

Ye Chen 2611

Chapter 2611

He Yuanjiang said here, also can not help but sigh: sometimes the world of adults is like this, we obviously very good relationship, but because the distance is too far and each have their own life, may be three to five years is difficult to see one side."

Then, he said with a serious face: "Although my lover and I, later with your mother very, very little to meet, but our feelings are still very deep, your mother is alive, my lover and I will be her as a dear friend, but unfortunately, she is so good people but young.

Hearing this, Ye Chen deep inside also can not help but feel sad.

The people around his parents had a very high opinion of them, but unfortunately, he knew very little about them both.

In fact, up until the time of his parents' death, Ye Chen was just a child in the second grade.

At that age, children are very simple and superficial in the way they look at things and the world, he only knew that his parents loved him, but did not know what kind of people they were.

Some times, Ye Chen envied Gu Qiuyi's father, Gu Yanzhong.

Because, he has known his father for a much longer time than himself.

His understanding of his own father is also much deeper than his own.

Now, he envies He Yuanjiang.

Because he felt that He Yuanjiang's understanding of his mother was also much deeper than his own.

He Yuanjiang saw Ye Chen look despondent, couldn't help but go forward and pat his shoulder, comforted: "Things have passed for so long, so don't be sad and upset over it, your mother's first twenty years of life was really too radiant, our classmates at the time, said, it must be the lack of such an excellent person around God, so they let her go to heaven early. "

Ye Chen nodded gently.

About his parents, his heart in addition to sadness and regret, the most regrettable, is his own as their children, but lack of sufficient understanding of their lives.

He Yuanjiang smiled and said: "Let's talk about you, how did you become the chairman of the Empire Group now did you not return to the Ye family?"

Ye Chen smiled bitterly and said, "To be honest, I have lived in Jinling for nearly twenty years, and have been a son-in-law of the Xiao family for four years, the Ye family only found me last year.

"As for the Empire Group, it was also a gift from them to me, in addition to the Empire Group, they also gave me ten billion cash as compensation, but these do not seem to mean much to me, the money of the Empire Group, I have not touched a single penny until now, as for the ten billion, I initially

just paid the medical bills to my life-saving benefactor, and bought a car and a string of necklaces for my wife, and then I did not spend that money.

Speaking of this, Ye Chen sighed lightly and continued: "But there is no point in saying this, although I am not ashamed to take the money of the Ye family, but also have to admit that if the Ye family did not give me these, I may still be a thousand husbands now, the waste son-in-law spurned by thousands of people

He Yuanjiang sighed and said: "You really suffered for so many years, in fact, I say a fair word, if your parents are still alive, you are certainly the richest person in the world, and, although I do not know your father, but I have heard of your father's deeds, back then, the Ye family relied on your parents to stand on the sword, to have this situation today! "

I can say responsibly, the Ye family's current assets, at least 50 more is the credit of your parents, and the Ye family to you these, even the Ye family assets a tenth is not as good, in the end, they give you give less "

Ye Chen shook his head with a bitter smile: "It doesn't matter, I actually hope to create a world by myself now, after all, I still don't know if my parents' death had anything to do with the Ye family, so I hope to accumulate enough power to make myself stronger than the Ye family in all aspects, even more than the Su family, so that in the future, once I find out who killed my parents The murderer of my parents, I will have enough certainty to make them pay the price.

He Yuanjiang suddenly realized and said: "That's why you want to do ocean shipping

Chapter 2612

"Right." Ye Chen nodded and said: "I don't know how much you know about the Su family, back then the Su family and my father have not been very confrontational, the Su family even set up a special anti-Ye alliance, uniting many other families to fight my father together, so the Su family is also an enemy in my eyes, now the Su family's ocean shipping business is completely stranded, I think it is just a good opportunity for me to take advantage of the situation. So the idea was moved.

With that, Ye Chen He added: "I originally wanted Dongxue to undertake this business, but he told me that doing this business requires a very in-depth understanding of international trade and the laws and regulations and tax policies of major trading countries in the world. She feels that she I can't do the job, so I recommended you. We just met last night, so I came to visit today. I want to ask you to help. I didn't expect you to be my mother's former classmate. "

He Yuanjiang was silent for a moment and opened his mouth, "Ye Chen, you are now choosing ocean shipping as an entry point, this judgment is very correct."

