

Valkyrie 2811

[Chapter 2811: Yin and Yang Soul Fire](#)

He is strong with red eyebrows, and in the future even hopes to break through the late Heavenly Sage, and even become the elder of the warrior department and a figure in power.

But no matter how strong he is, he is only a member of the military department.

But how about the Son?

Any saint child in the heavenly work is a refiner and needs to have an amazing talent in the way of refining, so that it is possible to inherit the mantle of the heavenly work.

He was a member of the warrior department, and he didn't dare to offend a future refiner master even if he was killed.

"go away."

"Yes."

Chimei stood aside respectfully when he heard Qin Chen's words, no longer the rampant he had before.

"Hurry up and report for me." Qin Chen said to the manager again.

"Yes Yes!"

This manager did not dare to neglect, and even began to go through the formalities for Qin Chen.

"What? This Qin Chen is the champion who was assessed when the job was enrolled in Yunzhou this time. Because of his personal affairs, he just came to report today?"

At this moment, there was an exclamation in the hall.

This is the news that someone has inquired about Qin Chen and couldn't help but lose his voice in shock.

The work of the day is big and big, and small and small. Many people are busy practicing, refining tools, taking tasks, and so on. Few people pay attention to the newcomer's affairs, but as long as you inquire with your heart, you can get news in minutes.

So in a moment, many people got the information, almost all of them were shocked.

"This son actually broke the rules of the Tianjiao Refining Division. After passing the assessment, he did not sign up for the first time, but went to handle his personal affairs first?"

"On the square before, this Qin Chen raised his hand to suppress Nan Tianyi, the son of the Nan family, and Feng Liuyun, the young master of Fengyun Pavilion, one of the three outstanding disciples of the refining master this time, causing the two to kneel in public."

"This person was summoned by the great elder, and it is said that he had a conflict with the elder Marble at the presbytery."

"The great elder personally granted this person the status of saint son, and he appointed this person to recruit the chief disciple among the disciples of the refiner for this day's work."

One by one news came, and the horror in everyone's hearts became stronger and stronger, and the gaze that looked at Qin Chen also became jealous and solemn.

Suppressing fellow disciples is normal. Those who can work in heaven are Tianjiao. Who doesn't have a solo temperament? It would be terrifying to let the two Tiansheng disciples kneel down on the spot.

Moreover, a newly promoted disciple of Qin Chen even dared to confront the real power elder of Tianzhuo, and he was an extremely arrogant demon.

The most important thing is the status of Qin Chen's chief disciple, which is related to a quota for Tianjiao.

hiss!

Everyone's gazes at Qin Chen changed.

As for the old man with bare eyebrows, his heart was almost out of breath.

Offending such a world-famous figure, can he be a warrior in the warrior department in the future?

Must find a way.

He gritted his teeth and walked up: "Master Qin Chen, I have been offended before. To express my apology, this is the Yin-Yang soul fire obtained by killing the Lord of Yin and Yang before going down. Please also Master Shengzi to laugh."

As soon as he raised his hand, a group of yin and yang flames floated out. As soon as the flame came out, the temperature in the hall suddenly became slightly cold, as if changing between cold and hot.

When this flame came out, it naturally caused many disciples present to exclaim. Yin and Yang Soul Fire, the treasure of the Lord of Yin and Yang, this red-browed old man is so willing, willing to take out the Yin and Yang Soul Fire to apologize? This is a treasure that can not be found, and the red eyebrow old man himself cultivates the Blazing Fire Mysterious Eye, this yin and yang soul fire pair

For him, it will definitely be of great benefit.

But now the red eyebrows are taken out directly.

"Oh?" Qin Chen faintly glanced at the old man with red eyebrows, this guy was somewhat decisive.

However, this yin and yang soul fire is somewhat interesting. Qin Chen's eyes flashed, raised his hand, and condensed the flame into his hand, and said lightly: "Since you are so sincere, let's forget about the previous things." Yixi, his gaze flashed, and without hesitation, he took out a storage ring again: "Holy Son, this is an ancient heavenly vein that I got from his cave when I killed Yinyang Langjun. , Is the ancient sage of the middle rank

The veins were originally intended to be used for his own cultivation, but after seeing Master Shengzi, he only felt that the treasure should be worthy of a hero, so Xixia was willing to give this ancient saint vein to Master Shengzi for his cultivation. "

hiss!

Everyone looked at Chimei in disbelief. Qin Chen had obviously decided to let this matter go before. Why did Chimei take out an ancient sacred vein of the middle grade of heaven?

This is the ancient sacred vein of the middle rank of the sky. If they guessed correctly, this ancient sacred vein and the Yin-Yang soul fire are the biggest gains after slaying the Yin-Yang Langjun with the red eyebrows. Now they are all given to Qin Chen .

"Oh?" Qin Chen glanced at his red eyebrows with a faint smile, "You should not ask for anything?"

There is a middle-grade ancient sacred vein of heaven, which he has exchanged for all the treasures in the Wangu Tower, and this is only one, which is definitely a huge amount for a giant at the peak of the mid-stage sage. "This..." Chimei smiled awkwardly: "Master Shengzi, there is indeed a request from Xixia. I heard that Master Shengzi is a newcomer who just joined Tianjiao. He just made an exception today. He wants to come and know something about Tianjiao. , And join the sky under

I have been working for five thousand years, and apart from other things, I am quite familiar with some things that work in the sky, so I think if Master Shengzi has any needs in the future, I can call it out. "

The old man with red eyebrows took out a piece of jade slip, "This is the jade slip for the next transmission, Master Shengzi can send it to the next if necessary in the future."

The old man with red eyebrows said expectantly.

Qin Chen realized in an instant that the other party was ready to take refuge.

Qin Chen's heart moved. He really didn't know much about his work this day. It would be great if someone could call it.

"Hahaha." Qin Chen laughed, raised his hand and put away the jade slip and storage ring: "Very well, since that's the case, then Ben Shao will accept it."

"Thank you, Lord Son."

The old man with red eyebrows was overjoyed.

In fact, he was also a man of arrogance before, so he has never taken refuge in any holy sons or elders in his heavenly work, and he wants to explore the higher realm of martial arts. But in recent years, he has also begun to feel a little weak. In fact, he has long planned to find someone to seek refuge. It is just that the many holy children in the daily work have been in business for many years and have his own team. Although he has some strength, he may not be able to take it after entering.

How much attention.

Until he met Qin Chen. In an instant, I felt that this was an opportunity. Qin Chen became the saint son and chief disciple as soon as he joined Tianzuo, proving his strength. In addition to the fact that the other party had just arrived, there must be no familiar people. If he could take refuge in the other party for the first time , Will certainly be taken seriously.

[Chapter 2812: Tiansheng's early peak](#)

This is gambling. But Chimei himself is a gambler, otherwise he would not continue the task of killing Yinyang Langjun in Yinyanghai. There are some powerful people and Tianzuo disciples who have died in Yinyanghai over the years. He took this. Task, but also took a lot of risk

In the end he succeeded.

But now, it is another gamble. If he loses the bet, his future at work in the sky will be dimmed, and he can only be a steward and a deacon in the future.

But the bet is won, the future is limitless.

As for Chimei's show-stopping operation, many people on the scene will also be stunned by the show.

"Master Shengzi, your procedures are complete." At this time, the steward carefully returned the token to Qin Chen, and respectfully said: "Here are some precautions for Tian's work, as well as the location of your cave, Master Shengzi. Your Dongfu, I arranged it at Qingtian Peak, this is the rest of our work

One of the best. "

Qin Chen's perception penetrated into the token, and he felt that there was a towering mountain in the distance, with jewels rushing into the sky, like a giant pillar, majestic and majestic.

"Nice place."

Qin Chen took the token, flashed his body, and left the hall to the place where the disciples lived.

And as soon as Qin Chen left, there was an uproar and sensation in the entire hall, which drew the exclamation and shock of countless people, and there was a lot of discussion and noisy.

