

## Versatile 2901

### Chapter 2901: Extreme South's Chronic Poison

Mu Ningxue did not expect the world's experts to recruit her to fight against the Extreme South Emperor.

Moreover, the Forbidden Magic Association in China had also received the same letter. It put Mu Ningxue in a difficult position.

"Ningxue, this letter is from the Five Continents Magic Association Alliance. Every registered mage must obey the recruitment unconditionally, but don't worry. I have talked to Wei Guang about this. Although the Magic Association in China can't reject the Five Continents Magic Association Alliance, it has dispatched a team to protect you. Wei Guang is the leader of the team," Mu Linsheng said softly to Mu Ningxue.

Mu Ningxue had read the letter. She knew that the empty words from the Alliance held no meaning. When she became a mage and joined the Magic Association, she had known that she had no power to reject this kind of recruitment. It was an obligation and duty, just like military service. However, ordinary people did not receive such recruitment.

"We'll depart after you're ready. We have no time to waste," Wei Guang said to Mu Ningxue.

Mu Ningxue did not answer. She needed to verify something. She had her own doubts.

...

"Dean Song He, I received a recruitment letter from the Five Continents Magic Association Alliance." Mu Ningxue called the Dean of the Imperial College. She had to inquire about this matter in more detail. She didn't want to be hasty.

"Oh, I know about it. You don't really want to go, do you?" said Dean Song He.

"Not really. I know I can't reject it, but I still want to know why I was recruited," Mu Ningxue said.

"I inquired about it. It's mainly because of your natural talent. They probably need a mage with a natural Ice Element spiritual body, but they won't readily reveal what it is that they want you to do," said Dean Song He.

"Who should I trust when I get there?" Mu Ningxue asked.

"Trust yourself, Ningxue. There are many questionable things about this recruitment, but this letter is from the Holy City and the most prestigious Magic Association in the five continents. Even if they recruit the chairman, the chairman must go. You are the one who will decide what you do during your journey, be it during your encounters or during unforeseen circumstances," Dean Song He warned.

"I get it. Thank you, Dean Song He," said Mu Ningxue.

Mu Ningxue asked other people too. But they did not know much about it either. It was obvious that the information about the recruitment from the Holy City and the Five Continents Magic Association Alliance would not be readily disclosed.

Mu Ningxue could do nothing.

Because of the sudden recruitment, she had no choice but to go to the most frightening forbidden place for humanity, the Antarctic continent. It made Mu Ningxue feel a little lost and helpless.

...

Mu Ningxue wanted to tell Mo Fan about it, but she thought it would be a little inappropriate. Therefore, she left a letter for him. After Mo Fan finished practicing his cultivation, he would know her whereabouts.

Mu Ningxue wasn't hesitating because she didn't want to disturb Mo Fan, but because telling him would complicate the situation.

First, she could not reject the recruitment as it would be a violation of the magic convention. She could not possibly go against the Five Continents Magic Association Alliance, anyway.

Secondly, Mo Fan would not let her go alone if she told him about it.

2

He would stop his cultivation and accompany her to the Antarctic Continent. Mu Ningxue could not bear to drag Mo Fan in danger so soon after the battle in the Magic City.

Mu Ningxue informed people to not disturb Mo Fan's cultivation. She then packed her things and set off.

According to the arrangement of the Forbidden Curse Association, she had to go to South America first. Then, she would set off from Argentina in South America and arrive at the Antarctic Continent after crossing an ocean.

The Forbidden Curse Association allowed Mu Ningxue to bring some companions, but Mu Ningxue refused. Mu Ningxue knew what kind of a place the Antarctic Continent was. She could not predict what would happen there.

Fortunately, the Ice Crystal Bow already had a complete form. Otherwise, Mu Ningxue would feel even more uneasy.

Compared to the group that fought the Extreme South Emperor, her cultivation was insignificantly higher.

...

The Land of the Antarctic was even more mysterious than Tianshan Mountain. For every Ice Element Mage, the primitive landscape with turbulent ice veins was like a big cultivating sanctuary.

Some special Ice Element Mages used to publish articles about the harsh practice in the Extreme South Land, which attracted people who pursued supreme magic.

The Extreme South Land was a land full of treasures for the Ice Element Mages as there were limitless Ice Element resources. It was only in such a forbidden place that humans could break through the limit and become a real Forbidden Mage.

Although this place was dangerous, people were eager to visit. As an Ice Element Mage, Mu Ningxue had heard similar remarks more than once. However, Mu Ningxue had ignored these adulterated cultivation theories.

There were people in the world who liked to be unconventional and express their extraordinariness. However, many people had gone missing and died after stepping into the Extreme South Land.

One could only practice Ice Element if they were strong enough. Otherwise, they would die.

...

“The Antarctic Continent has the power of ice invasion. Standing on the Antarctic Continent is equivalent to putting hot water in an ice bank. Our temperatures will drop slowly. When the water turns to zero degrees and starts to freeze into ice, that’s when our lives come to an end.” Wang Shuo told everyone about the bad conditions on the Antarctic Continent before departure.

Ice invasion would deplete a person’s vital functions little by little. Mages of all levels would suffer from this depletion in their abilities and corresponding strength.

A high level of cultivation would not reduce the impact of ice invasion. Even if they were Forbidden Mages, they would be affected by ice invasion if they stepped into the Antarctic Continent.

This was why the Antarctic Continent was known as the forbidden place on earth.

The Antarctic Continent was extremely harmful to Mages, let alone ordinary people. Humans were rejected here. The moment they stepped in, they would suffer from a “chronic poison”.

“The strength of the creatures in the Antarctic Continent is far greater than that of the Ocean Demons. They should be about five times stronger than the demons on the land. When you see a Commander-level or ruler-level Ice Beast, you must not take it lightly,” Wang Shuo continued.

“You have been to the Antarctic Continent before, right?” Wei Guang asked.

“I was young and ignorant. Alas, this leg is the price I paid at that time. Fortunately, I didn’t die,” Wang Shuo said with a bitter smile as he tapped his left knee with a cane.

Chapter 2902: Alumni

“Can’t your leg recover? You’re a great mage in the Imperial Capital. You should be able to find some top Healing Mages to heal your injury,” said a young woman who looked to be in her twenties.

“This is the scary part of the Extreme South Land. The injuries you have suffered there will probably accompany you for the rest of your life. After you get there, you must treat the wound in time, even if it is a small cut. Once those “chronic poisons” erode your wound, you might live with it your entire life,” explained Wang Shuo.

“Mr. Wang, please don’t scare me. I hate having scars!” the woman exclaimed.

“That place will only be even more terrifying and unpredictable. I am not sure why the association is asking two little girls to travel with us. Your level of cultivation doesn’t seem very high,” Wang Shuo said as he looked at Mu Ningxue and the woman in charge of logistics and food.

“Cough. Cough. Brother Wang, this is Mu Ningxue from Fanxue Mountain. She is the person we are going to escort to the Extreme South Land,” said a Royal Great Mage.

The woman in charge of logistics and food hadn't known about this. She turned around in surprise to look at the quiet Mu Ningxue.

Mu Ningxue wore a black mask to keep the cold out, and her long white-silver hair was strikingly noticeable. However, Wang Shuo and the woman thought it was a dyeing method that young girls liked these days. They did not expect her to be Mu Ningxue, the key person in this important mission.

This mission was led by a Forbidden Mage, who was assigned to protect her. It showed how important the person they escorted was.

“Oh, I'm sorry. I didn't know you were Miss Mu.” Wang Shuo apologized, but his eyes seemed to express some other emotion.

