chen has the upper hand. As long as Yun Mengze can defeat Qin Chen in the next two rounds, he may not have failed to kill that. Kid's opportunity.

Buzzing!

Two rays of light flickered, and the first material in front of Bai Yutang and Yun Mengze all lit up with pure light. Then, the two threw aside the first material and began to quickly analyze the second material.

This.....

Everyone was shocked, and the speed at which they activated was too terrifying.

Activating a material is not just simply using mental power to activate it, but requires mental power to build formations in it, so that the characteristics of the material can diverge continuously, and finally reach a peak.

This requires a certain process.

Both Bai Yutang and Yun Mengze completely activated a material in just a few breaths, which simply broke people's imagination.

What's even more shocking is that after observing the second material for a period of time, the two men moved again and began to activate the second material.

"by!"

The crowd is going crazy.

Because at this time, some of the old top craftsmen among the other appraised craftsmen have just started the activation of the first material.

"Hey, even the Tianhe Zhenzong Taishang at the pinnacle of land quality enshrines the master of Qu Yue Yong, and has just begun to activate the first material. Both Bai Yutang and Yun Mengze have already begun to activate the second material." "Really. It's a metamorphosis. In terms of understanding and knowledge of materials, Master Qu Yue Yong is definitely the top class. Not only Master Qu Yue Yong, Elder Yu Haoguang of Qi Pavilion, rumored to be in charge of the materials department of Yunzhou Qi Pavilion, he has seen materials. Countless, he

It has just been activated for the first material. "

"Perverted, too perverted!"

The crowd was sensational, and even the staff in the Tianji Refining Division, where the referees were conducted in Skyrim, were shocked, because when they stepped forward, they did not dare to say that the activation speed would be faster than the two. fast.

"Such a method is simply not something ordinary refiners can do."

"Awesome, the world's arrogant, worthy of the world's arrogant."

"At this speed, doesn't it mean that Yunmeng Zezhouzi is better than Elder Yu Haoguang in terms of material attainments? How is this possible?"

For a while, everyone was talking about it. Almost all of them turned their attention to Bai Yutang and Yun Mengze with a look of wonder.

Because compared with other players, the two are leading too much.

It was just a small piece of incense. Three materials had already been activated in front of the two of them, and Yu Haoguang and Master Qu Yueyong, who were most activated next, had just begun to activate the second material.

Following this trend, within a stick of incense, Bai Yutang and Yun Mengze didn't even talk about activating the six materials, and could even attack the miracle that all twelve materials were activated.

"The speed of Yunmengze and Bai Yutang is so fast. Bai Yutang, I understand, the young master of Baoqitang, Baoqitang is the top crafting force in Guanghan Mansion. He has seen countless top materials since he was a child, and he was born with it. Advantage, but this Yunmengze actually

It can be so fast, incredible, this child has such talent in terms of materials? "

Above the sky, a strong man shocked.

The speed of Yun Mengze and Bai Yutang seemed to be the same, but in fact, Yun Mengze was actually a bit faster than Bai Yutang.

This is indeed a paradox.

It is as if the gun gods are fed by bullets. If you want to achieve the ultimate in the basic skills of material activation, in addition to the great talent, you should have seen countless top materials, which is more reasonable.

And Yun Mengze, who came from Yunzhou and was a younger generation, had such a talent, which is really staggering.

"Everyone, children have been very interested in materials since they were young. When all kinds of materials are in his hands, they seem to be able to turn stones into gold. It is reasonable to have such achievements."

Yun Dongguang's heart tightened, but he said with a smile. He naturally knows why his son is so awesome. If you have the experience and memory of seven top crafting masters, you will be as awesome as Yun Mengze. Bai Yutang has seen a lot of materials, but it can be awesome. Comparable to the top seven old brands

The life experience of the master of the instrument?

If the first round of assessment is more concerned with talent, then in the second round, there will be a certain bonus to experience, and Yun Mengze undoubtedly took this bonus to the extreme.

This son is extraordinary!

Even Master Konoha nodded frequently, and Yun Mengze's performance exceeded his expectations, which shocked him.

By the way, what about Qin Chen?

When everyone was shocked by Bai Yutang and Yun Mengze, a voice of doubt suddenly rang.

Yes indeed!

Where is Qin Chen?

Everyone reacted one after another, their attention was attracted by Yun Mengze and Bai Yutang who were the first to take the shot, but they had forgotten Qin Chen who was the best in the first round of assessment.

Where is he going?

For an instant, everyone looked at Qin Chen who was against the sky in the first round.

Rely on!

At this look, everyone's originally shocked eyeballs almost didn't come out, and their expressions were dull. I saw that in front of the refining stage where Qin Chen was, not even one material was activated, but Qin Chen himself didn't realize it. He picked up that material from time to time and looked at it. The material seemed to be completely absent. Plans to shoot.

[Chapter 2714: Down](#)

"Damn, what is this kid doing? He didn't even start to activate a material?"

"Look left, look right, is this playing?"

"When is this, he hasn't started to activate?!"

Everyone was speechless, one by one was anxious for Qin Chen. At this time, both Bai Yutang and Yun Mengze have begun to activate the fifth material. Even the weakest one has also activated one material. Only in front of Qin Chen's refining table, even one material is used. No activation, and no action at all

The plan made everyone surprised.

However, Qin Chen was still the champion of the twelfth heaven in the last holy formation, and the strong contrast made people unbearable.

"Does he want to be the same as the previous assessment, if he doesn't speak, it's a blockbuster?"

Someone frowned.

Qin Chen's previous miracle, when they were speechless, couldn't help but reflect and didn't dare to draw conclusions easily.

Qin Chen's performance in the last round was really against the sky. At the very beginning and at the last moment, he suddenly emerged and won the first place. Does this round also want to be the same as the previous one?

