

Ye Chen 2641

Chapter 2641

In Ye Zhongquan's eyes, Ye Chen was a standard meat and potatoes.

Not to mention Ye Chen's strange strength, the marriage contract between Ye Chen and Gu Qiuyi, and the Gu family's willingness to abide by it, made Ye Zhongquan look forward to Ye Chen's official return to the Ye family.

The money earned from doing business is earned by accumulating it minute by minute, but if one earns money by marrying a wife, it is possible that overnight, tens of billions or even hundreds of billions of dollars more will be added to the family fortune.

Gu Yanzhong only has such a daughter as Gu Qiuyi, so everyone knows that once someone marries Gu Qiuyi, it is the same as inheriting the entire Gu family.

Ye Zhongquan had long wanted to surpass the Su family, and if Ye Chen really took Gu Qiuyi into his pocket, then the combined strength of the Ye family would definitely be able to overtake the Su family by a large margin.

By that time, the Ye family would be number one, the Gu family would be number two, and the Gu family would be almost equal to the Ye family, and that would be the time for the Ye family to rebuild its glory.

That's why Ye Zhongquan was so tolerant of Ye Chen. If Ye Chen wanted to use his Concorde, he could only give it to him; if Ye Chen wanted him to help him enter Syria, he could only help.

So, he immediately mobilized his resources and made arrangements, then told Ye Chen: "Chen'er, I have made the arrangements, the plane will take off from Yanjing in ten minutes, and will land at Jinling Airport half an hour after taking off, then you can directly board the plane at Jinling Airport and fly directly to Lebanon without stopping."

Ye Chen sighed with relief after hearing this.

Although the matter of going to Syria was too hasty, and there was no news of He Zhiqiu's accident, Ye Chen still felt that he had to go.

However, when he suddenly had to leave for Syria, Ye Chen did not know how to explain to Xiao Churan.

After thinking about it, he could only use the old rhetoric of reading feng shui for a client and called Xiao Churan.

At this moment, Xiao Churan was still in a meeting at the Dihao Group.

During this recent period, more than half of her working time was spent at Dihao Group.

Because many of the plans had to be dovetailed with the representatives of Dihao Group, once there was any need, the plans had to be adjusted in time.

The Empire Group is the largest real estate development group in Jinling, and its requirements for project partners are always very demanding.

Moreover, in the Dihao Group, except for Wang Dongxue, who knew that Xiao Churan's real identity was the wife of the chairman, no one else knew anything about it.

Therefore, in the eyes of these people, Xiao Churan was the one who won the bid for the cooperation of the Dihao Group, so they naturally had to be strict with the partners.

Xiao Churan received a phone call from Ye Chen and hurried to the bathroom, and after answering it, she asked, "Honey, why are you calling me at this time?"

Ye Chen was a bit torn for a moment.

In fact, he did not want to lie and deceive Xiao Churan until he had no other choice.

But this kind of thing, one could not tell her the truth no matter what.

Not only was the situation in Syria extremely dangerous in the eyes of ordinary people, but the reason for going to Syria alone could not be explained.

If I told her that it was the child of her mother's former classmate who was in imminent danger in Syria, there would be many questions that I could not answer.

For example, who is her mother and who are her mother's classmates?

For example, what can one do if one's mother's classmate's child is in Syria, and how can one go there with one's bare hands and without a direct flight?

There are times when, if one chooses to tell the truth, one must pull out the carrot and bring out the mud to confess all the key information; otherwise, it would be more appropriate to make up a false reason.

The first thing I did was to ask for a feng shui reading for a house, and he happened to be looking at a second-hand villa that someone else was selling.

Xiao Churan asked him: "To go to the field ah go how long"

Ye Chen thought about it and said, "If it's quick, I'll be back tomorrow; but if it's slow, it might take three or two days."

Chapter 2642

Xiao Churan could not help but ask him in a low voice: "husband, this project can not be put off ah you have a birthday in a few days, this period of time really do not want you again like before so"

Ye Chen heart moved, soft voice: "Good wife, honestly I do not want to go out at this time, but this time looking for me is an old customer, really can not be shirked."

The reason for this is that I'm not going to take any more new orders for the next month after I'm done with this one.