He probably could not understand why a female Ice Elemental Mage was considered this important.

Back then, Wang Shuo went to the Antarctic Continent on behalf of the Imperial Capital Exploration Team, and the Imperial Capital only dispatched a few young Royal Mages. Because of those inexperienced and ignorant people, the team was trapped in the ice storm.

Wang Shuo wasn't clear about the exact task of this mission. Nevertheless, it was overblown to dispatch a Forbidden Mage and an entire team for exploration, arming, logistics, and emergency response to accompany a female Ice Elemental Mage to the Antarctic Continent.

“Wow, you are Mu Ningxue? I was in the same grade as you when I was in Imperial College,” said Yan Lan, the woman in charge of logistics.

“Yeah.” Mu Ningxue gave a short response. She had no intention of chatting.

However, Yan Lan was talkative. Perhaps it was Mu Ningxue's mask covering her cold expression, or perhaps it was the simple-minded nature of Yan Lan, but she seemed excited and kept talking about all kinds of things about Imperial College.

“At that time, our grade had a lot of young talents, and each of them was a dazzling star. After everyone graduated, many people who were famous in school became ordinary. On the other hand, some people who didn't have much fame started to stand out. Mu Ningxue, you have always been the most talked-about person when the alumni meet. For some reason, everyone likes to mention you. We talked about how you won the World College Tournament, established Fanxue Mountain, defeated various young and powerful mages, entered Mu Pang Mountain alone... Everyone calls you a Goddess! Can I call you the same in the future? If you don't answer, I will take your silence as a “yes”. In fact, after talking for a long time, Goddess Mu sounds friendly. All the juniors also liked to call you that.”

Yan Lan rambled on. She had finally met the famous person everyone talked about.

Mu Ningxue felt a little emotional when she heard Yan Lan mention the school. She did not say anything and quietly listened to Yan Lan.

Yan Lan seemed to know the past and present of the people in the whole school. She could talk a lot about one person, which made the boring itinerary a little more interesting.

“By the way, Mr. Wei Guang is also a student of the Imperial College. He is our senior. When he became a Forbidden Mage, it caused a stir in our school. If you attend the Homecoming, you will see his photos hanging all over the campus. He should be the youngest Forbidden Mage of this era. I heard that few people knew about Wei Guang before. I wonder what rare encounter he had. Even foreign countries were scrambling to report it,” Yan Lan continued.

Yan Lan babble. Wei Guang was walking toward them. He glanced at Yan Lan and then at Mu Ningxue.

“You can voice out if you have any complaints and requirements. Our team will try our best to meet your expectations. If you have any discomfort, let us know as soon as possible. If you need food, clothes, or special things, you can let her know,” Wei Guang pointed at Yan Lan.

Yan Lan smiled. When she looked at Wei Guang, her eyes lit up in joy. She admired him a lot.

“Mr. Wei Guang, the three of us are alumni,” Yan Lan said.

“So what?” Wei Guang asked.

“Uh...” Yan Lan was a talkative girl, but she did not know how to respond to Wei Guang.

Yan Lan lowered her head and looked at Mu Ningxue, as if she had done something wrong. Mu Ningxue patted her lightly on her shoulders to provide some comfort.

Seeing that Mu Ningxue had nothing to say, Wei Guang returned to his position.

After Wei Guang left, Yan Lan said cautiously, “Wei Guang doesn’t seem to like me. Am I too talkative?”

“He is likely too proud of himself,” Mu Ningxue responded indifferently.

Wei Guang was quite proud, and Mu Ningxue had felt it the moment he stepped into the conference hall of Fanxue Mountain. The way he looked at other people, and the tone of voice always held a certain impatience.

“But he has the right to be proud. After all, not everyone can become a Forbidden Mage, and there are not many people who can have great achievements and become famous at such a young age,” said Yan Lan.

The colder the other person was, the more Yan Lan felt that that was the temperament that an unattainable person should have. It would make Yan Lan think that the other person was less mysterious and respectable if Wei Guang was approachable and friendly.

“Maybe.”

“Oh, I almost forgot. Everyone said that you are the most difficult to approach. You won’t pay attention to anyone, as if everyone in this world is a pile of garbage... I’m sorry. I heard this from a senior, but I don’t think it is true. Is it because I often listen to everyone talking about you, so I naturally feel that you are someone who has been by my side all this time?” Yan Lan suddenly realized.

Mu Ningxue smiled. For a girl with a simple mind like Yan Lan, she did not need to be cold toward her.

Chapter 2903: Refraction of the Ice Field

Mu Ningxue had never felt that she was easy to get along with. She never paid attention to what she liked or disliked sharing with other people.

When some people approached her and chatted with her with a purpose in their minds, she would put on a temperament that hinted at them that she wanted to be left alone. In fact, too many people behaved strangely with her.

They either deliberately pretended to admire her or looked down on her. If a person was not sincere, their behavior would come off as annoying. Most people Mu Ningxue met were this way, which made it very difficult to get along with and hence, she came off as aloof and as cold as ice.

There were not many sincere women like Yan Lan. From her words, Mu Ningxue could feel that she did not intend to flatter her, nor did she have any ulterior motives. She just wanted to talk with her.

In fact, women like Yan Lan were honest. They would be the same no matter who they talked with.

Mu Ningxue was quite envious of her. Therefore, Mu Ningxue felt that Wei Guang was being impatient with Yan Lan because he was too proud of himself.

Wei Guang felt that Yan Lan was trying to suck up to him. But she really did not intend anything like that.

...

Yan Lan was a mage who was good at cooking. She had a unique understanding of food and knew how to match special ingredients. These ingredients could make people resist the invasion of cold and the spreading of the poisonous miasma.

Food Mage was a very rare profession, but it was critical in this itinerary.

“The Ice Wheel Flying Boat will be an important transport for us to travel in the Antarctic Continent. It can keep our feet out of the icy land and reduce the chance of them hurting because of the cold. Of course, the most important thing is the formation inside, which can warm our bodies and our blood. It can remove the ice invasion effect little by little.”

“Unfortunately, the Ice Wheel Flying Boat can’t work in all ice fields, so we have to do without it in some places. As we stay longer in the Antarctic Continent, the Clear Fire Formation will gradually lose its effect.”

“It would have been great if we also had the Ice Wheel Flying Boat and Clear Fire Formation in the past.” Wang Shuo sighed. He seemed particularly concerned about the difference between the past and the present.

It was natural to have such reactions. In the past, Wang Shuo was in a bad condition on the Antarctic Continent. He explored a long distance and lost his left leg, but not many people remembered his contribution. People in the Imperial Capital remembered him as the man who had stepped into the Extreme South Land only when the recruitment from the Five Continents Magic Association Alliance came. They needed him to be the guide for the current team.

The blue sea was getting purer. Nature would probably only show its original form vividly when it was close to the forbidden area that no one can enter. That was why the color of the blue sea was so stunning.

Some white icebergs appeared on the sea. They were like sailboats slowly drifting in the icy blue picture.

The icebergs weren't actually floating, they were just the tips protruding on the surface and were part of vast icebergs underwater. Human sight and the ship made it seem like the icebergs were drifting.

Along the way, Mu Ningxue saw the wreckage of many ships. There were wrecks attached to the uneven corners of the icebergs, and others floated about 100 meters underwater.

Unlike the dilapidated ships hanging on the corner of the icebergs, the ships sinking in the sea gave off an eerie feeling. They were in the deep, calm sea where the light could not penetrate. They loomed like a ghost ship underwater. It felt like something in the ship was staring at the sea surface, and the resentment always shrouded the hull.