Even the eyes of many people looking at their red eyebrows became unusual. Some looked like an idiot, while others were very envious.

With the token of the Son of God, Qin Chen arrived at his own mountain not long after.

The whole mountain is very magnificent, towering high and condescending, like a giant pillar, standing still.

Under the mountain peak, the breath of the holy vein was constantly flowing.

Around it, there are also mountain peaks, either high or short, large or small, majestic and rugged.

In the work of heaven, ordinary disciples live in courtyards, and even deacons and stewards live in mansions. They are located together. Only at the level of the saint son and the real power elder can there be a cave, and each person has a mountain. In addition, every courtyard, mansion, and mountain peak are connected by the ancient sacred veins. According to different levels, the level of the ancient sacred veins is also different. Qin Chen felt the breath of the sacred veins flowing under the mountain.
Up to the sky

The breath of the coming of God, compared with the ordinary ancient holy veins, has an indescribable mystery, it is vast and powerful.

"This is the ancient sacred vein aura of the peak of the sky..."

Qin Chen sucked in air, and his work this day was really rich. The holy veins cultivated for the holy child turned out to be the peak of the sky, but Qin Chen guessed that the ancient holy veins of the peak of this sky were not arbitrarily absorbed.

Sure enough, Qin Chen felt it carefully and discovered that the ancient sacred vein aura at the peak of the sky level was only a trace, used to refresh and condense the true essence when practicing, while most of the other ones were ordinary sky-level ancient sacred veins.

Among the mountain peaks, there is a cave mansion, and the cave mansion is empty, with training rooms, living rooms, refining rooms and so on.

"Since you have arrived at the cave and you have obtained a middle-grade heavenly ancient sacred vein, you should practice it first."

Qin Chen closed the cave and went directly to the training room, sat cross-legs, opened his mouth and inhaled, suddenly all the ancient holy energy on the entire Qingtian Peak was condensed into a set of laws, integrated into his body's cells and flesh. Among.

The ancient sacred veins at the peak of the heavenly ranks are different. Once inhaled, the power of the laws mixed in the holy energy of the day is like a raging fire, calcining Qin Chen's body and cells, making it a thousand times, so that Qin Chen's whole body is sprayed out. Light.

"So strong!"

Qin Chen immediately felt that there was a transformation in his body.

Unfortunately, this transformation is very slow. "Unfortunately, there is only one trace of the ancient holy veins at the peak of the heavenly ranks. It should have been deliberately assigned by the senior management of Tiangong. There is only one in each cave, and it flows slowly. Otherwise, let the elders and the holy children absorb, no matter how much Heavenly Peak

Holy veins are not enough to absorb. "

Qin Chen shook his head. The ancient sacred veins at the peak of the heavenly rank are strategic treasures. He has a feeling that as long as he can absorb it unscrupulously, he may be able to step into the realm of the initial peak of the heavenly sage in a moment.

Even if it breaks through to the mid-term of Heavenly Sage, it won't take too much time.

It's a pity that he only has a trace of absorption every moment, which is too scarce.

"Fortunately, I just got an ancient sacred vein of mid-level heavenly rank."

Qin Chen stretched out his big hand, and immediately took out the Heavenly Grade Middle Grade Ancient Sacred Vein that was offered on his bare eyebrows and began to absorb it.

Rumble! Qin Chen immediately felt that the Heavenly Sage Law in his body was blazing. Although the ancient sacred veins of this mid-tier celestial rank were far inferior to the ancient sacred veins of the

celestial peak, they were much more condensed than ordinary ancient sacred veins. , The billowing force enters Qin Chen's body

Inside, the law aura in Qin Chen's body continued to rise.

"The origin of the law, condensed."

Qin Chen condensed the Heavenly Sage Law of his whole body, with more than a hundred thousand ways, ran at full force, combined with each other again, condensed, clicked! Every three Heavenly Sacred Laws eventually condense into one, and the number is reduced again, changing into 30,000. But the sacred laws of the heavens are a lot thicker, each one is thicker than the thigh, and the golden rune chains are intertwined.

Strong and powerful.

Although the Heavenly Sage Law has been reduced, the power has increased. "Yes, that's right! The number of the Heavenly Sage Laws is one thing, but you can't blindly pursue too many. I also want to pursue thick and strong. My current Heavenly Sage Laws, every one is stronger than the giants in the middle of the Heavenly Sage. .Have been practicing like this

Go, when I restore the number of laws at the beginning, my strength can be increased several times! "

Qin Chen nodded in satisfaction.

There are many masters in the sky work, and there are also strong people in Guanghan Mansion. Qin Chen wants to stand firm in the Saint Child and rescue Qian Xue and the others, only to constantly improve his strength.

"Absorb, absorb, absorb again!"

Now Qin Chen seized the opportunity to use the power of the ancient sacred veins of the middle rank of the sky to re-refine the laws of the sacred sky, just to increase his strength and reach a higher cultivation base.

Originally, Qin Chen's own Heavenly Sage Laws were very scattered, some were derived from Heavenly Grade Pills, some were absorbed by some peerless experts, and some were formed by absorbing many holy veins.

Each is different.

Now Qin Chen has integrated this entire ancient sacred vein of the middle rank of the sky.

Boom!

Along with Qin Chen's devouring, the ancient sacred vein of this middle-ranked heavenly vein sharply reduced, the moment the entire sacred vein was completely swallowed by Qin Chen.

Hum!

A stronger aura lingered in Qin Chen's body. He finally reached the peak of Tiansheng's initial stage.

[Chapter 2813: Treasure Temple](#)

"Tiansheng's initial peak, it succeeded."

Qin Chen stood up, his whole body, the power of the heavenly sacred laws lingered around, like a chain, surrounding the sky and the earth, in his eyes, the stars of the universe flashed out, bursting with an astonishing breath.

Between the gestures, there was a burst of ancient aura permeating him, setting off his whole person like an ancient demon god.

An unprecedented surging power flowed in Qin Chen's body.

Although there is only a slight difference between the peaks of the early days of the Heavenly Sage and the early days of the Heavenly Sages, in terms of strength, there has been an amazing improvement. If he meets the Elder Marble again, Qin Chen will be more comfortable.

"I originally thought that if I wanted to break through the initial peak of the Heavenly Sage, I must first obtain the Saint Veins of the Eternal Building. I didn't expect to break through so soon." Qin Chen shook his head, but didn't take it seriously. At the peak of the sacred stage, there is no need to consume too much energy. It is enough to continuously absorb the holy veins. The key is how to break through to the middle stage of the sage. This can

It can't be done by absorbing two ancient sacred veins of middle rank of heaven.

"If I want to break through the middle stage of the Heavenly Sage, I must first raise the chain of the Heavenly Sage Law in my body. Now I only have more than 30,000 law chains in my body, and there are too few, far from the initial peak."

Although more than 100,000 laws were turned into more than 30,000, which was three or four times more concentrated, Qin Chen's strength did not decrease but increased, and his physical strength became stronger and stronger.

Qin Chen almost felt that with a random shock, he could turn the entire cave into ashes and sweep the army.

"When I raise the Heavenly Sage Law in my body to more than one hundred thousand times, I can try to hit the middle of the Heavenly Sage.

All of Qin Chen's previous holy veins and powers had condensed into more than 30,000 Dao, and it was not a matter of wanting to return to more than 100,000 Dao. "If I only practice slowly by myself and absorb the holy energy of the heavens, I am afraid that it will take thousands of years to break through, but if there is a holy vein of the peak of the heavens for me to unscrupulously absorb, this process can be ten times, a hundred times faster Reduce, most

The important thing is resources. "Qin Chen now has a deep understanding of the importance of resources. This is also the reason why many ordinary martial artists in the heavens are not as good as some disciples of the big forces. For the same cultivation level, ordinary martial artists need to cultivate for thousands of years, but one has Pang

A disciple with a big family background can save ten or even a hundred times the time. How can this compare?