The reason why Ye Chen promised a month, because almost a month or so later, it will be the Qingming Festival, when he will have to go to Yanjing to participate in the ancestral ceremony, then certainly still have to use the feng shui reason to explain to Xiao Churan.

Xiao Churan on this side of the phone, once heard Ye Chen said back after a month not to take orders, the mood is finally considered to ease a lot, the tone also with a few petty meaning, angry: "This is what you said oh, if the next month, you still dare to go out to others to see feng shui, then I will sleep with you in separate rooms!"

Ye Chen heard this, immediately agreed without hesitation, said off the cuff: "wife rest assured that I do what I say!"

Xiao Churan then satisfied, asked him: "So when exactly will you leave

Ye Chen said: "A little while later, we will leave directly."

Xiao Churan asked with surprise: "Why so anxious ah I thought you had to wait until tomorrow to leave."

Ye Chen explained: "The seller of the villa contacted several buyers at the same time, because the price is cheaper, so whoever starts first will be the one who gets it, so this old customer is in such a hurry, and wants me to go over with him today."

Xiao Churan curiously asked: "What customer ah, male female"

After saying that, she felt that her question was a bit inappropriate, and hurriedly explained: "Ye Chen, I just casually asked, no other meaning ah, if you do not want to say forget it."

Ye Chen laughed: "It's a male customer, he's quite famous, the general manager of our Buckingham Palace Hotel, Chen Zekai."

Xiao Churan had naturally heard of Chen Zekai's name.

However, she only knew that Chen Zekai was the general manager of Buckingham Palace, and she also knew that Chen Zekai was very influential in Jinling, but she did not know the real background of Chen Zekai.

So Ye Chen was not afraid to use Richard Chen as a cover.

When he heard Chen Zekai's name, Xiao Churan exclaimed: "Mom, this Chen Zekai is said to be particularly powerful, even the Song family has to give him a few face, when did he become your regular customer

Ye Chen deliberately lowered his voice and laughed: "Jinling this group of rich people do not believe in feng shui, I have some fame before, so many rich people came to the name."

He said, he said: "wife, wait a moment, I let Mr. Chen say a few words to you."

Xiao Churan hurriedly said: "No, no, husband, I just ask, no other meaning."

Ye Chen laughed: "Husband also did not mean anything else, just let you rest assured."

He said, he said to Chen Zekai: "Mr. Chen, please say something to my wife."

Chen Zekai hurriedly came over and said seriously: "Mrs. Ye, I am Chen Zekai, this time it is hard for Master Ye to go with me to the field, I also hope you do not mind."

Xiao Churan said, "No, I won't, I hope everything goes well for you."

Ye Chen said: "Wife, we are ready to leave immediately, so I will not talk to you."

Xiao Churan said: "Then you go out, be sure to pay attention to safety, in addition to remember to eat on time."

Ye Chen smiled: "Don't worry, I will take care of myself."

Xiao Churan then reluctantly said:

"Then you go, I also continue to busy work, come back early."

"Okay."

Ye Chen also hung up the phone with some reluctance, and then immediately said to Chen Zekai: "Arrange the helicopter, I want to go to the airport!"

Chapter 2643

The moment Ye Chen said he was going to the airport, Chen Zekai subconsciously said: "Young master, go now!"

The first thing you need to do is to go to the airport now, and you'll be there in 20 minutes. If the helicopter moves a little slower, it might be that Concorde that arrives first. The best way to get the most out of your life is to get the most out of your life.

The first thing that happened was that he forgot that the Concorde flew fast, so wait a moment, I'll arrange for the helicopter to be ready to take off."

After saying that, Chen Zekai picked up the intercom on his desk and said offhandedly, "Helicopter crew prepare immediately, take off for Jinling Airport in five minutes"

Soon, Ye Chen heard the sound of helicopter engines starting from the roof of the building.

Chen Zekai hurriedly said, "Young master, it's time to go."

"Good" Ye Chen did not hesitate to stand up and step out of Chen Zekai's office.

Chen Zekai's office itself was on the top floor, and the helipad at the top of the building was directly above his office, and at the entrance of his office, there was a special lift that could rise directly to the top of the building.