As the ship continued to sail, they could see a spectacular ice world. It was a clear boundary between the frozen sea and the blue water waves. When the Ice Wheel Flying Boat crossed the seawater and sailed on the ice, they felt like they had arrived in another world.

Everything in this world seemed static, like a magnificent white painting with blue and white ice mountains with thin ice layers.

"We are about to arrive on the Antarctic Continent," said Wang Shuo. He felt uneasy.

In fact, he had not wanted to come here at all. When the cold and domineering air hit him, his left leg started to hurt.

"Let's not rest. We must move on. We've already wasted a lot of time," Wei Guang said to everyone.

"At this point, the outpost team must explore the route. There are some powerful Ice Beasts inhabiting the Antarctic Ocean," Wang Shuo hurriedly protested.

Wei Guang glanced around and seemed reluctant. They could not move forward before the outpost team declared the road ahead to be safe.

"Okay, you guys go ahead and take a look. If there is no special situation, we will move forward at full speed," said Wei Guang.

"Yes!"

"Yes!"

The personnel in charge of exploring the route were two brothers with similar appearance and figures.

The two summoned a white panther and a black panther. The white panther had a pair of wings and could fly in the air. On the other hand, the black panther had a more robust physique, sharp claws, and could run steadily on the ice.

The two brothers rode on their own summoned beasts. However, they disappeared from everyone's sight after a short distance. This phenomenon made Wei Guang frown.

"The glaciers and ice surfaces here will cause various refractions of light, so the real appearance of the whole ice field we saw is not that of a flat land or undulating mountains. It may be more complicated

with cracks, waves, glaciers, and icicles. I asked them to leave recognizable marks along the way,” Wang Shuo explained.

“If that’s the case, won’t we get lost easily?” asked the Royal Great Mage.

“This is not the scariest thing,” Wang Shuo said with a strange expression.

“What’s the scariest thing?” Wei Guang asked.

“Just as we can’t see the two brothers who have gone to explore the route, the powerful beasts living in groups in the ice field may be close by. When we accidentally step into an empty ice field, we might alert a group of beasts,” said Wang Shuo.

“Huh?”

“Such a strange thing actually exists!”

“It means that we are in danger no matter where we are!”

Everyone felt spooked after hearing that. The ice field was too bizarre and unreasonable!

“Therefore, we have to be extra careful when we move. Someone has to go forward to explore first, and someone might need to patrol the invisible “areas” around us to ensure that there are no powerful creatures and groups of Ice Beasts near us,” said Wang Shuo.

#### Chapter 2904: Cultivating Sanctuary

The sunlight was dazzling, especially when it shone on some icebergs that were like prisms. The reflected light was intensely bright. When humans bathed in sunlight for a long time in the cold, their skin felt tingly. It was a strange feeling.

They were in a cold place but could feel the scorching sun. As a result of the ice invasion, every gust of wind scraped the skin like blades. Their muscles and bones ached constantly.

“The sunlight almost makes my skin crack,” the Royal Great Mage complained.

“Ha! You should be grateful that we are here this season. If it were any other season, we wouldn’t even have the qualifications to step into this forbidden area. The area of the Antarctic ice will double in size, and the ice invasion will be five times more powerful than it is now. Even many Ice Beasts die that season,” Wang Shuo said.

The Royal Great Mage, Li Wenbin, looked around in confusion.

He had been feeling uncomfortable ever since he had stepped into the Antarctic Continent. ‘How could such a harsh environment be suitable for humans to live in?’ And this was not the worst-case scenario!

“I don’t quite understand what you mean. Will the climate here change?” asked Li Wenbin.

“Didn’t you notice? It hasn’t set in a long time,” Wang Shuo said as he pointed at the sun in the sky.

Only then did Li Wenbin realize that the day had been so long. Li Wenbin saw the sun hanging in the sky from a long while ago. It should have set, and the night should have fallen by now. ‘Why did it feel like the sun kept shining in the sky as if it had just risen?’

“Polar day,” Wang Shuo explained. “From here on, we won’t see the night if we don’t go back.”

This phenomenon only occurred in the Antarctic Continent and Arctic Continent. Mu Ningxue knew the principle of it.

Mu Ningxue roughly calculated the time and frowned. It was true that they would not see the night anymore, but soon, the “eternal night” would rule the Antarctic Continent.

This month was the time when polar day and polar night alternated.

The Antarctic Continent, especially the pole, would have only nightfall for up to six months. The pole and the area around the Antarctic Continent would become dark and cold like icy purgatory.

The Five Continents Magic Association and the experts of Holy City chose to fight with the Extreme South Emperor in such a month...

‘Did it mean that if they did not do anything this month, people would not even have the qualifications to step into this place for the next six months of eternal night, let alone go to the pole to fight with the Extreme South Emperor?’ Mu Ningxue wondered.

The cold was all over the world. Several important magical developed countries were over the northern hemisphere. As for the impact of the cold, the northern hemisphere would be affected more. Many countries were even constantly recruiting Fire Element Mages to relieve the freezing problem for important rivers and waterways.

“They are eager to fight with the Extreme South Emperor at the last minute. Could there be a disaster coming to the Extreme South Land in the future?” Mu Ningxue muttered to herself.

Mu Ningxue roughly calculated. More than twenty days had passed this month, and the remaining polar days were about only a week.

However, they stepped into the Antarctic Continent at this time. If they could not complete the task of this recruitment in seven days, they would face the most terrifying eternal night in the Extreme South. Only a few people could probably leave from here alive.

From the beginning, Mu Ningxue had a lot of questions, but so far, no one could tell her the truth. Even Wei Guang, who led the team, did not seem to know what they were supposed to do.

...

The two brothers, with their White Panther and Black Panther, returned. They explored a long way and told everyone with certainty that the road ahead was safe. They had checked some blind spots in the refraction area, and there were absolutely no ferocious Ice Beasts there.

As the Ice Wheel Flying Boat started to move, the ice invasion had already begun. Mu Ningxue noticed that everyone’s skin, including the Forbidden Mage Wei Guang, became extremely pale. It felt as if their blood had congealed.

“Don’t you feel cold?” Yan Lan asked in a trembling voice while wrapping herself in a magic jacket.

“I’m all right.” Mu Ningxue felt nothing.

Everyone here had been tortured by the ice invasion. They wrapped themselves in layers upon layers of warm clothes which had little to no effect. No matter how strong the sunlight was, they still felt cold. The coldness was accompanied by soreness, stiffness, and tingling all over their bodies.

However, Mu Ningxue found that the ice invasion did not seem to have any effect on her.

Everyone else's muscles were stiff, and they were tired and weak. It was similar to how ordinary people felt after running a long distance. The only way they could recuperate was by going to the Clear Fire Formation in the Ice Wheel Flying Boat.

Everyone wished to stay in that Clear Fire Formation all the time to stay away from the torture of the ice invasion.

"You should go to the Clear Fire Formation to rest for a while. We have already taken turns to go there." Yan Lan looked at Mu Ningxue.

Mu Ningxue had put on a jacket that could cover the whole body and wore a mask on her face which only revealed her eyes.

Yan Lan could not see Mu Ningxue's complexion. She just felt that Mu Ningxue should go and rest for a while.

Mu Ningxue thought about it and then nodded.

...

When Mu Ningxue reached the Clear Fire Formation, she felt a bit distressful. Other people felt warm and comfortable as though they had just taken a hot bath. But she felt so uncomfortable in this hot temperature.