It's just that his words just fell, but a refiner on the side gave him a blank look. "Are you an idiot? If you don't scream yet, it's a blockbuster? This round is completely different from the previous round. In the last round, every step has a time for an incense stick. As long as you pass through the steps within one incense stick, Will not be eliminated. But this round,

You must activate six materials in a stick of incense to not be eliminated. Now that the incense is almost half of the incense passed, Qin Chen has not activated even one of the materials. Tell me, why did he make a blockbuster? "Yes. "The words of this refiner also received the approval of another refiner: "The first round of assessment is to build formations. In the case of low-level steps, each formation is not difficult. Just a few breaths, you can be at the last minute

The formation is constructed, but this round is different..."

"The activation of materials requires a process, which itself will take a certain amount of time. Even if Qin Chen analyzed the activation methods for all materials at the last moment, he would not have enough time to successfully activate."

"In that case, is this Qin Chen really a material that hasn't been analyzed, but how is this possible? He is the champion of the first round?"

"Could it be that there was a problem with his first round of assessment results?"

"Isn't it possible? With so many strong people paying attention, how can you cheat?"

"Weird, so weird!"

The crowd talked a lot, all with a dumbfounded and confused expression. On the one hand, they did not believe that Qin Chen would not be able to activate even one material. On the other hand, many refiners who were eliminated in the first round made it clear that it takes time to activate materials, and Qin Chen cannot be like the first round. , Jedi at the last minute

Fight back.

The two strong contrasts made their minds almost down.

"This Qin Chen hasn't activated a material yet, what is he doing? It's almost half the time passed, right?"

Above the sky, countless powerhouses are also puzzled, completely unable to understand.

"Huh, Master Konoha, I suspect that the reason why the kid got the first place in the previous round was definitely because of his luck and even cheating. The real skill of refining is simply terrible." Yun Dongguang sneered. .

Master Muye ignored Yun Dongguang's words, just frowned, staring at Qin Chen, wondering, he didn't know why Qin Chen kept swinging the material position?

But he had a vague feeling that Qin Chen definitely had his intention to do this. As for the real man Tianxing, he is not so good-tempered, but he smiled coldly and disdainfully said: "What is the hurry, the emperor is not in a hurry, the **** is not in a hurry, now the game is not over, you have to make a conclusion so early. Something, Lord Yunzhou

Is it certain that Qin Chen will not stage a Jedi counterattack in the end? "

The words of Real Person Tian Xing made Yun Dongguang almost choked. At this time, Real Person Tian Xing was so optimistic about Qin Chen, which was ridiculous.

He sneered, then sneered: "Okay, okay, Tianxing, then let's wait and see, I'm going to see, the game is almost halfway through, and how the kid who hasn't activated even one material will be played. The Jedi counterattack..." "Master Konoha." Yun Dongguang turned his head, looked at Master Konoha, and said coldly: "This Qin Chen's second round result is so bad, Yun Mou has reason to suspect that he first round Is there any problem with the results? I hope Master Konoha will review it again and see

See if this kid cheated in the first round of the assessment. If he really dared to cheat in the assessment, how can he restore the reputation of Tianjiao if he does not kill him on the spot? "Master Konoha

frowned. Before he could speak, he listened to Mu Gutian coldly said: "Master Konoha, this is the assessment of the Tiangong Refining Division. Can anyone interrupt?" If you are an individual, you can apply for review.

Why is there no authority? "

When Master Mu Gutian spoke, the audience was silent for an instant.

"Master Mu Gutian, it's just..." Yun Dongguang's expression changed and he hurried to explain. "Shut up, Lord Yunzhou, if you continue to watch here, please shut up and watch it carefully. This is the assessment of the Tianzhu Craftsman Division. They have Master Konoha and they are the masters. If you don't talk nonsense, just go away. Out of here, not only Yunzhou master you, its

Others are the same. "

Mu Gutian said lightly, his voice calm, without any emotion.

Suddenly, the audience was silent for an instant, and no one dared to complain.

Master Mu Gutian has this confidence and strength to say this.

Above the square, the second round of assessment is almost coming to an end.

At this moment, the materials in front of Bai Yutang had already been activated ten kinds, which was only two kinds behind all twelve kinds, while Yun Mengze's grades were the same as Bai Yutang's ten kinds.

As for the other refiners, the one with the most only activated nine types, which was still a certain gap compared to the two.

There is still less than Xiaobanzhuxiang, Bai Yutang and Yun Mengze are only two types that have not been fully activated. They two can really activate all the materials, right?

For a while, everyone's eyes were focused on the two of them. You chased me during the assessment process. It was too exciting. Everyone was **** and flushed. Master Konoha and others were quite excited. All the twelve types were activated. Even in a large-scale assessment of all the Tianjiao in the entire mansion, there were few cases where all the twelve materials could be activated. Once Bai Yutang and

Yun Mengze can do it, representing the talents of the two, almost reaching the top level in a Holy Lord's Mansion. What glory is this? Of course, some people's eyes were on Qin Chen.

[Chapter 2715: Allelopathy](#)

Because now, Qin Chen still hasn't activated even one material. He saw the twelve materials in front of him, randomly placed, forming a very strange shape, like a graffiti.

"This Qin Chen is really anxious, and even a material hasn't been activated up to now, he won't really fail the test, right?"

"The first in the first round, in the second round, even one material can't be activated, which is too weird."

"Watching patiently, maybe a miracle will happen."

"Haha, at this time, do you think there is still a miracle?" At this moment, many people completely gave up on Qin Chen, and compared with Bai Yutang and Yun Mengze. In the end, Qin Chen, who broke into the ninth step and got the first place, looked like a clown in this round.

.

However, Ao Lie, Qin Tingting and others are still full of confidence, and they will never lose confidence in Qin Chen at any time.

Qin Chen must have his intention to do this.

Just when the entire assessment was about to end, and when both Bai Yutang and Yun Mengze were activating the twelfth material, Qin Chen finally moved.