Led by Richard Chen, Ye Chen took the special lift to the top of the building, where the helicopter was already activated and ready to take off at any moment.

A flight attendant pulled open the hatch of the helicopter and stood by respectfully. Ye Chen did not hesitate to step up, but to his surprise, Chen Zekai also followed him.

Ye Chen then said, "Old Chen, you don't have to see me off.

Chen Zekai said: "Young master, I am not going to see you off, I am going to go with you.

"Ye Chen frowned and said, "Don't bother, I can handle it myself.

Chen Zekai said, "No, young master, you are going to Syria, you are not familiar with the place, although your strength is unmatched, but I still want to be able to follow you around, moreover, in case young grandmother calls you, I can at least help you round up a lie.

The company's main business is to provide a wide range of products and services to the market.

Chen Zekai was overjoyed and hurriedly took a seat beside Ye Chen and said to the crew, "Take off!

The helicopter immediately climbed up and sped off in the direction of Jinling Airport.

Twenty minutes later, when the helicopter was still less than ten kilometres away from the airport, Ye Chen saw a white airliner with a slender body flying through the sky above him on his right.

Unlike the rounded front face of an ordinary airliner, the nose of this aircraft was a very sharp cone, and the wings were not in the shape of two open wings, but a triangular wing that leaned back as a whole.

Chen Zekai also saw the plane and said excitedly, "Young master, look, that's the master's Concorde, it looks like it's going to arrive before us!

The Concorde was approaching at a speed of nearly four hundred kilometres per hour, much faster than the helicopter, so it had left the helicopter behind in the blink of an eye.

As Ye Chen looked at the sci-fi aircraft, he could not help but feel in his heart that it was really unexpected that such an advanced looking aircraft was a product of many decades ago.

What made him sigh even more was that the power of capital was indeed extremely powerful, the cost of this kind of aircraft was extremely high, the cost of renovation and maintenance was even higher, the speed of spending money on raising it was faster than burning money, if it wasn't for the big families with assets of over a trillion dollars, no one could really afford to burn such an expensive thing.

Chapter 2644

A few minutes later, the helicopter Ye Chen was on arrived at Jinling Airport.

At the end of the airport runway was the Concorde that was parked earlier.

The pilot spoke at this time: "Young master, Mr. Chen, the feedback from the airport said that the Concord plane is ready to take off, let's land directly next to the Concord plane, then immediately board the plane and take off"

"Good" Ye Chen nodded, he increasingly appreciated that a large part of the reason for the success of the great families was the guarantee behind the success.

Ordinary people who wanted to go to Syria, according to the conventional route, it would all take at least twenty-four hours from the moment they boarded the plane.

But with such a complete system of support, the time to arrive in Syria can be reduced to almost six hours.

A difference of eighteen hours may not seem like much, it is just the difference between a plane ticket and a green train ticket, but in the face of an extremely important event, these eighteen hours can do so much, and can change the outcome so much.

Just as the helicopter was descending, Ye Chen suddenly received a phone call from He Yuanjiang, and as soon as the phone call came through, He Yuanjiang said in a panic: "Ye Chen Zhiqiu something big has happened."

Ye Chen asked, "Uncle He, don't be in a hurry, tell me slowly what happened to Zhiqiu."

He Yuanjiang blurted out, "I just received a message from my local friends, the government forces failed in their military operation today, the troops they sent were besieged by the opposition, more than a thousand people were killed and wounded, and nearly a hundred were captured, including eight American youths including Zhiqiu."

"What?" Ye Chen suddenly exclaimed: "Is the news confirmed?"

He Yuanjiang said in a tense voice: "It is confirmed. Now the government forces are preparing to launch a military retaliation, but the opposition has sent word to the government forces and the US Embassy, demanding that the US Embassy pay a ransom of US\$80 million, otherwise, Zhiqiu and her eight people will be executed."

Ye Chen asked, "Has the US Embassy made a statement?"

"Yes." He Yuanjiang sighed and said, "Their spokesman expressed strong condemnation of the opposition's actions, and they said they would not accept the opposition's blackmail, and demanded that the opposition must release the hostages, or else they would retaliate militarily against them."

