

## Valkyrie 3381

### [Chapter 3381: You don't understand](#)

The demon man hurriedly said respectfully: "Master Fire Demon Pill Sage, his subordinates will take good care of Young Master Demon Li."

Fire Demon Pill Saint nodded, and said nothing more.

This scene made the Buyi masters on the side look confused.

"Master Patriarch, didn't you say that this is a member of the Moon Demon Race? How come there is a genius of the Saint Demon Race? As far as I know, the Saint Demon Race is the top demon second only to the Abyss Demon Race. One of the clan is far more terrifying than the Moon Demon Clan."

One of the Bouyei masters secretly spread the voice. "The fire demon pill saint should not belong to the moon demon clan. The moon demon clan has the power of the moon demon and cannot be a master alchemist. Therefore, the fire demon pill saint should be a guest of the moon demon clan, and that The Demon Tianjiao, called Demon Li, looks very similar to the Human Race. In the Demon Realm, the Saint Demon Race is the race closest to humans, and even the soul aura is very similar to the Human Race. This person should undoubtedly be the Saint Demon Race. From what he said before, this person should be for some reason

And the lost holy demons. "

"As for the black scaly armor around him, it should be the Demon Dragon in the Demon Realm. It was transformed by the Demon." Bukka, the chief of the Buyi clan, flashed his eyes: "Remember, you will be in the ruins. A young man called Moli, this person is not only a disciple of the Holy Fire Demon Pill, but also a member of the Holy Demon Race. Once he grows up, his future status in the Demon Race is unlimited.

, Even far above the Moon Demon Race, as long as we wait to hold his thighs tightly, we will come to the Demon Race, and there is no need to worry about rejection. "

"But the patriarch, this person is very likely to be abandoned by the Holy Demon Race, is it really useful?" A Buyi expert frowned.

"What do you know!" Patriarch Buka's face sank: "Among the demons, the race is first, and the strong second is the respect. No matter why this demon is separated from the holy demon race, since he has become the disciple of the fire demon pill saint , In the future, he will definitely become a high-ranking member of the holy demons, and once he grows

When he gets up, he will definitely be able to get the attention of the Saint Mozu again. "Remember, in the Demon Clan, you should never underestimate the stakes between races. I haven't seen that the Fire Demon Pill Saint is ignorant of the masters of the Moon Demon Clan, but he treats his disciples, Is this young man called Moli very gentle? Because he knows

, Once this person grows up, it is by no means comparable to the Moon Demon Race. "

"You don't understand the truth that even the Fire Demon Pill Saint understands?"

The other Bouyei masters were shocked when they heard this, and hurriedly said: "Yes, the patriarch."

The eyes of a group of people looking at Mo Li became different.

And when the Buyi clan masters took the people of the Moon Demon clan to the Ruins Cave Mansion in the depths of the secret realm, the three of Qin Chen finally came to a ruin in the depths of the secret realm after driving. Along the way, Qin Chen and the three people have seen a lot of elixir. Obviously, this secret realm is actually a vast medicinal field with various elixir planted in it, and these elixir are not only some of the human elixir, they even There are some other races

The elixir that Qin Chen couldn't even recognize. You know, Qin Chen has the inheritance of Venerable Skyfire. Although he has not fully mastered all the attainments of Venerable Skyfire, at the level of the holy master alchemist, there are few elixir that he can't recognize. , But now he actually sees

It's not surprising how the elixir that I didn't know.

Qin Chen was also not welcome, and included these elixir in the jade disc of good fortune.

At the same time, Qin Chen finally came to the ruins.

"Dust, is the powerful cave mansion here?" You Qianxue asked as he looked at the ruins in front of him. It can be seen that the ruins in front of him used to be an ancient palace, but unfortunately in the long years, early Has been turned into wreckage. What makes You Qianxue puzzled is that this kind of place will have the Origin Fruit of Heaven? Could it be that the great power of Alchemy has survived thousands of years ago? How many years have passed since it has been preserved so perfect, this powerful method of alchemy is also terrible

A bit.

"Yes, in the ruins, come with me."

Qin Chen's voice fell, and quickly fell into the mountains. After a while, the three of them entered the interior of the ruins and constantly swept towards the core of the ruins.

This ruined place has long been very dilapidated, and there are ruined walls everywhere, deep inside, only one passage is considered complete, which can reach the core.

"Master, someone should have been to this place."

Sword King Mu Zhifeng said in a deep voice, walking in this empty, quaint, and desolate passage, you could feel a trace of Saint Yuan remaining in the void, which was obviously caused by someone passing by here before.

"It should be the Void Bandits and others." You Qianxue said, not to mention that the ruins are so obvious. As long as they search for it, War King Sect and other forces will be able to find here, even if they are in front of Qin Chen, there is nothing worthwhile. Unexpected.

Whoosh whoosh!

After about a stick of incense, Qin Chen and the three people suddenly stepped into a spacious stone room. After entering the stone room, looking around, You Qianxue and Daowang Muzhifeng couldn't

help showing their stunned colors, because there is no way to go, the situation in the stone room is also clear at a glance, except for a stone statue in front of the stone room, and there is a stone statue in front of the statue.

A stone futon is just like, nothing else.

What made the sword king Mu Zhifeng and You Qianxue puzzled was that those void bandits Dunn were not here either.

"Master, what's the situation?" Dao Wang Mu Zhifeng looked startled. Qin Chen swept the surroundings and said, "No need to look for it, this mechanism is in this futon. I know from the memory of the void bandit that this futon has the function of teleportation. Just stand on this futon. , You can enter the interior of this ruin

, Into the cave of Nadan Dao's mighty power. "

"Transportation Array?"

You Qianxue and Dao Wang Mu Zhifeng both showed a stunned look. "Yes, if I guessed right, then these people should have entered the depths of this ruin, in the cave of the alchemy, but I don't know what's in this cave. There are not many records in his memory

, The only thing that can be known is that after entering it, you will face some tests, and you will get some treasures by passing the tests. The origin of the heavenly path origin fruit is obtained from the test by the person who condemns the thief. "

Qin Chen said in a deep voice. In fact, even in the entire condemnation of the thief, only the falcon man who allowed him to refine the source fruit of the heavens had entered here, and other people who condemned the thief did not have the opportunity to enter, so they naturally did not know. What exactly is it

test. The sword king Mu Zhifeng nodded, "Master, what are we waiting for, let's enter together."

### [Chapter 3382: Two channels](#)

"This futon is only enough for one person to stand. It should be an independent teleportation array. In this way, let me see how it goes."

Qin Chen stood on the futon, and the moment he stood on, a strange clicking sound suddenly came out. At the same time, a hole suddenly opened where Qin Chen stood.

As soon as he sank, he immediately fell down.

Qin Chen was slightly startled, but he didn't panic. He turned his body strength, wanted to fly into the air, and figured out the operation process of this teleportation array to see if there was any danger.

What surprised Qin Chen happened. Just when he was running his power, a huge suction power came from under his feet, and before he could fly up, he directly sucked him into the black hole on the ground. At this time, Qin Chen really changed his face, even his spatial rules could not be resisted. There was no sign of this teleportation formation, but the power was extremely terrifying. He only had time to speak and wait for them inside. Fall straight down

Above his head, the originally split black hole was re-closed at this moment, making him plunge into darkness.

"dust!"

Seeing Qin Chen suddenly disappearing into the black hole, You Qianxue was startled and hurried forward, but when she arrived, Qin Chen had disappeared.

"Mrs. Young, don't worry, since Young Master said to wait for us below, let's go in early too. Young Master Provincial will wait a long time."

You Qianxue nodded, and hurriedly stood on the futon, when she heard a click, this hole appeared again and swallowed You Qianxue.

Then, the sword king Mu Zhifeng also stood on it, and the whole person disappeared on the futon, and the entire stone room became empty again. It seemed that no one had ever appeared before, and there was no movement.

