

## Worth 921

### Chapter 921 spirit spirit spirit fruit!

Before Wang Baole could finish his sentence, his eyes widened like everyone else's. He couldn't even stand properly, and he had no choice but to hold onto the altar at the side. His breathing was unsteady, and his vision was blurry, his brain was especially dizzy.

Is it poisonous

Wang Baole wailed in his heart. His body quivered, and suddenly, all the dizziness and blurriness of his vision gathered on his soul. At that moment, his soul.., there was a loud boom that no one else could hear.

Amidst the loud boom, his soul expanded. It seemed to have been stimulated, as if it had been injected with a great tonic. In the blink of an eye, it seemed to have been catalyzed and exploded.

The soul was below the planet. It was formless and existed in the physical body. It couldn't be identified because it was everywhere. To a certain extent, the physical body was merely the carrier of the soul.

But now... as the fruit melted and absorbed, and as the soul exploded, Wang Baole suddenly had a strange feeling. It was as if... He had sensed the soul, and at the same time, his clone.., it was as if... he was unable to support the soul!

That was because at that moment, his soul had indeed been greatly nourished. It was on the verge of breaking through in the blink of an eye. It had grown so much larger that it had exceeded the limits of what his body could support.

This feeling was as if the clothes he had been wearing had shrunk by a size. Wang Baole wasn't used to the tense feeling. It took him a long while before he managed to stabilize himself. He no longer held onto the altar, instead, he tried to raise his right hand..

However, when the command for this action was given... Even though he raised his right hand instantly, Wang Baole could sense that his body's reaction was a little slow. However, he quickly understood that it wasn't because his body was slow, it was because his soul had become stronger, and his reaction speed had become faster.

This fruit... is a good thing! After realizing this, Wang Baole was ecstatic. In reality, he knew very well that the success rate of advancing to a planet seemed to have nothing to do with the soul, that was because there weren't many things in the world that could allow one's soul to explode at the level of a spirit immortal. In reality, the soul and the cultivation to break through to a planet were closely related.

It could be said that this fruit had increased his success rate of breaking through by more than half. As for the other uses, Wang Baole wasn't an alchemist, and he didn't know the details of this fruit, so he didn't know yet.

But it didn't matter. Someone had told him!

The person who had told him was the masked woman!

This fruit is called the spirit spirit fruit, and it only grows in the fallen stars. There aren't many in the outside world, but among the endless wonder fruit, this fruit is known as the number one supplementary item for a spirit immortal to break through to a planet

"Although its function is only to raise the soul of cultivators and push them to their limits, it has another hidden function. That is... the chances of fusing with immortal planets and even special planets will be higher!"

The masked woman spoke slowly. When she spoke, Wang Baole's body trembled. Without any hesitation, he immediately picked up another fruit. As for the others, they were clearly aware of this, however, they were still in shock.

The reason for their shock was not what the masked woman had said. It was because they had recovered from their shock. Their dazed state had turned into an uproar and disbelief.

"How is this possible!"

"He actually managed to get his hands on it... Before this, only the third prince of the Weiyang clan had succeeded. This fruit... damn it, why didn't the fallen star emissary stop it?"

The commotion caused the entire ship to turn noisy from its previous silence. More than half of the prodigies in the area stood up immediately. The madness and jealousy in their eyes when they looked at Wang Baole were extremely intense.

When they saw Wang Baole pick up the second spirit spirit spirit fruit and eat it in front of them, they couldn't help but go crazy.

"What a waste of heavenly treasures. Xie Dalu, stop. You Can't eat this fruit directly..."

"For cultivators, one spirit spirit fruit is enough. It's useless if you eat too many!" The surrounding elites spoke quickly. Wang Baole also realized that the second fruit he had eaten had almost no effect. Even so., however, the taste of the fruit wasn't bad. Therefore, Wang Baole coughed and picked up the third fruit in front of everyone. This time, he ate it a little slower.

This scene caused everyone else to go crazy, especially Li Linzi. His eyes were red. He had never expected that the other party would actually be able to eat the fruit, however, he still felt that something was amiss.

Could it be... could it be that I won't be stopped by the fallen star emissary the second time? The thought surfaced in his mind. Even though he felt that it was ridiculous, the desire in his heart made him grit his teeth, he dashed toward the altar where Wang Baole was.

There were three to five other people who also rushed over. Their thoughts were similar to Li Linzi's. They were extremely fast, and they approached in an instant. Just as they were about to enter the altar, the paper figurine that was rowing the boat suddenly raised its right hand and waved, immediately, the powerful force that had stopped Wang Baole from approaching appeared once again. It stopped everyone and pushed at them fiercely.

With a loud boom, Li Linzi and the others trembled violently and retreated rapidly. One of them had been pushed too hard, and blood oozed out from the corner of his mouth. When the others saw the retreating figures, they sucked in a breath, they had recovered a little from their earlier frenzied state.

“Eh, I didn’t expect there to be such a fool. Li Linzi, don’t you know that since ancient times, only two people have ever obtained the spirit spirit fruit on the Starfall ship? Do You Think You’re the third?” Wang Baole finished the third fruit, he took the fourth fruit and returned Li Linzi’s previous words with disdain.

1

“You!” Li Linzi’s expression was ugly, but he seemed to be stubborn. He felt that if he tried a second time, there was a chance of success. His body swayed, and he charged toward the altar once again.

“Are you still going to try? Li Linzi, I admire your courage. You can do it!” Wang Baole said with a smile, he picked up the fifth fruit again. This time, he didn’t eat it. Instead, he tossed it around in his hands, looking as if he deserved a beating. He looked at Li Lin Zi, who was charging towards him. The moment he got close, he was stopped by the paper figurine with a wave of his hand, and he was once again sent tumbling.

This time, there seemed to be a sense of punishment. The force of the push was even stronger, causing Li Lin Zi to spit out a large mouthful of blood as he retreated. He staggered a few steps back, and his face turned pale. However, when he looked at Wang Baole., both his expression and eyes were filled with intense anger and grievance!

He was indeed aggrieved, but he had no choice. He had to admit that people were really different from each other... the others could tell that this was clearly the Starfall Emissary’s favoritism. Therefore, when Wang Baole boarded the boat for the first time., the scene of him rowing the boat until his cultivation broke through appeared in their minds once again.

“What right does he have?”

“This is too much!”

“He helped him break through his cultivation and even helped him board the boat. He didn’t even care about his rights to kill and plunder people. Now, he’s only allowed to eat the spirit spirit spirit fruit, and he’s eating it as he pleases... could it be that this Xie continent is the child of the falling stars?”

The intense imbalance made everyone feel extremely helpless. They watched helplessly as Wang Baole ate the fifth fruit in his hand, then picked up the sixth, as if he wanted to finish all the fruits, they forced themselves to calm down. As they racked their brains, the masked woman, who had told them about the fruit’s uses, suddenly spoke.

“Fellow Daoist Xie, I’m willing to pay three million red crystals to buy a fruit. Is that okay?”

“How much?” Wang Baole was just about to bite down when he heard that. His eyes widened, and he opened his mouth instantly. He didn’t continue biting down. Instead, he stared straight at the masked woman.

“Three million red crystals. This is the Xie family’s red crystal card. As a member of the Xie family, you naturally know it. There’s exactly three million in it!”As she spoke, the masked woman raised her right hand and took out a red jade token. She threw it at Wang Baole, in an instant.

Wang baole inhaled when he heard that. He raised his hand and pulled the jade token over. Although he did not recognize it, he had seen someone take out something similar in the Xie family market. It was just that the amount was not that large.

His heart raced. He looked at the fruit with the teeth marks in his hand, then at the remaining one on the altar. Suddenly, he felt endless regret.

Heavens, how many red crystals did I eat before? Fifteen million? I, I... I should have sold it earlier

### **Chapter 922, the Lightning Tribulation, continued!**

Just as Wang Baole was deep in thought, remorseful over the loss of the fifteen million red crystals, the eyes of the other elites on the ship flashed. Immediately, other people began to speak.

“Thank you, fellow Daoist. I am also willing to use three million red crystals to buy a spirit soul fruit!”

“Fellow Daoist from the continent, I will offer three million five hundred thousand. This fruit is indeed only useful for the first fruit. It is practically useless for the rest. Furthermore, you have eaten quite a lot. Sell it to me!”

“Four million. Thank you, fellow Daoist. The price I’m offering is already sky-high. Even though I don’t have enough Red Crystals on me, I can use my Dharmic artifact as collateral!”

Wang Baole was filled with even more regret as the others spoke one after another. He sighed and slowly narrowed his eyes. Someone had offered four million, but Wang Baole felt that the masked woman had remained as cold as ever, however, she didn’t participate in the taunts and didn’t hide her words. This made him feel good about her. He also understood that on the ship, or perhaps in the fallen star that he was about to head to, he was still a little weak.

Four million and three million are a huge fortune to me. There’s no need to be so greedy... at the thought of this, a strange light appeared in Wang Baole’s eyes. He raised his right hand and waved it, immediately, he rolled up the only remaining spirit spirit spirit spirit fruit on the altar and threw it at the masked woman. In order to avoid any misunderstandings, he spoke at the same time.

“There’s a first come, first served basis for doing things. I’m from the Xie family, so I have to abide by the principles!”

The moment Wang Baole rolled up the spirit spirit fruit and said those words, the masked woman’s body turned blurry. Before anyone could fight over it, she had already appeared outside the altar, she raised her right hand and grabbed the spirit spirit spirit fruit that Wang Baole had taken out.

With the fruit in her hand, the masked woman raised her head and looked deeply at Wang Baole. The coldness in her eyes softened considerably. She nodded slightly and returned to the spot where she was meditating, ignoring the greedy gazes of everyone around her. She swallowed the fruit in one gulp.

“Everyone, I’ve bitten the spirit spirit fruit in my hand and damaged its skin a little... if you don’t mind, Let’s auction off the final fruit. The highest bidder will get it!”Wang Baole coughed, after attracting

everyone's attention, he raised the spirit spirit spirit fruit with his teeth mark in his hand and spoke with anticipation.