"However, in the days of work, there are resources, and I can obtain resources by constantly doing tasks, hunting down the strong, and the development of Chendi Pavilion."

Qin Chen calculated, and these must be carried forward at the same time, his current demand for heaven and earth holy energy is dozens of times that of ordinary heavenly holy spirits.

"Let's go to the hidden treasure temple first."

Qin Chen's thoughts flashed, and the one that attracted him the most in his daily work was undoubtedly the Treasure Treasure Temple.

After a while, Qin Chen had already arrived at the door of the Treasure Treasure Temple. The Treasure Treasure Temple is the core place of Tianwu. It contains countless treasures. It is also the largest library of Tianwu. It stores countless classics and is guarded. The entrance is a huge stone gate, and there is a huge "

The word "bao" is vigorous and simple, and contains infinite power. Just looking at it makes people seem to see the infinite vastness of heaven.

Moreover, there are countless restrictions on Shimen, exuding a tyrannical aura.

This is the restriction of the Heavenly Sage Peak, and even stronger. Even with Qin Chen's current cultivation base, it is difficult to break, and it is impossible to detect the real lines of the restriction. If it is broken forcibly, the restriction will be killed on the spot. .

And at this stone gate, sitting cross-legged is an old man guarding the palace.

Seeing Qin Chen coming, the old man opened his eyes, and there seemed to be a starry sky spinning in his pupils.

"Young man, are you the newly promoted son Qin Chen?"

The old man said lightly.

This old man is unfathomable, and he has a profound feeling like a great elder, and he is definitely the top powerhouse among the heavenly sages.

As soon as he opened his mouth, the rules of heaven and earth vibrated, and there was a strong sense of oppression.

"Senior, it's a disciple."

Qin Chen said. "Well, you go in. The Son is eligible to enter the Treasure Temple to read the classics, but remember, you can only read it, not bring out any of them. In addition, there are countless treasures of my daily work, you You can also observe and even exchange

Change, however, any piece of treasure requires massive contribution points. You shouldn't have one yet, but you can observe it. "

"Go ahead."

While speaking, the old man opened the door.

As soon as the door was opened, a breath of treasure suddenly rushed toward his face, and at the same time, there was also a breath of scrolls that swept out. Qin Chen felt the vastness of knowledge like the sea in an instant, arching his hand and flying in.

The door closed slowly again.

"Well, this son is full of breath and extremely long. Compared to some mid-Tian Sage peak giants, it is not weak. Unexpectedly, it turned out to be just a Tian Jiao in the early peak of Tian Sage. Did I really find a treasure this time?"

"But the breath on his body is very mysterious. I guessed his fate, but I couldn't figure out his origin. It's weird."

The old man at the door seemed to have the gears of destiny turning in his eyes, calculating something, but in the end he shook his head, revealing a look of doubt.

"A lot of classics."

As soon as Qin Chen entered the inside of the heavenly work, he saw the boundless classics. Bundles of classics fell on the tall bookshelves, towering into the clouds, containing countless refining classics from before the heavens were broken to the present.

These classics, any one, if taken out, can cause a sensation, but they are very common in this day's work.

However, the classics here are not originals, but photocopies. The real originals may have been lost, or it may be impossible for them to appear here in the treasure hall of the Tiangong headquarters.

Except for the bookshelves, there are classics everywhere between heaven and earth.

From a distance, dimly and carefully, there are countless classics piled together to form mountains and even rivers.

These classics include jade slips, paper, stone, gold, etc., and there are even masses of light, conveying consciousness.

Qin Chen touched a beam of light, and immediately, a flood of information poured into his mind. Sanskrit sounds sang loudly. This is a classic that tells the history of the heavens. It contains many things that Qin Chen does not know. Qin Chen thought. In addition to the classics of refining tools, there are many collections that tell the human history of the heavens.

[Chapter 2814: All Saints](#)

"Awesome, the technique of patching the sky, absorb, transform!"

Qin Chen watched the books and books, and suddenly, information flooded into his mind and appeared in his mind.

With so many books, reading alone is definitely not enough. It takes countless hours. Qin Chen is preparing to use the technique of patching the sky to reproduce the content, and use the source of time to understand the content, but at this moment... ..

Hum!

In Qin Chen's mind, a mysterious ancient book suddenly appeared.

Wow!

It was the first time that Qin Chen saw a mysterious ancient book appear when he was not in danger. The ancient book appeared, suddenly bursting with mysterious light. Suddenly, all the books in the entire treasure holy temple radiated a little light. Any Qin Chen touched The past books will have an inexplicable power absorbed by the mysterious ancient books and disappear.

"What's happening here?"

Qin Chen was shocked.

Could it be said that this mysterious ancient book is absorbing the power of the classics in this hidden treasure temple? But in any book, isn't the knowledge in it the most powerful force?

Qin Chen could feel that after absorbing the power of classics, this mysterious ancient book actually began to show the appearance of a book, which showed various rules and knowledge, giving Qin Chen a sense of vastness.

"Could it be that the book formed is something similar to the legendary "Book of All Saints"?"

Qin Chen is no longer a lower realm warrior who knows nothing. It is said that in the ancient world, there is a "Book of All Saints", which is a sacred book that records all the avenues, martial arts and knowledge of the entire world, including all the worlds. knowledge.

This "Book of All Saints" is not only a classic, but also a supreme treasure, surpassing the existence of the treasure of the Holy Lord.

This classic is said to have almost supreme strength in itself. It is the common imprint of countless venerables in ancient times. It sits in the Ten Thousand Seconds Book World of the heavens and controls all the knowledge and martial arts in the heavens.

Now, the book phantom formed by this mysterious ancient book has turned into an embryonic form similar to the "All Saints Book of Heaven", condensing all the knowledge. Any book Qin Chen has touched and the knowledge recorded in it will be absorbed and become its own knowledge.

Moreover, when the knowledge of these books was formed, Qin Chen felt a sense of thorough understanding in his mind.

This is awesome!

Qin Chen wanted to finish reading these books, at least tens of thousands of years, or even tens of thousands of years, even if he used the sky patching technique, it would take countless years to master it.

But now, Qin Chen has only touched a book, then the knowledge in this book will be merged into that book under the mysterious ancient book, and appear in Qin Chen's mind. This method is simply against the sky.

"Great, the formation of the prototype of the "All Saints" represents the origin of knowledge, and my origin supernatural power represents the origin of all things. If this knowledge origin is incorporated into my origin supernatural power, it can give the origin supernatural power stronger Power."

With a sudden movement in Qin Chen's mind, Origin's supernatural power seemed to have a new understanding.

Before, Qin Chen's original magical powers were just his perception of the universe, the heavens, and the rules.

But now, Qin Chen has incorporated the origin of knowledge into it, because everything in this world has an origin.

Life has its origin, matter has its origin, and knowledge naturally has its origin.

Origin supernatural power is a supernatural power created by Qin Chen. It is still at a very naive stage. Although it is the strongest supernatural power that Qin Chen has comprehended, in the eyes of many top experts, it is actually very crude and ridiculous, but it has rich potential.

Now that Qin Chen has incorporated a lot of knowledge, as he understands the ways of heaven and all things, the origin magic power will naturally become stronger.

"A lot of knowledge, merge into the origin, form the origin of knowledge!"

Qin Chen quickly touched the books. Suddenly, the rays of light were absorbed by the mysterious ancient books. A large amount of knowledge was engraved in Qin Chen's mind. Qin Chen didn't need to read it. The knowledge in this classic book had already been absorbed. He took control.

How terrible is this?

No, this can no longer be described as terrible, but a pervert.

Not only knowledge, such as a classic of refining techniques, it may take several hours for Qin Chenguang to read it with the naked eye, but that is only after reading it. It may take several months to fully understand it. Time can truly be mastered.

