

Won't Play 599

Chapter 599: Purple Frost Stone

His vision turned black and then lit up.

Jiang Beiran arrived at a mountain range.

'Phew... Being stared at by an old man with his spiritual sense really gave him goosebumps.' Jiang Beiran thought to himself with a sigh of relief.

Although the big families did not lack money, they did not do charity either.

Moreover, because the temptation inside the Golden Cauldron Island was too great, in order to prevent some disciples from not handing over the precious materials they had obtained on the Golden Cauldron Island, the Interspatial Ring that everyone carried was given by the "official" before they set off.

For example, Jiang Beiran's Cosmos Rings were all given to him by the Shi family, so he had to report everything he wanted to bring.

When they came out of the Golden Tripod Island, the Shi family would check the Cosmos Rings one by one. Except for the items that they had reported, they would have to hand over the rest of their gains.

Just now, Shi Yangxi had used her mystic conscious to scan him more than once on the path Shi Yangxi had brought him to the door, just to make sure he didn't bring any extra Qian Kun rings.

This was not just because Jiang Beiran was an outsider to the Shi family, but because every sect or family that allowed their disciples to enter Golden Cauldron Island had to follow this rule, regardless of whether they were direct descendants or collateral relatives.

Otherwise, how could the disciple who found the Earth Grade magic treasure last year obediently hand it over? Trust between people?

That was impossible.

When Jiang Beiran finally heaved a sigh of relief, the rest of the team members had also appeared behind him.

Jiang Beiran looked around. Although he had no idea where they were, he could confirm that the distribution of Spiritual Qi and the composition of the environment were similar to the Mystery Dragon Continent. He could conclude that they had not been transported to any other world.

“Let’s go.”

Without much pause, Jiang Beiran’s team ran deeper into the forest.

It seems that there is indeed no one or thing here that can threaten me.’

After traveling through the mountains for half a day, the system notification did not pop up even once. This was enough to prove that nothing unexpected would happen at the moment.

After confirming that there was no threat, Jiang Beiran stopped running around. He set up a silent formation that could suppress sound and said to Shi

Jiamu, “Follow the plan.”

“This one?” Shi Jiamu pointed at the tall mountain in front of her and asked.

“Yes.” Jiang Beiran nodded.

“Got it. ”

After saying that, Shi Jiamu punched the mountain wall.

Then, with a loud bang, the entire mountain was pierced through, revealing a long passageway.

Precise control of strength, as expected of a genius.'

"Bring them in first."

"Alright." Shi Jiamu agreed and led the team into the mountain.

Shi Fenglan, on the other hand, stayed with Jiang Beiran and asked,""Little Bei Ran, is there anything I can help you with?"

"I need you to go in with me."

"Oh

Shi Fenglan pouted and followed the group into the mountain.

After everyone had left, Jiang Beiran set up the Earth Spirit Array, which could detect intruders, the Fog Array, which could hide the mountain, and the Yang Defense Array, which could defend against Celestial Chi attacks.

That's right, Jiang Beiran intended to use this mountain as his base camp.

Jiang Beiran had not only come here to win the championship, but also to find out what was guarding the island. Therefore, a fully functional base camp was still very important.

Jiang Beiran returned to the mountain after setting up the array formation. He found that the mountain had already been dug out with large holes that could accommodate people. It could be considered as a "renovation".

Seeing Jiang Beiran walk over, Shi Jiamu, who was floating in the air and thinking about where else she could open a hole, landed on the ground and asked, "Uncle, is this enough?"

"It's enough for now." "Gather up!" Jiang Beiran shouted.

In the next second, the rest of the team gathered in front of Jiang Beiran.

"Ding Yuanzheng, Ji Zishi, Ni Guanyu, step forward."

"Yes, sir!"

The three of them responded and took a step forward.

"The three of you will be in charge of the first search."

The three of them were stunned at first, but they quickly accepted the reality and replied, "Yes, sir!"

Of the three, one was good at finding ores, one was good at finding herbs, and one was good at finding insect nests.

In this mountain map, there were definitely the most ores and insect nests everywhere. Although there were not many medicinal herbs, those that could grow in such an environment were generally top-grade medicinal herbs.

The other three were the most courageous in the team, so it was most suitable for them to carry out the first search.

After confirming the candidates, Jiang Beiran made three MiRan outfits for them to wear.

Although he had told Shi Weiyi before that this thing was given to him by his master, he should not have a second one. Therefore, he only brought the materials to make the MiRan, and there was no finished product. The treasure only had cloth and mystic patterns written on it.

Jiang Beiran was not worried about whether these team members would spill the beans.

He had almost "tamed" these team members and taught them what to say when someone asked. Moreover, the system did not give them an option for this, so there would definitely be no problem.

After the three of them had put on their clothes, Jiang Beiran reminded them, "'11 say it again, don't get distracted, remember?"

"I'll remember!" The three of them looked at each other and nodded seriously.

Vanish's effect had never been to become invisible, but to make one's "presence" disappear completely.

So as long as he kept staring at the person in plain clothes and did not look away, he would be able to see him. However, once the clone looked elsewhere, he would lose his target when he came back to his senses.

"I will accompany you the first time so that you can get used to it.."