He looked at the spirit spirit spirit fruit in his hand. Even though there were obvious teeth marks on it, the surrounding prodigies' eyes were burning with passion. After a short period of silence, the sound of an opening bid was heard.

The price soared. It went from three million to five million. Wang Baole was shocked as well. The sudden arrival of wealth had caught him off guard.

However, that didn't mean that the prodigies were stupid and rich. To them, the fact that they were the prodigies of their respective families and powers, and that they were qualified for the meteorite meant that they had high hopes, to them, wealth was something they could afford as long as it wasn't an exaggeration.

In their minds, the opportunities and treasures that could be purchased were worth it as long as they were useful to them. The spirit spirit fruit could not only increase the chances of their planet, they could also obtain the possibility of merging with the immortal planet or even a special planet. That way, they would not be left behind.

Just like that, after a round of competition, the spirit spirit spirit fruit with Wang Baole's teeth mark was finally bought by Li Linzi... the price he offered was so high that it was almost an exaggeration.

"Nine million!" Li Linzi roared. His eyes were red. He was afraid that Wang Baole would not sell it to him, so he simply offered a sky-high price.

When the others heard the price, they couldn't help but gasp. They hesitated and remained silent.

Seeing this, Wang Baole's eyes lit up. Li Linzi was overthinking things. If he had offered a normal price, it wouldn't have been a big deal. Wang Baole was completely moved by the price.

These people are F \* cking rich! Wang Baole suddenly felt energized. He realized that during this trip to the fallen star, he might not have been lucky enough to obtain a good planet to fuse with. Instead... he might have been able to make a fortune here!

With that thought in mind, Wang Baole saw that the others had stopped talking. He was about to nod, but thinking that he was someone with status, he cleared his throat and pretended to look down on wealth like dirt, he waved his hand lightly.

"Since you haven't continued, I'll sell you."

Li Linzi was nervous and excited, but he still felt aggrieved. However, he had no choice but to suppress it. He quickly handed over three red crystal cards and completed the transaction with Wang Baole.

After receiving the spirit spirit spirit fruit, he ignored the teeth marks on it and swallowed it in one gulp. He then sat down cross-legged and began meditating. Previously, there had been people who said that Wang Baole had wasted heavenly treasures, but that was mostly due to jealousy. If it had been anyone else..., they probably wouldn't have swallowed the spirit spirit fruit. Instead, they would have swallowed it directly. After all, only by eating it would they truly be counted as his own.

He had easily earned 12 million red crystals. With such a large amount of wealth that he had never, even in his dreams, thought he would never have, Wang Baole felt a little dizzy. After a long while, he recovered, his eyes were filled with a fanatical glow.

I want to go to the Xie family market and buy twenty nine Heavens Lightning spirits

I want to buy twenty catties of Water Cloud Heavenly River

“I also want to buy the heaven and earth spirit boat that is worth millions!”

As he thought about it, while he was excited, he suddenly felt that the ten million didn't seem like a lot. Therefore, he quickly scanned the surroundings of the altar and realized that there was nothing to sell, he scanned his surroundings again.

“It's gone...”after confirming that there was indeed nothing on the boat that he could sell, Wang Baole sighed with some regret. He was just about to leave the altar when.., wang Baole suddenly saw a familiar bright glow appear in the distant starry sky that was like an oil painting under the speed of the ghost ship.

This is... Wang Baole's eyes widened in that instant, and the bright glow instantly reached a blinding level. It charged straight for the ghost ship.

It was so fast that the moment everyone else noticed it, the light had already closed in on them. It turned into a giant bolt of lightning that was thirty feet thick and headed straight for the Ghost Ship!

A loud boom rang out. The ship was unharmed, but everyone on board was shocked. Even the masked woman opened her eyes and was on high alert. Everyone else was the same.

“An enemy attack?”

“Why is there lightning all of a sudden?”

“The size of this bolt of lightning is already comparable to the heavenly tribulation!”

While everyone was shocked, they didn't notice that even though Wang Baole was similarly shocked, his eyes flashed with guilt.

Others didn't know why the Lightning had arrived, but Wang Baole already knew the answer. It was a side effect of the wishing bottle, and it was clearly more terrifying than before. It was especially so when he thought about how the spirit cruiser was traveling at an astonishing speed, however, it was still caught up by the Lightning. From this, one could see how astonishing the speed of the Lightning was.

The magnitude of the Lightning also made Wang Baole nervous. Based on his experience, lightning like this would appear countless times in the future.

I believe that this spirit cruiser can withstand it! Wang Baole quickly comforted himself. He was even more worried about being discovered, so he immediately put on the same expression as the others. However, just as he was consoling himself, in the next moment.., a second bolt of lightning struck, followed by a third, a fourth, and a fifth..

Within a short period of time, the number of bright lights that appeared in the surrounding starry skies had increased to dozens. It didn't end there. In the next instant, it increased to hundreds and headed towards the spirit cruiser.

All the prodigies on the ship were shocked. Only the paper figurine rowing the boat remained calm and composed. It allowed the hundreds of bolts of lightning to strike. Amidst the loud noise, the spirit cruiser wasn't affected too much, it only trembled slightly.

Wang baole heaved a sigh of relief. He was even more pleased with himself. He thought to himself that his father was smart. With this invincible spirit boat, no matter how powerful the side effects of this tiny wishing bottle were.., he would be helpless in front of him.

He didn't know if this thought had angered the lightning bolts, but in the next moment, the surrounding starry skies lit up. If he could stand at a vantage point and look down, he would be able to see the surroundings of the speeding spirit boat.., the starry sky rumbled and formed a lightning sea that was the size of a civilization!

Countless bolts of lightning turned crimson in color. They were like violent red pythons that were charging towards the ghost ship from all directions. They were like mountains and seas that were about to topple over!

All the prodigies on the ship, including Wang Baole, had a drastic change in expression. Even the paper figurine that was rowing the ship, whose face had always been expressionless, twitched. The hand that was holding the paper paddle couldn't help but pause.

### **Chapter 923, the mysterious and peerless prodigy!**

It can't be... I just made a wish... Wang Baole wailed in his heart. He could already tell that the lightning this time, whether it was a single bolt, or the overall range and power.., it had far surpassed the lightning pools he had encountered previously.

There was no way to compare the two. It was like the difference between a pond and an ocean. Every bolt of lightning that appeared this time shocked Wang Baole to the core, and he felt a strong sense of danger.

Will the paper figurine know that it's me and throw me out... Wang Baole appeared as shocked as the others, but the anxiety and grief in his heart were greater than the others combined.

In reality, he knew very well that the bolts of lightning were coming for him. As long as the paper figurine threw him out, there would be no more lightning strikes on the ship.

It was especially so when he saw that the starry sky around him had turned completely red. Countless bolts of lightning struck from all directions like the wrath of the heavens. No matter how sturdy the ship was.., it began to tremble violently under the shocking sea of lightning.

It was as if it would disintegrate in the next instant. Wang baole grew even more nervous. The others on the ship might not be as strong as he was, but they were all extremely nervous. There was also a deep sense of confusion, they couldn't help but let out a low growl.

"Could it be that a mighty figure from the star domain is making a move?"

“That’s impossible. Even a mighty figure from the star domain wouldn’t make a move against us. After all, any one of our family clans and factions is powerful enough. If we add them together... would a mighty figure from the star domain dare make a move?”

“Could it be that this is a necessary process to go to the fallen star lands? But it’s not recorded in the family clan’s ancient records.”

Everyone’s minds spun in shock, and they had no choice but to make preparations. Once the ship collapsed, how could they escape? The paper figurine’s expression turned grim, and it waved its right hand, causing a layer of gentle light to appear, the light instantly enveloped the ship, and it faced the lightning that was spreading out in all directions.

Rumbling sounds filled the air, and a shocking explosion rang out, causing everyone to feel as if their ears were going to explode. The ghost ship trembled as never before, but in the end, it was able to withstand the lightning.

However, there was no time for everyone to relax. In the next moment... The Sea of lightning around them seemed to explode with rage. It actually gathered all the lightning within its range, and with an even more exaggerated and shocking aura than before, it attacked once again.

Seeing that, the paper figurine let out a low growl. White Light radiated from its body, and it paddled the paper paddle at a speed that it had never seen before. The moment before the lightning gathered around it.., the speed of the Ghost ship was astonishing. It sped off into the distance. It was so fast that Wang Baole and the others on the ship felt extremely uncomfortable.

Blood trickled down the corners of some people’s mouths. They had to hold on tightly to the objects around them. Otherwise, they would be flung away. At this extreme speed, the ghost ship finally avoided the Lightning Sea. It was like a black hole that had been created, it dived straight into the Lightning Sea. The next moment, it appeared in the starry sky far away from the Lightning Sea, as if it was jumping.

However, the crisis wasn’t over... before Wang Baole could heave a sigh of relief, lightning appeared once again in the originally calm starry sky. The Lightning Sea chased after it as well. From Afar, the Lightning Sea was extremely fast, the bolts of lightning that spread out continuously landed on the spirit cruiser. As the spirit cruiser continued to shake, the rumbling in the surroundings became even more shocking.

“This isn’t over!” Wang Baole wanted to cry, but he had no tears. The rest of them were pale as well. They watched the paper figurine paddle crazily and watched the bolts of lightning continue to fall. Thankfully, the spirit cruiser was indeed extraordinary, the paper figurine seemed to have used all its strength. It was unable to shake off the sea of lightning even though it had teleported over and over again. However, it wasn’t trapped in the middle of the sea of lightning like before.

However... the vast sea of lightning seemed to lock onto the ghost ship as it chased after it. Even though more than a month had passed, the Sea of lightning was still persistent... looking from afar.., anyone who could see the ghost ship in front and the Sea of lightning in the back would feel waves of shock in their hearts.

They would even have the misconception that the sea of lightning was a part of the Spirit Cruiser's divine ability. The bolts of lightning that kept striking the spirit cruiser were like chains, causing the sea of lightning behind it to spread open like a peacock's tail, it also highlighted how extraordinary the spirit cruiser was.