Even if he used the technique of patching the sky and the power of the soul to understand, and under the acceleration of the origin of time, it would take at least several hours for Qin Chen to master a book of refining techniques.

However, under the mysterious ancient book, Qin Chen mastered a classic at a single thought. What a perversion is this?

Huh huh!

In the pleasant surprise, Qin Chen quickly skimmed through the books, and immediately, countless knowledge merged into Qin Chen's mind, making the phantom of the book brighter and brighter. At the same time, the content in it also jumped and turned into many patterns. It will not be repeated, and like the years, it will always flow, innovative, and represent new knowledge.

Every page of this book represents a civilization.

There are records of the history of the heavens.

There are records of celestial materials.

There are records of refining techniques.

There are records of the information of the 10,000 ethnic groups.

Also make various martial arts classics, alchemy techniques, formations, etc...

Whether strong or weak, they were all engraved in this book, forming Qin Chen's unique knowledge and becoming a part of his soul.

If ordinary people were filled with so much knowledge in their minds, they would have become lunatics in an instant, but Qin Chen didn't have any difficulty. That mysterious ancient book exudes misty light, combined with the heavenly soul forbidden technique, and the circulation of time.

Each piece of knowledge merged into Qin Chen's mind and became part of the original knowledge book, making Qin Chen's mind like a library.

In Qin Chen's mind, countless knowledge formed.

He swiftly skimmed through the books, without having to read it at all, countless knowledge became his knowledge.

What Qin Chen didn't know was that his soul power was slowly growing while he was scouring the books, and the fusion of his soul and the origin of time became closer and closer.

The origin of time is the most difficult to recognize the origin of the Lord. Although it entered Qin Chen's mind at the beginning, Qin Chen could not completely control it.

But now, with the formation of terrible knowledge in Qin Chen's mind, the origin of this time has become more and more closely integrated with Qin Chen, and a kind of time rule and power flowed out of Qin Chen.

In this treasure holy temple, I don't know how many books there are. Bookshelves like mountains stand here, and some books are piled up into mountains, some become rivers, and Qin Chen strays in this sea of books. .

Especially under the blessing of Time Origin, Qin Chen's speed is extremely fast.

Boom!

I don't know how long it has passed. When Qin Chen finished storing the last book, Qin Chen's mind immediately shone brightly.

[Chapter 2815: Massive treasures](#)

A mysterious book was formed.

"Okay, it's finished, the book of origin, condensed into a rudimentary form." Qin Chen stood up and observed the book of origin in his body. This book is not thick, only more than ten copies, but every page

blooms. The soft mask, the epic atmosphere, and the words flow on it, making people feel the knowledge

The profoundness of wisdom, the profoundness of wisdom, the vastness of origin.

The wisdom of all things!

"This book contains the knowledge of countless ancient books in the entire treasure holy temple, representing the origin of my supernatural powers." Qin Chen's heart was clear and clear. When his book of origin was formed, he felt When I reach an inexplicable power, I even see through the future. The endless void of the future, in the dark, seems to have become the future of the heavens.

the origin.

However, the book of origins is still very weak. Although the ancient books in the treasure temple are gone, they are only equivalent to Guanghan Mansion, equivalent to the working branch of this day, the true heaven-defying ancient books. The quantity is still too small.

In the future, Qin Chen will need to continue to accumulate knowledge, write more knowledge and civilization, and continue to grow the power of this book of origins.

If he could write the knowledge of the entire celestial realm, Qin Chen didn't even know how far this book of origin would grow, and whether it would become the treasure of heaven guarding knowledge like the "Book of All Saints" in the ancient celestial realm.

"What is the origin of this mysterious ancient book?"

Qin Chen was shocked. At this moment, he was more curious about the origins of the mysterious ancient books, and even more shocked. "No matter what the origin of the mysterious ancient book is, I always feel that my book of origin is very important, because every civilization history is written by countless sages who have exhausted their endless power and wisdom, and even their lives. One of the human race

It is the obligation to pass on this responsibility. "

Qin Chen felt the great responsibility deeply, and his mind broadened extremely.

What he has to do in the future is to continue to accumulate knowledge and civilization to make the Book of Origins more perfect, not to let it die out, and not to be sealed in the long river of history.

In the dark, in Qin Chen's original domineering and vigorous body, there was a sense of bookishness. Every inch of his skin had textures and epic knowledge was flowing.

This has gone beyond the scope of power and entered a realm of mysterious and mysterious saints.

"This time condensing the Book of Origins is a huge transformation for me. I practiced too fast before and my foundation was unstable. Although my strength was very solid, my realm and sentiment were actually much worse. Now, my hidden danger is eliminated

Now, it will be much easier for me to advance to a higher realm in the future and to understand the highest way. I will increase my cultivation base at an astonishing speed, which will shock the world. "

Qin Chen had an insight into his realm.

He looked at the countless classics in front of him and wandered in the treasure-storage temple. These books have now entered his mind, and will never forget them, and become part of his knowledge.

The vast knowledge gave Qin Chen a sense of perceptiveness, observing the autumn leaves, distinguishing the past and the present.

Then, Qin Chen left the classics and entered the treasure area inside.

Suddenly, the colorful treasures bloomed with light, giving Qin Chen a strong shocking feeling.

Boom!

The strong treasures in the treasure area swept down, and even formed a terrifying storm. If there is no passable life card, the treasures of these treasures alone can instantly kill a strong celestial sage.

"This is... too much..."

Looking around, the treasures that can be placed here are all treasures above the heavenly rank, and it is impossible for non-celestial treasures to be placed here.

And there are many varieties of these treasures.

There are all kinds of them, suspended in the air, shrouded in an invisible light cover, and can only be viewed, not captured.

If you want to redeem the treasures here, you must have corresponding contribution points, but now Qin Chen has no contribution points at all, so naturally he cannot exchange them.

In addition, there are integral displays on each mask.

Qin Chen casually looked at a treasure in front of his left. It was priced at 10,000 points, but it was a broad knife the size of a door.

This broad knife is very weird and extremely huge, but it is very rough, exploding with a shocking aura, and there are even savage god-like figures flashing. "This is a low-grade war sword of the sage of heaven, but it is a fine piece of the low-grade. It should have been refined for more than three hundred years. It seems to have penetrated the atmosphere of the ancient barbarians. Swordsmen get it, depending on the repair level

, Can definitely improve one's own strength a lot, for example, a warrior at the peak of the Celestial Sage can improve by 50% in the contemporary era, and even a swordsman giant in the Celestial Sage can be increased by more than 10%. "

Qin Chen's gaze shifted slightly, his gaze shone on the sword, and he immediately showed the refining time and various effects of the sword, the engraved formation method and the materials, all in his head.

This shocked Qin Chen. In fact, although Qin Chen had acquired the sky-repairing technique before, and possessed heaven-defying accomplishments on the refining device, he would not be able to see all the information of a holy soldier at a glance. At least he must use the sky-repairing technique. Technique, secretly analyze it to get

Draw certain conclusions.

But now, just looking at it, he can judge something, and it is very detailed, which is simply against the sky.

"It's the book of origin." Qin Chen knew in his heart. He had watched all the classics in the treasure holy temple before and merged into the book of origin, turning this knowledge into the knowledge in his own mind, countless celestial materials And so on, as long as there are records in the classics here,

He can draw conclusions in the first place.

This allowed him to see everything about this sword in just one or two breaths.

"Awesome, I'm afraid, this is the true purpose of the Book of Origins, not only to stabilize my realm, and to make the future more smooth, but also to give me a comprehensive understanding of all things in the heaven..." Qin Chen before The most lacking is the knowledge about the heavens, but now, after absorbing all the classics of the entire Treasure Treasure Temple, Qin Chen's knowledge is profound and vast, and can be called the first in Guanghan Mansion, even Guanghan Palace Lord and

The ministers of Tiangong Division may not be like him.

Because these people did not read all the classics in the entire treasure temple.