Ye Chen's tone couldn't help but gaze up and said, "If that's the case, then it's likely to anger the opposition."

"Yes," He Yuanjiang cursed through clenched teeth, "My friend knows someone at the US embassy, and they actually don't care about these eight young people's death"

"And they're not even willing to pay the ransom either, because they've made a lot of enemies in the Middle East over the years, and once they compromise this time, there's no telling how many people will follow suit, so they want to stop things like this from happening again at the source"

The opposition is also very angry with the U.S. Embassy's attitude, they said they would give the U.S. side six hours, and after six hours, they would execute one every half hour.

Ye Chen hurriedly consoled, "Uncle He, don't worry so much."

He Yuanjiang cried bitterly and said, "Hey, how can I not be worried I'm so worried I'm going to have a heart attack"

"I regret that I let Zhiqiu become an American citizen when... She was born in the United States, so it was natural for her to be naturalized. The opportunity

It was a pity that she and her classmates and friends were all of American nationality.

Ye Chen said, "Uncle He, don't be anxious, and don't be so pessimistic, I will leave for Syria soon, and will definitely find a way to bring your daughter back.

Chapter 2645

He Yuanjiang had never dreamed that Ye Chen was ready to go to Syria.

He originally called Ye Chen, not to seek his help, because he thought that it was impossible for Ye Chen to help, after all, his daughter was now in Syria, 6,000 to 7,000 kilometres away, and in the hands of the well-armed Syrian opposition.

Under such circumstances, even the Syrian government forces could not do anything, so he did not think that Ye Chen could help either.

He Yuanjiang made this call to Ye Chen mainly to tell him the latest situation as well.

Therefore, when he heard Ye Chen say that he was already prepared to go to Syria, his entire body was speechless with shock.

Only after a moment did he subconsciously ask: "Ye Chen, how are you going to Syria?"

Ye Chen had already stepped out of the helicopter and boarded the long and slender Concorde in front of him.

As he ran up the stair car to board the plane, he said to He Yuanjiang over the phone, "I had the Ye family arrange a plane to fly to Beirut, the capital of Lebanon, and then enter from Beirut to Syria."

When He Yuanjiang heard this, he said excitedly, "Ye Chen, are you... are you telling the truth?"

Ye Chen said: "Of course, I am already at the airport in Jinling, and will take off immediately.

He Yuanjiang subconsciously asked: "How long will it take to get to Syria? The opposition will start killing hostages in a few hours, I'm afraid you'll go all the way there and still not make it.

Ye Chen said: "I borrowed the Ye family's Concorde, more than four hours to Beirut, in addition I also let the Ye family in the local ready resources and contacts, I landed should be able to go directly to Syria, Bekent is only a few dozen kilometres from Syria, should still be able to catch up.

He Yuanjiang hurriedly asked again: "So then can I go along?"

Ye Chen said: "Uncle He, time is of the essence, I will take off in five minutes, just wait for my news in Jinling, I will definitely bring your daughter back safely.

He Yuanjiang said with immense gratitude, "Ye Chen, thank you so much!"

After that, he asked, "Ye Chen, how are you going to save Zhiqiu when you get to Syria? You promised your uncle that you must not put yourself at risk, no matter what, you must not put yourself in danger, do you understand?"

Ye Chen said comfortingly, "Uncle He, don't worry, I'm going to use money to solve the problem this time, the Syrian opposition doesn't just want ransom money if the US embassy isn't willing to give it, then I'll give it.

The Syrian Embassy is not willing to pay the ransom, but I will.

In fact, Ye Chen was just comforting He Yuanjiang and telling him not to worry too much.

Using money to ransom people was not Ye Chen's style of action at all.

This was because he knew that such desperadoes could never have any credibility.

Generally speaking, such vicious bandits would only see money and betray their trust.

If he really took tens of millions of dollars to ransom them, they might not let them go, but might even think that they were a big fish and hold them hostage.

So, this time, he was prepared to use violence to solve the problem.

Chapter 2646

He Yuanjiang did not know Ye Chen's intentions.

He was slightly relieved when he heard that Ye Chen intended to take money to solve the problem.