However, this was not what Wang Baole wanted, nor was it what the dozens of prodigies on the ship wanted. During this period of time, no one spoke. Everyone's face was pale. Even the masked woman.., there was fear in her eyes. She couldn't sit still and meditate.

Similarly, this wasn't what the paper figurine wanted either.

Wang Baole didn't know if he was imagining things. He could faintly see sweat on the paper figurine's forehead. This made his heart tremble even more. He swore to himself that he would never use the wishing bottle recklessly again.

This isn't a wishing bottle. This is a divine suicide artifact! Wang Baole was filled with grief and indignation. Time passed once again. Another half a month passed.

The Lightning Sea... continued its relentless pursuit. At that moment, the spirit cruiser slowed down and entered... a different space!

Wang Baole didn't notice how it entered. It was as if it was teleporting, as if it was shuttling, and as if the surrounding space was changing on its own in an instant.

It was a white space. More accurately speaking, the color of this space was the color of white paper. That was because... looking around, the endless area around them was really like white paper, especially in this white space, there were stars of all sizes, and when you looked at them... They were all white paper!

Meanwhile, the ghost ship slowly came to a stop in front of a huge white paper planet!

"White Paper Starry Sky, White Paper Planet! This is the gate to the fallen star lands! !"Someone on the ship immediately cried out in excitement. The reason why they were so excited was mostly because they felt that the lightning might not appear once they arrived.

In reality, though the Lightning Sea didn't appear at the beginning, it only took about ten breaths of time before the Crimson Lightning Sea descended in the white starry sky, it spread rapidly towards Wang Baole's ghost ship from afar.

It's over! Wang Baole's eyes widened. The others around him couldn't help but wail. Perhaps the white starry sky where the door to the land of the fallen stars was located was indeed something strange, causing the Crimson Lightning Sea to chase after them, however, it stopped behind their spirit cruiser. It looked terrifying, but it didn't drown the spirit cruiser. Instead, streaks of scarlet lightning struck the spirit cruiser continuously.

This process lasted for half a month. During this half a month, Wang Baole and the others were extremely nervous. Even the paper figurine stood there vigilantly.

Half a month later, in the distant white starry sky, a second ghost ship suddenly appeared!

It was followed by a third, a fourth, and a ninth ghost ship. Wang baole finally understood that there wasn't one meteor ship, but nine!

He couldn't help but look at the other eight ships. He wanted to see if there were any powerful elites among the elites on board that couldn't be defeated. It wasn't just Wang Baole, it was the same for everyone else on the ship, in reality... the elites on the other eight spirit cruisers were the same. However, they all looked at the ship that Wang Baole and the others were on almost at the same time!

The ship that Wang Baole and the others were on was simply too shocking. It wouldn't be an exaggeration to say that it was the center of attention. Many people were stunned. That was because in the white starry sky, the Crimson Sea of lightning., it was even more eye-catching than the torches in the dark!

They didn't know that the sea of lightning had been chasing the ghost ship the entire way. When they looked over, due to the floating sea of lightning and the Suppressive Force it exuded, they instinctively thought that the ghost ship was... Incredible!

Could it be that there is a peerless prodigy on this ship who is using this method to intimidate us? Many people narrowed their eyes, their eyes filled with wariness. At the same time, this thought arose in their minds!

#### **Chapter 924 — the sorrow of the raging flames!**

It wasn't their fault for making a wrong guess. Anyone else would have made the same judgment when they saw the red lightning that filled the sky after seeing a meteorite ship.

Most importantly, the red lightning didn't seem to be aggressive. It was just a majestic presence that accentuated the spirit cruiser. As a result, the other prodigies on the other eight meteorite ships., they began to scrutinize the people on Wang Baole's ship.

Wang Baole and the others weren't stupid either. They quickly realized what was going on. They felt that something was amiss, but none of them tried to resolve the misunderstanding. Instead, they remained silent, causing the misunderstanding to worsen.

As for Wang Baole, his gaze swept across the other eight ships. He felt a sense of solemnity in his heart. He took a rough look at the number of people on the eight spirit cruisers. There were about four hundred people. If he included himself., there were about four hundred and fifty to sixty people who had entered the fallen star this time.

The weakest among them... were much stronger than the perfected Spirit Immortal realm cultivators in the outside world. He felt that they were as difficult to deal with as he had been when he hadn't reached the perfected Spirit Immortal realm, there were also some who seemed to be on par with him. There were even a few who Wang Baole couldn't see through.

Even though that's how it feels, when it comes to actual combat, it's not just one's cultivation that determines the outcome. It's also the Dharmic treasures and battle awareness... Wang Baole narrowed his eyes and pondered. Some of the gazes from the other eight ships., they swept past Wang Baole as well, but he could vaguely sense that the focus of most people's attention was on the masked woman.

As everyone sized each other up, the nine spirit boats gradually came to a halt outside the giant paper planet. Suddenly... The giant paper planet emitted an even more intense white light, it enveloped the entire area, and at the same time, a loud boom rose into the sky.

As the sound erupted, the giant paper planet began to tremble visibly. Slowly, it seemed to stretch out. From its spherical form... it stretched out into the shape of a human!

To be precise, it was a huge paper man. It looked exactly the same as the paper man in the boat, as if all the paper men were no different in appearance.

Its entire body was originally curled up, so it looked like a planet. However, as it stretched out, when its body was completely revealed, the entire starry sky trembled, and an indescribable pressure.., it was as if mountains and seas had been toppled from his body. Like a storm, it spread out in all directions, enveloping the entire area. At the same time, it was as if there were more than a thousand stars within his body, converging together to form a mighty pressure.

Just a single glance caused everyone's hearts to tremble, and their eyes to sting. It was as if a single thought from the other party could blind all of their eyes. This feeling turned into a pressure that almost suffocated everyone!

It was partly due to the terrifying level of his cultivation, and partly due to the size of his body. Before him, the elites who had come for the training were not even ants. Only the nine spirit cruisers seemed to be on top of him, that was why they could barely be called ants!

"A mighty figure from the Galaxy!" That was Wang Baole's judgment when he saw the gigantic paper figurine, it was the same judgment that surfaced in his mind the moment he felt the pressure. He had only felt this kind of feeling from two people. One was the blazing flame ancestor, and the other was his senior brother, Chen Qingzi.

However, even though the feelings were similar, there were also differences in strength. It was obvious that the paper figurine was not as vast as the blazing flame ancestor. Compared to his senior brother, the difference in sharpness was even greater.

Wang Baole wasn't the only one to come to such a conclusion. The prodigies who were able to come here had backgrounds that could be considered wealthy in the entire Weiyang Dao Domain. They had seen a lot of things, so they immediately made their own guesses.

The prodigies were shocked. They retracted their gazes and lowered their heads to greet Wang Baole. Suddenly, the giant paper figurine opened its eyes abruptly, revealing a cold glow. At the same time, a voice rang out in the starry skies.

"Welcome to the meteorite gate!"

The moment the words left its mouth and reverberated in everyone's minds, the white starry sky seemed to be affected as well. Large amounts of ripples appeared, spreading out in all directions, causing the entire white starry sky.., it seemed to have turned into a rippling sea surface!

A huge wave of white waves appeared in the distance. It kept rolling and rising, and in the next instant, it reached the end of everyone's sight. Everyone, including Wang Baole, could not help but raise their heads, they could not hide the shock on their faces.

Even the masked woman and the other prodigies that Wang Baole had been paying attention to were stunned for a moment. It was true... that the huge wave that had been stirred up was slowly revealing its true appearance as the ripples disappeared!

It was not a huge wave at all. It was like a piece of flat paper that had been folded in half and turned into a wave!

Or perhaps it wasn't appropriate to use the word "Folded" to describe it, because if you stood at the highest point and looked down, you would see... that in the black starry sky, the white region... was actually a huge piece of white paper!

It didn't matter if it was a paper figurine or a meteor ship, or the 400 chosen inside of it, all of them were on the white paper, which was being folded in half!

All of this takes a bit of time to describe, but actually happened in the blink of an eye. In the next moment, the huge piece of paper was folded in half, covering the nine Starfall ships, the people inside, and the paper figurine, at the same time, the area of the white starry sky was reduced by half.

It wasn't over yet. As the sound of the paper being folded echoed out, it was actually folded in half again. After that, it was folded again and again, and the area of the paper began to shrink, as it became thinner and thinner, its thickness also increased without limit.

As it folded in half, the white paper that eventually appeared in the galaxy suddenly turned into a white needle. It stabbed into the void, pierced through it, and disappeared!

Almost at the instant it disappeared, dozens of auras immediately descended from the depths of the galaxy in the area where the white paper had once been. They did not turn into concrete figures, but wills descended instead.., after sensing the area, they stared at the spot where the white needle had disappeared.

"It's still the same method..."

"Even if I look at it again, I still won't be able to figure it out. I can't find the true location of the fallen star land!"

"I can be sure that although this seems to be related to the dark art, there's actually no connection between the two..."

"The fallen star land is a crack that connects the Weiyang Dao domain to the outer domain..."

"There's also that crimson bolt of lightning. It's a bit strange... it actually went in with them?"

Each of these wills was a patriarch-like existence in their own clans and factions. They had gathered here not to protect their own children, but to see the door to the fallen star open once more, they had tried to study it from the inside.

However, it was clear that they had still failed this time.

At the same time, in the depths of the starry sky, in a starry sky filled with flames, was a gigantic planet. It looked like a majestic pill furnace, and was surrounded by hundreds of stars that provided it with high temperatures, an old man sat cross-legged at the top of the Pill Furnace Planet.

This old man was none other than Patriarch Flame. His eyes, which were originally closed, suddenly opened. He lowered his head and flipped his right hand, causing a voice transmission jade slip to appear in his palm. He lowered his head to look at it, then looked into the depths of the starry sky, a smile slowly appeared on his lips.

“The little kid from the Xie family is asking for help? He’s asking for my help to plead for him? Isn’t he looking for the wrong person... However, I have a feeling that before Chen Qingzi kills the Moon splitting divine emperor, his little junior brother will become my disciple.”

