

Ye Chen 2631

Chapter 2631

"All things are inauspicious?"

When He Yuanjiang heard these four words, he subconsciously asked, "What does this mean? !

The old man asked with a disgusted look on his face, "Have you ever had your fortune told? Don't you know the meaning of the four words "all things are inauspicious"? It means that everything is inauspicious!

He said, "It means that if you draw this lottery, whatever you ask, it will be unlucky! If you ask about the relationship of a husband and wife, it means that they will be separated from each other; if you ask about your career and money, it means that the eggs will fly away; if you ask about your luck, it means that you will be in trouble; if you ask about the safety of your loved ones, it means that they will meet with a great calamity, or they will not escape!

"What? !" After hearing these words, He Yuanjiang immediately became anxious and asked nervously, "Old man, do you have any way to solve my daughter's calamity? !

"If you had drawn a lower lottery, I might have been able to think of something, but you drew this one, which means that this matter is too difficult!

As he said that, he turned his words and added: "But if I go all out and approach to break the game, then maybe there is still a chance of survival!

He Yuanjiang at this time has been completely disturbed by the other side of the rhythm, his mind is concerned only about the safety of his daughter, as for so many years of reading and learning

The knowledge that he had read and learned over the years was completely useless.

He asked with a face full of nervousness and eagerness: "Old man, please, you must help!"

The old man saw him . But breaking this predicament is too costly for me, so you have to follow the fortune of five thousand dollars this time, so that I can see if your heart is sincere.

He Yuanjiang did not care about the 5,000 yuan, if spending 5,000 yuan could increase the chance of his daughter's safe return by one in 10,000, then he was willing to do everything he could to raise 10,000 yuan to exchange for his daughter's safety.

So, almost without thinking, he was about to continue to scan the code and pay.

The old man said, "Old man, it doesn't matter if it's money or not, but before you take the money, shouldn't you tell us the specifics first, or what kind of way you are going to help crack it, or let us spend the money knowingly?"

The old man didn't expect Ye Chen to come out halfway at this time to spoil his good deed, so he sneered and said: "A mere young man, how dare you doubt my ability?"

Ye Chen waved his hand: "I don't dare, I'm not doubting you, I just want to be clear, it's just like repairing a car, although we don't know how to repair it, but, where it's broken, what parts need to be replaced, you have to tell us first."

The old man sneered: "Humph! I can use the five emperor money to divine, find out the specific crisis situation his daughter is facing, and also use the spiritual talisman to break the ban, and even use the Tai Shang Lao Jun urgent order to save her, each solution consumes different energy, and the corresponding price is also different.

Ye Chen smiled and nodded his head.

He recalled that in the Jiu Xuan Tian Jing, there was also an account of divination, in which there was indeed a way of using ancient coins to divine trigrams, but the account did not say that the Five Emperor Coins should be used, it only said that ancient coins that were truly round on the outside and square on the inside should be used, and that the older they were, the better the results.

As for the Five Emperors' Coins, it was only in modern times that the Five Emperors' Coins were used, and they often combined the coins of the Qin, Han, Tang, Song and Ming Dynasties to call them the Five Emperors' Coins, but although the author of the Jiu Xuan Tian Jing was nowhere to be found, judging from the age of the porcelain vase at that time, the book was written in the Tang Dynasty at the latest, while the Five Emperors' Coins were only written in the Ming Dynasty at the earliest, so the way of divining trigrams with ancient coins recorded here should be much earlier than the Five Emperors' Coins, and could even be said to be the ancestor of the Five Emperors' Coins.

So, Ye Chen deliberately asked him, "What can you divine with the Five Emperor Coins? How about this, you divine it first, if you divine it well, I will give you 10,000!

The old man immediately said, "Good! Then I'll show you!

After that, he took out a string of copper coins from his pocket, on which hung five coins of different dynasties

Chapter 2632

He then untied the red rope and held the five copper coins in his hand for a moment and shook them, saying in a cold voice: "Kid, watch out!