"In the future, the proportion of global trade, will definitely become larger and larger, more and more large manufacturing enterprises, have begun to do global supply chain, take the automobile industry, a car, with steel refined from Brazilian and Australian iron ore, rubber originating from Southeast Asia, high precision electronic equipment, control modules from the United States, Germany and Japan, and then use other upstream and downstream in China industry chain as well as labor to combine efforts to complete."

"Of these, a huge majority of raw materials, spare parts, and the transportation of complete vehicles rely on shipping.

Not to mention such a large industry as automobiles, even clothing, now is also a global supply chain, you just buy a two or three hundred dollars jacket, may be the use of American-made cotton, China-made fabric, Japan-made zipper, and then use the labor of Vietnam, Bangladesh, Romania, these countries, and finally use the ship from these countries of production to the domestic, and finally sold to you.

With more and more globalized supply chains like this, the market for ocean shipping will get better and better, and now the Su family just happened to have their license revoked, which is the key to speed up the reshuffling of the domestic ocean shipping industry.

Ye Chen nodded and asked after: Professor He, I wonder if you are willing to help me with this favor treatment issues you feel free to mention

He Yuanjiang suddenly melancholy up, sighed, said: "Ye Chen, I tell you a heartfelt words, if I did not give up work, then I may now be in a Fortune 500 companies as CEO, or even like Apple's CEO Tim Cook, easy annual income of more than \$ billion, I gave up high income, choose to teach in the university, because I took an oath in front of my beloved's grave, the second half of my life only teach and educate people, no more business, and no more running for money"

Ye Chen asked in surprise: "Professor He, your lover passed away"

""He Yuanjiang sighed:" Hey, back then is the so-called career is too strong, around the classmates have become executives or even partners of large groups, there are many people have become successful in business, become a multi-billion dollar tycoon, I also do not want to be left behind, so work very hard. I worked very hard and spent less than a month at home all year round.

"At that time, I flew around the world in first class every day, so I had no time to care about the life of my wife and children.

Once, I was in Japan on a business trip to talk about a project, my love called me to tell me that she always had a headache recently, but I did not have time to take care of this, I just let her take some ibuprofen, or go to the hospital to see a doctor themselves

"But who would have thought that six months later, she left me because of a malignant tumor of the brain

Speaking of this, He Yuanjiang eyes slightly red, incomparable self-reproach said: "From the day she was diagnosed, I realized that I had made a fatal mistake in the past years.

"Money is important, but money is by no means everything, money cannot replace love, nor can it replace affection, nor can it replace health."

Even if I make more money, I can't replace my love's life or my daughter's true original to me

"So at that moment, I swore to her that from now on, He Yuanjiang would only teach and educate people, and would never again become a slave to money"

When He Yuanjiang said these words, Ye Chen already understood in his inner heart that trying to convince him to cooperate with him was no longer a possibility.

Moreover, he also understood the truth that 'a gentleman does not force others to do what he wants'.

Without making any further efforts, he said very seriously, "Professor He, I understand what you mean, I'm sorry, it was too presumptuous of me."

He Yuanjiang hurriedly waved his hand and said, "I don't blame you, it's my own knot in my heart, since I have promised my late wife, I must keep my promise, I can't break my word on such issues, so also in the past, you should not blame me.

The company's main business is to provide a wide range of products and services to the market.

He Yuanjiang smiled gratefully, then remembered something and said to Ye Chen, "Ye Chen, in fact, if you want to secure absolute superiority over the Ye and Su families, there is no need to go to such trouble and personally engage in ocean shipping."

Ye Chen asked curiously, "Professor He, what you mean is"

He Yuanjiang said seriously, "I think you can go to the United States to find your grandfather, with him as your backing, you don't have to worry about the Su family or the Ye family, because even if the Su family and the Ye family are tied together, they are not your grandfather's rivals.

