

Worth 1191

Chapter 1191 was home

The words left behind a group of silent people. Wang Baole's long hair fluttered in the wind, and his long robe fluttered in the wind as he walked further and further away.

Every step he took created ripples, as if transforming the starry sky into a lake. Wherever he passed, Dao charms spread out from his body, and one could vaguely see a dao star that contained supreme laws spinning above his head, the nine dao stars that were slightly smaller in size around him were spinning at the same time. There was also... the shadow of seventy percent of the tens of thousands of stars that had turned into stars that were faintly discernible around him.

All of this was reflected in the eyes of the cultivators from the purple gold civilization. They had an illusion that they weren't seeing a cultivator, but a vast expanse of starry sky.

This scene caused everyone's hearts to tremble violently. The same was true for the purple gold grand ancestor. Without a doubt, that sword strike was too shocking, and the figure was too detached.

This made him have no choice but to face up to what Wang Baole had said earlier. He wanted to give the purple star civilization a chance to prosper. He understood that the so-called prosperity was only a relative term. The goal... was to allow the purple gold civilization to integrate into the Solar System and become a vassal.

However, even if it was a vassal, once the Solar System Rose, it would indeed be considered a great prosperity for the purple gold civilization.

If it were any other time, the purple gold civilization would not have considered this matter. However, now that war was about to break out, this caused the purple gold patriarch's heart to waver even more. In the end, what shocked him like a bolt of lightning exploded in his heart, it was not the sword attack that Wang Baole had used to display his strength. Instead, at that moment... Wang Baole, who was far away, waved his hand, and a ferocious beast appeared beside him!

In other words, it wasn't a ferocious beast, nor was it a spirit beast. It was a mutated beast.

This beast was... The donkey. After being summoned by Wang Baole, it sat on the donkey. As it raised its hand, wisps of Heavenly Dao Aura belonging to the dark sect spread out. It was treated as food and thrown to the donkey, then, it summoned the aura of the Unending Heavenly Dao and threw its food at the donkey as well.

The donkey was overjoyed as it threw food at the donkey. It stomped its four hooves and ran forward happily, bringing Wang Baole further and further away.

Even after it had completely disappeared from the eyes of patriarch purple gold, the waves of emotions in Patriarch Purple Star's heart continued to churn. His eyes continued to shrink, as if he had seen a ghost. He even suspected that he had seen wrongly.

"Eating... eating... the power of the Heavenly Dao? The Heavenly Dao of the dark sect, the Endless Heavenly Dao... Heavens, what is this strange beast?"

“Could it be... could it be...” patriarch Violet Gold’s heart was pounding, and he had a bold, almost wild, idea that kept exploding in his mind.

After a long while, he gritted his teeth, and like a donkey, he made up his mind. His eyes shone with determination, and he immediately led everyone back to the violet gold civilization, he gathered all his disciples and the upper echelons of the purple gold civilization and began a secret discussion that would determine the future of the purple gold civilization!

At the same time, Wang Baole, who was already far away from the purple gold civilization, lowered his head and looked at the happy donkey. He shook his head and smiled. He had taken out the donkey on purpose.

It wasn’t that he couldn’t take down the purple gold civilization by force, but it was meaningless. The purple gold might seem big, but it wasn’t worth it for him to do so. It would be best if he could let the donkey fuse with him on its own.

That was why he had casually invited the donkey to fuse with the purple gold civilization. That was why he had made a move to intimidate the donkey. That was why he had summoned the donkey with his divine thoughts.

The only thing that could eat the power of the Heavenly Dao... was the Heavenly Dao.

Wang Baole had eaten the donkey as well, but his image wasn’t as shocking as the donkey’s. After all, the Heavenly Dao was a black fish before Chen Qingzi had fused with it. The dark sect was a golden beetle.

It seems like it’s not a bad idea to raise the donkey into the Heavenly Dao. Wang Baole lowered his head to look at the donkey. The donkey noticed Wang Baole’s gaze and quickly turned back. When it saw Wang Baole’s smile, its heart trembled.

It could keenly sense that the owner who had released it this time was different from before. The smile made its hair stand on end, and it let out an “OH” to curry favor with him, it obediently changed the word “Son” to “Son.”.

“Let’s go home.” Wang baole patted the donkey on the head and closed his eyes. The donkey was now the donkey’s mount, but it didn’t dare show any negative emotions. It also didn’t dare think about the fact that it had changed from a pet to a mount, had it gone up or down.

However, it was still a little depressed. After running a few steps, it remembered that Xiaowu was still in its storage bag and couldn’t come out. Its attitude immediately changed. It was beaming with joy and joy.

It seemed to think that it was still useful. It made a few “Oops” and gradually increased its speed. In the end, perhaps because it had eaten too much of the Heavenly Dao Aura, its entire body sped up, it seemed to merge with the laws and rules, forming a faintly discernible thread that headed straight for... the Solar System.

The purple gold civilization was far from the Solar System, but in reality, they were all in the nineteenth region of the left Dao holy region. With Wang Baole’s cultivation back then, it might have taken him a few hundred years to reach that level. However, it was no longer necessary now.

The donkey's speed turned into threads that were similar to the laws of the universe. It only took about a month for it to traverse all the regions and reach the edge of the Solar System.

Only then did Wang Baole open his eyes. He stared at the familiar spiral of stars in front of him and at the stars that exuded a sense of familiarity. The instant he looked at the ancient bronze sword, the sword suddenly began to tremble.

As it trembled, the flames of the sun began to flicker. The cultivators from the vast Expanse Dao palace within the ancient green-bronze sword were shocked as well. All the Patriarchs who had gone into seclusion opened their eyes, their faces filled with shock.

The star cultivator Qing Lingzi, who had been secretly involved in the federation's affairs and had been hunted down by Wang Baole, had his physical body destroyed. His soul had been weakened and his injuries were even worse than before. Now, he opened his eyes, and his eyes were filled with shock and uncertainty.

His Master... The Galactic Realm Almighty known as the Exalted Star Wing, had also opened his eyes from his meditative state. He stared at the ancient green-bronze sword in shock. Then, he scanned the entire solar system with his supernatural awareness, and finally, he scanned the outside world, when he scanned Wang Baole, he didn't notice anything at all..

His injuries are too severe. However, in Wang Baole's eyes, the exalted star wing, who had needed him to use many trump cards in order to force him to compromise, could now see clearly. From the ripples on his body..., he had once been at the late-stage of the galaxy. Now, he was only at the early-stage.

However... the ancient green-bronze sword from the Vast Expanse Dao palace was becoming more and more extraordinary. With Wang Baole's current knowledge and spirit, he could clearly sense that the level of this ancient green-bronze sword... was extremely high!

"The ancient universe weapon!" Wang Baole muttered. The intrinsic scabbard in his body vibrated, as if it was emitting waves of desire. The same thing happened with the ancient green-bronze sword. It was as if Wang Baole could return it to its scabbard with just a word!

Wang Baole stared at it for a long while before he retracted his gaze. A trace of dao charm emanated from his body, causing the divine sense of the winged star Lord, who had been sweeping past him, to instantly sense it. He stared at it, and when he sensed Wang Baole, he clearly felt a ripple, it was obvious that he could see Wang Baole's cultivation level, and the shock was intense.

Wang Baole smiled and nodded. He cupped his fists and bowed.

After a short period of silence, the cultivators from the vast dao palace around the winged star Lord on the ancient bronze sword who were recuperating immediately saw in shock that their supreme patriarch had stood up from his cross-legged position and was facing a direction in the starry sky, he returned the greeting with a bow.

After exchanging greetings, Wang Baole didn't speak. Instead, he averted his gaze and looked at all the planets in the Solar System. Finally, his gaze landed on Earth.

Reminiscence and warmth appeared in his eyes. The smile on his face was the same as before, but there was a faint warmth to it.

"We're home," Wang Baole muttered. He stroked the donkey's fur. The donkey could sense Wang Baole's thoughts. In a flash, it brought Wang Baole into... the Solar System.

Chapter 1192, Wang Baole

If he didn't want anyone to know about Wang Baole's return, there was no one in the Solar System who could detect him at all. This didn't mean that Wang Baole's cultivation had reached an extremely high level, it was because the intrinsic scabbard in his body contained too much power from the Heavenly Dao.

At the same time, the main source of power for his physical body to advance to the star domain was the intrinsic scabbard's absorption of the Heavenly Dao. That was why his physical body could be considered a dao body.

Even the only celestial domain-grade patriarch in the vast Dao Palace, the exalted star wing, wouldn't have been able to detect Wang Baole if he hadn't intentionally released his dao aura.

That was how it was now. No one knew that Wang Baole had returned. Wang Baole let the donkey move about on its own. Then, he went to Earth, to ethereal city, and to his home... in the city.

His parents, due to Wang Baole's status, were extremely aloof in the federation. They lived in an ordinary-looking place, but they were closely guarded and nourished by various spirit herbs, that was why even though the two elders didn't have much aptitude for cultivation, they were now at the core formation realm, and their lifespans had increased significantly.

They even looked much younger on the outside. At the same time... There was a young girl in their home.

The young girl looked to be about seventeen or eighteen years old. She was tall and slender, and she looked somewhat similar to Wang Baole's parents. The bloodline fluctuations in her body caused Wang Baole to pause for a moment after he scanned her.

"This..." Wang Baole had a strange expression on his face. Ever since he had returned from the nine serenities realm, the smile on his face had changed for the first time. He blinked and muttered to himself.

This old couple... I haven't seen them for more than ten years, and they've created a younger sister for me... The bloodline fluctuations in the young girl's body were of the same origin as Wang Baole's. It was his younger sister.

However, her hair had been dyed red and green. Her clothes were also in a punk style. Wang Baole couldn't help but frown when he saw her.