After reluctantly staying for a while, Mu Ningxue went out. When she walked to the deck of the Ice Wheel Flying Boat, she felt that the cold and crisp air outside was much more comfortable.

"It seems that the ice invasion doesn't work on me," Mu Ningxue muttered to herself.

It was probably because she suffered from extreme icy torture of the Ice Crystal Bow since she was a child, or because the ice invasion of the Extreme South and the effect of the Ice Crystal Bow were of the same type. Mu Ningxue was surprised to find that she was completely immune to the ice invasion of the Extreme South.

Mu Ningxue even felt that her body was constantly absorbing the purest ice element in this ice invasion environment and transforming and strengthening her ice ability bit by bit.

"Maybe it wasn't such a bad idea to come here."

For others, this place was tortured. For Mu Ningxue, who had listened to the ice and snow and felt the wind and frost, it seemed to be a rare cultivating sanctuary.

Mu Ningxue felt that her level of cultivation, which had been close to its bottleneck, was a little subdued again.

However, she would soon become a Forbidden Mage if her cultivation advanced further.

## Chapter 2905: The Other Side of the Star Bridge

The road ahead was boundless. Mu Ningxue knew that it was useless to be worried. She could only take one step at a time.

She calmed herself and felt the Ice Element that filled the land.

For some reason, these ice elements that were cruel, and brutal to others were rather appealing to Mu Ningxue. They were like fireflies in the forest, which were pure and harmless.

She tried to absorb them into her soul little by little, but these ice elements turned into special snow water, washing the magic bow that merged with her soul.

The Ice Crystal Bow had always accompanied Mu Ningxue in her growth. When she was a child, she felt that it was like a devil that kept whipping her. If she were a little neglectful, she would pay a painful price.

After she gradually got used to its harshness and punishment, she felt that it was not as terrible as she thought.

Since the incident in Venice, Mu Ningxue had been collecting the fragments of other Ice Crystal Bows. The Mu family did not know much about the Ice Crystal Bow. Mu Ningxue discovered that the Ice Crystal Bow did not devour other people's souls to complement itself. It was a special bow that needed to raise ice-attribute energy.

Mu Ningxue relied on the growth of Fanxue Mountain to collect ice fragments from all over the country to make up for the insufficiency of the Ice Crystal Bow and gradually gain control of it.

All these years of hard work had not been in vain. Mu Ningxue improved her cultivation very quickly because of the soul energy released by the Ice Crystal Bow.

In fact, it had been some time since she had advanced to the third level of the Ice Element Super Level, but the cultivation could not represent her true ability. She still had a long way to go in cultivating.

...

Ice elements kept pouring in from all directions like a rushing river. At this time, Mu Ningxue once again felt that her cultivation barrier was loosening. However, there was nothing outside the barrier.

It felt like she was advancing. It was a similar feeling to when she advanced from basic level to Intermediate to Advanced to Super Level.

However, what made Mu Ningxue extremely confused and amazed was the Forbidden Curse. 'Could she become a Forbidden Mage standing in this cold and unique world?'

It was impossible.

If it were so easy to become a Forbidden Mage, there would not be so few Forbidden Mages in this world.

'If that was the case, what was the power that broke through the barrier of Super Level and the new realm she was about to enter?'

Mu Ningxue felt that her Ice Element Star Sea was changing. There were a total of 2,401 Star Sons, which deviated from the original orbit and flew into the darkness far away. The areas they crossed were all illuminated, forming many splendid starlight bridges.

Mu Ningxue did not know what to do with the unusual behavior of the Star Sons. She hurriedly chased them with her mind and followed these obedient Star Sons.

More than 2,000 Star Sons crossed at the same time, and the cast star bridge led to the world beyond the Star Sea. When Mu Ningxue chased the Star Sons along the star bridge, she was surprised to find a brighter and vaster Star Universe. The Star Sons there were extremely bright, and the light made it all look very dream-like.

The other side of the Star Bridge seemed to have countless power, and tens and thousands of Star Sons that it could dispatch. Unfortunately, the other Star Universe did not belong to Mu Ningxue.

She crossed the Star Bridge like opening a door. The beautiful, and endless new world unfolded like an exhibition that was for watching.

“Does it mean if I cross this Star Bridge and reach the other side of the Star Universe, I will become a Forbidden Mage?” Mu Ningxue muttered while staring at the peaceful and vast star universe.

Mu Ningxue did not know what it meant for Star Sons to become a bridge. The longer a person cultivated, the more choices they had to make.

However, this phenomenon was undoubtedly telling Mu Ningxue that her current cultivation was on the Star Bridge.

She broke away from the Super Level realm of 2401 Star Sons and stepped into the Star Bridge formed by the Star Sons. If she reached the other side, she would become a Forbidden Mage!

‘But what should I do to cross this Star Bridge?’

At first, Mu Ningxue thought the Star Sons flew toward the Star Universe on the other side and formed a Star Bridge.

But when Mu Ningxue stepped on it, she found that all the stars were reversed. They flew from the other side of the Star Universe to her feet. If she tried to step on the Star Bridge to go to the Star Universe on the other side, these Star Sons that flew in the opposite direction would send her back to the starting point!

Mu Ningxue’s speed was far slower than the speed at which these Star Sons sent her back to the starting point. So, it was pointless to walk on the Star Bridge.

Mu Ningxue was not someone who gave up easily. She had an idea.

Since the Star Bridge was composed of the 2401 Ice Element Star Sons that she was familiar with, she could try to make them stop.

In the past, the Mages made the Star Sons stop moving irregularly and arranged them in the pattern they needed to transmit the magic energy to complete a spell.

With Mu Ningxue's cultivation, it was not difficult for her to do so.

She concentrated on controlling the high-speed Star Sons and made them stop on the path of the Star Bridge, forming a tranquil Star Bridge made of 2401 Star Sons. Although it was a little difficult, Mu Ningxue did it as quickly as possible.

All the Star Sons of the Star Bridge stopped. They were motionless, and it gave Mu Ningxue hope. She immediately took advantage of this perfect opportunity to step toward the Star Universe on the other side.

The star bridge was very long, and Mu Ningxue's soul could only run at a fixed speed.

Before Mu Ningxue crossed one-tenth of the Star Bridge, all the still Star Sons began to vibrate violently!

Stopping the Star Sons consumed a large amount of Spiritual Force. Mu Ningxue's Spiritual Force was not enough to stop the Star Sons long enough for her to run over the Star Bridge to the other side.

The Star Bridge collapsed, and all the Star Sons returned to the starting point in reverse. They also sent Mu Ningxue back to the starting point.

Mu Ningxue suddenly felt tired and had to leave her Spiritual World.

She felt a little dizzy. She wondered if it was because she spent too much Spiritual Force to stop the Star Sons or because she tried very hard to move forward. She had to rest for a while to recover her energy.

Mu Ningxue opened her eyes and looked at the boundless glacier world. She realized that the Star Bridge was her real bottleneck. Crossing the Star Bridge to reach the Star Universe on the other side would become her next biggest cultivating challenge.

#### Chapter 2906: God's Gift

Mu Ningxue could quickly recover because of the ice elements in the Extreme South Land. While purifying the Ice Crystal Bow, they also helped her recover her lost Spiritual Force.

Soon, Mu Ningxue stepped into her Spiritual World again.

This time, she did not run like before. Running in the Spiritual World consumed a lot of physical energy. If she could control the Star Sons under her feet, maybe she could control these Star Sons to send her to the other side of the Star Bridge!

Those Star Sons were the most important link between a person and the Star Sea World, and their movement was the source of all magic.

