

## **My Ex-Wife and Kids Came In Like A Wrecking Ball Chapter 637**

“Being able to cooperate with the Lancer family did not depend solely on Young Master Xander. Rosalie’s strength is recognized by old Master Xander.”

On the side, Leon spoke up. He had been paying attention to the situation and saw Rosalie was embarrassed.

Stacy frowned and turned to look at him.

She noticed this young man just now, very outstanding, but she was not interested.

She did not expect his man would take the initiative to lean into her line of sight, or to speak up for this woman.

“And you are?” Stacy asked with a frown.

Leon introduced himself like the true gentleman he is. “Leon Martin, I’m just an ordinary doctor. Miss Jacobs, you don’t have to take it to heart.”

As she heard the name, Stacy was caught by surprise.

As the young master of the Martin family, the circle has naturally heard of him. Everyone knew that he had no intention of taking over his family’s wealth and that he was self-made in his own achievements in the medical field.

Over the years, Leon has rarely attended major banquets in Coast City.

Therefore, Stacy also saw Leon in person for the first time and felt that the man really lived up to his reputation. Although he was the young master of the Martin family, he showed no haughtiness. Leon sat there and only made people feel calm.

Perhaps, this was his many years of practicing medicine, allowing him to restrain his powerful inner charisma.

When she came back to her senses, the expression on Stacy’s face changed, and she greeted Leon with a smile. “Oh, so you are the famed Young Master Martin, your reputation precedes you.”

Leon nodded flatly, “If there is nothing else, Miss Hudson, excuse me, I’d want to talk to Dr. Jacobs.”

Before Stacy could react, Leon had already looked at Rosalie. “Is Dr. Jacobs free? I want to talk to you about some academic matters.”

Rosalie could not help but be stunned for a moment.

Although she knew that Leon was here to help her out of the siege, it was the first time that Leon had spoken to her in such a distant and polite tone.

Fortunately, Rosalie quickly recovered, pursed her lips, and smiled deeply at Leon. “Okay, sure.”

After speaking, Rosalie looked at Stacy apologetically again, "Excuse me, Miss Hudson."

Stacy could only smile politely, and watched Rosalie get up and walked to Leon's side to sit down.

After being seated, Rosalie breathed a sigh of relief, showed a grateful smile at Leon, and said softly, "Thank you, Leon."

Leon also sighed helplessly. "Be careful, that Miss Hudson must've misunderstood something."

Rosalie nodded in agreement.

She did not know how she caused Stacy to have those unnecessary misunderstandings, but the misunderstandings had already happened, and it was not something she could explain clearly in a few words.

She could only mention this to Xander and let him explain it to Stacy himself.

As Rosalie and Leon sat together, many doctors approached them enthusiastically and discussed medical issues with them.

Both had many achievements in medicine, and they both came back from abroad, when they communicated with the rest, albeit with restraint, they still spoke freely. Their content was generally interesting to the crowd.

Other doctors were not stingy to share their medical experiences with the two.

After some exchanges, the atmosphere among the people became more harmonious.

Many doctors appreciated Rosalie and Leon more and more and agreed with what Dr. Rand said at the beginning and felt that the future of Traditional Medicine was promising.

From time to time, Stacy heard compliments about Rosalie from the crowd, and her vigilance against Rosalie grew stronger in her heart.