At that moment, in the house, Wang Baole's younger sister was lowering her head, looking impatient. She had been reprimanded by Wang Baole's mother, as if she was being disciplined because her younger sister was too playful.

After a long while, loud noises could be heard, and the discipline ended on bad terms. As the door was opened, Wang Baole, who was standing at the door, looked at his younger sister and walked out angrily. He slammed the door back and left in a huff.

She couldn't see Wang Baole, so she naturally didn't notice that Wang Baole was frowning even more tightly. Wang Baole also noticed with his divine perception that there were three to five young men and women around the same age as his younger sister outside the courtyard, each of them was riding a spirit stone-powered trolley and whistling. With the wave of his younger sister's hand, a group of people sped away.

Wang Baole shook his head and ignored them. After tidying up his clothes, he raised his hand and knocked on the closed door.

Inside the room, Wang Baole's mother was similarly filled with anger. As for Wang Baole's father, he made a cup of hot tea and drank it as he tried to persuade her.

"Baoling, this child. Even though she's a little willful, her nature isn't bad..."

"Shut up. It's all because you don't discipline her. Look at her every day. She makes me worry!"

"Fine, fine, fine. I Won't Say Anything." Wang Baole's father shrunk his head.

"And you. You only know how to get compliments every day. You've been flattered for more than ten years. Aren't you tired? And that Little Bastard Baole. I haven't heard from him since he left. He's making me worry!"

Wang Baole's mother was reprimanding him. When she heard the knocking on the door, she was stunned. Wang Baole's father's eyes immediately lit up. They knew very well that the surroundings of the place where they lived., there were people guarding the place at all times. Anyone who came to visit would be informed in advance. There wouldn't be such a sudden knock on the door.

Even the current Federation president, Zhao Yameng's mother, Wu mengling, had arrived. There was no need to mention anyone else. Therefore, the only abnormality in the past ten years had immediately made Wang Baole's parents wary.

"Who is it?" Wang Baole's father took out a jade slip and tried to send a voice transmission. After finding that there were no problems, he stared at the door.

Wang Baole's mother was also rapidly forming hand seals. Instantly, the array formation in the house was activated. However, just as the two of them were on guard, a gentle voice that they were extremely familiar with came from outside the door.

"Dad, Mom, it's me... I'm back."

Wang Baole stood outside the door. Even though he could enter directly, he still chose to knock on the door. As soon as the words left his mouth, the door in front of him was instantly opened. Wang Baole's parents stood there, they stared at Wang Baole in a daze. At first, they were in disbelief, but soon, they became excited, and tears flowed down their cheeks.

"Baole..."

Looking at his parents, Wang Baole felt extremely guilty. Ever since he had entered ethereal dao college, the time he had spent with them had been very short. Furthermore, every time he went out, it had been more than ten years, or even longer. In terms of filial piety., wang Baole felt that he wasn't a filial son.

At that moment, warmth filled his heart. Wang Baole took a deep breath. He didn't enter the house immediately. Instead, he knelt outside the door and kowtowed to his parents, who were in front of him and were in tears.

Before he could get up, his mother had already rushed over and hugged him.

"It's good that you're back. It's good that you're back..."

Wang Baole's father wiped away his tears and walked over as well. He hugged Wang Baole and looked at the familiar yet unfamiliar figure in front of him. He forcefully nudged Wang Baole's head a few times, he turned his head and shouted at his wife.

"Old Woman, the child is back. Why aren't you cooking?"

When Wang Baole had not returned, his mother, who was still aggressive, had long forgotten the unhappiness from before. After pulling Wang Baole into the house, the smile on her face did not disappear, and she did not pay attention to her old man's words, she personally cooked, and soon, waves of fragrance spread. It was the red braised meat that Wang Baole loved to eat when he was young.

In the house, the father and son looked at each other. Wang Baole felt even more guilty. He realized that he had not returned for a long time. Now that he suddenly saw his parents, he did not know how to speak.

"Dad, I have an extra sister?"

"Baole, how long will you be staying here this time?"

After a few breaths of silence, the father and son spoke almost simultaneously.

Hearing his son's question, Wang Baole's father felt a little awkward. After all, without his son's knowledge, he had gotten him a younger sister. As a father, and at such an old age, he was still a little embarrassed.

Sensing his father's embarrassment, Wang Baole said with a smile.

"I won't be leaving for a while. In the future, even if I go out, I'll be back very soon..."

"Yes, you should have been like this a long time ago. How can the outside world be as good as home? And your sister... It's a headache. You should discipline her later." Wang Baole's father cleared his throat and changed the topic, he talked to Wang Baole about the changes that had happened in the federation over the past ten years. Overall, everything was developing in a good direction.

However, there were still some imperfections. Wang Baole had expected this. Before long, as the dishes were ready, the family of three sat together as they had done in the past. Under the warm gazes of his parents and the chatter from his memories., the warmth grew stronger, and the unfamiliar feeling that he had not seen for many years slowly disappeared.

Wang Baole was completely relaxed. As he listened to his parents' nagging, his gaze became gentler, and his emotions gradually eased. Finally, from the mouths of the two elders, he started talking about his younger sister..

"Baole, your father is right. That younger sister of yours, you have to discipline her properly. It's too outrageous! I even regret giving birth to her back then. It's too troublesome." Wang Baole's mother gave Wang Baole a large piece of meat, she said angrily.

Wang Baole smiled and nodded. He was also feeling a little emotional. In reality, he had not been prepared for the sudden appearance of his younger sister. He could not help but spread out his divine perception, instantly covering all the regions on Earth, he saw his cheap younger sister among the group of young men and women racing in the east of ethereal city.

Chapter 1193, Dao Rhythm and emptiness!

Late at night.

After reuniting with his parents, perhaps it was because Wang Baole had not returned for more than ten years, his parents' emotions had fluctuated greatly. Coupled with Wang Baole's current cultivation, even though he had tried his best to suppress his emotions.., it still had a certain effect on his surroundings.

This was similar to how Wang Baole had surpassed almost ninety-nine percent of the cultivators in terms of the level of life. To a certain extent, his existence was different from the Heavenly Dao, but it wasn't that great.

After all, his physical body was already a dao body, and his soul had reached the pinnacle of the stars. This was especially true for the tens of thousands of stars formed by his cultivation. Seventy percent of them had become stars. In the words of the federation, wang Baole's body contained the radiation of more than seven thousand stars.

This radiation allowed him to be superhuman, but it also allowed him to unleash his battle prowess. Just the pressure alone could cause all heavenly bodies within the range of his divine perception to collapse.

The intrinsic scabbard in his body was capable of shaking the Universe Sword of the Vast Expanse Dao palace as well as devouring the power of the Heavenly Dao. It was like the core of Wang Baole's cultivation, causing his level to increase greatly.

In fact... if not for Wang Baole's shocking true form, he wouldn't have been able to withstand it and collapse on his own. He wouldn't have been able to remain as he was now.

Therefore, he had to be very careful. However, it was inevitable that he would affect his parents, who were at the core formation realm. Even though he had reduced the impact countless times, it didn't take long for his parents to feel exhausted, they instinctively needed to sleep to recuperate.

Seeing that, Wang Baole waved his hand and his parents fell into a deep sleep. He gently sent the two elders back to their rooms. Wang Baole released his cultivation to strengthen and protect them. Then, he condensed a bit of his own essence, he fused it into the two elders' bodies.

There was only a tiny bit of the essence. It wasn't that he didn't want to give them more. It was that this tiny bit was the maximum that his parents could absorb.

After doing all this, Wang Baole returned to the room that his family had been preparing for him. Although he had never stayed in this room before, everything in it was the same as his childhood memories. Be it the stickers on the walls or the toys from his childhood., they were all filled with deep memories, causing Wang Baole's gaze to become gentler as he scanned the room.

"I'm home..."Wang Baole muttered. He touched his small bed. It was very clean. It was obvious that his parents had come to tidy up frequently. Behind the act of keeping it clean was the longing for his son's return.

Sitting cross-legged on the small bed, Wang Baole raised his head to look at the bright moon outside the window. He became calmer and calmer. At the same time, his body slowly emitted a dao charm that surrounded the entire room and spread outwards, causing the entire ethereal city to., at that moment, everyone fell into a strange state that no one could detect.

The Spirit Qi here was even denser. All the plants in the city were swaying, as if they were responding to something, but at the same time, they were cheering. Their growth speed was clearly increasing.

All the animals and insects trembled at that moment. They looked at the house where Wang Baole was located from afar. They seemed to have been enlightened, as if they were influenced by the Dao rhythm, and they all worshiped him.

Then there was the Spirit Qi. Ordinary objects that could not produce spirit qi seemed to have become extraordinary under the influence of the Dao rhythm. They released spirit Qi on their own, causing the spirit qi in ethereal city to gradually spread.

Wang Baole's Dao rhythm did not stop in ethereal city. It spread rapidly outwards, reaching ethereal dao college. It caused all the students in the college to increase their cultivation significantly that night, causing countless birds and beasts to., all of them fell silent.

On Upper Academy Island, a huge diamond ape, which had been sleeping, suddenly opened its eyes and looked at ethereal city. A look of confusion appeared in its eyes.

Under the student lake, countless large fish swam rapidly. They seemed to be extremely excited. In the depths... a huge snake, which had been hidden here for many years and was a thousand feet long, also emitted a glow of response. It opened its eyes and looked at ethereal city.

The dao aura was still spreading.

It spread throughout the ethereal dao college and the surrounding area, all the way to the Sea of beasts. It caused the countless creatures in the Sea of beasts to all tremble. In the depths of the Sea of beasts, a few beast kings were trembling, they prostrated themselves.

There was also the three moons group, a few sects, other dao colleges, other cities, and the presidential palace... Everything was changing.