Since people could make the Star Sons stop, why could they not make the Star Sons move in the opposite direction?

In the past, the Mages spent an extremely long time practicing how to make Star Sons stop, but Mu Ningxue had a new idea. She tried to make the Star Sons move in reverse.

This reverse movement was not as simple as turning around. She had to stop the Star Sons that were moving normally first before making them turn the opposite way.

Mu Ningxue had never tried it before, but because of the special nature of the Star Bridge, she felt that this was the only way.

Mu Ningxue found her road of cultivation. It was like opening a new door.

After advancing to the third level of Super Level, Mu Ningxue had spent a long time unaware of the way to improve and change herself except by concentrating on cultivating other elements.

But she had discovered a new method and a new world. Although there were a long Star Bridge, and new changes, she did not lack in her resolve to succeed.

...

Mu Ningxue practiced quietly. Some sounds came from the passages on both sides of the Ice Wheel.

"I don't know why that guy is so arrogant. We are a team, after all. Even though we are older, he orders us as if we were his little soldiers!" the Royal Great Mage, Li Wenbin, complained.

"Can you keep it down! We will be in trouble if he hears us," said White Panther Summoner.

"He is in the Clear Fire Formation, so he won't hear us. Hmph... he said he needed to preserve his strength because he was a Forbidden Mage, so he must stay in the Clear Fire Formation for a longer time. We are forced to stay outside in the cold because of that. He won't tell us what we need to do and keeps being arrogant and mysterious. Does he really think he became a Forbidden Mage with his own strength? No! It is because he has a big supporter! Many people in the country are at the peak of their Super Level and are more qualified than him to become Forbidden Mages. Why does he think he has the right to be so bossy?" said Li Wenbin, indignantly.

Right from the beginning, Wei Guang's attitude had disgusted many people. However, they could not voice it out since he was a Forbidden Mage. After everyone entered the ice invasion range in the Antarctic Continent, there were conflicts regarding the use of the Clear Fire Formation.

No one wanted to be tortured by the ice invasion. They all wanted to preserve their body heat. Every extra minute spent in this cold and freezing world was equivalent to losing a part of one's soul. Only the Clear Fire Formation provided warmth.

"Alas, it's pointless to complain. No matter what, him becoming a Forbidden Mage is indeed extraordinary. He must be very capable. Otherwise, why would the old guys in the Forbidden Curse Association value him so much?" said Black Panther Summoner.

"Hmph, if I become a Forbidden Mage, my God's gift won't be weaker than him," said Li Wenbin.

"Big Brother, what's God's gift?" White Panther was younger and had no idea what they were discussing.

"After becoming a Forbidden Mage, the Mage receives a powerful and unparalleled Magic God's gift, which is superior to any of the abilities we have acquired in the basic level, Intermediate, Advanced, and Super Level. It is a God-like ability," Black Panther whispered.

In the Forbidden Curse Association, God's gift was the key to determining the potential of a Forbidden Mage.

The God's gift Wei Guang obtained after becoming a Forbidden Mage was extraordinary, which made him stand out even among other Forbidden Mages.

"What kind of power is it?" White Panther Summoner was curious.

"We don't exactly know what it is. Every Forbidden Mage won't easily reveal all their God's gifts. However, I have heard that there is a Light Element Forbidden Mage in Europe, and his God's gift is to turn sunlight into a weapon. A ray of sunlight is the Spear of God's punishment, a ray of sunshine is a long red sword, and a scorching sun that illuminates the earth is a hundred million fire arrows," Black Panther Summoner explained.

"There is indeed such a person. Everyone calls him the Son of Light. He is one of the top five Forbidden Mages in Europe." Li Wenbin nodded. His face glowed with admiration for such a person.

"This is crazy! That means he is invincible in a sunny place. This is not different from a god! Can a Mage reach such a terrifying realm?!" White Panther Summoner said in horror.

'If God's gift of a Forbidden Mage was that powerful, was there anyone in the world that could fight with such a person?'

"That's why God's gift can determine the upper limit of a Forbidden Mage. It is just like innate talent. But innate talent is useless for someone who doesn't work hard, regardless of how powerful their talent might be. However, if people with good backgrounds, sufficient resources, and talent put in equal effort, they will reach a higher realm, which surpasses many Mages of the same level." Wang Shuo came out and joined the conversation.

"Is it true that every Mage who becomes a Forbidden Mage will get God's gifts?" White Panther felt that he had opened a new door of knowledge and took advantage of this rare opportunity to learn from these accomplished Mages.

"I think so..." Black Panther Summoner was not so sure.

Wang Shuo was knowledgeable. However, he only smiled and did not say anything.

"If you are curious, you can ask Wei Guang about it, provided he is willing to answer your doubts," said Li Wenbin.

"Forget it." White Panther Summoner scratched his head in embarrassment.

Wei Guang was too difficult to get along with!

...

"God's gifts?"

Mu Ningxue was not far from them, so she heard everything.

She gently stretched out her hand and pointed to an ice sheet that was dozens of meters in the distance. The ice sheet instantly turned into white particles. A gust of wind blew the ice fragments up like a foam.

"That's weird. We explored this path just moments ago. There was a thick and long ice sheet there. How did it suddenly disappear?" Black Panther frowned.

## Chapter 2907: Who Is The Leader

“All sorts of strange things can happen in the Land of the Antarctic. As long as there’s no issue with our route, we’ll keep moving!” said Wang Shuo.

Due to the existence of areas that refracted light, even if they record every terrain and landmark, changes were likely to occur.

Many times, Wang Shuo had noticed that the Extreme South Land was not a straight path. It was more like an organic world. The glacial plate, the snow mountain rift valley, and the white shoot continent were like dormant, massive beings. It would inadvertently appear in front of them and behind them and catch them unaware.

Wang Shuo would not find it surprising if strange things happened here.

Moreover, there were many creatures here that were so powerful that their strength exceeded imagination. If these creatures wanted to move the mountains and the seas, they would!

After they went along the designated route, the Black Panther Summoner continued to explore the place.

This time, he came back wounded. He was bleeding. He was frozen and looked as white as a ghost. He was also in excruciating pain.

Fortunately, they had a Healing Mage in Yan Lan’s team who treated the Black Panther Summoner’s wounds in time.

At that moment, Wei Guang came out of the Clear Fire Formation. When he saw the wounded Black Panther Summoner, he frowned. “What happened?”

“I encountered a Giant Ice Beast. It stood before me, but its aura was just as difficult to detect as a glacier. If it had not been for the fact that my Dark Star sensed danger, I wouldn’t have made it back alive,” said the Black Panther Summoner, wincing in pain.

“You have a relatively high level of cultivation. Why weren’t you able to take on the Giant Ice Beast?” asked Wei Guang.

“I don’t know what species it is. It shattered an entire glacier that spanned up to several kilometers with a single swipe. It is at least a ruler-level creature,” said the Black Panther Summoner.

“We haven’t even come far, and you already met a ruler-level creature?!” Yan Lan cried out in surprise.

“Anyway, we have to be careful as we continue. Let your younger brother scout ahead. We don’t have much time left.” Wei Guang glanced at the sky. He used the orientation of the sun to tell time.

Mu Ningxue had been paying close attention to the orientation of the sun. The sun had been circling around the sky for several days now. Its position in the sky had dipped a little over the past few days, and it was showing signs of sinking below the horizon.

The moment the sun sank into the horizon, it would not rise again. They would be enveloped in a terrifying state of eternal darkness.