Originally, he had pinned his hopes on the US Embassy to pay for the ransom, but the US Embassy's attitude was very tough, not giving the opposition any room for negotiation at all. The fastest update on the elite novel website m.jyyxs

Now, Ye Chen was willing to pay for the ransom instead of the US Embassy, and he felt that the opposition would naturally honour its promise once its core demands were met.

Thus, he said to Ye Chen with gratitude: "Ye Chen, then everything is a favor to you

Ye Chen smiled faintly and said, "Don't worry, Uncle He, the plane is about to take off, so I will not talk to you for now."

He Yuanjiang hurriedly said, "Good, good, then uncle will wait for your safe return!

After hanging up the phone, Ye Chen was already seated inside the Concorde. He and Chen Zekai were reminded by the flight crew to fasten their seat belts, and the plane took off at the end of the runway.

The most distinctive feature of the Concorde was that it flew fast and high, reaching a cruising altitude of a staggering 18,000 metres.

After climbing to its intended altitude in one breath, the aircraft began to enter supersonic cruise.

Ye Chen had been lying back in the comfortable first class seat with his eyes closed, while Chen Zekai, who seemed a little hyperactive on the side, was holding a mobile phone, using the expensive

satellite network to communicate with others, while holding a pen, writing and drawing constantly in a small notebook.

Halfway through the voyage, Ye Chen opened his eyes, looked at him and asked curiously: "Old Chen, what are you drawing there?"

Chen Zekai was busy saying: "Young master, the master gave me the contact information of the Lebanese counterpart, I communicated with the other party and got some more specific information, and now we are sorting out the resources we need to use."

Ye Chen asked him: "Is there any new specific information?"

Richard Chen said, "Yes, we have now identified the location of the opposition garrison, it's in a small mountainous town eighty kilometres north of the Syrian capital, Master has opened up the border between the two countries, we can transfer directly to a helicopter to where the opposition is once we arrive in Lebanon."

He said, he added: "Young master, the opposition's military strength is still very strong, at present, as far as the Syrian military has received information, they have at least two thousand soldiers stationed at this location, each soldier is equipped with automatic weapons, and also equipped with more than a dozen tanks and armoured vehicles, four helicopter gunships, if we go by helicopter, the other side will probably directly send armed If we go by helicopter, the other side will probably send armed helicopters directly to snipe us, and I am afraid it will be very difficult to get close."

The first time I saw it, I had to go to Lebanon and prepare a fixed-wing plane, which would take me over the destination and I would parachute myself down."

Chen Zekai asked offhandedly, "Young master, you want to go by yourself?"

Ye Chen smiled and said: "Of course, can we both go together?"

Chen Zekai said, "Young master, what I mean is that we'd better mobilize some foreign help in Lebanon, I've already asked the contact person to contact the mercenary resources in Lebanon, and am contacting as many mercenaries as possible."

Ye Chen waved his hand: "The other side has two thousand soldiers and heavy weapons, this is basically the configuration of a regiment already, in this case, there is little point for us to look for mercenaries."

"If we want to beat them, we need at least thousands of well-equipped mercenaries, not to mention that since the other side is stationed in a small town, they must have a strong local mass base, and if we really go into a full-scale war, we might even be able to add a few thousand loaded militias, I believe the reason why the government forces failed is because they underestimated their military strength and fighting potential."

And don't forget, the purpose of our mission is to save lives, not to exterminate the opposition for the Syrian government. If we really bring a thousand mercenaries to fight, these people may kill the hostages."

Hearing this, Chen Zekai could not help but ask: "Young master, if you infiltrate by yourself, won't it be more dangerous? Moreover, even if you can infiltrate, how will you get the people out then?"

Chapter 2647

"How to get the people out."

Hearing Chen Zekai's question, Ye Chen let out a bitter smile and said frankly: "To be honest, I don't know, how should I get the people out.

Chen Zekai asked nervously, "Then how sure are you this time?"

Ye Chen said seriously:

"I have never been to Syria

But from what you just said, the other side's paper figures are still very strong, even if I am somewhat capable, I cannot carry thousands of loaded soldiers hard, so I can only find a way to sneak in quietly.

The company's main business is to provide a wide range of products and services to the market.

Ye Chen waved his hand and said: "I still have the ability and certainty to protect myself, but it is not easy to say if I can successfully save the people.