Of course, what Qin Chen is stronger than them is only the amount of knowledge, and there is still a lack of overall quality.

Because the classics here only record the history of some characters in the heavens, material techniques, secret skills and supernatural powers, but although these classics are very powerful, they are only equivalent to some heavenly sages. Books like the Holy Lord's supernatural powers that are truly against the sky will not appear here, so Qin Chen still lacks some of the top-level exercises, secrets, and techniques.

[Chapter 2816: Qin Chen was dumbfounded](#)

Set his mind, Qin Chen's eyes fell on the price of the sword.

"Ten thousand contribution points."

Ten thousand?

Qin Chen frowned. He remembered that the red eyebrows killed the yin and yang prince, and he got 30,000 contribution points. So, if he killed a yin and yang prince, he could only exchange three such saint soldiers?

Some are missing, right?

You know, Yin Yang Langjun is a giant of the mid-Tian Sage mid-level, even approaching the mid-Tian Sage mid-level peak, and in the Yin Yang Sea, it is extremely difficult to kill him, even the strong man at the mid-Tian Sage peak has the probability of falling.

Chimei also beheaded the opponent because the flames and profound pupil restrained him, and after beheaded, could he actually exchange for three such saint soldiers?

Although this holy soldier is strong, it is equivalent to the sky-opening axe of the Lord of Yundong Guangzhou, but after all, it is only the best among the heavenly low-grade holy soldiers. For a giant at the peak of the mid-term heavenly holy, the role of improvement is still somewhat small. But the price in exchange is so great.

"No, you can't count that."

Suddenly, Qin Chen shook his head.

He had forgotten that after the red eyebrows killed the yin and yang prince, he also got a lot of treasures from the yin and yang prince. These treasures are not collected by the day's work. They have other means of making money, and these 30,000 contribution points It's just an extra give.

Among other things, the yin and yang soul fire that Qin Chen hadn't smelted, and the ancient sacred vein of the middle-ranked sky, were far more valuable than this battle axe.

Moreover, Chimei can also get rewards from various big houses, and the information and rewards of Lord Yin and Yang do not need to be done by Chimei himself, and the day's work can be completed for him.

The value of these things is extraordinary.

The most important thing is that Qin Chen discovered that the treasures here don't seem to need a lot of contribution points.

The best sacred soldiers of the lower grade that day had 10,000 contribution points. The other treasures were basically at this level, the lowest, 10,000, and the higher ones, 134, 156.

At the 20,000 level, it has already reached the mid-level heavenly rank.

In other words, Crimson Eyebrow's 30,000 contribution points can be exchanged for a Saint Weapon of the Heavenly Mid-Rank Peak, corresponding to the identity of the Yin Yang Langjun.

This calculation is not too small.

Qin Chen looked at the treasures here, all kinds of weapons, defenses, and auxiliary types.

There are holy soldiers, armors, shields, flying treasures such as Noah's Ark, escape treasures, and even treasures such as air breaking talisman, all of which are expensive.

In addition, there are all kinds of sky-defying flames, as well as the exchange of refining tools and alchemy materials.

Of course, the most sacred soldiers, because the work of heaven is rich in sacred soldiers. Whenever someone refines top weapons, they will be placed here for internal exchange. Some ordinary sacred soldiers are sold through their channels and supplied. The front line of the demon battlefield.

Qin Chen has no interest in other treasures for the time being. When it comes to attacks, he has mysterious rust swords and other things, and when it comes to hiding, he also has jade discs, etc. What he needs is at most some powerful spatial treasures, which can be used to fill the sky. The technique is

integrated into the jade disc of good fortune from the universe, and strengthens the effect of the jade disc.

However, space treasures are extremely expensive. In contrast, combat saints are the cheapest, followed by armor, and then various auxiliary treasures. Space generally belongs to the auxiliary category, and the price is the most expensive.

A top-tier Heavenly Saint's low-grade Saint Weapon only needs 10,000 contribution points, but a space-type low-grade treasure requires 16, or even more, with a huge price difference.

Don't underestimate the price of 6,000 to 7,000. Working in Tian, the contribution point is very difficult to get. You can see the clue from the only 30,000 yuan that can be used to kill Yin Yang Langjun.

"Let's first see what treasures suit me."

Qin Chen walked in, all kinds of treasures dazzled him, and he kept watching, especially some sword-like treasures, which still made Qin Chen quite concerned, and his consciousness kept sweeping.

After a while, Qin Chen had already entered a higher level.

"This scanning process is too slow, why not stimulate it?"

Qin Chen's heart moved, exuding a sword intent, motivating the swordsman treasure here.

Suddenly, countless swordsmanship treasures trembled and were inspired by Qin Chen's sword intent, emitting light.

But none of these swordsman magic weapons made Qin Chen particularly satisfied.

All the way in.

Whoosh!

Suddenly, Qin Chen seemed to have touched a powerful saint soldier. In the sky, a sharp sword light with a strong aura flew over, slashed the void, and slashed towards him. A river of sword energy appeared, vast and mighty.

"when!"

Qin Chen raised his hand, and this sword aura was immediately pinched in his hand, swaying, like a spirit snake, almost cutting Qin Chen's barren ancient body.

"Awesome."

Qin Chen retreated slightly under the sword aura, almost injured by his cultivation base. If a general Tiansheng mid-term giant came in, he might be seriously injured by a blow.

He looked at it and saw that it was a sacred soldier at the peak of the middle rank of heaven. It was mighty, with many sword marks on it. It seemed like a peerless master who was practicing swordsmanship and engraving his martial arts on it. A sense of decisiveness.

Moreover, there is a vicissitudes of history on it. This is not a new refinement made by Heavenly Work Refiner, but an ancient sage soldier.

Looking at the price, Qin Chen was speechless.

Forty thousand contribution points.

This is simply robbery.

Qin Chen urged a trace of mysterious rust sword aura, and suddenly, the old sage soldier who was still radiant and murderous suddenly trembled, like a frightened cat, and did not dare to move.

"Ugh....."

Qin Chen was speechless. After having the mysterious rust sword, the other holy soldiers did not attract him much, unless they were truly against the heavens.

It's a pity that no matter how big the treasure is in the temple, it is impossible for the Holy Master weapon to appear.

The ordinary sage soldier Qin Chen could refine it by himself, processing it on the basis of the nameless sword, and Qin Chen was completely confident to refine it to a level not inferior to the ancient sage soldier in front of him.

The most important thing is cheapness. Qin Chen has no contribution at all right now.

"It's better to choose some defensive treasures for Sisi, Ao Qingling and Qin Tingting."

Qin Chen's heart moved.

Sisi is okay, already has the Cangyuan map, and has the inheritance of the nine-tailed fairy fox. He is born with a charming technique, and the ordinary strong can't hurt at all. The strong can really hurt her, and the ordinary treasure can't defend it. , But you can buy some escape treasures like the Breaking Talisman.

But Ao Qingling and Qin Tingting are not as talented as Sisi. To survive in Tianjiao and Guanghan Mansion, they still need some defensive treasures, at least they cannot be easily crushed by some giants.

This is critical.

Qin Chen went all the way in, looking at the various defense treasures, and after a while, he was a little dumbfounded.

[Chapter 2817: Time spar](#)

Thirty thousand two!

Thirty-five!

forty thousand!

Forty-one!

The more you go in, the more expensive the treasure.

The key is cheap, which Qin Chen doesn't like, because the protection effect is not so good, but the better ones are too expensive.

"Hey, this treasure is good."

Qin Chen's gaze suddenly fell on a cyan silk garment. The silk garment was as smooth as satin, shimmering like a starry sky, and it was astonishingly bright.

"The starry sky cicada clothing is made from the wings of the starry sky cicada, a mid-tier heavenly treasure, which can withstand the attacks of the peak powers in the middle of the sky for a certain period of time. The starry sky cicada is a space attribute monster with space attributes. The starry sky cicadas made of its wings make the wearer more comfortable in the control of the void when he travels through the void."