"It's too dangerous for him to go alone. After all, we've already entered the Giant Ice Beast's territory. Send a few more people so that they can protect one another," said Mu Ningxue.

When the White Panther Summoner heard her words, he turned to her.

The White Panther Summoner's level of cultivation was not as high as his elder brother. He might not return alive if he explored alone.

"Li Wenbin, send two of your people with him," said Wei Guang.

Li Wenbin nodded. He selected a Shadow Element Mage and a Wind Element Mage from his team.

"Before they go, let them warm up in the Clear Fire Formation so that they won't freeze to death out there," the Black Panther Summoner suggested.

"They are still in good shape. There's no need for them to go into the formation. Mu Ningxue can go in and take a rest." Wei Guang disagreed with the Black Panther Summoner.

Wei Guang disliked discussing things with others. He expected everyone to obey his words.

...

Mu Ningxue entered the Clear Fire Formation. It was indeed warmer inside.

She only stayed inside for a while before letting Yan Lan into the formation. The cold could not harm her, so there was no need for her to keep on occupying the formation.

"Are you really fine with it? If anything happens to you, I can't afford to bear the consequences," Yan Lan whispered to Mu Ningxue.

"It could be due to my physique. I'm always in good shape," said Mu Ningxue.

Mu Ningxue did not plan to tell Yan Lan about the fact that the cold could do no harm to her. Mu Ningxue did not have the habit of sharing everything with others. The trip itself remained a mystery, so it was necessary to keep certain things to herself.

Yan Lan did not doubt her words and entered the Clear Fire Formation gratefully.

Mu Ningxue did not leave the Clear Fire Formation cabin. She closed her eyes and took a rest outside the formation.

Yan Lan's lips had turned purple because of the cold. Her skin was pale. The ice had invaded her skin, muscles, and blood. Even her bones had turned stiff due to the freezing temperature. Fortunately, the Clear Fire Formation could gradually eliminate the poison of the cold.

After two hours, Yan Lan recovered. Her cheeks had turned red. The effects of the cold were gone.

She opened her eyes and found Mu Ningxue was still outside the formation.

Mu Ningxue sat in a dignified posture. Yan Lan stared at her focused demeanor.

She had to admit that Mu Ningxue was impeccably beautiful. Even a woman would fall for Mu Ningxue's beauty.

'She's truly perfect. Why can't I look as gorgeous as her?' Yan Lan thought to herself.

Suddenly, there was an argument outside the formation cabin.

Mu Ningxue opened her eyes. There was not even the slightest trace of change in her complexion. Her skin was still as white as snow. Even though she was in the middle of the icy cold world, she did not look pale or weak.

Yan Lan was confused. She wondered why Mu Ningxue was not affected by the cold. Yan Lan had stayed inside the Clear Fire Formation for a long time. Most people would have frozen to death without recuperating in the Clear Fire Formation.

"Something is happening outside," said Yan Lan.

"Let's go check it out."

The two ladies left the cabin. They saw the Black Panther Summoner and Li Wenbin at the deck. They were quarreling with Wei Guang.

"We don't have much time left. If they lose their way, they can surely catch up with us soon based on the trails we've left behind. If something were to happen to them, it's pointless to go and look for them. We're not inside a sunny garden. Every extra day spent here will only endanger everyone's lives even more," Wei Guang said solemnly.

They were in the middle of an argument. Wei Guang showed no room of negotiation.

Yan Lan whispered to Mu Ningxue, "The trio who went out to explore the route haven't returned yet. Wei Guang sent another person to find the route. He doesn't intend to wait for the three to return."

"Let's go over there," said Mu Ningxue.

When the Black Panther Summoner saw Mu Ningxue walking toward them, he looked at her as though she could save him. He explained the entire situation.

"I'm the leader. I'll decide how to go there. You don't have to seek advice from her," Wei Guang said coldly.

"The Magic Association is the one that recruited me. If you don't want to become the leader of this team, you may go back now. I'll finish the remaining route by myself." Mu Ningxue refuted.

Chapter 2908: Revolted Wind Element

When the others heard her words, they stared at her. Even Wei Guang was stunned.

Mu Ningxue had not spoken much throughout the journey. Wei Guang had assumed that she was willing to leave everything to him so that he could complete his recruitment task assigned by the Five Continents Magic Association Alliance.

Nobody had thought that she would refute him in such a straightforward manner.

'Is this how young people communicate as a team?' Wang Shuo shook his head in resignation.

Wei Guang made all the decisions by himself without discussing things with others. Meanwhile, Mu Ningxue's words were equivalent to telling him to get lost if he wasn't willing to do the job he was supposed to do.

Wei Guang was a Forbidden Mage. The way Mu Ningxue talked to him did not show the slightest hint of respect. It was as if this Forbidden Mage was no different from others who had gone against her.

Wei Guang looked troubled. He was arrogant, so he naturally felt embarrassed when she put him on the spot before the crowd.

"Senior, I believe what Mu Ningxue meant was that we should work together in Extreme South Forbidden Land. We are in the same boat, and we are a team. We can't simply leave behind team members." Yan Lan quickly tried to ease the atmosphere.

"I'll send someone to look for them. You have to go forward with the Ice Wheel Flying Boat. We must delay no more!" Wei Guang held his anger back.

"I want to wait for them," said Mu Ningxue.

"As I mentioned earlier, I'll assign someone to search for them. I'll either bring them back alive, or carry their corpses back, will you be satisfied with that?" snapped Wei Guang.

...

A mass of twilight clouds condensed behind them. The twilight was different from usual. It was so dark as if an invisible hand gradually pressed against them from behind.

The sun shone brightly on the road ahead of them. The sunshine spread across the white glacier world. It looked holy and solemn. The sight was majestic and magnificent.

The mass of twilight clouds slowly caught up with them. Danger crept in. One could tell that Wei Guang was very particular about time.

Before departure, he had not expected the Extreme South Land to be so much worse than his expectations. As they progressed, he realized the journey was much more challenging and consumed more time than he had anticipated.

The shortcut was a crack in the glacial mountain range. The crack started from the Byzantine Mountains all the way to their destination. The glacial crack was so huge and wide that it spanned more than ten kilometers. It resembled a small plain or valley. It was the narrowest area. It was dark, deep, and gloomy like a cave.

The Ice Wheel Flying Boat would most likely get struck halfway and would not march forward.

After they entered through the crack, there was a green river. The water flowed very slowly. There were hardly any ripples on the surface.

Some of the shattered pieces floated on the river. They were curious as to why the water did not freeze. 'Could it have a higher freezing point?'

The Ice Wheel Flying Boat sped up and soon traveled another five or six kilometers. The river was not as calm as it appeared to be. Some translucent figures gathered near the Ice Wheel Flying Boat. They moved like ghosts. Mu Ningxue and her group could not see their true form clearly as they swam under the water. However, they sensed an intense bone-chilling coldness surrounding the Ice Wheel Flying Boat.

“It’s the Phantom Demons!” Wang Shuo was shocked and shouted at others with a great sense of urgency.

Wei Guang had noticed the Phantom Demons under the water long ago. A reddish-brown fire pattern appeared between his brows. His gaze turned razor-sharp. A dark-purple Holy Flame appeared on the river.

The Holy Flame resembled a monster with an enormous mouth. It engulfed the Phantom Demons hidden under the water. The Phantom Demons were so scared that they fled. Many of them rushed out of the ice water and crashed against the surrounding ice cliffs. Most of them were destroyed by the Holy Flame and reduced to ashes.

“Trash!” Wei Guang snorted disdainfully at those creatures.