Ye Chen was dumbfounded and asked, "Professor He, is my grandfather really that strong?"

He Yuanjiang said seriously: "Strong is more than strong ah the world's three wealthy families, each can be rich, one is Europe's Rothschild family, one is the Middle East's Saudi royal family, the other is the United States of Chinese, the An family"

He said, He Yuanjiang added: "Do you know how much wealth your mother alone has created for the An family?"

Ye Chen shook his head and sighed in shame: "I'm not going to lie to you Professor He, I don't know much about my grandfather's family, one is that I was too young back then, although my mother took me to my grandfather's house a few times, I didn't know much about my grandfather's family, and another is that, as far as I remember, my mother and my grandfather's relationship didn't seem too good.

It was." He Yuanjiang nodded and said, "Back then, when your mother and your father got together and were going to go back to China with him and marry into the Ye family, your grandfather was very unhappy because your grandfather simply did not despise the Ye family and felt that the Ye family did not deserve to be his in-laws."

He said, He Yuanjiang said seriously: "In fact, your grandfather is also right, the Ye family is really just like that back then, although it is very powerful in the country, but when you look at the international, it really can't be on the stage.

Ye Chen asked curiously: "Then what kind of industry did my grandfather's family do?"

He Yuanjiang sighed: "Your grandfather's family does almost everything, you can think of industries, the An family should have some involvement, but the An family is extremely low-key, they have thousands of companies around the world, but these companies from the surface. On the surface, none of them have anything to do with the An family, and the An family hardly ever come out on their own, just like the Rothschilds.

"The Rothschild family's holdings now, to an outsider, don't look like much, but the point is that the Rothschilds have more than one bank and hold disguised stakes in many of them."

"Owning a bank is tantamount to controlling finance, and almost all businesses now need to raise money and go public through banks."

"So it's natural for a big family like this to invest in many start-ups through a lot of venture capital funds, equity funds, and. The Rothschild family has shares in almost all of the Fortune 500 companies in Europe and the US that you can see now, but their shareholding structure is so secretive and subtle that outsiders can't see it at all.

Speaking of this, He Yuanjiang said with a face of admiration: "The An family's line of operation is similar to that of the Rothschild family, so how much money your grandfather actually has; he probably couldn't even calculate it himself, and I have even less way of knowing.

"However, I do know that the entire pool of capital of the venture capital fund your mother set up in Silicon Valley back then was over ten billion dollars thirty years ago.

Other funds wanted to raise that much money, behind the scenes, I don't know how many wealthy people or even investment retail investors had to raise money from, but the funds your mother took out back then were all paid by the An family itself

Moreover, I believe the vast majority of people have heard of the development of Silicon Valley over the years, a large number of the Fortune 500 were born here, and a large number of top IT tycoons were also born here."

"Google, Apple, Yahoo, Cisco, Oracle, Tesla and so on, all of these top high-tech companies have come out of Silicon Valley step by step."

"They have come so far, their market capitalisation has grown thousands and thousands of times, and the room for incremental growth is extremely huge

"A random stockholder, if he had bought shares in Apple twenty years ago, would be making over three hundred nearly four hundred times as much now.

"But did you know that your mother invested in Apple with the venture capital fund she set up before you were even born

Chapter 2614

At the time Steve Jobs held her in high esteem, and she traded a few hundred million dollars for a 10 stake in Apple when Apple's market cap was only a few billion dollars"

"And nowadays, Apple's market capitalisation is more than two trillion dollars, which translates to over fifteen trillion RMB

The 10 shares your mother invested in back then, after rounds of dilution and reduction, should still be about 6 now"

"How much does that translate into in RMB? Almost nine hundred billion

"But your mother didn't just invest in Steve Jobs' Apple, she also invested in her Stanford schoolmate, Larry Page."

"Larry. Page is the founder of Google, the company that created Google Search, Google Maps, the Android phone system, and Alpha Dog, the intelligent Go robot that was so famous a while back.

"The company's market capitalisation is now over a trillion dollars, and your mother's venture capital fund has a stake of over 10 per cent in the company.