“Chen Qingzi, Oh Chen Qingzi, this is fate. HMPH, I might not be able to defeat you, but if my premonition comes true, when you see me, how should you address me? Also, the little kid from the Xie family is asking for help. Haha, interesting, interesting. I wonder what the kid’s expression will be like when he finds out that the person he needs help from is that Kid Baole...” The Blazing Flame Patriarch couldn’t help but laugh out loud.

His laughter echoed throughout the entire raging flame star field, echoing in the minds of the countless living beings in the area. Eighteen illusory figures appeared around him, rapidly condensing into eighteen cultivators of different races, they knelt down and kowtowed to the blazing flame patriarch.

“We pay our respects to Master!”

“May I know why master is so happy?” All of these cultivators had extraordinary cultivation bases, and when they saw how happy their master was, they couldn’t help but ask with a smile.

Patriarch Raging Flame, who was sitting on the pill furnace, once again laughed happily.

“There’s a very high chance that you’ll have an additional junior brother.” As he spoke, no one noticed the grief in the depths of Patriarch Raging Flame’s eyes as he looked at his disciples.

“Your real junior brother...”

### **Chapter 925 the land of the fallen stars!**

The land of the fallen stars was the legendary region within the Weiyang Dao Domain. It was also one of the most mysterious places!

If one wanted to enter this place, one had to satisfy three conditions. The first was the moment it was opened. The second was that one’s cultivation base could not exceed that of a planet. As for the third, one had to possess the qualifications to be a sealing mark!

These three conditions could not be missing. As a result, the greed of too many people had been stopped. It was not as if there had not been a star or even a star domain’s mighty figure interested in this place over the years. However, those who tried to force their way in had all failed without exception.

In fact, even the Weiyang clan had suffered heavy losses when they tried to barge in under the leadership of a divine emperor. In the end, the divine emperor had returned and publicly apologized. This matter shocked the entire DAO domain, and it also caused the various factions and clans., they had no choice but to give up on their greed and spying on the fallen star lands.

Fortunately, the fallen star lands did not completely exclude the outside world. They had used various methods to send out five hundred quotas. Although only four hundred of these quotas remained after the passage of time, the attitude of the fallen star had already shown that.., as long as they followed their rules, they would welcome the outside world.

That was why the meteorite base's trip, which took place once every few hundred years, had taken place.

At that moment, as the white paper disappeared after being folded in half, the four hundred plus prodigies on the nine meteorite boats were all dazzled. Wang Baole was no exception. However, they quickly regained their sight, the entire process seemed to take only a few breaths of time..

When Wang Baole regained his vision, he immediately saw that the place he was in was completely different from the outside world.

It was an ocean!

At first glance, the color of the ocean was black. However, if one took a closer look, one would be shocked to discover that this ocean... was actually formed from countless pieces of black paper!

As for the sky... although it was a normal blue color, the sun hanging high up in the sky was also made of white paper. Looking around, everything around them... seemed to be made of paper!

Even the seabirds in the distance, as well as the clouds in the sky, everything was made of paper!

As for the colors, other than the sky, there were only black and white!

Only... The ship they were on and themselves were not made of paper in this world. Therefore, a sense of incompatibility caused Wang Baole and all the elites on the ship to be shocked.

"The Meteorite Paper Sea!"

"After crossing this sea, we can enter the meteorite empire..."

"We've entered the meteorite land!" Wang Baole didn't know much about the meteorite land, however, the other elites were different from him. With the deep foundations of their respective clans and factions, they had a detailed understanding of the place. Someone immediately exclaimed in a low voice.

Listening to the cultivators beside him, Wang Baole narrowed his eyes. The words 'Sea of paper' and 'empire' appeared in his mind. He swept his gaze across the surrounding Black Sea of paper. Just as he was about to take a closer look, suddenly... the voice of the giant paper figurine that had appeared earlier in the outside world.., reverberated throughout the entire world.

"Cultivators from the outside world, some of you may already know what this place is, but there should be some who don't. Now, let me tell you, this is the Starfall Black Sea."

"I am well aware of your purpose in coming here. You are here to obtain good fortune, to obtain a special planet, and to advance to a planet. This is also the reason why the Starfall Black Sea was opened. However... if you want to obtain these things, you will need to undergo some tests. Right now, this is the first test, and also the easiest entry test

“Among you, only those who can go ashore are qualified to become distinguished guests of the Starfall Empire

“The shore is far away. If you keep going, based on your average cultivation level, it will take about five days to reach it. The limit is five days. During that time, you can use any method. As long as you can get ashore, it will be considered a success. However, if it takes more than five days, it will be considered a failure

“I want to remind all of you that this sea contains a terrifying aura of black resentment. This aura can turn everything in the world into paper, including your bodies. In fact, it is not uncommon for cultivators to sink into this sea and become a part of it during the opening of the sea

“Now, it’s up to all of you to see what you can do!”The voice was loud and mighty. The moment it finished speaking, Wang Baole’s expression changed. He immediately realized that the Black Sea of paper seemed to have lost some sort of invisible suppressive force, a large amount of black gas spread out from within, directly covering the surroundings of the spirit cruiser. Wherever it touched, the cruiser could be seen with the naked eye... It was rapidly turning into paper!

It wasn’t just the ship he was on. The other eight ships were doing the same. Some of the people on the ship looked as calm as ever, but there were still quite a few whose expressions changed when they saw what was happening.

In fact, based on the speed at which the ghost ship was turning into paper, it wouldn’t even take an incense stick to burn, much less five days. The entire Starfall ship would turn into a paper ship. It was easy to imagine what would happen to the people on the ship if that happened, they would definitely die here.

The only way to save themselves was to leave the ship and fly through the sky. They would use their cultivation base to turn into speed. On the one hand, they would resist the invasion of the Black Qi, and on the other hand, they would use their fastest speed to fly to the shore.

Instead of saying that the meteor ship was a test for them, it would be more accurate to say that they would be eliminated. Those who did not meet the requirements would be eliminated. Furthermore, once they were eliminated, their fate would be death!

What a huge sum of money. It was just an entrance test, and they didn’t care about the nine extraordinary starfall ships and the nine paper figures on them? As for the sky, it wouldn’t be that simple. If they could really fly without any obstacles, the test would be meaningless, wang Baole was shocked. He instinctively looked at the paper figure that was still rowing, and he couldn’t bear to see it happen.

The good fortune that the paper figurine had given him, as well as the interactions they had had along the way, had made Wang Baole no longer view it as an inanimate existence. He felt that it was also an inanimate existence. It was just that its form was different.

However, this matter didn’t depend on his will. With Wang Baole’s current level of cultivation, he couldn’t protect it. Furthermore, on second thought, no matter how powerful a faction was, they probably wouldn’t use such losses to test outsiders, therefore, there was a high chance that he was wrong. The paper figurine and the boat would be fine.

After all, they were both paper figurine. How could they turn into paper again.

This thought made Wang Baole feel slightly at ease. He raised his head and looked at the other eight meteorite boats. At that moment, many cultivators had already abandoned their boats. They turned into long arcs in mid-air and sped off into the distance. It was the same for his boat, the masked woman, Li Linzi, and the others had all flown out.

Almost everyone's bodies trembled more or less the moment they rose into the air. They were clearly affected by the unknown. There were even a few who fell headfirst, almost falling into the black paper sea, it was fortunate that their cultivation had erupted at the critical moment. They had barely managed to hold on and avoid the danger. However, their pale faces and the fear in their eyes still showed the difficulty of flying in the sky.

There is indeed something wrong with the sky! Wang Baole narrowed his eyes. In his eyes, the heaven's favorites who had abandoned their ships were like eight immortals crossing the sea, each of them displaying their supernatural powers. Some of them were glowing with treasure light, they charged forward under the protection of their bodies. There were others who took out all sorts of Dharmic treasures that were clearly extraordinary. They used them to resist and charge forward.

There were others who formed hand seals and transformed into nine black dragons. They roared as they surrounded the dragons and stepped on them as they advanced. All sorts of methods, each different from the others, bloomed in the sky.

Their cultivation levels were all revealed at that moment. Even though they were all at the Perfected Spirit Immortal realm, the strength of their auras could still be detected by others.

There were four people among them. Their speed and Aura had reached an extreme, causing Wang baole to stare at them.

There were four people, two men, and two women. One of them was the masked woman on his boat. The woman immediately flew out of the boat, and in mid-air, a seven-colored glow appeared beneath her feet, transforming into a gigantic seven-colored phoenix, as she neared, she ignored the obstacles in the sky. Her speed was so fast that she became one of the four fastest people on the boat!

There was also a woman from the other boats. This woman was beautiful and had a smile on her face. Her body was incomparably graceful. At the same time, she had a bell tied to her right hand. With a slight shake, the sound of the bell spread in all directions, it formed ripples that could be seen by the naked eye, and she actually stepped on the ripples. The more the bell rang, the faster her speed became!

As for the other two men, one was swift and fierce, while the other was refined and refined. The Swift and fierce man wore a black robe. As he took a step forward, his right hand formed a seal in midair. Instantly, a long sword materialized from nothingness and waved around him like a long river, at the same time, a shocking murderous aura erupted from his body. Wherever he passed, the obstacles in the air seemed to be unable to stop him, and he directly swept through the air!

The last refined cultivator had the most unique method of crossing the sea. He held a bamboo slip in his hand, and as he lowered his head to read, he directly stepped on the Black Sea. He allowed the Black Qi to surge over, but it stopped thirty feet away from him, he was unable to enter the Black Sea at all, and

his footsteps were neither fast nor slow. He stepped on the scraps of paper in the Black Sea and walked further and further away.

Seeing this, Wang Baole was also shocked by the four of them, but he also felt a little unconvinced.

I can do it too! Thinking of this, Wang Baole turned his head and cupped his fists at the paper figurine rowing the boat. He leaped up and sped through the air.