Normally, Fire Element magic power would be suppressed under such an icy environment. However, Wei Guang could melt the glacial river by casting a random spell.

The Ice Wheel Flying Boat continued to move forward and reached a narrow place inside the crack.

The sunlight shone on the ice wall that was a hundred meters above the land. The rays refracted and reflected on the ice wall opposite it. It repeatedly refracted and reflected until it rested on the river inside the cracks. The light was no longer incandescent but turned into something strange and dark green.

The air inside the dark green crack was dirty, making one struggle for breath. The icy cold wind blew from the front. The river water stirred up. The Ice Wheel Flying Boat did not move forward. Instead, it slowly moved backward.

Wei Guang’s assistants were Wind Element Mages. They tried to manipulate the direction of the wind. The moment they cast a spell, the terrifying wind struck them back and smashed them against the crack.

The crowd was shocked. ‘What sort of strange wind was that? It was so powerful that it forbade the Wind Element Mages from casting their spells!’

Even though Wei Guang was a Forbidden Mage, he could not do anything in this situation. All he could do was to recover the Mages who had been swept away by the wind.

Mu Ningxue was also a Wind Element Mage. She sensed the weirdness within the icy wind inside the crack. She closed her eyes and tried to communicate with the restless wind elements.

The Wind Element inside the crack was very strong. If they cast Wind Element magic spells under such an environment, the effect of the strength would increase by multiple folds. ‘But why did the Wind Element Mages suffer a backlash?’ Although the Wind Element was pure and strong, it was amiable.

Mu Ningxue framed a constellation inside her mental state. She tried to shape Wings of Sail for the Ice Wheel Flying Boat with the Wind Element. However, when she drew the Wind Element to her side, all of the Wind Element attacked her.

She reacted swiftly. She glided backward. When she left the deck, Mu Ningxue noticed the outline of a strong arm made up of gale in the middle of the strong icy wind. It struck the deck ruthlessly!

Everyone was stunned. They did not know what creature was attacking them. Just when they were about to fight back, the wind arm turned into a wisp of breeze and blew past the Ice Wheel Flying Boat.

“What’s going on? Did you see the thing that attacked you?” Wei Guang asked urgently.

“There are demon spirits inside the wind. They controlled the Wind Element. When the Wind Element Mages cast the spells, the demon spirits transformed the Wind Element into a violent spirit and attacked the Wind Element Mages,” explained Mu Ningxue.

The Wind Element was not neutral anymore. It had an aggressive side!

“Is that possible? Can’t we share the elements? Can someone actually cause the elements to revolt?” Li Wenbin asked in surprise.

“When you reach the Forbidden Curse level, you’ll find out that the elements cannot be shared,” said Wei Guang.

Chapter 2909: Ice Elf Queen

Wei Guang’s words enlightened Mu Ningxue. She attempted to use her ability to control Ice Element to get rid of the Wind Element’s aggressiveness.

Soon, the air was filled with ice and snow. They were already in an icy cold world; thus, she could easily condense her Ice Element magic. If she cast a stronger spell, she could freeze the Ice Valley of the Wind.

“The method works! The wind is no longer as strong as before!” said Li Wenbin.

The Ice Element Mages stared at Mu Ningxue in confusion. They had difficulty even in controlling Ice Element in this region.

The Ice Element here was much more aggressive than the outside. They had to exhaust tremendous mental energy to make the element obey them so that they could manipulate it according to their will. The Ice Element here could not be shared with others. The nature of the Ice Element was aloof and arrogant. It refused to obey the Mages from outside of the Extreme South Land.

However, it worked differently for Mu Ningxue.

“Is this related to your natural talent? Do you have a special affinity to the Ice Element?” asked an Ice Element Royal Mage.

“I suppose so.” Mu Ningxue was not certain either.

They had finally solved the revolting Wind Element issue and cleared up the road.

Someone behind them shouted before the Ice Wheel Flying Boat traveled far.

Wei Guang's men had found the missing Mages and brought them back. Mu Ningxue saw the snow-white panther. It carried an unconscious Mage on its back.

Yan Lan and several people from logistics carried them to the cabin. They treated the White Panther Summoner. Strangely, the unconscious Mages were not injured, yet they had fallen into an odd state of unconsciousness. Their skins had frozen and were as hard as granite. They radiated a stiff and icy cold necrotic gas.

Yan Lan and her group left the Clear Fire Formation to the wounded Mages. Wei Guang questioned those who were still in good condition. They told him that they, too, had no idea how they were attacked. They did not see the creature. They had fainted and become lost in the middle of the refraction of light, suddenly.

"The refraction of the light inside the crack doesn't play an important role in this situation. There's no need to scout ahead anymore. Those who are off duty can take a good rest. Meanwhile, those who are on patrol duty must stay alert. Anything can happen in this haunted place," said Wei Guang to the crowd.

...

Elements could not be shared.

The words had inspired Mu Ningxue. Her Ice Element supernatural power was capable of crushing all her enemy's Ice Element magic. She had absolute control over her Ice Element in this place.

However, her power could not stop her enemy from using the Ice Element magic to attack others. 'Could she strike an effective blow against her enemy if she tried to control the Ice Element herself, or even cause it to revolt like the Wind Element inside the narrow valley that had become aggressive and lashed at them?' Mu Ningxue certainly wanted to give it a try.

In the Absolute Forbidden Realm, she had to make the Ice Element obey her. All other humans and creatures who had the wishful thinking of casting their spells in this environment suffered a violent backflash.

If this were the past, Mu Ningxue would not have had such strong control over the Ice Element. After all, only those who had achieved the Forbidden Curse could control the elements so absolutely.

However, after she tried to reverse the trajectory of the Star Sons in the New Star Bridge, Mu Ningxue had gained a more powerful ability, which was her absolute affinity for the Ice Element.

In the past, the mages had to draw astrological signs on their bodies as a guide to complete a single magic with the help of various elements between heaven and earth. But for some reason, the Ice Element magic appeared on Mu Ningxue's palm without having to construct any Star Pattern, Star Constellation, or Star Palace.

She no longer required the help of the Star Sons as a medium of communication with the elements. All she needed was to connect with her mind.

Moreover, 2401 Star Sons had transformed into a Star Bridge. It was unlikely that they would transform into a Star Palace. They marched into the Star Sky Bridge through the Star Domain.

Mu Ningxue sensed a drastic change in her Ice Element power. She felt as if everything had become new to her. She had to explore and practice more!

The Absolute Forbidden Realm: Rebel Element

Bearing this in mind, Mu Ningxue quickly put it into practice. She cast the Absolute Forbidden Realm and let the Ice Element Mages on the Ice Wheel Flying Boat cooperate with her.

Li Wenbin and Wang Shuo glanced at Mu Ningxue in confusion. They wondered how she could focus on practicing her cultivation in such an environment. 'Shouldn't she practice it in the city instead?'

"What levels of magic do we use? Do we cast a Super-level or Advanced magic?" asked the Royal Mages.

"Advanced will do," said Mu Ningxue.

"I'll use Icebound Coffin, then," said a man in a brown bear cap.

He articulated the Star Orbit and drew the Star Pattern. An Advanced Ice Element Star Constellation surrounded the man in the brown bear cap within a few seconds. At the same time, thick pieces of crystals that resembled white steels condensed above his head.

However, the man in the brown bear cap's expression changed as soon as he noticed the appearance of the condensation of the crystals. The next moment, he felt as if something had struck his chest, and he moved a few steps backward.