"So, just the income your mother has gained from investing in these two companies has already exceeded the sum of all the Ye family's assets. If all the investment income from your mother's venture capital fund back then is taken into account, I'm afraid that the Su family and the Ye family combined are no match, not to mention the assets of the entire An family.

When Ye Chen heard this, his whole body was already dumbfounded

Many people knew or had heard about the miracle of Silicon Valley back then, and Ye Chen was no exception.

Countless high-tech companies were born here, and there were more than ten billion dollars in market value, several hundred billion, and even two or three trillion.

Back then, anyone who could go to Silicon Valley with money to make an investment and close their eyes would have found a whole lot of companies with unlimited potential.

And the awesome thing about investing is that the upside is so big that it is beyond imagination.

When Masayoshi Son of Japan invested \$20 million in Alibaba, he made a profit of \$50 billion;

South Africa's South African newspaper group invested more than US\$30 million in Tencent Group, making US\$130 billion.

This is the charm of investment, seize a potential stock, you can achieve thousands of times the net profit.

These are all classic investment cases that the Chinese people are familiar with.

But Ye Chen really didn't expect that his gentle, virtuous and well-read mother would have such a glorious history

Chapter 2615

At this point, He Yuanjiang sighed lightly and lamented, "Your mother's success story back then is simply inexhaustible for a while. If you have the opportunity to go to Silicon Valley, find the boss of a random top global conglomerate and tell him that your mother's name is An Chengqing, they will definitely treat you as a guest of honor and treat you with the highest level of courtesy

Ye Chen also couldn't help but sigh: "If I hadn't met you, I wouldn't have known these things about my mother"

He Yuanjiang looked at him, smiled faintly and said, "The magnitude of your mother's vision and long-term planning is something that none of us can catch up with."

"Back then, we couldn't even understand your mother's investment operations, and many of the companies she invested in didn't seem to us to have much prospect for development."

"Take Apple for example, when your mother invested in it, we all felt that the company did not have much future, there was no iPhone at that time, not even an iPod yet, Apple was already in a huge business predicament."

"By that time, your mother had returned to China with your father and had given birth to you, Steve Jobs had just returned to the helm of Apple, and everyone thought it was impossible for Apple to turn around, but your mother knew that Steve Jobs wanted to raise money, flew over from miles away, and after just one afternoon of talking to Steve Jobs, she decided to invest in him."

"This kind of foresight, more than 99.9% of ordinary people, put in the shopping mall, is an absolute master, an absolute strategist!"

Speaking of this, He Yuanjiang smiled faintly and continued, "Even the Rothschild family, who reigned for two hundred years, was in awe of your mother, you don't know how much the Rothschild family wished to join hands with the An family back then"

Ye Chen nodded gently, he finally understood why his father Ye Chang Ying was able to fight back and forth with the Rothschild family back then.

In fact, the Ye family's strength was really not enough to look at in front of the Rothschild family.

As He Yuanjiang had said, the family fortune that the Ye family had worked so hard for so many years to create was probably not as much as what the Rothschilds had gained from investing in a few random businesses.

Under such circumstances, his father was still able to resist the pressure of the Rothschild family, behind which must be the help and aura of his mother, or even his mother's family.

At this time, He Yuanjiang looked at Ye Chen and said seriously, "Therefore, I sincerely suggest that you go to America to meet your grandfather, if your grandfather is willing to help you, both the Su family and the Ye family are not worth mentioning."

Ye Chen nodded, but still said very firmly, "Thank you Professor He, but I still don't intend to go and meet Grandpa, I haven't met him a few times in total, moreover, after so many years, he may not have any affection for me, moreover, as you said, back then, he has been holding a grudge against my mother for marrying my father, maybe he doesn't treat me very well either. "

When he said this, Ye Chen smiled to himself and said, "Although I was just a penniless and poor man for many years in the past, now, I still hope that I can go on by my own ability one step at a time, whether it is the Su family, or the Ye family, or any other top families, if any of them, need to take

responsibility for my parents' death, then I hope that I can rely on my own abilities and defeat them all with my own hands!"