After saying this, he threw the five coins out and stared at the ground again. The coins on the ground, a shocked face said: This trigram shows that your daughter will have a bloodbath recently, if not timely intervention, I am afraid it will turn into a deadly disaster!

When He Yuanjiang heard this, he immediately became anxious. That's not good enough? He asked, "Old man, please save my daughter no matter what!

Ye Chen was a bit puzzled at this point.

The five emperor coins that the old man had thrown out were indeed five ancient coins of real material, but the information conveyed by this trigram was the meaning of layers of mist and fog.

The reason for this is not because the target's future is confusing, but because the diviner's level is really limited, and because of his limited level, he can only divine the result of looking at the flowers in the fog.

This is obviously a sign that he can't understand anything, but he says that other people are in danger of bloodshed, which is obviously a deliberate attempt to scare people and use it to knock them off their feet.

So, Ye Chen can basically be sure that this old guy is

The most he can do is to learn a little bit of the fur of the fur of the fur.

If this is his level, if he is in the field of medicine, it is equivalent to just learning how to distinguish between the positive and negative sides of an X-ray film, and other medical knowledge - no matter what.

So for him to come out and tell fortunes at this level was a complete shakedown.

So, Ye Chen pretended to be surprised and said, "Just by throwing five copper coins on the ground, you can calculate a person's future fortune?"

"That's natural!" The old man said with a proud face: "I have learned this skill for fifty years, and I have already perfected it!"

Try!

Ye Chen brushed aside his mouth, "I don't believe you, let me try!"

After saying that, without waiting for the old man's consent, he directly grabbed the five copper coins one - by - one.

Afterwards, he thought of He Yuanjiang and his daughter in his mind, and then thought of the account of divination by copper coins in the Nine Mysterious Heavenly Scriptures, and after a moment of silent thought, he threw the five coins out.

When the old man saw how serious he looked, he disdainfully brushed his mouth and said, "Do you know the idiom of "East is mechanical"? You look like a real one, how much can you read this trigram!"

Ye Chen ignored his sneer, his attention was focused on the five

The five bronze coins.

These five copper coins presented a great amount of information in his eyes.

First of all, the overall trigram sign is a fierce one, and it is an extremely cruel fierce one, almost certain death.

In other words, not only was He Zhiqiu's life in great danger, but there was also the possibility of a tragic death.

Secondly, the direction of the hexagram points to the West, which is so positive that there is hardly any deviation;

In other words, He Zhiqiu's accident must have occurred directly to the west of Jinling;

Syria is in the Middle East and West Asia, which happens to be in the same dimension as the province where Jinling is located, and the trigram shows that it is due west of here, which means that He Zhiqiu's current dimension is not deviating from Ye Chen's location!

In the end, the trigram as a whole looked like a pattern of certain death, but it left the only door of life, and that door of life was right here!

He immediately took out his phone and looked up the latitude and longitude of Syria and Jinling on the search engine, and found that the country of Syria was between 32 degrees 20 minutes north, and 37 degrees north, while Jinling happened to be between 31 and 32 degrees 37 minutes north!

In other words, the dimension He Zhiqiu was currently in was within this interval of 32 degrees 20 minutes to 37 minutes north latitude

Chapter 2633

From the trigrams, He Zhiqiu had almost nine lives to die, and this only door to life was in Jinling.

Ye Chen instantly realised that this door of life for He Zhiqiu must lie in himself.

Apart from himself, I was afraid that no one could save her.

Moreover, this trigram looked as if He Zhiqiu was already enveloped in danger from now on.

Furthermore, her birth gate was on himself, if he didn't save He Zhiqiu, she would surely die!

To save, or not to save, Ye Chen hardly hesitated too much.

Just in that lightning flash when he discovered that He Zhiqiu's birth gate was on his own body, Ye Chen had already decided to save her.