However, even though the creatures themselves could sense this change, most of them seemed to have deliberately forgotten about it. They did not form any thoughts or thoughts of doubt in their minds.

It was as if... all of these extraordinary things were considered normal. Be it the Jin family patriarch who had reached planet level in the TRILUNARIS Corporation, Wu Mengling who was in the presidential palace, or the other powerful cultivators of the federation.., even the ethereal patriarch, Li Xingwen, and all the other cultivators didn't notice anything.

Wang Baole's Dao rhythm covered the entire earth. From Afar, the earth seemed to become hazy in the starry skies. It was dreamy and illusory. At the same time, traces of spirit Qi could be seen with the naked eye, spreading throughout the starry skies.

The range of the Dao rhythm continued to spread. It reached Mars, Lin You, Venus, fellow Daoist Gui, and other planets. Finally... it spread throughout the entire Solar System.

At that moment, the Solar System underwent some mysterious changes. As the changes spread, Wang Baole seemed to merge deeply with the Solar System.

He felt the life force of all the planets and the cheers for his arrival. He felt the friendliness from the divine eye star, the joy from the Sun, and the growth of all living things, he felt all the changes in the federation.

The sky-palm Elder was in seclusion, and the older generation of the Vast Expanse Dao palace was still recovering from their injuries.

Everything surfaced in Wang Baole's mind. At the same time, the feeling that he was part of the Solar System grew stronger. That was until Wang Baole sensed that there were three strange points in the Solar System.

One point, on Earth, one point, on Pluto, and one point... on Jupiter.

Rather than calling it a point, it was more accurate to call it three doors.

Three doors that could be stepped into or out. Before this, Wang Baole hadn't been aware of the three points in the federation. Now, as his dao aura filled the air, his mind was filled with thoughts.

The first thing he looked at was the point on Jupiter. It was a tiny vortex that was hard to detect. It existed in a cloud of fog. After Wang Baole focused his divine thoughts, his divine thoughts formed a shadow that stood on Jupiter, he stood outside the cloud of fog and scanned the area. His eyes were cold.

He raised his right hand and a wisp of sword Qi from his intrinsic scabbard appeared. It formed a gray bolt of lightning that shot towards the vortex. It entered the vortex instantly. When it appeared, it was in a place that Wang Baole had seen before, but had never been to before.

The place was filled with the remains of countless historical civilizations. It was like a rubbish dump. Deep within the endless ruins sat a woman. She opened her eyes abruptly, revealing a look of shock and astonishment, the lightning formed by the Sword Qi appeared before her, heading straight for her glabella.

The woman's expression changed drastically. She retreated rapidly and formed hand seals. Countless images of men and women appeared in front of her, resisting the Lightning together. Only then did she

manage to neutralize it. However, after the lightning formed by the Sword Qi was neutralized., wang Baole's words rang out from the federation's Jupiter, which was beyond the endless starry skies.

"Get lost!"

"Wang Baole? That's impossible!"The woman's pupils constricted, she was terrified. The vortex that she had left behind in the federation was something that even a celestial domain-grade cultivator would find hard to detect. It was one of her trump cards, and now, someone had used it to find her position

She was about to instinctively break the vortex, but she couldn't. That was because Wang Baole had already caught the vortex on Jupiter with one hand, sealed it, and stored it in his storage bag.

"Zi Yue..."Wang Baole narrowed his eyes and snorted. He had just returned to the federation, and he didn't want to leave so soon. He let Zi Yue go for now. However, the lightning bolt had locked onto him.

Wang Baole's Dao Shadow disappeared. In the next moment, he appeared inside Pluto. There was... a well.

He stood beside the well and sensed the waves of death aura emanating from within. Wang Baole was silent for a moment. He raised his right hand and pressed it against the well. A loud boom reverberated in the air. The well began to collapse, and a low growl came from within, a voice filled with anger rang out.

"Who dares destroy the eye of the Dark Sect's outer world? State your name. The Dark Sect..."

"Wang Baole!"Wang Baole said calmly.

As he spoke, the collapsed well fell into dead silence.

Chapter 1194, the fusion of Purple Gold!

A moment later, just as the well was about to completely collapse, a cautious, respectful, and complicated voice rang out from within.

"Greetings, dark child."

"Please forgive us, dark child. We will immediately sever our connection with the Dark Eye."

"I am not your dark child,"Wang Baole said calmly. He didn't give the other party the chance to continue speaking. With a flick of his sleeve, the well on Pluto collapsed instantly and disappeared without a trace.

He didn't stay any longer. Wang Baole's dao shadow dissipated, and when he reappeared, he was already on Earth. He was in the depths of the sea of ferocious beasts. Further down from the ruins he had discovered that year... There was a skeleton.

The skeleton was like a giant, submerged in the mud. Wang Baole's Dao Shadow appeared, and after looking at it for a while, he turned and left.

The seal in the ruins he had seen that year was originally perfect. However, with Wang Baole's current cultivation, he could already see that there were many passageways connected to the sect that Li Wan 'Er had gone to.

He had thought that all of them had been sealed, but in reality, there was still one point that hadn't been sealed.

However, that was no longer important. It didn't matter whether the seal was sealed or not. Wang Baole thought of the promise he had made over forty years ago, so he decided to leave it behind. As the Dao Shadow disappeared, his true form opened his eyes on the small bed in his house.

This time, the Dao rhythm spread out. It was different from the spreading out of the divine sense. The divine sense only looked at it, but the Dao rhythm fused with it. It transformed into the entire solar system, allowing him to see too many of his old friends and sense the thoughts of all living things.

Zhao Yameng's cultivation was increasing rapidly. Zhou Xiaoya was still elegant, and her cultivation had also reached the spirit realm. Liu Daobin, Lin Tianyou, and Du Min were also there.

However, other than Zhao Yameng, the rest of the increase in cultivation was limited.

I wonder how Zhuo Yifan and Kong Dao, who are in the same sect as Li Wan 'er, are now. Wang Baole shook his head. This time, when his dao aura spread out and fused with the solar system, he could also sense some undercurrents within the federation.

These undercurrents mostly revolved around the authority of the Federation. At the same time, a portion of them were secretly supported and supported by the God's eye civilization. This resulted in the federation's current environment being generally peaceful. However, conflicts and conflicts were constantly appearing in secret.

However... These weren't important to Wang Baole.

There couldn't be only one voice anywhere. As long as it was a place where intelligent creatures gathered, there would definitely be intrigue and strife. There would definitely be competition.

To a certain extent, this was a good thing, but it could not go beyond a certain limit.

And now, the undercurrent that the god's eye civilization had secretly supported was trying to cross this limit. This matter... made Wang Baole's eyes shine coldly.

Scheming against my sister

Wang Baole was decisive in killing in the outside world, and no matter what he did, there would be no ripples. He was a ruthless person to begin with. He was ruthless to others and even more ruthless to himself. Therefore, even though the federation was his hometown., however, if someone tried to cross his bottom line, he would not show any mercy just because the other party was weak.

His parents did not know, and even many of Wang Baole's old friends did not know. However, there were some things that he could clearly see as Wang Baole's dao charm spread.

There was indeed someone who was scheming against his younger sister, and their target was him. This scheming increased the rebellious behavior of the little girl, and at the same time, it constantly changed

the companions around her, it was an attempt to find someone who could attract her, so that they could form an intimate relationship.

Regardless of whether it was a hint from the divine eye civilization, an order, or an individual's thoughts and schemes, as long as there was a beginning, it had already offended Wang Baole's murderous intent.

At that moment, in his eyes, he could clearly see that on a road in the eastern district of ethereal city, more than a hundred spirit stone motorcycles were roaring. There were young men and women inside, and they were racing against each other, they would occasionally let out strange cries, looking very happy and arrogant.

The fastest among them was his cheap younger sister. After reaching the finish line, there were more than twenty youths beside her, all trying to approach her. While they were all asking about her well-being, there was one youth who looked very cold and arrogant, he didn't approach her, but Wang Baole had clearly noticed that his younger sister often sized up the youth. When she looked over, her heartbeat sped up.

If the youth was really cold and arrogant, it wouldn't have mattered. However, his seemingly arrogant attitude could fool the children, but it couldn't hide from Wang Baole's eyes. He saw the youth's pride and nervousness, he also saw the coldness hidden deep within his eyes.

Under Wang Baole's dao charm, a few threads appeared behind the youth. Most of the threads were dim, and only one of them led directly to the heavens, to the stars, and to the planets where the God's eye civilization was located.

Wang Baole couldn't be bothered to check the identity of the specific person that was being directed. He turned his gaze away and sent a sentence into his sister's mind.

"Come home and meet me!"

As Wang Baole said that, Wang Baoling raised her head proudly and flicked her hair. She was surrounded by a large number of youths, making her look like a bright pearl, she threw the motorcycle helmet aside and was about to say something when Wang Baole's voice rang out. Wang Baoling's body froze.

Her face instantly turned pale. Even though the voice was extremely unfamiliar, when it entered her mind, it made her blood stop for a moment. An instinctive feeling made her instantly.., an answer regarding the identity of the person who spoke appeared in her heart.

The name Wang Baole had accompanied her throughout her entire life. From the moment she remembered it, she knew that everything about her was because of this name. It was also because of this name that she gradually realized that in the federation, in the entire Solar System.., she was extremely special.

She wasn't afraid of her parents, but she had an indescribable respect for her brother, whom she had never met before.

All of this made Wang baoling, who was feeling proud of herself, shudder. With a pale face, she turned around and got on her motorcycle. She did not even have the time to greet anyone as she sped home.

Leaving behind a group of companions who were at a loss, her figure had already disappeared into the distance.

She used her fastest speed, and in the fastest time possible, her mind was blank. Wang Baoling returned to the door of her house. As she hesitated and became nervous, her body trembled as she slowly opened the door, he saw the unfamiliar yet familiar figure sitting in the living room.