### **Chapter 926 Divine Might Dao Lightning!**

The moment he flew up, Wang Baole immediately understood why the bodies of the first batch of prodigies who had risen into the air had trembled the moment they rose into the air. Some of them had been unprepared and had almost fallen into the black paper sea.

That was because there was an intense pressure in the sky. The pressure made Wang Baole feel as if an earth-shattering mountain had suddenly pressed down on him. Even someone as powerful as him had his body shudder, even though his body didn't sink, his cultivation was thrown into disarray.

It's not just the increase in weight. It's also the effect on my cultivation! Wang Baole narrowed his eyes. He wasn't ordinary to begin with. He could still withstand the effects and weight. If his speed was a little slower., if he allowed the power of his cultivation to slow down, the effect would gradually decrease.

However, it was clear that the assessment would not be so simple. The moment Wang Baole's thoughts surfaced, he saw the first batch of cultivators who had flown out from a thousand feet away. They were moving at a slower speed, their figures began to twist and turn. There were even three or four of them who had almost fallen into the sea. They had regained their composure, but now, they were trembling again. Their faces were filled with fear, they fell into the sea of paper once again.

Among the four people who fell this time, three managed to recover in the end. However, there was still one who was unlucky. He could have recovered and started again. However, the moment he fell, a huge wave happened to roll up, it actually enveloped him. Even though he struggled crazily, he was unable to change the outcome of his legs turning into black paper that could be seen with the naked eye!

Amidst the shrill screams, he lost control of his body and was completely submerged. His body could be seen. Within a few short breaths, he had turned into a black paper figurine and disappeared into the waves.

This scene shocked everyone. Wang Baole's expression changed as well. As for the other three who had almost fallen, their faces were pale and their eyes were filled with fear. They didn't dare continue forward and retreated rapidly instead.

As a result, the seventy to eighty people who had flown out of the first group were immediately divided into different levels. The first group was obviously the masked woman and the other two. They had already flown to an area of nearly ten thousand feet. The second group behind them., there were more than fifty people. Even though their speed was obviously much slower, they seemed to be able to hold on for a period of time if they were cautious.

As for the others... They didn't dare fly after seeing that someone had died. Their expressions kept changing, and they were in a dilemma.

At the same time, the second and third batch of elites also flew out. They had seen what was happening, but if they didn't leave the ship, they would still fail. Instead, they might as well take the risk!

All of this made Wang Baole wary. He was about to increase his speed in mid-air, but at that moment, the masked woman and the other three, who were at the furthest distance away, suddenly stopped moving at a speed that was ten thousand feet away, even though their speed quickly returned to normal, Wang Baole's eyes had a glint in them.

This was especially so when he was observing the others. Coupled with the fact that he had used his divine perception to scan the surroundings, Wang Baole could immediately tell that the pressure here... would increase exponentially with the increase in their speed and the increase in their flying distance. In other words.., it would be more and more difficult to maintain a normal speed!

No wonder the requirement is five days

If I want to maintain a speed that can reach the shore within five days, the pressure I will eventually face will reach an extremely terrifying level... Wang Baole took a deep breath. Even though the difficulty was there, he still felt that he should be able to.., at that moment, his body swayed and his speed exploded. Even though the pressure had increased and the impact on his cultivation had increased, it was still unable to restrict his figure. In just a few short breaths, he had already reached a distance of more than five thousand feet.

This scene was like a lone star in the crowd, causing many people behind him to look shocked. Even the four masked women in front of him turned their heads slightly at their respective spots and looked at Wang Baole.

In fact, if this burst of power could continue, Wang Baole would be able to catch up to the four of them in just a few more breaths. Even though they were confident that they wouldn't fall behind, they had to admit that if Wang Baole caught up to them.., the other party had the right to keep up with them.

"Who is this person!"

"This speed is too ferocious!"

All sorts of thoughts surfaced in everyone's minds. However... the development of the situation was different from what everyone had imagined. Wang Baole was brimming with confidence. Just as he was about to catch up to the four masked women in front of him in one go... suddenly.., his hair stood on end. A streak of crimson lightning that had disappeared without a trace before appearing appeared in front of Wang Baole out of thin air, striking straight at him!

"F \* ck you!" Wang Baole screamed. He immediately recognized that the bolt of lightning was a side effect of the wishing bottle. He retreated rapidly, but it was too late. He was struck in an instant.

As he screamed, Wang Baole was nearly thrown into the Black Sea. He barely managed to withstand the force, and his body trembled. Madness appeared in his eyes, and the anger in his heart reached its peak in that instant.

"You Sly Old Fox!" Wang Baole roared, it was obvious that the Lightning had been hidden here for a long time. It didn't flare up when Wang Baole had just left the ship, nor when he was in midair. It only waited for Wang Baole's speed to explode, and it immediately arrived.

This feeling made Wang Baole feel that the Lightning was extremely sinister. At the same time, his vigilance against its viciousness was raised to the maximum. However, just as his anger was about to flare up, in the distant sky.., in an instant, dozens of scarlet bolts of lightning appeared. Behind them, hundreds of bolts of lightning were brewing in the void. If one were to look carefully from afar, one could see tens of thousands or even more of them, ready to make a move.

This scene made Wang Baole blink his eyes. He let out a wail, and his anger turned into fear. He turned around and used all his strength to charge five thousand feet away on his meteor ship.

Behind him, dozens of scarlet bolts of lightning chased after him. This scene caught the eyes of the crowd, and they were stunned. Even the first batch of people in the distance were shocked.

“Could it be that in addition to the pressure and chaotic cultivation, there’s also the Lightning Tribulation in the first trial?”

“What’s going on? Why is he the only one being struck?”

“The lightning... looks familiar...”

Amidst the confusion, there were still some elites who had been on the same boat as Wang Baole. Seeing this scene, they instantly understood what was going on. It was even more so for Li Lin. Anger appeared in his eyes, and he roared.

“Xie Dalu, so it was you who attracted the Lightning!”

The other people who had been on the same boat as Wang Baole also glared at him angrily. However, Wang Baole was no longer in the mood to bicker with them. As he sped along, he was chased by the dozens of lightning bolts. He returned to the boat.

There weren’t many cultivators left on the boat. There were only seven or eight of them. They all looked anxious. It wasn’t that they didn’t want to leave. It was that they felt that with their cultivation, it would be difficult for them to reach the shore after they left, it wasn’t easy.

The entrance test seemed simple. However, in the entire Weiyang Dao Domain, ninety-nine percent of cultivators at the perfected Spirit Immortal Realm wouldn’t be able to pass!

That was why they didn’t pay much attention to Wang Baole’s return. Instead, they gathered together and spread out their cultivation. It was as if they wanted to rely on everyone’s hard work to suppress the resentment that was spreading, the process of turning the ship into paper was slowed down as much as possible, so that they could use it to move forward.

In reality, they weren’t the only ones who had done so. There were a few cultivators on the other ships who had chosen this method. However, the results weren’t ideal. At that moment, more than half of the ship Wang Baole was on had turned into black paper, it seemed like he wouldn’t be able to hold on for long. However, at that moment, Wang Baole’s body landed with a loud crash. The instant he landed, the dozens of scarlet bolts of lightning that were chasing after him descended with a loud bang and landed directly on the boat.

The entire boat shook slightly. Just like before, there wasn’t much reaction. It seemed to be able to resist the power of the Lightning. However... the resentment of the Black Sea that was lingering on the

boat was like a mouse seeing a cat. It had a huge reaction, it retreated instantly. There were even some places that couldn't Dodge in time. After being struck by lightning, there were screams that sounded like screams. The resentment dissipated immediately, and the area of the ship that was revealed was visibly restored!

This scene immediately stunned everyone on the ship. Even the elites in mid-air widened their eyes in disbelief and disbelief.

Even Wang Baole himself was stunned for a moment. His eyes instantly lit up. He suddenly raised his head to look at Li Lin, who had just shouted at him angrily in mid-air, and snorted disdainfully.

"Idiot. This is me casting a spell to purify the entire Black Sea and return the world to its former glory!" As he spoke, he raised his right hand and made a hand seal.

"Divine Power Dao Lei, Come!"

### **Chapter 927, grab it!**

Wang Baole spoke arrogantly. As soon as he spoke, hundreds of crimson bolts of lightning struck the Starfall ship, causing the Black Sea resentment on the ship to retreat in a large area, more areas revealed their original appearance.

That wasn't the end. In the next instant, more bolts of lightning struck. The bolts of lightning seemed to have intelligence. They didn't search for anyone else. Even when they flew past the elites in midair, they didn't harm them at all, all of them landed accurately on the ship..

The entire ship had turned into paper. It was rapidly recovering at a speed visible to the naked eye. Wang Baole was excited. He felt that this was the result of extreme sorrow and joy. He raised his head and roared towards the sky.

"Today, I, Xie, wish to completely wipe out the Black Sea and exterminate the Fiend Dao Lightning. Come, come, come, come!"

As soon as he said that, more bolts of lightning struck. They enveloped the entire ship, causing all the resentment in the Black Sea on the ship to instantly disappear without a trace. It even affected some of the surrounding areas on the surface of the sea, the black color gradually faded and turned white!

Even though more resentment gathered from the surrounding areas, resisting the lightning and forming a balance, the ship that Wang Baole was on had completely recovered. Even the paper figurine on the ship had a strange look in its eyes, it rowed the oars and sailed into the distance.

However, the scale of the Lightning was clearly still affected here. It was not as large as it was in the outside world, covering an area the size of a civilization. In this place, it only covered the area of a single ship.

Even so, this scene still left the seven or eight people on the ship shocked and overjoyed. It also caused the auras of the people in the sky and the other ships to change.

"What kind of lightning is this? One moment it's divine might, the next it's devil-exterminating..."

"No matter what it is, it seems to be able to restrain the resentment of the Black Sea! !"

Other than those who had already flown far away, all the chosen in a certain area who saw this scene were shocked to the extreme. The other eight ships had already mostly turned into paper, the worst one had already been reduced to 90% paper. At this moment, it could be seen that it had almost merged with the Black Sea, and the cultivators in it had no choice but to fly out.