Although Ye Chen had never seen He Zhiqiu before and had no friendship with her, Ye Chen still had two reasons in his heart why he had to save her.

The first reason was that he wanted to enter the huge market of ocean shipping as soon as possible, and He Zhiqiu was the best person for the job. If she could come back to help him, her father, He Yuanjiang, would also help him, so that the business would be stable;

The second reason is that He Yuanjiang is a friend and classmate of his mother's, and after his parents' accident, he also took a lot of trouble to find himself, and he only has He Zhiqiu, a daughter, so just looking at this layer, he can't see the death.

.....

However, Ye Chen's heart was a little worried.

The actual fact is that you can save, but how?

After all, she is in Syria, and she knows nothing about exactly where in Syria she is.

The possibility of finding out exactly where she is directly from the trigrams is almost nil!

Thinking of this, a thought flashed through Ye Chen's mind: "This time, He Zhiqiu is following the Syrian government forces in a military operation.

If He Zhiqiu's life is in danger, then it means that the government forces will probably fail in this operation, which will bring He Zhiqiu and the girls down.

' In that case, I'll have to pay more attention to the situation in Syria and the news to see if there is any news about the failure of the government's operation in the next few days.

Just as Ye Chen was filled with sadness, the stall owner of the fortune telling stall across the street said with a sneer on his face: "Young man, why are you silent? Is it because you don't understand what your trigram means? Or are you just thinking about how to fool us in the future?"

The first thing you need to do is to get out of the way if you can't do it, so don't delay me in solving people's problems!

Ye Chen saw his expression was very smug, and his eyebrows were filled with the villain's

I see that you have a poor face and are destined to have a life of suffering and hard work, and you are not destined to achieve great things.

Therefore, I still advise you not to cheat all day long, at such an old age, find a stable and formal job, and save yourself from the misery of hunger and cold in the future."

The old man did not expect that he was looking at Ye Chen's jokes, but Ye Chen turned around and mocked himself a bit.

What was more crucial was that this guy was really right.

He had indeed suffered a lot in his life.

This was mainly because, when he was young, he was over-eyed and over-ambitious, and he was not right-minded, and he had been in prison for a few years.

So there was hardly any job that he could do for long.

He had no longevity in anything he did, let alone any accumulation, so he had almost nothing to show for it in his life.

Not only had he wasted his life, but his children were also unproductive.

Now his children have all started their own families, but they are all living in poverty.

At his age, he still has to cheat, partly to support himself and his partner, and partly because he wants to give his children a little allowance.

Chapter 2634

In normal days, he was full of bitterness that he didn't dare to pour out to the world, and he had to pretend to be a worldly man to deceive others, but now he was coldly poked by a young boy, and it instantly made him furious.

He didn't think that Ye Chen was really capable of reading people's faces, he felt that Ye Chen was just deliberately trying to badger his business and was also trying to take advantage of the opportunity to ridicule himself!

So, he immediately snorted coldly and said with disdain, "Humph! You're saying that old man has suffered and worked hard all his - life? What a joke! To tell you the truth, I have already achieved financial freedom when I was young, and I already have a large number of children and grandchildren, so I can enjoy all the blessings and happiness of my family at home, the reason why I still come out to tell fortunes at such an old age is that I want to be universal!"

After saying this, he looked at He Yuanjiang and said with a bit of anger: " You can take this young man who speaks shamelessly and leave. So please also take care of yourself.

He Yuanjiang was a little anxious and lowered his voice and said to Ye Chen: "Ye Chen ah, this kind of thing we would rather believe it than not, and honestly 5000 yuan is not a big deal, even if it is to buy a peace of mind is worth it.

Ye Chen posed

I see that your cheeks are thin and your middle is flat and full, you don't look like a blessed person, and the shape of your forehead is not satisfied, this is a typical childless, or even childless face, you say you have children and grandchildren, how is this possible?