The moment the door opened, Wang Baole raised his head and looked at his younger sister. He took a careful look and was certain that there were no other schemes involved, after confirming that his younger sister did not have any karma, and that everything was just his parents creating a child under normal circumstances, Wang Baole retracted his gaze.

However, Wang Baoling's face turned even paler under his gaze. Her eyes were filled with fear and unease. She stood at the door, not knowing how to speak. She could not even take a step forward.

"Come and sit down," Wang Baole said slowly.

"OH." Wang Baoling nodded hurriedly and sat obediently at the side. She lowered her head and did not dare speak. If Wang Baole's parents had woken up to see this scene, they would have been shocked, there was no doubt that they had never seen their daughter in such a state.

Seeing that the girl was so afraid of him, Wang Baole shook his head secretly. He could tell that Wang Baoling's talent was very ordinary. He was about to speak, but suddenly, he raised his eyebrows and looked up at the starry sky.

His gaze seemed to pierce through the entire Solar System. He saw that outside the Solar System, a huge vortex had appeared. As the vortex rumbled, a figure flew out from within.

Behind the figure was a resplendent starry sky. Purple light filled the air. It was none other than... the violet gold civilization.

The person who flew out was none other than patriarch violet gold. After leaving the solar system, Patriarch Violet Gold had a solemn expression on his face. With incomparable respect, he cupped his fists and bowed deeply to the solar system.

"The lord of the violet gold civilization requests an audience with senior Wang. We have come to a conclusion based on what you have said. We sincerely request that you give us the opportunity to rise to prominence. For this reason... we are willing to completely integrate into the federation and Fight for You!"

Chapter 1195, punishment!

The arrival of the purple gold civilization and the words of the purple gold ancestor instantly spread throughout the entire solar system, causing the hearts of all the powerful warriors in the Solar System to tremble. Streams of divine sense spread out, they rapidly flew toward the starry sky where the Purple Gold civilization was located.

"The Purple Gold Civilization?"

“The purple gold civilization that once invaded the God’s eye civilization?”

“Why did they suddenly come here? Why are their words so sincere?”

“Senior Wang... could it be...” as these divine thoughts intersected rapidly, they immediately transmitted their voices to each other, revealing a strong sense of shock and vigilance.

The purple gold civilization that had arrived was truly astonishing just by looking at its aura. Whether it was the elder who spoke or the vast starry sky revealed by the vortex behind him, they all represented this purple gold civilization, it far surpassed the Solar System.

This was especially so... when the god eye civilization had merged with the Federation, they had gained an understanding of the entire left Dao holy region. Naturally, they were not particularly unfamiliar with this purple gold civilization that had once plotted against the god eye.

They were very clear that the purple gold civilization was the first sect in the 19th region of the left Dao holy region. There were more than a hundred civilizations under their command. In the entire 19 regions, they were a colossus.

Although there were no star regions within them, their forefather was already half a step into the star region. With the array formation of the purple gold civilization, he had the qualifications to fight against the star regions within the region of his civilization.

Such an expert, such a force, had actually taken the initiative to merge with them..

This matter filled the hearts of all the experts in the Solar System with shock and suspicion.

The Martian colony governor, Lin You, the Golden Colony Governor, fellow Daoist Gui, the divine eye civilization’s sky-palm forefather, and the vast expanse Daoist Palace’s Qing Lingzi all charged out of the solar system at this moment, at the same time, the array of the Solar System also unfolds soundlessly and comprehensively, and there is Wu Mengling and Li Xingwen, as well as the Jin family progenitor, the spiritual sense all spread out, gazing out of the Solar System.

There is in mercury closed-door Zhao Yameng, also at this moment open eyes, looking at the direction of the Purple Gold Civilization, eyes thoughtful, looking at the earth.

She was not the only one. All the people who went out and spread out their divine senses were looking at Earth at the moment of shock. It was clear that the person from the purple gold civilization who spread out their divine senses, the person whose words were respectfully addressed as senior king, was in everyone’s minds, it’s a big wave.

Because of this title, they can think of, only one person can be!

This person was naturally Wang Baole, who had left the federation for more than ten years!

“He’s Back?” The question surfaced in everyone’s mind, and their emotions were different. The Galaxy in the Vast Expanse Dao palace was silent. His disciple, Qing Lingzi, didn’t know that Wang Baole had returned. His heart was trembling, it was obvious that Wang Baole’s intimidation had left a shadow on him.

The divine eye civilization was filled with respect and awe. All the powerful cultivators within bowed their heads. In their hearts, Wang Baole was their emperor.

The sky-palm elder sighed internally and chose to bow his head as well. Compared to them, the people from the federation were excited after making their own judgments and speculations.

President Wu Mengling's eyes lit up. Li Xingwen's smile came from the bottom of his heart. Lin You and fellow Daoist GUI were excited.

However, there were also some people who were extremely nervous and guilty.

Wang baole, who was sitting in his home in Earth's ethereal city and talking to his sister, could clearly feel everyone's reactions. He didn't say anything and allowed the people from the federation to come into contact with him.

This matter could be considered a training exercise for the federation. If everything went well, it would be better. If it didn't, it would be suitable for him to appear again. Therefore, at this moment, he only released his dao charm.., he circled around the purple gold grand ancestor who was bowing to him outside the solar system, indicating that he knew. After expressing his welcome, he retracted his dao charm and looked at Wang Baole, who was sitting beside him.

Sensing that Wang Baole was looking back at him, Wang Baoling instinctively sat up straight, her small face even more nervous.

"Mom and Dad Don't like the way you're dressed now." Wang Baole could easily resolve the matter regarding Wang baoling. He retracted his gaze and said calmly.

"I'll change in a while. I Won't do it again in the future," Wang Baoling said without hesitation.

Wang Baole nodded and continued.

"Don't let mom and Dad Worry About You. Don't Talk Back."

"I... I Won't talk back in the future. I'll agree to whatever mom and Dad Say. I'll be very obedient." Wang baoling felt wronged and tried her best not to cry. However, she couldn't hold it in after saying that, she asked in a low voice.

"But what if what they say is wrong? Brother, can... can I tell you?"

Upon hearing her call him brother, Wang Baole had some thoughts in his mind. Looking at his sister, who was very afraid of him, Wang Baole laughed involuntarily and raised his hand to touch her head.

"You can."

"Really?" Wang Baole's touch made Wang Baole's eyes light up.

"Really, but you can't let mom and Dad Worry."

Wang Baole was about to cheer out of instinct, but when he saw Wang Baole, he retracted his head and held it in. He nodded quickly and obediently. Then, he rolled his eyes and saw that the table in front of Wang Baole was empty, therefore, he quickly got up and brought a bottle of ice spirit water for Wang Baole and placed it in front of him.

Looking at the ice spirit water, Wang Baole's heart warmed even more. After a moment of silence, he suddenly spoke.

"You Like Him?" As Wang Baole spoke, he waved his right hand, and an illusory shadow appeared. It was the youth that his sister had secretly watched.

Wang Baole's pretty face blushed. He was a little shy, but he still nodded.

Wang Baole thought about it. Different positions would determine different ways of handling the matter. If it was in the past, Wang Baole might have directly stopped it and chosen a person that he acknowledged. However, now that he was in his position., he wouldn't interfere with his younger sister's decision. Furthermore, the youth was unpredictable. What was happening now didn't mean that it would happen in the future. Therefore, he wouldn't stop it, but he would make some adjustments.

In the next instant, Wang Baole's Dao rhythm spread. He immediately found the youth who had just arrived home in ethereal city. He looked at the Karma thread that spread across the starry sky and waved his hand, instantly, the Karma thread collapsed.

As it collapsed, on the other end of the Karma Thread, on the planet where the divine eye civilization was located, a middle-aged cultivator who was sitting cross-legged and meditating changed his expression. He was about to get up, but in the next instant, his body withered like a deflated rubber ball, he fell to the ground and turned into ashes.

He wasn't the only one. At the same time, more than a dozen cultivators of different cultivation levels within the divine eye civilization turned into ashes in that instant.

There was another person whose cultivation had reached the level of a spirit immortal. He looked familiar, but Wang Baole had forgotten his name. In his memory, he must have been a disciple of the sky-palm Grandmaster. His body trembled. He wanted to explain, but before he could say anything., his body was reduced to ashes.

At the same time that this person died, the sky-palm Grandmaster, who was outside the Solar System receiving the purple gold civilization with the people from the Federation, shuddered. A shadow of his soul appeared above his head. One of the Shadow's arms., had been cut off by a dao rhythm!

As the arm was cut off, a mouthful of blood sprayed out of the mouth of the sky-holding patriarch. His body trembled, and he turned his head with a pale face. Then he bowed deeply in the direction of Earth in the Solar System.

"I didn't plan this," he said in a voice that filled him with awe and fear. "But I knew what I was doing, so I let you go. I'll cut off your soul and arm, and I'll cut off twenty percent of your cultivation base as a warning to others!"

Everyone in the area immediately noticed his state of mind, and looked over in shock. Even patriarch violet-gold swept his hand over the sky thoughtfully.

"Fellow Daoists and seniors, please forgive me. My disciple has committed a taboo. As his master, I deserve to be punished, and I am willing to do so."

Chapter 1196: Zhao Yameng and Zhou Xiaoya

The purple gold grand ancestor narrowed his eyes at the sky-palm Grand Ancestor's words. He seemed to have a rough idea of what was going on. He thought to himself, to be able to make such a cultivator who was about to step into a star be willing to be punished, and with such a mysterious method of punishment.., it seemed like the person who was able to influence the Great Dao with just a hint of dao charm must be Wang Baole.