"Value, fifty thousand contribution points."

"This defensive armor is good."

Qin Chen's heart moved, this starry sky Chanyi suits Ao Qingling.

"Unfortunately, the price is too expensive. You can just remember to contribute 50,000 points."

Qin Chen continued to move forward.

Soon, he saw another defensive holy soldier that satisfied him.

"The Void Shield is made of Void Spar. Once activated, it can withstand the attacks of the peak giants in the middle of the Heavenly Sage, and has a hidden effect. It is a top defensive treasure."

"Value, fifty thousand contribution points."

This one is suitable for Qin Tingting, and the price is exactly the same as Xingkong Chanyi, not cheap.

"what!"

Suddenly, Qin Chen saw a treasure again and couldn't help but let out a surprise.

This is a whole body of snow-white gauze. On top of the soft gauze, it is shining with brilliance, like it is made of the feathers of the gods. It is soft and phantom, giving people a beautiful feeling. In these many treasures, as dazzling as a queen.

"The phoenix feather robe is made from the feathers of the ancient monster Nine Phoenix Phoenix. It has amazing defensive power and is gentle and comfortable. It can be integrated into the holy yuan, fit on the surface of the body, and even filter the impurities in the holy energy of heaven and earth. , So that the wearer's efficiency in absorbing the holy energy of the heavens and the earth is increased by 30%, stimulating to the extreme, and able to withstand the short-term attack of the strong man in the late stage of the holy."

"Value, 88,000 contribution points."

hiss!

Qin Chen took a breath of air, and could withstand a blow from the late Heavenly Sage powerhouse. This treasure was almost comparable to a Heavenly High-Rank Saint Soldier treasure.

The price is also the most amazing, 88,000.

"This gauze suit is very suitable for Sisi. It is enough to increase Sisi's defensive ability by a whole level. Unfortunately, the price is not cheap. Eighty-eight thousand contribution points are equivalent to killing three Yin and Yang lords. It's not impossible, but it will take too much time."

It would take a lot of time to kill three powerful men like Yin Yang Langjun, even if Qin Chen slashed the chaos with a quick knife, one of them would take a lot of time, and three of them did not know how long it would take.

What's more, even if you kill three of them, you only have 90,000 contribution points, and you can only buy one defensive treasure.

In the future, it is more than one hundred thousand level. Qin Chen has seen it for so long. Ten thousand to twenty thousand contribution points are the holy soldiers of the peak of the low-grade heavenly ranks, and between 20,000 and one hundred thousand are the middle-ranked heavenly soldiers. The sage soldiers who reached the peak of the mid-rank of the heavenly ranks, more than 100,000, were the sage soldiers of the top-ranked heavenly rank, that was the realm level of the strong man in the late stage of the sage.

Although this level of Saint Weapon is powerful, for Qin Chen now, it is still a bit too wasteful. If a treasure can't exert its true power, it's better to buy a Saint Weapon from the Heavenly Middle Grade Peak. Comfortable.

"Ok?"

As Qin Chen was thinking, suddenly, the origin of time in Qin Chen's mind moved slightly, as if there was something in front of him attracting him.

"this is....."

Following the change of the origin of time, Qin Chen saw a colorless spar, exuding the aura of time, suspended in the sky, around, and other treasures, even those of top grade heaven. They were all overshadowed by the brilliance of the spar at this moment.

"The origin of time?"

"No, it's a time spar."

Qin Chen took a breath, and there was a time spar in this treasure holy temple.

Time spar, a treasure with special power of time, rumors, is a kind of time crystallization born during the continuous flow of years, which contains the profound meaning and power of time.

Rumor has it that once a warrior completely absorbs the time spar, he will be able to comprehend a hint of time.

This kind of treasure is extremely against the sky, how could it just appear in the treasure temple?

Qin Chen hurriedly looked at the price.

At this glance, he almost vomited blood.

"0.88 million contribution points."

Damn, is this a robbery?

No wonder no one exchanges.

In just an instant, Qin Chen understood the reason for coming.

According to a book he had seen before, the time spar was actually not a special treasure in the ancient heavens. Although it is rare, the time spar has appeared many times because of the long history of the years.

Many big men and strong men, knowing that it is precious, have spent a lot of money to buy, trying to grasp the profound meaning of that little time.

However, for so many years, almost no one has truly understood it and mastered that trace of time. In many cases, it was just a touch of time rules, and it did not have much to improve the cultivation of martial artists and combat power. effect.

Over time, the time spar has become a legendary treasure with amazing value, but few people are willing to spend a lot of money to buy it.

Just like this time spar, it is priced at 880,000 contribution points. With the strength of the refiners of the Guanghan Futian working branch, it is almost impossible to spend so many contribution points, and it is impossible to exchange one. Master the time spar.

But at this time, the spar did not have much effect on other warriors, but it was full of attraction for Qin Chen.

"The other warriors of the time spar cannot understand and master it, but I am different. I have the origin of time and can easily grasp the profound meaning of time in this time spar. At that time..."

Qin Chen's breathing suddenly rose.

He has been unable to control the origin of time, because he has been unable to comprehend the profound meaning of time, but if he had this time spar, everything would be different. Moreover, he openly exchanged the time spar, if unexpected After displaying the profound meaning of time, other people will not guess about the origin of time, but think that he has mastered the profound meaning of time in the time spar.

This is a win-win result.

"At this time spar, I must redeem it."

Qin Chen vowed secretly, but when he saw the 880,000 contribution points, he got a headache again.

This price can no longer be described as expensive, but a sky-high price.

For the entire Tiangong Guanghan Mansion branch, there are so many contribution points that can be used, almost no more than one hand. He is a disciple who has just joined Tiangong, where can he find so many contribution points?

[Chapter 2818: Do the task](#)

Notice!

General refiners can only exchange contribution points through refiners.

But this process is very slow and difficult. For example, for a holy child, Tianjiao will provide about three materials every three months, while the holy children need to hand in a heavenly low-grade holy weapon, a normal early-stage refining weapon. The division can produce one and a half saints for every three materials.

That is to say, there can only be half of the Saint Soldier balance, and the price of an ordinary Heaven-Rank low-rank Saint Soldier sold to Tianzhuo is 1,000 contribution points, and half is 500 points.

Every three months, only five hundred points can be earned, two thousand points a year, and ten thousand contribution points, it takes five years.

This is still a saint son who does not eat or drink, does not spend any contribution points, and only spends a day's work to refine free materials. Under normal circumstances, the saint son's cultivation requires a lot of resources, which is absolutely impossible to waste time. Continuously refining Saint Soldiers and earning this contribution point difference.

And this is still on the premise that the saint's disciples have three free supplies of materials every month. As for ordinary disciples and refiners, they are not so comfortable. If you want to contribute, you can only complete some small tasks of Tian's work and work for Tian's work. The refining system Saint Soldier is earning a fixed small amount of contribution points.

too difficult.

It will take five hundred years for one million contribution points to accumulate five million without eating or drinking. Only after five hundred years will Qin Chen be able to buy the time spar. Qin Chen doesn't have this time to waste at all.

"I still need contribution points. The ancient Saint Veins for cultivation requires contribution points. The purchase of various materials requires contribution points. The exchange of time spar also requires contribution points. Now I can only go to the day work task, except for the contribution point tasks in the day work. There must be many other tasks besides killing the strong."

"However, there are not too many contribution points for ordinary missions. Even the killing of Yin Yang Lang Jun has only 30,000 contribution points. If I want to collect all the contribution points to buy Time Spar, I need to kill 30 Yin Yang Lang Jun, this is impossible to do, so I have to take on some extremely difficult and extremely abnormal tasks."

"Go to the Mission Hall first. I believe that Heavenly Work has stood for so many years, and there must be many extremely difficult perverted tasks. Only by completing such tasks can I get more rewards."

Whoosh!