The old man snorted coldly: "Boy, you are not as good as others, you start to engage in personal attacks? I have three sons, three daughters, and thirteen grandchildren and grandchildren, and you say I have a childless face? ! How outrageous!

Ye Chen smiled faintly: "You do not hurry, I will give you to calculate - the trigram.

After saying that, he grabbed the five copper coins and threw them out again.

Afterwards, Ye Chen looked at the position, positive and negative, of the bronze coins and said indifferently, "The trigrams show that you are destined to have a lonely star and are destined to have no descendants!"

After saying that, Ye Chen looked at him and asked seriously, "Do your several sons and daughters, look like you?

The old man froze for a moment.

With one sentence, Ye Chen had poked at a knot that had been haunting him for so many years.

That was, none of his six children really looked like him.

Ye Chen continued: "This trigram also says that you will be in the near future

I believe it is about this matter.

The old man said angrily: "Don't you talk nonsense here! You are so young, I advise you to be virtuous!

Ye Chen waved his hand: "I'm not teasing you, I'm telling the truth."

After saying that, Ye Chen asked him, "Do you know what blood type you have?"

"Me?" The old man blurted out, "I'm type AB!"

Ye Chen then asked, "Where is your partner?"

The old man said, "My partner is type O! What is it? What do you want to say?"

Ye Chen asked again, "Do you know the blood type of one of your six children?"

The old man continued, "My eldest son is also AB, just like me, what's wrong?"

This time, before Ye Chen could say anything, He Yuanjiang said with a shocked face, "Your wife is blood type O, you are blood type AB, and your eldest son is also blood type AB?"

"Yes!" The old man snorted coldly, "The blood type is the same as mine, so he must be my own son!"

He Yuanjiang said awkwardly, "From the science. From the scientific law of blood type inheritance, people with blood type AB and blood type O will only give birth to blood type A, or blood type B, it is impossible to give birth to blood type O, or blood type AB!"

Chapter 2635

The old fortune-teller did not expect that even He Yuanjiang, a gentle middle-aged man, would sing against him, so he said with some irritation: "Don't talk to me here about bullshit science, science of what? Even science has to have basic common sense, right? The dragon gives birth to the phoenix, the rat gives birth to a son who will make a hole. Is there a problem?"

He Yuanjiang said helplessly: "Old man, you really have to believe in science, although I am not studying medicine or biology, but I am at least a university professor, this basic common sense is still there."

When the old man heard He Yuanjiang say that he was a university professor, he immediately panicked a little.

When he saw that He Yuanjiang did not look like a fraud, he felt that something was not right.

So he subconsciously asked, "Since you are a professor, can you explain to me why my son can't be of type AB blood?"

He Yuanjiang said seriously: "If I really talk about the principle of this, I can't really explain it clearly in a moment, but you can just look it up on the Internet."

The old man hurriedly took out a large screen miscellaneous mobile phone, seriously wrote and drew for half a day, then saw his expression frozen for a moment.

.....

He did look up the relevant results, too.

On the internet, all the claims are the same as He Yuanjiang's, that parents with blood type AB and O can only give birth to children with blood type A, or B, and definitely not O and AB.

This also meant that his eldest son was in no way his own son, and at the thought of this, a mouthful of old blood almost spurted out of him!

Immediately, he picked up his mobile phone in a panic and called his second son, asking straight away, "Second, do you know what blood type you are?"

His second son said in surprise: "I remember it was type O, I think it said the same as my mother."

"Type O?" The old man was struck by lightning and asked, "Are you sure? Are you sure?"

"No, I'm not wrong." The second son said, "Then when I was not caught stealing cables, the prison gave me a blood type test before I entered the prison to be registered in the file."

The old man's eyes went black.

This was a f*cking tragedy.

The oldest wasn't his, and the second wasn't either?

As he broke down, he thought of his youngest son and couldn't resist making another phone call.