It seems like my judgment of him wasn't good enough. This Wang Baole... is stronger than I thought, and more powerful than what he had shown before

The purple gold grand ancestor's smile grew wider at the thought. He was more confident in the purple gold civilization's decision this time. At the same time, the people from the federation across from him, be it Lin you, Dao Friend Gui, or Qing Lingzi, were all shocked, they had confirmed their previous guesses.

Wu mengling, Li Xingwen, and the others from the Federation didn't go out to welcome Wang Baole. Instead, they went to Jupiter, the place where the purple gold civilization would be welcomed. At that moment, they were even more certain that Wang Baole had returned, from time to time, they would turn their heads to look at Earth.

They knew very well that if Wang Baole had really returned, then he must be... in ethereal city.

They didn't care about the way he held the sky, nor did they see the figures who were constantly looking at Earth. Wang Baole's Dao Aura was now lingering around the youth. The instant the youth's Karma was severed, his body trembled violently, sweat poured out, and his entire body was trembling. His eyes were filled with intense fear.

"I will not interfere in the matter between you and the Baoling Spirit. However, you must not harm her. You must not harm her in any way."At that moment, an unfamiliar but familiar voice appeared in his mind. It said that it was unfamiliar, it was the first time that this voice had entered his mind. It was called familiar because he had seen Wang Baole's silhouette and the words he had said on numerous screens throughout his life.

To the federation, Wang Baole... had been completely deified.

After passing on the words, Wang Baole retracted his dao charm. This was a very, very small matter. Since his sister liked him, he could just go ahead and like him. As for what the youth thought, it didn't matter. Since he had chosen to calculate it.., then, even if Karma was formed, he would be free once his sister was tired of it.

Before he was tired of it, his life had to be based on Wang Baoling's will.

Perhaps it was a little overbearing, but position determined one's thinking. Wang Baole did not continue to put in effort on this matter. He stroked his sister's head and said softly.

"Go Open the door. An old friend has arrived."

Wang Baoling's mind was still filled with excitement, and she continued to feel dizzy. When she heard that, she hurriedly got up and ran to the door. The moment she opened the door, she saw a familiar figure outside the door.

"Sister Xiaoya!" Wang Baoling exclaimed in surprise.

The person who had come was... Zhou Xiaoya!

Her cultivation had reached the level of a spirit immortal, and her entire body was filled with a gentle aura. Her long hair draped over her shoulders, and she wore a long dress. She smiled as she raised her hand to stroke Wang Baoling's head. Her gaze shifted from her side to where she was sitting, Wang Baole also raised his head to look at her.

"When did you come back?" Zhou Xiaoya asked gently. She walked up to Wang Baole, tidied his collar, and sat beside him naturally.

Baoling blinked. She quickly went to fetch another bottle of ice spirit water and placed it in front of Zhou Xiaoya. She sat at the side, her eyes filled with interest as she sized up her brother and Zhou Xiaoya.

Over the years, she naturally knew that sister Xiaoya liked her brother. She would visit him almost every few days, many times more than when she was home..

I just got back. Wang Baole looked at Zhou Xiaoya and revealed a warm smile. However, deep in his eyes, there was a hint of regret. It was the fact that regrets were seldom seen, but it was also the complicated feelings of regret.

Zhou Xiaoya seemed to be able to sense it. She smiled and shook her head, gently talking about some trivial matters of life. She was like a family member, like a big sister and like a sister-in-law, having a heart-to-heart talk with the Baoling spirit.

It could be seen that the Baoling spirit liked Zhou Xiaoya very much, and they were very familiar with each other. Wang Baole saw this scene, and warmth filled his heart. It was only when he raised his head and looked outside the door that the Baoling spirit, who was standing beside him, blinked, although she didn't sense anything, she could vaguely guess something based on the connection between her bloodlines. She stood up and ran to the door again, opening it.

"Sister Yameng!"

A proud figure stood at the door. She was tall and straight, and at the same time, she had the gentleness and tenacity of a woman. She didn't lack heroic spirit either. She was like a blazing sun, exuding a sense of holiness. She could make too many people feel inferior in front of her.

It was... Zhao Yameng!

After realizing that Wang Baole had returned and wasn't on Earth, she had been one step slower than Zhou Xiaoya. When she arrived, she saw Wang Baole and Zhou Xiaoya, who was sitting beside him.

"Senior sister Yameng," Zhou Xiaoya stood up and said gently.

Zhao Yameng smiled as she patted the head of the Baole Spirit. She smiled as she returned the greeting to Zhou Xiaoya. Then, she walked over to Wang Baole's side, looked at him, and sat down on the other side of him.

"Baole, did you subdue the Purple Gold Civilization? How did you settle it? When did it merge with the Sun and the Stars?"

Zhao Yameng was different from what Zhou Xiaoya was talking about. She sat down and started talking about the federation. After communicating with Wang Baole, she told him everything she had discovered about the federation over the years.

She also told Wang Baole about the undercurrents within the god's eye civilization. She also told him about the cultivators from the Dao Palace who had awakened in the vast expanse dao palace. They seemed to be getting restless.

This was a completely different style from Zhou Xiaoya's. Wang Baole's eyes were filled with regret as he answered carefully. Zhou Xiaoya, on the other hand, was very quiet as she listened. She didn't seem to have participated in the conversation, but she didn't say anything either, however, she raised her hands and pressed them behind Wang Baole's ears, gently pressing them down for him.

With that, she naturally blended into the conversation. All of this made Wang Baoling, who was sitting not too far away from the three of them, exclaim in her heart.

The light in her eyes grew brighter. Although she still respected her brother, deep down, she was curious as to how her brother would deal with the issue of the two sisters-in-law.

However, she did not know that behind her... behind Zhou Xiaoya and Zhao Yameng, another figure appeared. Other than Wang Baole, no one else could see it. It was little Missy Wang Yiyi.

She sized up Zhou Xiaoya with a faint smile, then looked at Zhao Yameng, and finally looked at Wang Baole mockingly.

"Baole, these two girls, I've seen with my own eyes the two of you walk step by step to where you are today. Aiya, who are you going to choose? There's also Li Wan 'Er. Why Don't you accept them all? Back then, my father... ahem." Wang Yiyi didn't dare continue, however, her eyes were filled with encouragement.

Wang Baole felt a headache coming on. This was the first time since he had returned from the ninth underworld realm that he didn't know what to do. His originally calm state of mind was inevitably shaken.

This was especially so when his younger sister was beside him. She had just been taught by him, and now, she was sitting there watching with relish. Wang Baole couldn't help but glance over.

Bao Ling retracted her head, wanting to pretend that she hadn't seen anything. However, when she realized that her brother's eyes were a little fierce, she pouted and stood up, deliberately yawning.

"I'm going to sleep." After saying that, she returned to her room unwillingly.

Time passed slowly, and the night passed without a word.

While Wang Yiyi was moaning and moaning, Zhao Yameng and Zhou Xiaoya left one after another. Wang Baole sighed softly. He had too many things on his mind. Even though he knew what the two of them were thinking, he still couldn't agree to it.

He didn't know what would happen in the future. There were too many things in the stone tablet realm that he didn't know how to deal with.

He was still too weak.

"I'll leave it to time," Wang Baole murmured softly. He raised his head again, and his eyes regained their calmness. He saw Wu mengling, Li Xingwen, and the others on Jupiter, and the Purple Gold Patriarch, they were discussing the next step in the fusion of the stars.

Next, I hope that during the fusion of the federation, my cultivation and soul will be upgraded, and I will step into... The Galaxy! Wang Baole lowered his head. As he raised his right hand, a missing corner of a compass appeared in his hand.

It was the Realm Ascension Compass!

Chapter 1197 — Seven Stars of the Seven Heavens!

There didn't seem to be anything out of the ordinary about the compass. The only thing that was obvious was the feeling of time. There were unerasable grime in many places, as if it had been stained with blood from who knows how many years ago.

However, there wasn't the slightest abnormal aura. It was exuding an oak-like smell. At the same time, there was a finger-wide angle missing from the right corner of the compass.

The missing corner seemed to have been struck by an external force, causing the compass to shatter. Cracks could even be seen on the missing corner. There were deep and shallow cracks that spread across the entire compass, increasing the sense of time on the compass.

"Realm Ascension Compass." Wang Baole held the compass and muttered to himself. This compass might have many uses, but Wang Baole only knew one, and that was... to raise the level of civilization.

He didn't know how it worked, but he thought that it must be some sort of hidden treasure. It could increase the thickness of a civilization, and then add history to it out of thin air. It was like grafting, allowing a civilization to leap forward.

As for how to use it, it wasn't complicated. He just needed to fuse it into the star.

Wang Baole thought for a moment, then raised his head. He glanced at the star and sun, but didn't immediately fuse it into the star. After all, the object came from the Dark River and the nine serenities. Wang Baole didn't have much confidence in it, so he needed to study it again, only then would he be able to confirm whether or not to use it.

The arrival of the purple gold civilization will also raise the level of the federation's civilization after merging with it... Wang Baole thought for a moment, then closed his eyes and quietly meditated.

Time passed, and soon, seven days passed.

During these seven days, Wang Baole's home was filled with visitors. They included the Ethereal Dao ancestor, Li Xingwen; the president, Wu mengling; the vice president and governor of the Martian colony, Lin You; fellow Daoist Gui; and the Jin family ancestor, whom Wang Baole had never met before in the TRILUNARIS Corporation and Wang Baole, then, there were the sky-palm and the others from the God's eye civilization, as well as the anxious Qing spirit child from the vast Dao Palace..

The higher-ups of the Federation had all come to pay their respects. Wang Baole treated different people differently. For example, Li Xingwen, Wu mengling, and the others. Wang Baole treated them with the courtesy of a junior. As for the others., wang Baole greeted them with a smile. However, no matter how gentle he was, it was hard to avoid making the other visitors, other than Li Xingwen, Wu mengling, and the others, feel nervous.