In the void, there was darkness all around, Qin Chen only felt that his body was constantly falling downward, as if it never had an end, and when he looked up, there was no light at all.

Qin Chen frowned slightly. Although he was a little surprised by the situation in front of him, he was not too alarmed.

What happened in the stone chamber before made him know that the information he got should be true. The people of the void bandits should have also entered this teleportation formation and have already gone to the cave mansion. Therefore, the upper stone chamber will be empty. .

I just don't know what's going on right now, whether the Void Bandit people are guarding it.

He didn't dare to be careless, and his power was operating quietly, ready to kill if he found something wrong.

Not long after, a ray of light suddenly appeared below, and Qin Chen quickly released his spiritual sense and swept it down. After a while, his expression became weird.

Because the bottom was actually a cave, and what was different from what he imagined was that there were no people from the void bandits in the cave, and no people from forces such as the King Sect. They were also empty.

After a while, Qin Chen fell into this cave, and when he looked around, there was nothing in the cave. There was nothing here.

Without waiting for Qin Chen to observe carefully, an unusual energy fluctuation suddenly rose up in the cave. Immediately, the left and right sides of the cave suddenly rose slowly, and two black channels appeared.

At the same time, a few runes appeared above this passage. The meaning of this rune is very clear and simple. The rune on the left passage means "test", and the rune on the right passage It means "inheritance"!

Moreover, a cold voice suddenly rang in Qin Chen's ears. The voice was very gloomy, cold, like a poisonous snake, and greasy, making Qin Chen feel uncomfortable.

"Jie Jie Jie, very good. Welcome to this palace. No matter which race you are from, since you can come to this palace, you are considered to be destined to this seat."

This cold voice clearly appeared in Qin Chen's mind, as if speaking directly in Qin Chen's mind, it was impossible to block and resist.

"In front of you, there are two paths, one is test, the other is inheritance. You can choose one of them. Once you choose one, you cannot choose the other path." "As long as you enter the path of inheritance, you will be subject to the original If a series of tests of the seat pass, it will be like this name, and the inheritance of the alchemy of this seat can be obtained. If the world is shattered and the chaos collapses, this seat is about to die. It is really hopeful

Hope someone can take away the inheritance of this seat. "

"But don't get excited, because you enter the inheritance channel. If you succeed, it will be fine. If you fail, you will lose the opportunity to obtain treasures, and you will be wiped out on the spot. It all depends on your alchemy attainments and your mood. "Similarly, you can choose to enter the test channel. In that channel, this seat has set up some tests. If you can pass, or let this seat appreciate, or even make this seat happy, you can get The reward of this seat, but the test

There is only one reward, and even if it fails to be punished, there will be no life worry. "You think carefully, choose inheritance, it is possible to get all the inheritance of the alchemy of this seat, but there is a high probability of death, choose the test, you can only get a treasure of this seat, but you can live, choose yourself, you Only ten \*\*\*\* to consider time,

Quack, choose. "

When the voice fell, the voice disappeared completely.

Qin Chen was shocked. He didn't think that the alchemy might have set such a test. No wonder that the void bandit could obtain the origin of the source of heaven, and it is most likely that he chose the test and obtained the treasure.

But for Qin Chen, the test of choice does not make any sense. In Qin Chen's view, a source fruit of the heavenly path is nothing, and he himself is a master of alchemy. Only by choosing to inherit, can he benefit from it. maximize.

Qin Chen didn't even need to think about it, he had already made a choice, but he had to wait until You Qianxue and the others arrived.

The only thing that puzzled Qin Chen was that Qin Chen waited for a long time to breathe, and did not see You Qianxue and Daowang Muzhifeng.

"No, according to the truth, after I entered, Qian Xue and Mr. Mu should also be able to send them via the futon as soon as possible, but the two of them did not appear?"

If you look at it this way, there should be more than one cave here, otherwise, when you fall down, you won't lose sight of any disciple of the Void Bandit.

Perhaps, all the people who fell were separated and couldn't join hands at all.

Of course, this is only Qin Chen's speculation based on the status quo, and he cannot verify whether it is true.

I can only go in first. Qin Chen's eyes flashed, and at the last moment of his last inhalation, his figure flashed, and he entered directly into the passage of inheritance.

### [Chapter 3383: Fate](#)

After Qin Chen entered this inheritance passage, You Qianxue suddenly appeared here in a certain cave.

"dust!"

As soon as You Qianxue fell, she looked around anxiously, but her heart sank, because she had not seen Qin Chen in this cave.

impossible!

You Qianxue knew very well that if Qin Chen had reached the cave first, he would definitely wait for her here instead of leaving first.

At this point, she was extremely confident, because if it was her, she would wait for Qin Chen here without leaving first.

But where did Qin Chen go now, could it be that what happened to him?

You Qianxue waited here for a while, but found that the Wind of Sword King Mu did not appear with him either.

"Could it be that although the futon is a teleportation formation, it can teleport people to different places?"

Combining the situation of Qin Chen and Mu Zhifeng, You Qianxue instantly had some guesses. Thinking of this, You Qianxue walked towards the depths of the cave. After a while, she came to the innermost part of the cave. Just after she entered the cave, it rumbling. Two passage entrances were also opened on both sides of the cave, and the cold voice, Also resounded

, Passed into You Qianxue Er.

"Inheritance and test?"

You Qianxue frowned as she looked at the passages on both sides.

In that case, did Little Chen enter this passage? Based on her understanding of Qin Chen, she can be sure that what Qin Chen entered must be a passage of inheritance, because Qin Chen himself is a

pharmacist and cannot be interested in the test. If this is an ancient alchemy relic, she has obtained it. This person's biography

It will be of great help to Qin Chen's attainments in alchemy.

In that case, if you want to meet Qin Chen, you must also choose the channel of inheritance? But You Qianxue knows very well that if the purpose of this ancient alchemy great ability to set up these two channels is to find an heir for herself, then the test on this side of inheritance must be the attainments of a pharmacist, and she is not a pharmacist. There must be

Dangerous, only by going through the test channel will it be safer and will not cause trouble to Qin Chen.

It's just that Qin Chen will miss Qin Chen on the test side.

You Qianxue suddenly hesitated.

"wrong!"

She only hesitated for a moment, and immediately came back to her senses. "The caves that Chen and I entered are clearly two different caves, because if everyone enters the same cave, then Chen will definitely wait for me here, and the sword king Muzhifeng will follow me closely, because I am Follow the dust and send it down

Yes, even if Chen accidentally activates these two channels, there is still ten breath time consideration, and the time I transmitted and the dust are not three breaths apart. "

"In that case, what each of us should enter is a brand-new cave. I am afraid that this alchemy might also set it like this to prevent us from affecting each other."

"If this is the case, even if I also choose the channel of inheritance, according to the design of this alchemy, it is impossible for the two of us to meet."

"It must be so."

You Qianxue's eyes flashed, and instantly understood the ins and outs of the matter.

I have to say that You Qianxue is an extremely intelligent person. When she followed Qin Chen, she was dependent, so she was often unwilling to think too much, but once she encountered danger, when she was alone, she was extremely sober. .

It was like this when Qin Chen'fallen' in Guyu Realm, when she was taken into the lurking of Misty Palace.

And now, the same is true.

Whoosh! You Qianxue didn't hesitate at the moment and directly chose the test channel. Since it is impossible for her and Qin Chen to meet in the inheritance channel, then it doesn't matter how to choose. Anyway, she is not interested in the inheritance of the alchemist, but instead chooses.

Only a dangerous passage would not cause trouble to Qin Chen.

On the other side, the sword king Mu Zhifeng also encountered the same situation. He was also mature and prudent and experienced. After entering the cave, he could not feel Qin Chen's breath, he knew that he and his master had been separated and were in different spaces. Since this was the case, he did not hesitate at all.