As soon as the person on the other end picked up, he asked after him, "Older three, you

Do you know what blood type you are?"

The youngest son was surprised and asked: "Dad, you're calling about this? I'm a little bit of a fan of the idea, but I'm a little bit of a fan of the idea."

The old man said out of the blue: "You tell me now!"

The younger son asked in confusion: "Dad, why are you calling about this?"

The old man scolded: "'Where the f*ck are you going with all this nonsense? Why don't you just answer whatever I ask you?"

The youngest son hurriedly said, "Well, well, I'm an AB blood type, aren't I like you? I inherited it from you."

The old man was so angry that he almost fell to the ground.

The youngest son then said, "Dad, the teacher at Tengfei's school called and said that this child is unable to keep up with his grades in all subjects and asked me to enroll him in a course, I calculated that the registration fee alone would cost more than three thousand, can you pay it for him?"

The old man gritted his teeth and cursed, "I'll pay the hell up!"

After saying that, he slammed his mobile phone on the ground and smashed it to pieces, followed by tears.

He had never dreamed that none of his three sons would be his own.

He couldn't help but cover his face in pain: "What have I done to deserve this?"

Chapter 2636

After saying that, his whole body completely collapsed and he lay down on the ground at once, whimpering and crying.

He Yuanjiang also looked frozen.

He had always thought that Ye Chen was deliberately angry with this old man, but he had never expected to have Ye Chen's prophecy come true.

He hurriedly asked Ye Chen: "Ye. Chen what's going on here .

Ye Chen shrugged his shoulders helplessly: "That's what's going on ah, from his face and trigram, he shouldn't even have a son, but he ended up having three more, then this is obviously wrong, but now it's solved, he really doesn't have a son.

The fact is that the case is now solved and he does not have a son. He Yuanjiang couldn't help but ask: "Can fortune-telling and face reading be so accurate? This is too amazing, right?"

Ye Chen stood up and pulled He Yuanjiang farther away while whispering, "Uncle He, I was actually teasing him on purpose just now, but I didn't expect that my crow's mouth would be right."

"Huh?!" He Yuanjiang said, dumbfounded: "How can you say that? !"

Ye Chen laughed, "A blind cat met a dead rat! What's impossible."

He Yuanjiang asked again, "Then what did he say about Zhiqiu being in trouble?"

Ye Chen waved his hand

"That's all his bullsh*t, you simply don't take it to heart.

He Yuanjiang heard these words, slightly relieved.

He also found that the old man who told fortunes was indeed a big lug.

Therefore, the tension in his heart was relieved.

Ye Chen remembered the fortune he had just divined and said to He Yuanjiang, "Uncle He, if you have time this afternoon, you should pay more attention to the local news about the situation in Syria.

I do have some friends in the media who have good connections and can talk to all the major media companies. These large media outlets should have war correspondents and news networks, so I'll ask them to help me keep an eye on first-hand information.

Ye Chen busy said: "Then if there is any news, you also the first time to tell me.

"Good!

Ye Chen looked at the time and said, "Uncle He, just go back to school, I'm leaving too.

He Yuanjiang pointed at the one lying on the ground in the distance

Rolling and crying, he said with some sympathy: "What about this old man?"

Ye Chen said helplessly: "I can't help it, I have no son in his life, I can't give him a change to go, this thing let him digest it slowly!

He Yuanjiang sighed helplessly and said, "Okay, then I'll go first, we both must keep in touch today, no matter who has any information on their side, exchange it with each other at the first time."

"No problem.

After seeing He Yuanjiang cross the road, Ye Chen could not help but let out a long sigh and muttered sadly, "I always feel that He Zhiqiu's accident is imminent and there is not much time left for her, but how can I save her? I don't know where she is, and I don't know how to get to Syria".

"You know, there's a lot of fighting going on in Syria! The situation is so volatile that there are no direct flights to the country from any city in the country.