Chen Zekai asked again: "Young master, you said you were going to parachute in a fixed-wing aircraft, have you had any previous experience in parachuting?"

Ye Chen shook his head and said, "No, I have had problems with food and clothing all these years, how could I have the opportunity to experience parachuting."

Chen Zekai's expression became even more nervous and he said, "Young master, if you have never skydived before, wouldn't it be even more dangerous in this situation"

He said, he hurriedly added: "The information I received from my side shows that the opposition's current anti-aircraft weapon is the American-made Stinger anti-aircraft missile, this missile has an effective firing height of around four kilometres, so the aircraft will definitely have to maintain an altitude of more than four kilometres by then, that means you will have to parachute from an altitude of more than four kilometres, this altitude is very difficult to parachute from

Ye Chen asked in vain: "Then tell me specifically, what are the main points that are difficult about parachuting at an altitude of four thousand metres"

Richard Chen explained: "First of all, we have to deal with the air pressure and low temperature at high altitude, which is a test of the skydiver's physical quality.

Ye Chen nodded: "I believe I have no problem with this point, what about the rest"

Richard Chen continued, "Other than that, it's about maintaining your attitude at high altitude, you must ensure that your descent speed is moderate, not too slow, let alone too fast, which requires you to make reasonable use of your body and constantly adjust the air resistance as well as your attitude."

Ye Chen nodded and said, "That doesn't sound like it should be too difficult, is there more"

The other thing is the timing of opening the parachute, and the control of the parachute after opening.

That said, Richard Chen continued: "Right, there is also the posture when landing, although usually look at other people skydiving, as if the speed of landing is not fast, in fact, the moment of landing, the speed of descent is still very high, which requires the skydiver to make good adjustments in the moment before landing, if the control is not good, broken legs or broken bones are common.

When Ye Chen heard this, he couldn't help but ask him rhetorically: "I, last time, jumped from a helicopter more than ten meters high. I was fine even jumping off the helicopter, this you are talking about, it shouldn't be a problem for me."

Only then did Chen Zekai remember how Ye Chen had behaved the last time he had gone to take care of Su Zhiyu and Du Haiqing, and when he thought that Ye Chen's physical quality was completely different from normal people, he was slightly relieved.

So, he took a long breath and continued: "Young master, since this is the case, then I think the only two issues you need to pay attention to are the directional control and the timing of opening the parachute, I will contact the interface person in Lebanon and ask them to prepare a device that can display air pressure, altitude and gps positioning for you, so that you can judge the timing of the jump according to the real-time data and then adjust the direction according to the gps in real time. Then you can adjust your direction in real time according to the gps."

Ye Chen nodded: "Okay, have them arrange for a parachute instructor to come with me. Get on the plane and tell me how to open the parachute and steer on the way."

After more than four hours of flight, Ye Chen's Concorde finally landed at Beirut Airport, the capital of Lebanon.

It was mid-afternoon in Beirut and the temperature had reached around thirty degrees Celsius.

The sky had been a little overcast and the air was a little humid, as if a heavy rain had been held in for a long time without coming down.

Chapter 2648

Once the plane Ye Chen was on landed, it taxied straight to a large hangar, where a transport plane with four propeller engines was also parked at the moment, and a group of flight attendants were surrounding the plane to do a meticulous inspection." After the plane had stopped, the boarding ladder was docked and the crew opened the cabin door, so Ye Chen walked out of the cabin together with Chen Zekai.

At this moment, at the bottom of the ladder, a middle-aged man with a Chinese face was standing respectfully, and when Ye Chen and Richard Chen stepped down, he hurriedly stepped forward and bowed respectfully, saying, "Hello, young master, welcome to Beirut."

Ye Chen looked at the other man and found that he was similar in age to Chen Zekai, in his mid-thirties, and his Mandarin was very standard, so he did not seem to be an overseas Chinese who had lived overseas for a long time.

He then asked, "Are you from the Ye family?"

The other party hurriedly said, "Young master, I am the spokesman of the Ye family in the Middle East, my name is Han Guangyao, the master specially asked me to fly over from Saudi Arabia to help you with your connections and provide you with all the help I can."