Directly chose the test channel.

When Qin Chen and the others entered each other's respective passages, outside the ruins, people from the Buyi tribe and many masters from the Moon Demon tribe also appeared here.

They quickly entered the passage, flew forward, and soon reached the stone room at the end of the passage, and saw the futon.

The leader of the Demon Race that month sniffed his nose and suddenly sneered: "There are a lot of Human Race auras here, and it seems that many Human Race forces have already been here." The Fire Demon Pill Sage felt the surroundings, and sneered: "It doesn't matter. According to the Bouyei tribe's intelligence, there are no particularly powerful alchemists among these human races. With this seat, the inheritance of this alchemy power must belong to the old man.

"

"That's natural." The leader of the Moon Demon Race also laughed.

"Okay, hurry up, let's go in as soon as possible. There is a teleportation formation at the place of this futon, so I can wait for it to be teleported in." Bukka, the old patriarch of the Buyi tribe, said in a deep voice.

The group of people didn't hesitate at the moment, they were much late after all, they stood on the futon and teleported on. The Fire Demon Pill Saint was the first to pass down. Before he left, he sternly said to the demon: "Li'er, according to some sporadic records in the ancient demon clan, the ancient Pill Dao in this secret realm has a surly personality and means it's extraordinary, and it's both good and evil. It's very cruel. It's still unclear what's going on below, but no matter what, after you enter, you must be careful not to act recklessly, just protect yourself and wait. The teacher won the inheritance and was the first to make you break through the mid-term

Saint Lord realm, as for the inheritance of this person, your cultivation base is still low, don't be reckless, lest you get caught. "

"Yes, Master." Mo Li hurriedly bowed and saluted.

The Fire Demon Pill Saint nodded, and his figure disappeared instantly.

After the Fire Demon Pill Saint left, Chi Yan's eyes flashed with a cold light, and he sneered secretly and said: "Li, the Fire Demon Pill Saint is worried that you will take away his inheritance."

"Chi Yan, don't worry, I won't let you stay in the body of this monster. One day, I will find a way to restore your original appearance." Mo Li said coldly. Chi Yan shook his head and looked at Mo Li with a trace of affection in his eyes: "Li, as long as I can be with you, I don't care about what looks like. I just thank God for allowing us to meet in the Devil Realm. , At that time, after entering the demon world from the place of trial of the day, I thought I was dead. I didn't expect that you and I could be in the

Meteor Demon Realm, and there was the inheritance of the ancient demon clan's holy lord. You actually became A demon pharmacist, fate is really impermanent."

#### [Chapter 3384: Familiar breath](#)

Moli's eyes also carried memories. He remembered the scene when he had just entered the Demon's Meteorite Demon Realm. It was really an unbearable past. There were so many dangers there. How many times, he almost fell inside, but finally After finding Chi Yan, he felt that it was the happiest moment in his life.

The Meteorite Demon Realm is too dangerous. For many demons, it is a Jedi, in which demons are rampant and dangerous, but there are countless adventures, and various potions grow everywhere.

Where, he got the inheritance of a demon saint master and became a potionist.

Everyone thinks that he is a member of the Holy Demon Race. In fact, although he has entered the Demon Way and has mastered the laws and powers of the Demon Race, he is no longer different from the Demon Race, but his soul is essentially born on the Tianwu Continent. He has the dual characteristics of human race and demons.

Relying on this unique talent, he actually blazed an unprecedented path on the way to the Demon Race Alchemist.

After encountering Chi Yan, Chi Yan's control of the flame power also gave him a lot of help, and the two of them moved to each other step by step to where they are today.

Looking back on all this, it looks like a dream.

Mo Li couldn't help but faintly said: "Yes, as long as you and I are together, whether it is the heaven, the devil, or even the Tianwu Continent, everywhere is heaven."

Although Mo Li was born in the lower plane of Tianwu Continent, he has experienced too many ups and downs in his life. He was clearly a human race, but he was told that he was the descendant of the alien demon race in the heavenly demon secret realm. He was determined by the skeleton rudder. The young master of the Blood Demon Cult.

Later, they experienced the crisis of Tianwu Continent, the great chaos of the alien demons, and even the visitors from the heavens. They fought desperately. Although they did not fight for the Tianwu Continent, to a certain extent, they defended the Tianwu Continent from foreign enemies.

Now that they have come to the heavens, they can be together again, which is great happiness for the two of them.

"Li, I really hope that we can go on like this forever. Now in the heavens, we don't have any acquaintances. Everything here has nothing to do with us." Chi Yan said quietly.

"Speaking of acquaintances, I seemed to feel a familiar breath here before." Mo Li suddenly frowned.

Chi Yan was taken aback: "Familiar breath?"

He sniffed, and frowned, "Why do I feel a little uneasy in my heart, but in this heaven, you and I have no acquaintances."

Mo Li frowned, just about to speak, when a master of the Moon Demon Race came over and said, "Two, you can leave."

Mo Li and Chi Yanlian interrupted the communication, stood on the futon and began to teleport.

Soon, the originally packed stone room became empty again, as if it had been so lonely since ancient times.

Qin Chen naturally didn't know that his two old acquaintances had also arrived here. After he entered the inheritance channel, he saw a flower in front of him, and the next moment, he found himself in a stone room.

The entire stone room was extremely empty and empty, and there were no futons in the stone room before.

Qin Chen frowned. He knew that since the other party had sent him here, he must have his purpose, so he immediately permeated his spiritual consciousness and began to explore the surroundings.

Sure enough, he found some clues.

This stone room turned out to be a very terrifying formation. The level of this formation was so high that it was not trivial. Even with Qin Chen's knowledge of formation, he couldn't completely figure out the structure of this formation for a while.

Rumble!

Just when Qin Chen was about to figure out the structure of the formation, suddenly, the entire formation began to slowly revolve, and in the next moment, terrible flames rose from the stone chamber.

call!

Flames with terrifying aura quickly filled the entire stone chamber, quickly enveloping Qin Chen's body.

"Jie Jie Jie!"

At the same time, a cold laugh suddenly resounded in the flame.

"Young man, I didn't expect you to have chosen the path of inheritance. It seems that you are also a pharmacist. If a non-pharmacist chooses this path, he can only find his way."

"The deity is really happy. For tens of thousands of years, someone has finally begun to obtain the inheritance of the deity. I don't know what year the heaven is today. The endless years have completely wiped out the soul of the deity, leaving only With this consciousness, it is still maintaining the operation of this place. If tens of thousands of years pass, perhaps the deity will not be able to wait for the day when the descendants arrive."

This cold voice actually became very emotional at this moment, but it was only a moment, and soon, his style of painting changed.

"Very well, not much nonsense. The stone chamber in front of you is a large fire refining formation. As a pharmacist who wants to obtain the inheritance of the original alchemy, how can he not understand fire? This is the most basic technique of a pharmacist, and The fire refining array can make your flames more perfectly integrated into the alchemy. What you need to do now is to figure out the operation of the fire refining array in front of you, and start the refining before the flames of the deity completely incinerate you. The teleportation formation after the fire formation, flee here."

"Hey hey, isn't it exciting, but I forgot to tell you, if you fail to crack the deity's fire-refining formation within the prescribed time, your fate, tsk tsk, the deity will not say much. Hahaha, young man, do it for yourself."

This cold voice disappeared instantly, and the endless heat swept towards Qin Chen for a moment.

Refining the fire?

Qin Chen looked at the surrounding stone walls. Sure enough, all around the stone room was engraved with a large fire-refining array. It was this large fire-refining array that continuously drew the terrifying flame power from the void and condensed it into a top-level one. Flame, come to burn yourself.