"There are even reports on the internet that the civil aviation system in Syria has been completely shut down and that you may have to fly to a neighbouring country and then find a way to enter by road.

"That would take at least 24 hours on the road, and if there were any real danger, it would be too late to react.

Chapter 2637

On his way to Buckingham Palace by taxi, Ye Chen was still worried about He Zhiqiu's matter.

In case something happened to He Zhiqiu and he didn't have time to get there, Ye Chen even wanted to leave now, but the situation in Syria was so special that he didn't know how to get there.

When he thought that Richard Chen had strong resources in various areas, Ye Chen was ready to seek his advice.

It was just as well that he had to discuss with him how to deal with the Su family next.

After arriving at the Buckingham Palace, Ye Chen went straight to Richard Chen's office.

At this moment, inside the Buckingham Palace Hotel, Su Shoudao was still waiting for the opportunity to establish contact with Ito Yohiko.

However, because he had sneaked into Buckingham Palace quietly, he had stayed inside his room until now, not daring to show his head.

His wife, Du Haiqing, his eldest daughter, Su Zhiyu, and his illegitimate daughter, Su Ruoli, are likewise residing in this hotel.

Only, none of these three parties knew that the other two were beside themselves.

Ye Chen came all the way to Chen Zekai's office, and as soon as they met, Chen Zekai hurriedly reported to him, "Young master, the two grandchildren you asked me to send people to monitor, my people have already started to keep an eye on them secretly, and I will tell you the first time there is any movement."

Ye Chen nodded and said in a somewhat gruff tone, "These two people were sent by the Su family, and I see that the odds are that they are trying to find clues about me, so you must keep a close eye on them, and also keep an eye on the people who have come to Jinling recently."

When Chen Zekai heard this, he immediately said with righteous indignation, "Young master, these two people dare to turn against you, if you want me to say so, why don't we just strike first and finish them off?"

The two of them are feng shui masters, and they have some integrity, so let's keep them alive and see what they are planning to do next.

Chen Zekai was busy saying, "Okay, young master, I know."

Ye Chen nodded and asked him, "Right old Chen, do you know anything about the situation in Syria

"Syria," Chen Zekai said awkwardly, "Young master, why are you suddenly concerned about this shitty place?"

Ye Chen let out a sarcastic laugh and spoke, "I'll go to a place where birds don't shit."

"What," Chen Zekai exclaimed and said, "Young master, you're not kidding me, you're going to Syria.

Ye Chen nodded his head: "That's right, and probably the sooner the better."

"This "Chen Zekai thought about it and said offhandedly: "That place is now at war, the civil aviation system is not navigable ah what do you want to law that for if there is nothing important, I would advise you not to go"

Ye Chen said helplessly: "There are some sudden emergencies, I have to go, and time is short, you quickly help me inquire, there is not a more reliable route, can let me in the fastest time, all the way into the capital of Syria Damascus.

Once Richard Chen heard this, he stopped persuading Ye Chen, but immediately took out his mobile phone and made several phone calls in quick succession.

Chapter 2638

After the phone call, Richard Chen said to Ye Chen: Young master, I consulted my friends and also inquired about some overseas channels, now if you want to go to Syria, the more common route is to fly to Turkey or Iraq first, and then take the land route from these two countries into Syria.

But what is more embarrassing is that Turkey is in the north of Syria and Iraq is in the east of Syria, but Damascus, the capital of Syria, is in the southwest of Syria, which means that whether you go to Damascus from Iraq or from Turkey, you have to go through several hundred kilometres of land.

Moreover, the terrain in the Middle East was complex and the traffic was not very convenient, and this journey alone would take at least twenty hours.

Ye Chen frowned and said: "If I remember correctly, the western part of Syria should be bordering Lebanon and the two capitals are very close to each other. The straight line distance is even less than 100 kilometres, isn't it more convenient to fly to Lebanon first and then enter Syria from Lebanon"

Richard Chen nodded and said, "Young master, I asked this just now.