Hearing these words from Ye Chen, He Yuanjiang could not help but sigh and said, "Ye Chen, I understand your thoughts and your determination, but with the cards you are holding now, you still have a long way to go if you want to achieve this!"

Saying that, he added: "Ocean shipping is a heavy asset project, the start-up capital may be in the tens of billions level, I advise you to be as cautious as possible."

Chapter 2616

He Yuanjiang felt that Ye Chen's hands should be the Dihao Group and the ten billion dollars.

These two items together would only amount to a little over 100 billion, and there was almost no chance that he would be able to compete with the Ye family or the Su family.

Ye Chen smiled faintly and said, "I'm not going to hide it from you, Professor He, I still have tens of billions of dollars in my hands, moreover, I have a pharmaceutical company that is currently gaining momentum, and its annual profit can reach the level of ten billion dollars, and next year it may even exceed one hundred billion dollars, so it can completely continue to supply blood for my other projects."

He Yuanjiang said in surprise, "You have another pharmaceutical company with an annual profit of over ten billion yuan?! What's the name?"

Ye Chen spoke, "Jiu Xuan Pharmaceutical, I wonder if Professor He has heard of it?"

He Yuanjiang was even more shocked and blurted out, "The same company that produces Jiu Xuan Stomach Powder?!"

Ye Chen nodded, "That's right, the current core product is Jiu Xuan Stomach San."

"My goodness!" He Yuanjiang exclaimed in shock and said, "This medicine, Jiu Xuan Stomach San, is now well known around the world! I've always had some minor intestinal problems, and I took a box of Stomach San some time ago, and I was immediately cured. I used to be afraid to eat raw, cold or spicy food, but now with Jiu Xuan Stomach San, all kinds of Sichuan and Hunan dishes, Yuzhou hot pot and Japanese cuisine are completely out of the question"

He said, He Yuanjiang added: "There are also many of my friends in the United States, also entrusted me to buy this medicine for them, everyone has a good reputation for this medicine, but I really did not expect that this company is actually your"

Ye Chen nodded and said, "Originally I reached a cooperation with Wei's Pharmaceutical, restructured Wei's Pharmaceutical, gave the person in charge of Wei's Pharmaceutical a certain share, and then integrated Japan's Kobayashi Pharmaceutical, so now the production capacity is also surging, I believe Jiu Xuan Stomach San will soon be able to cover the global market, at that time, a hundred billion profit a year is really not under discussion. "

"Indeed!" He Yuanjiang said incomparably serious: "The biggest asset of a pharmaceutical company is a good medicine! The world's top pharmaceutical companies have annual revenues of hundreds of billions of dollars, which translates into several trillions of RMB, but their net profits are generally not

too high because of the huge research and development costs, the research and development costs of a drug can easily cost billions or even tens of billions of dollars, is the research and development cost of this Jiu Xuan Stomach San of yours high?"

Ye Chen shook his head, "The research and development cost of Jiu Xuan Stomach San is not high, so my Jiu Xuan Pharmaceutical, in terms of profit margin, will be a bit larger compared to other pharmaceutical companies."

He Yuanjiang couldn't help but give a thumbs up and exclaimed, "That's really something! If you look at it this way, you will be able to build your own business map in a few years' time! The future is unlimited!"

Saying that, he sighed helplessly and said, "To be honest, now is really a good opportunity for you to cut into ocean shipping, with such a large share of the market released out, and with no shortage of cash flow in your hands, you can quickly build up a huge fleet of shipping vessels and then quickly advance the related business"

"It's just a pity that I really can't break my oath to help you, and the Jinling University of Finance and Economics has high hopes for me, and is looking forward to me being able to take the economic management program at the Jinling University of Finance and Economics, to the number one height in the country, and I really want to make some long term contributions to my hometown fathers and mothers, and also hope to train more excellent talents for my country"

Ye Chen hurriedly nodded and said, "Professor He, I understand what you are saying, compared to what you are doing now, which is more socially valuable and meaningful, I can personally understand it completely!"

He Yuanjiang was silent for a moment, then suddenly remembered something and said with an excited face, "Ye Chen! If you don't mind, then let my daughter give you a hand!"

Chapter 2617

Your daughter? !