Hum! Qin Chen placed the twelve kinds of materials on the stage into a strange shape, and in his eyes, a powerful spiritual force suddenly diffused out. Along with the movement of Qin Chen's hands, a sudden formation in the void Weird and complex mental formation

, Fell down suddenly.

This spiritual pattern is very mysterious. It is actually formed by the combination of twelve spiritual patterns. Each spiritual pattern is very mysterious, and the combination of the twelve patterns finally forms a large pattern covering Go down.

The twelve array patterns represent twelve kinds of materials, and each material is covered with an array pattern. In the end, the entire refining stage converges into an extremely terrifying huge spiritual pattern.

Qin Chen's hands flicked, and a series of terrible mental powers shot out, and quickly merged into the most central material.

Hum!

This is a wooden block with textures, very peculiar. Among the previous twelve materials, the difficulty is medium. Before this block, many people spent a lot of time to activate it completely. .

But at this moment, just for a moment, this piece of wood suddenly lit up with an earth-yellow halo, and the bright light instantly lit up. At the same time that this wooden block was activated, Qin Chen's gaze fell on the other two materials on both sides of the wooden block. These are two kinds of rocks and metals with brown and red colors. And the breath of the wooden block activated

, These two materials also suddenly lit up with a halo of brown red and bright red.

In a short time, Qin Chen activated the three materials, and the speed was so fast that it was too late for people to react.

"What a quick technique!"

Qin Chen's actions caused Ao Lie and the others to be shocked. Above the sky, Zhen Xing Tian, Mu Gutian, and Pavilion Master Wan Xinde have also been paying attention to Qin Chen. At this time, their pupils all shrank, showing shock. color.

It's too fast. In a few breaths, the three materials are activated. How is it possible? If they come, they may not be able to do it.

No, it may not be possible, it must not be possible.

"Qin Chen..."

Master Mu Gutian, who had always been very calm, couldn't keep calm at this moment, and suddenly stood up.

Qin Chen? What happened to Qin Chen?

Master Konoha and others were all paying attention to Bai Yutang and Yun Mengze. They wanted to see if they could activate the last twelfth material at the last moment. When they heard the shock of Master Mu Gutian, they turned their heads. .

From this look, all the master craftsmen, including Master Konoha, were instantly dumbfounded.

Qin Chen, who hadn't even activated one material before, turned out to be five lights on the mixing stage at this moment. In this short moment, five materials had already been activated.

"Impossible, Qin Chen didn't even activate a material just now, how could it..."

Everyone was shocked. Not only did they pay attention to Qin Chen, the crowds on the square were huge. Although most people's eyes were focused on Bai Yutang and Yun Mengze, they still paid attention to Qin Chen. Seeing this shocking scene at this moment, all came out. Shocked exclamation

.

"Look, everyone, look at Qin Chen."

"My God, Qin Chen didn't even activate one material just now, so why did he activate so many kinds of materials all at once?"

"Five, no... six, now seven... how could it be so fast?"

A series of shocked words came, and everyone's eyes were completely unable to move away from Qin Chen.

Qin Chen's hands swiftly swept, and the terrifying spiritual power flew out quickly, forming a emptiness of spiritual formations, falling into the material in front of him.

The materials incorporating Qin Chen's spiritual power, inspired by the giant spiritual formation patterns that Qin Chen had arranged earlier and the aura of the materials that had been activated at the beginning, kept lighting up like a sky falling in chaos.

This scene is enough to make everyone present will never forget.

A variety of materials that bloomed with brilliance dazzled the entire mixing table, and everyone was stunned.

Qin Chen's method of activating the materials is really a blockbuster.

In almost a moment of effort, the number of activated materials has reached eight, and it can be said that one type can be activated with just a few breaths.

This speed is too fast, beyond the imagination of a normal mixer.

"It's incredible, how can there be such a speed of activating materials in this world?"

"Turning stones into gold, this is the real turning stones into gold, and the techniques of other refiners are simply shit."

"It's so beautiful, have you seen it? The material in front of Qin Chen is shining outwards layer by layer. It's so beautiful."

"What exactly is going on?"

The crowd was like a frying pan, boiling instantly. Some warriors can't understand the activation process and can only marvel at the speed, but many refiners know the difficulty of activating the materials, even Bai Yutang and Yun Mengze, the fastest activation before, dozens of breaths,

But Qin Chen? Almost a few breaths can activate a material.

This is completely beyond their understanding, just like a fantasy.

Not to mention them, even the master Konoha above the sky and the others were all stunned. The elder of the Tangtang Refining Division, the chief examiner of this assessment, did not understand Qin Chen's technique.

While Master Konoha was shocked, he couldn't say a word.

"It's the materials that grow and restrain each other."

At this moment, Master Mu Gutian suddenly spoke.

what?

Everyone looked over.

"It's the method of mutual generation and restraint of materials." Master Mu Gutian's tone this time became affirmative, his expression dignified, and deep in his eyes, there was endless shock and appreciation.

[Chapter 2716: Five elements distinction](#)

"Materials grow and restrain each other?"

Master Konoha and the others murmured, turning their heads, thinking in their hearts. "That's right." Master Mu Gutian said in a deep voice: "Look at the positions of the twelve materials that Qin Chen

placed, divided into five layers from the inside out. The core layer is one type of material. There are two on the second floor, two on the third floor, and three on the fourth floor.