Although this kind of flame is strong, it should be urged to the extreme, but it is not in the later stage of the holy master. Perhaps, the average later stage of the holy master may not be able to withstand the continuous burning of this refining fire array, but it should not be able to hurt yourself. .

Although Qin Chen couldn't see every structure of this fire-making formation, the most basic formation level could still be deduced.

It's just that what Qin Chen needs to do is not enough to survive this fire-refining formation. To get the inheritance of this alchemy power, Qin Chen must activate the teleportation formation and enter the next level.

"This alchemy is really abnormal enough to break the formation in the sea of fire?"

Qin Chen shook his head speechlessly.

His spirit is concentrated on the fire-refining array on this wall.

At this look, Qin Chen couldn't help but wonder.

I have to say that the accomplishments of this great power in the fire refining formation are not trivial. The fire refining formation in front of me looks extremely complicated and amazing. It is not much better than the inheritance of the Heaven Fire Venerable. Let, only strong but not weak.

### [Chapter 3385: Fire Refining Array](#)

However, Venerable Skyfire enters the Tao with fire, and he is the best in flames, especially the disaster demon fire, which has obtained the demon disaster supreme. How can ordinary humans control the demon flame.

Therefore, Venerable Skyfire's strongest is the way of fire, not the way of formation. It is understandable that it is not as powerful as this ancient alchemy at the fire-refining formation.

But through this fire-refining formation, Qin Chen instantly understood that the ancient alchemy power in front of him was definitely a master of the venerable level, and it was impossible for a non-venerable person to arrange such a terrifying fire-refining formation.

"Heh, doesn't this guy know that even though I have the inheritance of Venerable Skyfire, is it also one of my strongest inheritance?"

Qin Chen smiled. His formation did not come from Venerable Skyfire, but from the legendary Patching Heaven Palace, the top refining power in the ancient heavens.

On the way to the formation, the Mending Temple is second, and no one dares to be the first.

Qin Chen urged the Saint Yuan in his body, and the terrifying aura immediately blocked the intrusion of the flames. At the same time, Qin Chen's spiritual power was all concentrated on the surrounding stone walls, and he began to deduct the operation process of this large fire-making formation.

The array patterns and structures gradually appeared in Qin Chen's mind clearly, and with the deduction of the sky patching technique, it became clearer.

Awesome!

The deeper Qin Chen goes, the more he feels the terrible big formation in front of him. The world's formations have the same goal by different paths. Different techniques and formation methods can also form different formations. It is true that thousands of ways can be integrated into one. .

At this time Qin Chen was not undergoing a test, but was completely immersed in this formation, analyzed the basis of this formation a little bit, and figured out the other party's thinking.

Other examiners may just analyze this big array, crack it, figure out the basic operation method, and start the teleportation array inside, but what Qin Chen did is to figure out the other party's basic ideas, starting from the most basic Where to find out the opponent's formation theory.

Others just need to know why, but Qin Chen wants to know why.

Of course, you can't blame other alchemists for being too simple, because if you are a master of formation, it is impossible to figure out the formation system of other powerful formations. If it is really that simple, then this The world's array mage will not be so rare.

Only people like Qin Chen who got the inheritance of Mending Heaven Palace can pass a formation to figure out the true principle of others' formation.

And when Qin Chen was conducting the assessment of this formation, many people in other places also chose to enter the inheritance channel, and the Fire Demon Pill Saint and Demon Li also chose the same path as Qin Chen.

After all, if you can get the top inheritance, who wants to just get a treasure?

Even some people who only have a slight basis in refining medicine have chosen the channel of inheritance, naturally wanting to seize the opportunity.

In a certain space, a mid-level peak saint master who was only a Heavenly Saint Alchemist, was sweating, frantically deducing the big formation in front of him.

But no matter how he deduced it, he couldn't do it. Finally, with the continuous improvement of the fire refining formation...

"what!"

The Saint Yuan of the mid-term peak Saint Master couldn't resist the terrible flame power, screamed, and the whole body instantly burned. Together with the Saint Master's origin in the body, it also burned blazingly, and was completely refined and dissipated by this fire refining array.

Not only that, there are scenes like this happening everywhere here. A group of warriors who are not even a pharmacist, but have chosen the inheritance channel, screamed and turned to ashes.

However, there are also some masters at the later stage of the Holy Master level, although they have never cracked open the formation method, but used their own powerful cultivation base to forcibly activate the rear teleportation formation before this fire-making formation completely breaks out.

On the contrary, the Fire Demon Pill Saint, although after Qin Chen entered the stone room, he had already mastered the law of operation of this large fire refining formation only after half a stick of incense.

"Oh, this Human Race's fire refining formation is nothing but that."

It chuckled, and shot instantly, a burst of dark light burst out of his hand, lingering on the fire refining array, only a bang was heard, the fire refining array stopped slightly, and the fire magic pill saint Having seized the opportunity, he immediately activated the teleportation array behind the fire-refining array.

Rumble!

After a series of noises passed, the magic circle in the stone room flashed with dazzling light, enveloping the Fire Demon Pill Saint, and when the light dissipated, the Fire Demon Pill Saint had disappeared.

Not only the Fire Demon Pill Saint, but also the Demon Li who entered the inheritance channel, after spending a stick of incense, figured out the law of the operation of this formation. Before the power of the fire refining formation almost hurt him, it activated the teleportation formation. , Disappeared in the stone room.

On the contrary, it was Qin Chen who was still constantly comprehending the great formation in front of him.

I don't know how long Qin Chen suddenly felt the scorching heat from all around him. He suddenly woke up, only to find that the fire refining array had reached an extremely terrifying point. The terrifying flames crazily refined his body. , Even his desolate ancient sacrament felt the slightest pain.

"It's almost there. I have finally figured out all the principles of this fire-refining formation. It's amazing. As expected, any avenue in this world has endless principles, and the formation is the same."

Qin Chen's face was shocked. He raised his hand and immediately extinguished the fire-refining formation in front of him. Qin Chen had directly closed the fire-refining formation, and the lines were

clearly displayed on the stone wall. Qin Chen pressed his hand against the stone wall. Go on, urge Sheng Yuan to open the teleportation array behind the fire-refining array.

Hum!

With a flash of light, Qin Chen disappeared into the stone room. Soon, Qin Chen came to a brand new space.

"This is..." Qin Chen turned his head and looked around, and found that the place he was now was still a stone room. If it hadn't felt like teleporting just now, Qin Chen would have thought that he had never moved.

"What's the assessment of this level?!" Qin Chen frowned and looked around. This time he was looking forward to the inheritance of this alchemy. He had a feeling that even if he did not get the inheritance of the other party in the end, he was experiencing After passing these inheritance assessments, his understanding of battle Dao and Dan Dao will also have a qualitative leap.

Even this gave him a new understanding of the alchemy knowledge taught to him by Venerable Skyfire.

The last stone room was a fire-refining array for the assessment. The essence was the control of the flame power and the understanding of the formation. I just don't know what this stone room is about and what the assessment is.

Just as he was puzzled, the familiar buzzing sound rang again. The next moment, Qin Chen found a stone platform slowly emerging from the center of the stone chamber.

This stone platform is actually a refining platform.

Could it be that I am going to refine some medicine here? Or, what is the formation on this stone platform?

[Chapter 3386: Enter the way with poison](#)

Qin Chen frowned, and slowly ascended the stone platform with the mentality of being at ease.

Looking around, Qin Chen couldn't help but sigh softly.

Because on this refining stone platform, there is no magic circle this time, instead there are many grooves.

In those grooves, there are different kinds of medicinal materials.

These medicinal materials have been preserved by special techniques, and they have survived for countless thousands of years without decay, and the medicinal properties are still intact, and they look like the ones just picked.

No, this should be just picked.

Qin Chen could even feel a trace of fresh vitality from it. Unless the other party, like him, also has treasures such as the Universe Jade Plate, otherwise no matter what medicinal materials are stored, they cannot be so fresh.