"In theory, of course Lebanon is closer to Damascus, but if civil aviation flies from the country to Lebanon, the route just happens to go through Syria.

Now the Syrian government forces and the opposition are fighting like rotten pears, and both sides have ground-to-air weapons in their hands, so no civil aviation from any country dares to fly into its airspace, and can only make a big circle to avoid the Syrian airspace.

According to the civil aviation routes, once you have to go around Syria, the flight distance has to increase by nearly two thousand kilometres.

The company's business planes will not be able to fly over in one breath and will have to find a stopover airport midway to refuel.

"In that case, it will be necessary to coordinate an additional airport for stopover replenishment, and when the time comes to land, refuel, and take off again after routine checks, there will be another one or two hours delay.

"The company's main business is to provide a wide range of products and services to the public.

Ye Chen nodded and said with a grave expression: "Even if we have to cross the border secretly, the straight-line distance of less than 100 kilometres will save a lot of time.

The two countries are heavily guarded and at this very time, if someone crosses the border illegally, either side has the right to shoot directly, and there are not only Syrian government forces, but also opposition forces in Syria, the situation is too complicated, it is difficult to penetrate

Ye Chen waved his hand and said indifferently, "This is not a problem, I have my own way to cross the border."

The main thing is that the flight time is too long, it will take at least nine hours, if we take a detour, we will have to fly for another two to three hours.

Chen Zekai was also in deep thought, he thought long and hard, suddenly thought of something and said out of the blue: "Young master, at the moment, there is a only solution that allows you to fly from Jinling to Lebanon in four and a half hours only I can't do this solution, only you can try it yourself."

Ye Chen hurriedly asked, "What is the solution?"

Chen Zekai hurriedly reminded, "Young master, do you remember, that time when you went to Changbai Mountain to ambush the Eight Heavenly Kings in advance, I told you that your grandfather spent a lot of money to buy a Concorde

"The Concorde's flight speed is 2.5 times faster than that of a civilian aircraft. Moreover, the Concorde your grandfather bought was specially modified and upgraded to reduce the aircraft's carrying

capacity and increase its fuel capacity, so that it can fly 10,000 kilometres at supersonic speed with a single refuelling.

Chapter 2639

The Concorde was the only supersonic airliner in the world to have ever been in commercial operation.

For many young people, they may not even know about this aircraft, but they have to admit that it has written a big part in the history of civil aviation.

A look at the pattern of human technological development over the decades reveals an interesting phenomenon, which is that, in recent years, people have been relatively more conservative in their development of technology.

The Cold War period from the 1960s to the 1980s, on the other hand, was a golden age when human technology thrived and developed like crazy.

The people of that era showed an unprecedented fervour and radicalism in the field of technology.

The Soviet Union sent cosmonauts into space and the United States sent astronauts to the moon at a time when computers had no more computing power than a Zeppelin learning machine.

It was also an era when people lost interest in ordinary subsonic civil aircraft and began to stride headlong into the supersonic age.

In 1975, the Concorde, capable of reaching twice the speed of sound, was put into service, and people were already enjoying supersonic airliners at 2,150 kilometres per hour at that time.

Nowadays, it takes nearly two hours to fly from Yanjing to Jinling, but with the Concorde, it only takes 25 minutes.

Unfortunately, although this aircraft was extremely fast, its fuel economy was extremely poor, so with the advent of the economic crisis and a serious flight accident, this aircraft was withdrawn from civil aviation in 2003 and has since disappeared from the world.

And, without exception, all of them have become the exclusive cars of top tycoons.

Ye Chen's grandfather, Ye Zhongquan, had one.

His Concorde, which he bought and spent enormous financial resources on renovation and maintenance, still costs tens of millions of dollars a year for basic maintenance.

However, Ye Zhongquan spent so much money on this aircraft . With all the money spent on it, he can hardly fly it once a year.