There are four types on the fifth floor. These five floors look ordinary and the locations are messy, but if you look carefully, you will find that these five materials are arranged in the order of the five elements of wood, fire, earth, gold, and water. Put it. "Golden, wood, water, fire, and earth, representing the five elements of heaven and earth, is also the most basic classification of various materials. Each material can be divided into five types according to its own characteristics, and Qin Chen uses these five elements to grow and restrain each other. Twelve kinds of materials

It became five floors. "The first layer is broken grain wood, the special wood material of Yunlan Mansion, and the second layer is brown cloud stone and blazing fine iron, which belong to fire material. Then Qin Chen is based on the five elements, wood Fire, fire generates soil, native gold, gold generates water, water

The five properties of raw wood are arranged for each other. "Furthermore, Qin Chen did not simply divide these twelve materials into five attributes: gold, wood, water, fire, and earth. Have you seen it? Although the twelve materials are arranged in five layers, the position of each material is different. Biased, so we only start

I feel that the arrangement of the twelve kinds of materials is very messy, because they are all of the five elements, and they are also divided into categories. "

"For example, metallic materials, divided into Gengjin, Xinjin, etc., fire attributes, divided into Yang fire, Yin fire, Kui fire, etc., the same kind of five elements, but also have different attributes that interact with each other inside." "And Qin Chen Dust is the most detailed material for all materials. First, the twelve materials are divided into five elements for mutual growth and mutual restraint, and then according to each other's respective attributes, the internal mutual growth and restraint are carried out, so that once the first material is available

Activate, the breath it activates can spur the next material. "Qin Chen first activated the broken grain wood, and broken grain wood belongs to Yimu, and Yimu belongs to Yin. Although it can make the fire of the five elements, it will damage the extremely yang attribute. Noon fire, while the blazing iron belongs to After midday fire, after the broken grain wood, Qin Chen first activates the brown cloud rock with a slightly overcast attribute and has the characteristics of B-fire. Then, through the aura activated by brown cloud rock and broken grain wood, it arouses the fiery iron. This can activate the blazing fine iron more perfectly, without damaging its sun fire attributes, and the following

The same is true for the materials..." "Qin Chen's materials seem to be placed randomly, but in fact, every position is particular. If you make a mistake, it will cause problems. Once it is perfectly placed, it will have a chain reaction. , Doesn't even need Qin Chen to deliberately activate,

It can cause other materials to resonate and be gradually activated together..."

Master Mu Gutian explained, his eyes glowed and his heart was full of shock.

It was only now that he saw Qin Chen's arrangement.

This.....

Above the sky, Master Konoha and the others were stunned. They are considered to be the top craftsmen in Guanghan Mansion, but they have never thought of using the breath of other materials to activate the next material. This technique, simply unheard of.

"It's incredible." Master Konoha was shocked, but he couldn't believe it: "Master Mu Gutian, the method you said may be feasible, but our twelve kinds of materials are chosen at random. How can we guarantee each one? Can the materials grow and restrain each other?"

Coincidentally, after the twelve kinds of materials are placed, they can completely interact with each other, which is perfect, right?"

Master Konoha raised doubts. Everything in the world does have a theory of mutual generation and mutual restraint. However, not all materials can be perfectly mutually restrained. In many cases, there will be defects. Therefore, the theory mentioned by Master Mu Gutian is valid on the surface, but in practice, almost

Impossible to do it.

How did Qin Chen do it?

"In this world, there is indeed no perfect mutual generation and mutual restraint." Master Mu Gutian nodded, "Everything in the world has defects and no perfection, but without perfection, we can create perfection artificially." Master Mu Gutian looked at Qin Chen below. The refining platform exclaimed, "Have you seen the spiritual formation patterns Qin Chen arranged? This is what he did afterwards. The twelve materials are divided into twelve types of formations, each of which is independent. Individuals, once united, a complete large array pattern can be formed. It's not a big deal. If you look at it carefully, it is not only the combination of twelve formations that can form a perfect big formation, you can combine any two, three, three, or even four types of formations. A new pattern, in a local area, forming a perfect balance."

"Awesome, this kind of spiritual formation is too strong, Qin Chen relies on this to make the original imperfect materials coexist and restrain each other and become perfect. This is simply a miracle."

Master Mu Gutian said in shock, even with his accomplishments, he was completely shocked by Qin Chen.

"Really..." Master Konoha, Wan Xinde and other masters looked at them intently, and couldn't help being surprised. At first, they only saw twelve small formation patterns and the combined large formation pattern. Now they look carefully. Found that any combination of patterns can be shaped into a brand new perfect array pattern, so that the entire ecology maintains an absolute balance.

"Unbelievable, how did Qin Chen do it?"

Master Konoha could no longer describe the shock in his heart. He understood that before Qin Chen spent enough time close to a stick of incense, studying each material was not a waste of time, but a simulation and calculation.

It was too abnormal. Master Konoha looked at Qin Chen at this moment, but he felt as if he was looking at a giant, and the mountain stood still.

In fact, let alone Master Konoha, even Master Mu Gutian was shocked and could not calm down. "The biggest problem for Qin Chen right now is his calculation. Although he has activated eight materials, all the pattern structure and activation sequence are just calculations in his mind. If I guess right, Qin Chen The purpose is for one

Activate all twelve materials at once. "The most difficult thing here is that there must be no omissions in his calculations. Once there are omissions, even the most subtle omissions, such as the position placed a bit, the mental formation structure has made a mistake. Will cause the whole

It fails the whole game, although it can still pass the assessment, but it is impossible to activate the twelve materials at the same time, resulting in a failure. "Master Mu Gutian looked at Qin Chen very nervously, his eyes full of expectation.

[Chapter 2717: One-time activation](#)

He naturally looked forward to seeing a miracle happen.

As Master Mu Gutian said, what Qin Chen uses is the characteristics of the five elements of the material that interact with each other and influence each other.

Use the breath and frequency generated when one material is activated to guide the resonance of the second material, just like dominoes, from front to back, in one go. But it is too difficult. It is necessary to distinguish the characteristics of each material. There must be no gap between them, and there must be no deviation from each other. Once they are wrong, the resonance between the materials will be interrupted. Feels gone

.

Secondly, the control of mental power must also be very delicate, even the slightest mental pattern cannot go wrong.

The most important thing is that you must be focused. The spirit of the refiner must be highly concentrated throughout the process, and there must be no negligence. Once there is a slight mistake, the entire activation process will fall short.

It can be said that even if a crafting master of Heavenly Saint level comes, it may not be able to do this.