The newly joined Patriarch of the Purple Gold civilization also arrived. He was respectful and respectful in front of Wang Baole, not daring to make any rash moves or words. This made the higher-ups of the federation even more fearful of Wang Baole.

Whether it was on the surface or below the surface, Wang Baole's status and status were unparalleled in the entire federation. Some of the cultivators in the federation had even addressed him as the patriarch when they talked about Wang Baole.

The federation's Patriarch!

This title spread very quickly, and no one disagreed with it. Everything in the federation could be said to have been acquired by Wang Baole. He had been in charge of the integration of the Vast Expanse Dao Palace, and he had participated in the integration of the God's eye civilization, the purple gold civilization had come because of his fame.

Therefore, in the current federation, although Wang Baole still hadn't fulfilled his childhood dream of becoming the president, that was no longer important.

After receiving all the visitors, Wang Baole left a clone to accompany him so as not to disturb his parents. His main body left Earth and went to the Sun and the star.

The star, which he had been unable to enter in the past, was now like his own garden to Wang Baole. The reason for this was that his cultivation was no longer the same as before. On the other hand, the divine eye star was already under his control, after merging with the Sun, the sun naturally belonged to Wang Baole.

Within the Sun, Wang Baole sat cross-legged in the solar flare. As he cultivated, the purple gold civilization and the Federation had reached a consensus on the details, and the merger was on the agenda.

It was set for half a month later!

During this half a month, there were still many things that needed to be done beforehand. For example, the division of the areas after the merger, how to deal with the hundreds of civilizations that were attached to the purple gold civilization, and the seating of the purple gold civilization in the federation.

After all, compared to the federation, the Purple Gold civilization was too big. Without Wang Baole, the federation would have been completely passive during the fusion. However, now, the Purple Gold Civilization had taken the initiative to retreat, they proposed that the purple gold star be completely integrated into the federation's star, giving up the initiative. At the same time, they also handed over the hundreds of small civilizations that were attached to it to the federation.

From then on, these small civilizations would no longer be attached to the Purple Gold Star, but to the federation.

Their galaxy would circle around the edge of the future federation galaxy and become part of the Federation's star spiral. At the same time, twenty percent of the federation's territory would be divided and given to the purple gold civilization.

This was a huge disadvantage for the purple gold civilization. After all, their integration could expand the federation by a lot. However, the purple gold civilization wasn't displeased at all. Instead, they pushed for it with all their might.

Everyone could tell that the federation was nothing to the Purple Gold civilization. They had come here to... rely on Wang Baole.

Half a month passed in the blink of an eye with the full cooperation and push. Everything that had been planned had been completed. Finally, on this day, with the simultaneous broadcast of the entire federation, the integration of the purple gold civilization had officially begun!

At that moment, Wang Baole had split into hundreds of clones and spread out in all directions. He was meditating at the outer edge of the solar system to prevent any accidents or changes. As for his main body, he was still seated within the Sun's star, leading the fusion this time.

Very quickly, the citizens of the entire federation saw a star that was much larger than the Sun in the sky. It slowly emerged from the blurriness, surrounded by countless meteors that seemed to be pulling and pushing at the same time, the Strange Star slowly approached the Sun.

The entire process lasted for fourteen days. In the first seven days, the temperature in the solar system had risen by a lot, and the spiritual energy had also risen dramatically. Through the broadcast of the Solar System's array formation, the people were able to see everything that was happening.

Everyone was excited, and so was the divine eye civilization. This was because for them, the fusion of the purple gold would also increase the level of their lives, and their cultivation bases would instantly soar. The vast expanse Daoist palace was the same, and they were even more excited, once the fusion took place, their injuries would be forcefully healed in an instant. Some of the injuries that weren't very serious could even be healed immediately.

This was the law and law of the starry skies of the stone stele world. Both the Dark Sect's Heavenly Dao and the Unending Heavenly Dao contained dao.

The fusion of civilizations would increase the level of their lives. It would be like changing the heavens and changing lives. It would affect their natural endowments and increase their cultivation levels!

When the eighth day arrived, the purple-gold star and the Federation's sun came into complete contact. They emitted a large amount of fog that slowly merged under the suppression of the purple-gold patriarch and Wang Baole.

From Afar, the sun was very small, and the purple-gold star was very large. However, during the fusion, the Federation's sun was absorbing and the purple-gold star was contributing. This process continued for seven days.

The second seven days seemed to have changed the world for the Federation. The changes were so great that it shook everyone's minds!

The borders of the Federation expanded instantly, more than ten times!

The Spirit Qi from the divine eye civilization and the original planets in the Solar System in the federation's starry skies erupted in an instant, exceeding the previous times by a hundred times.

The temperature in the starry skies reached an alarming level. However, under Wang Baole's protection, the planets were not affected, and no one was harmed. At the same time, as the temperature and spirit Qi became denser, the entire solar system became hazy.

The hazy feeling grew stronger, and some unconscious spirits appeared faintly. These spirits were all born with Spirit Qi, and they were all different in appearance. They danced in the galaxy, causing everyone who saw them to be shaken.

The planet belonging to the Purple Gold civilization appeared in the previously designated area of the Solar System as if it was being pulled. Although it was blurry, their appearance caused a storm to rise in the Solar System. As the storm passed, Spirit Qi erupted once again.

Everyone from the divine eye civilization, all life forms from the federation, and cultivators from the vast expanse dao palace all trembled violently at this moment. Waves of aura erupted from all directions. This was a breakthrough, a rise in power!

On the seventh day... The Purple Gold Star completely merged with the Federation Sun, causing the area of the federation's star field to expand once again. It was now hundreds of times larger than before. There were hundreds of planets belonging to the federation, with hundreds of small civilizations surrounding them, within each small civilization, there were ten planets of different sizes.

From Afar, in the starry sky... in the original position of the Solar System, the Solar System had disappeared, and in its place was an even larger... multi-colored star whirlpool!

At this moment, in the left path holy region, many sects and families had sensed something. Many gazes from all directions in the left path holy region were all looking... at the location of the Solar System!

—

Chapter 1198, realm plate domain suppression!

Violet gold fused into it, causing the level of the federation's civilization to rise!

Heavenly Dao laws and natural laws spread out in all directions, filling the entire galaxy. Violet lightning bolts spread out in all directions, causing everyone to look up to see violet snakes dancing in the starry sky, shocking to the extreme.

All of the cultivators, be it the vast Expanse Dao palace or the divine eye civilization, all experienced an increase in their level of life, along with the feedback of their spiritual energy. Their cultivation bases exploded with power, and the aura of a breakthrough spread out, it was in the new federation that the aura of a breakthrough began to spread out.

Within the divine eye civilization, Patriarch Heavenpalm's cultivation base exploded with power. He had originally been in the great circle of planets, but now, he had broken through to the star realm. He had been preparing for his cultivation base to advance for many years, he had long since left behind an immortal planet for himself, which was the foundation of the divine eye civilization.

At that moment, with the help of the immortal planet, he was able to make a breakthrough in his cultivation base. With the help of the spiritual energy, he was able to ignite the planet, causing it to rise into the sun, and his cultivation base to smoothly step into the star realm!

A large number of cultivators from the divine eye civilization also rose, and three of them directly stepped into the planet realm!

As for the vast expanse Daoist Palace, rumbling sounds could be heard as figures began to howl from their secluded meditation facilities. There were a total of nine planet cultivators, all of whom had recovered from their injuries, and were now out of secluded meditation!

As for Qing Lingzi, he had completely recovered from his injuries, and was now back in the middle of the star realm!

There was also star Wing Elder. Due to his high cultivation level and his injuries, although he was unable to completely recover, he could clearly feel that his injuries had improved quite a bit.

And the ones who had improved the most... were the federation cultivators from the Solar System. When their cultivation levels erupted, it was comparable to the combination of the divine eyes and the Dao Palace.

Zhao Yameng, Li Xingwen, Wu Mengling, Lin You, the Jin family Elder, and fellow Daoist Gui. These six former planets had all broken through at this moment due to the explosion of spiritual energy and the increase in their levels of life.

Mid-stage planets, late-stage planets... in the end, Li Xingwen was indeed a genius. He was the first to break through to the star realm, followed by Zhao Yameng, and then Lin You!

As for Wu Mengling, the Patriarch of the Jin family, and fellow Daoist Gui, they had all stopped at the late-stage planets.

There were also other people who had made breakthroughs. There were even thirteen original spirit immortal cultivators who had used this opportunity to break through and step into the planets.

The rise of the three factions, the appearance of planets, and the glow of a few stars made the new federation's Starry Skies even more dazzling and loud.

The reason for the rise of the federation's local cultivators was that the federation's cultivators were in charge, both in the past and the present. They were the true masters of the galaxy. Therefore, the increase in their cultivation was more comprehensive.

However, the person who had benefited the most was still Wang Baole!

If the federation cultivators were the ones in charge, then Wang Baole was the one in charge!

His soul had used the improvement in his level of life and the integration of the purple gold civilization. With the help of the explosion, he had reached the ninety steps of the perfected stellar realm. It wasn't over yet. He was still advancing.

He took ninety-three steps, ninety-six steps... Ninety-nine steps!

With another leap, he stepped into the hundred steps. His soul shook violently, and it elevated immediately, breaking through to... The Celestial Domain Realm!

At that moment, Wang Baole was in the physical celestial domain and the Divine Soul Celestial Domain. His foundation was too deep and too strong, so the integration of the purple gold was unable to support his advancement. He was still at the perfected stellar realm, but his combat strength had increased greatly due to the advancement of his soul to the celestial domain, it had increased by too much.

He sat cross-legged in the Sun. His eyes opened and closed, and he stood at the center of the new federation like a God!