Ye Chen was a bit stunned for a moment.

At this time, He Yuanjiang opened his mouth and said: "My daughter is about your age, she just graduated from Stanford last year and has been working at Goldman Sachs Capital on Wall Street, but she just left some time ago, I am planning to let her return to China to develop, but this girl is a bit resistant to me, she is very rebellious, she does not listen to anything I say.

Ye Chen couldn't help but ask him, "Professor He, if I want to work with your daughter, will she agree?"

He Yuanjiang said: "I have been persuading her, the domestic economy is developing so well now, much stronger than the United States and Europe, in terms of development potential, it is definitely much better than abroad, she is more or less moved now, but the relationship with me is a bit strained, so her mouth is very hard.

I think if you talk to her, she should agree. said, He Yuanjiang hurriedly added: My daughter dare not say she is a genius, but in finance as well as management"

The actual fact is that you will be able to get a lot of people to help you, and I can help her behind the scenes, and then it will be the two of us helping you out, and I will never show up myself, and I will only give advice so that I don't break my vow.

The moment Ye Chen heard these words, his heart burst with joy.

Originally, he had hoped to take Professor He down, but according to this situation, it was definitely impossible for Professor He to come directly to help.

However, if he could really convince his daughter to join him, then not only would Professor He be able to help out, but he would also have an additional high achiever like her daughter.

It was a good deal any way you looked at it.

So, Ye Chen hurriedly asked him, "Professor He, I wonder where your daughter is now?"

He Yuanjiang sighed and said, "She is in Syria.

'Syria? !" Ye Chen exclaimed in shock and said offhandedly, "I heard that that place is in turmoil all day long, she is a girl who is fine

What is she doing there?"

I told her to come to China because it has the most potential and is also the safest, after all, there are all kinds of shootings in the United States all day long and you can get hit by a bullet if you walk along the road. She said that she wanted to experience the cruelty of war and then come back to launch an anti-war charity fund.

He said, He Yuanjiang helplessly stifled: "You say, is this not a deliberate attempt to cross me?"

Ye Chen nodded and laughed: "In that case, her character is indeed a bit rebellious.

"More than a bit!" He Yuanjiang said with some indignation: " Do you know what the most annoying thing is?"

Ye Chen asked in confusion, " What is it?"

He Yuanjiang was just about to speak, but all of a sudden he wanted to say something again.

Chapter 2618

A few moments later he waved his hand and said helplessly: "Forget it, it's quite humiliating to talk about it, I can't even face talking to others"

Ye Chen saw his face in pain, so he said comfortingly: "Professor He, in fact, you do not have to be too angry, it is normal for young people to be rebellious, and as far as I know, many geniuses in the field are more or less rebellious in character, perhaps the more such children, the stronger independent thinking, and the more they can do something earth-shattering and big.

He Yuanjiang covered his chest at once, indignantly said: "You do not know what this brat rebellious to the extent that she has to just go to Syria, I put up with it, after all, although that place is

chaotic, but generally are civil unrest, the Chinese overseas Chinese or more friendly, but this girl she she.

He said several times she, He Yuanjiang suddenly stuck again.

He reddened, angry her half a day, before a long sigh, declined: "This stinky girl, I told her the year before last, she is now not too young, it is time to find someone to marry and have children, you know what she said to me!

Ye Chen shook his head with a puzzled face, but then asked with some curiosity: "What did she say"

He Yuanjiang depressed to the extreme said: "She actually told me that she does not like men you say, twenty-seven or eight years old a pavilion girl, not looking for a date is just, but also said that she does not like men, like women this is not to kill me!

Ye Chen also did not expect such an answer, embarrassingly said: "Professor He, I think she may be deliberately joking with you, after all, you also said, she has been very rebellious, you let her go east, she has to go west, it is possible that she does not really want to go west, but only to do the appearance, deliberately angry with you.

He Yuanjiang covered his face and said: "Hey I thought so at first, but who would have thought that she had brought her girlfriend home last year and told me that she was going to get married with her girlfriend in a few years.

Ye Chen heard this, the heart can not help but marvel.