But Qin Chen did it.

He used the technique of patching the sky, and the characteristics of any material were invisible under his perception, and it was clear at a glance.

Shoo...

Just like fireworks blooming, each material is continuously activated.

One kind!

Three!

Eight kinds!

Eleven!

But when Qin Chen activated the eleven materials, everyone's breath was held back. He has evened the records of Bai Yutang and Yun Mengze, and the whole process only took a moment, dozens of breaths. .

The refining stage in front of Qin Chen was full of bright materials, only the last twelfth material had not yet been activated.

But Qin Chen's hands had already reached the sky above the last material.

Everyone held their breath, their eyes widened, staring at the material under Qin Chen's hands.

next moment.

Hum!

The twelfth material lights up.

boom!

The twelve kinds of materials glowed all at once and were activated at the same time. Under the fusion of the spiritual formation, the breath of terrifying materials soared into the sky, forming an amazing vision over the square.

Wow!

The audience was in an uproar, like an explosion, boiling instantly.

"Successful, all activated."

"Twelve materials, activated at the same time, am I dazzled?"

"Wife, come out with me to see the gods!"

Everyone is crazy, no one can keep calm.

Yes, Bai Yutang and Yun Mengze have already begun to try to activate the twelfth material, but even if they activate it successfully, they cannot compare with Qin Chen.

Because they are a kind of material and a kind of material activation, and Qin Chen? Activate twelve materials in one go. This hearty feeling is beyond words and indescribable.

The twelve materials were activated, Qin Chen clapped his hands calmly, and stepped aside.

At this moment, the distance from the end of a stick of incense, there are only dozens of breaths left, and at this moment, Bai Yutang and Yun Mengze, the strongest, began to activate the twelfth material.

Moreover, the two seemed extremely strenuous, and it was obvious that in the end, their mental energy had been greatly overdrawn.

On the other hand, Qin Chen's chic attitude and calm posture provoked countless women present to stare at Venus.

Set a verdict on top of one another.

"Handsome, so handsome."

"This is called a refiner, and this is called an activation material."

At this moment, whether it was the martial artist present or the tens of thousands of refiners who had been eliminated before, Qin Chen was convinced, willing to go down.

Even Li Wanxue's eyes moved, his heart beating wildly, and there was an urge to obey Qin Chen's feet.

In this world, there is such a terrible Tianjiao. Compared with Qin Chen, the so-called Yunmengze, the first Tianjiao in Yunzhou, is simply a pile of shit.

Boom!

A bell rang in the sky. At this time, the time for a stick of incense finally burned out, and the second round of assessment was over.

Bai Yutang and Yun Mengze sighed and stopped their activation.

Until the last moment, they failed to activate the last material. It was too difficult. It was too difficult to activate twelve materials in a stick of incense.

This is simply not a task that humans can do.

However, Qin Chen did it.

"This guy, there are two things, so he really compares Xiaoye."

Bai Yutang was puffed up, with an unhappy expression on his face, muttering in his mouth, but looking at Qin Chen's eyes, there was a hint of shock.

He was also shocked by Qin Chen's last madness.

With his talent, he later understood Qin Chen's method, but he understood and understood, he would definitely not be able to achieve this level of Qin Chen. "Unexpectedly, in this little Yunzhou, there is a genius refiner who can compare with Xiaoye and me. Interesting, this is interesting. No wonder my father always said that the world is so big that there are no wonders. Let me not be proud and complacent. It seems that this day

Underneath, there are many geniuses that I don't know. "

Bai Yutang looked at Qin Chen's eyes, and endless fighting spirit emerged.

Now, it's only the second round. When the assessment has not reached the last minute, it can't be said to be over, right?

Compared with Bai Yutang, Yun Mengze's resentment and anger could not be suppressed.

why?

Why is Qin Chen again?

Is he number one again?

Having swallowed the experience and soul of seven top refiners, can't he still deal with this Qin Chen?

No, I am not reconciled.

Yun Mengze roared silently, his heart was constantly swallowed by resentment.

His eyes became more sinister, like a snake, fierce and cruel. "Everyone, the second round of assessment is over. In this round of assessment, a total of 3,456 people participated in the assessment. There were 313 people who activated the six materials before the end of the assessment. Congratulations to these three hundred and one. Thirteen crafting masters can enter

In the final third round of the final assessment. "

When the results came out, a few people were happy and some were worried.

Of the more than 3,400 people who passed the examination, only 313 passed the examination, which was less than one-tenth of the passing rate, which was extremely cruel.

And Qin Chen has undoubtedly become a much-anticipated existence, first in the two rounds, and they are all completed with amazing results, so impressive.

Bai Yutang and Yun Mengze followed closely. In the second round, they were only a little bit close to catching up with Qin Chen, but in the end, they failed.

The third round of the final assessment is their only chance.

In the whole audience, everyone was extremely looking forward to it.

For the three top Tianjiao, although Qin Chen won the first two rounds, regardless of the first or second round, Bai Yutang and Yun Mengze were only a little behind Qin Chen, even a step away.

For example, in the second round, as long as you give them dozens of breathing time, both Bai Yutang and Yun Mengze may activate the twelfth material. Although the two ultimately failed, no one underestimated Bai Yutang and Yunmengze. With just one chance, the two may come back.

[Chapter 2718: The final round of assessment](#)

After a short break, soon, the third round of assessment will begin soon.

On the square, there were originally more than 3,000 refining tables, but at this moment there were only more than 300 left, which suddenly seemed extremely empty. Every player had a huge space, enough to display them to their fullest.

"All players, stand in your place."

With an order, the more than 300 refiners who remained after the end of the second round stood in their respective positions. "After the first two rounds of assessment, there are still 313 of you left. All of you have passed the first two rounds of assessment. It can be said that whether it is in the formation or on the basic materials, you Have confirmed their own

strength. "

Those who were able to break into this round were all killed from tens of thousands of people, each of which was the best among the earth-grade refiners, at least with amazing talents, and they all had the potential to impact the heaven-grade refiners.