But the significance of this kind of aircraft to the top big families is equivalent to the nuclear weapons of a big country, which can usually remain sealed away and not be used for years or even decades, but once a major event requires it, it can be put into use immediately.

That's why Richard Chen came up with this solution. As long as Ye Zhongquan was willing to lend Ye Chen this Concorde, it would be no problem at all to send Ye Chen to Syria within four and a half hours.

However, Ye Zhongquan was so attached to this plane that he had never given it to anyone except himself, and even his sons and daughters had never had the chance to use it.

Chen Zekai was just a spokesman for the Ye family in Jinling, and he was not even good enough to get in touch with Ye Zhongquan directly, so Ye Chen could only talk to Ye Zhongquan himself about this matter.

Ye Chen was instantly awakened by his words.

He couldn't hide his excitement and said out of the blue, "Great if there's a Concorde, it will save a big chunk of time at once"

Saying that, he immediately took out his mobile phone and spoke, "I'll give him a call right now, we have to borrow this plane no matter what"

Chen Zekai said with some concern: "Young master, it is said that your grandfather is extraordinarily precious about this plane, so far he has not lent it out, nor has he let anyone else use it other than him, I am now worried that he will not be willing to lend it to you.

The company's main business is to provide a service to its customers.

After saying that, he called his grandfather Ye Zhongquan.

The phone only rang twice before it was immediately answered.

Chapter 2640

Ye Zhongquan was very happy and asked, "Chen'er, why did you want to call grandpa today?"

Ye Chen got straight to the point and said, "I have something I want to ask you for help."

Ye Zhongquan did not hesitate to say, "Oh, what else do you have to do with grandpa?"

Ye Chen then said, "I have an urgent matter, I have to go to Yizhao Lebanon immediately, I heard that you have a Concorde, I want to borrow it.

"I heard that you have a Concorde, I want to borrow it. Why don't I lend that plane to you?"

Ye Chen said firmly, "No, I'll only lend it to Concord.

Ye Zhongquan sighed and said, "Aiya, that plane is really too old, it left the factory in 1985, to be honest, it is quite older than you, and as you know, the older something like a plane is, the less safe it is."

Ye Chen didn't expect Ye Zhongquan to play Taiji with himself here, so he couldn't hold back a bit and blurted out, "It's fine if you don't want to lend me the Concorde, but you should at least lend me a plane that can let me fly from Jinling to Lebanon within these four and a half hours.

"This Ye Zhongquan said awkwardly: "Four and a half hours is too much to ask, can you be a little lenient".

Ye Chen asked him rhetorically: "Can you lend it or not, just give me a painful answer. If you can't, then I won't impose on you.

Saying this, Ye Chen said in a cold voice: "However, I may have to reconsider the matter of the ancestral ritual, besides. I feel that since even something as small as borrowing a plane is such a hassle, I won't bother the Ye family anymore in the future."

The first thing that I did was to get a new one.

The company's voice then eased down and he spoke: "Since this is the case, then the ancestral ceremony, I will not go back on my word.

The company's main business is to provide a wide range of products and services to the public.

Ye Chen casually agreed and said, "Yes, after the ancestral ceremony, I will visit you often.

Ye Zhongquan said, "That's good, that's good.

After saying that, he asked, "Chen'er, do you need any help in Lebanon?"

Ye Chen thought of the problem he had just talked about with Richard Chen and asked, "I wonder if you can help me with my connections, so that I can leave Lebanon and go to Syria without any problems

"You're going to Syria" Ye Zhongquan asked in surprise, "There's a war going on over there, what are you doing there?"

Ye Chen said indifferently, "I have some personal matters and need to go there.

Ye Zhongquan thought for a moment and said, "I have some connections in Lebanon."

"Let me tell you this, I'll help you get through, and guarantee that I'll help you get this done before you arrive in Lebanon."

Guarantee that when you arrive in Lebanon, you can go straight to Syria."