The other ships could not hold out for long either. This made some of the cultivators who had come to the fallen star land, thinking that it would be difficult to reach the shore, extremely anxious.

Although there were not many of them, there were about a hundred of them. Under the pressure of the sky, they knew that they would not be able to reach the shore if they sped up. Although, if they slowed down and maintained their speed in mid-air, they had to be careful.., they could avoid falling into the Black Sea, but that would mean that they would lose the right to enter the fallen star lands and obtain the serendipity five days later.

How could they accept this? They had all been worried and depressed, but now... Wang Baole's recovery of the ship gave them hope amidst their anxiety. Their eyes shone brightly.

It was obvious... that if they could board the ship, they could reach the shore in five days!

They weren't the only ones who had such thoughts. Those who felt that they could reach the shore with their own cultivation and speed were also tempted. After all, once they boarded the ship, they would reduce the risk, and they would be unharmed, this would naturally bring great benefits to the subsequent assessment.

Very quickly, someone rushed out from midair and headed straight for Wang Baole's ship. Behind him, there were even more cultivators who turned into streaks of light and were about to board the ship forcefully!

If anyone tried to stop them, they would become their common enemy. Some of them even looked at Wang Baole with a warning look.

Seeing this, Wang Baole felt sick to his stomach. He sighed inwardly. His thoughts had been cleared by the matter of selling the spirit spirit fruit. He knew that the elites from the large and powerful clans were all rich people, they could easily fork out millions of red crystals. He couldn't help but feel depressed.

If only I could sell the tickets... that would be great. Wang Baole felt regretful, but he knew that it was unlikely. If he were to forcefully stop everyone, he wouldn't be able to do it. He wouldn't be able to do it alone, it would be difficult to stop them completely. If he were to do it, it would be equivalent to incurring the wrath of the masses..

Wang Baole could only let out a long sigh. He knew that there was money to be made, but he was unable to get his hands on it. However, just as he sighed, the figure of the Prodigy who had rushed in first approached him, the Crimson Lightning Bolt's target was not him, so although it appeared to be soul-stirring, it was actually unharmed as it shuttled through the lightning bolt. A look of pleasant surprise appeared on its face, and it looked as if it was about to board the ship.

However, at that moment... the paper figurine rowing at the bow of the ship raised its left hand and waved it casually. Immediately, the youth who was about to board the ship let out a blood-curdling

scream, as if he had been slapped by an invisible palm, he spat out a mouthful of blood, and his body tumbled backward at an even faster speed.

This scene made Wang Baole's eyes widen, and it also shocked the other people who had rushed over. However, they were already close to the ship, and their eyes were filled with viciousness. They dispersed, still attempting to board the ship.

In the blink of an eye, dozens of people shuttled through the Lightning. However, the moment they boarded the ship, the paper figurine still raised its left hand and waved it gently. Immediately, screams of pain rang out. Out of the dozens of people, only two were unharmed, while the rest vomited blood, their bodies were slapped away!

Among the two unharmed people, one was Li Linzi. He was clearly excited. As he landed on the ship rapidly, he could not hide the excitement on his face. He did not care about Wang Baole's gaze. Instead, he quickly found a corner and sat down cross-legged, he assumed a stance that he wouldn't leave even if he died.

Seeing that someone had succeeded, the eyes of the hundreds of prodigies in the surroundings turned red. They rushed over and tried to board the ship. However, those who were waiting for them were still sent flying. Only seven or eight cultivators who seemed to be rather lucky weren't stopped by the paper figurine, this allowed them to board the ship successfully.

It was also at this moment that Wang Baole saw the clues. The people who had successfully boarded the ship also saw the problem. The prodigies outside also saw the same thing.

"The people who boarded the ship... were the people on the ship from before!"

"Is this the rules of the meteorite ship? Cultivators from other ships are not allowed to board another ship?"

This scene made the elites in the sky extremely indignant, but they were helpless. They couldn't even blame Wang Baole. After all... He wasn't the one who had stopped them from boarding the ship.

However, they still had to try. After all, this was a matter related to the meteorite assessment. Therefore, there were still a few cultivators who hadn't made a move earlier. They approached quickly, wanting to try boarding the ship.

This made Wang Baole's eyes light up, and his mind spun rapidly.

Since Lightning has chased me all the way here, I wonder if my wish from before is still valid... my wish from before was that the paper figurine on the ship wouldn't Stop Me

"If it is still valid, would the paper figurine not stop me if I took action and brought people in?" Thinking of this, Wang Baole's heart pounded. Seeing that the people had arrived, the paper figurine raised its left hand, wang Baole suddenly roared.

"Little Fatty, don't fight back. I'll bring you in!" As he spoke, Wang Baole instantly raised his right hand and grabbed at one of the two cultivators closest to him who was trying to charge in!

The little fatty's body was like a ball. The reason why Wang Baole had chosen him was partly because he felt that the other party's figure was fated to be his, and partly because he felt that the other party looked very rich.

The Little Fatty's reaction was also extremely fast. Seeing that he was grabbed by the other party across space, he did not react at all. He allowed Wang Baole to pull him, but he was ignored by the paper figurine and dragged onto the ship.

As soon as he boarded the ship, the little fatty was in disbelief at first. Then, he laughed loudly. The flesh on his face was trembling as he cupped his fists at Wang Baole.

"Thank you, fellow Daoist."

As for the others, they did not receive such treatment. All of them retreated with a wave of the paper figurine's hand. This scene immediately made everyone's breathing quicken. Their eyes widened as they looked at Wang Baole.

Wang Baole was very excited, but seeing that the little fatty did not seem sincere enough in his gratitude, he glanced at him and said calmly.

"There's no need to thank me. I'll make a move once. Give me one hundred thousand red crystals."

"One hundred thousand red crystals?" The Little Fatty's eyes widened, and the gratitude on his face disappeared instantly. He glared at Wang Baole.

"You're too evil. You can get one hundred thousand just by grabbing a handful. Why Don't You Go Rob Someone? I, Zhou Linfeng, have never been ripped off like this in my life. Give You Money? Impossible!"

"You're not giving me money?" Wang Baole was angry as well. He thought that his price was very fair. He hadn't said anything about grabbing a handful of red crystals, which was already a rather benevolent act. However, the other party had actually repaid his kindness with enmity.

Therefore, he glared and was about to make a move. However, he felt that he had to let the other party know the value of grabbing a handful of red crystals. If he were to make a move, it wouldn't be enough. Therefore, he turned his head and looked at the hundreds of people outside.

"Grab a handful of 100,000 yuan. Which one of you agrees? I'll bring him in and then trade this little fatty out!"

### **Chapter 928 — the abacus of the forest!**

Upon hearing Wang Baole's words, the little fatty's expression immediately changed. He was furious and felt that the fellow in front of him was really too greedy. Other than himself, how could there be such a greedy person in this world!

It wasn't just the little fatty. The elites outside, faced with Wang Baole's public offer, all of them looked at the boat that was being struck by lightning. Their expressions were ugly. They didn't care about the hundred thousand red crystals., however, they had no choice but to buy it after being blackmailed. This was contrary to their pride. They felt helpless, but at the same time, they were furious with Wang Baole.

However, they had no choice. Five days seemed like a long time, but they knew that with every delay, the chances of successfully reaching the shore would decrease. This was especially so when Wang Baole had flown out of the boat earlier, the speed at which they had sped up previously made them very clear that the other party was not a kind person.

It would have been fine if they had joined forces. However, if they were to fight alone, there was a high chance that they would not be a match for the other party. Furthermore, even if they could join forces, it would not be appropriate to force the other party to help them. Although having more people was advantageous..., however, they were not a team after all, so it was inevitable that they had all sorts of thoughts.

These thoughts quickly flashed through everyone's mind. Due to their pride, even those who were tempted were unwilling to be the first to bow their heads, so they did not speak.

Seeing that, fatty heaved a sigh of relief. He looked at Wang Baole, and just as he was about to discuss how to ease the atmosphere, Wang Baole also saw the conflicted feelings of the people outside. He snorted inwardly and decided to add fuel to the fire.

"There's a limit to the number of people that can be carried on the ship, and so is the time I can help. In the time it takes for an incense stick to burn, I can only catch thirty of them. If I'm too late, I won't be able to board the ship. Don't blame me!"

As soon as he said that, the people outside grew anxious. This concerned the fate of the fallen star lands. They had gone to great lengths in their respective clans and factions to obtain this qualification. If they were to fail because of the 100,000 red crystals..., even they felt that it wasn't worth it when they returned. Therefore, when they heard Wang Baole's time limit, how could they not be anxious? Immediately, a voice came from the crowd.

"I'll buy! One!"

The first person to speak was a skinny young man. He was obviously quick-witted. As he spoke, he shouted out the number. That way, even if more than thirty people spoke at the same time as him..., he would still be qualified.

Wang Baole also felt that this fellow was not bad. A gratified smile appeared on his face. Just as he was about to nod his head, the others became anxious as well. Urgent voices sounded one after another, and in an instant, they spread across a large area.

"Buy, two!"

"Buy, three!"

The voices that agreed to Wang Baole's bid rose to seventy to eighty places in just a few short breaths. However, the numbers that were shouted out did not exceed thirty. Naturally, many of them clashed with each other, even though it caused some internal anger, Wang Baole was still very pleased with such a heated scene.

He was happy, but the little fatty was trembling. He realized that it was not important whether he agreed or not. If he continued to be greedy and refused to give, the consequences could be imagined.

Therefore, when the crowd outside reported the number..., without hesitation, he immediately took out a red crystal card from his pocket and quickly threw it to Wang Baole.

“Fellow Daoist, this is the greatest kindness in the world. In order to support you, I, Zhou Linfeng, am the first to agree to this matter!”

After taking the Red Crystal, Wang Baole glanced at the little fatty with a faint smile and let out a long sigh.

“I hope that everyone in the world can understand me as well as you do. How can I, Xie Dalu, covet such a small amount of money? “I am helping all of you. However, the Heavenly Dao has a way of compensating for the loss of humanity. When I act against the heavens, I have to use some worldly possessions to resist the invisible disaster.”