Booming sounds and the sound of a breakthrough rang out continuously in the starry sky. The expansion of the new federation's Galaxy caused a reaction in the starry sky. The powerful cultivators from the countless sects and clans in the left Dao holy region were all shocked, their gazes seemed to be able to pierce through the galaxy and see the Federation, which had expanded by hundreds of times!

This was not a real sight, nor was it the arrival of divine will. Instead, it was a natural reaction due to the dao fusing with the galaxy.

However, even though most of the sects and clans were shaken to the core and knew that a new overlord had appeared in the left Dao sacred region from then on, they were still very wary of the sects that were ranked in the top few in the left Dao sacred region, for example, the first sect, the nine paths sect, was only slightly shocked. They didn't feel too strongly about it. It didn't matter if there were dozens of planets in the new federation, or if there were a few stars..., the new federation's power had not only risen to become the overlord of the nineteenth region, it had even surpassed it. However... it was still lacking in high-end combat power!

After all, Wang Baole's power was still considered a star by the nine dao sects. They couldn't see it with their own eyes. They could only sense the expansion of the galaxy. That was why they cared the most..., the blazing flame ancestor and the starry wings of the Vast Expanse Dao Palace.

To the nine Dao sect, these two were the true foundation of the new federation. They were powerful, but the former couldn't easily ignite the curse. The latter was injured. The Nine Dao sect and the other top-ranked sects..., they did not lack star domains, so although they were a threat, they were not a big deal.

Of course, there were two other reasons. They were only slightly shaken. One... was that war was about to break out in the Weiyang Dao Domain, and a great calamity was about to befall them. It was still unknown whether they would be able to survive in the end.

Two... The nine paths sect knew very well that although this kind of advancement by absorbing other civilizations was quick, it was full of drawbacks and could not be unlimited.

Firstly, it was unstable. If it was a small civilization, it would be fine. But if it was a large galaxy like the purple gold civilization, it was like a snake swallowing an elephant. There was a hidden danger of collapse, and it would take a long time to digest, at the same time, it was very easy to reach the limit of saturation and could not continue to rely on this method to advance.

In the end... it was still difficult to reach the position of the top-ranked sects like the nine paths sect.

They had merely raised the starting point a little higher. However, their foundations were unstable, and when a strong wind blew, it was inevitable that they would collapse.

Wang Baole was well aware of what they knew. He was ambitious to begin with, and he was competing with time. It was obvious that he wouldn't be satisfied with the fact that he wouldn't be able to support his cultivation increase even after he had integrated with the purple gold civilization, most importantly... regardless of whether the purple gold civilization would come or not, Wang Baole didn't care too much about it.

That was because the promotion he was going to give to the federation wasn't the integration of the purple gold, but... The Realm Ascension Plate!

The function of this plate wasn't just like its name. It could promote a civilization, and it could also be used as a precious treasure to suppress the fate of the newly promoted civilization, so that it wouldn't be unstable and would be able to achieve a perfect integration, furthermore... there was no limit to it!

In other words, with the Realm Ascension disk, the expansion and fusion of the new federation could, to a certain extent, break through the limits and enter the infinite!

Therefore, in the next instant, the appearance of the new federation shocked most of the sects and clans, but it only caused the sects like the nine paths sect to tremble slightly... Wang Baole, who was sitting cross-legged in the sun, spread out his spiritual perception, after enveloping the solar system, which had expanded hundreds of times, he raised his right hand and waved it abruptly.

"All living beings are the dao, and the ascending disk is the reserve. From now on... It shall be the reserve of our federation, suppressing the starry skies, so that the federation will not collapse, perish, or Fall!"

Immediately, the ordinary ascending disk flew out. After it flew out of the Sun and the star, its size changed abruptly and expanded infinitely. As the loud booms reverberated, the disk grew larger, it became more and more translucent. In a few breaths'time, it became as big as the new solar system. Its form was completely transparent, invisible to the naked eye, and it enveloped the entire Solar System!

It pressed down!

Amidst booming sounds, the new solar system, which had expanded hundreds of times, went from its initial barely holding and unstable state to instantly stabilizing in the midst of the loud bang. The feedback of Spiritual Qi in that instant was even more than before, it erupted once again!

The cultivation of all living beings rose once again!

Chapter 1199: Clouds in all directions!

As soon as the ascending plate appeared, the starry sky rumbled, and countless amounts of spiritual energy erupted from within. It filled the entire solar system, and at the same time, it made the stars in the Solar System seem as if they had been baptized, and they gave off brilliant rays of light.

The planets were brilliant, and the flames of the stars spread out in all directions.

The power of suppression enveloped the universe, as if it had frozen everything at the most beautiful moment. In fact, there was even a protective power that spread out from within, making the solar system the center of attention of the universe at this moment!

What was even more shocking was that at this moment, the Solar System seemed to have turned into a black hole, sucking in a large amount of spiritual energy from the starry skies of the entire left Dao holy region.

In an instant, countless amounts of spiritual energy poured in from all directions with a loud rumble that could topple mountains and overturn seas. They poured crazily into the solar system and into the ascending boundary plate, becoming the aura of the Federation and the foundation of the Federation!

This caused the spiritual energy in the Solar System to reach an astonishing level in an instant. It turned into a dense fog that enveloped everything within sight.

Numerous spiritual veins were born on the various planets, and the spiritual rain fell like never before.

Such a change naturally shook the entire left path holy region. Therefore, in an instant, waves of exclamations immediately erupted from all the sects and clans within the left path holy region who were paying attention to the federation, the sounds of an uproar continued to ring out from the mouths of the experts from the various galaxies.

They could not see the current federation, and because their divine senses were too far away, they could not explore the solar system. However, the senses from the Dao allowed them to immediately sense that something was wrong. The spiritual energy from their respective galaxies was being drained, this caused a huge wave to rise in their hearts.

“Something’s not right. This feeling is very abnormal. The spiritual energy is decreasing and flowing towards the federation! !”

“After the federation fused with the Violet Gold, the entire realm was unstable. We could only say that it was barely holding on, but why did it suddenly... stabilize completely? It’s as if it’s completely absorbed!”

“What item is absorbing boundless spiritual energy to suppress the federation’s realm and stabilize it completely! ? ! ?” Cries of alarm rang out from within the various sects and clans, the Nine Provinces Dao and the other four great sects, which were ranked in the top five in the entire left Dao holy region, began to tremble slightly, and their expressions changed dramatically.

The other sects and clans could sense what was happening, and naturally, they could. At the same time... the other sects and clans were limited in their knowledge, so it wasn’t a problem for them to know what was happening, therefore, when they sensed the aura and stability of the federation, the Nine Provinces Dao sect and the other four sects immediately found the answer.

“This is some kind of true treasure that can suppress fate and stabilize a realm. This kind of treasure is very rare. Any one of them can be said to be peerless!”

“According to records, there are only a handful of true treasures that can do this. Other than some items that have owners, there are definitely not more than three that are scattered outside!”

“Lingyi Bell, Dao Soul Banner, and Realm Ascension Plate must be one of these three!”

“It can’t be the realm ascending plate. It’s a legendary supreme treasure that can suppress an entire universe. It’s rumored that the Emperor of the dead and progenitor Weiyang fought and shattered it. That’s why the Emperor of the dead died!”

While the various sects and clans were in shock, the nine regions road and the other top five sects were also in shock. At this moment, in the new solar system, the cultivation levels of all living beings had reached an extreme. Li Xingwen’s cultivation level had directly risen from the initial stage of a star to the middle stage of a star.

It seemed like this was only a small increase in cultivation level, but due to the difference in levels, the difficulty was comparable to tens or even hundreds of planet cultivators breaking through a cultivation level.

Next was Zhao Yameng, who had also stepped into the middle stage of the star. Lin You, who was slightly behind, had also reached the peak of the initial stage of the star. As for Wu Mengling, fellow Daoist Gui, and the Jin family’s patriarch, they all exploded at this moment. Other than the Jin family’s patriarch..., the first two were all at the early stage of the Star Realm!

As a result, of the six people, five were at the star realm. Although the Jin family’s patriarch didn’t immediately step into the Star Realm, with his foundation, he had a high chance of stepping into the star realm after cultivating for a period of time.

As for the thirteen people who had just advanced to the planet realm, they had all advanced to the middle stage of the planet realm by a large margin. There were even more than ten people whose cultivation bases had broken through to the planet realm with the help of the ascending plate.

There were countless low-level cultivators who had made breakthroughs. The divine eye civilization’s sky-palm Patriarch had also benefited greatly. He had reached the peak of the middle stage of the planet, and was only half a step away from the late stage of the planet.

If it had been any other time, his cultivation base would definitely have been unstable, and there would have been many drawbacks. But now... The rise in his level of life had resolved most of that instability,

and with the suppression of a precious treasure like the Realm Ascension Plate., all the cultivators' cultivation bases had been stabilized!

It was the same in the Vast Expanse Dao Palace. One by one, the elders who had been healing came out of secluded meditation. Master Starry Wing's eyes shone with a strange light, and his injuries... had recovered by more than eighty percent.

This caused his heart to race, and his breathing to quicken.

At the same time... when the violet-gold civilization had merged with the Solar System, they had been the contributors. None of the cultivators, including those from the dependent civilizations, had received any benefits. On the contrary, to a certain extent., their foundations had been depleted by quite a bit.

In fact, some of the cultivators' cultivation bases had been shaken, and it was as if their lives had withered. This caused many of the violet gold civilization cultivators to be filled with dissatisfaction and frustration, as well as helplessness.

Even the violet gold patriarch felt a bit of regret, as if he had made the wrong decision..

However, as the boundless spiritual energy poured into them and the ascending realm plate fused into them, the spiritual energy began to feed back to them!