However, what Heavenly Work needs is not the kind of personnel who have the possibility of impacting the Heavenly Grade Refining Master, but the kind that has a great probability, at least more than half of the probability, to become the top grade Refining Tool of the Heavenly Grade Refiner. division.

In this way, the probability is immediately reduced a lot.

Just like the half-step Heavenly Sage, there is almost always the possibility of being able to impact the Heavenly Sage, but there is always only a very small part of it that can truly become the Heavenly Sage.

What Heaven's Work has to do is to select this very small group of people from these more than 300 people.

All the remaining crafting masters held their breaths, and felt nervous. Because everyone knows that as long as they can pass the third round of assessment, enter Tianzhuo, and become a Tianpin craftsman, it is almost a certainty. In Tianzhu, the resources are abundant and they enjoy amazing training, far more than their own research. want

It's too much stronger, even a tenfold or a hundredfold improvement. "Now, we are about to start the third round of assessment. In the first two rounds, we tested your abilities in the basics of refiners. In this third round, what we need to test is the one that best represents the abilities of refiners. Part, that is--

Refiner. "

The voice of the strong man who worked in the sky fell, and everyone had already guessed, but he couldn't help but exclaim.

Refining device.

For ordinary people, it is almost impossible to see a top-level refining master performing refining. Now, with more than 300 top-level refining masters performing refining, what a magnificent one will be. Picture?

Especially those who were eliminated before, in their frustration, their eyes showed light again. To see the refining of strong people in the same profession, it is a very fortunate thing for them. The stones of other mountains can be used for jade. From the refining of others, they can see their own weaknesses, shortcomings and The place worthy of improvement, this is the most

It's a place to look forward to.

"I think you are already prepared."

That day the strong man said lightly.

Indeed, every refiner has guessed the third round of assessment items.

Just as the last round of the appraisal of the pharmacist is to refine alchemy, the appraisal of the refiner is also a necessary item.

An alchemist, no matter how strong the basic knowledge is, no matter how terrible the flames he possesses, no matter how good the materials are, no matter how high his rank is, he can't practice a pill, that's nothing.

The same is true for the refiner. No matter how strong your mental power is, no matter how skillful you are to activate the materials and outline the pattern, you can't integrate it into the refining of the holy weapons, and then you are just a sacred weapon. The waste of the craftsman skin.

"However, I know that the strength, cultivation level, and level of the refiners on the field are very different. In order to show fairness, the refining assessment of our daily work will be different from the ordinary refining assessment."

"First of all, you can't refine your best weapons to your heart's content, because your materials will be provided by our daily work. Moreover, these materials are extremely complicated, with all kinds of materials, and there are a hundred kinds of strange things."

As soon as this remark came out, the audience suddenly became restless.

What does it mean? A hundred kinds of materials, and can't refine the weapon you are best at?

Wow!

That day the strong working man raised his hand, and immediately, countless materials emerged from his hands. There were a hundred kinds of strange materials in front of everyone. "These are the hundred materials that you can use next. The grades are different, low, there are ordinary materials, high, and even celestial materials, and these 100 materials are not all intact. , Some are scraps, even some

Many materials, you have never seen it before. "

"What you have to do is to select the material you most want to refine from the hundred kinds of materials. Everyone can choose ten kinds in total, no more, no less."

"Finally, you need to refine these ten materials into holy soldiers, any holy soldiers can be used, armor, weapons, and even auxiliary treasures, you can refine." "In the end, our Heavenly Work will refine them based on you. The ranks and strengths of the sage soldiers are comprehensively judged. There is only one criterion for judging. Whoever uses the lowest level of materials, the stronger the treasure, and in short, the higher the cost performance.

You can get a higher score. "

"Passed at sixty points. All the craftsmen who are evaluated above sixty points are considered to have passed the assessment and can join my daily work." "There are two key points in this, I need to inform you in advance. First, According to the different strengths of each person, the evaluation criteria are also different. For example, if you are a refiner in the middle stage of the land grade, if you can refine the Saint Weapon of the later stage of the land grade, you are evaluating

At the time of price, you will get more points bonus. "

"Similarly, if the cultivation base is a half-step celestial sage, but you can only refine the mid-level sage soldiers, you will lose points."

"Secondly, the higher the rank of the holy soldiers refined, they will also receive additional bonuses. For example, if any of you can refine the holy soldiers of the heavenly rank in the third round, you can directly Go to work."

I have to say that this third round of assessment is too detailed and too flawless.

The usual appraisal of refiners is to allow refiners to refine their best sacred soldiers. Whoever refines the higher rank of sacred soldiers, the better the performance and the stronger the strength. But there is a loophole in this, that is, some refiners refining certain weapons all year round will make them very proficient. The quality of the refined weapons will naturally be better than others, but his true refinement strength , But may not be able to surpass its

others.

The third round of assessment by Tianjiao completely excluded this. With a hundred kinds of materials, every refiner can't find the materials he is best at, and refine his best Saint Weapon, naturally there is no and unfair.

[Chapter 2719: Not missed](#)

Secondly, it's not that the higher the level of the sacred soldiers refined, the higher the level of the test, after all, the level of cultivation of the refiners on the field is different, the weakest is only the middle stage, and the strongest is A Heavenly Saint from Wuzhou, and he

The refiner's rank is also only the pinnacle. What Tianjiao needs to choose is for the future to grow and become a strong talent refiner. As for the current strength, it is not what they care about. Even if it is a master of heaven, it will not grow into a talent refiner in the future. , Will also be in the first

Eliminated in three rounds. As for the refining of Heavenly Rank Saint Soldiers, they can directly join the Heavenly Work, and everyone has no objection. The Heavenly Rank Refining Master is a big man even in the entire Guanghan Mansion. At present, there is only one Heavenly Rank Refiner in Yunzhou. Qi Shi, that is the cloud

Master Wan Xinde, the master of the Zhouqi Pavilion.