Doing what he thought, Qin Chen didn't hesitate anymore, turned around and walked out of the Treasure Treasure Temple.

Creak!

Shimen was pushed open, and the old man guarding the door opened his eyes and saw Qin Chen walking out of it. He just nodded at first, but the more he looked at it, the more he was surprised, because he found that Qin Chen walking out of it had a profound and vast aura, and When I first entered, there was a shocking change.

Qin Chen, who had not been in front of the Book Collection Temple before, had a strong aura and amazing talent, but still had a feeling of inexperience in the world.

But now Qin Chen seems to have gone through countless vicissitudes of history, the heavens have changed, and there is a transparent feeling of seeing through everything.

This feeling made the old man even watching a strong man with more experience than him, and endless shock suddenly emerged from the depths of his heart.

"You..." The old man said hesitantly: "This... you just spent three days and three nights in this treasure-haven temple. Why did your breath become completely different and completely reborn. What happened to you?"

"You have raised your realm? No, you are still a warrior at the peak of the early days of Heavenly Sage, but this breath... mood, and feeling..."

In Qin Chen, the old man seemed to have seen an eternal figure who understood eternity and had a clear wisdom. This kind of feeling was only felt by the Minister of Heavenly Work.

At this time, Qin Chen's breath of wisdom is equivalent to a top powerhouse who has lived for many years, making people feel inexplicably afraid.

"It's nothing, the disciple just realized something in the treasure-storage temple, looked through some celestial history, comprehended some refining techniques, and at the same time re-organized his own magical powers, formed a system, with new Just comprehend."

Qin Chen smiled and said, "The disciples have benefited a lot from the three-day retreat. Thank you seniors for opening the door to convenience. In the future, the disciples will repay and leave."

The voice fell.

Whoosh!

Qin Chen's body disappeared directly outside the treasure hiding temple, silently.

Then Qin Chen relied on his Saint Son token to pass the prohibition on work for countless days, and once again came to the hall on the holy island.

In the main hall, people came and went, still a lively appearance, Qin Chen was familiar with the road, and soon came into the temple and walked to the task counter.

"It's Qin Chen."

"This time the newly promoted son Qin Chen."

"Hi, the breath on my body is really strong, and it makes me feel jealous."

"It hasn't been long since he was assigned to the cave mansion? What did he come to the hall to do without practicing in the cave mansion?"

"Is it because you want to take up the mission? Or exchange materials, or sell the holy veins in exchange for cultivation resources?"

Many disciples began to guess, their eyes flickering.

Qin Chen ignored the discussion around him and went straight to a counter.

"Master Saint Son."

That was the job that Qin Chen handled the cave before, and when he saw Qin Chen coming straight, he couldn't help feeling a little frightened.

"I don't know, Lord Saint Son, what are your needs for coming this time?"

He didn't dare to neglect, he hurried forward, and said respectfully, feeling nervous.

"I want to take the task, do you have any higher contribution tasks here, take a look." Qin Chen said directly.

The manager breathed a sigh of relief and hurriedly said: "It turns out that Lord Son is going to take on tasks. It just so happens. Recently, there are more tasks for work, and many contributions are good. I don't know what kind of tasks Lord Son wants to take. ?"

"It doesn't matter what task, as long as the contribution point is high, I can take it." Qin Chen said lightly.

"Master Saint Son, there are many tasks for our daily work, among which there are four main tasks. One is the task of collecting materials, which is to purchase extremely rare materials on the market. Including holy soldiers, any holy soldiers, and materials, as long as they are handed over to heaven. Work can be converted into contribution points. Depending on the value, the number of contribution points is different. This is the fastest way to earn contribution points."

"The second is the task of making sacred soldiers. After receiving them, Tianjiao will allocate the materials for refining sacred soldiers. After you successfully refining, Lord Son, different ranks of sacred soldiers can be exchanged for different numbers of contribution points. However, there is a problem with this kind of task, that is, if the refining fails, it needs to compensate for the loss of the heavenly work materials. You also know that the refining master has a chance of success in refining the holy soldiers."

"The third kind is the beheading mission. In Guanghan Mansion, and even outside Guanghan Mansion, there are countless bandits, evil strong men, criminals on the wanted list, as well as demons, demons and other races that destroy the peace of the heavens. After killing them, different powerhouses have different levels, and they get different contribution points."

[Chapter 2819: Free mission](#)

"In addition to these three, there are many tasks left, all of which are classified as the last category, called free tasks. Some of them are released by daily work, such as running errands for the day, or inquiring about a certain one. News from the strong, or finding treasures, etc. In addition, there are tasks issued by other disciples. For example, Master Shengzi, you need a certain kind of material, or you have a problem with a certain technique, or you want to Understand the usage of a certain material. If you can't solve it in Tianjiao, you can post such tasks here and let other disciples solve it. Tianjiao will make a 20% contribution point."

That steward gives a detailed introduction.

"Among these tasks, the safest is the task of refining sacred soldiers. Although there is a failure rate in refining sacred soldiers, if you are careful, you can still make a profit. Most of the disciples generally accept this kind of task. ."

"In addition, it is the sale of materials and treasures. It is safer and faster to contribute points. The most dangerous thing is hunting missions. Generally, the talents of the warrior department will take them. Lord Son, you just joined Tianjiao. The important thing is cultivation, but there is actually no need to take on those dangerous tasks."

This constant explanation was also to leave a good impression on Qin Chen, his performance was meticulous, and at the same time he came up with many task lists.

Qin Chen glanced, frowning suddenly, almost none of the tasks above suit him.

It's not that these tasks are not good, but it takes too much time to complete. For example, to refine the Saint Weapon, with Qin Chen's success rate, a few days can successfully refine a Heavenly Grade low-grade Saint Weapon. , But this sacred soldier can only get about 3,000 points if it is handed over to Tianjiao.

The price is only one-third of the selling price in the Treasure Temple, because the materials and so on are provided by Tiantong.

He wants to collect more than one million contribution points, which takes hundreds of days.

Even if there is time to accelerate, it will take a lot of time.

It takes more time to kill enemies in exchange for contribution points.

As for the exchange of materials and treasures, according to the exchange rules in the work of the day, Qin Chen needs to take out a treasure twice as large as the time spar to exchange for a time spar. Many treasures on Qin Chen's body need to be used by himself. Naturally, it cannot be exchanged out casually.

"Unless... take out the peak demon sage soldiers brewed in the Five Secrets of the Lord Yama. Although the value of the demon soldiers' exchange in heaven is low, the demon sage soldiers brewed by the Lord Yama are of extraordinary value. If they are taken out, they should You can also exchange enough time spar contribution points."

But these holy soldiers were left by Qin Chen to the Skeleton Rudder Master.

"what....."

When Qin Chen had a headache, he suddenly saw the last position in the free mission on the mission list.

Rows, densely packed, many, all problems encountered during the refining process, and almost all of them are different.

"Master Saint Son, these tasks are the problems encountered by the refiner in Tian's work during the refining process. Many problems require a lot of time and energy, and may not be completed. In order to save time, a lot of refining The teacher will turn the question into the form of a task, match the contribution points, and put it in the task hall to find answers."

"However, although we work with elders who teach the knowledge of refining and solving puzzles, they have their own things to do every day, so there is not much time, and you know, those who can become disciples of refining are at least At the pinnacle of the earth-level craftsmen, most of them are even sky-level craftsmen. Many of the questions they have raised are beyond the reach of the elders..."

"Of course, if some top elders study with great concentration, they may be able to find the answer, but what is the status of the elders? There are many refining problems that they need to study. Everyone is working hard to improve themselves. Naturally, it is impossible to practice for some disciples. Teacher, the problem of spending too much on it has also led to more and more problems accumulated here..."

Seeing Qin Chen flipping through the task book, the manager hurriedly explained.

Sure enough, as the steward said, there are too many refining problems here. There are problems with the booster fire, and there are confusions during the refining process, and some refining holy soldiers are over. , The problem of the sage soldiers not reaching the target strength.