Thinking that this secret realm is actually a medicinal valley of this mighty power, Qin Chen also understood that these medicinal materials might really be a remnant consciousness of that mighty power, freshly picked from the medicinal field of this mighty power.

"Is it really a refined pill?"

Qin Chen took a look, carefully distinguished these medicinal herbs, but unexpectedly discovered that these medicinal materials were extremely cold, and he could recognize only fifty-six out of ten, and didn't know all the others. The first reaction in Qin Chen's heart was that it was impossible. Regarding the cultivation of alchemy, he was indeed far away. Although he received all the inheritance of Venerable Skyfire, his inheritance does not mean that he is really the same as Venerable Skyfire. , Is a Venerable Lian

The pharmacist.

To become a Venerable Alchemist, Qin Chen needs to expend a lot of energy to refine, learn, and comprehend.

This is equivalent to Qin Chen getting a book with all the abilities of a Venerable Alchemist, and to truly master all the knowledge in the book, Qin Chen needs to learn a little bit.

But there is one thing that Qin Chen doesn't need to understand and learn, and that is to distinguish elixir. Qin Chen received the inheritance of Venerable Tianhuo, and he should have obtained the mastery of all the elixir by Venerable Tianhuo, and Venerable Tianhuo is a Venerable and Alchemist, and Qin Chen should be able to recognize the vast majority of the heavens. Panacea, even if some don't recognize

Come out, that should be an extremely small number.

The elixir skills of a venerable alchemist are not trivial.

But now, Qin Chen can only recognize half of all the elixir in front of him, about 60%, which is very exaggerated. In other words, there are at least 40% of the elixir here, which Venerable Skyfire has never been familiar with. .

hiss!

Qin Chen couldn't help but sucked in air, which represented two situations.

The first is that the power of the pill in this secret realm is far superior to Venerable Skyfire in terms of refining knowledge. The second is that the opponent deliberately collected countless remote elixir from the world and placed it here.

It should be noted that the heavens are too vast and the history is too long. There have been countless elixirs that have been born. Even if Venerable Skyfire is a Venerable Alchemist, there are many elixirs that you don't know, and you have never seen them before. It's normal. Even each Venerable Alchemist masters different alchemy sects, different techniques, different experiences, and different branch directions, so they will have completely different visions. It is not only the power of the alchemy that can find out many Skyfire Venerables do not know.

I am afraid that Venerable Tianhuo can also find many elixir that he has seen, but the other party does not know. This is normal.

Among them, Qin Chen preferred the second one.

But here comes the problem again. What is the purpose of the other party deliberately looking for so many remote medicinal materials?

Even if you don't know the purpose of these medicinal materials, how do you refine the pill?

When Qin Chen was puzzled, the cold voice resounded again. "Gaga, young man, there are 20 kinds of medicinal materials in front of you. Among them, 15 kinds are poisonous and the other five are non-toxic. You need to find out 15 kinds of poisonous medicinal materials first, and combine these The medicinal materials are placed in the groove in the middle of the stone platform, and these medicinal materials will be automatically refined into medicinal liquid. If the selection is correct, these 15 poisonous medicinal materials will neutralize each other and start the formation. If the selection is wrong, hehe, as long as there is one The wrong kind of medicinal material will activate this

The killing array of the earth, and will produce highly toxic liquid medicine, enter your body. "

"It's life or death, you must be careful."

This gloomy voice quietly disappeared.

"Choose fifteen poisonous medicinal materials?" Qin Chen was taken aback and scanned carefully. Sure enough, there are a total of 20 medicinal materials here, 15 of which are poisonous. Where did this guy find so many poisons?

The medicinal properties of medicinal materials must be mastered by any pharmacist. The fusion of different medicinal materials will produce different effects. Therefore, mastering the toxicity of medicinal materials is the most important thing for every pharmacist.

If the pill they refined not only can't improve the strength of the martial artist, but can poison people to death, then it will be troublesome.

Every year, countless pharmacists die from the toxicity of the fusion of medicinal materials, second only to the death rate of the fryer caused by the failure of refining.

It's just that this guy is too weird to produce so many special and remote poisons all at once.

Ordinary people would never get so many toxic medicinal materials.

See what's in the medicinal materials Qin Chen recognized.

Ghost yuba!

Grim Reaper!

Mandala from the other shore! These are all highly toxic substances in the celestial medicinal materials, and there is even a kind of ecstasy fruit, which is a medium-grade holy master medicinal material. Only one drop can produce hallucinations on the holy master master and disturb the nerves and soul of the holy master master. Enough concentration, even later

The Holy Lord is hard to resist and will be paralyzed.

These poisons are very rare in the outside world, but they all appeared here at once, making Qin Chen feel strange.

He shook his head. Although he was puzzled, Qin Chen could only immerse himself in his mind and watch the twenty medicinal materials in front of him intently. According to the assessment of the first level, Qin Chen has already seen that this alchemy power is definitely a moody person. Although I don't know what the consequences of this level of failure are, it is definitely not lighter than the first level. I'm afraid even him at that time

Danger.

With such powerful methods, Qin Chen couldn't speculate at all. Once the wrong choice was made, it would not be impossible even to fall here.

He didn't dare to joke about his wealth and life, so his expression was extremely solemn.

"Well, ghost yuba, death flower, mandala from the other side, ecstasy fruit, castor leaf... three corpse gu worms, turbid vine, these are all poisonous..."

Qin Chen looked at it for a while, first took out the dozen or so medicinal plants he had recognized from the groove and put it aside.

He was also cautious during the whole process, because many of these medicinal materials were very toxic. Although Qin Chen could not be seriously injured by the medicinal materials alone, it was always right to be careful.

After a short while, he chose eleven toxic medicinal materials and two non-toxic medicinal materials. There were thirteen types, and Qin Chen didn't recognize the remaining seven.

#### [Chapter 3387: Elixir conundrum](#)

Qin Chen couldn't help but get a headache. With the alchemy knowledge passed on to him by Venerable Skyfire, he could only recognize thirteen kinds of medicinal materials. Qin Chen couldn't imagine how other pharmacists would pass this test.

However, since the other party has arranged this level of assessment here, there must be a method. If only a Venerable Alchemist can pass the assessment, it would be too difficult. Although Qin Chen did not know the remaining seven medicinal materials, as a pharmacist, he naturally studied medicinal materials. The pharmacological properties of various medicinal materials have their own laws and characteristics, so even if he does not recognize most of the medicinal materials, But does not hinder

He judged whether these medicinal materials were toxic.

Leaning in front of the medicinal materials and sniffing them carefully, Qin Chen moved his spiritual consciousness, infiltrated it, analyzed and felt it, and quickly selected a few poisonous medicinal materials.

The toxicity of these medicinal materials is very subtle, and most people can't judge it by breath and simple discrimination. Only alchemists who deal with medicinal materials all the year round or those who have studied medicinal materials can have this ability.

After some tossing, Qin Chen selected two more plants and selected thirteen kinds of toxic materials, but the number of fifteen kinds was still two plants short.

However, the remaining medicinal materials cannot be simply judged whether they are toxic by their breath and spiritual sense.

Qin Chen thought for a while, felt that he could only taste it himself and judge it by his own feelings.

Thinking of this, he no longer hesitated, stretched out his hand to tear a hole from a colorful bamboo joint, and placed it on his tongue.

The next moment, Qin Chen's complexion changed, and his face suddenly became pale. At the moment when he placed the colorful bamboo joints on his tongue, Qin Chen's tongue instantly became numb, his eyes turned black, and even the Saint Yuan in his body became disordered.

puff!

A mouthful of black blood spurted out, and Qin Chen hurriedly vomited it out.

What the hell?

This toxicity is too violent.