He Yuanjiang at this time depressed lamented: "You say I have such a child in this life, she really married a girl, how can I go to see the ancestors in the future"

After saying that, he hurriedly looked at Ye Chen, said seriously: "Ye Chen ah, uncle this is all on you, this girl and I can not communicate, I asked her to do anything she does not listen, you help me to get her to Jinling, let her honestly work here in your, as long as you can help me to do this thing, uncle I will later, my liver and brain, to repay you!

You are my mother's classmate, friend, and my elder, even if you don't do anything for me, I will still do my best to help you."

Ye Chen said, and said: "Professor He, how about this, you give me a contact information of your daughter, I will communicate with her to see if she is interested in my side of the work.

That would be great" He Yuanjiang hurriedly patted his chest and said: "Don't worry, although I am a daughter, and I don't get along very reliable, but she is still very, very responsible, and with my vision for so many years, this girl is really a talent, if she comes to help you, coupled with my support behind, I believe it will definitely If she comes to help you, coupled with my support behind, I believe you will be able to help you to do the business of Shenyang transport up, so, persuade her to come to Jinling this matter, please more.

Ye Chen nodded and said seriously, "Professor He, don't worry, I will do my best."

He Yuanjiang hurriedly waved his hand and said seriously: "Eh don't call Professor He so rusty, call Uncle He

Ye Chen smiled faintly and said, "Okay, Uncle He.

He Yuanjiang took out his cell phone and said to Ye Chen: "Come on, let's add a WeChat, I'll push her WeChat business card to you afterwards, when you add her, don't say I recommended it, just say you happened to read her paper in a financial journal and are interested in working with her in depth.

said, He Yuanjiang some not too kindly said: "This girl is a bit conceited, you have to hold her up more, if you hold her up to find the north, this thing is half done"

Chapter 2619

Ye Chen knows very well that what he lacks now is not money but talent.

Doing business is not something that can be done by just moving your lips and relying on your imagination.

Especially when it comes to managing a business, one must have top talents who are capable enough to make the business bigger and stronger.

Ye Chen only has two pieces of business in his hands now.

One is the Dihao Group and the other is Jiu Xuan Pharmaceutical.

The Dihao Group has Wang Dongxue in charge, while Jiu Xuan Pharmaceuticals has been handed over to Wei Liang.

But apart from these two business sectors, if he wanted to add other new businesses, he was stuck on the talent.

Hong Wu is loyal, but after all, he is a roughneck who can carry out orders, but he still lacks a lot of brains to do big things.

The rest, whether it was Qin Gang, Wang Zhenggang, Li Tailai or even Song Wanting, all had their own businesses, and Ye Chen could not ask them to give up their original careers to work for himself.

Therefore, Ye Chen's current self was to recruit as many people as possible.

If it could have a strong management team, then it would not only be able to make a breakthrough in ocean shipping, but even in the next few years, it would be able to expand its business to more areas.

It was because of this thirst for talent that Ye Chen jumped at He Yuanjiang's daughter.

After all, this kind of buy-one-get-one-free good thing doesn't come along very often, and when it does, one must seize the opportunity.

However, he also knew very well in his heart that He Yuanjiang must not be sure to call his daughter to his side either, so he pinned his hopes on himself.

If he could convince his daughter to come to Jinling as he wished, He Yuanjiang would definitely remember him as a favour in his heart.

So, Ye Chen took out his mobile phone and added He Yuanjiang's WeChat, after which He Yuanjiang recommended a WeChat business card to him.

Ye Chen looked at the business card recommended by He Yuanjiang and found that the other party's nickname was "Xiao Qiu is not afraid" and his avatar was a baby-fat child with a clenched fist and an expression of going all out to cheer.

He Yuanjiang said, "Ye Chen, let me introduce to you, my daughter's name is He Zhiqiu, the same year as you, but I remember you were born in the first half of spring when the flowers bloomed, right?"

Ye Chen nodded and said, "I was born on the second day of the second month of the lunar calendar, just a month after the Spring Festival."

"Hmm." He Yuanjiang smiled, "I probably remember

She was born in early autumn in the second half of the year, when the leaves were just starting to fall, so I gave her that name.