Many, many strange things.

Behind almost the entire task book, there are countless such tasks, and all of them are different, coming from different sage refining and problems.

No wonder no one has answered it for countless years, and there are more and more questions. It is true that the questions here contain too many aspects. Even if a late-stage crafting master comes, it is quite a headache. The so-called art industry has Specialized, there are actually many types of refining techniques, and each person's research direction is also completely different. A question raised by an ordinary early heavenly refiner can not be answered by a late heavenly refiner.

Of course, if the late-stage refiner of the heavenly ranks is willing to spend time to try the refining himself, and experience this problem, carefully study and analyze it many times, it is still very likely to be solved.

However, the late Tian-level refining masters of the Guanghan Fu Tian work branch are at least people like the great elder. How can they spend a little time to answer a question of an early-stage Tian-level disciple for a little contribution?

Moreover, even if this problem is solved, as the refining progresses, while some questions are answered, more and deeper new questions will arise.

And among the core disciples of Tianjiao, each is a heaven-level refiner. Naturally, a lot of questions have been piled up, and there are many important questions. Some core disciples charged a very high price to know the answer urgently. On top.

These high contribution points immediately attracted Qin Chen's attention.

Especially when he saw one of the problems, the book of origin that had formed before in his mind suddenly surged. Various kinds of knowledge began to emerge, and Qin Chen got the inheritance of Tiantian Palace, combined with the technique of repairing the sky, immediately, The answer to this question appeared in his mind.

Naturally, very comfortable.

This is a fairly simple question, but the contribution point of this question is three thousand points, which is comparable to the fact that he spent a few days refining a sacred soldier at the pinnacle of the heavenly rank.

Hiss, this efficiency is really high.

"How should I answer these questions?"

Qin Chen looked at the manager immediately.

"Master Shengzi, do you want to answer your questions?" The manager was stunned, and immediately said: "There is a special answering area in front of the question about the refining device. You can answer it through Tianwork's communication system there. Once you do The answer will be delivered to the questioner as soon as possible, and the questioner will be verified within one month. Once the verification is passed and the answer is proved to be correct, it will be sent to the task department, and then the task department will directly enter the contribution points to you In the token of the Son of God."

[Chapter 2820: Answer area](#)

"One month?"

Qin Chen frowned, it was too long, he didn't have so much time to waste.

"Can you shorten the verification time?" Qin Chen asked.

"Of course it can. Actually, one month is due to the fact that many disciples are busy with their own affairs, and may not be able to verify it in the first time. But in fact, many questioners have been asking questions for many years. For decades, even hundreds or thousands of years, if someone is willing to answer for them, they are even willing to let go of everything and verify it on the same day, but this needs to be communicated with the questioner in advance, Lord Son, do you think Which question to answer? I can help ask the questioner and get a reply soon."

So?

Qin Chen thoughtfully.

"If my answer is correct, but the other party insists on saying it is not correct, why not contribute?" Qin Chen asked again.

"Holy Son, you don't have to worry about this question at all." The manager smiled, "If you are sure to be bold and correct, but the other party does not admit it, you can directly submit it to the elders for reconsideration. Once the elders verify that the answer is correct, the questioner will receive severe punishment, ranging from ten times the points to the answerer, or directly expelled from work."

"Of course, the answerer can't answer some solutions that the questioner can't do at all, as well as ambiguity, feasible or not, so the elders will not approve it."

"Basically, in the history of my work, there has not been a case where the answerer has the correct answer, and the questioner does not admit that something happened."

Qin Chen nodded, "Take me to the solution area."

After hearing this, he nodded, thinking that Qin Chen knew which question had a solution, and immediately brought Qin Chen to the solution area.

"You come and send me a message."

As soon as he sat down, Qin Chen said to the steward.

"I don't know which question you want to answer, Lord Saint Son?" The steward smiled.

"As long as it is less than 10,000 contribution points and more than 3,000 contribution points, you will send a message to the questioner. My requirement is that the other party must have time to verify within one day, otherwise, the task will be taken from me. Removed from the list, if the other party's feedback can be done, then submit it to me." Qin Chen said.

"You, sure?"

The manager was stunned for a moment, with less than 10,000 contribution points and more than 3,000 contribution points. Is this enough to have thousands of problematic tasks?

"Hurry up." Qin Chen said lightly: "I don't need me to remind you a second time, right?"

"Yes!"

The manager was taken aback and didn't dare to neglect, and immediately started sending group messages. Of course, he changed the wording for Qin Chen during the group sending, saying that if the other party agreed to verify within one day, he would start to try to answer.

In this way, even if Qin Chen couldn't solve it, there wouldn't be any particularly big problems.

Di di di di!

Almost instantly, all the questioners of these thousands of questions received news.

A certain mansion.

An elder who was refining was prompted by the message, picked up the token, frowned, "Which elder is this to answer the question? It must be verified within a day before attempting to answer it. This is to the mission department. Looking for inspiration?"

The old man sneered and didn't bother to pay attention to the news. He was in the process of refining. Although the questions he raised had puzzled him for hundreds of years, he couldn't stop refining to verify the answer to this question, right? And the other party may not really be able to answer.

Put down the token directly, ignore it and continue refining.

Another mansion.

A refiner opened his eyes while practicing, and revealed the same doubts, but he hesitated for a while, and still agreed.

"Anyway, it's only a day. This time I practiced for a long time. The question has puzzled me for thousands of years. It is unlikely to answer it, but it is better to try than not to try."

At this moment, many refiners who worked in the sky had received messages, some were disdainful, some sneered, some were interrupted in refining and unhappy in cultivation, and so on.

Most of them chose to ignore it, because this kind of thing hadn't happened before. It was because some elders felt doubts and problems during the refining process and wanted to come to the mission area to find inspiration.

But like this time, it is the first time to directly ask to verify the answer within a day.

Who? It's so arrogant that they are asked to answer the question within a day before the question has started. Isn't this funny?

If they ask questions that are so easy to answer, will they put a hundred or thousand years of time in the work task department?

Of course, although the vast majority of people are unwilling, there are still a small number of refiners who are not busy, holding the attitude of giving it a try, and submitting for approval.

Beep!

At this moment, Qin Chen, who was in the answering area of the Tiangongsheng Island Hall, finally began to have the first question before his eyes, and more and more questions began to appear in the answering area. These were the questioners who accepted the conditions.

"Okay, let's start!"

Qin Chen lowered his heart, held his breath, looked at the series of question messages above, and at the same time picked up the Shengyuan sensor pen on the side, and started to browse the first question.

The title of the whole question is very short, and Qin Chen finished reading it in a blink of an eye. When this question appeared in his mind, all the knowledge Qin Chen saw in the Treasure Treasure Temple surged voluntarily, and it repaired the sky. The technique also began to combine and deduct together, giving the answer instantly.

In that watchful gaze, Qin Chen seemed to have just pondered for a while, and then he started writing quickly.

"This begins to answer?"

It was a little dazed to deal with things, because he knew very well that the question Qin Chen answered was not something he had prepared early. It was only when the other party responded to the request first that it would be the first one to present it. Unable to think of the first question, Qin Chen just Can answer?

But to make things dumbfounded, Qin Chen only took a few minutes to answer the first question, and then his eyes fell on the second question.

Qin Chen hardly paused, and continued to write on the screen in the solution area.

The first question...the second question...the third question...the fourth question...

Qin Chen almost didn't pause. According to the order on the task list, he started to answer the questions directly without any time for thinking.

"Isn't this Qin Chen answering indiscriminately?" The manager's expression changed suddenly, and he hurriedly said, "Master Shengzi, if you really want to answer these questions, you'd better answer with full confidence. At least, There is also an 80% certainty, because if you answer maliciously, once it is confirmed, you will be deducted from the corresponding contribution points, and if it is serious, you will be expelled from work!"