Qin Chen's heart palpitations, this is definitely one of the poisonous. He sat cross-legged, running the divine art, his own holy essence kept running, the book of origin surged, resisting the last trace of toxicity remaining in the body, this toxicity is too strong, even Qin Chen now feels a trace of heart palpitations, just like this. Almost

It numbs his tongue, and if the whole bamboo sticks, it can even turn him over.

After a while, Qin Chen had finished refining all the poison.

Now, Qin Chen has found 14 kinds of poisons, only the last one is left, and there are only the last four kinds of medicinal materials that Qin Chen has never discerned before his eyes.

Of these four, only one strain should be toxic.

In this way, it is simple.

Qin Chen smiled slightly. Even with the elimination method, he could find the last poison among the four medicinal materials.

Qin Chen picked up another elixir, which was a scarlet elixir. He plucked a small leaf and put it in his mouth. As he chewed it, a scorching flame burst out in his body.

boom!

The strong flame aura entered Qin Chen's body.

It is a fire elixir.

Qin Chen didn't panic, using his power to dissolve the fire power in his body.

Of all the powers, the one he feared the most was the fire element.

"Although it is powerful, this one is not poisonous!"

Although the flame is terrible, it is not poisonous.

Now that it was confirmed, he could only cast his sights on the next medicinal plant.

In the same way, Qin Chen sat cross-legged in his mouth, with the Saint Yuan stunned. This time, the Saint Yuan in his body instantly became violent, and there was an illusion of bursting his body.

"A strong amount of violent violence."

Qin Chen looked astonished. This medicinal plant seemed ordinary, and it was unexpected that the medicinal properties were so terrible. If it were swallowed completely, the average mid-term holy master would be directly burst and killed on the spot.

But this medicinal material is also non-toxic.

Although the remaining elixir placed in the groove of the stone platform couldn't perceive the attributes, it was so virulent that Qin Chen was stupefied.

But if you want to inherit the power of this alchemy, you can only complete the assessment of the stone level, Qin Chen gritted his teeth and tasted the elixir he didn't recognize again.

It took a full time for a stick of incense before Qin Chen thoroughly tasted the remaining elixir, because every time he tried, he had to sit cross-legged to remove some of the effects.

The various pains and tortures are simply not for outsiders. If Qin Chen hadn't had a sturdy physique and strong recovery ability, he would have lost most of his life even if he was not crushed.

What shocked Qin Chen was that after he had tasted all the remaining four spiritual medicines, none of them were poisonous, all of them were non-toxic.

"No, how is it possible that all of them are not poisonous? According to the remnant consciousness of this alchemy, at least one of them should be poisonous in order to make up the number of fifteen."

Qin Chen stood in front of the stone platform with a solemn expression and an expression of incomprehension.

Since the great power of the alchemy left this kind of problem for those who entered to solve it, then it would definitely not deliberately play tricks, in other words, among the 20 kinds of medicinal materials, there are indeed 15 poisonous.

But Qin Chen had used all three methods of looking, smelling, and tasting, and he could only confirm that fourteen were poisonous, and the remaining one could not be found anyway.

How did that happen? His eyes swept across the grooves of the stone platform one by one, and he couldn't find the remaining one in any way.

When Qin Chen was at a loss for Shitai, all the warriors who entered this cave were facing the same problem.

A pharmacist of the Zong Wangzong, and even some late-stage holy masters who practiced the fire system, and some masters who only had a little understanding of refining tools, in order to obtain the inheritance of the power of the alchemy, they also chose to enter this inheritance space. With their cultivation base, the stone chamber of the first level could not be bothered by them. Although they had never cracked the entire formation like Qin Chen, but forcibly resisted the formation, they also activated the large teleportation formation in the stone chamber. Teleported to the second stone room in.

But now, everyone is stumped by the problems of the second stone room.

In a certain stone room, the late saint master of a void bandit looked at the twenty kinds of medicinal materials, scratching his head and head for a while.

He is not a pharmacist, and he doesn't even know what these spiritual medicines are, let alone how to distinguish between poisonous and non-toxic. After waiting for a long time, he selects several medicinal materials that are definitely poisonous, but the rest can no longer be distinguished. Out.

Seeing time passing by, the late saint master of the void bandit gritted his teeth and placed the elixir he had separated directly into the groove in the middle of the stone platform. And at the moment he gave up these medicinal materials, the entire stone room suddenly buzzed, and the stone platform in front of him lit up with arrays of light. In the groove in the middle of the stone platform, the elixir began to merge instantly, unexpectedly It's really merging, and the entire stone platform also blooms with a palpitating light.

#### [Chapter 3388: Poisonous civilization](#)

The late Saint Lord of the Void Bandit was shocked, and hurriedly floated backwards, his power running. In case of unexpected events. There was a buzzing sound, and a little light suddenly flashed on the walls around the stone room. The light was densely packed and covered in all directions. To count it, there were thousands of them. At first glance, it looked like a beast. Like his eyes,

It makes people shudder.

The next moment, these twinkling lights trembled slightly, and Qi Qi bombarded the late stage saint master of the Void Bandit, and shocking and terrifying energy fluctuations came out leisurely.

Hum!

And in these terrifying energy fluctuations, there is still a bit of disgusting and terrible poison gas. It was this stone platform that merged the elixir he selected, and sprayed it instantly through the lore array on the stone wall. Came out.

Seeing this, the late Holy Master of the Void Bandit, a look of hideous despair immediately appeared on his face, and a shield quickly appeared in front of him to resist the countless energy fluctuations.

Puff puff puff... But when these poisonous gas and energy fluctuations bombarded the shield, the shield was corroded in an instant, and a top sacred treasure immediately exuded a foul smell. And the poisonous gas and energy fluctuated instantly

Penetrating the shield and directly bombarding the late saint master of the void bandit.

"what?"

The late stage saint master of the Void Bandit only had time to roar, and was overwhelmed by the countless rays of light.

"Ah!" The screaming screams sounded. The Saint Yuan on this late-stage holy master couldn't resist the poisonous gas and attack at all. The whole person was quickly corrupted by countless poisonous gas. After a while, the endless fluctuations dispersed, this void Lord of the late bandit

After disappearing in place, there was only a pool of red blood and broken sacred treasure fragments on the ground to prove that this person had existed before.

It was not only the bad luck that the saint master of the late stage of the Void Inverted Flight, those warriors who chose the wrong medicinal materials, all touched the restriction in the stone room, and were killed on the spot in a breathing room, with no bones left. In another stone room, the Fire Demon Pill Sage, like Qin Chen, selected 14 kinds of poisons. The reason why he was able to select these poisons was because he found that there were several kinds of spirit medicines. From their demon world, and then

In addition, he is a master of poison, and his understanding of poison far exceeds that of ordinary pharmacists.

However, he only analyzed fourteen of them, and the remaining one was the same as Qin Chen and could not be distinguished. He stared at the medicinal materials in front of him for a long time. Suddenly, his eyes stopped on one of the spiritual medicines, showing a thoughtful look. The next moment, he solemnly took out this plant from the groove on the stone platform in front of him. Elixir, put 15 kinds of elixir

Placed in the groove in the middle of the stone platform.

Rumble!

The stone platform in front of you instantly shined, and the stone platform disappeared, revealing an empty formation, which was actually a teleportation formation.

"really."

A smile appeared on the face of the Holy Fire Demon Pill, and he couldn't help taking a long breath.

He has been walking in the devil world all the year round. For nearly 100,000 years, he has been immersed in various elixir, and the human race is the base camp of the alchemist. He has naturally studied many human medicines, and he is actually a plant. A line of demons.

The planted demon race is a race in the demon world that can communicate with the world and plants. Otherwise, as a demon race, he would not be able to become an apothecary. The talent of the demon race also made him understand elixir far beyond General pharmacist.

So we can successfully pass this second level of assessment.