His legs and chest froze. Even his arms began to freeze. The Icebound Coffin did not appear above his head or attack the target. Instead, the Icebound Coffin had frozen and trapped him inside!

The man with a brown bear cap was shocked. He quickly stopped his magic. He then turned to Mu Ningxue in disbelief.

Mu Ningxue remained motionless. She merely watched the changes on his body.

"The Ice Element backlashes!" The man in the brown bear cap exclaimed.

He had never felt like this before. Even though the Ice Element in the current environment was unfriendly, if he focused on maneuvering it, he could still do regular magic. Even the Ice Element had revolted against him!

The man in the brown bear cap was also a Wind Element mage. He had already suffered a backlash from the Wind Element a while ago.

"How did you learn to possess the element by yourself?" Wei Guang walked over to her. He looked equally surprised.

Wei Guang did not show interest in this type of practice usually. However, after witnessing the Ice Element backlashing against the mage, he was curious.

"How does it work? Does this mean that if she's around, the Ice Element Mages cannot cast the spell, and if they insist on casting the spell, they will be attacked by the element?" The other Ice Element Mages asked in surprise.

They did not quite believe this. They tried to cast an Ice Element spell themselves.

Very soon, they realized that even if they cast the lowest level of Ice Element spell called the Ice Spread, they were still attacked by the Ice Element.

This was too much! Most people said that the mages were slaves to the elements.

But Mu Ningxue was more like an Ice Elf Queen who could control the Ice Element unconditionally.

Chapter 2910: Extreme South Graves

They had to admit that certain people were so powerfully gifted in the field of magic that they made others jealous.

The team had to confront the terrible weather. Those who had little leisure time did not bother to improve their own strengths.

But Mu Ningxue was different. She observed the situation. She changed her cultivation path with a new mindset that no one else bothered to try.

In fact, she had surpassed her peers. This was because she never stopped practicing her cultivation!

The crowd envied Mu Ningxue's new ability. Her ability made her undefeatable before the Ice Element Mages. Before the Ice Element Mages cast their spells, they had to obtain her approval first, otherwise the Ice Element would rebel!

"Unfortunately, this ability is still far inferior to God's gift. It can indeed suppress the spell below the Forbidden Curse, but it's just a very ordinary ability in Forbidden Curse level," said Wei Guang, shaking his head.

"Wei Guang, not everyone can become a Forbidden Mage. It's considered rare to have someone of Mu Ningxue's age achieve apex-grade in Ice Element, as well as possessing such a mystical Ice Element ability." Wang Shuo chuckled.

The Forbidden Curse was bound by the Forbidden Curse Convention. It dictated that the Forbidden Mages would not involve or take part in any secular matters. The ability Mu Ningxue had mastered was supreme. They could not always measure her power from a Forbidden Mage's point of view.

"Extreme South Land is a forbidden land. Even Forbidden Mages have difficulty surviving in such an environment. You are aware that the world is in the middle of various disasters, and the Forbidden Curse is the only spell that can truly make a difference in this world. Who are you to say that you can control your own destiny, unless the disaster directly befalls you. Are you seriously thinking that we're living in a peaceful era? Do you think you can still sleep in peace in the city and organize some useless magic academic debate?" Wei Guang snorted at Wang Shuo.

"You're right. We're just a few grains among the sand. The waves can easily sweep us away. Meanwhile, you're the boulder that can stand firmly in the middle of the flowing stream and can even split the stream water," said Wang Shuo sarcastically.

...

After they passed by the Great Rift, Wang Shuo looked uneasy.

The previous areas were just the edge of the South Pole. This time, they had come to the real forbidden land.

After traveling for a few kilometers, the Ice Wheel Flying Boat had faced a serious issue. All the parts and machinery were frozen to the point that they could not operate anymore. Several Mages had to cast spells at the same time for the Ice Wheel Flying Boat to move on the thick ice surface.

The ice surface was uneven and jagged. The wind from the Great Rift swept over to them again. The wind filled the place and blended in with the terrifying ice and snow. They formed a frightening ice thunderstorm. Wei Guang and his group found themselves unable to move even an inch forward.

The Ice Wheel Flying Boat was their only refuge. It did not take long before the Ice Wheel Flying Boat was frozen in place and turned into a stone statue. It became a part of the surrounding glaciers.

The speed at which everything froze was faster than their ability to break free from it. Just when they thought they had finally avoided the “cleansing” of the ice field thunderstorm, they were terrified to find themselves frozen in the middle of the ice range of such thickness.

“Hurry up! We have to break the ice. Otherwise, we’ll be trapped inside here forever!” Wang Shuo cried out.

The cabin was filled with frost. Several Mages curled up under the quilt. No matter how the rest tried to wake them up, the Mages slept like a log

This was very dangerous. Sleeping like a log in the icy cold land was no different from death. Wei Guang and his group had to wake the mages up before their vital organs stopped functioning.

“How’s the Clear Fire Formation?!” asked Wei Guang.

“It’s not working. It’s difficult to break the Ice Wheel Flying Boat free. Call the rest. We must try to break the ice together!” shouted Li Wenbin.

“Damn it! Without the Clear Fire Formation, all of us will die in agony!” Wei Guang said in annoyance.

“After breaking the ice, we’ll return,” said Wang Shuo.

“Impossible. We have to continue moving forward until we arrive at South Pole Station,” said Wei Guang firmly.

They woke everyone up and started to break the ice.

The ice was extremely thick. It was much harder than the rocks under the ocean. Everyone took turns to cast spells. Even so, they were exhausted.

“Transform into dust!

Mu Ningxue cast the Absolute Forbidden Realm spell and transformed the solid ice into white ice dust. The next moment, a lengthy crack appeared on the massive frozen mountain range. They even saw the light of dusk from afar.

However, the speed of the condensation of the ice field thunderstorm was terrifying. The crack regenerated within a few seconds. Before the Ice Wheel Flying Boat could travel even a little, it was covered by thick ice and snow. The area where the Ice Wheel Flying Boat had been a while back had condensed into an ice mountain range!

Icebound!

If the scary Icebound was a type of magic, the power of the Icebound Coffin in the Extreme South Land had increased more than a thousand-fold. The magic could create iceberg graves on the land and bury Mu Ningxue and her group alive!

The graves continued to pile up and expand. The people trapped inside had to keep running and digging, or else, they would be trapped under the graves forever. They would not be able to see daylight again.

There were too many ancient experts trapped in the Extreme South Land. Some of them had been ruler-level experts. Even so, they could not escape from the clutches of these glacial grim reapers!

The wind blew the snow toward them. The strong wind solidified the snow. As a result, it hardened in the middle of the cold weather. If one were to look down from the sky, one could see the swift bulging of the ice mountain range on the land.

It was a glacial mountain range. It had been created miraculously in just a few hours. It meant a true disaster to the creatures on the ice land.

The Ice Wolf horde lived outside the Great Rift. They had been preserved in the newly risen ice veins, like fossilized specimens.

Likewise, a flock of flying Aurora Snow Birds was as still as a painting. They had been carved on a cliff several meters in height.

A Giant Ice Beast struggled furiously in the middle of the glacial thunderstorm. It was very strong and powerful. Whenever it charged at the ice rock that was several hundred meters thick, it shattered the ice rock into powder. Still, the glacier graves slowly engulfed its powerful body and made it a part of the ice vein...

Regardless of whether it was a living being or the snow land, those that did not condense into ocean water would freeze, including the space!

It had been a very spacious plain before. But now, the arrival of the ice field thunderstorm had created several terrifying glaciers. Frozen graves that spanned up to hundreds of kilometers rose from the ground!