If such a refiner is willing, he can naturally go directly to Heavenly Work and become one of them.

The only thing everyone wondered was how to determine the Saint Soldier's score.

"You don't need to worry about this. The last round of appraisal will be appraised by the Appraiser of the Appreciation Division of My Tian's Work Refining Division and give the results.

Appreciation of treasures is an instrument specially used by the heavens to identify treasures. It can easily identify the rank of saint soldiers. It is widely spread in the heavens, and some of the top pavilions also have treasures of appreciation.

Appreciation of treasures is also divided into levels, and the higher the level, the stronger the treasures that can be identified. Naturally, the treasures of Tianwork are the most advanced.

After listening to the third round of assessment rules, even Qin Chen had to sigh in his heart that the assessment methods for this day's work were very meticulous, and almost no genius was missed.

After the announcement of the rules, the third round of assessment officially began.

The first step is to select materials.

In front of Qin Chen, a hundred kinds of materials were placed there, because the materials of each player were the same. In order to prevent cheating, after the start of the game, there was an invisible formation barrier where each player stood.

This barrier can isolate the sense and line of sight between each examiner, while the outside examiner and spectators can clearly see the actions of each contestant, and the evaluation is very fair.

To Qin Chen, distinguishing materials is nothing short of pediatrics.

The second round of assessment has proved Qin Chen's ability. Under the sky-repairing technique of identifying materials against the sky, it is difficult for any material properties and functions to escape Qin Chen's observation.

The time limit for this third round of assessment is five days. Everyone needs to refine the Saint Weapon within five days. This time is very sufficient for Qin Chen, and he has enough time to analyze these materials.

With nearly a hundred materials, Qin Chen instantly activated the sky-repairing technique, and immediately, the breath, activity and attributes of each material were clearly presented in Qin Chen's perception.

After only reading it once, and after careful analysis, Qin Chen began to classify all the materials one by one.

This naturally aroused everyone's surprise. It was only now that a stick of incense was not available. Qin Chen has already begun to classify a hundred materials. You must know that other refiners have just analyzed less than half.

Even Bai Yutang and Yun Mengze, who were extremely terrifying in the first two rounds, and the Tiansheng educated and master in Wuzhou, only analyzed more than half of the materials and did not start to classify them.

Huh huh!

Qin Chen flicked his hands and first removed the materials that seemed to be undamaged, but were actually scrapped, and could not be used for refining. A total of 21 materials were quickly thrown aside by Qin Chen. These 21 materials were originally good materials, but the internal structure and some properties have been destroyed. Although they are not completely impossible to refine, once they are used Got this

These materials will cause irreparable damage to the next refining sage soldiers, ranging from omissions to the refining sacred soldiers.

After excluding 21 kinds of materials, Qin Chen divided the remaining 79 kinds of materials into ten types according to their properties and functions.

As soon as his classification was over, Master Konoha showed a shocked expression above the sky.

"This Qin Chen actually selected all 21 types of scrap materials within the time of a stick of incense, and none of them were left out. This..."

Master Konoha was shocked. He is the examiner this time, and he naturally knows the subject in advance. Among the hundred kinds of materials, there are indeed 21 kinds of materials that are damaged. Most of them are easy to recognize, but there are a few of them that are difficult to recognize. Very high, almost difficult to be identified

come out.

Unexpectedly, Qin Chen would pick out all of them in just one stick of incense. The sensitivity to the materials was really terrifying.

Even if it was him, he might not be able to pick out all the scrapped materials faster than Qin Chen, there is such a terrifying refining genius in this world?

Although the third round of assessment was for refining sacred soldiers, in fact, it was a comprehensive assessment of a refiner, whether it was material selection, refinement ideas, operation techniques, etc., all of them were assessed.

At this time, Bai Yutang and Yun Mengze also came to an end in the selection of materials. The two of them only selected 20 materials, but failed to select the last one. This actually made Master Konoha a sigh of relief, because among the three most difficult materials, one is the most difficult to identify. Let alone the following examiners, even a true Celestial Refiner may not be able to Selected in a short time, compared to

Qin Chen, on the contrary, the results of Bai Yutang and Yun Mengze are more in line with common sense.

However, the two can choose twenty kinds, which is still beyond Master Konoha's imagination.

But when Bai Yutang and Yun Mengze finished selecting materials, Qin Chen was already thinking.

Seventy-nine materials were divided into ten categories, and Qin Chen arranged them according to their ranks.

Among them, there are three kinds of heavenly grade materials, nine kinds of top grade materials, 18 kinds of late stage materials, 31 kinds of middle grade materials, and 19 kinds of early ground grade materials.

Fairly spread to all levels, so that refiners of any level can refine the holy soldiers they want to refine.

Obviously, it is undoubtedly the best to choose the highest grade material, because the better the material, the stronger the Saint Soldier will naturally be. But there is also a big trouble, that is, it is difficult for the refiner who is not the Celestial Grade to maximize the effect of the Celestial Grade

materials. If the general pinnacle refiner chooses to refine the Celestial Grade materials, he can only play at best. One to two percent of the material

, And Tianjiao's final assessment is the cost-effectiveness, not just the strength of the Saints.

This leads to the fact that if you use heavenly materials to refine the sacred soldiers at the peak of the land, the scores you get are not as high as the sacred soldiers at the peak of the land. Therefore, in the selection of materials, you must be extremely cautious, have a very clear understanding of your own strength, and select the most suitable materials for you.

[Chapter 2720: Tianpin Materials](#)

Qin Chen smiled slightly, his gaze fell directly on the three most powerful heavenly materials, touched them with his hands, and carefully sensed the characteristics of each material.

If you want to pick the strongest, Qin Chen doesn't think that he can't control the materials of heavenly grade.

"Hey, this Qin Chen is actually selecting Heavenly Grade materials..."