And when the Fire Demon Pill Saint passed the second level assessment, in the stone chamber on the other side, Mo Li was also caught in the same difficulties as Qin Chen.

Although he studied under Fire Demon Pill Sage and received the inheritance of a top alchemist of the Demon Race, but among the many selections of materials in front of him, in the end only thirteen kinds were collected, which is more than Qin Chen's 14 kinds. One kind is missing.

He couldn't choose the remaining two. After hesitating for a long time, Mo Li finally gritted his teeth and placed the thirteen elixir he selected into the groove in the middle of the stone platform, because he knew that he would rather take out the correct thirteen kinds than place one indiscriminately. I don't know

of.

boom!

The stone platform in front of him quickly shined, and a terrible formation wave rose up, puff puff puff, a wave of burning formation energy fluctuations instantly spewed onto Mo Li.

"what!"

Moli let out a screaming scream, the flesh and blood on his body was corroded instantly under the erosion of this poisonous gas, but he insisted firmly, the demonic gas in his body surged wildly, forcibly swallowing this poisonous gas power.

The terrible poisonous gas lingered, the bones of Moli's body were clearly visible, and the internal organs appeared.

But somehow he selected thirteen kinds of poisons, and he chose one of the top and most powerful poisons among the thirteen kinds. The poison gas formed by neutralizing each other was the least able to swallow him.

"Coco!"

Countless bursts of light and energy fluctuations dissipated, and the devil was lying on the ground in pain, his whole body was completely destroyed, and there was almost no place intact. The corrupted people were not humans, and ghosts were not ghosts. After a long time, Mo Li eased up. He quickly took out a dark pill. This pill was obviously some kind of ancient magic pill. As soon as it was taken out, it exuded a terrifying smell of potion. Qin Mo Swallow it in one bite, and all the pain is surging

With the black devilish energy, the injuries on his body were slowly healed.

After half a stick of incense, Mo Li stood up sadly, staggered into the teleportation formation on the stone platform, and disappeared.

At this time, Qin Chen still failed to choose the last elixir.

"There is definitely something I don't know about."

Qin Chen's eyes were cold, he did not continue to choose from the four, but to taste the other fourteen poisons.

A kind of poison was tasted by him and decomposed by him at the same time. At the same time, Qin Chen used the origin magic power, the book of origin in his body instantly lit up, and he started to absorb the power of these poisons.

Boom, after Qin Chen tasted ten kinds of poisons, the Book of Origins suddenly burst into light, and suddenly a new page appeared in the Book of Origins, bursting with light.

Poisonous civilization!

Yes, it is a poisonous civilization.

Qin Chen was extremely calm in his heart and smiled slightly. This is his hole card, which no one else has.

Perhaps he could not distinguish the last poison, but he had formed a poisonous civilization in his body through the 14 poisons in front, and Qin Chen's understanding of poisons instantly reached an unprecedented astonishing level.

Then, Qin Chen once again felt the remaining four poisons.

When he tasted the third fire elixir, Qin Chen suddenly smiled.

Because the civilization of the book of origin finally reacted.

This is it. Qin Chen smiled slightly, and combined with the poisonous civilization, he instantly understood that this fire-type elixir was actually a poison.

#### [Chapter 3389: Poison array](#)

Qin Chen also instantly understood why he hadn't been able to detect this poison before, because the normal fire type elixir was not poisonous, but the effect was not enough, it was a hooliganism.

Indeed, the fire power is not a toxin. Even after Qin Chen tasted a little before, he didn't feel any toxic side effects, but that was because Qin Chen tasted too little.

This elixir, if only a few branches and leaves are picked, is naturally non-toxic, but when the entire plant material is incorporated into the elixir, it will produce toxins and form terrible fire poison.

It's the third part of the medicine, which is the truth.

"It seems that my previous considerations were a bit too narrow."

This time the assessment also gave Qin Chen a lot of inspiration, and he was thoughtful.

Next, Qin Chen placed all fifteen kinds of elixir in the middle groove and stepped aside.

The stone platform suddenly lit up, and rumbling into the ground, at the same time, a teleportation array appeared where the stone platform was originally.

"Sure enough."

Qin Chen stood on the teleportation formation on the stone platform. After the light flashed, Qin Chen's eyes went black, and the feeling of teleportation struck again.

After he stabilized his figure again, he turned his head and looked around for a while, suddenly showing a strange appearance, and nodded, "It's the same again."

The place he was in was still a stone chamber, no different from the stone chambers he had visited before, but there was no stone platform in the middle of the stone chamber, but there was a strange big formation under his feet.

The complex structure of this large formation made Qin Chen feel dizzy and fainted when Qin Chen glanced at it.

Rumble!

And at the moment Qin Chen stood on this big formation, the whole big formation suddenly began to spin, and his eyes became misty. Green rays of light rose slowly, trapping Qin Chen completely in this big formation. Among.

Strands of green aura rose in the large formation, Qin Chen only smelled a little bit, and then a flower appeared before his eyes, and bursts of dizziness came in his mind.

This is... the poison array?

"Young man, welcome to the third level of the inheritance. You can enter the third level of the inheritance. It shows that you have an extraordinary cultivation base in fire refining and medicinal analysis. Of course, you may also be able to overcome it with your strength, but it does not matter. This third level of assessment will assess your resistance to toxins."

"Jie Jie Jie, this level, regardless of the cultivation base, no matter how high the cultivation base is, it is useless, because depending on the cultivation base, the poison gas generated by the poison formation will be even more powerful. You need to do it. There is enough time for a hundred breaths in this poison array. Once the time is up, the poison array will transform into a teleportation array and send you away."

As the words fell, the green mist in the large array became more and more intense, and it quickly wrapped towards Qin Chen.

Qin Chen was speechless, this alchemy power was too fond of using poison, the dignified pharmacist, actually two consecutive levels were related to poison.

With the previous experience, Qin Chen sat cross-legged, holding his breath, not sucking the poisonous gas around him. Sure enough, after Qin Chen stopped breathing, he immediately felt the dizziness in his mind eased.

But without waiting for him to breathe a sigh of relief, the body felt uncomfortable again, and the toxin had penetrated into his body through his skin.

"Humph!"

Qin Chen snorted coldly, and the ancient saint body revolved. Suddenly, under the atmosphere of the ancients, the poisonous gas was shielded from the outside world by his body.

"Hey, this kid, he closed his body in an instant. My poison array can poison all things, and most people can't abandon the toxins from invading the body. Even the late-stage holy master may not be able to do it. How did this person do it? "

A whispering voice sounded in an empty space.

If Qin Chen heard this voice, he would be shocked, because this voice was so cold, it turned out to be the ancient power of the alchemy.

But according to what this person said before, this alchemy power has already fallen, and even his soul has been destroyed, and what remains is just a consciousness.

Normally, consciousness is just a fixed mind left by the strong. Generally speaking, it is not the ability to think independently. It can only be selected and operated according to the rules left behind during a lifetime.

But this consciousness actually has the ability to think independently. If these people who participated in the inheritance assessment were known, they would all be surprised.

"At present, there are only two who have passed the second test perfectly. One is the top alchemist of the Demon Race, the other is this kid, and there is another Demon kid who can only be considered so-so."

"And the two who passed through perfectly, the Alchemists of the Demon Race are from the planted Demon Race, plus they are the best among the late Saint Masters, it is understandable."

"But this kid, the breath of years on his body is not strong, it can be seen that he is not very old, and he has passed the second level perfectly. And his cultivation is only in the middle of the Holy Master, and the poison array of the third level can't affect it. How can he be so weird?"

In the cold space, the cold voice was full of doubts.

"If this continues, this third level will not be able to detect the true level of this kid. It seems that it will be more difficult."

The cold voice, whispered, disappeared quickly.