Everything happened in an instant, and the losses of the violet gold civilization were immediately replenished. All of the withered beings felt their spirits rise, and their cultivation bases began to rise.

However, it was clear that they had only joined for a very short period of time, and that their sequences were different. Naturally, they couldn't compare to the Divine Eye and Vast Expanse Dao Palace, but... that was enough to make the violet gold civilization and the hundreds of other small civilizations very excited.

As for Patriarch Violet Gold, he was even more excited than before. Even though he hadn't given the violet star civilization much of a boost, it was enough to allow his cultivation base to rise by a single step, despite the fact that he had no hope of advancing to a Starfield, he had reached his true limit, and his confidence in breaking through to a starfield had increased from almost nothing to half!

His battle prowess had also increased. With his deep foundation, he was now barely qualified to fight against an early-stage starfield cultivator!

More importantly, this gave him strong confidence and hope. Patriarch Violet Gold was ecstatic as he raised his head to look in the direction of the Sun and star. He could faintly see a figure sitting cross-legged in meditation, he felt extremely determined and fortunate to have made the decision to integrate into the federation.

The figure in his eyes was Wang Baole. As the Lord of the Realm Ascension Plate, his gains this time were naturally the greatest. The amount of spirit Qi absorbed by all the living beings in the solar system was only twenty to thirty percent, the remaining seventy to eighty percent was all poured into him.

In an instant, his cultivation had reached the level of three to five steps to the perfected star realm. He continued to increase his cultivation to the limit!

Soon, he had reached the fourteen to fifteen steps. The Spirit Qi surged into a vortex that surrounded the sun. Wang Baole was completely immersed in it. There was only one thought in his mind at that moment.

He wanted to... attempt a breakthrough in his cultivation. He wanted to step into the star domain. He wanted to use his soul, physical body, and cultivation to become a true powerhouse in the never-ending DAO domain that the divine emperor would fear!

This time, I must step into the Starfield! Determination appeared in Wang Baole's eyes. He formed a seal with his hands, and his cultivation rose once again under the influx of Spirit Qi!

Chapter 1200, clarity of Dao Heart!

What was a starfield.

Wang Baole had many previous understandings. When he hadn't reached the planet realm at the very beginning, he had thought that it was a realm that was extremely profound, a realm that cultivators dreamed of achieving in their entire lives.

Then, as his dao star rose into the sun and stepped into the star realm, his thoughts changed. In his understanding, there was basically no difference between the Starfield realm and the Starfield realm in the universe. They both contained more than one galaxy, from there, they gathered together to form a vast sea of stars.

Due to the number and scale of the galaxies contained, there were also differences in size between the star domains. If one were to compare these star domains to living beings, then they would be the so-called star domain-grade.

But now, his thoughts changed again. This time, the change came from his previous life's comprehension on the fated star. It came from the tears and kowtowing in the Styx River in the nine serenities land. In his understanding, the star domain-grade., it was no longer as simple as seeing a sea of stars in the universe as a living being.

It was... Dao!

Finding one's own Dao and pushing it to the extreme, to the end, and finally achieving perfection in this dao... that was the essence of a celestial domain-grade cultivator.

Every celestial domain actually contained a dao that was different from others. Some people had one dao, while others had several. It was difficult to tell the strong from the weak, and it depended on one's understanding of the Dao.

The blazing flame ancestor, for example, was a combination of the Dao of curses and the Dao of fire. The other galaxies that Wang Baole had encountered were all the same. There were rumors that there were three thousand Great Dao in the entire universe, but in reality, the Dao was not fixed, it was far beyond the so-called three thousand.

Wang Baole didn't know exactly how many there were, but he knew clearly that the dao that he was walking on now was freedom, freedom.

His Dao intent was at peace, and his mind was at peace.

This was... His Dao heart was clear.

“Good.” Wang Baole, who was sitting cross-legged in the Sun and star, smiled. He closed his eyes again and took the initiative to absorb the boundless spirit Qi that had been absorbed from the entire left Dao sacred territory after the Realm Ascension Plate had fused with it.

The purpose of the spirit Qi wasn't to nourish the tens of thousands of stars in Wang Baole's star domain into stars. All of his stars had already gone through this step and had reached the so-called great perfection of the stars.

The purpose of the Spirit Qi was to... light up the tens of thousands of stars in Wang Baole's body, allowing the Dao of all the stars to manifest in his heart, allowing the Dao to eventually converge, forming what he sought... freedom.

Because he wanted freedom, Wang Baole had to be stronger than the others!

Because he wanted freedom, the Dao that Wang Baole comprehended had to be more comprehensive!

The process from the first step to the hundred steps of the perfected stellar realm was his pursuit of the Dao of freedom.

At that moment, he had already reached the fifteenth step, and he was still continuing.

With a loud boom, the vortex formed by Spirit Qi had already covered the entire sun and star, and it was still spreading in all directions. In just a few breaths'time, it had covered half of the new solar system. In that instant., all the powerful cultivators in the left dao sacred region who were paying attention to this place sensed the presence of Wang Baole as well as the presence of the supreme treasure suppressing it!

“The Blazing Flame disciple, Wang Baole!”

“That presence is him. He's advancing to the star domain!”

“This isn't a big deal. The supreme treasure that can suppress the solar system is the key!”

“The war between the never-ending clan and the dark sect is about to begin. If we have such a supreme treasure, we'll definitely have more confidence in being able to survive this calamity!”

Streams of divine thoughts instantly appeared in the various sects and clans of the left Dao sacred territory. However, the power that the federation had revealed to the public could still dispel many people's greed, however... for the nine Prefectures Dao sect and the top five sects in the left Dao sacred territory, the moment they sensed the supreme treasure, greed rose in their hearts.

Even though they knew that the blazing flame ancestor was behind Wang Baole, they still spared no expense and used the secret techniques of their respective sects and clans. Through different methods, their divine thoughts were strengthened and spread out from all directions, they wanted to see for themselves what the Supreme Treasure was.

If it wasn't something famous, or if its power was different from their judgment, or if it was already at its peak, then even though they were greedy, they still had to weigh their gains and losses.

Therefore, in the next instant, outside the Solar System, as the starry sky distorted, the divine senses from all directions gathered and looked towards the solar system.

However... as the secret techniques of the various sects were unleashed and they looked over, when they saw the ascending boundary plate and the figures within the Solar System, a short period of silence suddenly appeared, following that, waves of incredulous exclamations and heavy breathing immediately erupted within the sects where the divine thoughts were probing.

"That's... That's..."

"Ascending realm plate! ! It's actually the legendary ascending realm plate that has already been destroyed! This is impossible! !"

"Ascending realm plate! !"

An uproar broke out as more than ten auras of star fields erupted from within the Dao of the nine prefectures. The other four sects that were ranked in the top five did the same, and their auras began to rumble.

The allure of the ascending realm plate was too great!

As the hearts of the experts from the various sects trembled and began to stir, Patriarch Starry Wings from the Vast Expanse Dao Palace in the Solar System suddenly opened his eyes. Without any hesitation, he sent his divine will out and swept out toward the outer reaches of the Solar System, it was a deterrent.

A cold snort rang out from a distance, echoing in the minds of the experts from the various sects who had used secret techniques to examine the area. This voice... contained the power of fire, as well as a curse, it was none other than Patriarch Blazing Flame.

Starry Wings was fine. He was just an ordinary starfield, but patriarch blazing flame was different. His cold snort caused the hearts of many experts from the various sects and clans to tremble.

It was different to guess that the blazing flame ancestor would come. It was different to personally experience his arrival.

At the same time, the voice of the blazing flame ancestor rang out in Wang Baole's mind.

"Baole, don't worry about your advancement. I'll help you block any attacks. I'd like to see who dares to disrupt my disciple's advancement!"

"Master... There's no need for that." Wang Baole opened his eyes. He felt warmth in his heart as he spoke softly.

How could Wang Baole not notice that the powerful cultivators from the various sects and clans in the left Dao sacred region were approaching him with their telepathic thoughts? Even though he was currently in the midst of gaining enlightenment, he could still sense everything.

That was because this was within his expectations.

Of course, Wang Baole understood the significance of the Realm Ascension Plate. He also understood the rise of the federation, especially his own ascension. It was the same as reclassifying the left Dao Sacred Region. As such, he would naturally be targeted, spied on, and even blocked.

However, he couldn't just stand still and not move forward because he was afraid of being targeted. At the same time, he planned to use this opportunity to mobilize the elites from the various sects and clans of the left Dao Sacred Zone to give him a chance to establish his authority here.

This time, establishing his authority would determine the status of the federation. It would also determine whether Wang Baole would be able to live a carefree life in the future. At the same time... more importantly, it was where he had reserved the nutrients for his advancement to the star domain just in case!

After all, a corner of the Realm Ascension Plate was still missing.

Therefore, after sensing that the Divine Thoughts were hesitating, and hearing his master's words, Wang Baole spoke.

"Are you confident?" The Blazing Flame ancestor sent his divine thoughts over.

"I don't dare say all of them, but there are some. If it's really inappropriate... master, can you help me suppress them for a few months?"

"Yes!"

Hearing his master's words, Wang Baole smiled slightly. His dao aura spread out abruptly, instantly spreading out to the outer solar system. As the divine thoughts that had arrived outside the solar system hesitated..., they saw Wang Baole's true form within the Solar System!

In an instant... the divine thoughts began to tremble violently once again!

"A hundred-step starfield for the soul! A hundred-step starfield for the body as well! Cultivation at the perfected stellar realm... the target is also the hundred-step Starfield!"

"This... this... is unprecedented! This is the legendary body of the First Dao!"

"Once it succeeds, it will be the strongest starfield under the deity Emperor. If it advances to the middle stage of the Starfield... it will be able to fight the deity Emperor! !"

"The left Dao holy region is going to have an overlord? ! !"