"He... is this too arrogant?"

"Although Qin Chen is powerful, his cultivation base is here. Not long ago, he was only a peerless earth sage. Although he has a half-step heavenly sage aura, he can't fully activate the attributes of the heavenly grade materials, right?"

"Too arrogant, too confident."

The crowd shook their heads. Even if you are an idiot, you know that the materials of the heavenly grade are not picked randomly. The examiner has clearly stated before that the assessment is cost-effective. If Qin Chen chooses the materials of the heavenly grade, he will only refine the sacred soldiers of the later stage of the land grade. , Then do

Laughed.

Even Master Konoha felt that Qin Chen was a bit arrogant, and the materials of the Heavenly Grade were not so easy to handle.

Of course, Qin Chen is still choosing, maybe just perceiving it.

In the square, after Qin Chen perceives the three materials carefully, he did not directly take out one of them, but thought slightly.

"This link is not only a test of the ability to refine the holy soldiers, but also the conception, organization and knowledge reserves of the refiner." Seventy-nine materials, including materials of various attributes, can be refined. Weapon, sword, axe, spear, spear, halberd and spear are all indispensable. In addition, you can also build a variety of defense treasures, such as shields, armors, armors, and protections.

Auxiliary treasures, tripods, bells, drums, mirrors, and even flying treasures, ships, ships, shuttles, and boats.

With just a flash in his mind, Qin Chen flashed dozens of sage soldiers.

What Qin Chen had to do was to choose the most suitable, strongest, and most cost-effective saint among them. This was by no means an easy task.

"It seems that we still have to classify it into one category first."

According to the grade and strength of the material, he once again divided it into three categories: good, medium, and poor.

The materials that are also the pinnacle of land quality are also divided into good and bad, strong and weak, Qin Chen divided 79 materials into 36 of the highest quality.

Then arrange the 36 kinds.

The assessment stipulated that ten kinds of materials must be used, one more would not work, and one less one would not work. When Qin Chen thought about refining, he added a layer of chains.

After a while, Qin Chen had already counted 26 different combinations in his mind.

Qin Chen himself was shocked.

"This technique of patching the sky is too abnormal..."

He had already reduced the materials to twenty-six kinds, and he was still able to make twenty-six different combinations, which surprised Qin Chen himself.

Each of these twenty-six species is extremely terrifying.

Which one should be refined?

If other refiners were to know what Qin Chen was in at the moment, he would definitely spit out a mouthful of blood. They worked so hard, racked their brains, and tried every possible way. They might not be able to figure out what they should refining, but Qin Chen was distressed, how to choose one from the combination of a large number of materials. The two were compared. Depressing

Already.

And Qin Chen's actions all fell into the eyes of Master Konoha and the others above the sky.

What material would Qin Chen choose? What is refining?

To be honest, Master Konoha and the others are expecting his choice more than Qin Chen himself.

Qin Chen won the championship in the first two rounds. In this round, they naturally hope to see Qin Chen's wonderful performance.

Only Yun Dongguang, his eyes gloomy, and his murderous intent lingered in his heart, he least hoped Qin Chen would win.

"If this Qin Chen really succeeds in joining the Heavenly Work Refining Division, and with such amazing results, then decades, hundreds of years later, my Yun family will definitely be in crisis."

A sharp light shot out from Yundong's light eyes, a vague murderous intent flashed quietly, and finally was hidden under his deep light.

At this moment, many people on the square have also entered the stage of choosing to refine treasures, and some of them have even begun to choose.

Huh huh!

Many examiners have already moved, especially those with a low level of cultivation. They have little choice. Therefore, after sorting out the materials, they quickly made a choice.

call!

Flames rose from the refining platform, and some of the refiners were ready to start smelting materials.

But Qin Chen, Yun Mengze, and Bai Yutang haven't moved yet.

Under all eyes, Qin Chen thought for a long time, but suddenly he laughed.

Since it is difficult to choose, why not refine the one you want to refine the most?

Why bother to spend so much energy thinking about what to refine, but to put time on how to refine it.

Thinking of this, Qin Chen suddenly smiled, and his eyes were firm.

With his hands, he immediately chose a piece of black iron stone from the three heavenly materials.

As the champion of the first two rounds, Qin Chen's actions immediately attracted the attention of countless people.

"This Qin Chen actually chose the material of the Heavenly Grade."

"He was the first to choose Tianpin materials."

"What a courage."

The crowd suddenly exclaimed.

And the many master craftsmen above the sky are also eyelids.

Qin Chen, wouldn't he want to refine a half-step Celestial Saint soldier, right?

Because in addition to the half-step Celestial Rank Saint Weapon, if you use Celestial Rank materials to refine only the highest rank Saint Weapon, it is definitely a deduction.

But Qin Chen, a kid who had just stepped into the half-step Heavenly Sage, wanted to refine the half-step Heavenly Sage, he was afraid that he was not a lunatic.

If the holy soldiers of the half-step heavenly rank are really so good at refining, then there won't be so many crafter masters of the earthly rank in this world, and even the heavenly saint masters, cultivators and masters of Wuzhou are only the pinnacle of earthly ranks. It's just the master of refiner.

After Qin Chen selected the first material, there was no pause. Swish, he swept his hands and instantly selected the remaining nine materials.

Four kinds of top quality materials, five kinds of late materials. When Qin Chen's choice was over, Master Muye and the others took another breath of air-conditioning. He was already certain that what Qin Chen wanted to refine was at least the Saint Soldier at the pinnacle of geography. With so many top materials, if Qin Chen finally Just refined

The Saint Soldiers in the late stage of the land product did not even reach the peak of the land product, so there was only one result, eliminated.

Because of so many top-level materials, if only the sacred soldiers of the later stage were refined, then under the appraisal of the special transformation for this assessment, it would never exceed 60 points.

Is this Qin Chen so confident? If possible, Elder Wan Xinde of Qige would even jump up.