In the stone room, Qin Chen urged the ancient sacred body. His ancient sacred body was extremely powerful. It was not only strong in fighting, but also far more resistant to toxins than ordinary strong people. This poison formation hardly did much to him. Impact.

But all of a sudden, Qin Chen felt a shock from the great array below, and dizziness came again in his mind.

"Huh?" Qin Chen opened his eyes, frowning, "Weird, how did the power of this poison formation suddenly increase? Although the power of this poison formation will become stronger and stronger as time goes by, this time The child has promoted too much."

Qin Chen felt that the toxin in the poison array had penetrated into his body through the Saint Yuan outside his body, making his mind dizzy again.

It's almost impossible to guard against.

In fact, toxins invade the body through Saint Yuan. It is not something worthy of surprise. At Qin Chen's level, if this poison array can only poison people through breathing and pores, it is called a ridiculous, holy master-level poison. , It is normal for Shengyuan to be affected.

But Qin Chen was different. He appeared to be a mid-stage holy master, but in fact the strength of the holy yuan surpassed the average later-stage holy master. This toxin can actually invade his body, which is a bit strange.

Because he was replaced by a late-stage holy lord, I am afraid that he has been poisoned at this moment, but he has only entered this poison array for 30 breaths, a total of 100 breaths, so how terrible the next 70 breaths will be ?

Qin Chen changed color slightly.

In fact, what Qin Chen didn't know was that many powerful men in other stone chambers could no longer hold on.

[Chapter 3390: The law of poisoning](#)

"what!"

In a certain stone room, a talented sage alchemist master, who passed the second level with luck before, screamed at this time, and smoke burst out of his body quickly, and the whole person began to fester under the toxin. .

Numerous toxins penetrated into this person's body. After a while, the holy alchemist disappeared completely, leaving only a puddle of pus and a few pieces of broken clothing in the poison array in the middle of the stone chamber, indicating that someone had stayed here before.

In the dark space.

"This kid is so strong that he has resisted it again, and there is no fatigue. It seems that he is still far from his limit. The deity has to see what his endurance limit is."

Hum!

The big formation under Qin Chen's body once again spread the waves, and the next moment, a terrible toxin force began to penetrate Qin Chen's soul into his mind.

"Soul invasion? Can this poison array affect the soul of the warrior?"

A trace of corrosion began to appear on the soul in Qin Chen's mind, and this trace of corrosion was like a virus, multiplying rapidly, and began to spread in his soul sea. If this was successful, Qin Chen's soul would not appear for a while. In three quarters, he will be completely infested with toxins and die directly.

"Heaven Soul Forbidden Technique, resist me."

Qin Chen's face changed slightly, he quickly ran the Heaven Soul Forbidden Technique, and a terrifying soul wave swept out, quickly forcing the trace of toxin out.

"so close!"

Qin Chen was shocked. This toxin was terrifying. If he was not careful, he might have been successfully invaded by the toxin.

"What? This kid resisted the soul invasion so quickly? What happened just now? This person's soul seemed to become stronger in an instant. What is the secret technique?"

In the dark space, the cold voice was full of shock, and said in disbelief.

"There is definitely a powerful soul secret in this person. Although the poison formation tested in the stone chamber is only at the later stage of the saint master level, not the noble class poison formation, it can resist the soul invasion of the poison formation. Level, absolutely surpasses the level of the Holy Master."

"Is it the noble soul secret method?"

This cold voice was full of shock. The Venerable Soul's secret method, even if he was alive, had never possessed it. How could it appear on a middle-term saint master-level kid?

"The deity doesn't believe it. This kid can resist forever. Then, the poison array is opened to the maximum. The deity has to see if this kid can resist."

Boom!

In the stone room where Qin Chen was located, the poison formation suddenly changed, and in an instant, the power of the law in the entire void began to change, and the law between the heavens and the earth was full of rotten smell, decay and decay.

This force, along Qin Chen's physical body, through the laws of the surroundings, slowly penetrated into Qin Chen's holy master origin, actually poisoning Qin Chen's holy master origin.

"how is this possible?"

Qin Chen was shocked.

This poison array can even poison the laws of heaven and earth?

hiss!

Doesn't this mean that this toxin can even poison the heavens?

The law is the law of the movement of the heaven and the earth. Even the holy master at the peak of the later stage is only the law of body fusion at best, unable to change the law, but this toxin can actually poison the law of heaven and earth, completely beyond Qin. Dust understanding.

"Is this the power of the Lord?"

Yes.

The holy master is the highest level that can be accommodated in the rules of the heavens. The birth of any holy master will bring benefits to the avenues of the heavens and enhance the strength of the celestial avenues.

But the Venerable is an existence that transcends the rules of the heavens. The birth of any Venerable will bring damage to the great power of the heavens, because the birth of the Venerable will suppress the power of the great powers of the heavens.

It can be said that the Venerable is a strong person who exists beyond the rules.

And if this ancient alchemy power is a powerful person, it is not incomprehensible that it can poison the rules of the heavenly realm.

"No, although the power of the venerable surpasses the limit of the rules of the heavens, it is not that any power of the venerable can affect the rules of the heavens."

Qin Chen suddenly thought of another point.

For example, Venerable Skyfire entered the Tao with flames, transcended the realm of the Holy Lord, and became the Venerable. In the way of fire, Venerable Skyfire can even suppress the avenue of the heavens, form his own realm of fire, and let him enter his own fire. The saint master of the realm cannot sense the flame avenue of the heaven.

However, it does not mean that Venerable Skyfire can suppress the Heavenly Realm Avenue on other avenues.

And the poisonous formation created by the great power of the ancient Dan Dao can actually poison the rules of the heavens. So, is this person entering the Dao with poison?

But what was in front of him was a big formation, and the formation was different from the Dao. Why could the poison gas released from this formation affect the law?

When Qin Chen was puzzled, the poison had quietly diffused into the origin of his body, actually trying to poison his origin.

"Huh, the book of origin."

Qin Chen's heart condensed, and the Book of Origins was activated instantly, and the Book of Origins burst into light, and the terrifying power of Origin swept out. The origin of Qin Chen was wrapped in a moment, and he began to analyze the toxic ingredients.

Buzzing!

Above the Book of Origins, light began to bloom, and the pages of the poisonous civilization bloomed with rainbow light, began to swallow this force, and evolved a brand-new civilization.

Qin Chen felt that the page of the poisoned civilization in the Book of Origins had become extremely vast, more terrifying than most other civilizations in it.

After the birth of the Book of Origins, Qin Chen has evolved countless civilizations, including flames, the way of demons, succubus, etc....Three thousand avenues have evolved everything, and the most

terrifying among them is naturally the power of darkness that invades the heavens. In general, even the book of origin can hardly simulate civilization.

Then the strongest is the disaster demon fire civilization inherited by Venerable Skyfire, and this time, as soon as this poisonous civilization appeared, it immediately reached a point similar to the disaster demon fire civilization.

"It seems that the great power of the pill Dao really entered the Dao with poison. Otherwise, the poisonous civilization formed can not be so terrible."

The strength of civilization in Qin Chen's Book of Origins is not distinguished by attributes, but by the power absorbed by the Book of Origins. Otherwise, civilizations such as time civilization and destiny civilization cannot be compared to the poisonous civilization. To be weak.

It is naturally better to absorb the civilization of a noble one than to absorb the civilization of a holy lord.

As soon as this poisonous civilization came out, it immediately absorbed and analyzed the poison in Qin Chen's body that corrupted his sacred yuan, and became the civilization and knowledge that Qin Chen mastered.

In an instant, the poisonous force formed in the large stone chamber no longer caused any damage to Qin Chen.

"call!"

Taking a long breath, Qin Chen opened his eyes, his eyes clear.

Now let alone a hundred breaths, even if he spends a day and night in this big formation, he can't cause any damage to him.