Ye Chen nodded slightly and asked him: "How is the situation in Liah"

Han Guangyao explained, "The Syrian opposition is at a standstill with the US embassy, but the US embassy is very firm this time and has no intention of compromising, so I guess it won't be long before they lose their patience."

Ye Chen asked, "Is the US Embassy not prepared to intervene in this matter at all, or does it have other plans behind the scenes?"

Han Guangyao said helplessly, "At the moment, they are not prepared to intervene at all, mainly because they did not get any benefit from their efforts in Syria in the previous years, and now they do not want to be involved again after withdrawing their troops."

"On the other hand, it's also because the young Americans who were kidnapped are not the children of American dignitaries or wealthy people, none of them have much background, and the US side wants to make a minor issue out of it, so it has already started to suppress the news on home soil, and is also ordering the major European media not to follow up on the story.

"In this way, even if the reactionaries do kill these eight people, the American nation will not hear anything about it.

Said Han Guangyao, and then lamented: "Moreover, the situation in Syria is particularly chaotic now, not only, it is the government forces and the opposition fighting, but there are also Kurdish forces involved.

"The United States, Russia, Iran and Turkey are all behind this, which has led to various armed conflicts in Syria day and night, and any two sides fighting are in a red-eyed state, leaving no room for error. The US Embassy has long warned US citizens not to come to Syria.

Ye Chen nodded gravely and asked him, "Has the parachute instructor arrived yet?"

"Yes." Han Guangyao said, "The instructor is on the plane debugging the parachute bag and equipment, I'll take you up to see him, by the way young master, our plane will take off in ten minutes.

Chapter 2649

When Ye Chen boarded the plane, Han Guangyao pointed to a white man who was checking his parachute bag and said: "Young master, this is Vasily from Russia, he was a parachute instructor before and has been a professional high-altitude weight-bearing parachute jumper for 20 years, he has a lot of experience.

The Russian man called Vasily stood up, saluted Ye Chen and said in not quite standard Chinese, "Hello Young Master Ye, this time I will temporarily act as your parachute instructor, if you feel unsure, I can take you with me when the time comes."

Ye Chen nodded and asked, "If I jump by myself, what do I need to pay attention to?"

Vasily explained, "When we get close to our destination, I will choose the most suitable place for jumping based on the altitude, airflow and wind speed around the destination, if you pick it yourself, you must jump out decisively when I say jump."

After saying that, he handed Ye Chen a professional watch and introduced, "Young Master Ye, this watch can monitor your altitude, temperature, body temperature, heart rate and gps position in real time, after you jump, first open your limbs to stabilise your landing speed, while using your limbs to maintain your direction, then I will use your gps coordinates to remind you by radio in real time how you should control your limbs, and then control your direction, so as to ensure that you jump out decisively when I say so. This will ensure that your landing point is as yawless as possible.

In addition, I have already set the opening reminder in this watch, if you reach the predetermined opening altitude, the watch will emit a vibration and sound alert, when you pull the main parachute switch on the parachute bag directly, you will be able to open the parachute.

Ye Chen took the watch and put it on his wrist. Vasily picked up another prepared parachute bag, pointed to a pull ring at the bottom and introduced it: "This is the pull cord for opening the parachute, after reaching the altitude, you must pull the parachute within 20 seconds, otherwise your life may be in danger.

After that, he pointed to a switch on the right side of the parachute pack and said, "This is for cutting the parachute, if your parachute doesn't open, or if it gets tangled in the air after opening, you can use this to release the parachute directly, then this is the switch for the reserve parachute on your left, after cutting the parachute, you must open the reserve parachute immediately."

Ye Chen nodded and said, "Okay, I remembered everything, open the main parachute first, if there is an accident, cut the main parachute first and then open the reserve parachute."

"That's right." Vasily said seriously: "If you don't need me to accompany you in the jump, then I will monitor your status in real time, and I will direct you to do every step of the operation when the time comes.

Ye Chen smiled faintly: "Good, I have never jumped and have no experience, if I have your guidance, it should be much smoother."

Vasily nodded and patted his chest, "Don't worry, Young Master Ye, when the time comes, I will do my best to provide you with all the remote guidance Han Guangyao spoke up at this time, "Young Master, the plane is ready to take off at any time."