Looking at Wang Baole’s emotional outburst, the little fatty’s face twitched. He thought to himself that Wang Baole was too thick-skinned, and his words were too disgusting. However, he was also able to bend and bend. He was afraid that Wang Baole would go back on his words, so he put on a sincere expression, he nodded continuously.

At the same time, Li Linzi and the others on the boat saw that they could still make money like this. Although they knew that Wang Baole was special on the boat, they were still tempted, especially Li Linzi. He didn’t do it for money, instead, he felt that if he could be like Wang Baole, he could use this opportunity to gain the gratitude of everyone. If it worked well, it wouldn’t be impossible for him to gain the support of hundreds of people in the future.

“Stupid, networking is the most important thing!” Li Linzi narrowed his eyes. He didn’t want to offend Wang Baole too much, so he had no choice but to dismiss the idea of reprimanding Wang Baole to make him look bad. After all, the people outside weren’t stupid either, if he had a way to let them in, then such an act of lashing out at Wang Baole would naturally be a bonus.

However, if he had no other choice but to use his words, then it would be too much of a suspect to give an empty favor. Not only would he not achieve his goal, he would even be looked down upon by others.

With that thought, he stood up abruptly and suddenly spoke to the outside world.

“Fellow Daoists, I am Li Linzi of the Cloud Frost sect. Please don’t be in a rush to pay me. I would like to try and see if people like us who are already on the ship can invite others to board the ship, just like Xie Continent.”

“Fellow Daoists, if I succeed, I don’t expect anything in return. I have already offended fellow Daoist Xie by standing out. If I fail, please don’t blame me.”

Hearing Li Lin’s words, the people outside immediately responded. Their words were filled with gratitude and understanding. Even Wang Baole narrowed his eyes and swept his gaze across Li Lin. He instantly understood what was going on in his heart.

Can I sell it well and build my network? Li Linzi’s plan isn’t bad. Wang Baole thought, a dark glint flashed in Li Linzi’s eyes. After gaining the support of the outside world, he turned and cupped his fists at Wang Baole.

“Thank you, fellow Daoist. Please Don’t stop my attempt!”

His words immediately caused killing intent to flash in Wang Baole’s heart. Li Linzi’s words were extremely vicious. It would have been fine if Wang Baole hadn’t said those words. The resentment of the others towards Wang Baole wouldn’t have lessened, but it wouldn’t have continued to increase.

However, no matter how Wang Baole answered, he was wrong. If he stopped them, his resentment would naturally increase. If he didn’t stop them, he would be helping Li Lin establish his connections.

Li Lin is quite quick-witted! Wang Baole narrowed his eyes. In reality, he had considered pulling people onto the ship to establish his connections. However, he knew that connections were the most stable and fragile existence in the world, the reason why it was considered stable was that if the exchange continued, it would last until the end of one’s life.

Such an exchange was nothing more than emotions, value, and benefits.

The reason why it was considered fragile was that the connections that were not exchanged were just a mirage. They were of little use and could very well become a point of failure!

Therefore, it was not enough to just pull people onto the ship and build connections. Once done, it was equivalent to setting a personal setting for oneself, which required constant effort in the future.

If Wang Baole was truly a prodigy from a major faction, he would naturally have the strength to do it, and he would have the means to make it perfect. However, he was not.

The resources he had in his hands were what he needed the most!

Therefore, in the face of Li Linzi’s act of picking up scraps, Wang Baole only smiled and did not speak. He allowed Li Linzi, who was secretly pleased with himself, to step forward and try to pull people in.

The outcome was obvious. Naturally, he would fail. Li Linzi was a little depressed. After all, if he failed, his previous words might be of some use, but it would not be enough to build a network. It could only be considered as having a small foundation.

Seeing that, Wang Baole suddenly spoke.

“Do you want to give me ten million red crystals so that I can help you pull in the people outside for free?” The viciousness of his words surpassed that of Li Linzi from before. After he spoke, Li Linzi’s body clearly trembled, and his expression instantly turned ugly, he was conflicted. Naturally, he wouldn’t take out ten million red crystals in exchange for his connections. He felt that it wasn’t worth it. Therefore, he snorted coldly and ignored Wang Baole. Instead, he cupped his fists at the people outside.

“Fellow Daoists, it’s not that I disagree, but I’m truly out of pocket...”

Even though there was a response, it was clear that the elites in the outside world were a little colder towards the forest. No one was a fool. They had seen clearly what had happened and what the forest was thinking, if the forest had succeeded, it would have been fine, but if it had failed, it would have been useless to them.

Wang Baole’s words had naturally played a part.

At the same time, even though he had offered a very high price, at the very least, he could have succeeded. Therefore, very quickly, the transaction of one hundred thousand red crystals began rapidly.

Seeing that, Wang Baole glanced at the forest and shook his head secretly. If the other party had really agreed, then he would have treated the other party as a person of importance. Looking at it this way, it was just grandstanding.

### **Chapter 929, Outer Realm Lightning intent!**

Just like that, the transaction of one hundred thousand red crystals began one after another. One after another, the chosen ones in mid-air paid the red crystals after boarding the ship. It wasn't that they hadn't considered going back on their words, but if they did.., they would have to face the situation where Wang Baole didn't help the others behind him.

As a result, for the one hundred thousand red crystals, not only did they offend Wang Baole, they also offended those who were waiting to board the ship. Such a thing... as long as they weren't extremely stupid, they wouldn't do it.

After all, although the hundred thousand red crystals weren't a small amount, it wasn't enough to hurt them. However, after boarding the ship, all of them had dark expressions on their faces. They looked at Wang Baole with hostility and swore in their hearts, this wasn't the second time they had been ripped off by the other party!

If it weren't for the fact that this place was extremely dangerous and that the paper figurine rowing the ship treated him differently, everyone would have been afraid. If they didn't want things to change, they would have acted on their thoughts of attacking Wang Baole, wang baole naturally knew about this, but he didn't care.

A prodigy? A bunch of useless chickens and dogs that have been piled up by resources! Wang Baole snorted coldly in his heart, however, he didn't show it on the surface. Instead, he smiled and didn't mention the previous restriction on the number of people who could enter. Instead, he pulled in everyone who wanted to enter.

After easily earning more than ten million red crystals, Wang Baole patted his storage bag. He felt refreshed and refreshed. Looking at the Black Paper Sea around him, he felt that it was a different scene.

"Thank you for your support, fellow Daoists. Don't feel sullen. I have benefited from this transaction, and you have benefited from it. I, Xie continent, have always been reliable in doing business. I guarantee that I will send all of you ashore safely!" Wang Baole said as he waved his hand, instantly, the ship rumbled, and as the surrounding lightning continued to fall, it sped off into the distance.

Behind it, the other spirit boats had already been submerged by the Black Sea. They were nowhere to be seen. In the entire Black Paper Sea, they were the only spirit boats. They rode the wind and broke through the waves, producing whistling sounds.

Just like that, after the spirit boat sped for four days, from afar... one could faintly see the shore. The original five days had been shortened due to the speed of the spirit boat, this made the people who had bought the qualifications to board the ship feel a little better in their hearts.

In addition, what made their hearts feel better was that during the four days' journey, those who had relied on their own abilities to forcefully cross the sea had seen their hard work. They had even seen people who had fallen into the sea and died as paper dolls, this made the people on the ship suddenly feel that 100,000 red crystals did not seem expensive at all..

The only thing that made them unhappy... was that there were more and more people on the ship... in fact, on the surface of the sea, the elites flying in the sky would see their ship when they were tired and look at the people on the ship who were not as good as them, each and every one of them looked calm and relaxed. How could they not have thoughts in their hearts? Therefore, under Wang Baole's shout, they quickly spent money to buy the qualifications.

Just like that, the number of people on the ship continued to increase. In the end, the cabin could no longer hold them. The people who boarded the ship were obviously powerful. If they wanted to have their own place to meditate, they had to forcefully seize it, therefore... as the number of people on the ship increased, the weaker the cultivation and combat strength of the people on the ship, the more they could only stand in other positions like the sails and the ship's poles.

As a result, if one stood on the shore and looked at it from afar, the ghost ship had a deep draft. At the same time, it seemed to be stacked on top of each other. There were almost three hundred people on it. It was majestic and black, and it had a shocking aura, it made all the people waiting on the shore stunned.

"This is..."

"The ship isn't submerged?"

"It can be like this..."

There were more than a hundred prodigies standing on the shore. The masked woman and the other three were among them. They had relied on their own abilities to forcefully cross the Black Sea. The only difference was the length of time it would take. For example, the masked woman and the other three.., they had only used two and a half days, while the others had arrived one after another. After arriving, all of them were extremely exhausted. When they saw the ghost ship where Wang Baole was, they couldn't help but gasp in shock.

The same shock was felt by the strange cultivators on the shore. They... were all paper figures. They were different from the scraps of paper in the Black Sea. These paper figures were all white in color, densely packed together. There were thousands of them, when they saw the ghost ship, their eyes widened, and a strange expression appeared on their faces.

The fallen star lands had been opened many times, but such a scene had never happened before. The Lightning was still present, and it continued to land on the ship. It made the ship look even more majestic.

When the people on the shore saw the boat, the cultivators on the boat naturally saw the shore. Wang Baole was at the bow of the boat. He occupied a large area, and he was the first to see the shore, he instantly felt another difference in this world.

Looking at the shore, other than the prodigies and paper figurine, there were mountains in the distance, and there were buildings and plants around. However... without exception, the mountains, buildings, and plants in the distance were all made of white paper!

Other than the sky and the ground, everything else was made of paper. Wang Baole narrowed his eyes as he saw the paper figurines on the shore. Every single one of them exuded an aura that was no weaker than that of a boating paper figurine, it was especially so for the dozens of people in the lead. Every single one of them had a powerful aura that made Wang Baole's heart skip a beat.

There was even the person in the middle who had a red line between his brows. Wang baole only took a glance at the aura of the paper figurine from afar, and his mind was filled with a thunderous roar.