He said, He Yuanjiang added: "By the way, remember what I told you, don't mention me when you add her.

"Okay." Ye Chen was busy saying, "Uncle He don't worry, I have a sense of proportion.

He Yuanjiang heatedly smiled, patted Ye Chen's shoulder and said: "Ye Chen, Uncle He will have to rely on you to help mediate this tense father-daughter relationship.

If your daughter really doesn't agree, as long as you nod, I will personally go to Syria and tie her back."

Chapter 2620

He Yuanjiang laughed: "Hahaha, that should not be so troublesome, uncle believes in your ability, when the time comes to brag about her a few times, she should be moved."

The main concern is that she hasn't had enough fun yet. If she really wants to stay in Syria for a year and a half, ordinary people really can't persuade her.

Ye Chen nodded and said seriously, "I will try my best to persuade her and try to get her back soon.

"Good." He Yuanjiang was busy saying, "Why don't you just add her to your friends now and talk to her first.

Ye Chen laughed, "Uncle He, don't forget that there is a time difference between Syria and us. If I remember correctly, they are five or six hours slower than us, and it should not be dawn yet.

He Yuanjiang said: "It doesn't matter, it doesn't matter if it's not dawn, you can add her as a friend first, when she passes you, you can chat with her when you want.

Ye Chen nodded: "Good, then I'll add it now, but if I add it directly, it will show that the referrer is you, I'd better copy her micro signal."

After saying that, he clicked on that business card, copied the micro signal, added it again, and wrote nine words on the reason for adding it: chairman of the Jinling Dihao Group.

After the request to add a friend was sent, after only a minute, Ye Chen received a message that the other party had passed his friend application.

He couldn't help but say with some surprise, "Uncle He, your daughter is still awake so late."

He Yuanjiang said resentfully, "I guess I can't sleep, if you throw me in that shitty place, I guess I can't sleep either."

After saying that, he hurriedly urged, "Ye Chen, talk to her quickly and feel how she is doing now."

"Good."

When Ye Chen finished, he sent a message to He Zhiqiu: "Hello Miss He, I am Ye Chen, the chairman of Jinling Dihao Group, I want to talk to you about a cooperation, I wonder if you are interested"

The other party quickly replied by voice: "Did He Yuanjiang ask you to find me? Tell him that I am not going to Jinling, so he should not waste his energy."

Hearing his daughter's words, He Yuanjiang said glumly, "Ye Chen, just tell him that you don't know me at all, if she knows that we are colluding, she will definitely be more reluctant to come."

Ye Chen nodded and continued to reply with a text, "Miss He you misunderstood, I don't know He Yuanjiang, I just saw the paper you published in a financial journal and felt that you were really insightful about international finance as well as economic management, it just so happens that I am now preparing to expand a new piece of project to do ocean shipping, and I happen to be short of a person in charge, so I thought of you."

The other party used his voice to ask: "If you were not sent by He Yuanjiang, then where did you get my WeChat from?"

He Yuanjiang was dumbfounded for a moment.

Just when he still didn't know what kind of wording and reason he should ask Ye Chen to use to explain this question, Ye Chen had a bright idea and replied directly with his voice: "Miss He, I found your contact information through an international headhunting company, and I paid 50,000 USD for the headhunting fee in order to get your contact information, originally I should have asked the headhunter to contact your side first, but I thought it would be more straightforward and efficient to contact you personally for such a major collaboration."

Headhunters are specialized in scouting for mid to high end talent, they are like real estate agents, they know all kinds of listings and theoretically, if you pay them, there is nothing they can't get on a property owner.

Theoretically, as long as you pay them, there is no information they cannot get on property owners.

In this respect, headhunters are also a

As soon as He Yuanjiang heard Ye Chen's words, he immediately gave him an excited thumbs up, as this explanation really seemed seamless to him.

As a matter of fact, He Zhiqiu on the other side didn't doubt it either, she replied: "I understand, but I'm really sorry, I'm in Syria now, and I probably won't leave here until at least six months later, so I may not be able to work with you, I'm really sorry."