Ye Chen asked him, "How long is the flight expected to take?"

Han Guangyao said, "The straight line distance is only a hundred kilometres or so, the plane will be able to take off in five minutes, and will be close to its destination in fifteen to twenty minutes after take-off."

Good." Ye Chen nodded and said blandly, "Then prepare for takeoff"

"Yes young master."

Han Guangyao walked into the cockpit and gave a few instructions before the plane's engines slowly started and pushed out from the hangar.

The plane glided to the end of the runway and then propelled itself into the air two minutes later, heading straight for Syria. Two minutes later it was in the air, heading straight for Syria.

Chapter 2650

After the plane entered Syrian airspace, Han Guangyao used his tablet to open a map of northwestern Syria and said to Ye Chen, "Young master, today is cloudy, the visibility is not high, but it is still easy to be discovered by the other side when you parachute in broad daylight, so this time our intended landing place is here."

Saying that, he pointed his finger at a location on the screen and drew a red circle on it with his fingertips, then drew an arrow and pointed to a valley: "And here, this is your destination, your landing point is about five kilometres away from your destination, you should go there on foot after landing, it's safer this way."

Ye Chen waved his hand: "It's supposed to be mountainous, five kilometres in a straight line, to cross two hills, I don't know how long it will take, is there any better way"

Ri.

"This". Han Guangyao hurriedly looked at Vasi

Vasily spoke with some difficulty, "Young Master Ye, if the landing point of your parachute jump is too close to them, it is likely that they will already be on you before you even land, so this is for your safety's sake."

Ye Chen said indifferently, "It's alright, I have a way to make sure they can't find me."

Han Guangyao had no choice but to take out an engineering plastic case from under the seat, and after opening it, it contained two dark pistols, a bunch of bullets, a tactical dagger made of fine steel, and several grenades, and said to Ye Chen, "Young master, you should take all these weapons and equipment with you, just in case."

Ye Chen shook his head and said, "I don't know how to use a gun."

Han Guangyao exclaimed, "You don't know how to use a gun, so how will you defend yourself this time?"

Ye Chen laughed, "I dare to go alone, so I naturally have a way to defend myself, just not with a gun."

Ye Chen knew very well in his heart that if he wanted to infiltrate a garrison of thousands of soldiers, it would be impossible to solve the problem with a gun, so he could only do it wisely.

If he wanted to save He Zhiqiu alive, he could only go in quietly and come out quietly, he must not make a big fuss.

Otherwise, it is likely to alert the snake and even take his own life with him.

Therefore, guns and grenades, were absolutely not to be used, once they were used, they would immediately become a target in the eyes of thousands of soldiers on the other side.

Seeing that Ye Chen did not bring any weapons with him, Han Guangyao could not help but be filled with worry.

This time, Master Ye had asked him to help Ye Chen, and he was not looking for merit but for no fault, but seeing that Ye Chen was going to do such a nine-death thing, he was also trembling with fear, and if Ye Chen did not return this time, he would definitely be chastised by Master Ye.

So he hurriedly handed Ye Chen another piece of paper and said to him, "Young master, there are some words written on it in English and Arabic, if you are found by them, give this piece of paper to them immediately, as long as they see this piece of paper, they will definitely not make things difficult for you"

Ye Chen asked with great interest, "What is written on it that is so powerful?"

As he said that, he turned the paper over.

It was true that Ye Chen did not understand Arabic, but he had learnt English as his second language since he was a child, so he could read the passage clearly at a glance.

The meaning of the words was actually very simple, just one paragraph, which probably meant: "I am the son of the Chinese Ye family, don't kill me, as long as you ensure that I am intact, my family can give you 50 million dollars"

After reading it, Ye Chen couldn't help but snicker and said, "You are indeed very considerate, but this thing really isn't of much use in my opinion either."

After saying that, he tore the piece of paper to shreds.

Just as Han Guangyao was dumbfounded, Ye Chen took the tablet in Han Guangyao's hand again, drew a red circle on a mountain about twenty kilometres away from his destination, and said to him, "Counting from the time I jump, six hours later, you arrange for a helicopter to come here to pick me up"