These dozens of galaxies? The others are all stars? The one with the red line... seems to be even stronger. That can't be..., wang Baole's forehead broke out in sweat. This was the third person he had ever seen in his life... someone who felt similar to the blazing flame ancestor and his senior brother.

The Little Missy in the mask once said that senior brother had once killed the divine emperor... then his cultivation should be at least at the perfected galaxy. It's even possible that he has surpassed the galaxy

The Blazing Flame ancestor's aura may be weaker than senior brother's, but it's similar. This paper figurine with the Red Lines is the same as well... then, could his cultivation have surpassed the Starfield level as well? Has he reached the level of the Weiyang clan's divine emperor

Thoughts raced through Wang Baole's mind. This scene also made the other prodigies on the ship, who were aware of some of the news, nervous and uneasy.

They all fell silent. The ship was getting closer and closer to the shore. When it was about to reach the shore, the lightning around the ship seemed to be stimulated for some reason, and it became more frequent, it even spread out from the ship for the first time, as if it wanted to affect the shore.

Wang Baole was shocked. He didn't know what to do. Suddenly, the paper figurine on the shore with a red line between its brows let out a cold snort.

"Outer realm lightning intent?"

As the words left its mouth, the paper figurine raised its right hand and swung it at the lightning bolt. There wasn't a trace of supernatural power in the swing, but what shocked Wang Baole and everyone on the boat was what happened, it appeared before their eyes in an instant.

The lightning bolts suddenly stopped in their tracks, as if they had been frozen. At a speed visible to the naked eye... They quickly turned into paper!

The bolts of lightning instantly turned into strips of white paper. They floated down from midair and sank into the surrounding Black Sea!

"Turn lightning into paper!" Wang Baole's mind was racing, the other party's methods were beyond his imagination. As he stared at the strips of paper that had sunk into the Black Sea, the ghost ship they were on finally reached the shore. With a loud boom, the ship came to a halt.

Everyone, including Wang Baole, flew out immediately. None of them dared to show any signs of arrogance. They stepped onto land respectfully and cupped their fists and bowed deeply to the group of paper people.

Wang Baole was among the crowd. He lowered his head guiltily and followed the crowd in greeting. Although he didn't raise his head, he didn't know if it was an illusion. He could vaguely feel the gazes from the paper people landing on him.

They know that the lightning bolts followed me here? Wang Baole was nervous. Fortunately, the gazes didn't linger on him for long before they were retracted. What followed was a calm and dignified voice.

"The seeds of the Weiyang Dao domain welcome you to the Starfall Empire!"

### **Chapter 930, a paper city!**

The meteorite empire... Wang Baole's breathing quickened. His understanding of the meteorite empire was far inferior to that of the prodigies from the other great clans and powers. As he walked, he saw the paper sea, the starry sky, and the paper planet, he also saw the Black Paper Sea. Everything he looked at now was made of paper.

The paper man before him, who had an extremely powerful cultivation, said that he welcomed him to the meteorite empire.

All of this made him realize that the so-called Starfall Empire was just a place. The Starfall Empire was the ruler of this place, and its cultivation and foundation must be extremely deep, this made it so that even the Weiyang Dao Domain had to acknowledge its existence. It was difficult for them to force it, and they had to follow its rules.

Perhaps from the perspective of the Weiyang Dao Domain, even though the Starfall Empire is powerful, it has the geographical advantage... as Wang Baole thought about it, he felt more yearning for the vastness and mysteriousness of the Weiyang Dao Domain.

I wonder when I will be like senior brother, able to soar through the entire never-ending DAO domain, regardless of the vastness of the skies and the seas! As his thoughts churned, anticipation appeared in Wang Baole's eyes, he watched as the people from the never-ending DAO domain, who were the same as him, greeted the paper figurine one after another. The paper figurine, whose cultivation had reached an unbelievable level, raised its right hand and waved it gently. Instantly, a vast power of teleportation spread out, it covered the entire area.

Wang Baole felt the irresistible power of teleportation. He couldn't help but turn his head to look at the Black Paper Sea he had arrived in and the spirit boat by the shore. When he looked over, he saw the paper figurine accompanying him on the spirit boat, he was disembarking from the boat. He seemed to sense Wang Baole's gaze. He looked back at Wang Baole and nodded slightly.

Wang baole nodded as well. Then, his gaze landed on the surface of the sea further away. As he stared at the Endless Black Sea, he suddenly felt that... The Black Paper Sea didn't seem to be compatible with the entire Starfall Empire.

"Black paper, White Paper..."

As he muttered to himself, the teleportation power around him expanded. His vision blurred, and his figure blurred instantly. He disappeared without a trace along with all the other prodigies around him.

All the paper figurines disappeared along with him. In the blink of an eye, the entire shore was empty. When Wang Baole regained consciousness, he and the other prodigies who had passed the entrance examination.., they had already appeared in... a huge city!

To be precise, in the northwest corner of the city, there was a huge square. It was surrounded by many paper figurines. Some were big and some were small, some were old and some were young.

The big ones were like giants, and the small ones were like babies. The old ones had paper beards on their chins, and the few were as young as twenty-eight years old. Even though they were paper works, they gave off a youthful vibe.

Their gazes were all different. There was curiosity, coldness, hostility, and kindness.

They all looked at Wang Baole and the hundreds of others. It was as if in their eyes, Wang Baole and his group were all monsters. There were even some discussions that drifted in the wind.

“These outsiders are so strange. Their bodies are actually made of flesh and blood...”

“A body made of flesh and blood... Heavens, the creator is really amazing. He can do this!”

“I heard that most of the living beings outside are like this. They haven’t evolved perfectly.”

“That’s right, it’s really ugly!”

The discussions fell into the ears of everyone, including Wang Baole. However, no one paid too much attention to them. They were all observing their surroundings. They could tell that this was a city. Even if it was just a corner, as their divine senses spread out.., soon, everyone’s expressions changed.

What a huge city! Wang Baole’s pupils constricted slightly.

Through his divine senses, he could sense that the city was vast. It was about the size of the entire earth. All the buildings were made of paper. As for the specific details, as they were all gathered together, they were unable to examine it in detail, however, after a quick scan, Wang Baole was still very curious about this place.

As his curiosity grew, Wang Baole and the rest were quickly given a place to stay by the paper figurine cultivator from the Starfall Empire. The place they were assigned to was not far from the public square. It was like a clubhouse, each of them had their own room.

After settling them down, a paper figurine cultivator calmly informed them that the second trial would begin in three days. If they missed the time, their spots would be revoked. At the same time, those who had the spots.., fighting was not allowed before the trial. Whoever made the first move would lose their spots. Then, without further ado, they turned and left.

“There are no restrictions on us?”

“As expected, this place is just like the clan’s records. Everything is paper-based!”

“Three days is enough!” As the paper figurine left, the eyes of the elites in the area shone with a strange light. Some of them were familiar with each other, and after conversing softly with each other, they immediately dispersed.

There were still some who chose to stay in the Guild Hall to meditate, but most of them left for the city district. There were even some who were mysterious, and no one knew what they were discussing or researching.

Wang Baole ignored the mysterious people. After some thought, he decided to leave the guild hall and wander around the city of the Starfall Empire. In his mind, since he was here, he had to observe the place carefully, after all, the world he was looking at was a world of paper. It had broadened his horizons.

I wonder if this place is afraid of fire... as he walked along the streets, Wang Baole looked at the bustling crowd of paper people. For some reason, this thought appeared in his mind.

After realizing that his thoughts were very dangerous, he quickly suppressed the thought and allowed himself to relax. He was like a tourist, touring the city. As he walked, he saw too many paper people, he also saw the structure of the meteorite empire. It was similar to other civilizations. Although he didn't have currency, spirit stones and red crystals were equally useful here. At the same time, there were many shops and restaurants.

The paper figurines also needed food. However, their food was also paper, but what was special was that the paper that they treated as food was transparent.

It was the same even for alcohol. It looked like water, but Wang Baole bought a bottle out of curiosity. He found that it was empty, like a gas. The various foods made from the special paper, with Wang Baole's impeccable taste., he had tried many times and decided to give up.

However, it wasn't as if he hadn't gained anything. The first thing that shocked him was the cultivation level of the paper figurine from the Starfall Empire. The weakest paper figurine he saw was comparable to a nascent soul realm cultivator. Even infants were like that.

He had no choice but to guess that the cultivation level of the nascent soul realm was the basic level for all the paper figurine here!

As for the Spirit Ascension Realm, Spirit Immortals, and even planets... Wang Baole was dazzled by the sight as he walked, and it was even more thrilling. On one hand, the cultivation of the paper figurine here was generally very high. On the other hand, he was in the crowd, he was like a torch in the dark night, attracting the attention of countless paper figurine wherever he went.

Wang Baole wasn't used to all of this at first, but he quickly got used to it. He felt that he was the future federation president after all, and getting used to the attention of others was a basic quality.

Other than that, he also discovered that there were many shops in the city that sold various dharmic artifacts and cultivation techniques.

It was a pity that after Wang Baole bought a few of the cultivation techniques, he realized that they were all wordless heavenly books. They were completely blank, as if there was a law affecting them, preventing the cultivation techniques from appearing in his eyes.

That was indeed the case. In the shop he was in, an old man who had sent off a few customers turned his head to look at Wang Baole and laughed.

“I knew it was time for the tunnel to open again. However, you are still the first outer realm cultivator to come to my shop in all these years

“These cultivation technique scrolls are invisible to you due to the differences in the rules and laws. Take the one in your hand for example. It’s called the one crane art. Once you master it, you can change your body structure to become a paper crane, which will increase your speed by nearly a fold. However, the prerequisite is that your body must be the same as ours.”

Hearing the Elder’s words, Wang Baole immediately cupped his fists respectfully.

“Greetings, senior. This junior regrets it as well. It would be great if I could learn the cultivation techniques here.”Wang baole sighed.

“From ancient times until now, I have never heard of cultivators from the outside world being able to learn the cultivation techniques of the Starfall Empire on their own, unless they were taught by someone else. However... do you dare learn them?”The elder said with a faint smile.
